Herod. vii. 8 that Xerxes held a great council of war in the third year of his reign before setting out for Greece, and that he returned to Susa in the spring of his seventh year,—which agrees with the dates assigned to the great feast and the choice of a successor to Vashti (1^3 2^{16}). (6) Although the narrative is minute and circumstantial, containing many names (of courtiers, princes, 10 sons of Haman, etc., $1^{10.\,14}$ 9^{7-9}) as well as other details, it is remarkably free from literary and historical discrepancies, such as have been detected in the Apocr. books of To and Jth and Ad. Est. According to Oppert, there is not a single proper name that may not be regarded as belonging to the idiom of Cyrus and of Darius, and after the conquests of Alexander such writing was philologically impossible. (7) The silence of contemporary and later writings regarding the events narrated in the Bk. of Est is partly due to the disappearance of literature bearing on the history of Persia, and partly to the interest of Herodotus and Ctesias being centred in the points of contact between Persia and Greece. As for the Bk. of Ezra, it leaves the period from B.C. 516 to 459 (between chs. 6 and 7) a blank, except in $4^{5.\,6}$.

On the other hand, the following are the chief objections that have been taken to the historicity of the book. (1) The story bears on the face of it the appearance of a historical romance, a number of its features being in themselves extremely improbable, *e.g.* the six months' feast, involving such prolonged absence of the governors from their duties in the provinces; the summons of Vashti before the assembled peoples and princes, and the subsequent decree, suggested by 'the wise men,' that every man should bear rule in his own house, which would have been the publication of Ahasuerus' folly; the long interval before the choice of Vashti's successor; the decree for the wholesale massacre of the Jews (not excepting those in Judæa, and numbering probably two millions) on account of the obstinacy of a single Jew; the publication of this decree eleven months before the time for its execution; the issue of a subsequent decree virtually sanctioning civil war; the immense slaughter of the Persians notwithstanding their superiority in numbers, and the wonderful preservation of Jewish lives, as well as the absence of revenge on the part of the Persians; the institution by Mordecai and E. of a feast that would perpetuate the disgrace of the sovereign in the eyes of his subjects, and embitter the relations between Jew and Persian (but cf. the annual commemoration of the massacre of the Magians, Herod. iii. 79—with which Niebuhr was disposed to connect the story). Add to this that the series of coincidences and contrasts culminating in the overthrow of Haman '*the Agagite*' (1 S 15—but Oppert connects this name with Agaz, a tribe of Media mentioned in the inscriptions of Sargon) and the exaltation of Mordecai of *the tribe of Benjamin*, is too perfect to have been drawn from real life. (2) The manifest aim of the writer is to encourage and glorify the Jews; and the whole narrative, which is marked by exaggeration and innuendo, is artfully designed to serve that purpose ($2^{15.\,17.\,22}$ $3^{2.\,15}$ 4^{14} $6^{10.\,11.\,13}$ 7^9 $8^{9.\,15.\,17}$ 9^{16} 10). (3) The references to 'the chronicles' may be merely a rhetorical device in imitation of similar allusions in Neh and Ezr (in this connexion it is noteworthy that the terms of the royal edicts are not given); or the sources referred to may be like the Bab.-Pers. chronicles, from which Ctesias professes to have derived information—the story being 'an example of Jewish Haggada founded upon one of those semi-historical tales of which the Pers. chronicles seem to have been full' (Sayce, *HCM* p. 475). (4) A strictly historical interpretation of the narrative is beset with difficulties. Neither Vashti nor Esther can be identified with Amestris, the only queen (judging from Herodotus and Ctesias) that Xerxes ever had. Nor is it easy to reconcile Ahasuerus' and Haman's ignorance of Esther's nationality with the frequent presence of Mordecai (who was known to be a Jew, 3^4) 'in the king's gate,' and his constant communications with Esther. Moreover, Haman's description of the Jews ($3^{8.\,9}$), as 'dispersed among the people in all the provinces of thy kingdom,' and of their disobedience to 'the king's laws,' is not true of the Pers. period (especially so early as the reign of Xerxes), and betrays a Maced.-Greek origin, as does also the stress laid on financial considerations (cf. 9^{10}), and the part taken against the Jews by 'their enemies' ($9^{5.\,16.\,22}$). (5) In several respects the writer's knowledge of Pers. customs is alleged to be defective (Grätz in *MGWJ*, Dec. 1886), *e.g.* the '127 provinces,' cf. the '20 satrapies' of Herod. iii. 89; the command to 'kneel' (כרע) before Haman, an act of worship due to God only and the king, while the refusal to 'do him reverence' by prostration (השתחוה = προσκυνεῖν) betrays a Gr. spirit of independence at variance with Gn 23^7 33^3 (cf. Herod. vii. 136); the un-Oriental toleration so long shown to Mordecai by the vizier; the queen's difficulty of gaining access to the royal presence; the alleged Semitic character of some of the proper names, suspiciously profuse, and very few of which occur elsewhere; and Mordecai's obscurity, notwithstanding his officially-recorded services to the king (2^{23}, cf. Herod. viii. 85). Even admitting the general consistency of the narrative, both with itself and with Pers. surroundings, this is held to be sufficiently accounted for by consummate dramatic skill on the part of the writer, and his possessing such a knowledge of Persia and its ancient régime as was attainable by a Jew who had lived in that country or even in Palestine in the Maced.-Gr. period. (6) The true explanation of the silence of ancient Jewish writers (Ch, Ezr, Neh, Sir, Dn, Philo) as well as of profane writers, is held to lie in the fact that no such facts as those related in the Bk. of Est ever took place. (7) The Heb. of the book, which closely resembles that of Ec, belongs to a much later time than that of Xerxes; and the way in which the writer explains Pers. customs (1^{13} 8^8) seems to imply that the Pers. rule was over, while his description of Ahasuerus, and of his wide dominions, and the magnificence of his court, gives the impression that he is recalling the glories of a bygone age. (8) In answer to the argument from the Feast of Purim, it is alleged that the story of Est was engrafted on a festival already in vogue among the Jews, borrowed from a Pers. or a Gr. source, for the purpose of promoting its wider observance or imparting to it a more national character; and various attempts have been made to trace it to a definite heathen source. None of these attempts, however (art. PURIM), can be said to be successful, and the connexion of the book with such an ancient Jewish observance still forms a considerable presumption in favour of its being founded on facts. It may be that fresh confirmation of its truth will be found in some of the monumental discoveries which still await the explorer, and that the suspicion attaching to its contents will yet be removed.

III. DATE AND AUTHORSHIP.—The date generally assigned to the book by those who maintain it to be historical is somewhere in the reign of Artaxerxes Longimanus, the successor of Xerxes (B.C. 464–425), or a little later; while most of those who regard the story as more or less of a legend or romance bring its composition down to the Gr. period, say in the 3rd cent. B.C. Hitzig traces its composition (as well as the introduction of Purim) to the Parthian ascendency after B.C. 238, and in the description of the Jews in 3^{8} he finds evidence that it was written subsequently to the colonizing activity of Seleucus Nikator. Others (Reuss, Grätz, Bloch, etc.) give it a still later date, tracing it to the time of the Maccabæan revolt (B.C. 167). Bloch regards it as an attempt to justify the Jewish party at the Gr. court, who thought they could best promote the interests of their country by conciliating the heathen power; but with this it is difficult to reconcile Mordecai's attitude towards Haman, or the slaughter of Pers. women and children and its commemoration. Grätz assigns the book to an adherent of the Maccabæan party, and, with the ingenuity of a special pleader, presents a great array of arguments to prove that Ahasuerus represents Antiochus (with some intentional vagueness as to the identity of Ah. himself), and that the book was intended to appeal to those who, like the deputies to Tyre (2 Mac 4^{18-20}), were disposed to resist the king's attempt to force them into idolatry, although they had very little religion of their own,—hinting at the influences which they might bring to bear upon the king, and at a possible turn in the wheel of fortune,—much as the Bk. of Dn was meant, a year or two later, to tell upon the more devout (Ḥasidim), who still believed in the possibility of direct divine interpositions. Kuenen and Cornill find in it an echo of the same struggle (cf. $3^{8.9}$ and 1 Mac 1^{41} $3^{34.36}$) after it was over (B.C. 135), when religious heroism had given place to animosity and pride. Similarly, Zunz believes it to have been an Eastern reflex (*c.* B.C. 130) of the Maccabæan enthusiasm, and lays stress on the lateness and servility of the language, as well as on the want of any recognition of the Jewish community as a whole, Mordecai and Esther being the only Jews who are credited with any influence. But the language, though late, is very far from exhibiting the stage represented by the Mishna;* and as regards the supposed Maccabæan origin for the story, it must be remembered that even under the Pers. rule (Jos. *c. Ap.* i. 22) there had been times when the Jews suffered persecution for their attachment to their faith. That the book was written by a Persian Jew may fairly be inferred from its tone and structure, notwithstanding Grätz' denial that the use of Heb. for literary purposes was possible outside of Palestine, except during the Bab. Captivity. It is vain, however, to attempt to determine the authorship more particularly. The references to Mordecai's writing in 9^{20-32} have given rise to the idea that he may have been the author; but the peculiaritiesof the passage, both in language and contents, stamp it as an interpolation or interpolations (vv.$^{20-28\ 29-32}$), perhaps borrowed from another book of Purim (v.^{32}). Moreover, some of the allusions to Mordecai (*e.g.* $9^{3.4}$) preclude the idea of his being the writer. All that can be said with confidence is that it was written by a Jew connected with Persia, and full of the nationalist feeling of his time, the absence of religious phraseology being due partly to the decline in the spiritual life of the nation, occasioned by centuries of exposure to heathen influences, leading to reserve in the expression of religious sentiment, partly to the secular character of the Feast of Purim associated with it, which rested on no divine authority, and was marked by a gay conviviality, varied with an occasional outburst of passion that was not favourable to religious solemnity. See further under PURIM.

J. A. M'CLYMONT.

ESTHER (Apocryphal).—See preceding article.

ESYELUS (Ἠσύηλος, B$^{a?b}$ ἡ σύνοδος, AV Syelus) 1 Es 1^{8}=Jehiel.—One of the rulers of the temple in Josiah's time (2 Ch 35^{8}).

ETAM (עֵיטָם, possibly 'place of birds of prey,' from עַיִט 'bird of prey').—It is uncertain whether there may not have been two places so called in Judah. The town Etam (1 Ch $4^{3.32}$) was in Simeon, near Rimmon. It may be the place fortified by Rehoboam (2 Ch 11^{6}), though there noticed with Bethlehem and Tekoa. The Rock Etam (Jg $15^{8.11}$) was Samson's refuge, and had in it a peculiar 'fissure' (סְעִיף) or 'cavern' (AV 'top'). In the Talm. an Etam near Bethlehem is noticed (see Neubauer, *Géog. Talm. s.v.*). These may represent three distinct sites. **1.** Etam of Simeon is very clearly the ruin *'Aitûn* near Rimmon of Simeon, on the hills N.W. of Beersheba. *SWP* vol. iii. sheet xxiv. **2.** Etam near Bethlehem is represented by the present *'Ain 'Atân*, at the so-called Pools of Solomon (Rom. reservoirs connected with Pilate's aqueduct to Jerus.), the traditional site of the 'sealed fountain' (Ca 4^{12}), identified by the Rabbis with Nephtoah. *SWP* vol. iii. sheet xvii. **3.** The Rock Etam is an undefined site, but may have been near Samson's home at Zorah. There is a remarkable rocky hill to the E., on which the village *Beit 'Atâb* now stands, under which is a curious cavern in the rock. The change of B for M is not uncommon (cf. TIMNAH), and this is a possible site for Samson's refuge. *SWP* vol. iii. sheet xvii.

LITERATURE.—Besides the above, see Robinson, *BRP*^{2} i. 477; Guérin, *Judée*, iii. 117 f., 303; Baedeker-Socin, *Pal.*^{3} 134 f.; Schick, *ZDPV* i. 152 f.; *PEFSt*, 1875, 12; 1876, 175; 1878, 116; 1881, 43, 323; Conder, *Tent-Work*, i. 275 ff.; Moore, *Judges*, 342 ff.

C. R. CONDER.

ETHAM (אֵתָם, LXX 'Οθόμ, Ex 13^{20}; Βουθάν, Nu $33^{6.7}$. The Coptic has επεθωμ, Ex 13^{20} [Wilkins], and εβουθαι [Wilkins], εβουθαν [Sah. Ciasca]. LXX and Cop. omit Etham in Nu 33^{8}).—The station at which the Israelites arrived after leaving Succoth. It is described (Ex 13^{20}, Nu 33^{6}) as being 'on the edge of the wilderness.' This wilderness (called W. of Etham, Nu 33^{8}, and W. of Shur, Ex 15^{22}) was traversed by the Israelites after crossing the sea. It must therefore be east of the Isthmus of Suez, and Etham would be on its W. edge. If on leaving Egypt the Israelites went along Wady Tumilat [see EXODUS (ROUTE OF), § i.], they would make for the broad tract of dry ground to the N. of Lake Timsah, and the position of Etham would be where their route crossed the Egyp. frontier, *i.e.* in the neighbourhood of the modern Ismailia. Naville places Etham here, but explains the word as designating the land of Atuma, which is mentioned in the papyrus Anastasi vi. The land of Atuma there mentioned is generally supposed to be the land of Edom. See PIHAHIROTH and the Literature under EXODUS (ROUTE OF), § ii. [Brugsch's 'Exodus and the Egyptian Monuments' may be read in English in vol. ii. of the translation (1879) of his *Egypt under the Pharaohs*, or in New Ed. (1891, in one vol.) p. 318 ff.]. A. T. CHAPMAN.

ETHAN (אֵיתָן).—**1.** 'THE EZRAHITE' of 1 K 4^{31}

---

* At the same time it must be admitted that, even after the Mishna style was formed, books in imitation of the classical style were written, otherwise Ec would have to be placed long after Sirach.

and Ps 89 (title). In the first of these passages he is mentioned along with other contemporaries (?) of Solomon, who were all surpassed in wisdom by the Jewish monarch. In 1 Ch 2^{6} he is said to have been a Judæan of the family of *Zeraḥ*, which is prob. another form of *Ezraḥ* (hence the patronymic *Ezrahite*). Instead of 'the Ezrahite' it has been proposed to render אֶזְרָחִי of 1 K 4^{31} 'the native,' *i.e.* the *Israelite*, in opposition to some of the other wise men named, who were *foreigners* (Cheyne, *Job and Solomon*, p. 131). The ascribing of Ps 89 to E. occasioned one of the curiosities of Rabbinical exegesis. אֶזְרָחִי was connected with מִזְרָח (the east), then 'the man from the east' of Is 41^{2} was interpreted of Abraham, and Ethan the Ezrahite was identified with the patriarch, who thus became the author of the psalm (Driver, *LOT* p. xxxiii, *n.*). **2.** An ancestor of Asaph (1 Ch 6^{42}). In v.^{21} he is called Joah. **3.** The eponymous ancestor of a guild of temple-singers (mentioned along with Heman and Asaph in 1 Ch 6^{44} $15^{17.19}$ etc.). His genealogy is traced by the Chronicler back to Merari, one of the sons of Levi. He is generally identified with Jeduthun. (See JEDUTHUN.) J. A. SELBIE.

ETHANIM (הָאֵתָנִים, 'Αθαμεὶν B, 'Αθανεὶμ A, *Ethanim*, 1 K 8^{2}). See TIME.

ETHANUS, one of the 'swift scribes' who wrote to the dictation of Ezra (2 Es 14^{24}). The name occurs in the MSS variously as Ecanus, Echanus, Elkana, etc.

ETHBAAL (אֶתְבַּעַל 'with Baal,' *i.e.* enjoying his favour and protection; 'Ιεθεβάαλ B, 'Ιαβάαλ A, 'Ιεθβάαλ Luc.).—King of the Sidonians, and father of Jezebel wife of Ahab king of Israel (1 K 16^{31}).

According to Jos., Ittobaal ('Ιθόβαλος, Εἰθώβαλος, *i.e.* אִתּוֹבַעַל 'Baal is with him,' a form of the name preferred by Thenius, Stade, etc.) was king of the Tyrians and Sidonians (*Ant.* VIII. xiii. 1), and is stated by Menander the Ephesian to have been a priest of Astarte who attained to the throne by the murder of the usurper Phelles (*C. Ap.* i. 18). This identification with the Ethbaal of K is allowed by moderns. The Taylor cylinder, *col.* ii. 48, mentions a later king of Sidon of the same name; Assyr. *Tuba'lu* (Schrader, *COT*, on Gn 10^{15}).

C. F. BURNEY.

ETHER (עֶתֶר), Jos 15^{42} 19^{7}.—A town of Judah noticed with Libnah, apparently near the plain of Philistia, given to Simeon, and near Rimmon. The site is unknown.

ETHICS.—The treatment of this subject is involved in a certain amount of difficulty, from the fact that while the ethical character of the whole Jewish dispensation is strongly and unmistakably marked, there is no ethical system, strictly so called, in the Bible at all. The ethical ideas, like the metaphysical ideas, underlie the histories, the prophecies, the legislation, and the writings of the apostles; they are not deduced or criticised, but assumed as premises. For such a purpose as that of the present article they have to be extracted and presented systematically; and there is always danger that when this is done some greater precision of definition may be given to the ideas than they really possessed.

There is another difficulty, even greater than this, which arises from the critical discussions recently raised over the authorship and date of books. This presses more hardly on the student of OT ideas than of Christianity. For even if the date of individual books of the NT be uncertain, the margin of uncertainty is comparatively narrow; and the period within which they all must fall is, comparatively speaking, a short one. Hence critical questions may be neglected without any serious loss. But with the OT it is different. We can no longer take for granted the traditional order or date of the books; and, what is much more serious, the period within which they must all have been written is a very long one, so that it would be unreasonable to expect that the ethical point of view can have suffered no serious change. It is obviously impossible to discuss the various critical questions by the way. We can only call attention to the part they play in the whole discussion of our present subject, and then leave them aside. The plan of the present article is, then, to set forth the ethical ideas in the Bible, as far as possible, without reference to the literary history of the books, following such order as the subject itself seems to require.

I. IN THE OT AND APOCRYPHA.—The first point requiring attention is one of great importance, which will have decisive significance in regard to our whole subject-matter. With the partial exception (considered later) of the Sapiential Books, the whole of the Jewish Scriptures are *under the sway of religion*. The ruling idea of life was conditioned by the prevalent conception of God, and the peculiar relation in which the Jewish people stood towards Him. Hence the larger portion of the discussions with which other ethical writings have made us familiar, has no place whatever in Jewish literature. Greek ethical speculation busied itself with the questions of the end of life, or the ideal order of life, or the nature of virtue, or the sanction of the moral law. But to the Jewish mind all these questions were prejudged by the peculiarly close relation of religion with life. The God they worshipped was to the Jews the source and the sanction of the moral law. Their moral evolution consisted in their gradual discovery of the full meaning of their primary ethical conviction. Their notion of the content of the ethical idea varied as time went on; their history is, in a sense, reflected in their ethical evolution. Things which at one time were thought compatible with the due worship of God, cease to be thought so; but the general relation in which they stand to God remains undisturbed: morality is, to them, the embodied will of God.

It follows necessarily from this that there are, roughly speaking, two, and only two, questions for the Jewish moralists. (1) What conduct does God command? (2) What conduct does God forbid? Why He ordains or prohibits one or another line of conduct does not matter to them. They are concerned only with the fact. The answers to these remoter questions may, to some extent, be revealed in the process of moral evolution, but they are not of primary interest or importance. The central question is that of the actual content of the divine law.

It might seem, at first sight, as if this theory of the moral law must exclude a people from any marked development in ethical matters. The most cursory glance, however, at the actual facts would destroy this supposition. The law of God is adapted to various stages in the progress of the people, and enforces the morality characteristic of the stage at which they are. It is obvious that this must necessarily have been the case. If, as the Jews believed, God Himself revealed the moral law to them, it must necessarily have been in terms which they could understand. It would have been idle, for instance, to promulgate to a nation, as yet only in the tribal stage of its existence, a law which assumed the existence of settled civic ideas. Thus the conviction of the special union of God with His people, and interest in their moral life, affects the character of the evolution of ethical ideas, but does not prevent their real growth.

(*A*) *The Pentateuch and the Historical Books.*—The note of law is struck in the account of *Paradise and the Fall.* In this story we have all the elements of the ethical idea as it presented itself to the Jews. God gave a command which man disobeyed. In like manner the sin which led to the Flood was disobedience or rebellion against God. The law of murder, enacted after the Flood has disappeared, is given as a definite act of legislation on the part of God (Gn 9^{4-7}). In the same way the sin of Sodom is represented as an outrage upon God; and the destruction of the cities as the judgment of God. When we reach the *times of Abraham* the same phenomena appear in a more complex form. The intercourse between God and man, of which the covenant after the Flood was typical, is concentrated and intensified in the relation of God with Abraham. A demand is made for a more complete and detailed obedience; and the rite of circumcision has a special significance assigned to it. The special covenant is based on the readiness of Abraham to accept the guidance of God; cf. Gn $17^{1.2}$. 'The LORD appeared to Abram, and said unto him, I am God Almighty: walk before me, and be thou perfect. And I will make my covenant between me and thee, and will multiply thee exceedingly.' The same idea of a covenant is sustained throughout the whole history between Abraham and Moses; the people are regarded as standing in a peculiar relation to God, and bound by it to certain lines of conduct. The protection and interest of God in the chosen family is represented as a thing which they are bound to cherish with the greatest care, and it is implied throughout that the arrangement is part of a larger scheme. The sin of Esau consists in the neglect of this covenanted right of access to God; and the blessing of Jacob consists in his fitness to be the vehicle of the covenant-relation, rather than in any commendation bestowed upon his own character.

Whatever may be the literary history of the books in which this story is preserved, there is no doubt that it represents the belief of the Jewish people, and, that being so, it characterized their ethical ideas. But it is important to notice also the area of moral action covered by the commands of God. We have already noticed the prohibition of murder, and the condemnation of Sodom. Apart from these, the morality consistent with the stage of civilization so far attained is implicitly permitted. There is no condemnation of polygamy; the fraud of Abraham upon Abimelech is not condemned, though its uselessness is displayed by the action of God; and, in like manner, Jacob's fraud upon Isaac is shown to be unprofitable by the fact of his exile. At the same time the witness of God is sought in order to preserve the validity of treaties (Gn $26^{27ff.}$), and His worship is regarded as distinct from that of many other deities. There is little sign at present of any elaborate moral reform depending on the covenant-relation; and the morality of the people as it is described is strictly governed by principles which prevail in the patriarchal stage. What is new and has the germs of much of the future development in it, is the intensification of the idea of the tribal God. The relation asserted between God and the family of Abraham is peculiarly close and far-reaching in its character; and the ground is prepared for the substitution of a moral for a physical or tribal basis of the covenant.

The next stage in the history as it is presented in the OT books is marked by *the Levitical legislation.* It is here, probably, that the difficulties caused by critical discussions reach their highest point. In pursuance of our plan we shall describe, first, the facts of the legislation as they stand, and reserve such discussion as there is space for, of the bearing of criticism upon the matter. Under the head of the Mosaic legislation we have to consider the Decalogue, the Priestly Code, and the Deuteronomic exposition of the Mosaic law. This will involve a brief consideration of the meaning and character of Sacrifice, and the meaning of Sin.

Of the *Decalogue* it is not necessary to say much. We need only call attention to the fact that it consists of two distinct parts: one containing prohibitions concerning man's relations to God, the other dealing more directly with ordinary social questions. The Decalogue throws comparatively little light on the condition of society at the time of its promulgation. It deals with acts forbidden before, such as murder and idolatry; but its last three sections imply the existence of a settled mode of life different from that of the patriarchal family. Theft, false witness, and covetous desire belong to a social state in which there existed within the social whole various houses or families holding property. The process of ξυνοικισμὸς must have taken place; but beyond this there is nothing that can be said definitely. It is, however, important to notice that the commandments come with the *imprimatur* of God upon them, and that the covenant-relation is alluded to in the prefatory verse as it stands in Ex 20^{2}: 'I am the LORD thy God, which brought thee out of the land of Egypt, out of the house of bondage.'

The *Priestly Code* consists of a number of regulations which are largely ceremonial in character. The laws of ceremonial uncleanness and other kindred matters are precisely defined: the great occasions of the ecclesiastical year are ordained, and the ritual due to them established. Further, the various types of sacrifice are described, the occasions on which they are to be performed, and the method of performing them. In regard to the whole of this legislation, we need only for our present purpose to call attention to two points. In the first place, it is important to observe that the whole order is rested upon the covenant-relation with God, and, more than this, that the character of God is placed in definite connexion with the rules laid down. The holiness of God requires this elaborate ceremonial order to preserve it from the contamination of hasty and unfit intruders, and to retain the condition of the people at a level high enough to enable them to use their covenant privileges. This is proved by the refrain which recurs at intervals in the course of Leviticus—'I am the LORD'; and by such marked phrases as the following: 'Ye shall not profane my holy name; but I will be hallowed among the children of Israel; I am the LORD which hallow you, that brought you out of the land of Egypt to be your God; I am the LORD' (Lv $22^{32.33}$). But, in the second place, it is no less important to notice the extraordinarily limited moral range of the laws enacted. In Lv 6 there is a short list of moral delinquencies which require the atonement of a guilt offering. These consist chiefly of broken pledge and other forms of dishonest dealing. Besides this there are sacrifices ordained for sins of ignorance: 'If any one shall sin unwittingly, in any of the things which the LORD hath commanded not to be done, and shall do any one of them; and if the anointed priest shall sin so as to bring guilt upon the people' (Lv $4^{2.3}$). If we are justified in referring this command to the legislation which appears in Exodus, it will include a certain number of other moral delinquencies. Thus, besides the Decalogue, there are regulations concerning assault and murder, the proper treatment of slaves, the relations of parents and children, and specially concerning idol-worship and magic. Besides these there are ordinances referring to lost property; the duty of actively aiding the restoration of straying animals is inculcated; the poor are remembered, and severe condemnations passed upon those who judge unjustly. The service for the Day of Atonement is placed in close connexion with the unwarranted intrusion of the sons of Aaron into the presence of the Lord (Lv 16^{1}), and is apparently intended to do away with ceremonial breaches of the covenant-relation, though the ritual would lend itself easily to a deeper meaning. See ATONEMENT (DAY OF).

The legislation in the Book of *Deuteronomy*, as it stands at present, covers a good deal of the ground of the preceding books. It repeats and further develops laws elsewhere laid down. There is the same rigorous condemnation of idolatry, the same care for justice and equality between man and man, and the like. But there is a more pronounced insistence on the moral character of God, and the close relation of God to the people in view of His moral character. He is represented as demanding exclusive worship, but as being faithful and long-suffering (Dt 7^{9}), caring not only for the people of His choice, but also in a special degree for the fatherless and stranger. The characteristic feature of Dt is that which it is now the fashion to call its *parenetic* tone; it goes so far, indeed, as to find a spiritual meaning for circumcision as opposed to that which is purely ceremonial. Moreover, the relation of the people to God is presented in a more spiritual manner: the 'first great commandment of the law,' 'Thou shalt love the Lord thy God with all thine heart, and with all thy soul, and with all thy mind,' is in Dt 6^{5}.[*]

It has seemed hardly consistent with the subject of the present article to go into any preciseness of detail as regards the Pent. legislation. Enough, however, has been said to establish the truth of the position maintained at the outset, that morality for the Jew meant that which God had commanded; immorality, that which God forbade. It is obvious that the Bk. of Dt takes a slightly different view of moral life from that which is expounded in Lv. The laws concerning the functions of judges ($12^{18. 20}$), the kingly office (17^{14-20}), the single central shrine, and the killing of animals for food (12^{15}), clearly contemplate, either in fact or in anticipation, the position of a settled nation. Similar cases might be quoted from the earlier books. But whereas in Lv the largest portion of the book concerns the ritual order in the land of Canaan, the Bk. of Dt is chiefly concerned with the religious effect upon the people.

One fact, however, is noticeable about all the books alike, and that is the highly archaic character of the regulations themselves. The law and the ritual of sacrifice, the importance given to ceremonial pollution, the practices connected with the avenger of blood, the use of the *lex talionis*, the levirate law of marriage, the use of the ordeal, are all of them archaic in character, and must have survived into later Judaism out of an archaic state of society. As in other cases upon which anthropology has thrown much light, practices have survived after their primary meaning has been lost. It is therefore reasonable to suppose that the evolution of ethics among the Jews followed something like the same course as among other progressive nations. Having been first expressed in terms analogous to those of early humanity all the world over, the distinctively moral elements were disentangled from the mass of rudimentary ideas, and took their place as the ruling principles of the religious polity of Judæa. It has sometimes been maintained that the elaborate ceremonial is a subsequent development to the more spiritual attitude of Deuteronomy. This is surely inconsistent with the teaching of anthropology. The more spiritual conceptions rise naturally out of the less spiritual; the moral truth breaks loose from the half-savage practice in which it was enshrined. It is almost inconceivable that this order should be reversed; and that the mind of the nation should have passed from a lofty spiritual conception of life to one that belongs by natural association to minds largely buried in matter. The characteristic note of this legislation is that God takes command over life as a whole, and, while the actual condition of the people is left unaltered, the way is prepared for further progress. The fundamental ideas as to right and wrong and the proper means of communicating with the national God are left unmodified; but practices are condemned which degrade and materialize the life of the nation and its conceptions of God.[*]

It has often been observed that the indications of the operation of the Levitical law are rare, if not altogether non-existent, in the historical books. It is certainly true that the supremacy of the sanctuary at Shiloh, and then later at Jerus., falls considerably short of the unique sanctity ascribed in the law to the central shrine of J″. Further, there are no records of the celebration of the legal feasts till the time of the later kings. It is plain that the worship of J″ had not established its hold upon the common people; they are continually liable to defections to the gods of neighbouring races. Moreover, the unity of the people is hardly attained; there are obviously differences of opinion and interest between various tribes. These facts and others like them have been quoted, reasonably enough, as bearing on the literary history of the books of the law. They do not affect what has been said above as to the archaic character of many of the legal enactments. And we may say even more than this. The records contained in the historical books are the records of a people emerging from the tribal state into that of national life. The assumptions of such a state of things underlie the action of Jael: they are displayed in the wars of extermination which form a somewhat repellent feature (to modern eyes) in the history of the invasion of Canaan, and in Samuel's denunciation of the Amalekites; they appear in the attitude of the Jews towards the gods of the neighbouring tribes, still more noticeably in such a story as that of the Levite and his concubine (Jg 19. 20), or that of Micah the Ephraimite (*ib.* 17. 18).

The means by which the change is effected is, to a large extent, the institution of the *Kingship*. It is this that prevents the separate action of the separate tribes, and develops the idea of a justice which is due to an individual, as opposed to the tribal notion according to which the tribe, not the individual, is the unit. At the same time it is clear that J″ is regarded as the protector of moral rights. David, for instance, commends Abigail for preserving him from the sin against the Lord that reckless vengeance implies (1 S $25^{27ff.}$). The eating of blood is a sin against J″ (1 S 14^{33}); there is, to use a modern phrase, a taboo upon the shew-bread offered to J″;[†] and other cases might be quoted showing that, though evidence is lacking for a complete ecclesiastical organization, such as is described in the Pent., much of the legislation embodied therein (and therefore the morality implied by it) dates from a time in which these social ideas prevailed.

(*B*) *The Prophetical Literature.*—We must now turn to the prophets and endeavour to estimate the importance of their work in the ethical development of Israel. They are rightly identified with the higher moral progress of the people; but it is necessary in dealing with them, more even than with any of the other OT authors, to remember that their writings are occasional and not systematic. They deal with the condition of the people as it appears to them, they comment on the vices which arrest their attention, and they give special weight to the effect of these lines of conduct on the field of politics.

---

[*] The second, 'Thou shalt love thy neighbour as thyself, occurs in Lv 19^{18}.

[*] Cf. Lv 18^{24} 20^{1-6}, Dt 12^{2-5} etc.

[†] It is not accurate to say, with Wellhausen (*Proleg.* p. 131, Eng. tr.), that there is no distinction between holy and unholy in the matter of the shew-bread.

The cycle of ideas in which the prophets move is much the same in outline, though of course some speak more precisely and fully than others.

(*a*) The most conspicuous feature in their moral doctrine is their sense of the union of the nation with God, and the interest of God in the moral development of men. Condemnations of idolatry and of all forms of defection from the proper allegiance to God are frequent in the prophetic books. The nation is described under the figure of a bride, bound by the marriage-tie to J″, and continually breaking it. This appears in Is, Jer, Ezk, Hos; it will not be necessary to quote passages in illustration of so familiar a phrase. The practices most frequently condemned are unrighteous judgment, oppression of the poor, and various forms of luxury and extravagance, especially drunkenness. These do not take us much beyond the ideas which appear in the earliest legislation. The development is to be found rather in the application of the ideas which have already prevailed, and in the appearance of some of the problems which necessarily belong to moral life. Thus the theory of evil receives some consideration. We have seen that the ceremonial legislation referred largely to ceremonial pollutions. It may possibly have been due to this association that the presence of evil was treated as a taint which affected others besides the actual sinner. On the other hand, holiness or righteousness was also regarded as a state which was effectual as a preservation against judgment. Thus in Abraham's colloquy with God (Gn 18) the presence of righteous persons is admitted as a reason for suspending the destruction of Sodom and Gomorrah. There is, of course, a real moral difficulty contained in this doctrine. It must be remembered that evil is inseparably connected by the Jews with acts of rebellion, *i.e.* with individual self-will and disobedience. If, therefore, others who have not taken part in the sin are involved in its consequences, it is obvious that a serious question must be raised as to the definition of responsibility, and the relation of responsibility to guilt. We find in Is a sense of the polluting effect of the presence of evil. Thus in the account of his call to the prophetic work (6^5) he says: 'Woe is me, for I am undone; because I am a man of unclean lips, and I dwell among a people of unclean lips.' Isaiah expresses the general effect of evil in the people, and acknowledges its influence upon himself. It is, further, a general doctrine of the OT that the guilt of sin extends to those who are connected with the sinner, as is expressed in the second commandment. These ideas give rise to several lines of moral speculation. In the first place, the sense of individual responsibility is greatly strengthened, so that we find in Ezk a definite restriction or correction of the principle laid down in the Decalogue. Thus (ch. 18^{20}), 'The soul that sinneth, it shall die: the son shall not bear the iniquity of the father, neither shall the father bear the iniquity of the son; the righteousness of the righteous shall be upon him, and the wickedness of the wicked shall be upon him.' This position is carried out on the side of virtue also; the presence even of the three men, Noah, Daniel, and Job, shall not avail to suspend judgment upon a sinful city (Ezk 14^{12-23}), nor shall righteousness at one time prevent judgment if a soul relapse into wickedness (Ezk $33^{10ff.}$). Responsibility belongs to the individual soul for actual things done, and for nothing else.

On the other hand, the prevalence of evil and the uncertain incidence of affliction absolutely prevent the adoption of the view that each man is punished simply for his own sins. Evil enters far too deeply into the constitution of things to be explained on these terms. Hence we find in Is and elsewhere the view expressed that God works through evil, and leads men to higher things. This notion is involved in the idea of *visitation*; it gives meaning to the metaphor of the *refining fire*; and it expresses itself in the doctrine of the faithful remnant. These are they on whom suffering and trouble have done their proper work; they have learnt the lessons which God was teaching them. This conception reaches a climax in Is 53. The boldness in language, which is so characteristic of the prophets, is nowhere more noticeable than in some isolated statements to be found on the subject of evil. Not content with describing the probationary functions of it in the divine order, both Amos and Deutero-Isaiah speak of it as the direct effect of God's action. 'Shall evil befall a city, and the Lord hath not done it?' Am 3^6. 'I form the light, and create darkness; I make peace, and create evil; I am the Lord that doeth all these things,' Is 45^7. These passages, in which 'evil' has not the moral sense but ='calamity,' 'misfortune,' are not inconsistent with the condemnation of sin ascribed to God, and with His character as elsewhere described. Their real aim is to express in the sharpest form the absolute supremacy of God over the whole course of things.

(*b*) A second point in regard to which the prophetic attitude is fairly consistent is the contrast between ceremonial performance and real morality. The emphasis laid by the prophets upon the moral law, the growing sense of the holiness of God, the comparative lack of moral reference in the ceremonial legislation, are factors in this development. Sacrifice in various parts of the world has tended to pass from an act of communion into an act of commerce. Instead of being a means of reopening intercourse that had in some way become suspended, it is a process of barter by which something valuable is given up or destroyed in order to secure some gain. Further, the tendency to polytheism—so rife in Palestine during the time of the kings—rests upon an assumption that it is worth while to make friends with a variety of gods in hopes of benefits to be received from them. This theory, as well as the other, is inconsistent alike with the ceremonial law as we now read it, and with the prophetic doctrine of God. In proportion, therefore, as the sense of moral conditions to communion with God prevailed over every other, it became necessary to insist on the inadequacy of sacrifice in itself as a means of religious approach. This law is a common subject of the declamation of the prophets. We find it in Is (1^{10-17}), Jer ($6^{19.20}$ etc.), Hos (2^{11} 6^6), Am (ch. 6), Mic (ch. 2), Zec (7^5), and many other places, and in a most elaborate form in II Is (58). In all these, the close relation of J″ to His people, their sinfulness and His hatred of sin, are the basal assumptions. It is the sense of the failure of material means of intercourse, and the difficulty of the more spiritual view of moral life, that gives force to the whole doctrine of salvation. The moral character of God was itself an assertion that evil was not final. If the means at hand of getting rid of it were inadequate, God Himself must take measures to remove it. The one thing certain is that it cannot remain unmodified; the holiness of God forbids this. Hence we find God continually represented as longing to pardon—rising up early and sending His prophets—that men may come back to their allegiance, and realize the blessings of the covenant-union. The two ideas are here held together—the separation from God caused by sin—the prospect of forgiveness from the side of God. It would take us into the region of theology, pure and simple, if we discussed this matter further; but it is impossible to avoid reference to it, as it is the characteristic feature of the ethics of the prophets, and is perhaps an inevitable result of the peculiarly theological tone of the ethical thought of Israel.

It has already been observed that the ordinary list of virtues and vices in the prophets falls roughly under the same heads as those in the law. They are vices or virtues connected with the intercourse of man with man; in other words, they are political rather than ethical, in the narrower sense. They belong to the political activity of the prophets, and express their influence upon the ordinary life of the State.

There are, besides these, certain other conditions mentioned from time to time which are more purely subjective. Such is the peace which comes to those who are in true union with God, which the wicked can never share. But these are not the most frequent types of virtue. For these and such conditions we must go to the Psalms.

(*C*) *The Psalms* really require a treatise to themselves to set forth their ethical contents adequately. They have formed men's devotional handbook for century after century; and this, in spite of the fact that they are full of national feeling, and are unmistakably Jewish. There are frequent allusions in them to the situation of the Jewish people in politics or warfare; they must have been written, in many cases, like the prophecies, in close connexion with various political events. Yet their significance is never exhausted. They have the twofold right to perpetuity, that they regard the current history in the light of the permanent principles that underlie all history and all life, and that they present these in the form of the highest poetry. The Psalmists see in the events of their own day the manifestation of the divine laws, and it is often this aspect of them alone which they present. Hence the task of dating the Psalms is no easy one; the particular immediate event is often lost in the sense of the universal laws, the working of which it displays. In this connexion, as before in this article, we must disclaim any intention of discussing or deciding the dates of the individual psalms, and confine ourselves to a general presentation of the moral indications in the book as a whole.

As before in Jewish writings, we have to notice the decisive way in which the character of God is represented as the rule for the character of man. A very striking expression is given to this principle in Ps $18^{25.26}$ (RV): 'With the merciful thou wilt show thyself merciful; with the perfect man thou wilt show thyself perfect; with the pure thou wilt show thyself pure; and with the perverse thou wilt show thyself froward.' The reference of all this is put beyond question by the next verse: 'For thou wilt save the afflicted people; but the haughty eyes thou wilt bring down' (cf. Ps 25^{8-10} $97^{10.11}$, and many other passages). Here, therefore, in the most decisive way, the character of God is represented as the moral ideal. If we ask, further, for greater detail in regard to this divine character, we find many points of contact with the books already considered. It is a commonplace throughout the Psalms that God has a fiery hatred of evil. This is especially displayed in a hatred of all forms of oppression. 'For the spoiling of the poor, for the sighing of the needy, now will I arise, saith the LORD' (12^{5}). 'Depart from evil, and do good; seek peace, and pursue it. The eyes of the LORD are toward the righteous, and his ears are open unto their cry. . . . The righteous cried, and the LORD heard, and delivered them out of all their troubles. The LORD is nigh unto them that are of a broken heart, and saveth such as be of a contrite spirit' (34^{14-18}). It is probably this care for the poor that leads, both in the Ps and Dt, to the condemnation of usury (Ps 15^{5}) and of unrighteous judgment (Ps 82 throughout). But the Psalmists take us much further than this condemnation of wickedness. God is represented as a God of loving-kindness—that is, looking with interest and love upon mankind. It is this character which, if the phrase may be used, accounts for and is expressed in the special intimacy between the Lord and His people. 'The earth is full of the loving-kindness of the LORD' (Ps 33^{5}): it is 'in the multitude of the loving-kindness' of God that the Psalmist goes to the temple (Ps 5^{7}): 'He showeth loving-kindness to his anointed, to David, and to his seed for evermore' (Ps 18^{50}). The merciful nature of God shows itself in two directions: in forgiveness and in judgment. The two are not apparently regarded as incompatible. He is full of compassion and gracious, slow to anger and plenteous in mercy (Ps 103^{8}). 'If thou, Lord, shouldest mark iniquities, O Lord, who shall stand? But there is forgiveness with thee, that thou mayest be feared' (Ps $130^{3.4}$). At the same time, upon those who work wickedness, the judgment of God falls severely and relentlessly. 'Thou settest them in slippery places; thou casteth them down to destruction' (Ps 73^{18} etc.).

The character of God as thus described forms the model of the true follower of J". His central motive is that of love and adoration to God; but, at the same time, he so far identifies himself with the cause of God that he too burns with anger against the wicked. This is partly the explanation of the tone of unmodified hatred that pervades certain psalms (esp. 69. 109). It is not merely the annoyance of a person whose will is crossed, and who vents himself in petulant cursing of those who stand in his way. It is the wrath of the person who feels that God's cause is attacked through him, and who is persecuted by the powers of evil. Such a condition is no doubt a perilous one; but it is important to observe that these psalms by no means stand alone. The echo of conflict pervades the whole book. The course of this world is largely affected by the presence of sin and unfaithfulness. The followers of God are not by any means in the majority; nor do they always prevail against their enemies. They pass through times of oppression, of menace, of persecution; they are the victims of treachery in the house of friends; they see the ungodly in apparent prosperity, and the holy things of God defiled and insulted. This condition of the world produces the fury against the enemies of God, already mentioned, together with some other remarkable conditions of mind. It is to this — the apparent triumph of the enemy—that we must assign the sense of being forsaken by God Himself which appears in Ps 22; to this also is to be traced the perplexity of mind as regards the providence of God which appears in Ps 73. The moods in which this problem is approached vary greatly. At times it produces deep depression, almost despair; at times it is treated (as in Ps 37) with calm and quiet triumph. But it is important, for it is to the Jewish mind the fundamental problem of ethics, to account for the lack of apparent balance between a man's lot and the life he leads. The idea of the probationary value of suffering appears in some places; but the full discussion of the problem belongs rather to the Sapiential Books than to the Psalms.

It would not, however, be true to suppose that all the evil in the world is due to the action of the enemies of God. There are in many places signs that sinfulness is regarded as a trouble that touches even the good. It erects a barrier between the soul and God which sacrifices and burnt-offerings are powerless to break down. In one place

(Ps 51^{5}) it seems to be regarded as affecting the actual birth of men. The man stands in solitary responsibility before God (49^{7} 51^{4}); and the essence of sin consists in not having the heart right (78^{8}). Together with this sense of incapacity and weakness may be classed the yearning after God which marks Ps 42, and the passionate enthusiasm for the service of God which appears in Pss 119 and 84.

There would be no difficulty in extending largely this account of the ethical features of the Psalms; but the space at our disposal does not permit it. We therefore can only point out here the general character of the whole book. It is essentially a book of reflective devotion. The whole of life is viewed from the point of view of the worship of and intercourse with J″. It never reaches the point of ethical theory, even in regard to the ethical problem noticed above. The solution, so far as any is offered, is always spiritual and religious, and not philosophical.

(*D*) *The Sapiential Books.*—It is in these only that we find any definite ethical philosophy among the Jews; and even in these, speculation moves over a restricted area. As in other nations, speculation begins in the proverbial form; the first moral philosophers were men who spoke proverbs. These trace their intellectual lineage to the wise king Solomon, who was wiser than Ethan the Ezrahite, and Heman, and Calcol, and Darda, the sons of Mahol . . . and who spake three thousand proverbs (1 K 4$^{31f.}$). These *proverbs*, if we may judge from the Bk. of Pr as we have it, were of a somewhat utilitarian tone. They started with the assumption that virtue leads to worldly success and happiness; and they dwelt on this relation with various degrees of insistence. They were maxims of ordinary prudence, rather than speculations as to ultimate moral problems, and the religious view of all these questions was somewhat left on one side. Moral practice is still closely allied with the fear of the LORD, but its natural outcome is expected to appear in the form of worldly prosperity. Thus 3$^{9.10}$ 'Honour the LORD with thy substance, and with the first-fruits of all thine increase: so shall thy barns be filled with plenty, and thy fats shall overflow with new wine.' The reflections upon life which fill up the larger portion of the book are also somewhat subdued in enthusiasm, and seem to lack in some degree high moral inspiration. But it must not be supposed that commonplace utilitarian reflections are the sum of the contents of the Sapiental Books. It is to these that we must trace the development of two of the most striking of all the ethical figures of the OT—the Wise Man and the Fool. The wise man is he whose life is orderly and well arranged—the man who follows the law of the LORD. The fool is he who is self-willed and sinful, and whose life therefore lacks principle, and fails to attain success. A large portion of the antitheses in the Bks. of Pr and Sir present the contrasted pictures of these two characters. They are seen in various relations of life; but the essence of the two characters lies in their different relation to the law of the LORD; for the fear of the LORD is the beginning of knowledge (Pr 1^{7}, Sir 1$^{14-20}$). 'All wisdom is the fear of the LORD, and in all wisdom is the doing of the law' (Sir 19^{20}). The grossest forms of transgression, as well as the less impressive, are regarded as acts of folly (see esp. Pr 7$^{6-27}$, and comp. Pr 10$^{8.9}$ 13^{16} 14$^{8.9}$ etc.). It is noticeable that the nature of wisdom and of folly consists, not in an accurate intellectual knowledge of things, but in a prudent or imprudent ordering of life. The wise man shows his wisdom by his right choice, his far-seeing plans, his control of passion, and avoidance of all self-assertion. The fool is he who does the exact opposite of all these things. See FOOL.

It is this notion of a wise ordering of practical life which reappears in the far more magnificent conception which we owe to these books—of the wisdom of God. This is conceived partly as an attribute of God, partly as a counsellor standing, as it were, by the throne of God. According to the latter view, which appears in some of the finest passages in these books, wisdom was the counsellor and helper of God in the creation of the world (Pr 8, cf. Wis 10, Job 28^{20} etc.), and has been conspicuously embodied in the law (Sir 24^{23}). Wisdom is the power that guides the history of man, and has watched over that of the chosen people (cf. Wis 10$^{15f.}$). Hence the previous connexion between morality and wisdom is explained. Man's wisdom consists in following out the embodied wisdom of God in the law.

This particular character of the divine wisdom brings us back to the consideration of the problems which, as has been already pointed out, appear in the Psalms. The problem of the true relation of virtuous action or righteousness is set forth, as in a tragedy, in the Bk. of Job. The author emphasizes the fact that Job was free from all blame in the truest and strictest sense. He bewails his misery—the cruel change of fortune which comes upon him; but in it all 'he sinned not.' He neither rejected the verdict of his conscience, which acquitted him of wrong-doing, nor called in question the supreme justice of God. In this he proves superior to the popular opinion on such matters, as it is represented in the utterances of the friends. And the justification of his attitude is found in the answer of J″ out of the whirlwind, the point of which consists in the assertion of the variety and mysteriousness of the activity of God. The question is not solved by any philosophical formula, but is referred simply to the nature of God Himself.

In the Bk. of Ec we find a much more gloomy point of view. In this case the obscurity of the whole matter presses very hard upon the author's mind. He is impressed with the apparent futility and lack of coherence in the life of man; he can see no purpose served and no object attained by the pursuit of wisdom, or the indulgence of pleasure, or the enjoyment of high place. Everything lies under the doom of vanity; there is no profit under the sun—nothing that endures, and can satisfy man's desire for the enduring. Under these circumstances he approaches the form of ethical thought which, in modern times, is called pessimism. Indeed he only falls short of it in so far as he finds the good of man in the grim adherence to the commandments of God (if Ec 11^{13} be genuine).

In both these works the general view of the life of man is closely akin to that which we have had occasion to notice before. It is noted (Job 1^{5}) that Job rose up early in the morning and offered burnt-offerings according to the number of them all (*i.e.* his family), 'for Job said, It may be that my sons have sinned, and renounced God in their hearts.' He deemed it necessary to provide against inadvertences of this sort as regards God, and this of course adds to the impression of his complete virtue. In later chapters we find the usual emphasis laid upon the protection of the poor, and the wickedness of oppression (cf. ch. 24. 31^{16} etc.), upon purity (ch. 31), and justice (29^{16}). In like manner, oppression is one of the things which attracts the attention of the preacher (Ec 4$^{1-3}$), as well as the vanity of the efforts of the righteous, when death comes and cuts short all that he is planning to achieve.

We may now review briefly the drift of this very imperfect sketch of the ethical ideas of the OT.

It seems that the central feature of OT morality is that it is religious; it is grafted on to the national faith and worship. But this must not be taken to imply that the ceremonial order was indissolubly bound up with the moral ideas; the various sacrifices, and the like, are, on the whole, held apart from the definite scheme (so far as there is one traceable) of virtues and vices. It would be truer to say that the ceremonial order and the ethical code are two co-ordinate developments of the one principle—the holiness of J". The character of God was the final rule of the life of man, and the archaic details of sacrificial purification were filled with this meaning; the great holiness of God demanded cautious approach. On the other hand, the general impression left upon the mind by the history of the people and the reflections upon their life is one of considerable simplicity. The acts condemned, the ideals commended, belong to a comparatively simple condition of society. Acts of violence and oppression are the chief burden of denunciation; the tendency is manifest to exact usurious interest; and there are some few other forms of sin noticed, such as drunkenness and impurity. But the real depth and value of Jewish moral teaching is found, not in the political or social sphere, but in the religious life. It is in the Psalms and in those passages of the Prophets which come nearest in tone to the Psalms that we find the permanent and supreme value of the Jewish notion of life. Varieties of religious emotion and aspiration such as we find in these forms are possible only to a people whose whole ethical outlook is religious.

II. In the NT.—When we pass over into the NT we come into an atmosphere which is in many respects strikingly different from that of the OT. In the first place, the literature covers a comparatively small area in point of time, instead of containing history and tradition from a long series of ages. Hence the type of life and thought, though there are signs of rapid development in it, is much the same throughout. Further, the history in NT describes in fragmentary style a single life, and the results which flowed from its activity. We are not concerned with the history of a people, but of a body that was included in, but claimed to be wider than, the firmly established Roman Empire. Our knowledge of its external history is comparatively slight; the emphasis falls on the development of its mind. Hence, while a large portion of OT requires to be explained out of the political history of the time, the tone of NT is more definitely moral, and deals more positively with the qualities and errors of individual minds; it is ethical rather than political. And once more, the NT stands in much closer relation to our own modern experience than anything in the OT. At the best, it is always difficult to get back to the point of view from which the OT writers spoke and wrote; there is much which it requires careful argumentation to explain at all. But with the NT this is different. In spite of the obvious differences of national character, and the effects of all the history that has happened since, we still feel that we understand and are in sympathy with the ethical attitude of those who wrote the NT books. Indeed, the fact that they seem so little strange is the measure of their effect.

On the other hand, there are points of very close contact between the OT and the NT. We do not find the same external conditions, but the moral attitude is much the same. The morality of the NT is essentially a religious morality; it stands in very close relation to the worship of God. That which was hope or aspiration under the old covenant is fulfilled in the new; the access to God, which was before an object of longing, is attained through Christ; the forgiveness, the lack of which so seriously complicated the ancient religious efforts, has become possible through Christ. This is, in fact, the central point in the comparison of the two systems; the note of the old covenant is *promise*, that of the new is *fulfilment*. From this most of the other differences may be derived, directly or indirectly.

As in connexion with the OT, so here, it will be impossible to enter into the various critical questions raised over the Gospels and Epistles. Taking the NT as it is, we shall endeavour to indicate its bearing on ethical questions.

(*A*) *The Sermon on the Mount.*—Different views have been taken as to the actual history of this sermon as it stands in the Gospels, and of its meaning in relation to the purpose of Christ. All are agreed that it stands to the new covenant as the promulgation of the law on Sinai stood to the old; it contains the law of the new kingdom. From this point of view two questions arise in regard to it. (1) What is its relation to the old law? (2) What new features does it add of its own?

(1) In the Sermon on the Mount the old law is revised and fulfilled; the precepts which it contained are interpreted, and their application deepened. Our Lord definitely affirms that He has come, not to destroy (καταλῦσαι), but to fulfil (πληρῶσαι). Hence He touches on a series of points upon which the law had defined its position, and develops them. The law of Murder includes in its prohibition the sin of anger and the harsh unforgiving temper.* The law against Adultery includes lustful thoughts, and condemns them. The law of Divorce and of Perjury are extended in like manner. But the law of Retaliation is reversed; and the narrow command to love the neighbour is extended so as to cover the enemy. In all this the difference lies not so much in principle as in interpretation. We are still in the region of law. Commands are addressed to the will from without, which it has to obey. But the significance of the law is increased tenfold by means of the application of the rules. They no longer concern outward conduct only; they touch the inmost springs of conduct in the heart. In this they are akin to the deeper aspirations of the Prophets and Psalmists; these too, though with less profound and unflinching moral insight, saw that it was in these inward regions that the real issue of right and wrong was to be tried. In the same way, on the positive side, in the matter of almsgiving, prayer, and fasting, our Lord lays emphasis on the spiritual side of these acts, without in any way condemning the exterior and formal aspect of them.

(2) But the indications given of the character of the citizens of the new kingdom contain the most significant departures from ancient rule. These appear chiefly in the Beatitudes, and in other parts of the NT in which the character of the new kingdom is described. The nature of the description given in the Beatitudes is not, perhaps, easy to bring into formal order; but there is no question as to the fundamental principles of the character therein set forth. Its rules and interests are in the spiritual world, and there alone. The rewards of its virtues are spiritual. The pure in heart see God; those that hunger and thirst after righteousness gain their desire; the merciful receive mercy; the poor in spirit (or the poor, Lk 6^{20}) are those to whom the kingdom of heaven belongs; the peacemakers are called the sons of God. The meek are said to inherit the earth; but this must not be assumed to contradict the blessing upon those whom the world persecutes. The general drift of the passage is to bless those who are characterized

---

* Cf. Philo, *De Spec. Legg.* Tom. ii. p. 314, ed. Mang.

by certain spiritual qualities, and to leave on one side their relation to the ordinary standards of the world. The opinion of the world is, as such, of no value; all that matters is the spiritual condition of the citizens of the kingdom. In like manner, later on in the sermon, the motive to prayer and fasting is found in the same region. The critical temper is excluded from the true life (Mt 7^{1-5}, Lk 6^{37-39}); and it is distinctly asserted that care is to be exercised in the presentation of that which is holy. The whole temper indicated is inward and spiritual, though it is affirmed that the character must be expressed in act: the tree is to be known by its fruit.

(*B*) Similar principles appear in our Lord's *Parabolic teachings.* A large number of the parables refer to the general characteristics of the new Society, and therefore do not immediately concern us.* But others deal directly with moral character. Thus the Parable of the Unmerciful Servant deals with the law of forgiveness; that of the Pharisee and the Publican condemns self-righteousness; the Good Samaritan defines the duty of the love of our neighbour; that of the Two Sons distinguishes true and false obedience. Dives and Lazarus illustrates the peril of the love of this world. Besides these, the Prodigal Son, the Unjust Judge, and the Friend at midnight declare the relations between the true believers and God. In these, and in the generality of the teaching recorded in the synoptic Gospels, our Lord uses a quasi-proverbial method. He does not promulgate rules of conduct, but describes in indirect fashion the principles upon which true conduct is to be based.

(*C*) In the more profound teaching recorded in *St. John's Gospel,* we are taken still further into the inner secrets of the moral life. While in the Synoptists we have the life presented in the simple picture of the Two Ways, St. John represents the true and the false life as two opposed conditions of being—Life and Judgment. This, while it contains ultimately the same idea as the simpler language in St. Matthew, lies deeper, and contains assumptions which do not appear elsewhere. In this type of teaching, as in the other, the essential principle is that human life is truly seen only on its spiritual side, and that in this view of it there is a single issue offered for the determination of each particular man. That course which places man on the side of God is described as Life; the other is in itself Judgment. Further, whereas in synoptic tradition we find our Lord opening His mission with the preaching of repentance, so, in the first discourse recorded by St. John (ch. 3), He sets forth the necessity of regeneration for the recognition of and entry into the new kingdom. Here, again, the positions are ultimately the same, but that in St. John is the deeper. The new birth spoken of is essential to the repentance. Once more, the need of faith, which is constantly emphasized in the synoptic Gospels, is by St. John shown to involve moral issues of a serious kind. It is the self-assertion, the self-seeking of the Jews, that prevents their understanding the claims of Christ. And, lastly, it is union with Christ, and dependence upon His life, which sustains those who are His representatives in the world. And thus, again, a moral virtue inculcated in the synoptic tradition is asserted in deeper form in St. John. The love which the followers of Christ are to have to one another rests upon their union with Christ, the indwelling of the Spirit, and has as its ideal the love of the Father and the Son.

In this Gospel there is very little direct exhortation, even of the proverbial kind. The most conspicuous parenetic passage is that in which our Lord (as also in the other Gospels) lays down the absolute necessity of sacrifice for all (Jn 12^{25}). The discourses are concerned rather with the exposition of the final conditions of moral action, and in this sense they are of vital importance for the Christian ethic. It should be noticed that they deal with action, so it seems at first sight, very simply. Truths which are complementary are stated, sometimes in antithesis, sometimes without any sign in the context of the complementary truth, which may appear elsewhere also without qualification. Thus, in ch. 6, the mysterious relations of the work of the Father and the coming of men to Christ are asserted, but not connected by any theory. Or, on the other hand, the judgment given is said to be the coming of the light into the world, and the consequent action of men (3^{19}); whereas in vv.$^{22.30}$ judgment is placed in the control of the Son of Man. This is largely due to the close connexion of the discourses in this Gospel with the circumstances under which they were delivered, and to the fact that, in life, different aspects of complex unities have a tendency to emerge into exclusive prominence. But the great importance of all these passages for our present purpose is this: they represent the Christian development of the principles already asserted in Judaism—the connexion of the character of God with moral life, and the historic operation of God in the lives of men. Where God declares Himself as a merciful God—in answer to the request of Moses to see Him—and declares His condemnation of the guilty (Ex 34^{7}), Christ in St. John sets out the love of God as the rule of life for the Christian society (Jn 17^{26}). Whereas in the OT the hand of God is seen in the guidance of man throughout his life and history, Christ in St. John affirms definitely the entry of the Father's will into the actual life and choice of individual man. The importance of this, in regard to life, can hardly be exaggerated. It means that the apparent simplification of moral ideas attained by referring all things to a spiritual standard must not be regarded as extinguishing all moral problems. The Gospel of St. John contains no elaborate discussion of such problems, such as we find in St. Paul's Epistles; it only indicates, in the direct way which lies close to immediate experience, that they are present. Thus we derive from the preaching of Christ, not only a deeper view of positive duty, but also an indication of a large field of moral thought of which comparatively little had been known before.

(*D*) In turning to the *Apostolic Epistles* we find the Church engaged in the endeavour to introduce the Christian law into the world. We derive, therefore, from these writings some knowledge of the effect of Christianity upon the life of Greece and Rome. And, further, we find in the Epistles, especially in those of St. Paul, an endeavour to connect the faith of the Church with its practice. It will be desirable to consider these points in the reverse order, as the dogmatic basis of Christian practice in many cases largely determines its form. In the first place, let us observe that there are, in the NT writers, certain moral premises or assumptions which are inherited from the OT, and have been accentuated by the teaching of Christ. The end of man is union or intercourse with God, and sin impedes it. Men are in a position of enmity—sin dwells in them—the wrath of God at present abides upon them—they have not passed from death to life. And they have no power of their own to break loose from this position; the old lamentations of the Psalmist over their moral incapacity are taken up and confirmed by the authority of the apostolic writers. However great and sincere man's desire may be to attain to virtue and to holiness, there is an impediment. The law did little to improve the position; it killed instead of reviving; it displayed the real nature of sin, so far as man was capable of appreciating it, but it gave him no power to express his knowledge in his life. The sacrifices and other ceremonies, which were part of the legal dispensation, could never take away sin. They only symbolized a purification which they could never convey.

---

* Such are: the Leaven, the Draw-net, the Hidden Treasure, the Seed growing secretly, etc.

In all this the apostolic writers are using partly ideas which are inherited, partly ideas which are original in them. The sense of failure and ruin appears, as we have said, in the OT, but in the Epistles it is more precise in itself, and its causes and range are more clearly known. The disabilities thus described are removed by the work of Christ. And it is in consequence of this that the dogmatic basis of the Christian practice is so firmly and carefully fixed. The views of man's condition, with which the apostles start, are such that the first thing to be done in order to attain morality is to remove the impediment which at present bars the way. To describe the advantages or the beauties of moral life—to develop a system of new and attractive moral ideas, is secondary to this; to have made it the first interest would have been to leave mankind in the position of the law. It was power they wanted, more even than knowledge. Christ in His teaching had concentrated attention increasingly upon Himself; the central feature of the discourses recorded by St. John had been the presentation of Himself as satisfying in various ways the desires and the needs of man. Thus the apostles had general guidance as to the way in which they were to deal with life, as well as particular instructions for certain occasions. Christ had not, so far as we can gather from His recorded teaching, entered into any detailed and precise account of the effect of His work in the moral world. It is this that the apostolic writers undertake.

In this respect it is possible to observe development and the presence of individual tendencies of thought. At first, the sum of their preaching seems to be contained in the phrase, *Jesus is Lord.* The resurrection, of which all are witnesses, is the proof of this; and the effect is that men have repentance and remission of their sins. The Holy Spirit has been poured out upon them, and they have thus gained various moral and spiritual powers. They are not left, as before, to struggle vainly; a new spring of new life has entered into the world, arising from the person of the risen and ascended Lord. St. Paul develops this position with great fulness in his Epistles. 'If Christ be not risen,' he says (1 Co 15^{17}), 'ye are yet in your sins.' And this position is elsewhere described as the state 'under law,' the condition of inability and partial knowledge which prevailed in the earlier dispensation (Gal 4$^{5ff.}$). There is no question that to St. Paul's mind the possibility of moral achievement depends absolutely on the person and work of the Son of God. And we can go further than this. The death of Christ, which was the means of removing the barrier of separation between us and God, was of the nature of a sacrifice—a sacrifice of propitiation (ἱλαστήριον, cf. Ro 3^{25}). Thus the ancient efforts at reconciliation were made effectual. In similar fashion St. John represents Jesus Christ the righteous as a propitiation (ἱλασμός) for our sins and for the sins of the whole world (1 Jn 2^{2}). The author of the Ep. to the Hebrews dwells at length upon the unique importance of the priesthood of Christ, and emphasizes the effect of it upon man's relations with God. St. John, the cast of whose mind is more contemplative than argumentative, sets forth as the essential condition of real Christian life, the confession that Jesus Christ is come in the flesh (2 Jn ^{7}, cf. 1 Jn 5^{1}). His characteristic interest is in the truth of the incarnation considered as a fact in history; his treatment of all the other points arises out of this. The others, not less certain than St. John as to the nature of Christ, have given more space to the discussion of the redemptive acts of Christ. But, in spite of differences in the nature and order of the presentation, one salient fact appears on the very surface of the NT, namely, that moral life depends upon the acts and the nature of Christ; in other words, that the true basis for morality is theological. The controversy over the principles of faith and works, which occupies so large a place in St. Paul, has no meaning apart from this; it arises, and is of practical importance, just because it affects the relations of God and man. In like manner, as has been already implied in our remarks upon St. John's Gospel, the controlling will of God in history becomes an element in man's moral life; and in this connexion we have, of course, the Pauline doctrine of predestination. Here, again, we are dealing, not with a mere philosophical speculation, but with a series of facts which must be taken into consideration in any valid account of actual practical life.

It would be beyond our purpose to dwell further on these theological points. We have said thus much about them in order to call attention to the fact that the Christian ethic as it appears in the NT, rests upon certain convictions as to the nature and acts of Christ. The whole bearing and range of morality depends upon these.

We must now return to the other matter remaining for discussion, viz. the attitude of the Church in its endeavour to spread the Christian view of life through the world, and in this connexion we shall consider two points—(1) the general attitude of the Church towards practical life; (2) the system of virtues and vices which flowed from the use of the Christian ideal.

(1) We notice, first of all, that the Church displays an attitude of unflinching hostility to all that is characteristically worldly. The world, to the eyes of St. Paul, presents a spectacle of varied and widespread wickedness. The heathen have lost the light that might once have belonged to them, and, as they have lost the knowledge of God, have fallen into idolatry, and so into gross sin. They have concentrated their attention and interests upon the material side of life, and find their satisfaction in the created world (Ro 1$^{18ff.}$). The same point appears in connexion with the moral use of the term 'the flesh.' St. Paul does not mean by this that the flesh, as such, is the seat of evil; but it is the material and transient side of man's nature, which has no right to stand as the object of his life. The works of the flesh (Gal 5^{19}) are all those acts and states of which the real explanation lies in man's choice of the material and transient, his desire for selfish satisfaction. Though there are still higher ideas and signs of moral aspiration among the heathen, yet the predominant note of their life is degradation and sensuality.*

---

* It is always hard to read St. Paul's descriptions, esp. in Ro 1, without wondering whether he has exaggerated, and, if so, to what extent. It must, however, be remembered that we derive our views of the ancient world rather from the highest minds of the particular periods we consider, than from men on ordinary levels. It was these lower, more ordinary strata of society with which St. Paul was chiefly acquainted. And, further, there can be no question that the entry of Christianity has altered the face of things in many more directions than we ordinarily think; so that, in all probability, the tone of ancient society is much farther from us than we are wont to suppose. St. Paul represents the case of a person with sentiments very like our own acting and thinking under the old conditions. And, lastly, it must always be remembered that St. Paul's method of presenting his ideas is to insist strongly on one aspect of a matter at one time, modifying it or insisting on the complementary truth in

In like manner, St. John speaks of the world as lying in the evil one (*κεῖται ἐν τῷ πονηρῷ*, 1 Jn 5^{19}), and uses the word *κόσμος* somewhat in the same way as St. Paul uses the word *σάρξ*, for the material creation considered, first as apart from, and then as hostile to God. The world is guided by principles of self-will and self-indulgence, and is doomed to pass away with all the objects of its desire. As Christ had anticipated persecution and hatred for those who followed Him, so St. Paul and St. John recognize an endless hostility between the world and those born of God—between the flesh and the Spirit. There is no compromise and no cessation in the strife.

Hence the first thing which strikes us in the general attitude of the Church towards the world is its uncompromising hostility. But in large measure these phrases, the flesh and the world, stand for tendencies or principles rather than for individuals. These tendencies appear in individuals; but there is quite another aspect in which the individuals arrest the attention of the Church. The world from this point of view is capable of being saved; and this fact determines *the character of the warfare.* There is no limit to the sacrifices which must be expected of the Christian: he must, as Christ said, hate his father and mother if he is worthy of his calling. But he will not retire into himself, and live an isolated withdrawn life in which mankind in general has no part. He will live quietly in the state in which his lot is cast, fulfilling ordinary duties of citizenship (Ro 13, cf. 1 P 4^{15}), accepting even such an institution as slavery (1 Co 7^{17}, Philem), without strife or cry. At the same time, he will not conceal his way of life, nor evade inquiry into its motive; the power of example, the mere presence of the new principles of action, will tell. The world will know by this the disciples of Christ—by the fact that they love one another. And the love to the brethren, which is the sign that they have passed from death to life (1 Jn 3^{14}), is extended to the neighbour, and in this is the fulfilling of the law (Ro 13^{10}). As God loved the world, even when men were in a state of rebellion against Him, so those who are called by the name of Christ will endeavour, so far as in them lies, to fulfil God's desire to save it. Thus the Christian's attitude towards the world is partly hostile and partly friendly—hostile so far as the world tries to convert him, but friendly in so far as he endeavours to convert the world. We must now consider certain special conditions of mind which, owing to the peculiar views of life characteristic of the Church, are now brought within the ethical sphere.

(*a*) We propose to consider, first, three moral conditions which are sufficiently similar to admit of such treatment, and which all depend upon a lack of zeal or whole-heartedness. In Ja 1^{5-8} we find a severe condemnation passed upon the *δίψυχος* or *double-souled* man. In Rev 3^{15-17} the severest judgment of all those passed upon the Seven Churches is the denunciation of the *lukewarm* (*χλιαροί*). And, again, in Rev 21^{8} the first of those whose portion is the second death are the *cowards* (*δειλοί*). These three words, especially in view of the context they are in, seem to convey more than a reproach upon vacillation of purpose. The man who is double-souled and unstable in all his ways fails to obtain his prayers; his life loses consistency and firmness, and becomes like the sea, driven by the wind and tossed. So the lukewarm is worse than the open enemy ('I would thou wert cold or hot'), and the coward is coupled in his condemnation with the unfaithful as well as those who are guilty of open and obvious sin. All three are cases of insincerity. They are attempts to serve two masters, and they lack the absolute singleness of aim which Christ demands of those who follow Him. The severity of the condemnation upon them is the measure of the importance of the demand made upon the believer. He is to live a spiritual life pure and simple, guided by spiritual principles and spiritual aims; cowardice or lukewarmness or double-souledness is nothing less than the surrender of all this; in other words, the rejection of Christ. On the positive side, we have St. Paul's exhortations to sincerity of work (Col 3^{22}), to tolerance of weaker consciences in all things lawful (1 Co 8^{8-13}, Ro 14), and these exhortations are based upon the same general principle. The sole concern of men is to be their relation to God, and this will colour all that they do in the ordinary ways of life.

Under the same condemnation will be placed various sensual sins. Thus St. Paul bases his exhortation to purity on the true function of the body, and its capacity as a temple of the Holy Ghost (1 Co 6^{12} etc.). Covetousness, mentioned at the end of a list of sensual sins, is stigmatized as idolatry (Col 3^{5}); the love of money is said to have power to pervert men from the faith, and to be a root of all evil things (1 Ti 6^{10}); and again the love of pleasure is set over-against the love of God (2 Ti 3^{5}). In all these cases the error lies in misdirection of aim, the transient is preferred to the eternal. They are not merely breaches of law, or, as a Greek philosopher might have said, disturbances of the due balance of man's nature. In the light of the faith they are errors in principle, a choice of the wrong thing altogether.

This singleness of aim takes shape in social life in various noticeable forms. The bond which holds the Christian society together is love—love to God and love to the brethren. This, in itself, would prevent any violence of self-assertion or rivalry. But there are also positive virtues based upon the conception of the Christian society. One of the most striking of these is *humility.* This appears in St. Paul primarily as a social virtue. It consists in voluntarily accepting a subdued estimate of oneself. It is distinguished from all diffidence or indisposition to accept the call of God to special work by the fact that it deals fairly and simply with reality. On the practical side it consists largely in doing without hesitation or discontent the work assigned. So St. Paul exhorts the Romans (12^{3}) not to think more highly of themselves than they ought; and gives as his reason their unity in the body of Christ. Immediately afterwards he exhorts them to perform faithfully the function that has been allotted to them in the Church. So in the Epistle to the Philippians (2^{3}) the spirit of humility is opposed to the vainglorious temper, and the factious ungracious service of a hireling. So St. Peter finds in humility the principle of church order (1 P 5^{5}). Thus the normal aspect of this virtue in the apostolic writings is social; it answers to the social reserve of the Greeks—the disposition to give and take without savage selfishness or personal rivalry. But it differs widely from this, in that it is not based upon the mere fact that all men cannot have the same thing, and must give way to one another; it rests upon a positive love of men, one to another, and a profound conviction of the unique value of spiritual things. Moreover, it goes back upon the example and the precept of Christ Himself; it is a conspicuous embodiment of His mind and temper.

In this connexion it will be well to speak of another virtue which holds a high place in St. Paul's teaching. In the list of the fruits of the Spirit (Gal 5^{23}), the virtue which appears at the

---

another context. If Ro 1 represents the darker side of his mind, Ro 2, not to mention his practical attitude towards the Gentiles, represents the aspect of the question neglected here.

end as a kind of climax is ἐγκράτεια, *self-control.* It will not be justifiable to press too far its position in this catalogue; but there can be no doubt that it holds an important position in St. Paul's mind. It is one of the qualities required of the bishop (Tit 1^{6}); it is inculcated by the example of the zealous athlete (1 Co 9^{25}), and it appears in 2 P 1^{6} as a stage in the progress of men in this world. It is in regard to this virtue, probably, that the ethical ideas of the apostolic writers differ most characteristically from the views of contemporary Gr. writers. The Gr. view of virtue was chiefly that of a condition attained after struggle; it did not contemplate the persistence of temptation, or of any disposition to yield on the part of the virtuous man. The material side of man was not, so to speak, an actual element in virtuous action; it required suppression, not control: on the other hand, the Christian virtue does not pretend to introduce warfare or separation into the organization of man. It recognizes the need of self-control, but the character of the man who manages his physical nature and keeps it in its proper relation to his whole life is selected for commendation. The ἐγκράτεια of St. Paul is a more real thing than the σωφροσύνη of a Gr. philosopher; and it is not, morally speaking, a lower conception of virtuous life.

(*b*) We now come to consider three states or conditions or virtues which are most of all identified with the Christian point of view. These are the well-known triad, *Faith, Hope,* and *Love.* They are for the most part identified with St. Paul, and found especially in 1 Co 13. But it is not true to suppose that they are limited to that passage. They occur in close connexion, both in St. Peter ($1^{1.\,21.\,22}$), and in the Ep. to the Hebrews (10^{22}), and in other passages of St. Paul (1 Th $1^{2.\,3}$ 5^{8}, Col 1^{3-5}). Indeed their connexion is so remarkable that it has been recently argued that it must have been based on the teaching of Christ Himself.* Without committing ourselves on this point, it is at least worth noticing that the connexion is frequent, and it is natural to infer that it had some definitely ethical significance. The question then arises, What is implied by the combination of these three virtues? There is practically no doubt as to the meaning of ἐλπίς and ἀγάπη. It is true that ἐλπίς means sometimes a particular state of mind, sometimes the object on which it rests, but there is no serious ambiguity. But with the third πίστις this is not the case. It is ambiguous (1) because it stands both for the temper of the faithful person and for the object of his faith; but (2) more seriously, because the character of the moral temper is not clear. The word means not only trustfulness, but also trustworthiness. And even in those passages where the context excludes the passive sense, there are further differences in the associations given by various writers to the words. St. James (2^{19}) seems to mean by it little more than an intellectual assent to a proposition; it is a state of mind in which the devils can be said to be. The word in St. Paul has a moral rather than a purely intellectual meaning. It describes the temper of one who, in full view of all that makes the other way, trusts in the character and power of God (cf. Ro 4^{19} RV). And so St. Paul speaks naturally of faith being made active by love (*ἐνεργουμένη δι' ἀγάπης*, Gal 5^{6}). It is inspired by the love of the person on whom it rests, and therefore does not fail. In the Ep. to the Hebrews we again notice a slight variation in use. The author describes faith in somewhat precise fashion as 'the substance of things hoped for, the evidence of things not seen' (11^{1}). By this he seems to mean a certainty in the mind of the faithful person that the hopes he has will be realized. The confidence is so great that he seems almost to have in his possession the things which are not yet in being. Such a man, like Moses, 'endures as seeing the invisible.'

It is somewhat difficult to describe succinctly the character in which these three virtues converge. It must be remembered that, for the apostles, the death and resurrection of Christ were the primary and salient facts with which all life had to deal. Hence these determine the primary reference of the faith, hope, and love of the believer. His *faith* rests upon Christ as risen and ascended; his *hope* is in the consummation of God's purpose in the world; his *love* is directed to the Father who guided, and the Son who effected, his redemption. The whole atmosphere of the Epistles is full of these facts, and all practical results which flow out from the presence of these virtues are dependent on the truth of these facts. Thus, because the believer holds to the truth of the death and resurrection of Christ, he has certainty, where others doubt, in his view of the history of the world and of himself. His *faith* is not a blind acceptance of anything that happens. He knows as well as any one the difficulties in life, and the darkness which hangs over human things. He sees things occur which he did not foresee and cannot explain. But he is not in presence of a mere chaos of irrational forces, with a blind belief in the existence of a purpose behind them; he has a sure confidence in the death and resurrection of Christ; that is, he is able to take them as a type of the action of God, and to find in them a ground of anticipation for the future. Because Christ has risen from the dead, instead of being of all men the most miserable he is the person of all others who has a sure hold upon life. See FAITH.

In like manner, the natural object of the virtue of *hope* is the second coming of our Lord, and the consummation of all things which that event will bring. It is this hope that enables men to endure the sorrows and pain of the world; it is hidden in some sort in the groaning and travailing of creation (Ro 8^{18-25}). It results from the steady endurance of persecution (Ro 5^{5}), and it does not make ashamed. It is not difficult to see how this confidence in the future will affect life on its practical side. It involves no unreality, and no optimistic veiling of the real evil in things. With a full sense of the presence of pain and other troubles in the world, it looks upon the course of history with certainty and fearlessness. There is no haunting dread lest the world may be, after all, a chaos of irrational forces without purpose or true guidance; because the events of Christ's life, the truth of His person, and the certainty of His promises, prevent all such hazy and depressing conditions of mind. The virtue of hope is closely allied with the virtue of faith. They both rest upon the character and self-manifestation of God; they both affect life by bringing within its sphere the realities of the spiritual order.

And, lastly, the virtue of *love* depends upon the cessation of the feeling of hostility and estrangement which had so long been abroad in the world. The efforts of God for the salvation of man, His care for the souls of individual men—that is, the prominent events in the incarnate life of His Son—commend the love of God to us. From of old, men had sought by various means for intercourse with God, and yet had fallen short. The life of Christ opened the way to a fuller communion than they had ventured to anticipate. The law of God, seen in the light of the death and resurrection of Christ, could be a regular principle of action; not imposed arbitrarily from without, but accepted and understood as the true form of intercourse with God in life. Again, in regard to men, the old barriers which separated them would tend to be broken down, because all alike came under the condemnation of sin and within the range of salvation. The brotherhood of men amongst themselves is the expression of the knowledge of the love of God towards all. To profess love to God and to fail in love to man is, morally speaking, a contradiction. The one, by the logic of moral life, involves the other.

---

* Resch, *Agrapha*, p. 181; cf. Ropes, *Die Sprüche Jesu*, p. 24. Both these works are in Harnack's series of *Texte und Untersuchungen*, Bd. v. 4 and Bd. xiv. 2.

We have now concluded what it seems necessary to say as to the ethics of the Bible. It would be possible to develop the similarities and the contrasts between the ethics of the Greeks or of modern philosophy and the moral doctrines of Christianity. Or we might endeavour to trace the effect of the principles here indicated in the history of the Christian Church. Both of these topics would be necessary to a complete discussion of Christian ethics. Being restricted here to the ethics of the Bible, we must leave them aside as irrelevant. It remains, therefore, merely to emphasize the general principles which follow from our consideration of the subject. It seems to emerge clearly as a result of the whole, that the ethics of the Bible from one end of it to the other are *religious*. In the early days an ethical meaning was given to religious ceremonies which distinguished them sharply from the generality of such rites. In the hands of the prophets the ethical principles of life were asserted with exceptional vigour and clearness; but always, with however severe a side-glance at ceremonial, as an essential element in the worship of J″. In the Psalmists the various shades of moral feeling are described with infinite knowledge and fulness, but the further reference is always to the desire for intercourse with God. Even in the Sapiential Books, where the tone is least lofty and spiritual, the wisdom of man is found in the fear of the Lord and in obedience to His law.

The change which results from Christianity is partly due to the deeper insight and more alluring attractiveness of the example and preaching of Christ; but it owes more still to the vast increase in knowledge of actual spiritual truth which Christ brought to man, and the infinite significance of the acts of Christ upon the life of men. The truth is summed up, finally, in the words of St. John, 'The law was given by Moses, grace and truth came by Jesus Christ' (1[16]). It was not merely that He charmed the world with the example of a sinless Man suffering because other men were sinful; nor, again, does the effect of His life rest merely upon the graciousness or the austerity of His words; but it flows from the fact that He brought truth as well as grace; power to achieve what the world had so long failed to attain; and knowledge of the spiritual order when all had been guesswork and hazardous conjecture before.

Many things follow from this. The various ethical doctrines which are from time to time represented as the only contribution of Christianity to the world's history are really corollaries of the facts upon which Christianity rests. The infinite value of each human soul, with all that has come of it in the changed position of individuals, presupposes, speaking historically, the belief in the scheme of salvation. The idea of universal love is not the result of a change of sentiment in the world, so much as the practical exposition (as we have indicated above) of the true relation of God to man. And, again, the principle of self-sacrifice is not an arbitrary law imposed on men, challenging an explanation which it never receives, but is the practical expression of the law of love, together with the paramount importance of the spiritual world.

We are well aware of the importance and the difficulty of many of the critical questions which surround the books of the Bible. In the present article, as has been already observed, they have been deliberately left aside. It would have been impossible, in the first place, to treat them adequately in passing, and inadequate discussion is useless. But there is a further reason, which, now that the exposition of the ethics is completed, it seems well to mention again and emphasize. These critical questions are not only irrelevant to the present discussion, they are largely irrelevant to any discussion. Speaking generally, we may say that the Bible has had its effect very largely as it stands. It comes before us a whole, and, though criticism may display for us the process by which some of the OT books have come into existence, it will not seriously alter this fact. And in the case of the NT the date of the formation of the Canon and the publication of the various books is now put back so far that there is not room for a complicated evolution of ideas of which the traces are largely lost. Those who are concerned to trace the formative ideas in the Bible must take it as a whole. For it is in view of the unity of thought which runs through it that the separate books have been gathered into one; this was the chief guiding principle in the formation of the Canon.

ETHIOPIA (Αἰθιοπία), the name whereby the LXX translators rendered the Heb. כּוּשׁ *passim*, and in Ps 72⁹ and 74¹⁴ the Heb. צִיִּים.

1. DERIVATION, etc.—The word occurs in the earliest Gr. literature as the name of a race to be found in the extreme E. and the extreme W.; in later writers * the nation is more definitely localized as dwelling S. of Egypt. The name would seem to be Greek, and to signify 'Red-faces' (cf. the similar word αἶθοψ applied by Homer to wine), a designation derived from the colour of the people, just as many names given by the Gr. geographers to African tribes are derived from their characteristics, habits, or mode of life; and indeed the present inhabitants of Abyssinia are said to call themselves *Kay* ('red' in Amharic), as opposed to the Nubians, whom they term black (*tekour* in Amharic, *salim* in Ethiopic; Lejean, *Voyage en Abyssinie*, 1872, p. 77). As, however, the colour that is associated with the 'Ethiopians' is not red, but *black* (Juv. *Sat.* ii. 23), it has been suggested that the Gr. name represents the Grecized form of some foreign appellation, such as *Atyāb*, plural of the Arab. *ṭīb*, 'scents,' used to designate the inhabitants of the country whence the incense came (Glaser, *Die Abyssinier in Arabien*, p. 10). The word is a loan-word in the language called Ethiopic, imported from the Greek, and only employed by the Abyssinians in Christian times to denote themselves. In the inscription of Adulis, the Abyssinian king claims to have defeated the Ethiopians among other foreign races; meaning by this name, according to Lejean's suggestion, the Shangallas, a tribe placed in the maps of Harris and Lefèvre to the W. of the Abyssinian province Shirē, between the rivers Mareb and Taccazē. The name *Ḥabash*, whereby the Abyssinian country and people are designated in Arabic (whence the European Abyssinia), would appear to represent an ancient Egyp. name for some African race (Glaser, *l.c.*, after W. Max Müller); the native name is Geez.

2. GEOGRAPHY.—Although the Gr. geographers after the time of the Ptolemies distinguish the kingdom of Meroë from the neighbouring tribes, they make the term Ethiopia include both. The extent of territory covered by this name is therefore very great: to the ancients it represented all the land bounded by the Upper Nile on the W., and the Red Sea and Arabian Gulf on the E.; the southern extremity they did not profess to be able to fix. Only modern — the most modern — researches have been able to map out accurately the land known to the old geographers by vague reports.

The land whence the Nile derives its waters is described by Lucan as *putres arenæ*, but this description is not true of the whole of Ethiopia. While the political divisions have constantly been, and are still, fluctuating, the natural divisions are three. The highlands of Abyssinia separate the *Sūdān* (usually spelt Soudan), or 'black country,' on the N. and W. from the *Danākil* country, which lies between the Ethiopian range and the sea.

(*a*) The Soudan, having been rarely traversed by Europeans before Sir Samuel Baker (*Nile Tributaries of Abyssinia*, 1867), has, since the enterprise of Mohammed Ahmad, been frequently the centre of European interest, and the campaigns that have been fought there have led to the elucidation of its geography; and the works of Wingate (*Mahdiism in the Egyptian Soudan*, 1891), Slatin Pasha (*Fire and Sword in the Soudan*, 1896), and others, give accurate details both of the nature of the country (2,000,000 sq. miles in extent) and of the tribes that inhabit it. South of the thirteenth parallel of latitude is fertile country with a six months' rainfall; N. of it are vast steppes with frequent thorns and thinly-scattered wells (Wingate, p. 8). A narrow strip of rich vegetation is to be found on either side of the Nile, which flows through it, making a gigantic curve between the third and fifth cataracts, and receiving at Al-Damer (about 33° 45′ E. long., 17° 30′ N. lat.) the Atbara, laden in the rainy season with the waters of Abyssinia, but in the dry season a bed of white sand; and some two degrees farther S. splitting at the modern town of Khartoum into the Blue and White Nile. The scenery is diversified by mountain ranges of no great height.

(*b*) Very different from this flat rolling plain is the Switzerland of Africa, Abyssinia, a plateau with a mean elevation of 6000 ft., extending from 9° to 15° 26′ N. lat., and at its greatest width from 37° to 40° E. long. Never completely severed from communication with Europe, this country was first accurately described in the *Historia Æthiopiæ* of the Ethiopic scholar Job Ludolf (1681), while the scientific observations and measurements of the explorers Rüppell (*Reise in Abessinien*, 1838), Lefèvre (*Voyage en Abyssinie*, 1839–1843), and Ferret and Galinier (contemporary with the last), have in recent times vastly increased our knowledge of it, which has been supplemented yet more recently by the researches of Mme d'Abbadie (*Géographie de l'Éthiopie*, 1890) and others (*e.g.* Theodore Bent, *The Sacred City of the Ethiopians*, 1893; Schoeller, *Mittheilungen über meine Reise in der Colonia Eritrea*, etc.). Separated on the E. from the Red Sea by the Ethiopian range (as it was first named by M. Theoph. Lefèvre), bounded on the S. by the rivers Hawash and Abay (afterwards the Blue Nile), on the N. by the rivers Ansaba, Barka, and Gash, and on the W. by the Atbara, the Abyssinian plateau inclines towards the N.W., but reaches its greatest elevation in the mts. of Samen or Semyen, of which the loftiest, Ras Dedjen, is 14,200 ft. high. The four rivers Taccazē (the Nile of Ethiopia), Mareb, Abay, and Hawash, with their numerous tributaries, divide the country into a great number of natural provinces; and as these rivers flow in deep ravines, intercommunication during the rainy season is frequently suspended; while the Mareb and the Hawash lose themselves in the sand after dividing into many channels, the Taccazē (called during part of its course the Settite) flows into the Atbara at Tomat (in the province of Katarif), while the Abay (which near its rise curves through Lake Tsana, the greatest of the Abyssinian lakes) later on in its course is called the Blue Nile. The political and linguistic division of the country into Tigre, Amhara, Shoa, and Galla districts is recent; a more natural division is that according to which the native geographers divide their land into *zones*—the Kola or lowlands (below 5500 ft.), the Woina-Deja (5500–7500 ft.), and the Deja (over 7500 ft.), distinguished by their flora and fauna. (See on these esp. J. Dove, *Ergänzungsheft* 37 to Petermann's *Mittheilungen* 'die Kulturzonen Nord-Abessiniens,' and for another division A. Raffray, *Bulletin de la société de Géographie*, 1882.)

(*c*) Thirdly, on the E. side of the Ethiopian range, and extending to the Red Sea and the Gulf of Aden, is a vast tract inhabited now by three Hamitic races called Oromo or Gallas, Afār or Danākils, and Somālis, not yet thoroughly explored, among the descriptions of which may be mentioned Borelli's *Éthiopie Méridionale* (Paris, 1890), and Paulitsche's *Ethnologie Ost-Afrika's* (Wien, 1893). The geology, botany, and zoology of 'Ethiopia' are elaborately treated in Decken's *Reisen in Ost-Afrika* (1879), ap. iii. 3.

3. SKETCH OF HISTORY.—Portions of this vast region were under some sort of government during the existence of the ancient kingdom of Napata, the earlier history of which has been sketched in the article CUSH. In the time of Ptolemy Philadelphus we find an Amonian king Ergamenes reigning at Meroë (Diod. iii. 6), whose name (Erkamon, 'oath of Amon') was found in cartouches on Nubian monuments shortly after the commencement of hieroglyphic studies (see Champollion, *Voyage en Nubie*, 119; Rosellini, *Monumenti Storichi*, ii. 321). To the time of the same Ptolemy, Brugsch (*Zschr. f. Ägypt. Sprache*, etc. 1890, p. 29) assigns the reign of a king Horsiatef or Arsiotes (whose stele with a lengthy inscription is reproduced by Mariette, *Monuments Divers*, plate 11); and two kings of the same family as Ergamenes, Onchmachis and Hormachis, after the death of Ptolemy Philopator seized the Thebaid, where they reigned twenty years (Brugsch, *l.c.*; Révillout, *Rev. Égyptol.* v. 39 ff.). As Euergetes I. is said to have sent an expedition into Lower Nubia (*Mon. Adul.*), the two powers must have been long at variance. The invaders of the Thebaid were ejected by Ptolemy Epiphanes—if the combinations of Révillout be correct—by the aid of the Blemmyans, an Ethiopian tribe, whose princes henceforth become supreme at Meroë, though acknowledging the suzerainty of the Egyptians and their heirs the Romans, whence it comes that

---

* Still the confusion of Ethiopia with India continues long into the Christian era (Letronne, *Matériaux pour l'histoire du Christianisme*, p. 32).

inscriptions in honour of Tiberius and Nero have been found at Dakke (the ancient Pselcis).

An attempt was made during the reign of Augustus by a queen named Candace to drive the Romans out of the Thebaid, resulting in the taking of Napata and Meroë by C. Petronius in B.C. 24; but as peace was made with the Ethiopian queen by Augustus at Samos in B.C. 21, the defeat of the former may not have been so complete as Strabo represents it (Book xvii.; Révillout, *l.c.*). The same queen has been identified with a *κυρία βασίλισσα*, who is mentioned in an inscription of the year B.C. 13 as sending an embassy into Rom. territory (Wilcken in *Hermes* for 1893, p. 145 on *CIG* iii. 5080); and this name Kandake (in Egyp. *Knθaki-t* with family name *Amn-ārit*; Lepsius, *Denkmäler*, v. 47 *a* and *b*; *ap.* Brugsch, *Entziff. der Meroit. Denkm.* p. 7) is said to have been the official name of the queen of Ethiopia (Bion of Soli, *Frag. Hist. Græce*, iv. 351, 5). Beyond a solitary allusion to the queen of Meroë in Ac 8^{27} the history of this state is blank till a much later period, when the Blemmyans came into collision with the Roman empire (Révillout, *Mém. sur les Blemmyens* in 'Mém. prés. par divers savants à l'Académie,' viii. 2. 371); and Pliny asserts that a tribune with some prætorians sent to reconnoitre by Nero, who was contemplating an Ethiopian war, reported that the regions about Meroë were deserted (*Nat. Hist.* vi. 35). It has been conjectured by Dillmann ('Über die Anfänge des Aksumitischen Reiches' in *Abhandll. der Akad. zu Berlin*, 1878, p. 204) that the downfall of Meroë was the result of the campaign of Petronius. Though this may seem doubtful, he is probably right in connecting with the fall of Meroë the rise of another state in Abyssinia; for whereas the classical geographers prior to A.D. 50 (Agatharchides of Cnidus, of the 2nd cent. B.C., excerpted in Photii *Bibliotheca*; Artemidorus of Ephesus, of the 1st cent. B.C.; Diodorus Siculus, who relies in his elaborate account of Ethiopia, Bk. iii. 10–37, chiefly on Agatharchides, but partly on information which he had himself collected in Egypt; Strabo, and Pliny) know of no other *state* but that of Meroë, the author of the *Periplus Maris Erythræi* (of the second half of the 1st cent. A.D.) knows of a metropolis of the Auxomitæ (Αὐξωμῖται) situated at a distance of eight days from Adulis, 'whither all the ivory from beyond the Nile is brought through Cyenium to Adulis' for exportation. It was governed by a king named Zoskales; and in one of the inscriptions of Adulis recorded by Cosmas Indicopleustes, the king, inferred from the phrases he employs to have been king of Axum, a worshipper of the Greek gods Ares, Zeus, and Poseidon, enumerates conquests extending over a great portion of modern Abyssinia, and into neighbouring tribes and countries, in a list wherein many extant names figure for the first time. Since this king claims to have been the first of his line to conquer tribes which, in the time of the *Periplus*, were subject to Zoskales, Dillmann (*l.c.* 200) argues plausibly that the monument of Adulis is earlier than the *Periplus*; whence it would appear that the empire of Axum came into being somewhere in the middle of the 1st cent. A.D. The date cannot be much earlier, since otherwise its existence could not have escaped the Greeks, who had many factories on the Red Sea coast, dating from the time of Ptolemy Philadelphus, who is said to have organized elephant-hunting expeditions. Although there follows a gap of some centuries in the history of Axum, it is clear that the great antiquity claimed for their empire by the native Abyssinian chroniclers is fabulous (see Dillmann, *ZDMG* vii.) as well as its supposed Jewish basis. Besides Meroë and Axum, the classical writers know only of tribes existing in Ethiopia in various stages of savagery, some of whose characteristics may well be preserved in extant races, while some may be relegated to the region of fable. (See further CUSH.)

4. LANGUAGE, etc.—The chief monuments of Nubian monarchs are in the Egyp. character and language; although, in the opinion of experts, many of them display a very imperfect acquaintance with both. Ergamenes, however, in the 3rd cent. B.C., after overthrowing the power of the priests (it is thought), introduced the native language of Nubia into the monuments, using for it modifications of the hieroglyphic and demotic writing, in which the phonetic value of the Egyp. symbols seems to have been shifted. In his Nubian grammar (1880) Lepsius speaks of these inscriptions as a still unsolved mystery; and the important study of them by Brugsch (*Entziff. der Meroit. Denkm.*, Leipzig, 1887) is not regarded as having finally solved it, although the discovery by Schäfer (*Zschr. für Ägyptologie*, 1896) of elements of modern Nubian in the Nubian words recorded by classical writers makes in favour of Brugsch's system. While the basis of the language is, according to these authorities, to be sought, not in the Beja dialect (as Lepsius had imagined), but in modern Nubian, Brugsch has made it probable that the language of the inscriptions was largely intermixed with Egyp. words, and indeed he fancies that many such are to be detected in the existing language. While the Ethiopian Pantheon was largely peopled with Egyp. gods, a few native names are recorded by the ancients, as may be made out from the inscriptions; and likewise Ethiopian civilization, though largely borrowed from Egypt, retained not a few native peculiarities.

D. S. MARGOLIOUTH.

ETHIOPIAN EUNUCH.—According to Ac 8^{27} an Ethiopian eunuch, minister of Candace, queen of the Ethiopians, who was over all her treasure, shortly after the martyrdom of Stephen was met by the deacon Philip when returning from a religious journey to Jerusalem, and converted to Christianity. From the authorities cited in the article ETHIOPIA we know that Gr. literature had spread to the kingdom of Meroë as early as the 3rd cent. B.C.: there is therefore nothing improbable in the LXX translation, which this Ethiopian was found reading, having penetrated thither by the same channels; but whether he also belonged to the Jewish community cannot be made out with certainty. While his journey to Jerusalem 'to worship' (cf. the inscription quoted in ETHIOPIA) might imply it, his apparent unfamiliarity with OT (v.^{31}) and his physical condition render it improbable. The word 'eunuch' might indeed be regarded as a mistranslation for 'minister' if there were any likelihood that this narrative was originally in Aramaic, since in some dialects of that language the same word signifies both; but the fact that the passage of Isaiah quoted (Is $53^{7.8}$) is given according to the LXX, takes away the ground from any such supposition.

The notices of the Eth. kingdom for this period failing us altogether, it is impossible to identify this personage from external sources; but the historical character of the narrative seems to be acknowledged in most quarters.

The confession of faith put into his mouth in v.^{37} AV is now universally admitted to be an early interpolation. Assuming the Lucan authorship of the Acts, the source of the above narrative may have been personal information received from Philip (cf. Ac 21^{8}). Like the baptism of Cornelius by St. Peter, the case of the Ethiopian eunuch marked an important stage in the question of the admission of the Gentiles to the Christian Church. Its bearing from this point of view will be discussed in art. PHILIP (the evangelist). See also CORNELIUS.

D. S. MARGOLIOUTH.

ETHIOPIAN WOMAN (כּוּשִׁית).—According to Nu 12^{1} (JE), when the children of Israel were at Hazeroth, Miriam and Aaron 'spake against' Moses on account of his marriage with an Ethiopian (RV 'Cushite') woman. In the sequel, however, Moses' conduct in this matter is neither impugned nor defended; for the complaint brought by Miriam and Aaron turns into a claim of equal inspiration with Moses (v.^{2})—a claim which is refuted by J″ in a theophany, while Miriam is punished with leprosy, from which she is immediately relieved through Moses' intercession made at Aaron's request, but has nevertheless to be confined for seven days (v.$^{4ff.}$). As the 'Ethiopian woman' is mentioned nowhere else, and the death of Moses' wife Zipporah is not recorded, some of the early interpreters thought the two must be identical; and this view is favoured by the Jewish expositors, who assign reasons for Zipporah's being called Eth. that are either frivolous (as Rashi) or merely uncritical (as Ibn Ezra); Rashi's interpretation being as old as Targ. Onk. On the other hand, LXX has *Αἰθιόπισσα*, and Jos. (*Ant.* II. x. 2) makes her an Eth. princess. If the woman mentioned in Nu be identical with Zipporah, the word *Kûshîth* must be used in the sense of non-Israelite—a usage which is found in late Rabbin. writings (Levy, *NHWB*), and cannot be dissociated from the similar employment of *Kûthî* (properly Samaritan). But besides the improbability of this usage being found in the Bible, the text implies (though it does not expressly assert) that the marriage was of recent occurrence. It is therefore more likely that a black slave-girl is meant, and that the fault found by Miriam and Aaron was with the indignity of such a union; and this accords with the statement (v.^{3}) that Moses was the 'meekest' of mankind. The employment of Nubians as slaves dates back to the early dynasties of Egypt (cf. Brugsch, *Gesch. Ægyp.* p. 266). Although no etym. of the name Hazeroth is given in the text, this word (from the Arab. *ḥaẓara*, 'confine') would seem to stand in some etymological connexion with the confinement of Miriam. Perhaps it is merely accidental that the word *ḥaẓir* in Arab. is employed in an idiom meaning to 'calumniate' (Maydani, c. 3); albeit this double etym. would contain implicitly a large portion of the narrative. D. S. MARGOLIOUTH.

ETHIOPIC VERSION.—This subject will be treated under the following heads:—

i. The Ethiopic Canonical Books.
ii. The Manuscripts.
iii. Printed Editions.
iv. Source of the Text.
v. Critical Value.
vi. Date.

i. THE ETHIOPIC CANONICAL BOOKS.—(A) *Old Testament.*—The Eth. OT embraces all the books included in the LXX (except the Books of the Maccabees), together with several others, such as the Book of Enoch, Jubilees, 4 Ezra, Rest of the Words of Baruch, etc. The Maccabees were either never translated or else were early lost. Since, however, the Eth. scholars found the titles of these books in their *Sînôdôs* and *Fetha Nagast*, they proceeded to supply them from their own imagination. In this way these books came into circulation (Dillmann). In later times, indeed, the Latin version of these books was translated into Ethiopic. (See Wright, *Cat. Eth. MSS Brit. Mus.* p. 14.) No distinction whatever appears to have been made between the canonical and the uncanonical books of OT. The number of books in OT is set down unanimously at 46, but hardly two lists of these books agree. As a rule, the apocryphal and pseudepigraphal books which appear in one list are replaced in another by quite different works of the same class of literature. (See Walton's *Polyglot* i., Proleg. p. 100; Dillmann in Ewald's *Jahrbücher d. bibl. Wissenschaft*, v. 1853, pp. 144–151; Fell, *Canones Apostolorum Æthiopice*, p. 46.)

(B) *New Testament.*—35 books are reckoned in NT. This number is arrived at by including a book of Canon Law with the usual 27 books of NT. As this work, called the *Sînôdôs*, is counted as 8 books, we thus get 35 in all. (See Zotenberg, *Cat. des MSS Éthiopiens de la Bibliothèque Nationale*, p. 141 ff.; Ludolf, *Historia Æthiopica*, III. iv. 27; Vansleb, *Histoire de l'Église d'Alexandria*, 239 ff.)

The Western division of the Bible into chapters made its way into Abyssinia through the contact in later times of the latter with Western Christendom. The older MSS exhibit quite a different division of the books.

ii. THE MSS OF THE ETHIOPIC VERSION.—The chief MSS of OT, the Apocrypha and Pseudepigrapha, and of NT will be found in the following catalogues:—Wright, *Ethiopic MSS of the British Museum*, OT and Apocr. pp. 1–22, NT pp. 23–29, 1878; Zotenberg, *Catalogue des MSS Éthiopiens de la Bibliothèque Nationale*, OT and Apocr. Nos. 1–31, 49–51, NT Nos. 32–48; D'Abbadie, *Catalogue Raisonné de MSS Éthiopiens*, Paris, 1859, OT and Apocr. Nos. 16, 21, 22, 30, 35, 55, 99, 105, 117, 137, 141, 149, 195, 197, 203, 204, 205. Some of these MSS contain only single books. MSS of Enoch are found in 16, 30, 99, 197; Gospels, Nos. 2, 9, 47, 82, 95, 112, 173; Pauline Epp. 9, 119, 164; Cath. Epp., Apoc. and Acts, 9, 119, 164. Dillmann, *Catalogus MSS Æthiop. in Bibliotheca Bodleiana*, 1848, OT and Apocr. 1–9, NT 10–15. There are small collections of MSS also in Berlin. See Dillmann, *Abessinische Handschriften der Königlichen Bibliothek zu Berlin*; OT and Apocr. Nos. 1–6, of the Psalms 7–19; NT 20, 21. Of these, No. 1 is a MS of Enoch. For the MSS in Vienna, see *ZDMG* xvi. p. 554; in St. Petersburg, see *Bulletin scientifique publié par l'Académie impériale des Sciences*, ii. 302, iii. 145 ff.; in Tübingen, see *ZDMG* v. 164 ff. There are also a few MSS in Frankfort of some value, and in private libraries in England.*

iii. PRINTED EDITIONS.—We shall mention only a few of these. For further information the reader may consult Le Long, *Bibliotheca Sacra*, 1878, ii. 140–157; Fell, *Literarische Rundschau für das Kathol. Deutschland*, Feb. 1, 1896.

(A) *Old Testament.* — Of OT Dillmann has edited vol. i. Gn–Ruth, 1853 (some of the best MSS were inaccessible when this volume was edited); vol. ii. Samuel and Kings, 1861–1871; Joel (in Merx, *Die Prophetie des Joels*). The Psalms were edited by Ludolf in 1701, and in the various Polyglots and by the Bible Society. Bachmann published texts of Isaiah, Lamentations, and Malachi. The text of the last two books neither adequately nor accurately represents the best Ethiopic MSS in Europe.

(B) *Apocrypha.*—The honour of publishing the first Apocryphal texts belongs to Oxford. Thus Laurence edited the Ascension of Isaiah in 1819, the Apocalypse of Ezra in 1820, and the Book of Enoch in 1838. These are valuable now only from an historical point of view. Dillmann has given us a splendid edition of the Apocryphal books, Baruch, Epistola Jeremiæ, Tobit, Judith, Ecclesiasticus, Sapientia, Esdræ Apocalypsis, Esdras Græcus (1894). He edited texts also of Enoch (1851), Jubilees (1859), and the Ascension of Isaiah (1877). In 1893 Charles published an edition of Enoch, in which there is a continuous correction of Dillmann's text from 10 hitherto uncollated MSS, and in 1894 the Ethiopic text of Jubilees from 4 MSS.

(C) *New Testament.*—The NT was first printed at Rome in 1548–49 by the Abyssinian Tasfâ-Sion, with the omission, however, of the 13 Pauline Epistles. As the translator possessed only a fragmentary MS of the Acts, he supplied an Eth. version of the missing chapters from the Greek and Latin. This edition, which is disfigured by countless errors, was reprinted in Walton's Polyglot. Another edition, *Nov. Testamentum . . . Æthiopice, ad codicum manuscriptorum fidem*, was issued by T. P. Platt for the Brit. and For. Bible Society, 1826–1830. A reprint of this edition appeared at Basle in 1874. These editions are of no critical value.

iv. SOURCE OF THE TEXT.—(A) *Old Testament.*—The Ethiopic or Geez version, which from the earliest times was universally used in all branches of the Abyssinian Church as well as amongst the Jewish Falashas, was, according to some of the poets of the country, derived from the Arabic, its authors being variously said to be the Abba Salâmâ (=Frumentius, the Apostle of the Abyssinians, according to Ludolf, see Zotenberg, *Cat. des MSS Éth.* pp. 3, 4, or a later Abba Salâmâ, see Zotenberg, 194; Dillm. *Zur Gesch. des axum. Reichs*, p. 20) or the holy Nine (Guidi, *Le traduzioni degli evangelii in arabo e in etiopico*, p. 33, note). But Ludolf saw reason for doubting this view later (*Historia æthiopica*, pp. 295, 296) when he came to recognize that the Ethiopic version was closely dependent on the text of the LXX. Subsequent investigation has tended to substantiate the later view of Ludolf. Hence the view of Renaudot, that the version was made from the Egyptian, must be summarily rejected; likewise the preposterous theory of Lagarde, that it was derived either from the Egyp. or Arab. in the 14th cent.

---

* See also Margoliouth's art. on the Eth. VS in Miller's edition of Scrivener's *Introduction to the Criticism of the NT.*

It is unquestionable that our version was made in the main from the Greek,—in the main, for there are certain phenomena in the MSS which cannot be explained from this hypothesis alone. These we will touch upon presently, and in the meantime give Dillmann's account of the various texts attested by the MSS. In his *V.T. Æthiopici*, Tom. i. apparat. crit. p. 8 (1853), he draws attention to a large number of readings which agree with the Hebrew against the LXX, and suggests that these are due to the use of the Hexapla of Origen. Later he revises this theory and replaces it by another; thus in Herzog's *RE*, 1877, i. 205, he writes that there are three distinct types of text. i. The original translation more or less corrupted but seldom represented in the MSS. (See also Zotenberg, *op. cit.* 3, 5, 7, 8.) ii. A text revised and completed from the Greek, and found most frequently in the MSS. This is the Eth. Κοινή or *Textus receptus*. iii. A text corrected from the Hebrew, younger in age. See also *V.T. Æthiopici*, Tom. ii. Fasc. i. apparat. crit. pp. 3–6. This theory has been accepted by Zotenberg, and lately by Prætorius, Herzog's *RE*^{3} iii. p. 87 ff.

It is possible, however, to interpret the evidence otherwise. Thus Dillmann may be wrong (*a*) in his later rejection of his first theory that the Hexapla of Origen was used by the Eth. translators, and (*b*) in attributing all Eth. transliterations of Heb. words and many Eth. readings which agree with the Heb. against the LXX to the work of later scholars correcting from the Heb. text.

Some evidence will now be cited which points in this direction. This evidence will be drawn from Lamentations and Malachi. First as regards (*a*), we find that in La 2^{13} the Eth. *âstamâslakî* agrees exactly with the version of Symmachus *ἐξισώσω σε* against the Heb., LXX, and all other Gr. VSS. Likewise in 3^{44} and 5^{15} our text again agrees with Symm. against the LXX, but this time it is in harmony with the Hebrew. As some other divergences from the LXX can be explained by this version and that of Aquila, it seems reasonable to conclude that the Hexapla was used by the Eth. translators. These divergences, however, may have been derived directly from the Heb. text. In many passages in all the biblical books the Eth. version is independent of and attests a purer form of text than the LXX. Next as regards (*b*), it is just as likely that many of the transliterations of Heb. words which are found in certain Eth. MSS,* but not in the LXX, may be survivals of the earliest form of the text made directly in many cases from the Hebrew. If they are all to be ascribed to the corrections of later scholars, how are we to account for their appearance in all MSS of La 3^{12} and Job 16^{12}? What we usually find in the history of a version is that the unintelligible or foreign words are by degrees displaced either by their native equivalents or by emendations, or else they are simply omitted. The theory that the primitive Eth. version contained a large number of words transliterated from the Heb. receives some confirmation from the fact that the Abyssinians first received Christianity through Aramæan missionaries, and that very many Aram. words were actually naturalized in order to express the new doctrines of the Christian faith. The Levitical character of Ethiopic Christianity points in the same direction, *i.e.* its acceptance of the rite of circumcision, and the Levitical laws regarding the purification of women.

Until, however, we have a complete and critical edition of the Eth. version, it will not be possible to settle finally the above questions. Even Dillmann's edition (vols. i. ii. v.) is inadequate for this purpose, as vols. i. and ii. were completed before the best MSS were accessible.*

(B) *New Testament.*—Zotenberg (*Cat. des MSS Éth. de la bibliot. Nat.* pp. 24, 25, 30, 1877) showed that there were two forms of text present in the MSS,—the first, that which was made from the Greek original; the second, a corrected text. In the same year Dillmann (Herzog's *RE* i. pp. 203–206) suggested that the numerous variations in the more widely read books of the NT, such as the Gospels, were due to the influence of the Copt. and Arab. versions. That such versions were known in Abyssinia he infers on the following grounds: Prolegomena translated from the Arab. were prefixed to the NT writings; names of NT books derived from the Arab. displaced occasionally in later times the native nomenclature of the NT books; *e.g.* the Acts were called *Abraxis* (=Πράξεις), Revelation *Abukalamis* (Ἀποκάλυψις). The Arabic-Coptic *Sînôdôs* became early naturalized in the Eth. Church.

These hints of Dillmann's are further developed by Guidi, who pointed out that such corrections are derived from an Arab. tr. circulating in Egypt (Guidi, *Le Traduzioni degli Evangelii in Arabo e in Ethiopico*, Accad. Lincei, 1888, p. 33 ff.). The MSS are affected in various degrees by these corrections. In some they appear side by side with the original text.

v. Critical Value.—The Eth. version of the OT is generally a very faithful and verbal tr. of the Greek. It frequently reproduces the very order of the words. On the other hand, it is not possible to explain many of its readings by any extant Gr. text, and over-against the LXX it frequently attests a purer text. But its critical value cannot be determined until the questions discussed in the preceding section have been treated exhaustively.

As regards the NT, this version is related to the older type of text attested by the great Greek Vatican and Sinaitic MSS. It has also Western and Alexandrian and Syrian elements. But no critical text has yet been published.

vi. Date.—Dillmann (Herzog's *RE* i. 203, 204) confidently ascribes the Eth. version to the 4th and 5th centuries of our era, and regards it as constituting not only the oldest memorial but also the foundation of Eth. literature. This conclusion he draws from the following facts: i. Christianity was already firmly established in the 5th cent. ii. The poet and musician Jared had already produced a church hymnal in the 6th cent. iii. Chrysostom † (*Hom. in Johan.*, Opera

---

Such as the MS E for the books of the Kings. See Dillmann, *op. cit.* ii. apparat. crit. p. 5; see also Zotenberg, *Cat.* pp. 9, 10, 11 on *Version corrigée d'après le texte hébreu.* Dorn called attention as early as 1825 to the use of the Heb. text in his Introduction to Ludolf's edition of the Psalter.

* For many interesting details see Reckendorf, 'Ueber den Werth der altäthiopischen Pentateuch-übersetzung für die Reconstruction der Septuaginta,' in *ZATW* (1887) pp. 61-90. Among other points he controverts Cornill's view in his Commentary on Ezekiel (p. 67 ff.), that the Ethiopic version is derived from the Hesychian recension of the LXX.

† *ἀλλὰ καὶ Σύροι καὶ Αἰγύπτιοι καὶ Ἰνδοὶ καὶ Πέρσαι καὶ Αἰθίοπες . . . εἰς τὴν αὐτῶν μεταβαλόντες γλῶτταν τὰ παρὰ τούτου δόγματα εἰσαχθέντα, κ.τ.λ.*

[Montfaucon], viii. p. 10) appears to have known of an Eth. version of the Bible. iv. The version is made directly from the Greek. Now, it was only in the first period of Eth. literature that translations were made from the Greek; for after the appearance of the Arab. language in Egypt, Eth. literature came under the sway of the Arabic.

The above views of Dillmann have recently been confirmed by the peculiar title used for God in Sir 31^{3} 37^{21}, *i.e. Astâr.* This shows that heathenism still prevailed when this book was translated (Dillmann, *V.T. Æthiopici*, Tom. v. p. 117). Guidi assigns the version to the end of the 5th and the beginning of the 6th cent. Lagarde's view (*Ankündigung einer neuen Ausgabe der griech. Uebersetzung des AT.s*, 1882, p. 28), that the version was made in the 14th cent., not from a Gr. but from an Arab. or an Egyp. translation of the original, is wholly contradicted by the evidence. We may safely assume that the version was completed before the 7th cent.

R. H. CHARLES.

ETH-KAZIN (עִתָּה קָצִין, where AV, misunderstanding the ה *locale*, writes Ittah-kazin, as in same verse Gittah-hepher for Gath-hepher).—A town on the E. frontier of Zebulun, whose site has not been identified, Jos 19^{13}. J. A. SELBIE.

ETHNAN (אֶתְנָן).—A Judahite (1 Ch 4^{7}). See GENEALOGY.

ETHNARCH (*ἐθνάρχης*).—In 2 Co 11^{32} it is stated that 'in Damascus the ethnarch under Aretas the king guarded the city of the Damascenes,' the word ethnarch being tr. in both AV and RV by GOVERNOR. Its exact meaning seems doubtful: it is used of Simon the high priest (1 Mac 14^{47} $15^{1.2}$), of Hyrcanus (Jos. *Ant.* XIV. x. 2), and of Archelaus (*Ant.* XVII. xi. 4; *BJ* II. vi. 3). It was also used for the governor of the Jews in Alexandria (Strabo, *ap.* Jos. *Ant.* XIV. vii. 2), and the head of the Jewish community in Pal. in the time of Origen (Origenes, *Ep. ad Africanum*, § 14). The last two instances suggest that the normal use of the word was for the ruler of a nation or *ἔθνος* living with separate laws and customs amongst those of a different race. But the sense of the term seems to have widened, and it became a little superior to that of tetrarch, but inferior to that of king (Schürer, *HJP* II. ii. 244, etc.). A. C. HEADLAM.

ETHNI (אֶתְנִי).—An ancestor of Asaph (1 Ch 6^{41}, called in v.^{21} Jeatherai). See GENEALOGY.

ETHNOLOGY.—See RACES.

EUBULUS (Εὔβουλος).—A leading member of the Christian community at Rome, who sends greeting to Timothy through St. Paul at the time of the second imprisonment (2 Ti 4^{21}). His name is Greek, but nothing further is known of him.

W. LOCK.

EUERGETES (Prol. to Sirach).—See BENEFACTOR.

EUMENES (Εὐμενής, 'well-disposed') II., king of Pergamus, succeeded his father Attalus in B.C. 197. Through the friendship of Rome he secured a large extension of his territories, so that his kingdom became for a time one of the greatest in the East. In B.C. 169 he was suspected of secret correspondence with the enemies of Rome, but died (probably in B.C. 159; see Clinton, *F. H.* iii. 403, 406) before an open rupture took place. The principal authorities for his life are Livy (*Ann.*, esp. bk. xxxvii. and *Epit.* xlvi.), Polybius, and Appian, with Strabo xiii. p. 264, and Justin xxxi. 8, xxxii. 4. In 1 Mac 8^{8} the Romans are said to have taken 'the country of India and Media and Lydia' from Antiochus the Great, and to have given these dominions to E. The MSS agree in this reading, which is, however, impossible, since India was never under the rule of Antiochus. Media, too, on account of its eastward position, is not likely to have ever been ceded to E. The best correction is to substitute, with Michaelis, Mysia for Media, and, with Grotius, Ionia for India. In agreement with this are Livy's statements (xxxvii. 44) that the Roman Senate required from Antiochus the cession of all Asia north of the Taurus, and of these districts granted (xxxvii. 55) the part north of the Mæander to Eumenes. R. W. MOSS.

EUNICE (Εὐνίκη, so Tisch., WH, with all the uncial MSS; not Εὐνείκη, as TR with many cursives).—The mother of Timothy, and probably the daughter of Lois (2 Ti 1^{5}). The name is Greek, so that conceivably she may have been a proselyte; but this is not a necessary inference, and more probably she was by birth a Jewess (Ἰουδαίας, Ac 16^{1}). She was married to a Gentile husband, and, probably out of deference to his prejudices, her son was not circumcised; but she gave him a God-fearing name (Τιμό-θεος), and trained him carefully in the OT Scriptures (2 Ti 3^{15}). She was probably converted to Christianity on St. Paul's first visit to Lystra, as she is described as already a believer on the second visit (Ac 16^{1}). She is not mentioned afterwards, but the curious addition of *χήρας* (Ac 16^{1}) in cursive 25, and the substitution of it for Ἰουδαίας in Gig. fu., may embody a tradition of her widowhood; this would give a fresh point to the injunction in 1 Ti 5^{4}. W. LOCK.

EUNUCH (סָרִים, *σπάδων*, *εὐνοῦχος*).—סָרִים is rendered in AV eunuch, officer, chamberlain. The employment of eunuchs in Oriental courts was one of the base accompaniments of polygamy and despotism. The harems of the monarchs were committed to their charge, and they frequently superintended the education of young princes. Much influence was thus at times acquired by them in affairs of state (see Rawlinson, *Anc. Mon.* iv. 175). They were often closely connected with the palace intrigues, which played so important a part in Oriental history. It seems that the Heb. word was also used in a wide sense of persons not emasculated, who held offices which were usually entrusted to eunuchs. Such is probably its use in the case of Potiphar (Gn 39^{1}; Whiston's *Jos. Ant.* X. x. 2 n.). Where the word occurs in 1 and 2 K, it is sometimes difficult to determine whether it bears its proper or its derived signification. Herodotus (viii. 105) says that 'among the barbarians eunuchs are more valued than others on account of their perfect fidelity,' and instances the case of Hermotimus, who was highly esteemed by Xerxes. Xenophon (*Cyrop.* vii. 5. 60 ff.), in giving the reasons why Cyrus employed them, alludes to the alleged fact that their having no domestic ties rendered them capable of peculiar devotion to the interests of their masters, and of gratitude to those who conferred honour and consideration upon them. They also naturally adhered to one able to protect them, as they found themselves objects of contempt to other men. He denies the allegation that they are lacking in vigour and excellent qualities, and illustrates their tendencies by the case of 'dogs, which, when castrated, cease to desert their masters, but are not at all less fitted for watching and the chase.'

The Law of Dt 23^{1} (cf. Lv 22^{23}) attaches a religious stigma to the condition. (See, for the prob. ground of this, Driver on Dt 23^{1}). The prediction in 1 S 8^{15} was designed to intimate the deterioration of the national life consequent upon the establishment of the kingdom, through the adoption of unsanctioned Gentile customs. Acc. to Herodotus (vi. 32), the Persians made eunuchs of the goodliest of the youth of captured countries; but as to whether Daniel and his companions were thus treated by the Bab. conquerors, no absolutely certain conclusions can be reached (cf. 2 K $20^{17.18}$). Eunuchs were in the courts of the Herods in our Lord's time (Jos. *Ant.* XV. vii. 4; XVI. viii. 1); hence His allusion to them (Mt 19^{12}) as familiar to His hearers. See ETHIOPIAN EUNUCH.

G. WALKER.

EUODIA, AV Euodias (*Εὐοδία*, fem. form of *Εὐόδιος*. Both names are found in Gr. literature and on the inscriptions. The Euodias of AV seems to have arisen from a mistake of the translators, who took *Εὐοδίαν* for the accusative of the masculine form *Εὐοδίας*, and regarded it as the name of a man).—A Christian woman of Philippi, whom the Apostle Paul beseeches 'to be of the same mind in the Lord' with another Christian woman named Syntyche (Ph 4^{2}). They may have been deaconesses, or women of some position in whose houses the brethren were accustomed to meet. The language of St. Paul suggests a religious difference rather than a private quarrel (Ph 2^{2}). They may have represented different types of piety, or may have differed on some question of church life. St. Paul begs a certain *Syzygus*, or, as some critics think, an unnamed 'true yoke-fellow,' to help forward the work of reconciliation, being mindful of the former services of these women to the cause of the gospel (Ph 4^{3}). The theory of Baur, Schwegler, and Volkmar, that Euodia and Syntyche are symbolical names for Jewish and Gentile Christianity, is now generally abandoned. A mode of speaking so mysterious is out of harmony with the general tenor of the Epistle. J. GIBB.

EUPATOR (*Εὐπάτωρ*, 1 Mac 6^{17} etc., 2 Mac 2^{20} etc.), the surname of Antiochus V., son and successor of Antiochus IV. Epiphanes. See ANTIOCHUS V.

EUPHRATES (פְּרָת, *Εὐφράτης*).—The Euphrates was called Pura-nun, 'the great water,' or simply Pura, 'the water,' in Sumerian, the pre-Semitic language of Chaldæa (cf. Gn 15^{18}). From this the Semitic Babylonians derived their Purat or Purattu with the feminine suffix. Purat is the Heb. Pĕrath, the Old Persian Ufrâtu, where the prosthetic *u* was explained as the word *u*, 'good,' and so gave rise to the Greek Eu-phrates. In the OT it is generally known as 'the river' (*e.g.* Dt 11^{24}, Ex 23^{31}), it being the largest and most notable river of Western Asia, and accordingly in Gn 2^{14} alone of the rivers of Paradise no geographical description is given of it.* In Babylonia it was also called 'the river of Sippara' as well as the Uruttu, a dialectical form of Purattu.

The Euphrates (Arab. *Frat*) has two sources, one of which was called the Euphrates in antiquity; in Armenian, Yephrat; while the other, which rises to the south-east, the modern Murâd-Su, was termed the Arsanias, Arm. Aradzani, Arzania in the Assyr. inscriptions. They rise in two valleys of Armenia, from 6000 to 6500 feet high, the one in the Anti-Taurus, the other in Mount Ararat, and unite near Malatiyeh (Melitênê, Assyr. Melid) in a valley about 2000 feet high, whence they flow eastward through a narrow gorge towards Syria. From this point to the alluvial plain of Babylonia the fall of the river is about 1000 feet in 700 miles, so that it is navigable only down stream. The high road from east to west passed it in OT times at Birtu (*Birejik*) and Carchemish (*Jerabis*). There was another passage at Thapsakos, the Tiphsah of 1 K 4^{24}. A little to the south of Carchemish was Pethor (Assyr. Pitru), on the western bank at the junction of the Euphrates with the Sajur (Assyr. Sagura). Still farther south, but on the eastern bank, it was joined by the Belikh (Assyr. Balikh) and Khabûr (Assyr. Khabur), which came from the land of Gozan (Assyr. Guzanu, 2 K 17^{6}). At the mouth of the Khabûr was Circesium (now Karkisia, Assyr. Sirki). After this the Euphrates receives no more affluents; but northward of Sippara or Sepharvaim it approaches the Tigris very nearly, and by again widening out forms the plain of Babylonia. The Euphrates and Tigris now unite before falling into the sea, owing to the accumulation of silt at the head of the Persian Gulf, but in OT times they still entered the sea by separate mouths. The water of the Euphrates was dissipated over Babylonia by means of canals for the purposes of irrigation, and at its mouth were great salt marshes, called Marratu by the Babylonians (see Jer 50^{21}). Here lived the Kaldâ or Chaldæans, with their capital Bit-Yakin, of which Merodach-baladan was king.

LITERATURE.—Frd. Delitzsch, *Paradies*, 169 f.; Schrader, *KAT*² 34 f.; Chesney, *Euphrates Exped.* vol. i.; Loftus, *Chaldæa and Susiana*; Layard, *Nin. and Bab.* chs. xxi.–xxii.; Rawlinson, *Herodotus*, i. Essay ix. A. H. SAYCE.

EUPOLEMUS (*Εὐπόλεμος*), the son of John, the son of Accos, one of the ambassadors sent to Rome by Judas Maccabæus, after his victory over Nicanor, in order to conclude an alliance between the Romans and the Jews in B.C. 161 (1 Mac 8^{17}, 2 Mac 4^{11}, comp. Jos. *Ant.* XII. x. 6). Eupolemus has often been identified with the author of a history of the Jews, written in Greek, which is quoted by Alexander Polyhistor, Clement of Alexandria (*Strom.* i. 23), and Eusebius (*Præp. Ev.* ix. 30–34). Since the historian Eupolemus seems to have written about B.C. 157, and was almost certainly a Jew, this identification may be correct (comp. Schürer, *HJP* II. iii. 203 ff.).

H. A. WHITE.

EURAQUILO.—Euraquilo (*εὐρακύλων*) is the reading adopted at Ac 27^{14} by WH and the RV, instead of **Euroclydon** in the TR and AV, as the name of the wind, which, suddenly descending from the heights of Crete on St. Paul's ship as it was sailing closely along the shore, seized it and drove it before the storm, which ended in the shipwreck on Melita. St. Luke describes the wind as, in character, 'typhonic' (RV 'tempestuous'), that is, marked by whirlwinds or 'sudden eddying squalls,' as Ramsay calls them, adding that 'every one who has any experience of sailing on lakes or bays overhung by mountains will appreciate the epithet "typhonic" which Luke uses' (*St. Paul the Traveller*, p. 326), and by way of greater exactness adds its nautical name, 'which is called' (*ὁ καλούμενος*). Unhappily, the state of the text leaves the precise name doubtful. A summary of the various readings will be found in Sanday, *Appendices ad NT*, p. 140. The great mass of later testimony yields 'Euroclydon'; the oldest uncials Aא have *ευρακυλων*, and this was probably the reading of B*. To B² appear to be due the superimposed Υ and Λ which appear in this MS (ΕΥΡ$^{\Upsilon}$ΑΚ$^{\Lambda}$ΥΛΩΝ). B³ then either turned Λ into Δ, or, if it was done by B², patched up the letter afresh. Vercellone-Cozza in the appendix to their facsimile say '*ευρακυλων* B¹, *ευρυκλυδων* B³.' The Vulg. Cassiod. give *Euro-aquilo*. Apart from ampler attestation, Euroclydon may claim a preference as the more difficult reading, by positing which we may explain the others as emendations, but hardly the converse. The word in this form is not found anywhere else. The meaning of the compound is obscure. Etymologically, it would mean 'a surge raised by Eurus,' the E. or S.E. wind, but such a description of the effect could hardly be applied to the wind itself which caused it. If we should take the form εὐρυκλύδων (which occurs in B^2, one or two cursives, and a gloss of the *Etym. M. s.v.* τυφών, and is approved by Griesb.) and derive it from εὐρύς, 'broad,' it would mean 'a wind raising a broad surge or surf'; but besides its lack of attestation, it is for the very reason of its greater suitableness dismissed by Meyer as an obvious correction; and it would yield a character more or less applicable to any wind blowing strongly rather than such a note (*e.g.* of direction) as we might expect to be the basis of a distinctive nautical name. Euraquilo, on the other hand, commends itself not only by its early attestation, but by its special precision, as made up of Eurus the S.E. or rather (as Smith adduces strong reasons for holding) the E., and Aquilo the N.E., wind, fitly expressing the direction E.N.E. whence this wind blew. It well accords (*a*) with the narrative of the incidence and effects of the storm, and (*b*) with the experience of navigators in the Levant, quoted by Smith and others, in which 'southerly winds almost invariably shift to a violent northerly wind.' The exception taken to the form as 'inadmissible' (Reuss and others), 'because it is composed of a Greek and a Latin element,' vanishes in presence of analogous compounds such as Euronotus and Euroauster, and of the probably mixed nationality of the sailors and traders to whom such coinages were primarily due; to say nothing of the survival, to which Renan calls attention, of the word *Euraquilo* itself in the name *Gregolia* given to the same wind by the Levantines 'as *Euripus* has become *Egripou.*' Following strict analogy, we might expect the word to be, as in the Vulg., *Euroaquilo,* and the presence of a less regular form may have led to conjectural emendation (Overbeck); but we can hardly see how this should have deviated into so enigmatic a word as Euroclydon. Meyer says, 'Far more naturally would the converse take place, and the Εὐροκλύδων, not being understood, would be displaced by the similar Εὐρακύλων . . . so that the latter form remains a product of old emendatory conjecture'—a curious anticipation, in this particular case, of the theory more recently formulated by Burgon and Miller as to the older witnesses whom they designate 'the licentious scribes of the West.' For them (*Causes of the Corruption of the Traditional Text,* p. 46 f.) this passage supplies a signal confirmation of their view, leading them to denounce in strong language Euraquilo as 'an imaginary name,' 'an impossible Latin name,' 'utterly missing the point, which is the violence of the wind as expressed in the term Euroclydon' (a remarkable begging of the question, where the violence of the wind had already been explicitly affirmed in the epithet 'typhonic'!). Why should these early copyists be thus severely blamed for suspecting some corruption to underlie the anomalous Euroclydon, and preferring the more intelligible Euraquilo on such grounds of internal probability as have since commended it to the majority of critics and commentators? But when we consider the mass of testimony on the side of Euroclydon, and the difficulty of accounting for the emergence of this form, if it had not been original, may we not find a feasible key to the solution of the problem in the view put forward by Conybeare and Howson (ii. p. 402 n.): 'The addition of the words ὁ καλούμενος seems to us to show that it was a name popularly given by the sailors to the wind; and nothing is more natural than that St. Luke should use the word which he heard the sailors employ on the occasion'?

---

* It is disputed whether Jer 13^{4-7} really refers to the Euphrates see Ewald, *ad loc.*).

LITERATURE.—The subject is discussed in the 'Lives of St. Paul' by Conybeare and Howson, Lewin, and *others*; at considerable length, but with unequal relevancy, by Falconer, *Diss. on St. Paul's Voyage*, 2nd ed. pp. 12-19, 24-26; most fully and satisfactorily by Smith, *Voyage and Shipwreck*, in his 'Diss. on the wind Euroclydon,' p. 119 ff., with Appendices from Bentley and Granville Penn, pp. 287-292; cf. Blass, *ad loc.*

WILLIAM P. DICKSON.

EUTYCHUS (Εὔτυχος).—When St. Paul was at Troas on his final journey to Jerus., on the first day of the week he and his party, with the Christians of the place, assembled in an upper room to break bread. As St. Paul was leaving the next morning, his speech was lengthy, and a young man of the name of Eutychus, who was sitting at the window (ἐπὶ τῆς θυρίδος), fell asleep (perhaps owing to the heat of the many lamps that were lighted), and, falling down from the third storey, was taken up dead (ἤρθη νεκρός). St. Paul went down and embraced him, and bade them not trouble themselves, as his life was yet in him. Then he went upstairs, broke bread, and continued talking until the morning. As they departed the young man was brought to them alive (Ac 20^{7-12}).

The incident occurs in the 'we' section of the Ac and is clearly authentic, but two opinions are held. It has been pointed out that it may be capable of a perfectly natural explanation, and it is suggested that it illustrates the growth of mythical stories on a basis of fact, and has been introduced here as a parallel incident to that related concerning Peter (9^{36-43}). But Ramsay points out that St. Luke's language is very precise; that he does not, as in 14^{19}, merely state that E. was thought to be dead, and that weight must be attached to his medical knowledge. Even if this be (as is perhaps the case) putting an unnatural strain on the words, it is perfectly clear that the story was related as an instance of the exhibition of power by the apostle, and that the writer, who was an eye-witness, believed it to be such.

LITERATURE.—Ramsay, *St. Paul the Trav.* p. 290; Holtzmann, *Hand-Commentar.* p. 402; Zeller, *Acts,* ii. p. 62, Eng. tr.

A. C. HEADLAM.

EVANGELIST (εὐαγγελιστής,—'a preacher of good news,' the substantive of εὐαγγελίζω—or εὐαγγελίζομαι, the commoner bibl. form). The verb is used in bibl. Gr. occasionally in the general sense of class. Gr. (1 S 31^9, Lk 1^{19}), and, when specialized, stands for the work of Gospel preachers of all kinds: the subst., however—which is rare, and entirely sacred and eccles., occurring in bibl. Gr. only in Ac 21^8, Eph 4^{11}, 2 Ti 4^5—is confined strictly to the Christian good tidings, and, apparently, to a particular office or function (see Hort, *Ecclesia,* 158). The clearest evidence for the distinctness of office or function lies in Eph 4^{11} '[Christ] gave some to be apostles; and some, prophets; and some, *evangelists*; and some, pastors and teachers.' It is true that, in the list at 1 Co 12^{28}, evangelists are omitted (also ἐπίσκοποι and διάκονοι); but there the point is, perhaps, to illustrate spiritual aptitude rather than to give an exhaustive list of eccles. offices. When a similar omission occurs, Ro 12^{6-8}, St. Paul seems bent chiefly on distinguishing certain charismata, being content to leave the catalogue incomplete. Possibly, in each case local considerations partly account for the omissions. But in Eph the context suggests that the writer desires to mention all the principal offices, whereby Christ had provided for the spiritual edification of the Church universal, and εὐαγγελιστής appears to come third in order of institution and of spiritual significance. At the same time it is noticeable that we do not find the word (even in places where it might naturally be looked for) in any of the Pauline Epistles whose genuineness meets with most general acceptance. Subsequent reference will be made to the passage in the Pastoral Epistles, 2 Ti 4[5]; it will be sufficient here to say that the phrase ἔργον ποίησον εὐαγγελιστοῦ, 'do the work of an evangelist,' is too marked and peculiar to be satisfactorily interpreted as merely equivalent to 'preach the Gospel.' The third and last instance—that in Ac 21[8] (a verse in one of the 'we' passages), 'we came unto Cæsarea; and entering into the house of Philip the *evangelist*, who was one of the seven, we abode with him'—must be compared with Ac 8[5-40], where it is said that among those who were scattered from Jerus. after the martyrdom of Stephen, and went hither and thither *preaching the word*, Philip preached the Christ at Samaria, *without being qualified* (v.[14f.]) *to impart the Holy Spirit*; was *sent by the Spirit* to *teach* the Ethiopian eunuch in the desert between Jerus. and Gaza; was afterwards *carried off by the Spirit* and found at Azotus; and, finally, having evangelized 'all the cities' in his route, *took up his abode* at Cæsarea. He may therefore have been called εὐαγγελιστής, not because he had been definitely set apart for the office, but because of the missionary work he had done and was perhaps still doing with Cæsarea as centre. He had, in fact, been set apart for something else, 'to serve tables' (Ac 6[1-6], 21[8]), but had superadded, and possibly, in the end, substituted, the work of a missionary, because he was, like Stephen, 'full of the Holy Ghost' (Ac 6[5]), and possessed the charisma for the work of preaching to those who had not heard the Gospel before.

The three passages, as above discussed and illustrated, suggest the following conclusions: (1) *The evangelists were inferior to the apostles.* They are placed third in order in Eph; Philip was unable to impart the Holy Spirit to the Samaritans; Timothy was the assistant and delegate of St. Paul. Consistent with this conclusion is the epigram of Pseudo-Jerome (*in Eph* 4[11]) 'omnis apostolus evangelista, non omnis evangelista apostolus.' (2) They were *travelling missionaries*, preaching the Gospel to those unacquainted with it, yet sometimes with a settled place of abode, as Philip at Cæsarea, and Timothy at Ephesus. Thus they were officers acting for the whole Christian community, not for a single church only. Their function could be general, covering wide districts, or it could be, in practice, local and circumscribed. Thus Theodoret's apparently contradictory statements can be reconciled: περιϊόντες ἐκήρυττον, yet μὴ περιϊόντες πανταχοῦ. 'Going about they used to preach,' yet 'not going about *everywhere*' (as apostles might do). (3) *They were charismatically endowed.* Compare the influence of the Holy Spirit upon Philip, and the χάρισμα of Timothy (1 Ti 4[14], 2 Ti 1[6]). Yet the revelations to the prophet and apostle were of a higher and more striking order. The apostles were fitted to be the direct authoritative representatives of Christ (Mt 10[40], Gal 4[14], 1 Co 11[23]); the prophets, to sway the heart and conscience by the demonstration of the Spirit and of power (1 Co 14[24f.]); the evangelists were more 'matter-of-fact men,' preaching the word, communicating the facts of the Gospel, paving the way for the more systematic work of the pastors and teachers (see order in Eph 4[11]) who watched over and trained the churches when founded (2 Ti 4[2-5]). But while this may suffice for a distinction in *work*, it must not be taken as exclusive, so that apostles could not be prophets, or that apostles and prophets could not be evangelists, or that evangelists could not be pastors or teachers, or both. In the floating constitution of the half-organized early Church, different kinds of work were amalgamated (as must always happen) according to qualifications and circumstances (cf. 1 Co 1[17], Ac 8[25], and the mixed instructions to Timothy and Titus). (4) *They were, sometimes at any rate, solemnly set apart for the special function.* Thus Timothy (1 Ti 4[14], 2 Ti 1[6]); and probably Paul and Barnabas (Ac 13[1-3]) were (so far as the Church was concerned) set apart, in the first instance, not as apostles, but as evangelists from among the 'prophets and teachers' at Antioch.

But we are still left in much uncertainty as to the exact position of the εὐαγγελιστής, and this uncertainty is increased rather than diminished by the contributions of later literature to the subject. Why, for instance, is there no mention of evangelists in the Apostolic Fathers? Because, says Harnack, there was no definite primitive distinction between apostle and evangelist, and in the *Didaché* the 'apostles' are just evangelists. But why should not evangelist have survived, and apostle have been reserved (as in later days) for the first direct representatives of Christ? And, further, when in the *Didaché* the 'apostles' are forbidden to stay more than two days in the same place, can we regard them as parallels to Paul, or Philip, or Timothy, especially as in a letter to the last named such constant itinerancy is condemned (1 Ti 5[13])? Of course the strict injunction in the *Didaché* may be due to the growing opportunities for imposing upon the hospitality of well-to-do Christians, and the missionaries referred to in 1 Ti may have been caricatures of the evangelist type; but the difference is striking. A partial reply to the former question may be that the extension of the apostolate beyond the Twelve and St. Paul (an extension obtaining apparently in the apostolic age itself) soon submerged the less familiar and less dignified name of evangelist. This, however, scarcely accounts for the speedy and growing exclusiveness of the apostolic title; or for the fact that Eusebius recognizes in Pantænus the evangelist a type of an old order still largely surviving in the days of the Alexandrian, but not common in his own days (Eus. *HE* v. 10).

The material Eusebius affords us on this subject, though to some extent unhistorical, throws back light on the primitive use of the term evangelist. He tells how Pantænus found that his arrival in India had been anticipated by the written Gospel of Matthew; he tells how Thaddæus, one of the Seventy, had been sent by the Apostle Thomas, under divine impulse, to Edessa, as a preacher and evangelist of the teaching of Christ (*HE* i. 13), and this 'teaching' (also called 'the seed of the word of God') is the story of Jesus (§ 19). We may combine these hints with the fact that Eusebius (leaving the rest unmentioned) avowedly records 'the names of those [post-apostolic evangelists] only who have transmitted the apostolic doctrine to us in writings still extant'; that Theodoret definitely *restricted* the *name* to this class; that, finally, Œcumenius and Chrysostom confined the name to the writers of the Four Gospels; and that εὐαγγελιστής became (in the *Apostolic Ordinances*, Harnack, *Texte*, ii. 5) an appellation of the ἀναγνώστης, the reader of the Gospel for the day, who had also to be διηγητικός, *capable of explaining* it. We may further recall that Philip interpreted the prophet Isaiah to the eunuch; that Apollos (probably an evangelist) was mighty in the Scriptures; that he had been taught the 'way of the Lord' more perfectly by Aquila and Priscilla (probably evangelists also, as Theophylact believes); that Timothy the evangelist was strong in the Scriptures, one of the reasons doubtless for his choice; that Paul passes on to Timothy the 'deposit' of the Gospel he had received from Christ, exhorts him to keep the original model of sound words, and reminds him of the word that is trustworthy, and of the (open) mystery of godliness which is the story of Jesus (2 Ti 1^{12}, 1 Ti $6^{20f.}$·1^{15}, 2 Ti $2^{11ff.}$; cf. Tit 3^{8}, 1 Ti 3^{16}). We shall, then, favour the conclusion that the NT evangelists, as such, were depositaries of the facts of the Gospel as it gradually crystallized; dealing with these facts orally and in writing, now as missionaries, now as interpreters, without the special *σοφία* of the apostles, or their peculiar weight and authority; demi-apostolic men, with a charisma, but one not so commanding as that of the apostle, or so striking as that of the prophet. In a word, they might be called specially inspired *teachers*; the *εὐαγγελιστής* being distinctively and originally a teacher *abroad*, aggressive, awakening; the *διδάσκαλος* a teacher *at home*, quiet and edifying. If this was the practical difference between *evangelist* and *teacher*, we can better understand Eph 4^{11} 'some (general and missionary) evangelists, and some pastors and teachers' (local officers with the double capacity for moral supervision and for instruction in doctrine). We can better understand 1 Co 12^{28}, where *διδασκάλους* (in the third place) would include evangelists. We can better understand how, in the letters to Timothy the 'evangelist,' so great a stress is laid on *teaching*. Furthermore, we can better understand the meaning of *teacher* in the *Didaché*, when the phrase, 'whoever *cometh* and *teacheth*, you,' is followed immediately by 'but in regard to the *apostles and prophets*' (ch. 11); here the teacher seems to be a wandering teacher, that is, an evangelist; and the order 'apostles and prophets' is so far against the supposition that the apostles are evangelists. This contention is confirmed by the order in other passages, *e.g.* (ch. 15) 'Bishops and deacons . . . they too render you the service of *prophets and teachers*' [when, *i.e.* you have none such sojourning among you]; for 'prophets and teachers' may 'settle among' them (ch. 13), though apostles may not.

If this progressive convergence of *evangelist* and *teacher* be a fact, it is easy to see how the title of apostle became increasingly exclusive, and how the title of evangelist gradually confined itself to the writers of the Four Gospels. See CHURCH, p. 433.

LITERATURE.—Zöckler, *Diakonen und Evangelisten*; Réville, *Les origines de l'épiscopat*; Sohm, *Kirchenrecht*; Weizsäcker, *Apostolic Age* (Eng. tr.); Harnack, Texte ii. *Lehre der Apostel*; Zahn, *Missionsmethoden im Zeitalter der Apostel*; Smith, *DB*, art. 'Evangelist.'

J. MASSIE.

EVE (חַוָּה *ḥavvah*),* is the name given in J to the first woman, the wife of Adam, the mother of Cain, Abel, and Seth. In Gn 3^{20} (which is sometimes regarded as a gloss) it is said that she was so named because הָיְתָה אֵם כָּל־חָי 'she was the mother of all living,' *i.e.* of course, 'all living men.' חַוָּה is a form of the widespread Sem. root חוה, חיה, or חיי, and = *life*, as LXX, *Oxf. Heb. Lex.*; rather than *living* (RVm *Living* or *Life*), or *life-giving* (Symm.), as if a shortened Pi. ptcp. W. R. Smith (*Kinship and Marriage in Arabia*, p. 177) makes *Ḥavvah* a phonetic variation of *ḥayy*, and thus a personification of the bond of kinship, conceived as exclusively mother-kinship (*ḥayy*). Wellh. (*Proleg.* 308 n. Eng. tr.) follows Nöldeke in suggesting that *ḥavvah* = serpent, as explained in Philo (*de agric. Noe*, § 21) and Midrash Rabba on Gn 3^{20}, and finds here a trace of the primitive belief that all earthly life originated in a primeval serpent (cf. the function of Tiamat in the Bab. cosmology, and Arab. *ḥayyatun*, serpent).

For Eve's relation to Adam, and the account of her in the narrative of the Creation * and the Fall, see ADAM. Her utterance on the birth of Cain, Gn 4^{1}, is very obscure,—קָנִיתִי אִישׁ אֶת־יהוה 'I have gotten a man,' AV 'from the Lord,' with Targ. Onk.; RV '*with the help* of the Lord,' with LXX, *διὰ τοῦ θεοῦ*; Vulg. *per deum*; Symm. *σὺν κυρίῳ*. Another Gr. tr. quoted in Field's *Hexapla*, *ἐκτησάμην ἄνθρωπον κύριον*, 'I have gotten a man, even the Lord,' has been adopted by Luther and others, and understood as expressing Eve's conviction that the promised Messiah of 3^{15} had been born. Umbreit proposed 'I have gotten J" for a husband.' The RV is the only probable translation. The text is possibly corrupt. (See CAIN).

W. H. BENNETT.

EVENING.—See TIME.

EVENT occurs thrice in Ec (2^{14} $9^{2.3}$) as the tr. of *miḳreh* in the obsol. sense of 'that which befalls,' 'fate': as 9^{2} 'There is one event to the righteous and to the wicked.' Cf. Shaks. 2 *Henry IV.* IV. ii. 83—

> 'Against ill chances men are ever merry,
> But heaviness foreruns the good event.'

Elsewhere event is found only in the sense of 'issue,' 'result,' Wis 8^{8} '[Wisdom] foreseeth . . . the events of seasons and times' (*ἐκβάσεις*); 2 Mac 9^{25} 'expect what shall be the event' (*τὸ ἀποβησόμενον*). This, which is the common meaning of Lat. *eventus*, is most frequent in writers of the time of AV, as Shaks. *T. of Shrew*, III. ii. 126—

> 'I'll after him, and see the event of this.'

The mod. sense of an occurrence is very rare in writers of the period. Carlyle quotes Cromwell (*Letters*, 12 Sept. 1650) '[We do not think] of the hand of the great God in this mighty and strange appearance of His; but can slightly call it an "event."'

J. HASTINGS.

EVERLASTINGNESS.—For everlasting see ESCHATOLOGY. 'Everlastingness,' once common for 'eternity,' is now used only where its special signification is emphasized, as Cheyne, *Isaiah*, i. 242, 'The idea of the divine everlastingness is one of the primary notes of the prophecy.' It occurs only 2 Es 8^{20} 'O Lord, thou that dwellest in everlastingness' (qui inhabitas sæculum, RV 'abidest for ever,' RVm 'inhabitest eternity'). Wyc. (1388) translates Is 57^{15} 'For the Lord high, and enhaunsid, seith these things, that dwellith in euerlastyngnesse.'

J. HASTINGS.

EVERY is occasionally found in AV where mod. usage demands 'each,' as 2 S 21^{20} 'a man of great stature, that had on every hand six fingers, and on every foot six toes'; 2 Es 3^{10} 'it came to pass in every of them' (RV omits);† Rev 21^{21} 'every several gate was of one pearl' (RV 'each one of the several gates'). Cf. Cranmer, *Works*, i. 111, 'In my right hearty wise I commend me unto you, and likewise to everich* of you.' Cf. also Ex 35^{10} 'every wise hearted among you.'

---

* LXX Gn 3^{20} *Ζωή*, $4^{1.25}$ *Εὔα* (the *Εὔαν* of v.^{25} has no equivalent in the Heb.), so also in NT 2 Co 11^{3}, 1 Ti 2^{13}. In Gn 3^{20} Aq. has *Αὔα* or *Αὐα*, and Symm. *Ζωογόνος*. *Tisch.* writes *Εὕα* both in OT and NT, but WH (ii. 313) point out that in the absence of MS evidence as to breathings, the only safe guide is the initial ח of the Heb. Cf. also the Vulg. *Heva*, both in OT and NT.

* The line of an Assyr. Bab. magical text is often read as,

> 'The woman from the loins of the man they bring forth,'

and quoted as a parallel to the formation of Eve from the ribs of Adam. But when this line is correctly tr. and read in its context, the parallel entirely disappears; 'they' are demons, and the passage narrates their ubiquity and mischief; they enter houses through locked doors, like a snake or the wind, and

> 'A woman [who is] at the loins (?) of a man they lead away.
> A child [who is] at the knee of a man they draw forth.
> A noble [who is] at the house of his kindred they drive out.'

J. D. Davis, *Genesis and Sem. Trad.* 49.

See throughout, *Oxf. Heb. Lex.* חַוָּה, Dillm. on Gn 3^{20} 4^{1}.

† Cf. T. Elyot, *The Governour*, ii. 4, 'he made as wel the great as the smal, and careth for euery of them equally.'

Trench (*On the Auth. Ver. of NT*, p. 63) points out that both 'each' and 'every' take occasionally plu. concords, as Ph 2^{3} 'Let each esteem other better than themselves'; Rev 20^{13} 'They were judged every man according to their works.' He adds, '"each" and "every," though alike implying many, alike resolve that many into its units, and refer to it in these its constituent parts, with only the difference that "each" segregates, and "every" aggregates, the units which comprise it.' J. HASTINGS.

EVI (אֱוִי 'desire' (?)).—One of the five kings of Midian slain, Nu 31^{8}, Jos 13^{21} (Evî) P.

EVIDENCE, EVIDENTLY.—Following Coverdale, AV has translated סֵפֶר, *sêpher* (lit. 'book') by 'evidence' in Jer $32^{10.\ 11.\ 12.\ 14\ \textit{ter}.\ 16.\ 44}$. The meaning is 'title-deeds.' Coke (1628) says, 'Writings under seale, as Charters and Deeds, and other writings without seale, as Court Rolles, Accounts, and the like . . . are called Evidences.' RV gives 'deed' throughout. Cf. T. Adams, *II Peter*, p. 23 (on 1^{2}), 'Therefore a man should be often perusing and looking over his own evidence, as we review our assurances of worldly possessions, that he may be sure of the whole and every part of it: for it is dangerous to have any flaw or defect in our conveyance of salvation.'

'Evidence' is also the tr. of ἔλεγχος in its single occurrence in NT, He 11^{1} (RV 'proving,' RVm 'test') 'Now faith is the substance of things hoped for, the evidence of things not seen.' This is the Bishops' tr^{n}, Wyclif having 'an argument of thingis not aperynge,' Tind. 'a certayntie of thinges which are not sene,' Gen. 'sheweth evidently the things which are not sene.'

'Evidently' is the tr^{n} of *φανερῶς*, Ac 10^{3} 'He saw in a vision evidently about the ninth hour of the day an angel of God coming in to him' (RV 'openly'); and of the prep. *προ-* in *προεγράφη*, Gal 3^{1} 'before whose eyes Jesus Christ hath been evidently set forth crucified' (RV 'openly'). In both places 'evidently' has the obsol. meaning of 'clearly,' 'distinctly,' as in Knox, *Hist.* 261, 'And lest that your Honors should doubt in any of these premises, we offer ourselves evidently to prove, That,' etc. J. HASTINGS.

EVIL.—This word is likely to become obsolete except in the theological sense of the doctrine of evil (for which see SIN).† In AV it is freely used as subst., adj., and adverb. **1.** As subst., often in immed. antithesis to 'good,' as Gn 2^{9} 'the tree of knowledge (RV 'the knowledge') of good and evil' (טוֹב וָרָע); 2 Es 2^{14} 'I have broken the evil in pieces, and created the good' (malum et . . . bonum): sometimes in the plu., as Pr 14^{19} 'The evil bow before the good' (שַׁחוּ רָעִים לִפְנֵי טוֹבִים). **2.** As adj. 'evil' is applied, not only to things, but even to persons, a usage now quite obsolete; thus Jer 12^{14} 'all mine evil neighbours.' Cf. Knox, *Hist.* 283, 'He had a very evil woman to his wife.' For 'evil spirit' (Lk 7^{21} 8^{2}, Ac $19^{12.\ 13.\ 15.\ 16}$) see DEMON. In Mt 5^{37} 6^{13} RV prefers 'the evil one' to AV 'the evil,' and in 1 Jn 5^{19} for AV 'wickedness': see DEMON, and consult Lightfoot, *On a Fresh Revision*², pp. 269–323; Chase, *Lord's Prayer in Early Church* ('Texts and Studies,' I. iii.), pp. 71–167. The 'evil eye' is a Heb. expression for ENVY (which see). **3.** As adv. chiefly in the phrase 'evil entreat' (Ex 5^{22}, Dt 26^{6}, Job 24^{21}, To 10^{12}, Sir 7^{20} 33^{31}, Ac 7^{6}): the other phrases are 'went evil with' (1 Ch 7^{23}); 'evil affected' (Ad. Est 13^{5}, Ac 14^{2}); 'evil spoken of' (Sir 38^{17}, Ro 14^{6}, 1 Co 10^{30}); 'fare evil' (Sir 3^{26}). Cf. Grindal, *Letter to Q. Eliz.* (Parker Soc. ed. p. 381) 'Much like to the Popish Bishops in your father's time, who would have had the English translation of the Bible called in, as evil translated; and the new translating thereof to have been committed to themselves; which they never intended to perform.'

Evilfavouredness.—See FAVOUR.

J. HASTINGS.

EVIL-MERODACH (אֱוִיל מְרֹדַךְ) was the son and successor of the great Nebuchadrezzar on the throne of Babylon. According to 2 K $25^{27\text{-}30}$, he promoted the captive king of Jerus., Jehoiachin, in the 37th year of his captivity, set his throne above the thrones of the kings who were with him in prison, changed his prison garments, and made him a guest at the royal table to the end of his life. The Sept. reads Εὐιαλμαρωδέκ, and Berosus Ἀμιλμαρούδοκος. The cuneiform equivalent of his name is *Amêl(Avêl)-Maruduk* (cf. Haupt in *Zeitsch. f. Assyr.* ii. 266 and 284 f.), 'man (servant) of Merodach.' According to Berosus, he administered the kingdom during his two years' reign (562–560) with indiscretion and wanton unrestraint. Tiele (*Bab.-Assyr. Ges.* pp. 457, 464) concludes, on the basis of this character of E.-M., that the benevolent act towards Jehoiachin should be attributed to his successor on the throne of Babylon. We possess as yet none of his annals, though several contract tablets date from his reign. In the year 560 his brother-in-law, Neriglissar (*Nergal-šar-uṣur*, 'Nergal preserve the king'), in a conspiracy, slew him and seized the throne.

LITERATURE.—Meyer, *Gesch. d. Alterthums*, vol. i. p. 597; Delitzsch, *Heb. Lang.* p. 12; Boscawen, *Trans. Soc. Bib. Arch.* vol. vi. p. 1 ff.; and authorities above cited.

IRA M. PRICE.

EVIL SPEAKING.—See SLANDER. **EVIL SPIRIT.**—See DEMON.

EXACT.—**1.** The adj., only Sir 51^{19} 'In my doings I was exact' (*ἐν ποιήσει μου διηκριβησάμην* A, but B has *ἐν ποιήσει λιμοῦ διηκριβασάμην*, 'in the doing of hunger (?) I was exact'; Fritzsche suggests, and most edd. adopt, *νόμου*, 'in the doing of the law'). Here 'exact' means 'strict,' 'particular,' as Shaks. *Troil. and Cres.* IV. v. 232—

'Now, Hector, I have fed mine eyes on thee;
I have with exact view perused thee, Hector,'

and Herbert, *The Temple*: 'Faith,' l. 43—

'What though my bodie runne to dust?
Faith cleaves unto it, counting every grain
With an exact and most particular trust,
Reserving all for flesh again.'

2. As verb frequently. Notice Ps 89^{22} 'The enemy shall not exact upon him' (לֹא־יַשִּׁא בוֹ, RVm 'do him violence'): the mod. phrase is 'impose exactions upon.' Cf. Burnet (1687), *Trav.* ii. 86, 'Innkeepers think they have a right to exact upon Strangers.'

In Lk 3^{13} RV has changed 'Exact no more than that which is appointed you,' into 'Extort no more,' etc. But 'exact' was surely strong enough; were they permitted to extort anything? Tind. has 'require.' Following the Vulg. *faciatis*, Wyclif has 'do ye no more,' and Rheims 'Doe nothing more,' which seems a natural reply to 'What shall we do?' But the Greek verbs are not the same, Τί οὖν ποιήσωμεν (TR ποιήσομεν) and Μηδὲν . . .

---

* 'Every' is 'ever each'; the above example shows it in process of formation; and the two words are often practically interchangeable, as Milton, *Comus*, 311—

'I know each lane and every alley green.'

† The loss of 'evil' seems to be the result of a discrimination in words with cognate meaning. The AV used 'evil,' 'bad,' 'naughty,' quite indiscriminately. Thus in Jer $24^{2.\ 3}$ 'the other basket had very naughty figs, which could not be eaten, they were so bad . . . the good figs, very good; and the evil, very evil, that cannot be eaten, they are so evil.' This goes farther in the way of variety than the earlier versions by introducing 'bad.' The Heb. is the same throughout, and RV gives 'bad' throughout.

In Mt 21^{41} the AV has followed the Bishops', 'he will miserably destroy those wicked men,' and has thus lost the force of the Greek (*κακοὺς κακῶς ἀπολέσει αὐτούς*). Tindale is no better, 'He will cruellye destroye those evyll persons.' But Wyclif, 'He schal lese (=destroy) yuel the yuele men'; Rheims, 'The naughtie men he will bring to naught'; and RV 'He will miserably destroy those miserable men,' all give the repetition its advantage.

πράσσετι; and πράσσειν has the sense of *exacting* both in class. Greek and in Lk 19^{23} (EV 'require'). *Agere* is similarly used in Lat., and might have been chosen by Jerome here.

Exactly is found 2 Es 16^{64} 'the Lord will exactly search out' (scrutinando scrutinabit), and Sir 16^{25} 'declare his knowledge exactly' (ἐν ἀκριβείᾳ). The sense is the same as 'exact' above, *i.e.* 'precisely'; cf. Shaks. *Temp.* I. ii. 499—

> 'But then exactly do
> All points of my command.'

J. HASTINGS.

EXCEED.—The transitive use is now rare and almost confined to the sense of 'preponderate,' as Jowett, *Plato*², v. 76, 'Men always choose the life which exceeds in pleasure.' But in AV we find the sense of 'go too far,' without introducing a comparison, 1 S 20^{41} 'They . . . wept one with another, until David exceeded' (הִגְדִּיל); Job 36^{9} 'Then he showeth them their work, and their transgressions that they have exceeded' (יִתְגַּבָּרוּ, RV 'have behaved themselves proudly'); 2 Es 4^{34} 'Do not thou hasten above the most Highest: for thy haste is in vain to be above him, for thou hast much exceeded' (*excessus tuus multus*, RV 'for he that is above [hasteneth] on behalf of many,' reading *Excelsus autem propter multos*, after Syr.): so Coverdale's tr. of Is 31^{6} 'Therfore (O ye children of Israel) turne agayne, like as ye have exceaded in your goinge back' (AV and RV 'have deeply revolted'), and Bacon, *Advancement of Learning*, II. ix. 3 (Selby's ed. p. 53) 'the scruples and superstitions of diet . . . in the law of Mahomet, do exceed.'

Exceeding is rare as an adj., only eight times,* while as adv. it is used 60 times at least, when it always qualifies an *adj.* Thus Mt 8^{28} 'There met him two possessed with devils, coming out of the tombs, exceeding fierce' (χαλεποὶ λίαν; so Rheims; but Tind. Cov. Cran. and Gen. 1557, 'out of measure fearce'; Gen. 1560 and Bishops', 'very fierce'; Wyc. 'ful wood').

Two cases of 'exceeding' as adv. demand attention: Jon 3^{3} 'Nineveh was an exceeding great city,' and Ac 7^{20} 'Moses . . . was exceeding fair.' The Heb. of Jon 3^{3} is עִיר־גְּדוֹלָה לֵאלֹהִים, lit. 'a city great unto God,' as RVm; and the Gr. of Ac 7^{20} is ἀστεῖος τῷ Θεῷ, lit. 'fair unto God,' as RVm again. AV and RV agree in taking both passages as a form of the superlative; and this is supported by 1 Ch 12^{22} 'a great host, like the host of God.' But in the only other place where the identical expression occurs, Gn 10^{9} (גִּבֹּר־צַיִד לִפְנֵי יהוה), AV and RV give 'a mighty hunter before the LORD'; and it is probable that in the three passages the intention is to express, not merely the superlative, but the *ideal* of might, greatness, beauty, such as could be admitted into the presence of the All-perfect. There are similar expressions in the Psalter, Ps 36^{6} AV 'the great mountains,' RV as Heb. 'the mountains of God'; 65^{9} 'the river of God,' AV and RV; 80^{10} AV 'the goodly cedars,' RV as Heb. 'cedars of God'; 104^{16} AV and RV 'the trees of the LORD'; but Perowne (*Jonah*, *l.c.*) is right in pointing out that in these passages the thought is different, being that of God's proprietorship, as indeed the last passage indicates, 'which he hath planted.'

Exceedingly also occurs some 50 times, being the form used with *verbs* (except Ac 26^{11}, Gal 1^{14}, passages in which AV first of Eng. versions uses this word). 'More exceedingly' is found Mk 15^{14} (TR περισσοτέρως, edd. περισσῶς, RV 'exceedingly'), Gal 1^{14} (περισσοτέρως); and 'exceedingly the more,' 2 Co 7^{13} 'e. the more joyed we' (περισσοτέρως μᾶλλον ἐχάρημεν). Notice also 'very exceedingly,' Gn 27^{33} 'And Isaac trembled very e.' (וַיֶּחֱרַד יִצְחָק חֲרָדָה גְּדֹלָה עַד־מְאֹד, lit., as AVm, 'trembled with a great trembling greatly'; LXX, ἐξέστη δὲ Ἰσαὰκ ἔκστασιν μεγάλην σφόδρα; Geneva, 'Then Izhák was stricken with a meruelous great feare'; Bishops', 'And Isahac was greatly astonied out of measure'; Dillmann, 'Da erschrak Isaak grossen Erschreckens über die Massen'; other translations are less forcible).

J. HASTINGS.

EXCELLENCY.—The verb to 'excel' occurs 13 times in AV, translating just as many different Heb. and Gr. words, but always distinctly with the sense of 'be pre-eminent over others,' 'surpass.' The idea of pre-eminence is seen even in Ps 103^{20} 'ye his angels that excel in strength,' though the Heb. is גִּבֹּרֵי כֹחַ *gibbôrê kôaḥ*, lit. 'heroes of strength'; for, as Delitzsch says, it is because to the angel hosts belong strength unequalled that they are summoned now to praise God in company with the Church on earth, whose dignity surpasses every other created thing.

Pre-eminence is also the leading thought in the word 'excellency.' 1. Sometimes the quality in which the pre-eminence appears is stated; thus Gn 49^{3} 'the excellency of dignity, and the excellency of power' (יֶתֶר שְׂאֵת וְיֶתֶר עָז), *i.e.* says Delitzsch, precedence, both in respect and in power, is due to Reuben above his brethren, because he is the firstborn; Ezk 24^{21} 'I will profane my sanctuary, the excellency of your strength,' *i.e.* the place of pre-eminent strength (Heb. גְּאוֹן עֻזְּכֶם, RV 'the pride of your power'); 1 Co 2^{1} 'I . . . came not with excellency of speech or of wisdom' (καθ' ὑπεροχὴν λόγου ἢ σοφίας. 'The word ὑπεροχή denotes strictly the act of overhanging, or the thing which overhangs; hence superiority, pre-eminence: by Byzantine writers it is used in the sense "your Excellency"'—Godet); Ph 3^{8} 'the excellency of the knowledge of Christ Jesus' (τὸ ὑπερέχον); 2 Co 4^{7} 'that the excellency of the power may be of God' (ἡ ὑπερβολή, RV 'exceeding greatness,' but 'superiority,' 'pre-eminence,' is always the meaning of the word). 2. More often the 'excellency' is of no special quality; but even then the Eng. word, *as understood in* 1611, though less precise is not less forcible than its Heb. or Gr. equivalents, for it has always in it the sense of superiority, uniqueness. Cf. *Pref. to AV* 1611, 'for the worth and excellency thereof above the rest'; *Pr. Bk.* 1552 (Keeling, p. 382), 'Forasmuch then as your Office is of so great excellency, and of so great difficulty'; Bacon, *Adv. of Learn.* II. xxiii. 27 (Selby, p. 149), 'Julius Cæsar . . . at first was an orator or pleader; but when he saw the excellency of Cicero, Hortensius, Catullus, and others . . . he . . . transferred his designs to a martial greatness.' The two words chiefly translated 'excellency' in AV are: (1) גָּאוֹן *gâ'ôn* (Ex 15^{7}, Job 37^{4}, of J″; Ps 47^{4}, Am 6^{8} 8^{7}, Nah 2^{2}, of 'Jacob'; Is 60^{15} of Zion; Ezk 24^{21} of the temple; Is 13^{19} of the Chaldæans), a word which primarily means 'exaltation,' hence majesty which is pre-eminent; (2) גַּאֲוָה *ga'ăwâh* (Dt $33^{26. 29}$, Ps 68^{34}, all of J″), a word of less honour than the preceding, being used indeed most frequently of 'pride' in a bad sense; still it is not inaptly translated 'excellency' in those passages, the reference being always to the unique 'dignity' of J″. (See also Driver, *Joel and Amos*. 1897, p. 238 f.).

In old writers 'excellence' and 'excellency' are both in use without difference of meaning. Shaks. uses 'excellence' 19 times, 'excellency' only thrice; AV has 'excellency' 29 times, 'excellence' not once. 'Excellency' has now given place to 'excellence,' and the word has greatly deteriorated: the only use of 'excellency' is as a term of courtesy, 'your Excellency,' which may be applied to any petty governor; and 'excellence' itself has accepted the vague sense of general worth. The deterioration may be partly due to the still greater loss that has befallen the adj. **excellent.** In AV 'excellent' is probably never used without a distinct expression of comparison, 'superior,' 'pre-eminent.' Cf. T. Adams, *II Peter* (1633), p. 83, 'Jacob gave Reuben a blessing, but added, Thou shalt not be excellent'; and p. 83, 'Cain's outlawed stock were yet excellent in worldly things.' But comparisons are odious; Shaks. has a fondness for using it ironically, and in course of time it has dropped down to merely 'very good.' J. HASTINGS.

---

* The eight occurrences of 'exceeding' as an adj. are 2 Mac 8^{27} 'yielding e. praise and thanks to the Lord' (περισσῶς εὐλογοῦντες καὶ ἐξομολογούμενοι τῷ Κυρίῳ, RV 'blessing and thanking the Lord exceedingly'); 15^{6} 'in e. pride and haughtiness' (μετὰ πάσης ἀλαζονείας ὑψαυχενῶν, RV 'bearing himself haughtily in all vaingloriousness,' RVm 'carrying his neck high'); 2 Co 4^{17} 'a far more e. and eternal weight of glory' (καθ' ὑπερβολὴν εἰς ὑπερβολὴν αἰώνιον βάρος δόξης, RV 'more and more exceedingly an eternal weight'); 9^{14} 'for the e. grace of God' (διὰ τὴν ὑπερβάλλουσαν χάριν); Eph 1^{19} 'the e. greatness of his power' (τὸ ὑπερβάλλον μέγεθος); 2^{7} 'the e. riches of his grace' (τὸ ὑπερβάλλον πλοῦτος); 1 P 4^{13} 'that ye may be glad also with e. joy' (ἵνα καὶ . . . χαρῆτε ἀγαλλιώμενοι); Jude ^{24} 'with e. joy' (ἐν ἀγαλλιάσει, RV 'in e. joy'). Thus in every instance the meaning is 'surpassingly great'; the word never has the sense of excessive or immoderate, which we find, *e.g.*, in Sandys, (1585) *Sermons*, 315, 'Why was Anna so exceeding in craving children at the hands of God?

EXCELLENT, or rather **MOST EXCELLENT,** is the regular tr. in RV for the word *κράτιστος*, used as a title of respect four times, and always by St. Luke (Lk 1^{3}, Ac 23^{26} 24^{3} 26^{25}). In AV 'most noble' is substituted in the last two instances. In three of those passages we clearly have the formal address of a person of high rank: 'Claudius Lysias unto the most e. governor Felix'; 'most e. Felix'; 'But Paul saith, I am not mad, most e. Festus'; in the fourth (Lk 1^{3}) it is used in the address to Theophilus, to whom St. Luke dedicated both his works, and a question of some interest arises as to whether we can assert from the use of the term elsewhere that Theophilus must have been also of high rank and position. So Theophylact, *Arg. in Ev. sec. Luc*: 'He writes to Theophilus, a man of senatorial rank, and also a magistrate (*συγκλητικὸν ὄντα καὶ ἄρχοντα ἴσως*), for the word *κράτιστος* was used of magistrates and governors (*ἀρχόντων καὶ ἡγεμόνων*), as also Paul says, addressing the governor Festus: "Most e. Festus."' The authority of a Byzantine commentator would, however, be delusive on such a question, as the meaning of language changes, and the question must be settled by contemporary usage.

1. There can be no doubt that from the 1st cent. onwards the word was an official title, but there is no proof that it was always so used. For instance in Jos., although in *Ant.* XVIII. viii. 4, XX. i. 2 we find the technical sense, in *Ant.* IV. vi. 8 (*ὦ κράτιστοι νεανιῶν*) it is certainly not so used, while in the dedication of the treatise against Apion to Epaphroditus, who was a freedman and procurator, the variation *κράτιστε ἀνδρῶν* seems to suggest a different tone (*c. Ap.* i. 1; *Vita*, 76). Cf. 2 Mac 4^{12}.

2. On the other hand, the usage of St. Luke seems more fixed. In those cases where the word occurs, it is certainly used as an official address, and is probably (we cannot say certainly) so used in the fourth instance. In any case there is certainly a difference in usage between St. Luke and Josephus, which makes it improbable that there is in this case any literary connexion between the two.

LITERATURE.—Otto, *De Epistola ad Diognetum*, 1845, p. 79, ed. ii. p. 51; Krenkel, *Josephus und Lucas*, p. 53; Ramsay, *St. Paul the Trav.* p. 388. A. C. HEADLAM.

EXCEPT.—The verb occurs only 1 Co 15^{27} 'But when he saith all things are put under *him, it is* manifest that he is excepted, which did put all things under him,' that is, an exception is made in his favour, he is left out of account. This is Coverdale's tr^{n}, and illustrates the oldest meaning of the verb. Cf. Shaks. *Jul. Cæs.* II. i. 281—

> 'Within the bond of marriage, tell me, Brutus,
> Is it excepted, I should know no secrets
> That appertain to you?'

In their Preface the translators of AV use 'except against' for take exception to; 'men not to be excepted against by them of *Rome*'; 'none of them feare to dissent from him, nor yet to except against him'; 'Truly (good Christian Reader) wee neuer thought from the beginning, that we should neede to make a new Translation, nor yet to make of a bad one a good one, (for then the imputation of *Sixtus* had been true in some sort, that our people had bene fed with gall of Dragons in stead of wine, with whey in stead of milke); but to make a good one better, or out of many good ones, one principall good one, not iustly to be excepted against; that hath been our indeauour, that our marke.' Cf. Knox, *Hist.* 447, 'the sincerer sort of the Ministrie in England had not yet assaulted the jurisdiction and Church gouernement (which they did not till the year 1572, at which time they published their first and second admonition to the Parliament), but onely had excepted against superstitious apparell, and some other faults in the service Booke.'

As past ptcp. of the verb to except, we find *excepted*, as Kingesmyll, *Man's Est.* v. (1580) 21, 'They eate of the excepted tree'; and Milton, *PL* xi. 426—

> 'Some to spring from thee, who never touch'd
> Th' excepted tree.'

But more frequently *except* (as Tindale, *Works*, i. 213, 'Here is no man except, but all souls must obey'), and then very often *following* its subst., as Ac 26^{29} Cov. 'these bondes excepte'; Bacon, *Adv. Learn.* i. (Selby's ed. p. 62, l. 8), 'the divineness of souls except.' When this ptcp. *preceded* its subst. it came to be regarded as a prep., though it is obviously hard to say when the change took place. The earliest examples in *Oxf. Eng. Dict.* quoted as a prep. are Langland, *Piers Plowman* (B), ix. 140, 'Alle shal deye . . . Except oneliche of eche kynde a couple'; Henry, *Wallace*, v. 1026, 'Thai entryt in, befor thaim fand no man, Excep wemen.' A little later began its use as a conj., introducing not a subst. but a clause, and being equivalent to 'unless.' In AV and RV it is used both as prep. and as conj., most frequently as conj. Once the conj. is strengthened by 'that,' Mk 13^{20} 'except that the Lord had shortened those days' (RV omits 'that'). Cf. Jn 3^{5}, Tind. 'except that a man be boren of water and of the sprete.'

The only use of 'except' that is now commended is as a preposition. Hodgson (*Errors in the Use of English*^{2}, 117 f.) quotes two examples from good modern writers of its use as a conj., but says that '*unless* would be generally held preferable'; Keble, *Memoir*^{2}, i. 81, 'Do not trouble yourself about writing to me, except you are quite in the humour for it'; Miss Mitford, *Letters and Life*, i. 150, 'It has no literary pretensions, except the total absence of all pretension may pass for one in these days of abundant conceit.' The Revisers have been somewhat sharply taken to task for using 'except' as a conj. [see esp. Moon, *The Revisers' English* (1882), 94–97, and *Ecclesiastical English* (1886), 205–207]. In this, however, they are at one with previous versions and with the history of the word. In the Canonical Scriptures of AV except occurs 73 times, and 67 times it is a conjunction. The Revisers have made few changes. In Gn 47^{26} they prefer 'only,' and in Nu 16^{13} 'but'; twice (2 S 3^{9}, 1 Co 14^{7}) they turn 'except' into 'if . . . not,' twice (1 Co 14$^{6.\,9}$) into 'unless,' and once (2 Co 13^{5}) into 'unless indeed.' It is only in connexion with Jn 8^{24} where they change 'if . . . not,' and 1 Co 15^{2} where they change 'unless,' into 'except,' that they are open to criticism; but no doubt both came under the rule of 'uniformity in rendering.' J. HASTINGS.

EXCHANGER.—See MONEY.

EXCOMMUNICATION is the name applied to the temporary or permanent exclusion, for errors of doctrine or morals, of a member of a Church from the privileges of its communion. The word is not used either in AV or RV, but the practice which it describes meets us in NT, both in the case of the Jewish synagogue and in that of the Christian Church.

The practice in the Jewish synagogue is referred to in Lk 6^{22} (Blessed are ye when men 'shall separate you from their company,' *ἀφορίζω*), Jn 9^{22} (the case of the blind man cast out of the synagogue, *ἀποσυνάγωγος*), Jn 12^{42} (the rulers who feared to confess Christ), Jn 16^{2} (Christ's prophecy concerning the disciples). It rests on the older practice, described in Ezr 10^{8} (the case of those Isr. who at the Restoration refused to give up their idolatrous wives), which in turn is a modification of the still older *ḥērem* (חֵרֶם) or 'ban,' referred to in Lv 27^{29} and elsewhere. The word *ḥērem* means literally devoted, and is used in OT in the twofold sense of devoted to destruction (hence accursed) and devoted to God's service (hence consecrated). See CURSE.

The practice of excommunication as we find it among the Jews in the time of Christ is the outgrowth of the *ḥērem* in the first of these senses. In the early history of Israel the punishment of idolatry or other gross sins was physical death. Thus we find the prophets referring to the future triumph of Israel over their enemies as the wholesale devotion of them to destruction by J" (so Is 34$^{2.5}$, Mic 4^{13}, Jer 50^{21}), and Zech. looks forward to the happy time in the future when there shall be no more 'ban' (14^{11}). Temporary exclusion from the services of the sanctuary meets us only, in the case of ceremonial offences, as part of the general requirement of the ceremonial law. At the time of the Restoration we find a modification of the older practice in the interest of greater humanity. Those Isr. who had married foreign wives, and who refused at the command of Ezra to give them up, instead of being put to death had their substance confiscated, and were separated from the congregation of Israel (Ezr 10^{8}). In the time of Christ, exclusion from the synagogue was the regular punishment for serious moral and religious offences, and is distinguished by the Rabbis as *ḥērem* proper, the formal 'ban,' which could be inflicted by not fewer than ten persons, and which deprived him on whom it fell of all religious privileges, from the milder *niddûi* (נִדּוּי), which could be inflicted by a single person, and which merely cut off him who suffered it from conversation and contact for a period of thirty days. For a supposed third grade, the so-called *shammāthā* (שַׁמְתָּא), there seems to be no good authority.

The origin of Christian excommunication is often found in Christ's words to Peter (Mt 16^{19}), 'I will give unto thee the keys of the kingdom of heaven; and whatsoever thou shalt bind on earth shall be bound in heaven; and whatsoever thou shalt loose on earth shall be loosed in heaven.' (Cf. Mt 18^{18}, Jn 20^{23}.) But, whatever the particular view taken of this much disputed passage, the reference seems to be rather to the spiritual power which the Church is to exercise through her preaching and witness-bearing than to any formal ecclesiastical procedure. The passage Mt 18$^{15-17}$ comes nearer to the mark, and with its threefold admonition, first privately, then in the presence of two or three witnesses (cf. Tit 3^{10}), and finally before the Church, reminds us somewhat of the graded procedure of the Jewish synagogue. Hence many critics believe that it represents less a direct utterance of Jesus Himself than the practice in the Jewish-Christian circles for which the Gospel of Matthew was written.

In the letters of St. Paul, besides general directions to 'admonish the disorderly' (1 Th 5^{14}; cf. 1 Ti 5^{20}), and to hold aloof from brothers who are fornicators, or covetous, or idolaters, or revilers, or drunkards, or extortioners (1 Co 5^{11}), or who refuse to obey the word of St. Paul by his letters (2 Th 3^{14}; cf. Ro 16^{17}), we have in the Church of Corinth at least one case, and possibly two cases, of ecclesiastical discipline. The first is that of the incestuous person, referred to in 1 Co 5, whom St. Paul delivers unto Satan 'for the destruction of the flesh, that the spirit may be saved in the day of the Lord Jesus' (1 Co 5^{5}). The reference in v.^{4} to the Corinthians as being gathered together, shows that whatever the exact nature of the punishment described as committing unto Satan, it had ecclesiastical significance. In v.^{13} the Corinthians are expressly charged to put away the wicked man from among themselves. If 2 Co 2$^{6-11}$ refer, as is most commonly supposed, to this same matter, it would follow that the exclusion from church fellowship was not permanent. 'Sufficient to such a one is this punishment, which was inflicted by the many; so that contrariwise ye should rather forgive him and comfort him, lest by any means such a one should be swallowed up by his overmuch sorrow' (vv.$^{6.7}$). If, however, as seems not unlikely, this passage refers to an entirely distinct case from that mentioned in 1 Co, we have a case of discipline administered by the Corinthians themselves without special instigation by St. Paul. Interesting and perplexing is the mention of Satan in 1 Co 5^{5} (cf. 2 Co 2^{11} 'that no advantage may be gained over us by Satan'; 1 Ti 1^{20} 'Hymenæus and Alexander, whom I delivered unto Satan that they might be taught not to blaspheme'). That St. Paul does not mean by the expression 'delivery unto Satan' a final cutting off from salvation, such as seems to be implied in the anathema of 1 Co 16^{22}, Gal 1$^{8.9}$, Ro 9^{3}, is clear from the reference in v.^{5} to the salvation of the spirit. On the other hand, that some suffering besides the formal exclusion from church fellowship is intended, seems equally clear from the reference to the destruction of the flesh. Hence the conjecture of some physical punishment miraculously inflicted upon the offender, possibly, as in the case of Ananias and Sapphira, death itself. But the matter is too obscure to warrant a definite conclusion.

The Corinthian letters picture a loose organization, without formal officers, in which discipline is administered, now by the Corinthians, now by St. Paul himself. There is no definite rule of procedure. The general principle is laid down in 1 Co 5$^{9-12}$, and special application is made acc. to the circumstances of each case. In the Pastorals we have already a definite mode of procedure, with its public reproof, and its accusation before witnesses (1 Ti 5$^{19.20}$). Not moral offences only, but a schismatic spirit may be the occasion for exclusion from church fellowship (Tit 3^{10} 'A man that is heretical [factious] after a first and second admonition, refuse.' Cf. 1 Ti 6^{3}, and esp. 2 Jn v.^{10}, where false doctrine is made the ground for absolute breach of intercourse). That excommunication might be inflicted by a faction, as well as by the Church at large, is clear from the case of Diotrephes (3 Jn $^{9.10}$). These later instances show that excommunication was not merely disciplinary, having as its end the penitence and subsequent restoration of the offender, but also protective, being designed to guard the infant Church from corruption. In no case, however, is it regarded as consigning the person cut off to eternal punishment, as later theories have sometimes held. That was the work of God alone, with which man had nothing to do. In general, this brief survey of the NT passages shows that we have to do only with the first beginnings, from which the later ecclesiastical procedure, with its elaborate process, was developed. In this matter, as in so many others of interest, the development was a gradual one, a part of that slow process by which the flexibility of early Christian institutions was gradually transformed into the fixed rules of a powerful ecclesiastical organization.

LITERATURE.—The art. in Smith, *DB*^{2}, by F. Meyrick, unchanged; and Herzog, *PRE*^{2} 'Bann bei den Hebräern,' by Rüetschi, where the older literature is given. For the practice among the Jews, see Nowack, *Heb. Archäol.*; and Benzinger, *Heb. Archäol.* On the case of the Corinthian offender, cf. Weiszäcker, *Das Apostolische Zeitalter*^{2}. A full discussion of NT passages in their connexion is still a desideratum.

W. ADAMS BROWN.

EXECUTIONER.—Mk 6^{27} AV, of the officer sent by Herod to behead John the Baptist, RV 'a soldier of his guard.' The Gr. word σπεκουλάτωρ is a transliteration of Lat. *speculator*, and the *speculatores* were originally scouts or spies (*speculor*, to watch), and then the police or bodyguard of the Roman emperors and military governors. (The word is fully discussed in Benson, *Cyprian*, 505 f.)

Beheading was a Roman, not a Jewish punishment. See CRIMES AND PUNISHMENTS. J. HASTINGS.

EXERCISE.—As a *verb* : **1.** The primary meaning is to occupy oneself with, engage in, Ps 131^{1} 'Neither do I exercise myself in great matters' (וְלֹא־הִלַּכְתִּי, lit. 'neither do I walk,' as RVm) ; Sir 50^{28} 'Blessed is he that shall be exercised in these things' (ἀναστραφήσεται) ; 2 Es 15^{8} 'those things in which they wickedly exercised themselves' (quæ inique exercent, RV 'which they wickedly practise'). Cf. Pref. to AV 1611, 'in Latine we haue been exercised almost from our verie cradle.' **2.** To put into practice, bring into use, as Knox (*Works*, ed. Laing, iv. 135), 'Even such, deare brethren, is the blessed Evangelie of our Lord Jesus; for the more that it be entreted, the more comfortable and puissant is it to such as do heare, reade, or exercise the same' ; or as Dunbar (*The Thrissill and the Rois*, 16) uses *exerce*, the obsolete form of the verb, direct from *exercere*—

> 'Exerce justice with mercy and conscience.'

So Rev 13^{12} 'he exerciseth all the power of the first beast' (ποιεῖ) ; Jer 9^{24} 'I am the LORD, which exercise lovingkindness' (עֹשֶׂה 'doing') ; To 12^{9} 'Those that exercise alms and righteousness shall be filled with life' (ποιοῦντες) ; Ezk 22^{29} 'The people of the land have used oppression, and exercised robbery' (וְגָזְלוּ גָּזֵל) ; Wis 16^{4} 'It was requisite that upon them exercising tyranny should come penury' (ἐκείνοις τυραννοῦσι, RV 'in their tyrannous dealing') ; and the passages in the Synoptics, Mt 20^{25}, Mk 10^{42}, Lk 22^{25}, where κατακυριεύω (Lk κυριεύω) and κατεξουσιάζω (Lk ἐξουσιάζω) are translated in AV 'exercise dominion' and 'exercise authority' in Mt, 'e. lordship' and 'e. authority' in Mk and Lk ; RV gives 'lord it' for κατακ., and 'e. authority' for κατεξ. in Mt and Mk, 'have lordship' and 'have authority' in Lk. **3.** To practise for training or discipline, Ac 24^{16} 'And herein do I exercise myself, to have always a conscience void of offence toward God and toward man' (ἀσκῶ) ; 1 Ti 4^{7} 'exercise thyself unto godliness' (γυμνάζω ; so He 5^{14} 12^{11}, 2 P 2^{14}) ; 1 Mac 6^{30} 'elephants exercised in battle' (εἰδότες πόλεμον, RV 'trained for war') ; 2 Mac 15^{12} 'exercised from a child in all points of virtue' (ἐκμεμελετηκότα). **4.** All those meanings belong to the Lat. *exercere*, and the influence of the Vulg. is conspicuous throughout. There are even two examples of 'exercise' in the sense of 'afflict,' 'torment,' which also belongs to *exercere* ; Ec 1^{13} 'this sore travail hath God given to the sons of man to be exercised therewith,' and 3^{10}. The Heb. is עָנָה, 'to be bowed down.' Cf. Fuller, *Holy Warre* (ed. 1640, p. 155), 'they had to do with Meladine King of Egypt, who lay besides them, . . . exercising the Christians with continual skirmishes.' Milton has the same sense in *Par. Lost*, ii. 89—

> 'Where pain of unextinguishable fire
> Must exercise us without hope of end' ;

and *Par. Reg.* i. 156—

> 'But first I mean
> To exercise him in the wilderness.'

As a *subst.* : **1.** Wis 8^{18} 'in the exercise of conference with her, prudence' (ἐν συγγυμνασίᾳ ὁμιλίας, RV 'assiduous communing,' RVm 'practice of communion') ; 1 Ti 4^{8} 'bodily exercise profiteth little' (σωματικὴ γυμνασία). **2.** In 1 Mac 1^{14} and 2 Mac 4^{9} the complaint is made that a Greek 'place of exercise' had been erected in Jerusalem. The Gr. is γυμνάσιον. See GAMES. In 2 Mac 4^{14} ἐν παλαίστρᾳ is similarly translated 'in the place of exercise,' RV 'in the palæstra.' See PALÆSTRA.

EXODUS AND JOURNEY TO CANAAN.—

i. Route of the Exodus.
ii. From Egypt to Sinai.
iii. From Sinai to Kadesh.
iv. From Kadesh to the Jordan.

i. ROUTE OF THE EXODUS.—The question of the route of the Exodus has had a good deal of light thrown upon it in recent times, from the standpoint both of archæology and of literature. On the one hand, the work of excavation of lost cities and monuments has gone far to negative certain hypotheses as to the Exodus, if not to render them impossible ; and, on the other hand, the decipherment of inscriptions and papyri belonging to the time of the Exodus has furnished us with geographical and historical annotations of the highest value. It must not be supposed that the result is an unmixed confirmation of the biblical account. A recently-deciphered Egyptian inscription, for example, shows that the Bĕnê-Israel were already in Palestine at the time of the Exodus, so that the migration must have been partial and not national. But with this point we are not concerned in the present article, whose business is to indicate what was the route of the Exodus on the hypothesis that it actually took place.

Even though we are not yet in a position to completely vindicate the historical character of the Exodus, we may do much to extract a correct geography from the accounts, and so to prepare the way for accurate history. The researches, for instance, of Naville have practically settled the first stages in the line of march ; and in the same way a closer knowledge of the Sinaitic peninsula encourages the belief that there is more to be urged in favour of the traditional Sinai than can be brought forward against it. [See SINAI.] We acquire in this way what are almost fixed points in the route, without being troubled by *à priori* considerations as to whether the whole of the story is historical or whether any of it is miraculous. Indeed this last consideration might altogether be omitted ; for as regards such a question as the actual passage of the sea, the configuration of the land at the head of the Gulf of Suez and across the Isthmus is such that the shallow waters of the sea and detached lakes furnish exactly the situation for such a transit as is poetically called a passage 'in the heart of the Red Sea.' Moreover, the action of wind upon shallow water has been constantly the cause of phenomenal effects which are not far removed from the miraculous statements in Exodus. For example, the Russians in 1738 entered the Crimea, which was strongly fortified against them by the Turks, at the Isthmus of Perekop, by a passage made for them by the wind through the shallow waters of the Putrid Sea at the N.W. corner of the Sea of Azov. And Major-General Tulloch has recorded an instance even more to the point, when, as he himself observed, *under a strong east wind* the waters of Lake Menzaleh at the entrance to the Suez Canal receded for a distance of 7 miles (see *Journal of Victoria Institute*, vol. xxviii. p. 267). Other instances of the same effect, which would be counted miraculous if they had been biblical, may be found in a paper by Naville (*Jour. Vict. Instit.* xxvi. p. 12). We may therefore lay on one side any question of direct miraculous agency : where the phenomena are so nearly natural to the country, we may be content to say that they are not necessarily unhistorical, and that the question of miracle is merely one of interpretation. Nor need we be delayed in our inquiry by considerations as to whether the story has suffered from over-colouring ; both the numbers of the persons involved and the length of their supposed stay in the desert may be deferred,

if thought fit, for future examination. The account is not to be judged from its weakest points.

The best way to form an idea as to what such a migration would be like, is to compare it with an annual phenomenon of a similar character, viz. the Mecca pilgrimage from Cairo. The analogy is a good one, inasmuch as the account in the Bk of Exodus expressly suggests that the Israelites wished to go into the wilderness for the purpose of a *haj* (the Heb. word in Exodus 10^9 *hag* is, in fact, the same that is applied to the modern festival, and to the route taken by the pilgrims). What point was aimed at in the proposed three days' journey into the wilderness must remain uncertain; it has been suggested that it was Sarbut el-Khadeem, on the northern road to Mt. Sinai, where the remains of famous Egyptian temples are still to be seen. But, wherever it was, the Israelites could do what the Mecca pilgrims are in the habit of doing; nor is there any *à priori* reason why we should regard the account of the migration as antecedently improbable.

We may go further, and say that whatever may be objected against the general facts of the Exodus, the list of stations (or *mansiones*) in the wilderness which is given in Nu has every appearance of being part of a conventional itinerary or pilgrim book, and is therefore susceptible of identification and verification, altogether apart from the history in which it is embedded. All that we have to do with such data is to make such literary and topographical investigations as will determine whether the routes indicated are possible, and the stages of the journey feasible.

One of the first things that will strike the careful reader of the account of the first stages of the Exodus is that there is a certain verisimilitude about the nomenclature. It is a mixture of Egyptian and Hebrew. Pithom and Pihahiroth are certainly Egyptian; Migdol and Baal-zephon as certainly Hebrew; Succoth will be shown to be a mere Heb. perversion of an Egyp. name; and there is even a suspicion that alternative names in the two languages are found in the narrative, as when the desert into which the Israelites go out is called in one place the desert of Etham, and in another the desert of Shur. This is as it should be, if we bear in mind that we are on the frontier of Egypt, that the country next the frontier on both sides is in the hands of a Semitic people, and that the fortifications and great cities are in the care of the Egyptian Government.

The locality from which the Israelites emigrated is defined by the two store-cities, **Rameses** and **Pithom**, which they built for Pharaoh. From Rameses they started, and their first encampment is **Succoth**, which Naville has shown to be the equivalent of Pithom. The identification of the two cities is of the first importance. According to Brugsch (*L'Exode et les monuments Égyptiens*, Leipzig, 1875), we are to identify Rameses with Zoan (Tanis), and to place Pithom and the district of Succoth in the N.E. corner of the Delta, between Tanis and Pelusium. He then adopts a surprising suggestion (previously ventured by Schleiden), that the Israelites passed along the shore of the Mediterranean on a neck of land between that sea and the ancient Serbonian lake; that the Egyptians followed them along the same course, but were overtaken by a rush of water from the Mediterranean and destroyed. On this hypothesis he identifies **Etham** with the fortification on the frontier of Egypt, **Migdol** with a Magdolon mentioned in the Antonine Itinerary as being 12 miles from Pelusium, and **Baal-zephon** with Mt. Casius; the supposed Red Sea (*yam ṣuph*) turns out to be the Serbonian lake, as is suggested by the name (*yam ṣuph*=sea of weeds). Unfortunately, this theory, which is stated with great confidence and simplicity by Brugsch, appears to be almost fatally vitiated by the fact that Pithom has been found somewhere else than on the Mediterranean seaboard, where Brugsch had located it. It is to Naville that we owe this important discovery. His excavation of the mounds known as Tell el-Mashkuta, in the Wady Tumilat, on the line of railway from Zagazig to Suez, and in close proximity to the modern Sweet-water Canal and to the line of the ancient Sweet-water Canal, has proved conclusively that this place is Pithom ['abode of Tum'], and that its secular name, or at all events the name of the adjacent district, is Thuket, which may be equated with the Heb. Succoth. It is curious that the French engineers had suspected this mound to be the site of Rameses, and had named the adjacent railway station accordingly. It seems probable that Rameses will be found in the excavation of the mound Tell el-Kebir; Tanis is clearly excluded by Naville's discoveries. We are thus led to conclude in favour of an exodus along the line of the ancient canal, and the fugitives following this course would soon reach the frontier of Egypt and be stopped by the fortifications which ran along the Isthmus from north to south. This is the station Etham, which appears to coincide with the Egyptian *χetem* or *fortification*, and to be the same thing as is meant by the Heb. *shur* or *wall*. [The only difficulty in this identification lies in the fact that we should have expected a stronger guttural in the beginning of the Heb. word]. The route is evidently one of the main roads out of Egypt; and we may compare it with a papyrus translated by Goodwin, which describes the pursuit of runaway slaves who follow this very road, and whose journey is described in very similar terms.

Several difficulties now present themselves. One of them relates to the question as to whether the head of the Gulf of Suez was not at the time of the Exodus much farther north than at present, and whether the sea was not actually connected with the Bitter Lakes. In that case the transit may very well have been made at the head of the Bitter Lakes. There is much to be said in favour of this hypothesis.

Unfortunately, none of the places mentioned in connexion with this part of the Exodus have been identified. Pihahiroth, Migdol, and Baal-zephon have all to be located. It has been suggested that Baal-zephon [Typhon] is the mountain Ataka to the S. of Suez, and that it is dedicated to the god of the north wind because Phœnician sailors used to pray for fair wind on their voyages down the Red Sea. Our own impression is that the case has not yet been made out for moving the head of the Red Sea so far north as the Bitter Lakes, and that it is more likely that the crossing took place not far north of the present Suez. [Its ancient Greek name *Clysma* appears to carry a tradition of the disaster]. The test for a true solution would appear to lie in a search for Baal-zephon, especially by examination of Mt. Casius on the shore of the Mediterranean, and of Jebel Ataka at the head of the Red Sea.

ii. From Egypt to Sinai.—After crossing the frontier of Egypt the Israelites go three days in the wilderness and find no water. It has been suggested that they went by the *haj* route right across the plateau of the Tih to Akabah, and that this Akabah (or Elath, as it is called in OT) is the Elim of the itinerary, where they found wells of water and palm trees, and from which they proceeded to a Mt. Sinai in Midian. We are not able to accept the theory of a Midianite Sinai. It seems more probable that the route described is that taken by travellers to the traditional Sinai, which is the same as was taken by St. Silvia of Aquitaine in the 4th century. The route goes along the wilderness between the plateau of the Tih and the E. shore of the Red Sea. **Marah** (see sep. art.) is not identified with any reasonable probability; but **Elim**, which follows it, may very well be the Wady Ghurundel, where there are even at the present time wells and palms (see Elim). From this point the road to Sinai bifurcates; the northern road goes by the Egyptian mines and temples of Sarbut el-Khadeem, the southern winds by the Wady Tayibeh until it strikes the seashore: this is, then, the **encampment by the sea** (see sep. art.) of Nu 33^{10}; following the shore, the ancient Egyptian port and road are reached, and the route turns inland, passing the entrance to the Wady Maghara, where are the oldest Egyptian mines. This is probably the station **Dophkah** (see sep. art.) of Numbers, Dophkah being a misreading of Mafkah, the Egyp. name for the blue stone which they obtained from the mines in this region. The next station, **Alush**, is not known; it was probably not far beyond the Wady Mukattab or 'written valley' through which the road now passes. The next stage is **Rephidim**, which is commonly identified with *Feiran*, the oasis of the peninsula, the ancient Faran and Paran, and from this point the road winds through the long Wady es-Sheykh, until by a long detour (or, if preferred, by a short cut through a pass called Nukb el-Hawa, or 'Pass of the Wind') the plain is reached at the foot of **Mt. Sinai**, where the Israelites are supposed to have assembled for the giving of the Law. The most striking identification on this route is the encampment on the seashore five days after having left it. But it is clear that, striking as this is, the same thing is true of the route of the Mecca pilgrims: so it can hardly be called a conclusive identification. It is a very weighty consideration that the name Sinai implies a place of sanctity [Sin = the Babylonian moon-god] from very early times; but no Babylonian signs or inscriptions have been found which would settle conclusively that the traditional Sinai is the same as the biblical one. The route described is an ancient trade route of Nabatæan traders before the Christian era and in the early years of the Christian era. It is *not* a road worked out by biblical explorers, as has sometimes been suggested. See further art. Sinai.

Literature.—The student should consult, *inter alia*, Robinson, *Biblical Researches* (1841, 3rd ed. 1867); Ebers, *Durch Gosen zum Sinai* (2nd ed. Leipzig, 1881); Lepsius, *Tour from Thebes to the Peninsula of Sinai in* 1845 (Eng. by Cottrell, London, 1846); Naville, *Store City of Pithom* (Publications of Egypt. Exploration Fund); Brugsch, *L'Exode et les Monuments Égyptiens* (Leipzig, 1875, Eng. tr. 1879); Gamurrini, *Peregrinatio Sylviæ* (Rome, 1887).

iii. From Sinai to Kadesh.—About this portion of the route little need be said. The account in Nu 10^{11} states that the first march from Sinai was into the wilderness of Paran. This is described in v.^{33} as a three days' journey; and the places mentioned as on the route are Taberah (Nu 11^3), Kibroth-hattaavah, and Hazeroth ($11^{34.35}$), whence they removed into the wilderness of Paran (12^{16}), and from this place (13^3) the spies were sent out. Taberah is not mentioned in the itinerary of Nu 33. In Dt 1^2 the whole route from Horeb to Kadesh-barnea is described as eleven days' journey by the way of Mt. Seir. This indicates a route from Sinai by way of 'Aḳabah to Kadesh, and accordingly travellers have sought to identify Kibroth-hattaavah and Hazeroth with points in the route between Sinai and 'Aḳabah. Further particulars are given in the articles on those names; and for the names which follow Hazeroth in Nu 33, see iv. and the article on Kadesh.

iv. From Kadesh to the Jordan.—The accounts of this part of the route are found in Nu 20. 21, Dt 1. 2, and in the itinerary of Nu 33. Nu 20. 21 are composite in character, as will be seen from the following analysis (taken from Driver's *LOT*^{6} p. 66):—

P	20^{1a}		2		3b-4		6-13		22-29		4a		10. 11
JE		1b		3a		5		14-21		21^{1-3}		4b-9	

P		22^1
JE	21^{12-35}	

The first verse of Nu 20 deserves special notice. Its first clause (as far as the word 'month') is due to P. According to that authority, the spies were sent out from the wilderness of Paran, and in *that* wilderness (Nu 14^{29}) the children of Israel remained until the rebellious generation had been consumed. They then moved in the first month (apparently of the fortieth year, and for the first time) into the wilderness of Zin. The next clause, 'and the people abode in Kadesh,' etc., is due to another source, which represents the stay in Kadesh as a prolonged one, and associates with that stay many events, but without assigning dates. Two of these events are recorded in Nu 20^{2-21}: the first, the judgment passed on Moses and Aaron at Meribah (vv.^{2-13}), presents difficulties which cannot here be fully discussed, but the following considerations make it probable that this incident occurred at an early period of the sojourn at Kadesh: (*a*) the account is in many points similar to that in Ex 17^{1-7}; (*b*) lack of water would have been felt soon after the arrival at Kadesh, rather than at the close of their sojourn there; and the complaint, Nu $20^{4.5}$, seems more appropriate in the mouths of those who remembered the fleshpots of Egypt, than of those who, having left Egypt in youth, had since passed forty years in the desert; (*c*) according to Dt 1^{37} the exclusion of Moses from the promised land was decreed about the same time as the general sentence was pronounced against the generation which came up out of Egypt. Hence two alternatives: either the account Nu 20^{2-13} which gives the reason for the exclusion must describe the same event as that referred to Dt 1^{37} (*i.e.* an event which happened soon after the return of the spies, and therefore at an early period of the journeyings), or there are two varying traditions as to when and why Moses was not permitted to cross the Jordan.

The second passage (Nu 20^{14-21}) records Edom's refusal to allow a passage through his territory to the children of Israel, in consequence of which they journeyed 'by the way to the Red Sea to compass the land of Edom' (Nu 21^4). Comparing this with Dt 2^1, very similar language is there used to describe a compassing of Edom, which is assigned to an earlier stage of the journeyings. It is reasonable to suppose that this circuitous route was adopted because a more direct course towards the E. side of the Dead Sea was not open; Edom's conduct, as described in Nu 20, though not recorded in Dt, was the cause of, and therefore prior to, the compassing mentioned in Dt. Hence both the events in Nu 20^{2-21}, though in their present connexion they appear as incidents of the fortieth year, may belong to an earlier period of the journeyings. Two distinct geographical pictures of the period are presented,—the one, that of JE, figures Kadesh as the scene of the middle portion of the journey, and is to be traced in Dt 1. 2 (with which the brief summary in Jg 11^{16-18} should be compared); the other, that of P, locates these events partly in Paran and partly in Zin. The combination of the two, with the introduction of exact dates, has produced difficulties which are to be explained, not by the assumption of two places bearing the name of Kadesh, nor by the assumption of a second visit to Kadesh (which is nowhere indicated, and seems excluded by Dt 2^{14}), but by the resolution of the narrative into its original components.

In the list of stations (Nu 33) **Kadesh** does not occur until v.^{36}, where it is identified with **Zin**, immediately precedes Mt. Hor, and is only eight stations removed from the final settlement in the plains of Jordan. This itinerary makes the identification of Zin with Kadesh, which is implied in Nu 20, and refers to Kadesh for the first and only time towards the close of the journeyings. It might be expected that Paran would be found in an earlier part of the chapter, but it is not; the stations from Egypt, as far as Hazeroth, correspond closely with those mentioned in the narrative portions of Ex and Nu, but after Hazeroth [instead of either Paran or Kadesh] twelve stations are given (Rithmah . . . Hashmonah, vv.$^{18-29}$), the names of which occur only in these verses, and no event happening in connexion with these places is anywhere recorded. It has been suggested that Rithmah, or some other of these names, is a designation of Kadesh, but nothing in the nature of an argument has been advanced in favour of such a hypothesis.

The wilderness of Paran (Nu 13^{3}) is a vague indication of locality for the events described in Nu 13. 14, and it may be that more than one of these twelve stations were within that area, but there is no indication that such is the case. The list of Nu 33 has been incorporated with the narrative without specifying the place where the important events recorded in Nu 13. 14 and Dt 1 happened. In this respect the list is independent of the narrative, and any attempt to establish a connexion between the two must be conjectural.

The eight stations following Hashmonah (Moseroth–Mt. Hor) must next be considered. With the first four may be compared the fragment of an itinerary preserved in Dt $10^{6.7}$. They are as follows :—

Nu 33^{30-33}.	Dt $10^{6.7}$.
Moseroth.	Beeroth Bene-jaakan
Bene-jaakan.	Moserah.
Hor-haggidgad.	Gudgodah.
Jotbathah.	Jotbathah.

There can be little doubt that the same four places are referred to in both passages, and it seems also reasonable to suppose that the same part of the journeyings is described in both. The inversion of order, Moseroth preceding Bene-jaakan in the one, and following in the other, may be attributed to an error of transcription, or explained by supposing that some of the wells of the Bene-jaakan were visited both before and after the encampment at Moseroth. **Moserah** is noted (Dt 10) as the place where Aaron died and was buried, and must therefore be close to Mt. Hor, probably the place of encampment at its base. Further, as Abronah and Ezion-geber follow these four places in Nu, and the position of Ezion-geber at the head of the Gulf of 'Aḳabah is known, it follows that these stations describe the journey from Mt. Hor down the Arabah to the Red Sea. Pursuing the journey from this point, as described Dt 2^{8}, the children of Israel passed 'from the way of the Arabah from Elath and from Ezion-geber.' This is generally explained by supposing that they completed the circuit of Edom by compassing it on its E. side. From the S. end of the Arabah a valley called Wady Ithem leads upwards in a N.E. direction to the high table-land which lies to the E. of Edom and Moab, across which runs the *Haj* route from Damascus to Mecca. Along or near this route the children of Israel, after leaving the Arabah by Wady Ithem, passed in a N. direction until they reached **Iye-abarim** in the wilderness which is before Moab towards the sunrising (Nu 21), the next definite geographical indication afforded in the narrative.

But against accepting this view of the journey, it may be argued as follows: The two stations in Nu 33^{36-41} which follow Ezion-geber are the wilderness of Zin (Kadesh) and Mt. Hor. These verses imply that, after reaching the Gulf of 'Aḳabah, instead of bearing eastward as above described the children of Israel retraced their steps along the Arabah to visit Mt. Hor, on the occasion of Aaron's death and burial. Moseroth is separated by six stations from Mt. Hor, and, if the identity of Dt $10^{6.7}$ with Nu 33^{30-34} be maintained, there are two statements concerning the time and place of Aaron's death which cannot be reconciled. In order to harmonize the accounts, many commentators consider that the stations in Dt $10^{6.7}$ have nothing to do with the same names in Nu 33^{30-34}, but must be supplied as part of the journey from Mt. Hor to Zalmonah (Nu 33^{41}). The omission of these stations in Nu 33 is explained by supposing that names which have been previously mentioned are not repeated in this list. Besides the double visit to Kadesh, two visits to Mt. Hor (for Moserah or Moseroth must be considered as equivalent to Mt. Hor) and two journeys down the Arabah to Ezion-geber must be assumed, before the narrative of Dt $2^{8\text{ff.}}$ can be combined with Nu 33 from Zalmonah onwards, as representing the final departure from the Arabah on the way to the E. of Moab. This reiterated duplication of events, inferred from combining the accounts, but nowhere indicated in the narrative, raises more than a suspicion that this harmonistic interpretation, though possible, does not represent the actual progress of the journey. The main difficulty arises from the position of Zin and Mt. Hor following Ezion-geber in Nu 33^{36-41}. Ewald proposes (*Hist. of Isr.* ii. 201, Eng. tr.) to remove vv.$^{36b-41a}$ from where they now stand, and insert them after Hashmonah in ver.^{30}. The order of the stations would then be Hashmonah, Zin, Mt. Hor, Moseroth, Bene-jaakan, Hor-haggidgad, Jotbathah, Ebronah, Ezion-geber, Zalmonah, etc. The necessity for assuming the unproved duplication of events is removed, and the direction of the journey would be as traced above. The obvious criticism of Ewald's hypothesis is, that if the arrangement he proposes were the original one, it is difficult to understand why a change which introduces such difficulties should have been made. May a slight variation of his hypothesis be suggested? The verses which he would transpose differ in character from the rest of the chapter; instead of giving only names, they relate events and furnish details. May they be regarded as a later addition? If so, they may be either omitted or transferred, and the same result attained. One other alternative remains: the insertion of Zin and Mt. Hor after Ezion-geber indicates a movement up the Arabah northwards. This northern direction may have been continued to the Dead Sea, where a turn eastwards would bring the children of Israel to the E. side of Moab. The compassing of Edom would then be on its W. and N. border. In favour of this it may be suggested that an Israelite might understand the border of Edom to mean the border towards his own land. So long as the sites of Zalmonah and the stations following remain uncertain, this interpretation of the existing text of Nu $33^{41\text{ff.}}$ cannot be rejected as impossible, though it would represent a tradition different from that followed in Nu 21^{4} and (probably) Dt 2^{8}.

The concluding section from the **E. of Moab** onwards is comparatively free from ambiguity, though definite identification of places is wanting here as in the preceding stages. The children of Israel cross the brooks Zered and **Arnon** (Nu 21^{12,13}). The latter is by general consent identified with the Wady Mojib, a stream which is fed by many tributaries, and falls into the Dead Sea about the middle of its E. side. The deep valley, about three miles broad, through which it passes, is a marked feature of the district, and forms a natural boundary line. It was the southern limit of the territory assigned to Israel on the E. of Jordan. The position of the brook **Zered** is uncertain. The Wady el-Ahsa, which runs into the Dead Sea at its S. extremity, is too far south to be identified with it, for Iye-abarim to the E. of Moab is reached before crossing it (Nu 21^{11}). The Wady Feranjy, the upper portion of the stream passing by Kerak and reaching the Dead Sea at the promontory called El-Lisan, or the main affluent of Wady Mojib (that coming from the S.E.), may with greater probability be considered as the ancient Zered. The nomenclature of the tributaries of Wady Mojib is somewhat unsettled, but Bliss, when exploring the country of Moab in March 1895 (see his memoir in *PEFSt*, 1895) took special pains to ascertain the names assigned to them. He follows Tristram in giving the name of Wady Sa'ideh to the E. affluent of the Wady Mojib and not to the S.E. branch, which is generally so called in maps and commentaries. The description in Buhl (*Geog. d. Alten Palästina*, p. 51) is again different. Until arriving at the Arnon, the Israelites probably crossed the upper courses of the rivers and kept away from Moab towards the E. They would thus obey the injunction not to meddle with Moab, and find the rivers shallower, and more easy of passage. The deep and rugged sides of these streams for some distance from their outlets into the Dead Sea cause considerable difficulty to the modern traveller, and would have been impracticable for the hosts of Israel. But after crossing the Arnon it was necessary to turn W. and afterwards in a N.W. direction in order to reach **Dibon-Gad** and the mountains of **Abarim**—the high ridge to the E. of the N. extremity of the Dead Sea from which they descended into the plains of Jordan, opposite Jericho. The names given in Nu 21$^{18-20}$ are different from those in the itinerary of Nu 33, but the last-named place, 'the top of Pisgah that looketh toward Jeshimon' ('the desert' RV), indicates a spot on the Abarim range whence W. Palestine and the Jordan valley were visible. The last stage, Nu 22^{1}, is given with additional detail in Nu 33^{48,49}.

LITERATURE.—Commentaries on the Books of Nu and Dt, especially those of Dillmann in the *Kurzgef. Exeg. Handb. z. Alten Testament* and Driver on Dt in the *Internat. Crit. Comm.*, may be consulted for further information. Trumbull's *Kadesh-Barnea* discusses the whole route from Egypt to Canaan, and contains a full list of ancient and modern works dealing with the subject. See also Palmer, *Desert of the Exodus*, and Köhler, *Biblische Geschichte A.T.s.*

J. RENDEL HARRIS AND A. T. CHAPMAN.

EXODUS (וְאֵלֶּה שְׁמוֹת, or simply שְׁמוֹת ; Ἔξοδος : see HEXATEUCH) is the 2nd Book in the Heb. Canon. It is also the 2nd division of the great composite work which contains in one complex whole all that has been preserved of old Heb. writings about the origins of the Isr. people. So much is here assumed, and, further, that it is generally possible, if not to distribute the material among four distinct documents, at least to assign it to one or other of four differing schools of writing, Jahwistic, Elohistic, Deuteronomic, and Priestly (referred to as J, E, D, P),* whose relative age is shown by the order of the names, the periods of the first two overlapping. For the proof of this, and for general matters of introduction, see HEXATEUCH.

Our aim here is to exhibit the results of such an analysis in detail, with a condensed account of the chief grounds on which it rests. For information about persons, places, things, events, institutions, laws, the student is referred to the separate articles.

The book covers the period from the death of Joseph to the erection of the Tabernacle, and is mainly historical, but contains important legislative sections. It falls readily into three parts—I. Israel in Egypt; II. From Egypt to Sinai; III. At Sinai. The method of treatment here adopted needs little explanation. In the Summary small reference letters show what documents contain the material next following: the sign ‖ preceding means that the parallel is to be found in another chapter or section. The numbers refer to the chapters.

Thus, by following J, E, and P through in turn, the main contents of the documents can be severally traced, and the amount of coincidence noted.

I. ISRAEL IN EGYPT: 1–13^{16}.

A. Summary.

1 ^{JEP}Increase, and $^{JE\|P}$oppression of Israel. 2 ^{E}Birth and adoption of Moses; ^{J}his violence, flight, and $^{J\|E}$marriage. 3–4 ^{JE}Theophany and $^{JE\|P}$Commission of Mos. and Aar. ^{JE}Mos. returns, and ^{J}convinces the people by signs. 5 ^{JE}Freedom claimed, bondage increased. 6–7^{7} $^{P\|JE}$Commission of Mos. and Aar. 7^{8}–12 Eleven ^{JEP} wonders —7$^{8-13}$ ^{P}Rod becomes serpent, magicians copy; 7$^{14-25}$ ^{JEP}Nile smitten, ^{P}magicians copy; 8$^{1-15}$ ^{JP}frogs, ^{P}magicians copy; 8$^{16-19}$ ^{P}lice, magicians fail; 8$^{20-32}$ ^{J}flies; 9$^{1-7}$ ^{J}murrain; 9$^{8-12}$ ^{P}blains, magicians suffer; 9$^{13-35}$ ^{JE}hail; 10$^{1-20}$ ^{JE}locusts; 10$^{21-29}$ ^{E}darkness; ^{J}banishment of Moses, who 11 ^{JE}prophesies death of firstborn and release of Isr. 12–13^{16} ^{JP}Rules for Passover and Feast of Unleav. Bread; ^{J}death of firstborn, and ^{JEP}exodus of Isr.; ^{JP}law of firstlings.

B. Analysis.

^{r} marks editorial revision; * shows supplements from documents of the same school; ′ editorial insertions and expansions; ″ harmonizing and other relatively later additions by R^{je}, R^{d}, and R^{p}; [ ] enclose *vv.* forming a displaced passage; ... show that something has dropped out; and if with [...] that the material is found elsewhere; a, b, etc., mark *vv.* subdivided.

---

* J^{s} (=J-supplements), E^{s} etc., denote later elements, while P^{g} is often used for the original groundwork of the Priestly Document before enlarged by the numerous additions marked P^{s}; P^{h} stands for the Holiness legislation of Lv 17–26 with kindred passages. R stands for one of the redactors, who (1) edited J and E into a single whole JE, in this case cited as R^{je}; or (2) combined JE with D, cited as R^{d}; or (3) supplemented P^{g} and combined P with JED, and so are called R^{p}. In Exodus, of course, D is not found, and only here and there traces of R^{d}.

P	40–42″ 43–50 51″	1f.

Note that no passage has been analyzed unless there is reasonable probability, usually indeed practical certainty, that it is composite; but obviously some of the *details* of divisions of verses must be rather possible than always definitely probable. The analysis has, however, been carried as far as possible, as being more helpful thus to the student. If any one will take the trouble to mark, (say) with blue, black, and red inks, the analysis on a copy of the RV or the Heb. text, and to underline the phrases, etc., referred to under iii. and iv., and then read through all the passages assigned to each document consecutively, he will gain the best possible notion of the reality of the analysis, and the distinct character of the documents.

Displaced passage.—The J portions of 3 and 4^{1-12} prob. stood originally before 4^{29}. Yahweh has already told Moses *in Midian* (4^{19}) to go back to Egypt, and the theophany accordingly seems to belong to Goshen, or (better) to the journey thither.

C. Parallels and Contrasts.

Each set is marked with the same letter under J, E, and P, respectively to facilitate comparison. † after refs. means that all the instances in the OT are given; * that all in the Hexateuch are mentioned; italics denote biblical quotations; and capitals are used sometimes for emphatic words.

J—(a) The people live in *Goshen* 8^{22} 9^{26} Gn 45^{10} etc. (only in J); (b) a separate district, so that they and their cattle could be differentiated from the Egyptians $8^{4.9.11}$ 8^{22} $9^{4.6}$ 9^{28}; only brought in gangs into Egypt for forced labour $5^{5ff.}$; away from the Nile, so that its pollution seems to cause no inconvenience $7^{21.24}$; (c) so numerous as to alarm the king 1^{9-12}, 600,000 12^{37} Nu 11^{21} cf. Nu 10^{36}; (d) cattle owners Gn $46^{32.34}$ $47^{3.8}$ having *flocks and herds* $10^{9.24}$ $12^{32.38}$ 34^{3} Nu 11^{22} Gn 12^{16} 13^{5} 24^{35} 32^{7} 33^{13} 45^{10} 46^{32} 47^{1} 50^{8}; (e) Mos. demands 3 *days' journey* 3^{18} 5^{3} 8^{27} cf. Gn 30^{36} Nu 10^{33ab}, Nu 33^{8} R^{p} †) that they might *sacrifice to Yahweh* or (*our*) *God* 3^{18} $5^{3.8.17}$ $8^{8.25.27ff.}$, or *serve* Him 7^{16} $8^{1.20}$ $9^{1.13}$ $10^{3.\,etc.}$ 12^{31}; (f) the *wonders* or plagues before Pharaoh are 7, and are natural calamities, as disease of fish in Nile $7^{14ff.}$, when *Yahweh smites the river* $7^{17a.25}$; natural causes being sometimes specified, as the wind in the case of the locusts $10^{13.19}$ cf. 14^{21b}; Moses speaks freely on each occasion to Pharaoh, and the wonders follow the mere announcement; the hail is on every herb of the field 9^{25b} cf. 9^{22} and 10^{15c}, and locusts eat the remaining crops and the fruit; (g) the flight is hurried, at instigation of the Egypt. $12^{31ff.39}$; (h) Moses' *father-in-law* is *the priest of Midian* 2^{18} 4^{19} (3^{1} 18^{1} R^{je}) cf. Gn 41^{45}, unnamed here (for Reuel 2^{18} is prob. R^{je}), called *Hobab* Nu 10^{29} Jg 4^{11} 1^{18}; and Moses has one son 2^{22} 4^{24}; (i) sprinkling of blood is the main thing in the Passover, eating not mentioned 12^{21-23} J^{s}; (j) the name of God is *Yahweh* (*=Jehovah*), or *the God of* . . .; (k) (l) (see below).

E—(a) The people live in *the land of Egypt*, with no hint of separate district being assigned them; (b) rather they seem to be herded in the royal city among the houses $1^{15ff.}$; no immunity from plagues mentioned (*e.g.* hail 9^{25a}) except for the darkness; can beg of *neighbours* jewels, etc. 3^{22} 11^{2}; near the Nile 1^{23} 2^{1-10}; (c) only numerous enough to annoy the king, their women needing only 2 midwives $1^{15ff.}$, requiring only 600 chariots for pursuit 14^{7}; (d) royal pensioners Gn $46^{18.23}$, never mentioned as owning cattle; (e) Mos. demands merely that Isr. be let go $3^{10f.21f.}$ 5^{1a} (5^{1b} R^{je} to harmonize with J) 9^{35} 10^{20}, ulterior end being to get to Can. 13^{17-19} cf. Gn 48^{21}, and incidentally *to serve God on this mountain*, *i.e.* Horeb, more than 3 days' journey 3^{12}; (f) the wonders or plagues are 5, and have the miraculous element heightened, *e.g. Moses smites all the waters in the river*, and they *turn to blood* $7^{17b.20b}$; Moses only once speaks to Pharaoh 5^{1a}, and the wonders follow his mere gesture; the hail is *on man and beast* $9^{22.25a}$, while locusts devour *every herb of the land* $10^{12.15b}$; (g) departure deliberate, the people gathering supplies beforehand $11^{1f.}$; time to take up Joseph's bones 13^{19}; (h) Moses' *father-in-law* is *Jethro* 3^{1} 4^{18} 18, and he has *two sons* $18^{5f.}$, his wife being a *Cushite* Nu 12^{1}; (j) the name of God is *God* (Elohim) always up to 3^{15} and often afterwards, especially in phrases, *e.g. mount of God* 3^{1} 4^{27} 18^{5} 24^{13*}, *rod of God* 4^{20} 17^{9} †; *angel of God* 14^{19} Gn 21^{17} 28^{12} 31^{11} 32^{1*} cf. Ex 23^{20} 32^{34} Nu 20^{16}; *statutes of God* 18^{16}.

P—(a) The people live in Egypt $1^{1.5}$; (b) not in separate district, for *the land was filled with them* 1^{7}; no immunity mentioned; (f) the direct Divine agency in the wonders is emphasized; Aaron is always with Moses, and speaks, etc. 7^{1-7} etc. (while in J the insertion of Aaron 4^{13-16} seems due to J^{s}, for where Aaron or a plur. is found, as $8^{8.12a.25.28}$ 9^{27} $10^{16f.}$, the sing. is found close by $8^{9.12b.29}$ 9^{33} $10^{17a.18}$, Moses being sole speaker $7^{14.26}$ 8^{20} 9^{1-13} 10^{1}); (i) in the Passover the eating is the main thing, the sprinkling is not ordered to be repeated $12^{1-13.43-50}$; (j) the name of the Deity is always *God* up to 6^{2}, and always *Yahweh* (*=Jehovah*) afterwards.

(k) Moses' *rod* is the object of Divine power in J, being turned into a serpent (*nahash*) before the people 4^{2-4}; Moses' rod, given him by God 4^{17} and called *the rod of God* 4^{20} 17^{9}, is regularly the instrument of Divine power in E $7^{15.17b.20b}$ 9^{23} 10^{13} 14^{16} $17^{5.9}$; Aaron's rod is in P the object of Divine power, being turned into a serpent (*tannin*) before Pharaoh $7^{9f.}$, and also its instrument 7^{19} $8^{5.16f.}$ cf. Nu 17. For describing Pharaoh's obstinacy, we have (1) some form of *heavy* in 7^{14} $8^{15.32}$ $9^{7.34}$ J; (2) some form of *strong* 7^{23} 9^{35} $10^{20.27}$ E, and $7^{13.22}$ 8^{19} 9^{12} P, who moulds his almost unvarying phrase on 8^{15} J, but borrows *strong* from E.

D. Other Clues to the Analysis.

J—*That generation* 1^{6} (in P always plur.); *mighty* $1^{7.9.20b}$ Gn 26^{16} Nu 22^{6} etc.; *come*, or *go to* 1^{10} Gn $11^{3f.7}$ 38^{16*}; *falleth out* 1^{10} Gn $42^{4.38}$ 49^{1}; *enemies* (haters) 1^{10} Gn 24^{60}; *taskmasters* 1^{11}† cf. 3^{7} $5^{6.10.13f.*}$; *afflict* 1^{11} cf. 3^{7} 4^{31}; *who made thee a prince?* 2^{14} cf. Nu 16^{13}; *sought to slay* 2^{15} 4^{24} $21^{8b.}$ cf. Gn 27^{20}; *Angel of Jehovah* 3^{2} Nu 22^{22} etc. ct. Ex 14^{19} etc. E (see *C* j. above); *cry* $3^{7.9}$ Gn 4^{10}; *I am come down* 3^{8} $19^{11.18-20}$ Gn $11^{3.7}$ 18^{21} ct. Ex 33^{9} E, cf. Nu $11^{17.25}$ 12^{5} E^{s*}; *land flowing with milk and honey* $3^{8.17}$ 13^{5} 33^{3} Nu 13^{27} 14^{8} $16^{13f.}$ Jos 5^{6}, never in E; *Jehovah the God of the Hebrews* 3^{18} 5^{3} 7^{18} $9^{1.13}$ 10^{3}†; 3 *signs* to convince *the people* $4^{1-12.30}$; *lodging* 4^{24} Gn 42^{27} 43^{27} Jos $4^{3.8*}$; *intreat* $8^{8f.28-30}$ 9^{28} $10^{17f.}$ Gn 25^{21*}; *to-morrow*, $8^{10.23.29}$ $9^{5f.18}$ 10^{4}; *such as hath not been*, $9^{18.24}$ 10^{14} 11^{6*} cf. 10^{8}; *there remained not* . . . 8^{27} $10^{19.26}$ 14^{28} Gn 47^{18} Jos 8^{17*}; *mixed multitude* 12^{38} Nu 11^{4}; *the passover* 12^{21-27} 34^{25}; *unleavened bread* and *firstlings* 13^{3-16}, apparently quoted in $33^{18b-20a}$ J^{s} before deuteronomic expansion took place.

E—*fear* (towards God) $1^{17.21}$ 18^{21} 20^{20} Gn 20^{11} 22^{12} 42^{18} Dt $25^{18\,E}$ Jos 24^{14} (never in J); by the river's brink 2^{3} 7^{15}; *handmaid* 2^{5} (*=bondwoman* RVm 21^{7} etc.), never in J; 2^{10} cf. Gn 21^{8}; *Horeb* 3^{2} 17^{6} 33^{6}, never in J; . . . *here am I* 3^{4} Gn $22^{1.7.11.}$ $27^{1.18}$ 31^{11} 37^{13} $46^{2f.}$; *herb of the land* $10^{12.15*}$; *the man Moses* 11^{3} Nu 12^{3}; *by a strong hand*, of Pharaoh 6^{1ab}, of Edom Nu 20^{20}, ct. 3^{19} 13^{9} R^{d}, and Dt, of God; *one (to) another*, lit. *a man (to) his brother* 10^{23} 16^{15} Gn 37^{19} $42^{21.28}$ Nu 14^{14} cf. Gn 26^{31} ct. Gn 11^{3} Heb. J, Ex 25^{20} 37^{9} Lev 25^{14} P*.

P—See list of peculiar expressions in Driver's *Introd.*, Holzinger's *Einl. in d. Hex.*, or more fully still in the forthcoming Oxford Analytical ed. of the Hexateuch.

II. FROM EGYPT TO SINAI: 13^{17}–18.

A. Summary.

13^{17-22} ^{JEP}choice of route, ^{J}guided by the Pillar. 14 ^{JEP}crossing of Red Sea and fate of pursuers. 15 ^{JE}Song of Moses; ^{J}Marah, ^{E}(? Massah =proving), and ^{J}Elim. 16 $^{EP\|J}$Gift of manna and $^{P\|J}$quails, ^{P}provision for Sabbath and memorial pot of manna. 17 ^{JE}water given in drought, ^{J}at Massah, ^{E}at Meribah; ^{E}victory over Amalek. 18 $^{E\|J}$visit of Moses' father-in-law, ^{E}appointment of judges.

P		

Displaced passages.—*b* is out of place here, and fits a later place in the narrative, as is shown by position assigned to Joshua at 33^{7-11}. *c* is also subsequent to the legislation at Horeb, and preparatory to departure for Can., cf. ^{23}. *d* perhaps led up to Nu 10^{29}.

C. Parallels and Contrasts.

J—(a) *Moses leads Isr.* 15^{22}, a vast host (see I *C* c), but unarmed and helpless 14^{11-14}, with *the Pillar of fire and cloud* for guide 13^{21} $14^{19b. 24}$ Nu 14^{14}; (b) straight for the Red Sea, perhaps because the Isthmus was fortified: Pharaoh pursues for reasons given 14^{5}; (c) Moses uses no gesture, but brave words 14^{13} cf. I *C* f; *Jehovah causes the sea to go back by a strong east wind* ^{21a}, and then to *return to its wonted flow* ^{27b}, and the crossing is by night $^{20b. 24. 27b}$, the Pillar moving to the rear and giving light to Isr. $^{19b. 20b}$ (read, *and it gave light by night*), while obscuring the Egyptians' path ^{24}; Jehovah fights for Isr. $^{14. 25b}$; (d) Moses and Israel sing 15^{1}; (e) Isr. *tempts* or *proves J″* $17^{2. 7ac}$ Nu 14^{22} cf. Dt 6^{16} 9^{22}; (f) see under P below; (g) the people *prove J″*, hence *the name Massah* or *proving* (see e above), and *murmur against Mos.* 15^{24} 17^{3} Nu 14^{2} cf. Nu 20^{5}, for water $17^{3. 2b. 7ac}$, which elsewhere in J is provided by natural causes, as $15^{22ff. 27}$.

E—(a) *God leads* the people 13^{17} (cf. Jos 24^{6} E) few but armed ^{18}; (b) not by the Isthmus for fear of the Philistines ^{17}, but presumably by the next nearest route to Can. (cf. Jos 24^{6}, and see I *C* e); the Egypt. pursue Isr. (Jos 24^{6}), who cry out 14^{10b} (Jos 24^{7}); (c) the *rod* (I *C* k) is *lifted up* 14^{16a} cf. Is 10^{26}; the sea is crossed by day, for *the angel of God* (I *C* j) goes behind and interposes a barrier of darkness $^{19a. 20a}$ (Jos 24^{7}), and then obstructs advance ^{25a} and overwhelms them (Jos 24^{7}); (d) *Miriam* and *the women* sing responsively $15^{20f.}$ cf. 1 S $18^{6f.}$, which suggests that we have here an independent account not following on 15^{1}, which is thus left for J; (e) *God proves* Isr. 15^{25b} 16^{4} 20^{2} Gn 22^{1} cf. Jg 2^{22} (Budde E) Dt $8^{2. 16}$ 13^{4} Jg $3^{1. 4}$ (? R^{d}) *; (f) the *proving* is by the test of their reception of each *day's portion* (dabar) of *bread from heaven* 16^{4}, *the thing* (dabar) *which Jehovah commanded* being to gather only for daily use *every man according to his eating, i.e.* a variable amount ($^{16a. 19-21}$) cf. Dt $8^{2. 16}$; *they knew not what it was*, and hence the name ^{15a} cf. Dt $8^{3. 16}$, and it lasted *till they came to a land inhabited* ^{35a}; (g) *the people strive with Mos.* about lack of water, hence the name *Meribah* or *strife* $17^{2a. 7b}$; water comes by *smiting the rock* with Moses' *rod* $^{5f.}$ cf. 7^{20b} and see I *C* k.

P—(a) *Moses and Aaron* lead *the whole congregation* 16^{1-3} *with a high hand* 14^{8}; (b) not by Isthmus because deliberately turned back 14^{2-4} to give occasion for a wonder, and Pharaoh pursues because hardened $^{4. 8. 17}$ cf. I *C* l; (c) Moses' *hand* was *stretched* forth $^{16a. 21a. 26f}$, and *the waters were divided* miraculously, not by a wind, for they were *as a wall on their right hand and on their left* $^{21b. 22}$, and so the catastrophe followed $^{26. 27a. 28a}$; (f) *the whole congregation murmurs* for *the fleshpots* of Egypt $16^{2f.}$ (cf. Nu 11^{4-6a} J); manna, a miraculous gift, is described $^{14. 23. 31}$ (cf. and ct. manna, a natural product, described Nu 11^{6b-9} J); *the quails* are mentioned almost casually ^{13}, manna being the main point (ct. Nu $11^{13. 18-23. 31-34}$ J); a fixed amount of manna was to be gathered ^{16b}; manna is eaten *till they came unto the borders of the land of Can.* ^{35b}; the two commands about Sabbath observance $^{22ff.}$ and the memorial pot of manna $^{32f.}$ are not needed by the context of P, and may have been added after the union of J E P in order to supply clearer explanations of the *proving* of ^{4}.

D. Other Clues.

J—Divine help by natural means 14^{21} 15^{22-25a} cf. I *C* e; *three days* 15^{22} cf. I *C* e; *and they came to . . .* $15^{23. 27}$ Heb.; *springs* (lit. *eyes*) *of water* 15^{27} Gn 16^{7ab} 24 (7 times) 49^{32} Dt 8^{7} 33^{28} Nu 33^{9} R^{P}*.

E—*Joseph's bones* 13^{19} Gn 50^{25} Jos 24^{32}; *statute and ordinance* 15^{25b} Jos 24^{25}; *they cried out unto Jehovah* 14^{10b} Jos 24^{7}; *one to another* 16^{15} see I *D*; *pass on before the people* 17^{5} Jos 3^{6}; *Aaron and Hur* $17^{10. 12}$ 24^{14}; Moses' father-in-law Jethro, wife, and two sons 18, see I *C* h.

P—*I will get me honour* $14^{4. 17f.}$ Lv 10^{3}; *and the Egyptians pursued* $14^{9. 23}$; 15^{19} R^{P} cf. $14^{22f. 28a}$; date *after . . . departing out of the land of Egypt* 19^{1} Nu 1^{1} 9^{1} 33^{38} 1 K 6^{1}†.

III. AT SINAI: 19–40.

A. Summary.

19 ^{JEP}The encampment at ^{JP}Sinai ^{E}the mount of God; ^{JE}awful sights and sounds introduce a theophany; 20–23 God gives, i. $^{E\|D}$the Decalogue, ii. $^{E\|J}$the Book of the Covenant, iii. $^{E\|D}$the Book of Judgments; 24 ^{E}covenant sacrifice and ^{J}feast before God, ^{EP}Moses ascends the mount, and ^{E}remains 40 days; 25–31 ^{P}J″ gives full directions for the tabernacle, its ornaments and furniture, its priests, their dress and consecration; $^{EP\|J}$Moses receives the two tables; 32–34 ^{E}idolatrous and ^{J}mutinous conduct of the people; ^{E}Moses breaks the tables and destroys the golden calf; ^{J}massacre by Levites; ^{JE}intercession of Moses; $^{E\|P}$usage of tent of meeting; $^{J\|E}$the ten Words of the Covenant ^{J}written by Moses $^{J\|EP}$on two tables; 35–40 ^{P}erection and furnishing of the tabernacle.

This section is the most complicated and difficult in the Hex. It is generally agreed that the sources are much dislocated, and that the material has been repeatedly revised by successive editors and compilers. Most critics abandon the attempt to carry through a systematic analysis or reconstruction. The scheme adopted here for the JE portions is that of Bacon, and its resort to the hypothesis of wholesale transpositions can only be justified by the hopelessness of less drastic methods and the comparative harmony and order which it introduces. There is, however, a growing consensus of opinion in favour of the main conclusions on which the scheme rests. The sources are for clearness given again separately, in the order conjecturally suggested here. The presence of J^s and E^s is often felt, especially in 32–34, but cannot be clearly delimitated.

J = $19^{2b. 20-22. 24. 11b-13. 25}$ . . . $24^{1f. 9-11}$ $34^{1-5r. 10-28r.}$ $32^{7-14r. 25r-29}$ $33^{1. 3}$ (Nu $11^{10c. 11f. 14f.}$) Ex 33^{12-23} 34^{6-9} . . .

E = $19^{3a. 9r-11a. 14-17. 19}$ 20^{1-21} 19^{6b-8} $24^{12-14. 18b}$ 32^{1-6} 31^{18b} $32^{16-24. 30-34}$ $33^{4. 6}$ . . . 20^{22-26} 23^{10-33r} (with 22^{29-31}) 24^{3-8} 18^{1-27r} 33^{7-11} and (after the E passages in Nu) 17^{8-16} the war with Amalek, and 21^{1}–23^{9} the Book of *Judgments*, whose original position is supposed to be now occupied by Dt.

P^h = 29^{42-46r} 31^{12-17r}.

P^g = 19^{1-2a} 20^{11} $24^{15b-18a}$ 25–27^{19} $28^{1-40. 42f.}$ $29^{1-20. 22-37}$ 31^{18a}.

P^s = $27^{20f.}$ 28^{41} 29^{38-46} 30–31^{11} 32^{15b-16} 35–40.

R^d (or R^{je}) = $19^{3c-6a. 23}$ $20^{2b. 4b-6. 7b. 9f. 12b. 17b}$ $22^{21b-22. 24. 25b. 31}$ $23^{9. 11b. 12b-13. 15b. 17. 19a. 23-25a. 27. 31b-33}$ $32^{8. 13. 25b}$ $33^{2. 5}$ $34^{1b. 4a. 7b. 10b-13. 15. 23f.}$.

C. Parallels and Contrasts.

J—(a) *J″* $19^{11b. 18. 20ab. 21ab. 22ab. 24}$ etc., (b) *came down* (see I *D*) (c) *in fire* 19^{18} (cf. Gn 19^{24} Ex 3^{2}, and the *pillar of fire* II *C* a, c) (d) *upon Mount Sinai* $19^{11b. 18. 20. 23'}$ $34^{2. 4}$ (e) *in the* SIGHT *of all the people*, 19^{11b}, (f) *the* PRIESTS only being bidden to *sanctify themselves* 19^{22}, (g) *the people* being kept at a distance throughout, $19^{21. 24. 12f.}$ $24^{2b.}$ 34^{3}, (h) while *these* (so Heb.) 19^{13b}, *i.e.* Mos. and *the priests which come near*, were to *come up*, $^{22. 24}$ (read in ^{24} *and the priests*: *but let not the people* cf. j) 24^{1}, (i) *at the* BLAST *of the* RAMSHORN 19^{13b} Heb. (j) *Aaron, Nadab, and Abihu* with 70 *elders* accordingly are called and go up, and (k) celebrate a covenant feast before *the God of Isr.* $24^{1f. 9f.}$ (this incident may have been incorporated by the author from another source, as it presents several peculiar features); (l) *Moses* is then summoned ALONE *to the top of the mount* $34^{2f.}$ (m) with *two tables of* STONES (so Heb.) which he is to *hew* $34^{1. 4ab}$; (n) *upon the tables* he is to *write* $34^{27f.}$ (cf. ^{1} where the change of one Heb. letter turns *I will* into *thou shalt write*) (o) *the Ten Words of the Covenant* as soon as he receives them $34^{27f.}$, (p) remaining with J″ 40 *days and* 40 *nights* apparently for the purpose of engraving them. (q) The rebellion of the people (32^{25}) being announced to him by J″ ($^{7. 9}$), Moses procures by intercession the repentance of Jehovah ($^{11-14}$), (r) and on descending quells revolt by means of *the sons of Levi* (32^{26-29}). (s) On learning he is to lead alone, Moses intercedes afresh, and procures a theophany, a revelation of mercy, and a promise of J″'s *presence* $33^{1. 3}$ (Nu $11^{10c. 11f. 14f.}$ which interrupt their present context, fit well here, and, after the great block of P is removed, are seen to lie near at hand) $^{12-23}$ 34^{6-9}. (t) Moses HAD ALREADY *made an ark of acacia wood, and puts the tables in the ark* (J's account, which Nu 10^{33-36} and the many references to the ark in Jos prove to have existed, but which is now displaced in favour of P's, is recovered from Dt 10^{1-5}), (u) but no trace remains of his allusions to *the tent of meeting*.

E—(a) *God* $19^{3a. 17. 19}$ $20^{1. 19. 20. 21}$ $21^{6. 13}$ $22^{8. 9ab. 11}$ in LXX ^{28} 24^{13} 31^{18b} (cf. *D*) (b) *comes* 19^{9} 20^{20} (c) *in a thick cloud* $19^{9. 16}$ $20^{18. 21}$ cf. 14^{20a} 33^{9} Nu 11^{25} 12^{5} Dt $31^{15\,E}$ (d) to *the mount of God* 24^{13} (cf. I *C* j), (e) *that the people may* HEAR $19^{9. 19}$ $20^{1. 19}$. (f) So Moses has to *sanctify the* PEOPLE $19^{10f. 14f.}$, (g) and they only *stand afar off* through fear 20^{21} (h) after Moses has brought them all near 19^{17}, (i) *when there is the* VOICE *of a* TRUMPET *going on and increasing much* $19^{16. 19}$ 20^{18}. (j) (see below v, x). Without any individuals drawing nearer, God speaks the Decalogue to the people $20^{1. 19}$, (k) (see below w, y), and the covenant is assented to by the people 19^{3b-8r} cf. 24^{3-8} Dt $27^{11ff.\,E}$ Jos 24^{16-27} 1 S 11^{14}–$12^{25\,E}$. (l) Moses is then summoned, and *goes up into the mount with Joshua his minister* $24^{13f.}$ cf. 33^{11} Nu 11^{28}, (m) that God may *give* him *the tables of* STONE *which* He has *written, and the law and the commandment that* he *may teach them* 24^{12} (with a slight transposition rendered necessary by an alteration presumably made when the Book of *Judgments* was thrust into the centre of the *Book of the Covenant* to make way for the Deuteronomic law given in the plains of Moab). (n) On the tables God has already written 24^{12} 31^{18b} (o) apparently the Decalogue, see Dt 5^{22}. (p) *Moses* remains *in the mount* 40 *days and* 40 *nights* for the purpose, it would seem, of receiving *the law and the commandment*, here supposed to refer to the material of the Book of Judgments 21–23^{9}. (q) On descending he discovers with surprise the idolatry of the people, (r) and breaks the tables, and destroys the golden calf $32^{15a. 17-20}$. (s) Moses then intercedes for the people, is bidden to *lead* them himself, but has promise of God's *angel* to go before him: there is a marked tone of severity in the words of J″ 32^{30-35}. (t) That E spoke of the ark here may be implied from his allusions in Jos *passim*, (u) and that he described the making of a simpler form of the *tent of meeting*, placed *without the camp*, and possibly adorned by aid of the abandoned ornaments, seems to follow from 33^{7-11} Nu $11^{16f. 24b-30}$ $12^{4f.}$ Dt $31^{14f.}$ with Ex 33^{6} 3^{22} $11^{2f.}$ (v) J″ gives the *Book of the Covenant* 20^{22-26} $22^{29f.}$ 23^{10-33r}; (w) the covenant is assented to by the people, see k above; (x) certain *young men* 24^{5} cf. 32^{6} and *Joshua* 33^{11}, ct. J under k, (y) offer a covenant sacrifice 24^{5} cf. 20^{24} 32^{6} Dt $27^{6f.}$.

P—(a) *J″* (so throughout) (b) makes His *glory* ($16^{7. 10}$ 29^{43} $40^{34f.}$ Nu 14^{10} $16^{19. 42}$ 20^{6} ct. the less local and physical use of the term $33^{18. 22}$ Nu 14^{21f} J, Dt 5^{24*}) to *appear* (c) *like devouring* FIRE (40^{38} Lv 9^{24} 10^{2} Nu $9^{15f.}$ 16^{35}) . . . *out of the midst of the* CLOUD (16^{10} $24^{15. 16ab. 17. 18}$ $40^{34. 35. 36. 37. 38}$ Lv 16^{2} Nu $9^{15ff.}$ 11 times $10^{11f. 34}$ 16^{42}) (d) *upon Mount Sinai* (e) *in the eyes of the children of Israel* $24^{15b-18a}$, (f) no priests having yet been consecrated 29 Lv 8–10, (g) all except Moses being kept at a distance; (l) Moses is *called*, and *goes up into the mount* 24^{16-18a}, (m) that he may receive *the two tables of the* TESTIMONY 31^{18a} $32^{15a'}$, (n) which had, *written on both their sides* 32^{15b}, (o) no doubt the Decalogue, a brief account of the giving of which may have been displaced by R^p in favour of the impressive narrative of JE, 20^{11} being perhaps the only fragment preserved. (p) Moses remains in the mount (prob. for 40 days and nights) to receive the pattern of the sanctuary (25–30), (s) with a promise of J″ to *meet with the children of Israel* (hence *tent of meeting*) and to *dwell among the children of Israel* (hence *Tabernacle* or *Dwelling*) 29^{42-46}. (t) Moses SUBSEQUENTLY ORDERS to be made an *ark of acacia wood, overlaid* and ornamented *with gold* 25^{10-22} 37^{1-9}, and *puts the testimony into the ark* 25^{16} 40^{20}; (u) he also prepares, erects, and furnishes a gorgeous *Dwelling* for J″, large and costly and needing a numerous body of priests and Levites to attend to it (35–40).

D. Other Clues.

J—*God*, when stress is on His nature, deity 24^{11} Gn 32^{28} 33^{10}; *stiff-necked* 32^{9} $33^{3. 5}$ 34^{9}, quoted Dt $9^{6. 13}$; *consume* $32^{10. 12}$ $33^{3. 5}$ Gn 41^{30} cf. Nu $16^{21. 45}$ P etc.; *and I will make of thee a great nation* 32^{10} Gn 12^{2} Nu 14^{12} ct. Heb. Gn 21^{18} 46^{3} E and Gn 17^{20} P; *face of the ground* 32^{12} 33^{16} Gn 2^{6} $4^{3. 14}$ $6^{1. 7}$ $7^{4. 23}$ $8^{8. 13}$ cf. E—*Prove*, 20^{20}, see II *C* e ; *lord of* (*wife*, etc.), Heb. *ba'al*, RV *married*, *owner*, etc. $21^{3.22.28.29ab}$ $34^{ab.36}$ $22^{8.11f.14f.}$ 24^{14} Gn 20^{3} 37^{19} Nu 21^{28} Jos 24^{11}, in J only once, in the poem Gn 49^{13}; *bondwoman* 2^{5} $21^{7.20.26f.32}$ (Heb. word never used by J); stress on severity of God 23^{21} 32^{33} Nu 23^{19} Jos 24^{19}; *Aaron and Hur* 24^{14} $17^{10.12}$; *rings* (*i.e.* for ears) $32^{2f.}$ Gn 35^{4} Jg $8^{24ff.}$ (perh. E); *sin* $32^{21.30f.}$ Gn 20^{9*}; *Horeb* 33^{6}, see I *D*; *pillar of cloud* 33^{7-11}, see *C* c.

IV. THE LAWS IN EXODUS.

The four earliest Heb. codes occur in this section, all in an expanded form. The principal additions have been shown above (end of III *B*); they either interrupt the context, or contrast with it in phraseology or material, or seem to be quotations inserted from elsewhere. Limits of space forbid any further attempt to justify their excision from the orig. sources.

It is now generally agreed that E contained three out of the four codes. This confirms the view that this document, like others, represents the *end* of a long process, during which various elements were successively assimilated. Moreover, those who combined E with J (referred to as R^{je}), who added D (R^{d}), who finally incorporated the whole in P (R^{p}), naturally in the case of such important material showed at its strongest the desire to preserve all they could. Is it unreasonable to conjecture that each fresh combination required some dislocation of the existing material to suit the new adjustment? In the text as we now have it, E's three codes form together the basis of the Covenant. It has been suggested above that in E, in its final form as a separate document, the Decalogue was the basis of the Covenant, the *Book of the Covenant* led up to the Renewal of the Covenant, while the Book of *Judgments* belonged to Moses' parting words in the plains of Moab. If R^{je} used J's version of the Covenant to serve for the account of the Renewal of the Cov. (34^{1-28}), and, to preserve E's *Book of the Cov.*, put it back to form with the Decalogue the basis of the first Cov.; and if R^{d}, inserting D in the section about the plains of Moab, kept the Book of *Judgments* by incorporating it with the *Book of the Cov.*, then the very order which we now have would have been produced. That this actually took place is only conjecture; but it was worth while showing how the present state of the text might have arisen; and this solution has at least the merit that it only presupposes the action of causes which have been clearly traced at work elsewhere.

The Codes compared.

J—*The Ten Words of the Covenant* (III *C* l-p above).—(The list given is only the one thought best of several possible ones. Parallels in E are marked by the corresponding number. Laws in 3 codes are in LARGE CAPITALS: laws given by both J and E in SMALL CAPITALS): (1) MONOLATRY COMMANDED; (2) IMAGES FORBIDDEN; (3) THE FEAST OF UNLEAVENED BREAD, (4) THE SABBATH, (5) THE FEAST OF *weeks* OR FIRSTFRUITS, and (6) THE FEAST OF INGATHERING, COMMANDED; (7) BREAD WITH SACRIFICES TO BE UNLEAVENED; (8) THE *passover sacrifice* TO BE ALL CONSUMED; (9) FIRSTFRUITS REQUIRED; (10) SEETHING OF A KID IN ITS DAM'S MILK FORBIDDEN.

E—The Decalogue. (1) MONOLATRY COMMANDED; (2) IMAGES FORBIDDEN; false swearing forbidden; (4) THE SABBATH enjoined; reverence to parents commanded; murder, adultery, theft, false witness, and covetousness forbidden.

E—*The Book of the Covenant* (III *C* v above). (1) MONOLATRY (?) COMMANDED; (2) IMAGES FORBIDDEN; altars to be built as ordered, (9) FIRSTFRUITS DEMANDED; also FIRSTLINGS (cf. $13^{11ff.}$ J); the Sabbatical year, and (4) THE SABBATH COMMANDED; also (3) THE FEAST OF UNLEAVENED BREAD, (5) THE FEAST OF *harvest* OR FIRSTFRUITS, and (6) THE FEAST OF INGATHERING; (7) BREAD WITH SACRIFICES TO BE LEAVENED; (8) THE *fat of* God's *feast* TO BE ALL CONSUMED: (10) SEETHING A KID IN ITS DAM'S MILK FORBIDDEN.

[It will be observed that, while the Decalogue (which see) contains both religious and moral laws, the other two concern only religion and the cultus, and are very closely parallel to one another].

E—The Book of *Judgments* (21–23^{9}). This code contains a comprehensive series of laws, civil and criminal, all penetrated by a high ethical and religious spirit. They seem drawn up, perhaps originally in sets of 5 or 10, for use by judges and magistrates, but display no very definite order of arrangement. The appeal lies *before God*, *i.e.* (presumably) at the sanctuary, cf. 18^{13-26}. With this code should be carefully compared Dt 12–26, which is based on it, and Lv 17–26, the Holiness Legislation, which presents many parallels.

The chapters in P relating to the **Tabernacle** (which see) remain to be considered. They are not without difficulty, for a close inspection discovers reasons for believing that they are not all from the same hand. The full proof of the analysis given above (end of III *B*) cannot be reproduced here, but the nature of the principal line of argument can be seen from the accompanying table, which gives the sections in the order of 35–40 (Heb. text)$=H^{2}$, while on either side are given references to 25–31 (Heb. text)$=H^{1}$, and 35–40 (Gr. text)$=$G. The letters indicate by their alphabetical order the order of sections in the text referred to; and those sections in H^{1} which are judged later than P^{g} are marked by an *italic* capital. A moment's comparison of H^{1} and H^{2} shows large variations of order. But while the changes of order in A to K and M to U can be readily accounted for by the mere fact that H^{2} records the fulfilment and H^{1} the ordering, the passages *L*, *W*, *X*, *Z*, *A'*, *B'* seem so out of place where they are that it is necessary to suppose them to be later than the context that would otherwise have contained them. The golden altar of incense (*W*=m) is the most important case. (1) It is out of its natural place in H^{1}; (2) the term *the altar* in 27^{1-8}, and 100 times elsewhere in P^{g} and (early) P^{s}, would be ambiguous if the altar were one of two, and is replaced in 38^{1} etc. by a distinctive term, *the altar of burnt-offering*, and so constantly in the later strata of P^{s}; (3) the incense altar is not mentioned in G; (4) in Lv 10 and Nu 16 we only read of censers for incense, and *the*

§ Part omitted. ‡ With omissions and variations.

altar is still the only one Nu 16^{38}. It may be noted that 28^{41} 29^{21} are late P^{s} because Aaron's sons receive anointing, contrary to the clear intention of P^{g} in $29^{7.\ 29\,f.}$, and so Lv 8^{12} etc. A further comparison of H^{2} with G shows a second set of variations. It is held by many that the facts require us to suppose that the Greek tr. of 35–40 was made before the Heb. text had reached its present symmetrical and complete form. By means of the above table the student can readily test for himself the value of this suggestion.

V. Concluding Survey.

i. *The History.*—If we accept the results of this article as in the main correct, we have passed far beyond the boundary of a merely negative criticism. It might be called destructive work to show by detailed proof that we have no contemporary account of the Exodus and subsequent events. But when it is shown that the present narrative is made up of three, so far contrasting with one another as to prove themselves much later in date than the period of which they treat, and the work, not merely of different individuals, but of different schools of historical writing; and when the further step is taken of disentangling, with infinite pains of many labourers in many lands, the several threads of narrative, and recombining them in something like their original connexions, the work of constructive criticism must be held to have been well begun. The summaries will have shown on how many important points the three witnesses are at one. For fuller particulars see Moses, Israel.

But, while it is well to remember that contrasts are not always, or even usually, contradictions, it would be idle to try to belittle the extent of the change of view brought about. We may rather think of it as the drawing back of a veil of illusion which God wisely allowed to hang over the past, until the growth of truer ideas about history both took away the veil, and made men ready to make use of the facts, whose real relations were at last adequately discovered.

If, therefore, it has to be admitted that the Priestly history (P) has no independent value as a witness to the Mosaic period, and that the materials in E, and to a less extent in J, require careful sifting before being regarded as correctly representing an age which to them was already a distant age, we may set against that two things. First, an exact view of that epoch might have disappointed us, even as a field sown with corn has little beauty till the seeds have shot up into blade and stem. Secondly, we have instead three views of it, so influenced by the ideas of the writers' own times and circumstances as to reveal to us various stages in the after-growth, which was itself entirely dependent on that germinal time. On the face of it, the book tells of the Exodus of Isr. from the bondage of Egypt; in the soul of it, it speaks, to those who have ears to hear, of successive stages in the great outgoing, at once more glorious and more perilous, of the family of man from the bondage of superstition, ignorance, and sin. The events are not merely typical of spiritual realities; but the very fact that they were thus and then recorded, shows the faith of the men of other days in the God whose hand they loved to trace at work in the world.

ii. *The Leading Ideas.*—The Heb. writers are not mere annalists, but interpreters of history. Hence their permanent value. They may be criticised as chroniclers of outward events, but they sought and found God everywhere, and they abide to hand on their secret. In all three documents we find the same fundamental verities emphasized, which give to Ex its real unity. J″ is the supreme God, ruling in Egypt, and master over nature. He is the faithful God who made His choice of the fathers of the Heb. race, and will not draw back. He is the God of grace, and so loves to give guidance, counsel, help, food, drink, every needed supply. He is the Holy One, and requires obedience to His will, and takes steps to make known that will. He is the Jealous God, and demands that due worship shall be paid to Him, and to none else. He is the Covenant God, and the two sides of the Covenant are: J″ Israel's God, Israel J″'s people.

But each document has its individual standpoint, even as each of the synoptic Gospels presents its own picture of the life of Christ. The oldest, J, perhaps coming from the priestly circle connected with Solomon's temple, is written from the point of view of a highminded patriot, keenly interested in every detail of national history, so quick to see God's hand in providence as to be able to make his story religious with but little use of the miraculous, alive to all the shades of character in men, as well as to the richness of the Divine nature, in which *mercy rejoiceth against judgment,* valuing highly the common ordinances of religion, and recognizing the great opportunities of the priestly office. The document E, probably rather later, and originally coming from Ephraimite circles, reflects the views of the prophets. This work (extending from Gn to Kings) is a series of biographical studies of great prophetic heroes, with Moses as the central figure. Much stress is laid on morality. The people sin, and need to be called to repentance. God is righteous, and His requirements must not be despised. The miraculous element is heightened, of course unconsciously. The moral of each incident must be made clear, the reality of the Divine government set unmistakably forth. Sad experience of the faults of the priesthood leads to the priests being either passed over, or introduced for blame. Worship is strictly secondary to morality.

The priestly writer (P) has lost all hold upon the simplicities and roughnesses of the childhood of the nation. So possessed is he with reverence for the religious institutions of the now ruined temple, that he not only has already in the vision-chamber of his imagination elaborated them to an ideal perfection which they never had, but this ideal picture must be, he has become persuaded, the reflection of what actually existed in the primitive, the perfect days. Each new improvement is unhesitatingly added with the same formula of Divine inspiration, the argument being: 'We see this to be best now, therefore it must have been ordered and done then.' Granted, then, that this stately centralized worship was the Divine purpose for the Second Temple, we may surely accept the unhistorical form of the priestly legislation as being probably the only means by which it could have been successfully introduced. After all, the full corn in the ear *is* present in the seed, if not in miniature, at least in promise and potency.

The Bk. of Ex is like a grand symphony, which was once thought to give harmony without discord, but is now being found, in virtue of elements which by themselves are sharply discordant, to sound forth a yet richer harmony.

Literature.—See **Hexateuch**. B. W. Bacon's *The Triple Tradition of the Exodus*, and his arts. in the *Journal of Bibl. Lit.* (1890–93) have been of great service to the writer; and Bruston's essay, *Les quatre sources des lois d'Exode*, is plausible and suggestive. We still wait for a good Eng. com. on Exodus.

G. Harford-Battersby.

EXORCISM, EXORCIST.—The word ἐξορκίζω is a later form of the classical ἐξορκόω. The latter is employed in Demosthenes in the sense of 'administer an oath to a person.' The verb ἐξορκίζω is used by the high priest to Jesus 'I *adjure* thee by the living God . . .' (Mt 26^{63}), and corresponds to the Heb. הִשְׁבִּיעַ. Cf. Gn 24^{3} LXX. The subst. *exorcist* is only once employed in the NT, viz. in Ac 19^{13}. The passage is instructive, since it shows that exorcism in those days was practised as a profession by strolling Jews. The method which they pursued we might infer from the example of Eleazar, to which Josephus specially refers in the passage cited from *Ant.* VIII. ii. 5, in the article DEMON, p. 593^{a}. The constant and essential element in all these exorcisms was the power wielded by the *recitation of special names*. In the instance recorded in Ac 19 the Jewish exorcists had observed the expulsions which Paul had effectuated through the pronunciation of the name of Jesus, and endeavoured, with ludicrously disastrous results, to work the same cures by saying, 'We adjure you (the evil spirit) by Jesus whom Paul preacheth.'

An example of the ancient Babylonian incantations has already been given above, p. 591. Illustrations of Jewish spells may be found in the Talmud. (Respecting these, see Brecher, *Das Transcendentale, Magie u. magische Heilarten im Talmud*, Vienna, 1850, pp. 195-203.) That these were ultimately derived from Babylonian magic can admit of no doubt. Some Aramaic inscriptions, published in the *Zeitsch. für Assyriologie* (Dec. 1893 and April 1894) by Wohlstein, contain instructive examples of these exorcising formulæ. They are inscribed on the interior surfaces of some ancient bowls that were brought from Baghdad in 1886 and placed in the Royal Museum in Berlin. The mode of expression in all of them possesses broad features of resemblance, but special details vary in each case. For the names of the angels which are recited in each bowl differ widely owing to the prevailing belief, which finds expression in the Jewish *Kabbala*, that the ruling angels are constantly changing, and those must be addressed who hold the reins of power at that time and place.

The first of the series (No. 2422), from which we shall quote, was evidently employed to exorcise the demon of a man who was suffering from leprosy.

> 'In thy name I form a heavenly cure for Achdebuj the son of Achathabu of Daithos, by the compassion of Heaven. Amen, Amen, Selah. Bound, bound, bound shall be all the male spirits and female Astartes* evil spirits, powers of opposition . . . all Satans from West and East, North and South. Bound, bound shall be all evil sorcerers and all who practise violence; bound and sealed shall be all . . . and curses and conjurations. Bound be the angels of wrath, the angels of the house of assembly . . . the mighty princes, the hard princes, the diseases without number, the sufferings, the abscess, the scab, the mange, the skin-eruption, malignant discharge, suppurating wounds, the spirit of the burial-place, the spirit of the dead, the spirit of diseases; bound and sealed up shall ye all be from Achdebuj, son of Achathabu. Go and withdraw yourselves to the mountains and the heights and the unclean cattle [Mt 8^{32}, Mk 5^{12}, Lk 8^{32}]. If ye come on the first of Nisan [regarded as specially favourable for overcoming demons], go away from Achdebuj, son of Achathabu, in the name of Gabriel, who is called Elpassas, and in the name of Michael, who is called (Demu)thja, and in the name of Elbenmez, and in the name of Elba'baz . . .' [The inscription concludes with the formula Amen, Amen, Selah, which occurs in other incantations, sometimes with the addition of Hallelujah].

The exorcism No. 2416, transcribed by Wohlstein, is much longer, and other names of angels compounded with the name of deity El (as Nuriel, Chathiel, Sesagbiel, etc.) are quoted, with Mytatron at their head, making seven in all. The formula אהיה אשר אהיה (from Ex 3^{14}), ישראל and all variations on the names of deity, as יה and יהו, and the Athbash equivalent מץ פץ, are pressed into the service.

These spells are ascribed to the 7th cent. A.D., though written in unpointed Hebrew. The characters are of the more recent square type, and a much earlier date than the above is hardly probable. Why they were inscribed in bowls cannot be explained. The bowls were not intended to hold water, otherwise the distinctness of the lettering would have been obscured.

Demonology and exorcism played a conspicuous part in the literature and practice of the Christian Church throughout the earlier period and during the Middle Ages. In the time of our Lord exorcism was regarded as one of the signs of the Messiahship (Mt 12^{23}). It was the universal belief of the early church Fathers that a disciple of Jesus was able to exercise power over demons by uttering His name (Tertullian, *Apologet.* 23; Origen, *cont. Cels.* vii. 334). Naturally, bishops and other ordained clergy were considered to possess this charisma. But there was a special class of individuals who were so endowed without any ecclesiastical conferment (*Apost. Constit.* viii. 26, *ἐξορκιστὴς οὐ χειροτονεῖται*). They received formal episcopal recognition, but not ordination, as *exorcistæ per gratiam*. Nevertheless, we also find another class who did receive episcopal ordination, and were called *exorcistæ per ordinem*. In the ceremony of baptism the catechumen of adult age was obliged solemnly and publicly to renounce the devil and his works, but in the case of children the assistance of the exorcist was necessary. By the priest and attendant exorcist the ceremony of *exsufflatio* and *insufflatio* was performed on the child, who was regarded as a child of the devil, as being subject to inherited guilt. *Sacerdos exsufflat ter in faciem catechumeni semel dicens: Exi ab eo (ea) spiritus immunde et da locum spiritui sancto Paracleto. Hic in modum crucis habet in faciem ipsius et dicat: Accipe spiritum bonum per istam insufflationem et Dei benedictionem. Pax tibi.* According to the practice of the Romish Church at the present day, the separate existence of the exorcist is not recognized, but every priest, on ordination, receives previous consecration to the lower orders, including that of exorcist. In Can. 9 of the Fourth Council of Carthage we read: Exorcista quum ordinatur accipiat de manu episcopi libellum in quo scripti sunt exorcismi. At the present time the ordaining bishop places a missal in the priest's hands with the words: Accipe et commenda memoriæ et habeto potestatem imponendi manus super energumenum [*i.e.* *ἐνεργούμενον*, *sc.* *ὑπὸ πνευμάτων ἀκαθάρτων*].*

Among the Reformers opinion and practice were divided respecting exorcism. Luther and Melanchthon favoured it, but it was decisively rejected by Zwingli and Calvin (*Instit.* iv. c. 15. 19). For further details respecting ecclesiastical practice the reader is referred to the article '*Exorcismus*' in the 2nd ed. of Herzog-Plitt's *Realencyklopädie*, from which the facts in Christian ecclesiastical tradition have been derived. The article '*Kabbalah*,' in the same dictionary, may also be consulted with advantage. OWEN C. WHITEHOUSE.

---

* פתיכרי דיכרי ואיסתרתא נוקבתא. Note that in פתיכרי 'spirits' we have practically the same word as the Syriac ܦܬܟܪܐ 'idol.' The word איסתרתא is the *Ištarâti* 'goddesses' of the Assyrian. Similarly, the Talmudic flame-*demon* Rešpâ is the Phœnician flame-*deity Rešeph* or *Rešpu* (see Baethgen, *Beiträge zur Semit. Relig.-gesch.* p. 50; Wiedemann, *Relig. der alten Ægypter*, p. 83). Cf. Beelzebub of the NT. These are instructive examples of the wholesale conversion of heathen deities into demons.

* The Ritual for exorcism may here be appended. The priest, having arrayed himself in the official robes, first sprinkles the demoniac with holy water and then recites the prayer of the litany of all saints, the paternoster, and Ps 53; after this the two *orationes*, in which he makes the sign of the cross over the demoniac, and commands the evil spirit to depart by the power of the mysteries of the incarnation, passion, death, resurrection, and ascension of Christ, the gift of the Holy Ghost, and Christ's return to judge the world. After this follows the reading of Jn 1, Mk 16$^{15-18}$, Lk 10$^{17-19}$. Then the priest lays both hands on the head of the demoniac and says, *Ecce crucem Domini. Fugite, partes adversæ: vicit leo de tribu Juda.* After this comes the Oratio, with the special formula of exorcism, *Exorcizo te, immunde spiritus*, while the priest crosses the brow and breast of the demoniac three times in the name of the Trinity. If the evil spirit does not then depart, the service is begun anew.

EXPECT, EXPECTATION.—Following Lat. *expectare*, 'expect' meant in older Eng. not only 'look forward to,' but also simply 'wait,' or 'await.' Thus in Douay Bible the comment on Sir 11^{8} is 'Expect the end of another mans speach, before you begin to answer. Expect also if anie that is elder, or better able wil answer first.' Expect is used in this way in Job 32^{4}m., 2 Mac 9^{25}, and He 10^{13} 'From henceforth expecting till his enemies be made his footstool.' The Gr. of last passage is ἐκδέχομαι, elsewhere in NT tr^{d} 'wait for' (Jn 5^{3}, RV omits, Ac 17^{16}, Ja 5^{7}), 'tarry for' (1 Co 11^{33}, RV 'wait for'), 'look for' (1 Co 16^{11} RV 'expect,' He 11^{10}). Cf. Bacon, *Adv. of Learning*, i. (Selby's ed. p. 14, l. 35), 'The most active or busy man that hath been or can be, hath, no question, many vacant times of leisure, while he expecteth the tides and returns of business.'

Expectation is used throughout in the sense of looking forward to with hope. Thus even in Ps 62^{5} 'My soul, wait[*] thou only upon God; for my expectation is from him,' the Heb. is *tiḳwah* (תִּקְוָה), similarly tr^{d} in Ps 9^{18} and in Pr, but most often tr^{d} 'hope,' and the meaning is 'that which I hope for, my deliverance.' In Ro 8^{19}, Ph 1^{20} 'earnest expectation' is an effort to bring out the full force of the Gr. word ἀποκαραδοκία, which is found nowhere else. It is formed from δοκέω in the sense of 'watch,' κάρα, the 'head,' and ἀπό, 'from,' so that it means (Sanday-Headlam) 'awaiting with outstretched head,' the prep. denoting 'diversion from other things and concentration on a single object.' The Vulg. has simply *expectatio*, whence Rhemish 'expectation.' Wyc. has 'abiding.' But in Ro 8^{19} Tind. gives 'fervent desire,' and is generally followed (Cov. 'fervent longing'). 'Earnest expectation' is the Bishops' translation in both places.

J. HASTINGS.

EXPEDIENT is never found in AV in the sense of 'expeditious,' as so often in Shakespeare. On the other hand, it never means merely 'convenient' (opposed to what is rigidly right), as in modern English. The Greek is always συμφέρει, or (2 Co 12^{1}) συμφέρον (='it is profitable,' as AV and RV elsewhere tr. the word, except in Mt 18^{6} AV 'it were better,' and 19^{10} AV 'it is not good,' RV 'it is not expedient'). So even Caiaphas (Jn 11^{50} 'it is expedient for you that one man should die for the people') does not openly prefer, as a modern politician, the convenient to the just. His words are like those of Jeremiah (26^{14} Cov.), 'Now as for me: I am in your handes, do with me as ye thinke expedient and good,' though his spirit is the opposite. J. HASTINGS.

EXPERIENCE, which is the result of 'experiment,' was sometimes used for the experiment itself, as Baker, *Jewell of Health*, 112^{a} 'The Aucthour . . . hath both seen and done many experiences worthy memorie.' This is no doubt the meaning in Gn 30^{27}, where Laban says to Jacob, 'I have learned by experience that the Lord hath blessed me for thy sake.' It is the Douay translation. The Geneva has 'perceived,' but in marg. 'tried by experience.'

The Heb. (נִחֵשׁ) means to observe omens, whence RV 'I have divined.' It is used of Joseph's divining by means of a cup (Gn $44^{5.15}$, with notes by Del. Dillm. Wade) and elsewhere. The ptcp. is found Dt 18^{10} 'a diviner,' where see Driver's note.

J. HASTINGS.

EXPERIMENT is narrower and more concrete now than formerly. Occurring in AV in 2 Co 9^{13} only, 'Whiles by the experiment of this ministration they glorify God,' its meaning is 'test,' 'proof,' as Wither (1618), *Motto, Nec Careo*, 533—

> 'I want not much experiment to show
> That all is good God pleaseth to bestow.'

The Gr. is δοκιμή (tr^{d} 'experience' in Ro 5^{4} AV, but RV 'probation'). 'Experiment' is the Geneva word; RV 'seeing that through the proving of you by this ministration they glorify God,' which is a return to Wyclif, 'bi the preuynge of this mynysterie.' J. HASTINGS.

EXPIATION.—See ATONEMENT, PROPITIATION.

EXPOSURE.—See CRIMES AND PUNISHMENTS.

EXPRESS.—Only He 1^{3} 'the express image of his person' (χαρακτήρ, RV 'the very image,' RVm 'the impress'); and Wis 14^{17} 'they . . . made an express image of a king' (ἐμφανῆ εἰκόνα, RV 'a visible image'). On χαρακτήρ see Westcott, *in loc.* The tr. of RV is after Tind.; the Geneva ('ingraved forme') tries to bring out the sense of the Gr. word, which is properly what stands engraven on any object, as a seal (Davidson), and this is the meaning of AV 'express image'; cf. Shaks. *Hamlet*, II. ii. 299, 'What a piece of work is a man! . . . in form and moving, how express and admirable,' which Aldis Wright explains thus: 'Exact, fitted to its purpose, as the seal fits the stamp.' *Exprimere* (ptcp. *expressus*) has the meaning among others of 'copy,' 'pourtray,' and from this the Eng. word was used before 1611 in the sense of 'exactly pourtrayed.' Thus Sir T. More, (1513) *Rich. III.* 'This is ye fathers own figure . . . ye playne expresse lykenes of ye noble Duke.'

J. HASTINGS.

EXQUISITE.—From Lat. *exquisitus*, ptcp. of *exquirere*, to search out, 'exquisite' is properly, and was originally, that which is elaborately devised, 'ingenious,' and its application might be good or bad. In the *Areopagitica* (Hales' ed. p. 16) Milton says Mr. Selden's volume 'proves . . . by exquisite reasons and theorems almost mathematically demonstrative, that all opinions, yea, errors, known, read, and collated, are of main service and assistance toward the speedy attainment of what is truest.' Milton even uses the word *actively* of persons in *Comus*, 359,

> 'Peace, brother, be not over-exquisite
> To cast the fashion of uncertain evils,'

as other writers had done before him. Exquisite occurs Sir 18^{29} 'They . . . poured forth e. parables' (παροιμίας ἀκριβεῖς, RV 'apt proverbs'), and 19^{25} 'There is an e. subtilty, and the same is unjust' (so RV, Gr. πανουργία ἀκριβής). J. HASTINGS.

EXTINCT.—Extinct (Lat. *extinctus*, ptcp. of *extinguere*, to extinguish) now only expresses a state, 'active and extinct volcanoes'; 'the volcano is extinct.' But formerly it expressed the action which produces the state, and so Job 17^{1} 'my days are extinct' (יָמַי נִזְעָכוּ), and Is 43^{17} 'they are extinct, they are quenched as tow' (דָּעֲכוּ). Cf. Shaks. *Rich. II.* I. iii. 222—

> 'My oil-dried lamp and time-bewasted light
> Shall be extinct with age and endless night.'

'Extinguished' occurs, however, in Wis 2^{3}.

In the 16th cent. a verb 'to extinct' was coined, of which the past ptcp. was sometimes 'extincted' and sometimes 'extinct.' It is thus uncertain whether 'extinct' as ptcp. belongs to 'extinguish' or to this verb. Shaks. uses 'extinct' twice, 'extincted' once (*Oth.* II. i. 81, 'Give renew'd fire to our extincted spirits!'), but never 'extinguished.' He uses the verb 'extinguish' only once. J. HASTINGS.

EXTREME is used as an adv. in Sir 42^{8} 'the extreme aged' (ἐσχατόγηρος). So Bacon, *Essays* (Gold. Treas. ed. p. 156), 'Acting in Song, especially in Dialogues, hath an extreme Good Grace'; and p. 178, 'all Deformed Persons are extreme bold'; and again in *Advance. of Learning*, II. xxiii. 38, 'it [is] extreme hard to play an after game of reputation.' J. HASTINGS.

---

[*] There is no suggested connexion between 'wait' and 'expectation,' as the Heb. for 'wait' is 'be silent unto God,' as RVm (Cheyne, 'be simply resigned to God').

EYE.—The verb occurs twice: 1. Gn 29^{17} 'Leah was tender eyed' (עֵינֵי לֵאָה רַכּוֹת, RV 'L.'s eyes were tender'). Whether 'tender' is appreciatory or depreciatory is disputed. Modern commentators usually say depreciatory, after LXX (ἀσθενεῖς) and Peshiṭta. But others, the tender brightness of a child, after Onk. and Sa'adya, and quoting Gn 33^{13} 'My lord knoweth that the children are tender' (same Heb.). See Spurrell, *in loc.*; also Otts, *The Fifth Gospel*, p. 41 f.; and *Expos. Times*, v. 97. The Vulg. *lippis oculis*, 'blear-eyed,' is certainly wrong. 2. 1 S 18^{9} 'And Saul eyed David from that day and forward' (וַיְהִי עֹוֵן, *Ḳĕrê* עוֹיֵן, a denom. from עַיִן to eye). For the construction and Heb. parallels, see Driver, *in loc.* The meaning is to look on with envy (cf. *invidia*; and see the 'Evil Eye' under art. ENVY, and Trench, *NT Synonyms*, p. 106 f.), but there is no other example in English of the verb 'eye' in the sense of 'envy.'

J. HASTINGS.

EYE (עַיִן).—The eyes of Orientals are usually well formed, large, and lustrous, but deficient in that play of expression which accompanies thought, humour, and fancy.

As the chief of the organs of sense, the eye had a leading place in the *lex talionis*, 'eye for eye' (Ex 21^{24}). To put out the eyes of an enemy or prisoner was like breaking the teeth of a captured wild animal, the removal of the chief power to injure. It was also a great degradation (Jg 16^{21}, 1 S 11^{2}, 2 K 25^{7}). Among the begging classes of Palestine, blindness, next to the revolting spectacle of leprosy, makes the strongest claim upon the charity of the benevolent. Blind men are sometimes known to decline the offer of the medical missionary, as restored sight would mean a loss of privilege (see **Blindness** under MEDICINE).

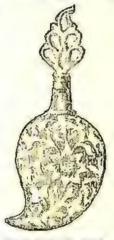
The fig. references to the eye are many and varied. As the chief means of contact with the outer world, the eye is the source of pleasurable sensations and the principal avenue of temptation (Gn 3^{6}, Pr 27^{20}, Ezk 24^{21}, 1 Jn 2^{16}). Knowledge is the opening of the eyes (Gn 3^{7}, Ps 119^{18}, Eph 1^{18}).

The prophet was first called the 'seer' (רֹאֶה) 1 S 9^{9}, and his message a 'vision' (חָזוֹן) Is 1^{1}, Ezk 7^{26} etc. In connexion with the feelings, sorrow is associated with a consumed or wasted eye (Ps 6^{7}), and satisfaction in worldly prosperity with an eye standing out with fatness (Ps 73^{7}).

Tear-bottles are often found in the ancient tombs, as affecting tokens of regret and grief. This memorial act may be referred to in Ps 56^{8} 'Put thou my tears into thy bottle.' (See BOTTLE.) To have the eyes delivered from tears takes rank with the deliverance of the soul from death and the feet from falling (Ps 116^{8}); to have all tears wiped from the eyes (Rev 21^{4}), is part of the riches in glory.

As a judge of what is pleasant or offensive, the eye indicates an intention of favour or hostility. Thus in an Arabic salutation, in answer to the opening inquiry as to health, the usual reply is, 'Well, by your looking upon me' (favour of your eye), and the conventional parry of politeness is to say, 'By God's looking upon you.' A similar thought of the eye's protective favour lies in the words *providence, episcopos, overseer*. On the other hand, there is the widespread and deeply-rooted superstition about the power of the evil-eye, and one of the chief uses of the amulet (wh. see) is to obtain protection against it.

The **Eyelids** (עַפְעַפַּיִם) are mentioned as a means of seduction employed by the 'evil woman' (Pr 6^{25}), and not infrequently appear in poetical language as a synonym for, or parallel with, the eyes (Job 16^{16}, Jer 9^{18}, Ps 11^{4} 132^{4}, Pr 6^{4} 30^{13}). By a beautiful metaphor in Job 3^{9} 41^{18} the first rays of dawn are called the 'eyelids of the morning.'



HORN FOR EYE-PAINT.

Eye-paint (פּוּךְ, Arab. *kuḥl*; cf. כָּחַל Ezk 23^{40}) was a paste made of antimony powder, giving a brown-black burnished stain to the eyelashes. The practice which is depicted on the monuments still continues in Egypt (see Lane, *Mod. Egypt.*^{5} i. 45 f.). The paint is kept in a small horn or ornamental metal vase with a thin rod for applying it. It makes the eyes look larger and more lustrous (2 K 9^{30}, Jer 4^{30}, Ezk 23^{40}). One of Job's daughters was called *Keren-happûkh*, 'horn of eye-paint' (Job 42^{14}).

The **Eye-salve** (κολλούριον, *collyrium*) of Rev 3^{18} was a preparation used for healing or strengthening the eye (of. Hor. *Sat.* i. 5. 30; Epict. *Diss.* ii. 21. 20, iii. 21. 21; Cels. vi. 6. 7). (See MEDICINE.)

G. M. MACKIE.

EYESERVICE.—This is a literal tr. in Eph 6^{6}, Col 3^{22} of the Greek ὀφθαλμοδουλεία, and seems to have been coined by Tindale, although he uses it only in Col, in Eph giving 'service in the eye sight.' The word was at once adopted into the language, Crowley (1550), *Last Trump*, 163, having 'Se thou serue him . . . not wyth eye-seruice fainedly.' The AV of 1611 is, however, the first Version that has eye service in Eph (it writes two separate words as all the Versions do in Col). The Greek word is found nowhere else: 'This happy expression,' says Lightfoot, 'would seem to be the apostle's own coinage.' J. HASTINGS.

EZBAI (אֶזְבַּי).—The father of Naarai, one of David's mighty men (1 Ch 11^{37}). The parallel passage 2 S 23^{35} reads 'Paarai the Arbite' (פַּעֲרַי הָאַרְבִּי) for 'Naarai the son of Ezbai' (נַעֲרַי בֶּן־אֶזְבָּי). It is impossible to decide with any confidence between the rival readings. (See Kittel's note on 1 Ch 11^{37} in Haupt's *Sacred Bks. of OT*).

J. A. SELBIE.

EZBON (אֶצְבֹּן, אֶצְבּוֹן).—1. Eponym of a Gadite family (Gn 46^{16}), called in Nu 26^{16} **Ozni** (which see). 2. A grandson of Benjamin (1 Ch 7^{7}). See GENEALOGY.

EZEKIAS.—1. (A Ἐζεκίας, B Ἐζείας, AV **Ezechias**) 1 Es 9^{14} = JAHZEIAH, Ezr 10^{15}. 2. (Ἐζεκίας, AV **Ezecias**) 1 Es 9^{43}.—Called HILKIAH, Neh 8^{4}.

EZEKIEL (Vulg. *Ezechiel*, LXX Ἰεζεκιήλ, Heb. יְחֶזְקֵאל 'God is strong,' or 'God strengthens'), the son of Buzi, was one of the temple priests who shared the exile of Jehoiachin in B.C. 597 (Ezk 1$^{2.3}$, cf. 2 K 24$^{14-16}$). His work as a prophet commenced in the fifth year of his banishment (1^{2}), and extended over a period of not less than 22 years (592–570); the latest date in the book being the 'seven and twentieth year' of his sojourn in Babylonia (29^{17}). This part of his life was spent (so far as appears) in a Jewish settlement at Tel-Abib (1^{1} 3^{15}), an unknown place near the 'river Chebar' (כְּבָר), which was probably a canal or a tributary of the Euphrates in the vicinity of Babylon,—certainly not the Ḥaboras (חָבוֹר 2 K 17^{6}) in N. Mesopotamia. The life of this colony of expatriated Jews is but dimly reflected in the pages of

Ezk; the picture is partly supplemented by the 29th ch. of Jer. Those carried captive were the *élite* of the nation; and they seem to have lived in tolerably easy circumstances, enjoying a large measure of freedom and self-government, forming a little world of their own, and cherishing a passionate interest in the concerns of their native land. They kept up by some means an active intercourse with Jerus.; and, in spite of intense mutual antipathy between them and the ruling classes at home, they never ceased to regard themselves as part and parcel of the Heb. nation, confidently expecting that some great political upheaval would speedily restore them to their old place at the head of the state. This delusion was fostered by the rise of prophets of the same type as Jeremiah's opponents in Jerus.,—an event which was hailed with immense satisfaction, not unmixed with surprise, by the exiled community (Jer 29^{15}). The false patriotism thus engendered threatened to bring down the heavy arm of Nebuchadnezzar on the captives, and Jer., though his sympathies were with the patrician exiles rather than with the people left in the land (Jer 24^{1-3}), endeavoured to allay the dangerous political excitement which blinded them to their true position. Altogether, it would seem that the main currents of feeling and opinion prevalent in Pal. were reproduced with remarkable fidelity in the community where E. was destined to labour.

Although little is known of E.'s previous life, it cannot be doubted that he found himself from the first in an uncongenial social atmosphere. In spite of the statement of Jos. (*Ant.* X. vi. 3, *παῖς ὤν*), he was probably no longer a young man when deported to Babylon. The meaning of 'the 30th year' in ch. 1^{1} is too obscure to throw light on the matter, but his familiarity with the technical details of the temple and its ritual seems to show that he had officiated for a considerable time in the national sanctuary. The numerous points of contact between him and Jer. would indicate that he had come early under the influence of that great prophet, and from the whole trend of his thinking it seems probable that he had belonged to the reforming party in the state, which sought to purify the national religion in accordance with the requirements of the Deuteronomic legislation. That party had been powerless since the death of Josiah, and it is reasonable to suppose that E.'s stern and even embittered attitude towards the people was in part the fruit of the years of reaction and disappointment spent under the reign of Jehoiakim. As we have seen, there was nothing in the state of mind of his fellow-exiles to draw him into sympathy with them, although he certainly agreed with Jer. in regarding them as superior to those left behind (11^{14-21}). Accordingly, at the time of his consecration as a prophet, he appears with his convictions matured as to the character of his countrymen and the reception he may expect at their hands (2. 3 *pass.*). They are, to use one of his stereotyped phrases, a 'rebellious house,' brazen-faced and stiff-hearted children, a people that refuse to hear J", separated from Him by a moral and spiritual barrier more formidable than that caused by a strange language ($2^{3.\ 4}$ 3^{5-7}). Although these facts are expressed in the form of divine communications to the prophet, they are not to be regarded as a new revelation of the disposition of his compatriots; they are rather the settled convictions of his life assuming definite shape in the light of his commission to speak the word of the Lord. They show, at all events, how fully he recognized the depth of the antagonism that prevailed between the prophetic conception of religion and the impulses that swayed the national mind both in Judæa and in Babylonia.

The actual circumstances of E.'s prophetic career are greatly obscured for us by the difficulty we have in separating what is real from what is merely imagined, in the representation given by the book. That everything did not happen literally as it is recorded, is evident enough from several indications. The symbolic actions described as performed by the prophet are in some instances incapable of a literal acceptation (see, *e.g.* $4^{5\text{ff.}}$ $5^{1\text{ff.}}$ 12^{18} etc.); yet there is no external criterion by which these can be distinguished from others which are possible. A similar uncertainty hangs over the events that are mentioned. These are never introduced for their own sake, but only as the setting of some idea which the writer wishes to enforce, and it is frequently impossible to determine how far the allusions correspond with actual experiences. In such incidents as the death of the prophet's wife ($24^{15\text{ff.}}$) or the opening of his mouth in the presence of 'the fugitive' (24^{27} 33^{22}), fact and symbolism seem to be so intimately blended that we cannot tell where the one ends and the other begins. The book, in short, is not an autobiography, but a systematic exposition of prophetic ideas, and any attempt to extract historical information from it has to be made with a certain measure of caution. At the same time, it is quite incredible that the whole representation should be nothing but an elaborate fiction, without any basis in fact. There can be no reasonable doubt that E. really exercised an oral public ministry amongst his fellow-captives, or that its main outlines may be gathered from the thin thread of narrative that runs through the book. His work was divided into two sharply contrasted periods by the overthrow of the Jewish state in the year 586; or, to speak more accurately, the first period ends with the commencement of the siege of Jerus. (Jan. 587, cf. 24^{1}), and the second opens with the reception in Babylon of the tidings of its fall (Jan. 585, cf. 33^{21}).* During the interval of two years, his public activity appears to have been suspended. Throughout the first period the almost exclusive theme of his preaching was the approaching destruction of Jerus., and the lessons of that event for the nation. His reiterated predictions of that inconceivable calamity made no impression on the mind of the exiles, and the prophet felt his energies cramped and paralyzed by the stolid incredulity which his message encountered. It is probable, however, that from the outset his character commanded respect; we read of visits paid to him in his own house by the 'elders' to inquire the word of the Lord (8^{1} 14^{1} 20^{1}), and there is no reason to dismiss these as dramatic inventions. Still less can we doubt the popularity of his public orations; for the picture of the people beguiling the tedium of their exile by listening to his fervid eloquence (33^{30-32}) is one of the notices which convey an irresistible impression of historical reality. In the second part of his career the tension between him and his hearers is greatly relaxed. The people were crushed by the terrible disaster that had befallen their nation, and the immediate effect was a feeling of despair expressed in such woeful utterances as those of 33^{10} 37^{11}. The prophet on his part adopts a more conciliatory attitude towards them, as he addresses himself to the task of setting forth the hopes and ideals on which the formation of a new Israel depended. The circle of his immediate auditors was probably widened at this time by the arrival of the new bands of captives from Judæa, amongst whom there must have been at least a few adherents of Jer., who would naturally rally round E. as the representative of their master's teaching. It has even been surmised that it was through this channel that E. first became acquainted with the writings of Jer., which have left so deep a mark on his thinking. This is unlikely, because it is hardly credible that he should have recast the substance of his oral prophecies under the literary influence of another prophet; and, moreover, he must have had abundant opportunity of knowing Jeremiah's teaching before his own captivity. But it must be admitted that with regard to all that took place after the fall of the city we are left almost entirely in the dark. There is but one allusion in the book to the relations between the earlier exiles and the later ($14^{22f.}$); and if it is at all coloured by the prophet's actual impressions after the event, it certainly does not encourage the notion that he found the new-comers hopeful material to work upon. It was probably not very long after the commencement of the second phase of his work that E. prepared the first written edition of his prophecies (see below). There is an interval of about 13 years (584–572) from which no prophecy is dated. What his occupations were during this period is of course unknown, but there are some signs that chs. 1–39 had been edited practically in their present form before the composition of 40–48. This last section may reveal the direction in which the prophet's thoughts had been moving in those years; and a still later oracle ($29^{17ff.}$) shows that he did not cease to be a close observer of public events.

---

* The MT gives as the date 'the 12th year' of Jehoiachin's captivity, *i.e.* 584. But it is hardly credible that the transmission of the news should have been delayed so long as 18 months, and hence the reading '11th year' found in the Syr. and some Heb. MSS is generally regarded as correct.

While the character of E.'s ministry does not differ essentially from that of his predecessors, it presents some exceptional features of a very instructive kind. The mere fact of his being an exile accounts for much that is peculiar in his method of working and his conception of his office. To say that he was no prophet at all, but merely a pastor exercising the cure of souls amongst those who came under his personal influence, is an exaggeration, but it is the exaggeration of a truth. His insistence on the independence of the individual soul before God (18. $33^{12ff.}$), and his comparison of himself to a watchman responsible for each person who perishes through not being warned of his danger ($3^{17ff.}$ $33^{1ff.}$), suggest that the care of the individual must have occupied a larger place in his work than was the case with the preexilic prophets. At a time when the unity of the nation was broken up, and the new kingdom of God had to be born in the hearts of those who embraced the hope set before them by the prophets, it was inevitable that a religious teacher should devote much of his attention to the conversion and spiritual direction of individuals. This, however, is a side of E.'s activity which does not directly come to light in the book; there are more subtle indications of the effect which his position as an exile had on his prophetic mission. It was by no means a matter of course, according to the ideas of the age, that prophecy could be transplanted to a foreign soil, and in reality it could not flourish there without losing some of its most characteristic functions. The older prophets had all more or less been religious politicians, in touch with the pulsations of a vigorous popular life, and bringing the word of God to bear directly on those national problems which arose out of the relation between J″ and the community of Israel. E.'s audience, on the other hand, was but a dismembered limb of the body politic; his political interests were remote and secondary, and the whole cast of his thinking betrays a sense of isolation from the main current of national life. This appears most clearly in his habit of treating the exiles as representatives of the larger Israel, with whose destinies he never ceased to concern himself. From the first he recognized that his mission had a double aspect: on the one hand he was sent to 'them of the Captivity'; and on the other hand he was a prophet to the whole house of Israel (cf. 3^{11} with 2^{3} 3^{4}). Thus he had two audiences, one real and present and the other ideal; and for the most part they are identified to such a degree that in addressing the exiles or their elders he fancies himself speaking to the idealized nation, whose members were then scattered far and wide over the world. It is an extension of the same tendency when he delivers imaginary discourses to those left in the land, or apostrophizes the mountains of Israel (6. 36), or exhibits the whole religious history of the people in elaborate allegories (16. 23), or even calls up from the past the vanished cities of Samaria and Sodom, and treats them as if they had a present existence, and a real interest in the unfolding of the divine purpose ($16^{46ff.}$ $23^{36ff.}$). It is obvious that oratory of this description comes very near being independent of an audience altogether; and some perception of this fact is perhaps revealed by the too facile appreciation which it received from the immediate hearers. And although E. never abandoned the practice of public speaking, it is undoubtedly the case that in his hands prophecy became far more of a literary occupation than it had hitherto been. A perusal of the book shows that it has been carefully planned with an eye to literary effect; and if the prophet had simply worked out his conceptions in the solitude of his chamber, the result would hardly have differed much from what we actually find. More than any of his predecessors he lives in a world of abstract ideas, which are more vividly real to his imagination than the circumstances of his everyday life; though now and then an echo from the outer world breaks in to remind us that after all he was no mere recluse, but a man of large experience, keenly observant of the life of his time. Several things, indeed, go to show that his intellectual interests reached far beyond the Jewish world in which he lived. His long and accurate enumeration of the natural and industrial products of different countries (27), exhibits a knowledge of contemporary commerce which is surprising in a Heb. prophet. It is probable also that he had gained some new impressions from his sojourn amidst the monuments of a strange civilization in the Euphrates valley. The conception of the cherubim in chs. 1. 10 appears to borrow some of its features from the composite animal figures of Babylonian art; and in other parts of the book some striking phraseological coincidences have been thought to suggest a direct influence of the cuneiform inscriptions (Müller, p. 56 ff.).

There is, however, another feature of E.'s work which cannot be wholly explained by the novelty of his position, and has sometimes been regarded as the result of abnormal physical states to which the prophet was subject. Amongst the most perplexing references in the book are those to a spell of 'dumbness,' which lay upon him from near the commencement of his ministry till the announcement of the fall of Jerus. (cf. $3^{26f.}$ 24^{27} 33^{22}). Closely akin to this is the representation of his being bound with ropes (3^{25}), and lying immovable for months together on one side or the other for a sign to the house of Israel, although at the same time performing actions which formed a necessary part of the sign ($4^{4ff.}$) There seems no strong reason why all these descriptions should not be treated as of a piece with the general symbolism which runs through the book. But to some recent interpreters they have suggested the theory that throughout the earlier part of his ministry E. laboured under nervous diseases of the most distressing kind, and utilized his symptoms as a means of impressing certain truths on the minds of his fellow-exiles. This view was first expounded, with great learning and ingenuity, by Klostermann, who found in E.'s condition all the marks of catalepsy, hemiplegia, alalia, hallucination, and so forth. It is difficult to believe that he has advanced the cause of sober and scientific interpretation of Scripture. The truth would seem to lie rather with those writers who regard these representations as imaginative symbols, interesting as illustrations of the prophet's mode of thought, but not answering to anything external in his life. The 'dumbness' is but a strong figure for the sense of restraint and defeat caused by the incredulity of the people, lasting till the prophet's authority was established by the fulfilment of his main prediction (cf. 29^{21}). So the actions of ch. 4 symbolize partly the siege of Jerus., and partly the captivity of the two branches of the house of Israel; and their meaning as signs is inconsistent with the supposition that they were exhibitions of a bodily malady, unless we are to assume a miracle, to which the history of OT prophecy furnishes no parallel. It is, of course, equally inconceivable that the signs should have been enacted in pantomime, either in presence of the people or in solitude; and the same remark applies to many others of the symbolic actions which are described. Except in so far as the suggestions may have originated in an ecstatic state of mind, they do not appear to differ from the ordinary operations of the fancy in bodying forth mental processes by means of sensible imagery.

The Book of Ezekiel (save for a somewhat corrupt text) exists in the form in which it left the hands of its author, differing in this respect from the two other great prophetical collections, which took shape through the labours of successive editors. Neither the unity nor the authenticity of Ezekiel has been questioned by more than a very small minority of scholars.* Not only does it bear the stamp of a single mind in its phraseology, its imagery, and its mode of thought, but it is arranged on a plan so perspicuous and so comprehensive that the evidence of literary design in the composition becomes altogether irresistible. Critics are divided as to the best principle of classification, some preferring a twofold, others a threefold or even a fourfold division; but all are agreed that the work falls into certain large sections intended to represent successive phases of Ezekiel's ministry. Within the general scheme the order is on the whole chronological, although it may be doubted how far the chronology is to be taken literally, or how far it is meant to separate different groups of oracles.

CONTENTS.—i. The first division (chs. 1–24) embraces about a half of the book, and corresponds to the first period of E.'s work, consisting almost exclusively of prophecies of judgment, such as he uttered before the destruction of Jerusalem. These have no doubt been considerably altered and amplified in the course of writing, and it is possible that here and there traces of a later point of view may be apparent. Minor sections are partly suggested by the dates prefixed to certain chapters (see 8^{1} 20^{1}); in other cases they can be recognized by internal indications. **1.** Chs. 1–3 describe the ecstatic experiences by which the prophet was prepared for his work, including, *first*, an elaborate description of the divine chariot which occupies so prominent a place in the book (cf. 3^{23} 8^{4} 43^{3}), and the glory of Him who sat on it (ch. 1); *second*, his commission to declare the word of God to Israel, his inspiration being set forth under the symbol of eating the roll of a book (chs. 2^{1}–3^{15}); *third* (after an interval of 7 days), a more precise definition of his office as that of a watchman to warn every individual of his danger (3^{16-21}); *lastly*, a second ecstasy, in which he receives the command to shut himself up within his house, and to appear in public only when charged with a special message to the people (3^{22-27}). It has been supposed that this last passage refers to a time considerably later than the inaugural vision, and marks the close of a tentative phase of the prophet's work, in which he sought to exercise the function of a public censor, until compelled to desist by the obstinate resistance of the community. It is more probable, however, that the verses merely express on its negative side the same conception of his office as is given in vv.$^{16-21}$; the prophet is a watchman, because the function of a 'reprover' is denied to him from the outset by his peculiar situation. **2.** In chs. 4–7 the fate of the city and nation is set forth, first, dramatically in a complicated series of symbols (4^{1}–5^{4}), then in three impassioned orations addressed to the city ($5^{5\text{ff.}}$), the land (6), and the people (7). In the signs of ch. 4 the prophet appears to represent simultaneously two facts—the siege of Jerus. and the captivity of the two branches of the Heb. nation. The time of Judah's exile is fixed as 40 years,—a round number for the period of Chaldæan supremacy,—that of N. Israel at 390 years in the MT, but 190 according to the LXX. Since the destruction of Samaria preceded that of Jerus. roughly speaking by a cent. and a half, and since both captivities terminate simultaneously, the latter figure must be accepted as the orig. reading. **3.** The next group of prophecies (chs. 8–11) is an account of a vision of the destruction of Jerus., which is important for the glimpses it gives into the state of things in the city at that time. After reciting the abominations practised in the temple (8), it describes, under symbols, the slaughter of the people (9), and the burning of the city (10), and ends with the departure of the Lord from the sanctuary, in token that city and temple were abandoned to their fate (11). The visionary form in which these truths are clothed is remarkable; the prophet falls into a trance in presence of the elders of Judah, the scenes mentioned pass before his inward eye, and he awakes with a special message of consolation to the exiles, who felt keenly the reproach of being cast out from J''s heritage. **4.** A new section begins with ch. 12, and extends apparently to the end of ch. 19. The fundamental theme is still the same, but the treatment of it is more discursive and theological. The author appears to have in view various false ideals to which the people clung, and which he seeks to demolish as obstacles to the reception of his message. Thus in 12^{1-20} 17. 19 he announces the fate of the king (Zedekiah), on whom the people naturally looked as the anointed of J" (cf. La 4^{20}), but who, by his perfidy to the king of Babylon (17), had brought ruin on himself and his kingdom. A certain sympathy with the misfortunes of the royal house is manifested by the beautiful dirge of ch. 19. Another section (12^{21}–14^{11}) deals with the wrong use of prophecy, and the existence of false prophets, as causes of the popular unbelief. Ch. 15 (Israel a charred and worthless vine branch) strikes a blow at the false patriotism which sustained the people's pride under their accumulated national calamities, and ch. 16 exhibits in an allegory the true character of Jerus. as the ungrateful and unfaithful spouse of J". Ch. 18 asserts the absolute righteousness of God in His dealings with individual men, and thus indirectly assails the prevalent doctrine of the solidarity of the nation, which had begotten a cynical temper of mind expressed by the proverb: 'the fathers have eaten sour grapes, and the children's teeth are blunted' (v.^{2}). But it must be admitted that this group of discourses hardly differs in general character from that which follows. **5.** The last division (chs. 20–24) contains three oracles (20. 22. 23) of the nature of formal arraignments of the people of Israel, in which the moral necessity of its destruction is shown from its past history and its present condition. The keynote of ch. 20 is found in the remarkable purpose attributed to the people, that they would assimilate themselves to the heathen, worshipping wood and stone (v.^{32}). It is impossible to say whether this refers to a particular current of opinion beginning to prevail among the exiles, or whether it is an expression of the spirit manifested by the nation at all times of its history. In either case the argument of the chapter is directed to show that the destinies of Israel had been determined by a power higher than its own natural proclivities,—namely, J"'s regard for the glory of His name,—and that that power would yet break the idolatrous tendencies of the nation, and make Israel to be in fact, as it was in name, the people of J". Ch. 22 is an enumeration of the religious and social corruptions prevalent in Jerus., now on the eve of its destruction; ch. 23 is an allegory, in the manner of ch. 16, exhibiting the immoralities of the two profligate sisters, **Ohola** (Samaria) and **Oholibah** (Jerus.). The two remaining discourses were composed under the immediate influence of contemporary events. Ch. 21 (containing the wild 'song of the sword,' vv.$^{14-21}$ [EV $^{9-17}$]) refers to the march of Nebuchadnezzar's army against Jerus. Ch. 24 records the dramatic close of the first period of E.'s activity. On the very day when the Chaldæans invested Jerus. he uttered a final oracle announcing its fate. The death of the prophet's wife on the evening of the same day becomes the occasion of a symbol of the despair and bewilderment that will seize on the exiles when they receive tidings of the fall of the city.

ii. The next eight chapters (25–32) consist of prophecies against the foreign nations (seven in number) lying immediately round the land of Canaan; viz. Ammon, Moab, Edom, and the Philistines (25), Tyre (26–28^{19}), Sidon (28^{20-26}), and Egypt (29–32).

---

* The chief exceptions are Zunz, who first (*Gottesdienstliche Vorträge der Juden*, 1832) assigned the book to the early Pers. period, and afterwards (*ZDMG* xxvii. 676 ff.) brought it down to the years 440–400 (the earlier view, however, is allowed to stand in the posthumous ed. of the *Vorträge*, 1892); Geiger (*Urschrift*, p. 23), who held a similar view; and Seinecke (*Gesch. d. V. Israel*, i. p. 138, 1876), who placed the author as late as B.C. 164–163.

The insertion of these oracles in this place is an instance of the constructive skill which planned the order of the book. They fill up the interval of silence which separates the two periods of E.'s public ministry; and although most of them no doubt belong chronologically to the two years of retirement, there are some which bear a later date (see 29^{17} $32^{1.17}$), showing that the principle of arrangement is literary and not historical. The section, moreover, embodies a distinct idea in the prophet's eschatological scheme. The motive of the judgments announced is to prepare the way for the restoration of Israel, by removing the evil influences which had sprung from the people's contact with its heathen neighbours in the past ($28^{24\text{-}26}$ 29^{16}). Historically, these judgments are conceived as taking place within the 40 years of the Chaldæan dominion (29^{13}), and of Israel's banishment. In the case of Tyre and Egypt, Nebuchadnezzar is expressly named as the instrument of J‴'s purpose; the extinction of the smaller nationalities is ascribed to other agencies, which, however, are probably indirect consequences of a Bab. invasion. The supplementary oracle on Tyre ($29^{17\text{-}21}$) was written after the 13 years' siege of that city by Nebuchadnezzar, and was evidently intended to counteract the impression produced by the non-fulfilment of the original prediction.

iii. Chs. 33–39 contain the discourses delivered in the period immediately succeeding the arrival of the 'fugitive' with the intelligence of Jerusalem's fall, when the prophet's mouth was again opened to declare the word of J″ ($33^{21\text{f.}}$). The collection is prefaced ($33^{1\text{-}20}$) by a re-statement of the function of the prophet under the figure of a watchman, as in $3^{17\text{ff.}}$; then comes the account of his meeting with the bearer of the evil tidings, and the oracles uttered (apparently) on that occasion ($33^{21\text{-}33}$). These are followed by three distinct and complete pictures of the redemption and restitution of Israel: (*a*) the ideal monarchy as contrasted with the corrupt administration of the pre-exilic kings (34); (*b*) the land, reclaimed from the Edomites, endowed with supernatural fertility, purified from its ceremonial defilement, shall be given as an eternal possession to Israel (35 f.); (*c*) the people, now scattered and dead like dry bones, shall arise to a new life, Ephraim and Judah being united under one sceptre for ever (37). Ch. 38 f. describe the final assault on the kingdom of God by the distant nations of the world under Gog from the land of Magog, and their annihilation on the mountains of Israel, resulting in a demonstration of the might of J″ to all the ends of the earth. This remarkable prophecy, representing the utmost limit of E.'s prophetic horizon, has the appearance of being intended as a conclusion to the hook. This fact, taken in connexion with the long period of silence which follows, and a certain change of view manifested in 40 ff., strongly suggests that the first edition of the prophecies really ended here, the remaining section having been added afterwards as an appendix.

iv. Chs. 40–48, a vision of the ideal theocracy, with the institutions by which the holiness of the redeemed people is to be expressed and maintained. There is, first, a description of the sanctuary where J″ is to dwell in visible splendour (40–43); then, regulations as to the ministers of the temple, the duties and revenues of the priests and the 'prince,' and the system of ritual to be observed (44–46); lastly, a delimitation of the holy land,—which is transformed by a miraculous river issuing from the sanctuary,—and a new disposition of the tribes within it (47 f.). Although these chapters may have been a later addition to the volume, they rest throughout on the teaching of the earlier part of the book, and are the development of principles there enunciated. The chief point of difference relates to the position of the prince, whose office is hedged about with constitutional safeguards and restrictions, hardly applicable to the perfect Ruler spoken of in ch. 34.

LITERARY STYLE.—The style of the book exhibits a falling off from the idiomatic purity of earlier writers, like Amos or Isaiah. The influence of Aramaic is more perceptible than in any previous prophet; the construction is loose, and, as a rule, prosaic; the constant recurrence of mannerisms and set phrases is at times monotonous, although the lack of variety is often compensated by a large rhythmic movement of the thought, running like a ground-swell through some of the longer orations. It is, on the whole, the careful and elaborate style of a literary man rather than that of a public speaker in living touch with his audience. With obscurity it cannot fairly be charged, for the serious difficulties which the book presents are mostly due to the imperfect condition of the text.

Of the higher qualities of E.'s genius the most striking is a powerful and grandiose imagination, which reveals itself in a variety of directions, now revelling in weird mythological conceptions (28. 32), and at other times clothing itself in the peculiar artificial realism which has been already remarked as a feature of the book. That there was a vein of true poetry in his nature is proved by his effective use of the *ḳînāh* or dirge (especially in the beautiful lament over the banished princes of the royal house, ch. 19), as well as by the many fine images which occur throughout the book. His first conceptions, indeed, are almost invariably beautiful and true, although to our minds their æsthetic effect is frequently lost through over-elaboration. E. is perhaps not more deficient in plastic power than Heb. writers generally; but in his case the defect is more apparent from his love of detail, and his anxiety to exhaust the didactic significance of every conception before he can persuade himself to let it go. Thus the comparison of Tyre to a stately vessel, moored by the shore (27), which Isaiah might have presented in a verse or two, is spread out over a long chapter by the help of an inventory of the ship's cargo, which is really a valuable statistical survey of Phœn. imports. Again, the image of Jerus. as a foundling child (16) is intrinsically as beautiful as any to be found in prophecy; but when drawn out into an allegory of the whole history of the nation, its unity is dissipated by the multitude of details that have to be crowded into it. A similar criticism has often been passed on his description of his opening vision, as contrasted with the sixth chapter of Isaiah. On the other hand, the prophet's talent for lucid and methodical exposition appears to advantage when he comes to deal with practical and technical matters, as in the description of the sanctuary (40 ff.) A certain architectonic faculty is, in truth, a marked characteristic of his intellect, being visible alike in his plan of the temple buildings, in his sketch of the theocratic institutions, and in the orderly arrangement and division of the book.

RELIGIOUS TEACHING.—E.'s rank as a religious teacher may be summed up under two general aspects. In the first place, he gave definite and almost dogmatic expression to the great religious truths which were the presuppositions of all previous prophecy, combining these into a comprehensive theory of the divine providence; and, in the second place, by giving a peculiar direction to the Messianic hope, he made it a practical ideal in the life of the nation, and the starting-point of a new religious development.

The first of these aspects is abundantly illustrated by the contents of chs. 1–39. While the substance of these chapters presents no single element which may not be traced in the writings of earlier prophets, there is none which does not receive a more distinct intellectual expression in the hands of Ezekiel. He is concerned to exhibit the immanent logic of the abstract principles involved in the relations between God and the world; and, as we read, the outlines of a grand theological system are gradually disclosed to the mind. Only a few outstanding features of this system can here be mentioned. 1. The prophet's idea of God, which is expressed by the visions in chs. 1. 8. 10. 43, has more of a transcendental character than that of his predecessors. Those divine attributes which we call metaphysical, expressing the relation of the Godhead to created existence as a whole, are emphasized more than by previous writers, and are those chiefly symbolized by the heavenly chariot of the visions. And this view of God enters deeply into the fibre of E.'s teaching. While he does not lose hold of the truth that J″ is a moral person having the attributes of anger, jealousy, pity, etc., he is never weary of insisting that the activity of the divine being must be self-centred, the supreme motive of all His dealings with men, whether in mercy or in judgment, being the manifestation of His own Godhead ('They shall know that I am J″'). It is easy to exaggerate this doctrine in a way that would misrepresent the prophet's meaning; but the reiterated assertion of it shows that it is a truth to which he himself attaches the utmost importance. 2. Another instance of the same tendency to rigorous and even extreme statement of a prophetic principle is found in his conception of Israel. In opposition to Hosea, Isaiah, and Jeremiah, he denies that there was any good time in the nation's past, tracing the idolatrous proclivities of the people back to the sojourn in the wilderness and the oppression in Egypt ($20^{8.\,24}$ 23^{2}). Thus, while all the prophets teach or assume that the relation between J″ and Israel rests on a free elective act of God, E. takes the further step of assigning as the positive ground of this relationship J″'s regard for the glory of His name in the eyes of the nations (20 *pass.*). 3. From this position an important consequence follows. Since the honour of J″ is historically identified with the destinies of Israel, the final disclosure of His divinity can be accomplished only by the restoration of this people to its own land, under conditions which reflect the holy nature of J″. E. is alive to the false impression of the God of Israel naturally produced on the heathen mind by the great national calamity of the Exile (36^{20}). This effect must be wiped out when the lesson of the history is complete (39^{23}). The same principle of the divine action which caused the temporary rejection of Israel becomes the guarantee of its ultimate redemption. The prophet is thus led to a conception of salvation in which everything depends on the sovereign irresistible grace of God, which breaks the stubborn heart of the people, and produces in them an abiding sense of shame and self-contempt, and bestows on them a new spirit, causing them to walk in His statutes and keep His judgments to do them (6^{9} 11^{19} 16^{63} 20^{43} $36^{26\text{ff.}}$ 37^{14} $39^{28\text{f.}}$). 4. The doctrine which is usually considered E.'s most distinctive contribution to theology is the doctrine of the freedom and responsibility of the individual soul before God. But even here he builds on the foundation laid by his predecessors. The conception of religion as personal fellowship between the individual and God is implicitly contained in the consciousness which all the prophets have of their own relation to J″; and in Jer the truth is enunciated that what had hitherto been the possession of the prophets is the form which the perfect religion must assume universally. It was reserved for E., however, to formulate the principle logically, showing that neither the burden of hereditary guilt nor the sins of a man's past can hinder the action of God's forgiving mercy towards the penitent sinner (18).

But the part of Ezekiel's work that was destined to have the most direct and powerful historical influence was the ideal embodied in the vision of chs. 40–48. The unique significance of that remarkable creation lies in the fact that under the form of a Messianic prophecy it presents the scheme of a politico-religious constitution in which the fundamental idea of holiness is applied to the regulation of every part of the national life. It is a picture of the kingdom of God in its final and perfect state as this prophet was led to conceive it. The ruling conception is that of J″ dwelling in visible glory in His sanctuary in the midst of His people, and the practical purpose of the vision is to set forth the conditions on Israel's part which such a relation involves. That the institutions prescribed are mainly of a priestly character is partly due to the fact that E. was himself a priest, deeply imbued with the traditions of his office; but still more to his perception of the inherent fitness of the priestly idea of holiness to be the formal principle of a theocratic polity giving expression to the essential character of Israel as the people of J″. How fully the ideal met the needs of the time is shown by its operation in all the best tendencies of the Restoration period. This is not the place to discuss the bearing of E.'s ideal legislation on the development of the pentateuchal laws (see HEXATEUCH). The view of most recent critics is that he occupies a position intermediate between the Book of Deut. and the composition of the so-called Priestly Code; and it can hardly be denied that the peculiar features of E.'s system are more fully explained on this theory than on any other (see esp. the regulations as to the status of the Levites, ch. 44). But, setting aside the purely critical question, the fact is clear that the whole movement by which the new Israel was consolidated proceeded on the lines foreshadowed in E.'s vision. His position in this respect may be compared with that of Augustine in the history of the Latin Church. What the *civitas Dei* was to mediæval Christendom, that the vision of E. was to post-exilic Judaism: each furnished the ideal that moulded the polity of the age that followed. To what extent this section of the Book of E. was adopted as a legislative programme by the leaders of the Return cannot be precisely determined from the somewhat meagre records at our disposal (see Smith, *OTJC*^{2} p. 442 f.) But it is important to observe that the Messianic hope as set forth by E. formed one of the most powerful impulses that made for the reconstruction of the Jewish state. We learn from Hag and Zec that the erection of the second temple was carried through under the conviction that that unpretentious edifice was to be the centre of a renovated world, and the earnest of the latter-day glory just about to dawn; while the expectation that the Lord would suddenly come to His temple meets us nearly a cent. later in the book of Malachi. These are conceptions which it would be difficult to understand otherwise than as consequences of the work of Ezekiel.

As compared with his master Jeremiah, or Is 40 ff., Ezekiel's teaching as a whole appears lacking in breadth of sympathy and evangelical freedom, and to be a preparation for an age of legalism rather than for the fulness of the Christian dispensation. He is not quoted expressly by any NT writer, and it is doubtful if he has directly influenced any except the author of the Apoc., who was familiar with the book and has drawn largely on its imagery. But while all this is true, there are many things in E. which give him a high place amongst the heralds of Christ in OT. His clear assertion of the value of the individual soul and of the efficacy of repentance, his profound sense of sin as ingratitude, and of the need of a new heart in order to fulfil the law of God, his impassioned vindication of the character of God as merciful and eager to forgive, are amongst the brightest gems of spiritual truth to be found in the pages of prophecy.

LITERARY HISTORY.—Of the literary history of the book little needs to be said. It is mentioned by the son of Sirach (49^{8}) in a connexion which shows that it formed part of the prophetical Canon in his time (*c.* B.C. 200). In the order given by the Talmudic treatise *Baba bathra* (14^{b}) it stands second amongst the greater prophets, being preceded by Jer and followed by Isaiah. A further statement in the same source that the book was written (like Dn, Est, and the Twelve Prophets) by 'the men of the Great Synagogue,' has no significance, unless it be an inference from the theory that no prophetic book could be written outside of the Holy Land (so Rashi, quoted by Ryle, *Canon of OT*, p. 263 f.). According to Jerome (*præfatio ad Ezech.*), certain parts of it were, on account of their obscurity, forbidden to be read by any Jew under the age of 30 years; and its deviations from the Mosaic Law caused doubts to be expressed as to its canonical authority as late as the 1st cent. A.D. According to one tradition, it narrowly escaped being 'hidden' (*i.e.* reduced to the rank of an apocryphal work) for this reason, but was saved from that fate by one Hananiah ben-Hezekiah, who reconciled the discrepancies. Unfortunately, the works of this self-sacrificing scholar have perished as completely as the 300 measures of oil which he is reported to have consumed in their preparation.

Brit.*^{9} J. SKINNER.

EZEL ([הָאֶבֶן] הָאֶזֶל '[stone of] departure').—The spot where Jonathan arranged to meet David before the latter's final departure from the court of Saul (1 S 20^{19}). The place is not mentioned elsewhere, and it is now generally admitted that the Heb. text of this passage is corrupt. The true reading seems to have been preserved by the LXX, which renders v.^{19} *καὶ καθήσῃ παρὰ τὸ Ἐργὰβ* (A, *ἔργον*) *ἐκεῖνο*, and again, at v.^{41} *end* (where the same place is mentioned), renders *καὶ Δαυεὶδ ἀνέστη ἀπὸ τοῦ ἀργὰβ* (A, *τοῦ ὕπνου*). The translators evidently had the same word before them in both verses, and did not understand it; they therefore simply transliterated the Hebrew. If, then, we restore from the LXX in v.^{19} הָאַרְגָּב הַלָּז (הַלָּאז) = 'yonder cairn,' for האבן האזל; and in v.^{41} מֵאֵצֶל הָאַרְגָּב = 'from beside the cairn,' for מאצל הנגב, the unknown 'Ezel' of v.^{19} disappears, and the indefinite terms of v.^{41} are replaced by a suitable reference to v.^{19} (so Thenius, Wellh., Driver, Budde; cf. W. R. Smith, *OTJC*^{2} 80 f.).

J. F. STENNING.

EZEM (עֶצֶם), 1 Ch 4^{29}.—See AZMON.

EZER.—**1.** (אֵצֶר) A Horite 'duke' (Gn 36^{21}, 1 Ch 1^{38}). In the latter passage AV has Ezar. **2.** (עֵזֶר) A son of Ephraim who, acc. to 1 Ch 7^{21}, was slain by the men of Gath. **3.** A Judahite (1 Ch 4^{4}). **4.** A Gadite chief who joined David (1 Ch 12^{9}). **5.** A son of Jeshua who helped to repair the wall (Neh 3^{19}). **6.** A priest who officiated at the dedication of the walls (Neh 12^{42}). J. A. SELBIE.

EZION-GEBER, עֶצְיוֹן גֶּבֶר, is mentioned amongst the stations of the Israelites (Nu 33^{35} and Dt 2^{8}). In the latter passage and elsewhere in the OT it is coupled with Elath in such a way as to imply that the one was in the immediate neighbourhood of the other. This circumstance enables us to fix the situation of Ezion-geber with tolerable confidence. It lay in the extreme south of the territory of Edom, at the head of the *Ælanitis Sinus* or Gulf of Akabah. Edom having been subjugated by David (2 S 8^{14}), Solomon naturally utilized E. for ship-building purposes, and made it the port for his navy, which was engaged in the gold trade with Ophir (1 K 9^{26}). His success encouraged Jehoshaphat to undertake a similar enterprise, but with disastrous results. 'Jehoshaphat made ships of Tarshish to go to Ophir for gold; but they went not, for the ships were broken at Ezion-geber' (1 K 22^{48} and 2 Ch 20$^{36.37}$). Ezion-geber is mentioned also by Josephus (*Ant.* VIII. vi. 4), who tells us that it was afterwards known by the name of Berenice. E. is prob. the modern *'Ain el-Ghudyan* (Robinson, i. 169 f.). See further, Driver on Dt 2^{8}.

EZNITE.—See ADINO.

EZORA (Ἐζωρά, AV Ozora).—The sons of Ezora, in 1 Es 9^{34}, take the place of the strange name Machnadebai (or Mabnadebai, AVm) in Ezr 10^{40}, where there is no indication of a fresh family. The first part of the phrase in Es (*ἐκ τῶν υἱῶν*), representing an original מבני, seems to show that the name in the canonical book is due to the running together of two or more words; it is, in any case, a proof that 1 Es is independent of the Greek Ezra, which has *Μαχαδναβού*.

H. ST. J. THACKERAY.

EZRA (עֶזְרָא).—**1.** The famous leader connected with Israel's Return. Our sources of information concerning him are Ezr 7–10, Neh 8–10, and the apocryphal books.* Some writers have preferred the apocr. 1 Esdras to the canonical Ezra, but on quite insufficient grounds.† The apocr. books are useful in showing the views held about Ezra at a later time, but we must in the main rely upon the canonical books.

E. is called the priest, the priest-scribe, and in 2 Es the prophet. He was of a priestly family, but, as his work was chiefly that of the scribe, that designation gradually supersedes the others. E. represents in a way the transition from the prophet to the scribe, but his prophetic functions are not conspicuous except in the apocr. literature.‡

The Exile had been a period of considerable literary activity. One of the greatest prophets heralded the deliverance of Cyrus (Deutero-Isaiah); Ezekiel had produced his book in Babylonia, drawing up an elaborate scheme for the new state, which he declared would arise upon the ruins of the old; and many noble psalms come from this time. But the period was characterized not so much by the creation of a new literature as by the study of what already existed. E. the 'ready scribe in the law of Moses' was not a mere copyist, nor the author of the law, but a diligent student of the law.

E. longed to go to Jerus. and put the law into effect there, to establish a real hagiocracy, 'the law' being the supreme authority in civil and religious affairs alike. Artaxerxes was not so tolerant of foreign religions as Cyrus had been, nevertheless E. won his goodwill, and secured a royal edict, clothing him with ample authority to carry out his purpose. This edict has been preserved in Aramaic (Ezr 7$^{12-26}$); and while many regard this as a Jewish version, it is in the main trustworthy.§ All Jews who felt so inclined were free to depart from Babylon; E. was authorized to carry the offerings for the temple made by the king and by the Jews; to purchase sacrificial animals, and to use the rest of the money as he and his brethren saw fit; to draw upon the royal treasury in the province of Syria for further necessary supplies; to exempt the temple officers and servants from the Persian tax; to appoint officers to execute the law of God, teaching such as were unacquainted with it; and to enforce the law of God and of the Persian king by penalty even to fines, imprisonment, banishment, or death.

In the year B.C. 458 E. gathered a caravan of some 1800 males, including 38 Levites who had been persuaded to join the company. E. had said so much to the king about God's ample protection to His servants that he was ashamed to ask for the usual escort. After fasting and praying for a safe journey, the company set out, and in four months reached the holy city.

§ See under art. EZRA-NEHEMIAH, BOOKS OF.

E. did not find a community ready and eager for the new government which he was authorized to establish. Many of the people were prosperous (Hag 1^{4}), but there was not that spirit of simple devotion to the God of Israel which the zealous E. regarded as essential. E. was informed that many Jews, including even priests and princes, had taken foreign wives. He knew the story of Solomon's decline (1 K 11); he perceived the danger now of a relapse into idolatry; above all, he feared the consequences of further disobedience of the law of God (Dt 7^{3}). Shecaniah, as the representative of the people who had been much moved by the prayer which E. poured forth in their presence (9$^{6-15}$), proposed that the people should put away the foreign wives and their children. E. accepted the proposition, and exacted an oath on the spot that the offenders would comply with this agreement. A decree was issued by the princes and elders that all the people should assemble at Jerus. within three days, under penalty of confiscation of goods and excommunication. But the assembly found the task too great to be accomplished in an open-air meeting during a severe winter storm, and the matter was referred to a divorce court, with E. at its head.[*] After three months' labour, and not without opposition apparently (Ezr 10^{15} RV),[†] the work of the court was finished, and many innocent women and children were cast out, as Hagar and Ishmael had been.

The account of E.'s formal institution of the law is found in Neh 8–10. Neh. had come to Jerus. in B.C. 444. His first work was the rebuilding of the walls. According to the compiler of Ezr-Neh (see further on the BOOKS OF EZR AND NEH), it was after this event that E. read the law to the people assembled at Jerus., and obtained their pledge to observe it. It is singular that E., who had brought the law to Jerus. for the purpose of making it the code of the community, should not have promulgated it sooner. It may be that Stade is right in supposing that E. had aroused the hostility of the people by the compulsory divorce, and that the times were not ripe before (*Gesch.* ii. 173 f.); or it may be that the chronology is not exact, as the compilation was made long after the events described, and the description of the reading of the law interrupts Nehemiah's narrative (cf. 7$^{4.5}$, 11$^{1.2}$).[‡]

On the second day's reading the people heard the directions for observing the feast of booths. Steps were taken at once to celebrate this feast, and the reading of the law was continued on each day of its observance. Two days later a great fast was held, the people separating themselves from strangers, and confessing their sin. E. gave utterance to a remarkable prayer,[§] praising God for His great goodness to Israel, deploring the apostasy and disobedience of the people, and tracing the past misfortunes of the nation, as well as their present condition of vassalage, to their great sins.[‖]

The relation of E. and Neh. is one of the perplexing problems of this period. Neh. in his memoirs mentions E. but once (12^{36}).[¶] In the E. portions of Neh, Nehemiah is mentioned but once (8^{9}).[**] There is scant justification for Ewald's statement that 'the chronicler unites these two men very closely in his representations' (*Hist.* v. 161). E. and Nehemiah were granted high authority in the Judæan colony, and that in the same sphere. Yet Nehemiah entirely ignores E.[*] Their purposes were different, it is true, one desiring to promote especially the religious welfare of the colony, the other the political; but among the Jews these spheres overlapped or rather interlaced at all points. It is probable that E.'s chief work in Jerus. was accomplished before Nehemiah's arrival.[†]

E. made a lasting impression upon the Jewish people. The development of the later Jewish life followed the lines laid down by him. This is due, not so much to his keen foresight in forecasting the future, as to the fact that his influence shaped Jewish life and thought in a way from which it never wholly departed. He gave the law an authority which it had never had before in Jewish history. This zeal was contagious, and accounts for that enthusiasm for the letter of the law which characterizes later ages.

LITERATURE.—Besides works referred to above, see *PRE*^{2} art. 'Esra und Nehemia'; *OTJC*^{2} p. 168; Wellhausen, *Hist. of Isr. and Jud.* 130 ff.; see also literature at end of foll. art.

2. The eponym of a priestly family which returned with Zerubbabel, Neh 12$^{1.13.33}$ = AZARIAH of Neh 10^{2}.

L. W. BATTEN.

EZRA AND NEHEMIAH, THE BOOKS OF.—There is much gain in treating these two books together. They present similar problems; they deal with the same period; they were originally one in the Jewish canon; and they were put into their present form by the same hand.

That Ezr-Neh constituted but one book in the early Jewish canon is indisputable. The Massoretes have appended notes to the end of each book of OT, stating the number of verses, etc. There are no such notes at the end of Ezr, but those at the end of Neh include both books: 'the book of Ezr contains 685 verses, and the middle verse is ובין עלית הפנה' (Neh 3^{32}). The Massoretic sections show that our two books were regarded as one, one section being Ezr 8^{35}–Neh 2^{1}.[‡] The twenty-two sacred books do not allow Neh to be reckoned as a separate book. The Talm., in giving the origin of the various books, says that 'Ezra wrote his book,' and does not mention Neh, manifestly including it with Ezr. In LXX the two are included under Esdras B in Swete's ed.; under Esdras A in the ed. of Lagarde.[§]

Ezr-Neh precedes Ch in the Heb. Bible, but follows it in the LXX. The illogical order of the Heb. has been attributed to the earlier acceptance of Ezr-Neh into the canon. It is by no means certain that the present Heb. order is original. The OT was divided into three portions. At the end of each portion the Massoretes placed notes similar to those found after the separate books. The notes on the Kethubim or Hagiographa are found at the end of Ezr-Neh, not at the end of Ch. Moreover, as Ezr-Neh is a continuation of Ch, and in its present form has come from the same hand, it is altogether unlikely that the original arrangement was so unmindful of chron. order.

A. CONTENTS.—A review of the following outline reveals the striking fact that Ezr-Neh is far from a complete history of the restoration. We find rather a short sketch of a few important events in that history. There are long periods,—one of more than a half-century (515 to 458),—about which our book is absolutely silent. The whole time covered by this book, from the return of the first exiles in 537 to the second visit of Neh. in 432 is more than a cent., but as a matter of fact the actual time covered by the narrative is scarcely more than one-tenth of this time.

I.—(1) Ezr 1–4^{5}.—The return of the first company of exiles; the register of the heads of houses; the setting up of the altar; the establishment of the sacrifices; the efforts to rebuild the temple, and the opposition of the Samaritans, B.C. 537. (2) Ezr 5, 6.—Stimulated by the prophets Hag. and Zec., the people begin the rebuilding of the temple under the lead of Zerubbabel and Joshua; their enemies try to stop the Jews, but Darius respects the decree of Cyrus, and the temple is completed in his sixth year, B.C. 515. (3) Ezr 7–10.—The return of Ezra and his company with a firman from Artaxerxes; the divorcing of the foreign wives, B.C. 458. (4) $4^{6\text{-}23}$.—Successful efforts of the enemies of Judah to prevent the rebuilding of the city walls, mainly in the reign of Artaxerxes Longimanus, B.C. 465–425.

II.—(1) Neh 1–7^{73a}.—Neh., learning of the bad condition of affairs in Jerus., obtains permission from Artaxerxes to go to Judah as its governor, and to rebuild its walls. He reaches Jerus., inspects the walls by night, organizes the people for the work, and, in spite of the vigorous opposition of the enemies of Judah, succeeds in fortifying the city by the complete reconstruction of its walls, B.C. 444. (2) 7^{73b}–10.—Ezra promulgates the law, and the people 'seal unto it,' B.C. 444. (3) 11^{1}–12^{26}.—Lists of those who dwelt in Jerus., and of the Levites who had come to Jerus. with Zerubbabel. (4) 12^{27}–13^{3}.—The dedication of the walls; regulation of the temple services, B.C. 443. (5) $13^{4\text{-}31}$. Nehemiah's second visit to Jerus., and the reforms accomplished at that time, B.C. 432.

B. SOURCES.—Modern criticism has shown that Heb. literature, like other Sem. literature,[*] is usually the result of compilation. No trained critical eye is required to see that the book under discussion has reached its present form by compilation from several different sources, and it is not difficult to analyze the book into its constituent elements, though it is not always possible to trace these elements back to their origin. In some cases we must be content with probabilities, and in others must confess ignorance. In the analysis of the book the results will be clearer if we follow an order which disregards the present arrangement of chapters.

The casual reader will not fail to notice that considerable portions, especially of Neh, are written in the first person. The 'I' refers to Ezra everywhere in Ezr, and to Nehemiah everywhere in Neh. The first person is used in Ezr 7^{27}–9^{15}, Neh 1^{1}–7^{73a} $12^{27\text{-}43}$ $13^{4\text{-}31}$. These are portions of memoirs written by Ezra and Neh. respectively. They are for the most part preserved in their original form. It is evident that considerable parts of the memoirs have been lost. Ezra's narrative has no proper beginning; he came to Jerus. to establish the law, but his own narrative tells us nothing about the accomplishment of this design. Neh.'s narrative breaks off abruptly; the sequel to 7^{5} is not found in his account; 13^{4} begins *in medias res*; 13^{6} must originally have had another connexion. But, imperfect as they are, these personal records of the two great leaders in the restoration of the Jewish state are of the greatest value. For convenience these memoirs will hereafter be designated by the symbols E and N respectively.[†]

The other portions dealing with the work of Ezra and Neh. are not original parts of their memoirs, though in part based on them. Ezr $7^{1\text{-}10}$ is an introduction to the story of Ezra written by the compiler. For Ezra is spoken of in the third person: the genealogy of Ezra omits his immediate ancestors, Seraiah, who is named as his father, having been put to death by Nebuchadnezzar in 586; Ezra would hardly have spoken of himself as 'an expert scribe'; this introduction anticipates matter found in E. (See further in Driver, *LOT*^{6} p. 549).

Ezr $7^{12\text{-}26}$ is the firman which Artaxerxes gave Ezra as his authority for governing the Jewish colony. V.^{11} is an introduction due to the compiler. The letter itself is in Aramaic, and held by many to be in its original form. Such a document would naturally be written in Aram., and the Jewish colouring, which is so apparent in the edict of Cyrus (Ezr $1^{2\text{-}5}$), is not conspicuous in this passage. Cornill's statement that 'in details it is of such specific Jewish colouring that it at least must have been strongly retouched,'[*] is not justified by facts; and Driver's, that 'it may have been cast into its present form by one familiar with the terminology of the Jewish sacred books,'[†] is quite consistent with the view that we have the orig. edict signed by the king, in the preparation of which it is not inconceivable that Ezra himself may have had a hand. At all events, its preservation was probably due to its incorporation by Ezra in his memoirs, for the thanksgiving with which E. begins is naturally connected with the royal edict.

Ezr 10 is the proper continuation of the preceding section of E, but Ezra is spoken of in the third person. All efforts to explain this change of person as due to Ezra have been hopeless failures.[‡] The force of the fact lies in the change taking place right in the middle of the narrative without any explicable cause. Moreover, we find one conspicuous anachronism: a room in the temple is called after Jehohanan, the son of Eliashib (10^{6}); but Eliashib was a prominent priest in 432 (Neh 12^{22} 13^{4}), and a room could not have been called his son's in 458.[§] Yet there are points of resemblance with E. The passage is probably a revision and abbreviation of E, the work of the compiler.

Neh 7^{73b}–10. Of this portion 9^{6}–10^{39} is regarded by Stade[‖] as an original portion of E. The prayer $9^{6\text{-}38}$ is suited to Ezra, and the words prefixed in the LXX 'and Ezra said' may be an original note of the compiler's to explain his extract from E. The remainder of the section, 7^{73b}–9^{5}, is usually accounted for in the same way as Ezr 10, to which it bears striking resemblance. There is room for grave doubt about the chronology.[¶] There is practically no guide except the position of the passage. A comparison of 7^{73} and Ezr 3^{1} shows that the compiler has made a false connexion of this passage with N, and he does not appear to have been an expert in chronology. The section took its present form long after the events described, so that confusion of order was easily possible. Sayce has pointed out that the names in Neh 10 are for the most part found also in Ezr 2.[**] He regards this section as the work of 'a layman,' and not a priest like Ezra, since he classes himself with 'the people' ($19^{32.\,37.\,38}$).[††]

Neh 11^{1}–12^{26} is made up of lists extracted from the temple registers, with explanatory notes by the compiler. Ch. 11 is closely connected with 7^{5}, and may be based on N. König says that ch. 11 'might indeed have been incorporated by Neh. into his writings,' but that $12^{1\text{-}26}$ 'on account of Jaddua (12^{22}) falls into the time of Alexander the Great.'[‡‡]

Neh 12^{44}–13^{3} cannot be from N, for it uses the expression 'in the days of Neh.' (12^{47}), as of a time long past. König admits that $12^{44\text{-}47}$ comes from a later hand, but holds that N begins with 13^{1} instead of 13^{4}, as most critics maintain. W. R. Smith, *OTJC*^{2} p. 427 n., suggests that $13^{1.\,2}$ originally stood between Ezr $10^{9.\,10}$.

There remains for consideration Ezr 1–6. Ch. 1 is very likely due to the compiler, though he may have used written sources. . . Vv.$^{1\text{-}3a}$ are found also in 2 Ch $36^{22f.}$ The differences are very slight, and are due to accident in copying, Vv.$^{2\text{-}4}$ contain the edict of Cyrus. From a comparison with the inscriptions of Cyrus,[*] it appears to be strongly coloured by Jewish ideas. Cyrus attributes his success to Merodach, not to J″.

2^{1}–3^{1a} is found also in Neh $7^{6\text{-}73}$. In the latter place it is appended to Nehemiah's memoirs with this preface: 'And I found the book of the genealogy of those who first came up: and I found written in it' (7^{5}). There are more than a hundred variations in the two versions. The numbers esp. differ oftener than they agree.[†] Such variation is always found in duplicates. Cf. Pss 14 and 53, Ps 18 and 2 S 22. This does not destroy identity of origin. It appears from the large number of such lists that the Jews were in the habit of keeping registers of important names. From such a register the Chronicler has incorporated the list into its present place. These lists have been but poorly preserved in the transmission of the original documents, as we find many errors wherever we have data to test them. This list was already a part of a narrative when copied by Neh., since both versions end with narrative. This ending in Ezr introduces the assembling at Jerus. for the setting up of the altar, in Neh the assembling for the promulgation of the law.

3^{1}–4^{5} is very generally assigned to the Chronicler (so Cornill, Schrader, Ryssel, Driver, etc. For the grounds of this see *LOT*^{6} 547 f.).

$4^{6f.}$ These are two fragments from unknown sources. They cannot be from the Chronicler, for they are out of joint with the context. V.^{6} contains a statement about an accusation made against the Jews in the beg. of the reign of Xerxes. There is no hint of this elsewhere. 4^{7} may have been placed here on the supposition that it was introductory to the passage following, but we shall see that this is not so. There is no reason, however, to doubt the genuineness or authenticity of these verses.

4^{8}–6^{18}. This passage is written in the Aram. language, and is a portion of a more or less complete history of these times written originally in Aramaic.[‡] The compiler, finding his best sources for this period in Aramaic, incorporated considerable portions without translation. In its present arrangement, however, the course of the history is very much obscured, as will be more fully pointed out below. The section falls into two parts, both of which present critical problems of considerable intricacy. For convenience these problems will be discussed in this connexion.

$4^{8\text{-}24}$. According to the present arrangement of our book, this part describes the securing of a decree from Artaxerxes to stop the rebuilding of the temple. But, as a matter of fact, the passage has nothing to do with the temple, and is evidently misplaced. According to 4^{7} Bishlam, Mithredath, Tabeel, and the rest of his companions 'wrote a letter to king Artaxerxes in Aramaic.' This letter is not the one found in the verses following, for that was written by Rehum the chancellor and Shimshai the scribe; moreover, the letter which begins with v.^{11} is overloaded with introductions in the Aram. passage vv.$^{8\text{-}10}$. Since Artaxerxes reigned from 465 to 425, this passage can have nothing to do with the times of Zerubbabel. The correction of Xerxes v.^{6} to Cambyses (reigning 529–522), and Artaxerxes to Gomates (pseudo-Smerdis),[§] is out of the question, since the contents agree with the date assigned in the text. The letter says that the Jews are rebuilding the rebellious and bad city, and have finished the walls, and repaired the foundations. It further declares that if this city is rebuilt and the walls finished, the Jews will rebel and refuse to pay tribute, 'and in the end it will endamage the king.' The building of the temple cannot be the point of attack, for that would not signify rebellion. If the temple were the matter at issue, the Jews would have appealed to the decree of Cyrus as they did later. The king's answer agrees with this view. He orders that this city be not built, until a decree shall be made by him, but makes no allusion to the temple. If a royal decree had been issued forbidding the rebuilding of the temple, the people would have had ample excuse for their neglect when Haggai reproaches them so sharply. . . Zerubbabel and Joshua would scarcely have ventured to renew the work on the temple with such a decree in force. Finally, Tattenai would not have failed to make use of such a good weapon if it had been at hand.

The passage refers to an attempt to rebuild the walls of the city, which must have occurred in the first part of the reign of Artaxerxes before the coming of Nehemiah. 'The Jews which have come up from thee' (^{12}) refers either to Ezra and his company, or to some other band concerning which the history is silent. V.^{24} does refer to the building of the temple, and is the effort of the compiler to harmonize the passage with the history with which he has erroneously connected it.[*]

5, 6. This section gives a consistent account of the rebuilding of the temple, but difficulties arise in its relation to ch. 3, and to Hag and Zec. In $3^{1\text{-}7}$ we are told that Joshua and Zerub. set up the altar soon after the arrival of the first pilgrims. The required sacrifices were at once started. Then the actual work of rebuilding the temple was begun ($3^{48ff.}$). The text is somewhat confused, but it is clear that the writer says that the foundations of the temple were laid at this time; see esp. v^{10} 'and the builders laid the foundation of the temple of J″.' The work thus begun was stopped by the adversaries, who 'weakened the hands of the people of Judah, and troubled them in building, and hired counsellors against them, to frustrate their purpose, all the days of Cyrus king of Persia, even until the reign of Darius king of Persia' ($4^{4.\,5}$).

Hag. and Zech., contemporary prophets under whose inspiration the work of rebuilding was taken up and carried to completion, give no hint anywhere that the temple building was but the resumption of a task already begun and laid aside with good reason. Hag. speaks of 'the house that lieth waste' ($1^{4.\,9}$); he attributes the unprosperous condition to the neglect of the temple; he denies the validity of the excuse that the time was not suitable. The unsuitableness of the time pleaded by the people does not refer to the hostility of their neighbours, but to their poverty. But some of this prophet's utterances go further. He says: 'Lay to heart from this day back to the time before one laid stone upon a stone in the temple of J″' (2^{15})—a time evidently within his recent experience. He gives the date upon which the foundation was laid in a prophecy delivered that very day; 'from this day forward, from the twenty-fourth day of the ninth month, from the day that the foundation of J‴s temple is laid' (2^{18}).

Zech. says: 'The hands of Zerub. have laid the foundation of this house: his hands shall also finish it' (4^{9}), referring to the laying of the foundation just accomplished. Two years later he said: 'Let your hands be strong, ye that hear in these days these words from the mouths of the prophets, which were in the day that the foundation of the temple of J″ of hosts was laid' (8^{9}). The prophets must have been Hag. and himself.

A large part of the letter sent to Darius is taken up with the defence of the Jews. They urge that they were only doing what Cyrus had authorized. Sheshbazzar had been appointed governor, and he came to Jerus., 'and laid the foundations of the house of God which is in Jerus.; and since that time even until now hath it been in building, and yet it is not completed' (Ezr 5^{16}). Hag 2^{3} shows the contempt for the new temple felt by those old men, who still remembered the glory of the temple of Solomon. We find the same feelings expressed in Ezr $3^{12.\,13}$. It seems impossible that these two passages do not refer to the same event.

In Ezr 5^{1} we read that 'Zerub. and Josh. stood up and began to build the house of God.' Nothing is said about completing a work begun before; the inference is plainly that a new task was taken up. The question of Tattenai in v.^{3}, 'Who gave you a decree to build this house?'[†] and his subsequent action imply not a resumption of a work which had been forcibly stopped, but the coming up of a new issue. The passage in 5^{16} already quoted, which may appear to harmonize with the resumption theory, does not do so, for it proves too much; its statement that the temple had been in process of building ever since the decree of Cyrus had been issued, is contrary to all that we know from other sources. It may be a sufficient explanation of this inaccuracy to note that it is contained in the letter, and Tattenai may have misunderstood the Jews, who might have said that from the time of Cyrus they had purposed to build the temple, but had not been able to do so. König holds that Ezr 3^{1}–4^{5} contains fragments which, by tradition, have been received into the original picture of the temple-building story. It is quite possible that we have here, in fact, poorly preserved fragments of an orig. Heb. account of the rebuilding of the temple. The passage would then be parallel with the Aram. section cc. 5, 6; and in that case the troublesome passage $4^{6\text{-}23}$ would not be seriously out of place; that is, it originally would have stood just before the beginning of the history of Ezra. Its present position would simply be further evidence of the limited critical insight of the compiler. For further discussion of this question, see König, *Einl.* p. 281 ff.; Driver, *LOT*^{6} p. 547 (where other references will be found); Benzinger, *Heb. Archäol.* p. 400.

---

[*] See *RP*, new ser. v. 144 ff.

[†] The sum-total in each case is the same, but varies by 12,000 from the sum of the detailed numbers. (See further Kuenen, *Rel. Isr.* ii. 178).

[‡] On Renan's view that the Aram. section is from the Targums, see *Expos. Times*, iv. 546.

[§] Ewald advocated this position, *Hist.*, Eng. tr. iv. 106.

[*] Sayce's view that v.^{24} properly follows v.^{5}, 'as indicated by the grammatical construction of the original Chaldee,' and that the whole passage is introduced here episodically, is quite untenable. See his *Introd.* p. 22.

[†] The words following 'and to finish this wall' do not support the view of an earlier work on the temple. אשרנא rendered 'wall' is a word of doubtful meaning. Kautzsch, *Gram. des Bib. Ar.* § 62, suggests the emendation אשיא 'foundations' as v^{16}. Bleek held that the word refers to the walls of the city, *Einl.*^{5} p. 207. Bertheau-Ryssel interprets after LXX the wooden framework for the building.

To this Aramaic portion a fragment is added in Hebrew, 6^{19-22}. It is peculiar in that it applies the term 'king of Assyria' to Darius. It may be due to the Chronicler, who felt the importance of the celebration of the Passover festival after the dedication of the new temple.

We have seen above that the books under consideration were originally one in the Jewish canon. The editor who put the material into its present shape undoubtedly left the book as a unit. This editor, however, found the process of compilation already begun. He did not find all the various sources scattered and independent, but they were already gathered in two main documents, the material having clustered about the stories of the two chief figures in the community. The last editor may have rearranged his sources acc. to his own ideas; he probably made additions from other sources, and we fear omitted portions which we should appreciate more than he did; certainly, he made additions from his own pen. The convincing evidence of the existence of two separate books before the last revision, is found in the presence of the duplicate lists Ezr 2 and Neh 7. The lists were already a fixed part of the narrative in which they are imbedded, so that the Chronicler could not omit either one without disjointing his narrative. The list may have been attached to N by Neh. himself, though it is more likely that a later hand, who felt the propriety of the connexion, is responsible for the addition. When the material was collected for the life of Ezra and the time preceding, the list was naturally placed where it properly belongs.

The first part of these books was undoubtedly the genuine memoirs E and N. To these, other material was added from time to time, to complete as far as possible the history of the restoration. It is highly probable that Neh 8–10, which we have seen reason to believe a revised edition of portions of E, was originally a part of the Bk. of Ezra, and was later transferred from chron. considerations. In the apocr. Esdras, which is preferred by some writers to the canonical Ezr,* a brief account of the promulgation of the law follows immediately the story of the great divorce (see 1 Es 9^{37}).

There can be little doubt that the final editor of Ezr-Neh was the author of the Bk. of Chronicles.† He gathered material, and prepared a history, written acc. to his own point of view from Adam to Nehemiah. His work was one long piece, Ezr-Neh being a part of Chronicles. But the latter had a considerable struggle to get into the canon. The Chronicler's novel treatment of the history, already covered by other books, did not win favour at once. But Ezr-Neh was the only source of information for the important period of the restoration. Moreover, the Chronicler's peculiar methods were not conspicuous in the later history. In fact, his Bk. of Chronicles is an attempt to read the conditions of the later times into the earlier. The later portion was therefore separated from the earlier, and found its place in the canon. In the separation, a few verses were retained in each part (Ezr 1^{1-3a}, 2 Ch $36^{22f.}$).

The hist. value of these books is very great; for they stand alone for an important epoch, and they contain documents of great importance. But all parts are not equally reliable. The Chronicler was not a discriminating critic. He uses his sources as if all were alike trustworthy. Naturally, E and N are the most reliable. The personal narrative of eye-witnesses and principal participants is of the highest value. Next in importance as hist. sources are the memoirs which have been worked over by the compiler, designated by Kautzsch *e* and *n*: *e* Ezr 10, Neh 8–10; *n* Neh 11^{3-35} (acc. to Kautzsch). Of great value also are the Aram. documents in Ezr 4^8–6^{18} 7^{12-23}. The other sources are too far corrupted from their original form to be of primary value.

Notwithstanding the inferior trustworthiness of some portions, and the incompleteness of the whole, it is possible with the aid of the prophetic and poetic literature of the period to form a tolerably clear and connected idea of the times.* If much is lacking which we should like to know, that is but common to all periods of history, and there is compensation in the preservation of precious original documents. The case would be different if the Chronicler had worked over the whole of E and N, so that we could only infer their existence, and if he had translated and revised the Aram. documents.

[Since the above was in type, the question of the credence due to the Chronicler's narrative and of the historicity of the Jews' Return under Cyrus has been discussed afresh by Kosters in the *ThT* (1897), 518 ff. See also the *Expos. Times*, viii. (1897), 71, 200, 268, 320, 351 (the last by Van Hoonacker), ix. 66.—EDITOR.]

L. W. BATTEN.

EZRAH (עֶזְרָה, AV Ezra).—A Judahite (1 Ch 4^{17}). See GENEALOGY.

EZRAHITE (אֶזְרָחִי, LXX Ἰσραηλείτης).—A name given to Heman in the title of Ps 88, and to Ethan in Ps 89. It is used also of Ethan in 1 K 4^{31}, where LXX (B) reads Ζαρείτης. It is best understood as=Zerachite, cf. 1 Ch 2^6, in which Ethan and Heman are termed sons of Zerah. A double tradition concerning Ps 88 appears to be embodied in the title; it is called a 'Psalm-song of the Korahites,' and 'a meditation by Heman the Ezrahite.' There were also a Heman and an Ethan, Merarites, of the tribe of Levi, according to 1 Ch 15^{17}; the Ezrahites belonged to the tribe of Judah.

W. T. DAVISON.

EZRI (עֶזְרִי).—David's superintendent of agriculture (1 Ch 27^{26}).

EZRIL (B Ἐζρείλ, A -ι-, AV Esril), 1 Es 9^{34}; AZAREL in Ezr 10^{41}.

[*] On the value of these books, see Ryle, *Ezra and Neh.* Introd. § 11.

F

FABLE is usually defined (with Dr. Johnson in his life of Gay) to be 'a narrative in which beings, irrational and sometimes inanimate, are, for the purposes of moral instruction, feigned to act and speak with human interests and passions'; and hence, as such beings do not present analogies to man in the spiritual region, it differs from other tropes (see ALLEGORY) in that its lessons are confined to the sphere of practical worldly prudence. Accepting this prevailing usage, we find (and the rarity is not surprising) but two instances of fable in sacred literature: (1) Jotham's fable of the trees choosing their king (Jg 9^{8-15}); and (2) the fable of the thistle and the cedar of Lebanon, in the answer of Jehoash to Amaziah (2 K 14^{9}). In neither of these cases, however, is the story described by any appellation. Indeed the word *fable* does not occur in the canonical OT, nor is μῦθος (its Apocr. and NT equivalent) certainly found in the LXX, except in Sir 20^{19} ('a man without grace is as a *tale* out of season'), where in the next verse παραβολή appears as the parallel, 'a wise saw.' The compound μυθόλογος, *author of fables*, is used in Bar 3^{23}; and here the parallel, *searcher out of understanding*, suggests a similar interpretation. Accordingly, we may conclude that the nearest approach in the OT to the idea of μῦθος is found in *māshāl*, the *dark saying*, *parable*, *proverb*, *adage*, in which Orientals clothed their deeper thoughts (Ps 49^{4} 78^{2}, Ezk 17^{2}), and which sometimes appears to stand for a *warning example* (Jer 24^{9} [Judah] 'a reproach and a *proverb*' παραβολή, LXX). This does not differ materially from the Homeric and almost purely poetical use of μῦθος,—found once or twice also in Plato,—from which the connotation of truth had not yet been entirely banished.

But in Greek prose, as a rule, and even occasionally in poetry as early as that of Pindar (*O.* 1. 47, *N.* 7. 34), μῦθος was the Latin *fabula*, connoting *fiction*, sometimes (in opposition to πλάσμα) spontaneously growing, as, in religious tradition, the *myth* of god or hero (Plato, *Legg.* 9. 865 D); sometimes deliberately composed, like Æsop's Fables (Plato, *Phæd.* 60 C), and then opposed to λόγος, the historic story, or to ἀλήθεια, actual fact (Plato, *Phæd.* 61 B; Aristot. *Hist. An.* 9. 12). It is to this usage that the NT μῦθος allies itself (1 Ti 1^{4} 4^{7}, 2 Ti 4^{4}, Tit 1^{14}, 2 P 1^{16}).

In 2 P 1^{16} the word apparently bears the general sense of *fiction*, 'what we tell you as to the power and coming of the Lord is not cunningly devised fiction, but sober truth.' But the *fables* referred to in the Pastoral Epp. as already endangering the soundness of the faith and the health of the churches in Ephesus and Crete, are of a special kind. They are 'Jewish' (Tit 1^{14}); they are 'profane and anile' 1 Ti 4^{7} (cf. Plat. *Rep.* 1. 350); they are connected with *genealogies*, 1 Ti 1^{4} (cf. Plato, *Tim.* 22 A, as to the offspring of Deucalion and Pyrrha), with *fightings about the law* (Tit 3^{9}) and with *commandments of men* (Tit 1^{14}). The two last expressions and the epithet *Jewish* find some explanation in the rigid asceticism of abstaining from meats and forbidding to marry (1 Ti 4^{3}), which was doubtless founded upon Jewish law, and was a characteristic of that side of Gnosticism which was afraid of matter, even as licence (Tit $1^{15.\,16}$) was the characteristic of that other side which affected to despise its power; the 'genealogies' remind us of the worship of angels at Colossæ (Col 2^{18}), and the Gnosticism which bridged the gulf between God and the world by means of angelic intermediaries generated from the *pleroma* and from one another; and when we read also elsewhere in these epistles of the 'gnosis falsely so-called' (1 Ti 6^{20}), of the 'resurrection past already' (2 Ti 2^{18}), of the 'enchanters' (2 Ti 3^{13}), and of the 'doctrines of demons' (1 Ti 4^{1}), we are irresistibly drawn towards the belief that the *fables* of these epistles are closely akin to the teachings of Ophite Gnosticism—that earliest Gnosticism of Asia Minor, which was a strikingly similar mixture of Jewish and heathen speculation, ritual, and practice. See GNOSTICISM.

LITERATURE.—Cremer, *Bib.-Theol. Lex.* s. μῦθος and γενεαλογία; Trench, *Parables*, p. 2; Goebel, *Parables of Jesus*, 6 ff.; Moore, *Judges*, 244 ff.; *Encyc. Brit.*9 and Smith, *DB*2 *s.v.*; and see ALLEGORY; on the 'fables' of Past. Epp. see Lightfoot, *Biblical Essays*, p. 411 ff.; (on the other side—that the heresy is simply Judaistic—Hort, *Judaistic Christianity*, Lect. 7).

J. MASSIE.

FACE is AV tr. of **1.** אַף, for which RV in several instances substitutes more exact renderings, such as 'nose' (Gn 24^{47}), 'nostrils' (Ezk 38^{18}). **2.** עַיִן, lit. 'eye' (*e.g.* Ex $10^{5.\,15}$, Nu 22^{5} 'the face of the earth'). RV rightly gives 'eyes' instead of 'face' in 1 K $20^{38.\,41}$, 2 K 9^{30}, Jer 4^{30}. **3.** פָּנִים very frequent both in a lit. and a metaphorical sense (*e.g.* עַל פְּנֵי 'upon the face of'). The shewbread (see BREAD, p. 318^{b}) was called לֶחֶם פָּנִים, lit. 'bread of the face, *i.e.* presence' (see next paragraph). With a personal pronoun 'my (thy, his, etc.) face' may be simply a circumlocution for 'me (thee, him,' etc.). Hence the substitution by RV of 'them' for 'their face' in Ex 14^{19}, and of 'thee' for 'thy face' in Gn 30^{33}, Dt 9^{3} 28^{7}. Conversely, in Jer 17^{16} AV has 'thee' and RV 'thy face.'

The face or countenance as the noblest part of the person was used to mean *presence*, and is often so translated. From the implied invitation or permission to approach (Est 4^{16}), it came to mean *favour*, *acceptance*. On the other hand, the withheld or averted face was equivalent to disapproval or rejection (Ps 13^{1} 27^{9} 88^{14} 143^{7} etc.). Such favour was called the light of the countenance, giving life and refreshment like that of the sun (Ps 89^{15} etc.). Among the Arabs, a fit of anger or the sudden effect of hearing bad news is called the darkening of the sky on the face. To 'respect persons' is generally נָשָׂא פָּנִים, but in Dt 1^{17} 16^{19}, Pr 24^{23} 28^{21} it is הִכִּיר פָּנִים, lit. to recognize the presence of one (*sc.* unjustly).

To spit in the face was the strongest possible expression of scorn and aversion (Nu 12^{14}, Dt 25^{9}, Job 30^{10}, Is 50^{6}, Mt 26^{67} 27^{30}, Mk 10^{34} 14^{65}, 15^{19}, Lk 18^{32}). In heated altercation, an Oriental often uses an ejaculation which means 'I spit in your face,' at the same time spitting on the ground at the feet of the person he is quarrelling with. Modesty, humility, worship, self-abasement, are expressed by the veils of women (Gn 24^{65}), the reverential shrouding of the face with the mantle (1 K 19^{13}), the wings with which the seraphim covered the face (Is 6^{2}), and the face bowed to the ground (Gn 42^{6} etc.). To have the face covered by another, as in the case of Haman (Est 7^{8}), was a sign of doom; the napkin drawn over the face and wound round the head was part of the covering of the dead (Jn 11^{44} 20^{7}).

G. M. MACKIE.

FACT.—A 'fact' (Lat. *factum*) is any act or deed, good or bad; and this was the commonest meaning of the word till about the beginning of the present century. Thus Spenser, *FQ* I. iv. 34—

> 'But, when the furious fit was overpast,
> His cruel facts he often would repent.'

Similarly Bunyan, *PP* (Clar. Pr. ed. p. 42), 'falling down upon his knees, he [Christian] asked God forgiveness for that his foolish fact.' So T. Adams, *II Peter* (Pur. Divines), p. 3, 'Theodosius excused a foul fact, because David had done the like.' This is the meaning in 2 K 10 (heading) 'Jehu by his letters causeth seventy of Ahab's children to be beheaded: he excuseth the fact by the prophecy of Elijah'; and 2 Mac 4^{36} 'Certain of the Greeks that abhorred the fact also' (Gr. *συμμισοπονηρούντων καὶ τῶν Ἑλλήνων*, RV 'the Greeks also joining with them in hatred of the wickedness.' This is the only example of *συμμ.*, though *μισοπονηρέω* is found 2 Mac 4^{49} [A *-εύω*] 8^{4}). The present use of 'fact' for something that has actually occurred, an undeniable truth, though quite classical for *factum*, and belonging to all the Romanic equivalents (Fr. *fait*, It. *fatto*, Sp. *hecho*), is not found in English before 1632.

J. HASTINGS.

FAIN is properly 'glad,' as Dyke, *Worthy Commun.* 56, 'Then full faine wilt thou be to have Christ Jesus receive thy soule'; or 'gladly,' as Jn 12^{21} Tind. 'Syr, we wolde fayne se Jesus.' But the commonest meaning has always been 'glad under the circumstances,' and that is its meaning in AV: Job 27^{22} 'he would fain flee out of his hand' (בָּרוֹחַ יִבְרָח, AVm 'in fleeing he would flee'): 1 Mac 6^{54} 'they were fain to disperse themselves' (*ἐσκορπίσθησαν*, RV 'they were scattered'); Lk 15^{16} 'he would fain have filled his belly with the husks that the swine did eat' (*ἐπεθύμει*). Cf. Shaks. *Lear*, IV. vii. 38—

> 'and wast thou fain, poor father,
> To hovel thee with swine, and rogues forlorn,
> In short and musty straw?'

From this the word easily slipped into the sense of 'obliged,' 'compelled,' as in *Pref.* to AV 'he was fain to make this answer, I cannot [read the book] for it is sealed'; Is 1^{7} Cov. 'Youre londe lieth waist . . . and ye must be fayne to stonde and loke upon it'; and Defoe, *Crusoe*: 'When the tide was out, I got most of the pieces of cable ashore, and some of the iron, though with infinite labour; for I was fain to go for it into the water, a work which fatigued me very much.'

To the three examples in AV, RV adds two: Lk 13^{31} 'Herod would fain kill thee' (*θέλει σε ἀποκτεῖναι*; AV 'will kill thee,' the trⁿ of all previous Eng. VSS [Wyc. 'will slay thee']); and Ac 26^{28} 'With but little persuasion thou wouldest fain make me a Christian' (*Ἐν ὀλίγῳ με πείθεις Χριστιανὸν ποιῆσαι*; AV 'Almost thou persuadest me to be a Christian,' following TR *γενέσθαι* for *ποιῆσαι*).

The reading, *ποιῆσαι* or *γενέσθαι*, is discussed in WH 'Select Readings,' *ad loc.* The best argument for *ποιῆσαι* is its difficulty: to simplify the construction, *γενέσθαι* may have been taken in from the next verse.

The translation is, on either reading, nearly impossible. The AV is a combination of the Geneva NT (1557), 'Almost thou persuadest me to become a Christian,' and the Bishops', 'Somwhat thou perswadest me to be a Christian.' But it gives an unknown sense to *ἐν ὀλίγῳ*, besides following the less probable *γενέσθαι*. The RV is new, and is got (1) by mentally supplying *πόνῳ* (?) 'labour' after *ἐν ὀλίγῳ*; (2) by translating *πείθεις* 'wouldest fain,' so as to bring out the sense, which it certainly has, of '*attempt* to persuade'; and (3) by supplying *ὥστε* before *ποιῆσαι*. It is adversely criticised by Field, *Otium Norv.* iii. *ad loc.* But Rendall, *Acts of Apos. in Greek and English* (1897), accepts it, rendering, 'At little cost thou wouldest fain persuade me to make me a Christian!' (The exclamation mark is intended to suggest the irony in Agrippa's voice).

J. HASTINGS.

FAINT.—From *feint* the ptcp. of Old Fr. *feindre* to feign, faint signified first 'feigned,' 'pretended,' as Earl Rivers, *Dictes*, 144, 'He that loueth the with feynt loue.' But it passed early into the sense of weak: whether (1) as a purely *physical* state, as Gn 25^{29} 'Esau came from the field, and he was faint' (עָיֵף, so 25^{30}, Dt 25^{18}, Jg $8^{4.5}$, Is 29^{8}; עיף 1 S $14^{28.31}$, 2 S 21^{15}; פִּגֵּר 1 S $30^{10.21}$; יָעֵף 2 S 16^{2}, Is 40^{29}; *ἐκλύομαι* 1 Mac 3^{17}); or (2) as chiefly *moral*, almost = 'cowardly,' * which occurs only in the phrase **faint-hearted**, Dt 20^{8} (רַךְ הַלֵּבָב, lit. 'soft-hearted'); Is 7^{4} (וּלְבָבְךָ אַל־יֵרַךְ, RV 'neither let thine heart be faint'), Jer 49^{23} (נָמֹגוּ, RV 'they are melted away'), Sir 4^{9} (*μὴ ὀλιγοψυχήσῃς*, so 7^{10}); or (3) as *spiritual*, through sorrow, Jer 8^{18}, La 1^{22} (both דַּוָּי) 1^{13} 5^{17} (both דָּוֶה), or calamity, Is 1^{5} (דַּוָּי).

The verb is derived from the adj. It is used in the foregoing senses, and also in the modern physical sense of 'swoon' (Dn 8^{27}, Ad. Est 15^{7}). **Faintness** is used physically in Ad. Est 15^{15} and spiritually in Lv 26^{36}.

J. HASTINGS.

FAIR.—1. *Beautiful*, as Sus v.^{2} 'a very fair woman' (*καλὴ σφόδρα*); Sir 24^{18} 'I am the mother of fair love' (*τῆς ἀγαπήσεως τῆς καλῆς*). So frequently in OT; but in NT only Ac 7^{20} [Moses] 'was exceeding fair' (*ἀστεῖος τῷ θεῷ*, lit. 'fair to God,' see under EXCEEDING. The adj. occurs also He 11^{23} and again of Moses; AV 'proper'; RV 'goodly,' the word in Ex 2^{2} where the Heb. is טוֹב 'good'). 2. *Unspotted*, Zec $3^{5\,bis}$ 'a fair mitre' (טָהוֹר). Cf. Pr. Bk. (1552) 'a fayre white lynnen clothe'; Ezk 1^{7} Cov. 'fayre scoured metall'; Wesley (1737), *Works*, i. 46, 'a paper book; all the leaves thereof were fair, except one.' Wyclif's tr. of Zec 3^{5} is (1382) 'a cleene cappe' (1388, 'a cleene mytre'); Douay, 'a cleane mitre.' Coverdale gives 'fair,' and the other VSS follow him. Amer. RV restores 'clean.' 3. *Plausible*, Gal 6^{12} 'to make a fair show' (*εὐπροσωπῆσαι*); elsewhere only of speech. In Sir 6^{5} 'fair speaking' is used in a good sense, 'a fair-speaking tongue will increase kind greetings' (*εὔλαλος*). The modern form 'fair-spoken' had also a good meaning once, as Capgrave (1460), *Chron.* 81, 'He was . . . fayre-spokyn, but he spak but seldam.'

In Ezk $27^{12\text{-}14.\,16.\,19.\,22\text{-}27}$ 'fairs,' *i.e.* markets, is used in AV (after Wyc. in v.^{12} and Geneva throughout) as tr. of Heb. עִזְבוֹנִים, which is evidently 'wares' as AV has it in v.^{33}, the only other occurrence of the word. RV gives 'wares' (wh. see) throughout.

J. HASTINGS.

FAIR HAVENS (*Καλοὶ Λιμένες*), one of the places mentioned in connexion with St. Paul's voyage to Rome (Ac $27^{8\text{-}12}$), is a small bay, two leagues E. of Cape Matala, on the S. coast of Crete. There does not seem to have been a town at the place, but there was one near it, called Lasea. Neither Fair Havens nor Lasea is mentioned in classical writings, but the former name survives in the modern Gr. dialect as *Λιμεῶνας Καλούς*, and archæological research has confirmed the identity of both places. It has been suggested that the name is euphemistic, and the fact that an attempt was made to reach Phœnix, the modern Lutro, a considerable distance W. along the coast, in the circumstances mentioned in Ac, adds emphasis to the statement that the haven was not commodious to winter in. On the other hand, it proved a welcome shelter to St. Paul and those who were with him, for a considerable time, at a most critical part of their voyage. The difference between Fair Havens and Phœnix was, that while the former was sheltered only from the N. and N.W. winds, the latter was 'the only secure harbour in all winds on the S. coast of Crete.'

W. MUIR.

FAIRS.—See FAIR, WARES.

---

* Cf. H. Smith, *Works*, ii. 219, 'The faint spies that went to the land of Canaan.'

FAITH.—I. THE PHILOLOGICAL EXPRESSION OF FAITH.—The verb 'to believe' in AV of OT uniformly represents the Heb. הֶאֱמִין, Hiph. of אָמַן, except, of course, in Dn 6^{23} where it represents the corresponding Aramaic form. The root, which is widely spread among the Semitic tongues, and which in the word 'Amen' has been adopted into every language spoken by Christian, Jew, or Mohammedan, seems everywhere to convey the fundamental ideas of 'fixedness, stability, steadfastness, reliability.' What the ultimate conception is which underlies these ideas remains somewhat doubtful, but it would appear to be rather that of 'holding' than that of 'supporting' (although this last is the sense adopted in *Oxf. Heb. Lex.*). In the simple species the verb receives both transitive and intransitive vocalization. With intransitive vocalization it means 'to be firm,' 'to be secure,' 'to be faithful,' and occurs in biblical Hebrew only in the past participle, designating those who are 'faithful' (2 S 20^{19}, Ps 12^{1} 31^{23}). With transitive vocalization it occurs in biblical Hebrew only in a very specialized application, conveying the idea, whether as participle or verbal noun, of 'caretaking' or 'nursing' (2 K $10^{1.5}$, Est 2^{7}, Ru 4^{16}, 2 S 4^{4}, Nu 11^{12}, Is 49^{23}, La 4^{5}; cf. 2 K 18^{16} 'pillars' and [the Niphal] Is 60^{4}), the implication in which seems to be that of 'holding,' 'bearing,' 'carrying.' The Niph. occurs once as the passive of transitive Qal (Is 60^{4}): elsewhere it is formed from intransitive Qal, and is used very much in the same sense. Whatever holds, is steady, or can be depended upon, whether a wall which securely holds a nail (Is $22^{23.25}$), or a brook which does not fail (Jer 15^{18}), or a kingdom which is firmly established (2 S 7^{16}), or an assertion which has been verified (Gn 42^{20}), or a covenant which endures for ever (Ps 89^{28}), or a heart found faithful (Neh 9^{8}), or a man who can be trusted (Neh 13^{13}), or God Himself who keeps covenant (Dt 7^{9}), is נֶאֱמָן. The Hiphil occurs in one passage in the primary physical sense of the root (Job 39^{24}). Elsewhere it bears constantly the sense of 'to trust,' weakening down to the simple 'to believe' (Ex 4^{31}, Ps 116^{10}, Is 7^{9} 28^{16}, Hab 1^{5}). Obviously it is a subjective causative, and expresses the acquisition or exhibition of the firmness, security, reliability, faithfulness which lies in the root-meaning of the verb, in or with respect to its object. The מַאֲמִין is therefore one whose state of mind is free from faintheartedness (Is 7^{9}) and anxious haste (Is 28^{16}), and who stays himself upon the object of his contemplation with confidence and trust. The implication seems to be, not so much that of a passive dependence as of a vigorous active commitment. He who, in the Hebrew sense, exercises faith, is secure, assured, confident (Dt 28^{66}, Job 24^{22}, Ps 27^{13}), and lays hold of the object of his confidence with firm trust.

The most common construction of הֶאֱמִין is with the preposition בְּ, and in this construction its fundamental meaning seems to be most fully expressed. It is probably never safe to represent this phrase by the simple 'believe'; the preposition rather introduces the person or thing in which one believes, or on which one believingly rests as on firm ground. This is true even when the object of the affection is a thing, whether divine words, commandments, or works (Ps 106^{12} 119^{66} 78^{32}), or some earthly force or good (Job 39^{12} 15^{31} 24^{22}, Dt 28^{66}). It is no less true when the object is a person, human (1 S 27^{12}, Pr 26^{25}, Jer 12^{6}, Mic 7^{5}) or superhuman (Job 4^{18} 15^{15}), or the representative of God, in whom therefore men should place their confidence (Ex 19^{9}, 2 Ch 20^{20}). It is above all true, however, when the object of the affection is God Himself, and that indifferently whether or not the special exercise of faith adverted to is rooted in a specific occasion (Gn 15^{6}, Ex 14^{31}, Nu 14^{11} 20^{12}, Dt 1^{32}, 2 K 17^{14}, 2 Ch 20^{20}, Ps 78^{22}, Jon 3^{5}). The weaker conception of 'believing' seems, on the other hand, to lie in the construction with the preposition לְ, which appears to introduce the person or thing, not on which one confidingly rests, but to the testimony of which one assentingly turns. This credence may be given by the simple to every untested word (Pr 14^{15}); it may be withheld until seeing takes the place of believing (1 K 10^{7}, 2 Ch 9^{6}); it is due to words of the Lord and of His messengers, as well as to the signs wrought by them (Ps 106^{24}, Is 53^{1}, Ex $4^{8.9}$). It may also be withheld from any human speaker (Gn 45^{26}, Ex $4^{1.8}$, Jer 40^{14}, 2 Ch 32^{15}), but is the right of God when He bears witness to His majesty or makes promises to His people (Is 43^{10}, Dt 9^{23}). In this weakened sense of the word the proposition believed is sometimes attached to it by the conjunction כִּי (Ex 4^{5}, Job 9^{16}, La 4^{12}). In its construction with the infinitive, however, its deeper meaning comes out more strongly (Jg 11^{20}, Job 15^{22}, Ps 27^{13}), and the same is true when the verb is used absolutely (Ex 4^{31}, Is 7^{9} 28^{16}, Ps 116^{10}, Job 29^{24}, Hab 1^{5}). In these constructions faith is evidently the assurance of things hoped for, the conviction of things not seen.

No hiphilate noun from this root occurs in OT. This circumstance need not in itself possess significance; the notions of 'faith' and 'faithfulness' lie close to one another, and are not uncommonly expressed by a single term (so πίστις, *fides*, faith). As a matter of fact, however, 'faith,' in its active sense, can barely be accounted an OT term. It occurs in AV of OT only twice: Dt 32^{20} where it represents the Heb. אֵמֻן, and Hab 2^{4} where it stands for the Heb. אֱמוּנָה; and it would seem to be really demanded in no passage but Hab 2^{4}. The very point of this passage, however, is the sharp contrast which is drawn between arrogant self-sufficiency and faithful dependence on God. The purpose of the verse is to give a reply to the prophet's inquiry as to God's righteous dealings with the Chaldæans. Since it is by faith that the righteous man lives, the arrogant Chaldæan, whose soul is puffed up and not straight within him, cannot but be destined to destruction. The whole drift of the broader context bears out this meaning; for throughout this prophecy the Chaldæan is ever exhibited as the type of insolent self-assertion ($1^{7.11.16}$), in contrast with which the righteous appear, certainly not as men of integrity and steadfast faithfulness, but as men who look in faith to God and trustingly depend upon His arm. The obvious reminiscence of Gn 15^{6} throws its weight into the same scale, to which may be added the consent of the Jewish expositors of the passage. Here we have, therefore, thrown into a clear light the contrasting characteristics of the wicked, typified by the Chaldæan, and of the righteous: of the one the fundamental trait is self-sufficiency; of the other, faith. This faith, which forms the distinctive feature of the righteous man, and by which he obtains life, is obviously no mere assent. It is a profound and abiding disposition, an ingrained attitude of mind and heart towards God which affects and gives character to all the activities. Here only the term occurs in OT; but on this its sole occurrence it rises to the full height of its most pregnant meaning.

The extreme rarity of the noun 'faith' in OT may prepare us to note that even the verb 'to believe' is far from common in it. In a religious application it occurs in only some thirteen OT books, and less than a score and a half times. The thing believed is sometimes a specific word or work of God (La 4^{12}, Hab 1^{5}), the fact of a divine revelation (Ex 4^{5}, Job 9^{16}), or the words or commandments of God in general (with בְּ Ps 106^{12} 119^{66}). In Ex 19^{9} and 2 Ch 20^{20} God's prophets are the object of His people's confidence. God Himself is the object to which they believingly turn, or on whom they rest in assured trust, in some eleven cases. In two of these it is to Him as a faithful witness that faith believingly turns (Dt 9^{23}, Is 43^{10}). In the remainder of them it is upon His very person that faith rests in assured confidence (Gn 15^6, Ex 14^{31}, Nu 14^{11} 20^{12}, Dt 1^{32}, 2 K 17^{14}, 2 Ch 20^{20}, Ps 78^{22}, Jon 3^5). It is in these instances, in which the construction is with ב, together with those in which the word is used absolutely (Ex 4^{31}, Is 7^9 28^{16}, Ps 116^{10}), to which may be added Ps 27^{13} where it is construed with the infinitive, that the conception of religious believing comes to its rights. The typical instance is, of course, the great word of Gn 15^6, 'And Abram believed in the LORD, and he counted it to him for righteousness'; in which all subsequent believers, Jewish and Christian alike, have found the primary example of faith. The object of Abram's faith, as here set forth, was not the promise which appears as the occasion of its exercise; what it rested on was God Himself, and that not merely as the giver of the promise here recorded, but as His servant's shield and exceeding great reward (16^1). It is therefore not the assensive but the fiducial element of faith which is here emphasized; in a word, the faith which Abram gave J″ when he 'put his trust in God' (*ἐπίστευσεν τῷ θεῷ*, LXX), was the same faith which later He sought in vain at the hands of His people (Nu 14^{11}, cf. Dt 1^{32}, 2 K 17^{14}), and the notion of which the Psalmist explains in the parallel, 'They believed not in God, and trusted not in his salvation' (Ps 78^{22}). To believe in God, in the OT sense, is thus not merely to assent to His word, but with firm and unwavering confidence to rest in security and trustfulness upon Him.

In the Greek of the LXX *πιστεύειν* takes its place as the regular rendering of הֶאֱמִין, and is very rarely set aside in favour of another word expressing trust (Pr 26^{25} *πείθεσθαι*). In a few cases, however, it is strengthened by composition with a preposition (Dt 1^{32}, Jg 11^{20}, 2 Ch 20^{20}, cf. Sir 1^{15} 2^{10} etc., 1 Mac 1^{30} 7^{16} etc., *ἐμπιστεύειν*; Mic 7^5, *καταπιστεύειν*); and in a few others it is construed with prepositions (*ἐν τινι*, Jer 12^6, Ps 78^{22}, Dn 6^{23}, 1 S 27^{12}, 2 Ch 20^{20}, Mic 7^5, Sir 35^{21}; *ἐπί τινα*, Is 28^{16} (?), 3 Mac 2^7; *ἐπί τινι*, Wis 12^2; *εἴς τινα*, Sir 38^{31}; *κατά τινα*, Job 4^{18} 15^{15} 24^{22}).

It was by being thus made the vehicle for expressing the high religious faith of OT that the word was prepared for its NT use. For it had the slightest possible connexion with religious faith in classical speech. Resting ultimately on a root with the fundamental sense of 'binding,' and standing in classical Greek as the common term for 'trusting,' 'putting faith in,' 'relying upon,' shading down into 'believing,' it was rather too strong a term for ordinary use of that ungenial relation to the gods which was characteristic of Greek thought, and which was substantively expressed by *πίστις*—the proper acknowledgment in thought and act of their existence and rights. For this *νομίζειν* was the usual term, and the relative strength of the two terms may be observed in their use in the opening sections of Xenophon's *Memorabilia* (I. i. 1 and 5), where Socrates is charged with not believing in the gods whom the city owned (*νομίζειν τοὺς θεούς*), but is affirmed to have stood in a much more intimate relation to them, to have trusted in them (*πιστεύειν τοῖς θεοῖς*). Something of the same depth of meaning may lurk in the exhortation of the Epinomis (980 C), *Πιστεύσας τοῖς θεοῖς εὔχου*. But ordinarily *πιστεύειν τοῖς θεοῖς* appears as the synonym of *νομίζειν τοὺς θεούς*, and imports merely the denial of atheism (Plut. *de Superst.* ii.; Arist. *Rhet.* ii. 17). It was only by its adoption by the writers of the LXX to express the faith of OT that it was fitted to take its place in NT as the standing designation of the attitude of the man of faith towards God.

This service the LXX could not perform for *πίστις* also, owing to the almost complete absence of the noun 'faith' in the active sense from OT; but it was due to a Hellenistic development on the basis of OT religion, and certainly not without influence from Gn 15^6 and Hab 2^4 that this term, too, was prepared for NT use. In classical Greek *πίστις* is applied to belief in the gods chiefly as implying that such belief rests rather on trust than on sight (Plut. *Mor.* 756 B). Though there is no suggestion in this of weakness of conviction (for *πίστις* expresses a strong conviction, and is therefore used in contrast with 'impressions'), yet the word, when referring to the gods, very rarely rises above intellectual conviction into its naturally more congenial region of moral trust (Soph. *Oed. Rex*, 146, 147). That this, its fuller and more characteristic meaning, should come to its rights in the religious sphere, it was necessary that it should be transferred into a new religious atmosphere. The usage of Philo bears witness that it thus came to its rights on the lips of the Greek-speaking Jews. It is going too far, to be sure, to say that Philo's usage of 'faith' is scarcely distinguishable from that of NT writers. The gulf that separates the two is very wide, and has not been inaptly described by saying that with Philo, faith, as the queen of the virtues, is the righteousness of the righteous man, while with St. Paul, as the abnegation of all claim to virtue, it is the righteousness of the unrighteous. But it is of the utmost significance that, in the pages of Philo, the conception is filled with a content which far transcends any usage of the word in heathen Greek, and which is a refraction of the religious conceptions of OT. Fundamental to his idea of it as the crowning virtue of the godly man, to be attained only with the supremest difficulty, especially by creatures akin to mortal things, is his conception of it as essentially a changeless, unwavering 'standing by God' (Dt 5^{31}), —binding us to God, to the exclusion of every other object of desire, and making us one with Him. It has lost that soteriological content which is the very heart of faith in OT; though there does not absolutely fail an occasional reference to God as Saviour, it is, with Philo, rather the Divinity, *τὸ ὄν*, upon which faith rests, than the God of grace and salvation; and it therefore stands with him, not at the beginning but at the end of the religious life. But we can perceive in the usage of Philo a development on Jewish ground of a use of the word *πίστις* to describe that complete detachment from earthly things, and that firm conviction of the reality and supreme significance of the things not seen, which underlies its whole NT use.

The disparity in the use of the terms 'faith' and 'believe' in the two Testaments is certainly in a formal aspect very great. In contrast with their extreme rarity in OT, they are both, though somewhat unevenly distributed and varying in relative frequency, distinctly characteristic of the whole NT language, and oddly enough occur about equally often (about 240 times each). The verb is lacking only in Col, Philem, 2 P, 2 and 3 Jn, and the Apocalypse; the noun only in the Gospel of John and 2 and 3 Jn: both fail only in 2 and 3 Jn. The noun predominates not only in the epistles of St. Paul, where the proportion is about three to one, and in St. James (about five to one), but very markedly in the Epistle to the Hebrews (about sixteen to one). In St. John, on the other hand, the verb is very frequent, while the noun occurs only once in 1 Jn and four times in the Apocalypse. In the other books the proportion between the two is less noteworthy, and may fairly be accounted accidental. In OT, again, 'faith' occurs in the active sense in but a single passage; in NT it is the passive sense which is rare. In OT in only about half the instances of its occurrence is the verb 'to believe' used in a religious sense; in NT it has become so clearly a technical religious term, that it occurs very rarely in any other sense. The transitive usage, in which it expresses entrusting something to someone, occurs a few times both in the active (Lk 16^{11}, Jn 2^{24}) and the passive (Rev 3^{2}, 1 Co 9^{17}, Gal 2^{7}, 1 Th 2^{4}, 1 Ti 1^{11}, Tit 1^{3}); but besides this special case there are very few instances in which the word does not express religious believing, possibly only the following: Jn 9^{18}, Ac 9^{26}, 1 Co 11^{18}, Mt $24^{23.\,26}$, Mk 13^{21}, 2 Th 2^{11}, cf. Ac 13^{41} 15^{11}, Jn 4^{21}, 1 Jn 4^{1}. The classical construction with the simple dative which prevails in the LXX retires in NT in favour of constructions with prepositions and the absolute use of the verb; the construction with the dative occurs about forty-five times, while that with prepositions occurs some sixty-three times, and the verb is used absolutely some ninety-three times.

When construed with the dative, *πιστεύειν* in NT prevailingly expresses believing assent, though ordinarily in a somewhat pregnant sense. When its object is a thing, it is usually the spoken (Lk 1^{20}, Jn 4^{50} 5^{47} 12^{38}, Ro 10^{16}, cf. 2 Th 2^{11}) or written (Jn 2^{22} 5^{47}, Ac 24^{14} 26^{27}) word of God; once it is divine works which should convince the onlooker of the divine mission of the worker (Jn 10^{38}). When its object is a person it is rarely another than God or Jesus (Mt $21^{25.\,32}$, Mk 11^{31}, Lk 20^{5}, Jn 5^{46}, Ac 8^{12}, 1 Jn 4^{1}), and more rarely God (Jn 5^{24}, Ac 16^{34} 27^{25}, Ro $4^{2\,(17)}$, Gal 3^{6}, Tit 3^{8}, Ja 2^{23}, 1 Jn 5^{10}) than Jesus (Jn 4^{21} $5^{38.\,46}$ 6^{30} $8^{31.\,45.\,46}$ $10^{37.\,38}$ 14^{11}, Ac 17^{8}, 2 Ti 1^{12}). Among these passages there are not lacking some, both when the object is a person and when it is a thing, in which the higher sense of devoted, believing trust is conveyed. In 1 Jn 3^{23}, for example, we are obviously to translate, not 'believe the name,' but 'believe in the name of his Son, Jesus Christ,' for in this is summed up the whole Godward side of Christian duty. So there is no reason to question that the words of Gn 15^{6} are adduced in Ro 4^{2}, Gal 3^{6}, Ja 2^{23} in the deep sense which they bear in OT text; and this deeper religious faith can scarcely be excluded from the belief in God adverted to in Ac 16^{34}, Tit 3^{8} (cf. Jn 5^{24}), or from the belief in Jesus adverted to in 2 Ti 1^{12} (cf. Jn 5^{38} 6^{30}), and is obviously the prominent conception in the faith of Crispus declared in Ac 18^{8}. The passive form of this construction occurs only twice—once of believing assent (2 Th 1^{10}), and once with the highest implications of confiding trust (1 Ti 3^{16}). The few passages in which the construction is with the accusative (Jn 11^{26}, Ac 13^{41}, 1 Co 11^{18} 13^{7}, 1 Jn 4^{16}) take their natural place along with the commoner usage with the dative, and need not express more than crediting, although over one or two of them there floats a shadow of a deeper implication. The same may be said of the cases of attraction in Ro 4^{17} and 10^{14}. And with these weaker constructions must be ranged also the passages, twenty in all (fourteen of which occur in the writings of St. John), in which what is believed is joined to the verb by the conjunction *ὅτι*. In a couple of these the matter believed scarcely rises into the religious sphere (Jn 9^{18}, Ac 9^{26}); in a couple more there is specific reference to prayer (Mk $11^{23.\,24}$); in yet a couple more it is general faith in God which is in mind (He 11^{6}, Ja 2^{19}). In the rest, what is believed is of immediately soteriological import—now the possession by Jesus of a special power (Mt 9^{28}), now the central fact of His saving work (Ro 10^{9}, 1 Th 4^{14}), now the very hinge of the Christian hope (Ro 6^{8}), but prevailingly the divine mission and personality of Jesus Himself (Jn 6^{69} 8^{24} $11^{27.\,42}$ 13^{19} 14^{10} $16^{27.\,30}$ $17^{8.\,21}$ 20^{31}, 1 Jn $5^{1.\,5}$). By their side we may recall also the rare construction with the infinitive (Ac 15^{11}, Ro 14^{2}).

When we advance to the constructions with prepositions, we enter a region in which the deeper sense of the word—that of firm, trustful reliance—comes to its full rights. The construction with *ἐν*, which is the most frequent of the constructions with prepositions in the LXX, retires almost out of use in NT; it occurs with certainty only in Mk 1^{15}, where the object of faith is 'the gospel,' though Jn 3^{15}, Eph 1^{13} may also be instances of it, where the object would be Christ. The implication of this construction would seem to be firm fixedness of confidence in its object. Scarcely more common is the parallel construction of *ἐπί* with the dative, expressive of steady, resting repose, reliance upon the object. Besides the quotation from Is 28^{16}, which appears alike in Ro 9^{33} 10^{11}, 1 P 2^{6}, this construction occurs only twice: Lk 24^{25}, where Jesus rebukes His followers for not 'believing on,' relying implicitly upon, all that the prophets have spoken; and 1 Ti 1^{16}, where we are declared to 'believe on' Jesus Christ unto salvation, *i.e.* to obtain salvation by relying upon Him for it. The constructions with prepositions governing the accusative, which involve an implication of 'moral motion, mental direction towards,' are more frequently used. That with *ἐπί*, indeed, occurs only seven times (four of which are in Ac). In two instances in Ro 4, where the reminiscence of the faith of Abraham gives colour to the language, the object on which faith is thus said relyingly to lay hold is God, described, however, as savingly working through Christ—as He that justifies the ungodly, He that raised Jesus our Lord from the dead. Elsewhere its object is Christ Himself. In Mt 27^{42} the Jewish leaders declare the terms on which they will become 'believers on' Jesus; in Ac 16^{31} this is the form that is given to the proclamation of salvation by faith in Christ—'turn with confident trust to Jesus Christ'; and appropriately, therefore, it is in this form of expression that those are designated who have savingly believed on Christ (Ac 9^{42} 11^{17} 22^{19}). The special NT construction, however, is that with *εἰς*, which occurs some forty-nine times, about four-fifths of which are Johannine and the remainder more or less Pauline. The object towards which faith is thus said to be reliantly directed is in one unique instance 'the witness which God hath witnessed concerning his Son' (1 Jn 5^{10}), where we may well believe that 'belief in the truth of the witness is carried on to personal belief in the object of the witness, that is, the Incarnate Son Himself.' Elsewhere the object believed on, in this construction, is always a person, and that very rarely God (Jn 14^{1}, cf. 1 Jn 5^{10}, and also 1 P 1^{21}, where, however, the true reading is probably *πιστοὺς εἰς θεόν*), and most commonly Christ (Mt 18^{6}, Jn 2^{11} $3^{16.\,18.\,36}$ 4^{39} $6^{29.\,35.\,40}$ $7^{5.\,31.\,38.\,39.\,48}$ 8^{30} $9^{35.\,36}$ 10^{42} $11^{25.\,25.\,45.\,48}$ $12^{11.\,37.\,42.\,44.\,44.\,46}$ $14^{1.\,12}$ 16^{9} 17^{20}, Ac 10^{43} 14^{23} 19^{4}, Ro $10^{14.\,14}$, Gal 2^{16}, Ph 1^{29}, 1 P 1^{8}, 1 Jn 5^{10}, cf. Jn 12^{36} 1^{12} 2^{23} 3^{18}, 1 Jn 5^{13}). A glance over these passages will bring clearly out the pregnancy of the meaning conveyed. It may be more of a question wherein the pregnancy resides. It is probably sufficient to find it in the sense conveyed by the verb itself, while the preposition adjoins only the person towards whom the strong feeling expressed by the verb is directed. In any event, what these passages express is 'an absolute transference of trust from ourselves to another,' a complete self-surrender to Christ.

Some confirmation of this explanation of the strong meaning of the phrase *πιστεύειν εἰς* may be derived from the very rich use of the verb absolutely, in a sense in no way inferior. Its absolute use is pretty evenly distributed through the NT, occurring 29 times in John, 23 times in Paul, 22 times in Acts, 15 times in the Synoptics, and once each in Hebrews, James, 1 Peter, and Jude; it is placed on the lips of Jesus some 18 times. In surprisingly few of these instances is it used of a non-religious act of crediting,—apparently only in our Lord's warning to His followers not to believe when men say '"Lo, here is the Christ," or "here"' (Mt $24^{23.26}$, Mk 13^{21}). In equally surprisingly few instances is it used of specific acts of faith in the religious sphere. Once it is used of assent given to a specific doctrine—that of the unity of God (Ja 2^{19}). Once it is used of believing prayer (Mt 21^{22}). Four times in a single chapter of John it is used of belief in a specific fact—the great fact central to Christianity of the resurrection of Christ (Jn $20^{8.25.29.29}$). It is used occasionally of belief in God's announced word (Lk 1^{45}, Ac 26^{27}), and occasionally also of the credit given to specific testimonies of Jesus, whether with reference to earthly or heavenly things (Jn $3^{12.12}$ 1^{50}, Lk 22^{67}), passing thence to general faith in the word of salvation (Lk $8^{12.12}$). Twice it is used of general soteriological faith in God (Jude ^{5}, Ro 4^{18}), and a few times, with the same pregnancy of implication, where the reference, whether to God or Christ, is more or less uncertain (Jn 1^{7}, Ro 4^{11}, 2 Co $4^{13.13}$). Ordinarily, however, it expresses soteriological faith directed to the person of Christ. In a few instances, to be sure, the immediate trust expressed is in the extraordinary power of Jesus for the performance of earthly effects (the so-called 'miracle faith'), as in Mt 8^{13}, Mk 5^{36} $9^{23.24}$, Lk 8^{50}, Jn 4^{48} 11^{40}; but the essential relation in which this faith stands to 'saving faith' is clearly exhibited in Jn 4^{48} compared with v.^{53} and 9^{38}, and Jn 11^{40} compared with v.^{15} and 12^{39}; and, in any case, these passages are insignificant in number when compared with the great array in which the reference is distinctly to saving faith in Christ (Mk 9^{42} 15^{32} [Jn 3^{15}], Jn 3^{18} $4^{41.42.53}$ 5^{44} $6^{36.47.64.64}$ 9^{38} $10^{25.26}$ 11^{15} 12^{39} 14^{29} 16^{31} 19^{35} 20^{31}, Ac 2^{44} $4^{4.32}$ 5^{14} 8^{13} 11^{21} $13^{12.39.48}$ 14^{1} $15^{5.7}$ $17^{12.34}$ $18^{8.27}$ $19^{2.18}$ $21^{20.25}$, Ro 1^{16} 3^{22} $10^{4.10}$ 13^{11} 15^{13}, 1 Co 1^{21} 3^{5} 14^{22} $15^{2.11}$, Gal 3^{22}, Eph $1^{13.19}$, 1 Th 1^{7} $2^{10.13}$, 2 Th 1^{10}, He 4^{3}, 1 P 2^{7}). A survey of these passages will show very clearly that in the NT 'to believe' is a technical term to express reliance on Christ for salvation. In a number of them, to be sure, the object of the believing spoken of is sufficiently defined by the context, but, without contextual indication of the object, enough remain to bear out this suggestion. Accordingly, a tendency is betrayed to use the simple participle very much as a verbal noun, with the meaning of 'Christian': in Mk 9^{42}, Ac 11^{21}, 1 Co 1^{21}, Eph $1^{13.19}$, 1 Th 1^{7} $2^{10.13}$ the participial construction is evident; it may be doubted, however, whether *οἱ πιστεύσαντες* is not used as a noun in such passages as Ac 2^{44} 4^{32}, 2 Th 1^{10}, He 4^{3}; and in Ac 5^{14} *πιστεύοντες* is perhaps generally recognized as used substantively. Before the disciples were called 'Christians' (Ac 11^{26}, cf. 26^{28}, 1 P 4^{16}) it would seem, then, that they were called 'believers,'—those who had turned to Christ in trusting reliance (*οἱ πιστεύσαντες*), or those who were resting on Christ in trusting reliance (*οἱ πιστεύοντες*); and that the undefined 'to believe' had come to mean to become or to be a Christian, that is, to turn to or rest on Christ in reliant trust. The occasional use of *οἱ πιστοί* in an equivalent sense (Ac 10^{45}, Eph 1^{1}, 1 Ti $4^{3.12}$, 1 P 1^{21}, Rev 17^{14}), for which the way was prepared by the comparatively frequent use of this adjective in the classically rare active sense (Jn 1^{27}, Ac 16^{1}, 1 Co 7^{14}, 2 Co 6^{15}, Gal 3^{9}, 1 Ti 4^{10} 5^{16} 6^{2}, Tit 1^{6}), adds weight to this conclusion; as do also the use of *ἄπιστοι* of 'unbelievers,' whether in the simple (1 Co 6^{6} 7^{12-15} 10^{27} 14^{22-24}, 1 Ti 5^{8}) or deepened sense (2 Co 4^{4} $6^{14f.}$, Tit 1^{15}, cf. Jn 20^{27}, Mt 17^{17}, Mk 9^{19}, Lk 9^{41}), and the related usage of the words *ἀπιστία* (Mk 9^{24} (16^{14}), Mt 13^{58}, Mk 6^{6}, Ro 4^{20} $11^{20.23}$, 1 Ti 1^{13}, He $3^{12.19}$), *ἀπιστέω* (Mk $16^{11(16)}$, Lk $24^{11.41}$, Ac 28^{24}, 1 P 2^{7}), and *ὀλιγόπιστος* (Mt 6^{30} 8^{26} 14^{31} 16^{8}, Lk 12^{28}), *ὀλιγοπιστία* (Mt 17^{20}).

The impression which is thus derived from the usage of *πιστεύειν* is only deepened by attending to that of *πίστις*. As already intimated, *πίστις* occurs in NT very rarely in its passive sense of 'faithfulness,' 'integrity' (Ro 3^{3} of God; Mt 23^{23}, Gal 5^{22}, Tit 2^{10}, of men; cf. 1 Ti 5^{12} 'a pledge'; Ac 17^{31} 'assurance'; others add 1 Ti 6^{11}, 2 Ti 2^{22} 3^{10}, Philem ^{5}). And nowhere in the multitude of its occurrences in its active sense is it applied to man's faith in man, but always to the religious trust that reposes on God, or Christ, or divine things. The specific object on which the trust rests is but seldom explicitly expressed. In some six of these instances it is a thing, but always something of the fullest soteriological significance—the gospel of Christ (Ph 1^{27}), the saving truth of God (2 Th 2^{13}), the working of God who raised Jesus from the dead (Col 2^{12}, cf. Ac 14^{9} 3^{16}), the name of Jesus (Ac 3^{16}), the blood of Jesus (Ro 3^{25}), the righteousness of Jesus (2 P 1^{1}). In as many more the object is God, and the conception is prevailingly that of general trust in God (Mk 11^{22}, Ro 14^{22}, 1 Th 1^{8}, He 6^{1}, 1 P 1^{21}, cf. Col 2^{12}). In most instances, however, the object is specified as Christ, and the faith is very pointedly soteriological (Ac 20^{21} 24^{24} 26^{18}, Gal $2^{16.16.20}$, Ro $3^{22.26}$, Gal $3^{22.26}$, Eph 1^{15} 3^{12} 4^{13}, Ph 3^{9}, Col 1^{4} 2^{5}, 1 Ti 1^{14} $3^{13.15}$, 2 Ti 1^{13} 3^{15}, Philem ^{5}, Ja 2^{1}, Rev 2^{13} 14^{12}). Its object is most frequently joined to *πίστις* as an objective genitive, a construction occurring some seventeen times, twelve of which fall in the writings of Paul. In four of them the genitive is that of the thing, viz. in Ph 1^{27} the gospel, in 2 Th 2^{13} the saving truth, in Col 2^{12} the almighty working of God, and in Ac 3^{16} the name of Jesus. In one of them it is God (Mk 11^{22}). The certainty that the genitive is that of object in these cases is decisive with reference to its nature in the remaining cases, in which Jesus Christ is set forth as the object on which faith rests (Ro $3^{22.26}$, Gal $2^{16.16.20}$ 3^{22}, Eph 3^{12} 4^{13}, Ph 3^{9}, Ja 2^{1}, Rev 2^{13} 14^{12}). Next most frequently its object is joined to faith by means of the preposition *ἐν* (9 times), by which it is set forth as the basis on which faith rests, or the sphere of its operation. In two of these instances the object is a thing—the blood or righteousness of Jesus (Ro 3^{25}, 2 P 1^{1}); in the rest it is Christ Himself who is presented as the ground of faith (Gal 3^{26}, Eph 1^{15}, Col 1^{4}, 1 Ti 1^{14} 3^{13}, 2 Ti 1^{13} 3^{15}). Somewhat less frequently (5 times) its object is joined to *πίστις* by means of the preposition *εἰς*, designating, apparently, merely the object with reference to which faith is exercised (cf. especially Ac 20^{21}); the object thus specified for faith is in one instance God (1 P 1^{21}), and in the others Christ (Ac 20^{21} 24^{24} 26^{18}, Col 2^{5}). By the side of this construction should doubtless be placed the two instances in which the preposition *πρός* is used, by which faith is said to look and adhere to God (1 Th 1^{8}) or to Christ (Philem ^{5}). And it is practically in the same sense that in a single instance God is joined to *πίστις* by means of the preposition *ἐπί* as the object to which it restingly turns. It would seem that the pregnant sense of *πίστις* as self-abandoning trust was so fixed in Christian speech that little was left to be expressed by the mode of its adjunction to its object.

Accordingly, the use of the word without specified object is vastly preponderant. In a few of such instances we may see a specific reference to the general confidence which informs believing prayer (Lk 18^{8}, Ja 1^{6} 5^{15}). In a somewhat greater number there is special reference to faith in Jesus as a worker of wonders—the so-called 'miracle faith' (Mt 8^{10} $9^{2. 22. 29}$ 15^{28} [17^{20}] [21^{21}], Mk 2^{5} 4^{40} 5^{34} 10^{52}, Lk 5^{20} 7^{9} $8^{25. 48}$ 17^{19} 18^{42}, Ac 3^{16} 14^{9})—although how little this faith can be regarded as non-soteriological the language of Mt 9^{2}, Mk 2^{5}, Lk 5^{20} shows, as well as the parallelism between Lk 7^{50} (cf. 8^{48} 17^{19}) and Mt 9^{22}, Mk 5^{34}. The immense mass of the passages in which the undefined *πίστις* occurs, however, are distinctly soteriological, and that indifferently whether its implied object be God or Christ. Its implied reference is indeed often extremely difficult to fix; though the passages in which it may, with some confidence, be referred to Christ are in number about double those in which it may, with like confidence, be referred to God. The degree of clearness with which an implied object is pointed to in the context varies, naturally, very greatly; but in a number of cases there is no direct hint of object in the context, but this is left to be supplied by the general knowledge of the reader. And this is as much as to say that *πίστις* is so used as to imply that it had already become a Christian technical term, which needed no further definition that it might convey its full sense of saving faith in Jesus Christ to the mind of every reader. This tendency to use it as practically a synonym for 'Christianity' comes out sharply in such a phrase as *οἱ ἐκ πίστεως* (Gal $3^{7. 9}$), which is obviously a paraphrase for 'believers.' A transitional form of the phrase meets us in Ro 3^{26}, *τὸν ἐκ πίστεως Ἰησοῦ*; that the *Ἰησοῦ* could fall away and leave the simple *οἱ ἐκ πίστεως* standing for the whole idea, is full of implications as to the sense which the simple undefined *πίστις* had acquired in the circles which looked to Jesus for salvation. The same implications underlie the so-called objective use of *πίστις* in the NT. That in such passages as Ac 6^{7}, Gal 1^{23} 3^{23} 6^{10}, Ph 1^{25}, Jude$^{3. 20}$ it conveys the idea of 'the Christian religion' appears plain on the face of the passages; and by their side can be placed such others as the following, which seem transitional to them, viz.: Ac 16^{5}, 1 Co 16^{13}, Col 1^{23}, 1 Ti 1^{19} $4^{1. 6}$ 5^{8}, Tit 1^{13}, and, at a slightly further remove, such others as Ac 13^{8}, Ro 1^{5} 16^{26}, Ph 1^{25}, 1 Ti 3^{9} $6^{10. 12}$, 2 Ti 3^{8} 4^{7}, Tit 1^{4} 3^{15}, 1 P 5^{9}. It is not necessary to suppose that *πίστις* is used in any of these passages as *doctrina fidei*; it seems possible to carry through them all the conception of '*subjective* faith conceived of *objectively* as a power,'—even through those in Jude and 1 Timothy, which are more commonly than any others interpreted as meaning *doctrina fidei*. But this generally admitted objectivizing of subjective faith makes *πίστις*, as truly as if it were understood as *doctrina fidei*, on the verge of which it in any case trembles, a synonym for 'the Christian religion.' It is only a question whether 'the Christian religion' is designated in it from the side of doctrine or life; though it be from the point of view of life, still 'the faith' has become a synonym for 'Christianity,' 'believers' for 'Christians,' 'to believe' for 'to become a Christian,' and we may trace a development by means of which *πίστις* has come to mean the religion which is marked by and consists essentially in 'believing.' That this development so rapidly took place is significant of much, and supplies a ready explanation of such passages as Gal $3^{23. 25}$, in which the phrases 'before the faith came' and 'now that faith is come' probably mean little more than before and after the advent of 'Christianity' into the world. On the ground of such a usage, we may at least re-affirm with increased confidence that the idea of 'faith' is conceived of in the NT as the characteristic idea of Christianity, and that it does not import mere 'belief' in an intellectual sense, but all that enters into an entire self-commitment of the soul to Jesus as the Son of God, the Saviour of the world.

II. THE HISTORICAL PRESENTATION OF FAITH.—It lies on the very surface of the NT that its writers were not conscious of a chasm between the fundamental principle of the religious life of the saints of the old covenant and the faith by which they themselves lived. To them, too, Abraham is the typical example of a true believer (Ro 4, Gal 3, He 11, Ja 2); and in their apprehension 'those who are of faith,' that is, 'Christians,' are by that very fact constituted Abraham's sons (Gal 3^{7}, Ro 4^{16}), and receive their blessing only along with that 'believer' (Gal 3^{9}) in the steps of whose faith it is that they are walking (Ro 4^{12}) when they believe on Him who raised Jesus our Lord from the dead (Ro 4^{24}). And not only Abraham, but the whole series of OT heroes are conceived by them to be examples of the same faith which was required of them 'unto the gaining of the soul' (He 11). Wrought in them by the same Spirit (2 Co 4^{13}), it produced in them the same fruits, and constituted them a 'cloud of witnesses' by whose testimony we should be stimulated to run our own race with like patience in dependence on Jesus, 'the author and finisher of our faith' (He 12^{2}). Nowhere is the demand of faith treated as a novelty of the new covenant, or is there a distinction drawn between the faith of the two covenants; everywhere the sense of continuity is prominent (Jn $5^{24. 46}$ $12^{38. 39. 44}$, 1 P 2^{6}), and the 'proclamation of faith' (Gal $3^{2. 5}$, Ro 10^{16}) is conceived as essentially one in both dispensations, under both of which the law reigns that 'the just shall live by his faith' (Hab 2^{4}, Ro 1^{17}, Gal 3^{11}, He 10^{38}). Nor do we need to penetrate beneath the surface of the OT to perceive the justice of this NT view. Despite the infrequency of the occurrence on its pages of the terms 'faith,' 'to believe,' the religion of the OT is obviously as fundamentally a religion of faith as is that of the NT. There is a sense, to be sure, in which all religion presupposes faith (He 11^{6}), and in this broad sense the religion of Israel, too, necessarily rested on faith. But the religion of Israel was a religion of faith in a far more specific sense than this; and that not merely because faith was more consciously its foundation, but because its very essence consisted in faith, and this faith was the same radical self-commitment to God, not merely as the highest good of the holy soul, but as the gracious Saviour of the sinner, which meets us as the characteristic feature of the religion of the NT. Between the faith of the two Testaments there exists, indeed, no further difference than that which the progress of the historical working out of redemption brought with it.

The hinge of OT religion from the very beginning turns on the facts of man's sin (Gn 3) and consequent unworthiness (Gn 3^{2-10}), and of God's grace (Gn 3^{15}) and consequent saving activity (Gn 3^{4} 4^{5} $6^{8. 13f.}$). This saving activity presents itself from the very beginning also under the form of promise or covenant, the radical idea of which is naturally faithfulness on the part of the promising God with the answering attitude of faith on the part of the receptive people. Face to face with a holy God, the sinner has no hope except in the free mercy of God, and can be authorized to trust in that mercy only by express assurance. Accordingly, the only cause of salvation is from the first the pitying love of God (Gn 3^{15} 8^{21}), which freely grants benefits to man; while on man's part there is never question of merit or of a strength by which he may prevail (1 S 2^{9}), but rather a constant sense of unworthiness (Gn 32^{10}), by virtue of which humility appears from the first as the keynote of OT piety. In the earlier portions of the OT, to be sure, there is little abstract statement of the ideas which ruled the hearts and lives of the servants of God. The essence of patriarchal religion is rather exhibited to us in action. But from the very beginning the distinctive feature of the life of the pious is that it is a life of faith, that its regulative principle is drawn, not from the earth but from above. Thus the first recorded human acts after the Fall—the naming of Eve, and the birth and naming of Cain—are expressive of trust in God's promise that, though men should die for their sins, yet man should not perish from the earth, but should triumph over the tempter; in a word, in the great promise of the Seed (Gn 3^{15}). Similarly, the whole story of the Flood is so ordered as to throw into relief, on the one hand, the free grace of God in His dealings with Noah (Gn $6^{8.\ 18}$ $8^{1.\ 21}$ 9^{8}), and, on the other, the determination of Noah's whole life by trust in God and His promises (Gn 6^{22} 7^{5} 9^{20}). The open declaration of the faith-principle of Abraham's life (Gn 15^{6}) only puts into words, in the case of him who stands at the root of Israel's whole national and religious existence, what not only might also be said of all the patriarchs, but what actually is most distinctly said both of Abraham and of them through the medium of their recorded history. The entire patriarchal narrative is set forth with the design and effect of exhibiting the life of the servants of God as a life of faith, and it is just by the fact of their implicit self-commitment to God that throughout the narrative the servants of God are differentiated from others. This does not mean, of course, that with them faith took the place of obedience: an entire self-commitment to God which did not show itself in obedience to Him would be self-contradictory, and the testing of faith by obedience is therefore a marked feature of the patriarchal narrative. But it does mean that faith was with them the precondition of all obedience. The patriarchal religion is essentially a religion, not of law but of promise, and therefore not primarily of obedience but of trust; the holy walk is characteristic of God's servants (Gn $5^{22.\ 24}$ 6^{9} 17^{1} 24^{40} 48^{15}), but it is characteristically described as a walk 'with God'; its peculiarity consisted precisely in the ordering of life by entire trust in God, and it expressed itself in conduct growing out of this trust (Gn 3^{20} 4^{1} 6^{22} 7^{5} 8^{18} 12^{4} 17^{23} $21^{12.\ 16}$ 22). The righteousness of the patriarchal age was thus but the manifestation in life of an entire self-commitment to God, in unwavering trust in His promises.

The piety of the OT thus began with faith. And though, when the stage of the law was reached, the emphasis might seem to be thrown rather on the obedience of faith, what has been called 'faith in action,' yet the giving of the law does not mark a fundamental change in the religion of Israel, but only a new stage in its orderly development. The law-giving was not a setting aside of the religion of promise, but an incident in its history; and the law given was not a code of jurisprudence for the world's government, but a body of household ordinances for the regulation of God's family. It is therefore itself grounded upon the promise, and it grounds the whole religious life of Israel in the grace of the covenant God (Ex 20^{2}). It is only because Israel are the children of God, and God has sanctified them unto Himself and chosen them to be a peculiar people unto Him (Dt 14^{1}), that He proceeds to frame them by His law for His especial treasure (Ex 19^{5}; cf. Tit 2^{14}). Faith, therefore, does not appear as one of the precepts of the law, nor as a virtue superior to its precepts, nor yet as a substitute for keeping them; it rather lies behind the law as its presupposition. Accordingly, in the history of the giving of the law, faith is expressly emphasized as the presupposition of the whole relation existing between Israel and J″. The signs by which Moses was accredited, and all J″'s deeds of power, had as their design (Ex 3^{12} $4^{1.\ 5.\ 8.\ 9}$ $19^{4.\ 9}$) and their effect (Ex 4^{31} $12^{28.\ 34}$ 14^{31} $24^{3.\ 7}$, Ps 106^{12}) the working of faith in the people; and their subsequent unbelief is treated as the deepest crime they could commit (Nu 14^{11}, Dt 1^{32} 9^{23}, Ps $78^{22.\ 32}$ 106^{24}), as is even momentary failure of faith on the part of their leaders (Nu 20^{12}). It is only as a consequent of the relation of the people to Him, instituted by grace on His part and by faith on theirs, that J″ proceeds to carry out His gracious purposes for them, delivering them from bondage, giving them a law for the regulation of their lives, and framing them in the promised land into a kingdom of priests and a holy nation. In other words, it is a precondition of the law that Israel's life is not of the earth, but is hid with God, and is therefore to be ordered by His precepts. Its design was, therefore, not to provide a means by which man might come into relation with J″, but to publish the mode of life incumbent on those who stand in the relation of children to J″; and it is therefore that the book of the law was commanded to be put by the side of the ark of the covenant of the LORD, that it might be a witness against the transgressions of Israel (Dt 31^{26}).

The effect of the law was consonant with its design. Many, no doubt, looked upon it in a purely legalistic spirit, and sought, by scrupulous fulfilment of it as a body of external precepts, to lay the foundation of a claim on God in behalf of the nation or the individual, or to realize through it, as a present possession, that salvation which was ever represented as something future. But, just in proportion as its spirituality and inwardness were felt, it operated to deepen in Israel the sense of shortcoming and sin, and to sharpen the conviction that from the grace of God alone could salvation be expected. This humble frame of conscious dependence on God was met by a twofold proclamation. On the one hand, the eyes of God's people were directed more longingly towards the future, and, in contrast with the present failure of Israel to realize the ordinances of life which had been given it, a new dispensation of grace was promised in which the law of God's kingdom should be written upon the heart, and should become therefore the instinctive law of life of His people (Jer 24^{7} $31^{31\text{f.}}$, Ezk $36^{25\text{f.}}$; cf. Ezk 16^{60}, Jl 3, Hos $2^{9\text{f.}}$). It lay in the very nature of the OT dispensation, in which the revelation of God was always incomplete, the still unsolved enigmas of life numerous, the work of redemption unfinished, and the consummation of the kingdom ever yet to come, that the eyes of the saints should be set upon the future; and these deficiencies were felt very early. But it also lay, in the nature of the case, that the sense of them should increase as time passed and the perfecting of Israel was delayed, and especially as the whole national and religious existence of Israel was more and more put in jeopardy by assaults from without and corruption from within. The essence of piety came thus to be ever more plainly proclaimed as consisting in such a confident trust in the God of salvation as could not be confounded either by the unrighteousness which reigned in Israel or by J″'s judgments on Israel's sins,—such a confidence as, even in the face of the destruction of the theocracy itself, could preserve, in enduring hope, the assurance of the ultimate realization of God's purposes of good to Israel and the establishment of the everlasting kingdom. Thus hopeful waiting upon J″ became more and more the centre of Israelitish piety, and J″ became before all 'the Hope of Israel' (Jer 14^{8} 17^{13} 50^{7}, cf. Ps 71^{5}). On the other hand, while thus waiting for the salvation of Israel, the saint must needs stay himself on God (Is 26^{3} 50^{10}), fixing his heart on J″ as the Rock of the heart (Ps 73^{26}), His people's strength (Ps 46^{1}) and trust (Ps 40^{4} 65^{5} 71^{5}, Jer 17^{7}). Freed from all illusion of earthly help, and most of all from all self-confidence, he is meanwhile to live by faith (Hab 2^{4}). Thus, along with an ever more richly expressed corporate hope, there is found also an ever more richly expressed individual trust, which finds natural utterance through an ample body of synonyms bringing out severally the various sides of that perfect commitment to God that constitutes the essence of faith. Thus we read much of trusting in, on, to God, or in His word, His name, His mercy, His salvation (בָּטַח), of seeking and finding refuge in God or in the shadow of His wings (חָסָה), of committing ourselves to God (גָּלַל), setting confidence (כֶּסֶל) in Him, looking to Him (הִבִּיט), relying upon Him (נִשְׁעַן), staying upon Him (נִסְמַךְ), setting or fixing the heart upon Him (הֵכִין לֵב), binding our love on Him (חָשַׁק), cleaving to Him (דָּבַק). So, on the hopeful side of faith, we read much of hoping in God (קִוָּה), waiting on God (יִחֵל), of longing for Him (חִכָּה), patiently waiting for Him (הִתְחוֹלֵל), and the like.

By the aid of such expressions, it becomes possible to form a somewhat clear notion of the attitude towards Him which was required by J″ of His believing people, and which is summed up in the term faith. It is a reverential (Ex 14^{31}, Nu 14^{11} 20^{12}) and loving faith, which rests on the strong basis of firm and unshaken conviction of the might and grace of the covenant God and of the trustworthiness of all His words, and exhibits itself in confident trust in J″ and unwavering expectation of the fulfilment of, no doubt, all His promises, but more especially of His promise of salvation, and in consequent faithful and exclusive adherence to Him. In one word, it consists in an utter commitment of oneself to J″, with confident trust in Him as guide and saviour, and assured expectation of His promised salvation. It therefore stands in contrast, on the one hand, with trust in self or other human help, and on the other with doubt and unbelief, despondency and unfaithfulness. From J″ alone is salvation to be looked for, and it comes from His free grace alone (Dt 7^{7} 8^{18} 9^{5}, Am 3^{2}, Hos 13^{5}, Ezk 20^{6}, Jer 39^{18}, Mal 1^{2}), and to those only who look solely to Him for it (Is 31^{1} 57^{13} 28^{16} 30^{15}, Jer 17^{5} 39^{18}, Ps 118^{8} 146^{3} 20^{7}, 1 S 17^{45}, Ps 28^{25} 11^{28}, Job $22^{23.\,24}$ 31^{24}, Ps 52^{9}). The reference of faith is accordingly in the OT always distinctly soteriological; its end the Messianic salvation; and its essence a trusting, or rather an entrusting of oneself to the God of salvation, with full assurance of the fulfilment of His gracious purposes and the ultimate realization of His promise of salvation for the people and the individual. Such an attitude towards the God of salvation is identical with the faith of the NT, and is not essentially changed by the fuller revelation of God the Redeemer in the person of the promised Messiah. That it is comparatively seldom designated in the OT by the names of 'faith,' 'believing,' seems to be due, as has been often pointed out, to the special place of the OT in the history of revelation, and the adaptation of its whole contents and language to the particular task in the establishment of the kingdom of God which fell to its writers. This task turned on the special temptations and difficulties of the OT stage of development, and required emphasis to be laid on the majesty and jealousy of J″ and on the duties of reverence, sincerity, and patience. Meanwhile, the faith in Him which underlies these duties is continually implied in their enforcement, and comes to open expression in frequent paraphrase and synonym, and as often in its own proper terms as is natural in the circumstances. Especially in the great crises of the history of redemption (Gn 15, Ex 4^{5} 19^{9}, Is 7) is the fundamental requirement of faith rendered explicit and prominent.

On the coming of God to His people in the person of His Son, the promised Messianic King, bringing the salvation, the hope of which had for so many ages been their support and stay, it naturally became the primary task of the vehicles of revelation to attract and attach God's people to the person of their Redeemer. And this task was the more pressing in proportion as the form of the fulfilment did not obviously correspond with the promise, and especially with the expectations which had grown up on the faith of the promise. This fundamental function dominates the whole NT, and accounts at once for the great prominence in its pages of the demand for faith, by which a gulf seems to be opened between it and the OT. The demand for faith in Jesus as the Redeemer so long hoped for, did indeed create so wide a cleft in the consciousness of the times that the term faith came rapidly to be appropriated to Christianity and 'to believe' to mean to become a Christian; so that the old covenant and the new were discriminated from each other as the ages before and after the 'coming of faith' (Gal $3^{23.\,25}$). But all this does not imply that faith now for the first time became the foundation of the religion of J″, but only suggests how fully, in the new circumstances induced by the coming of the promised Redeemer, the demand for faith absorbed the whole proclamation of the gospel. In this primary concern for faith the NT books all necessarily share; but, for the rest, they differ among themselves in the prominence given to it and in the aspects in which it is presented, in accordance with the place of each in the historical development of the new life; and that is as much as to say in accordance with the historical occasion out of which each arose and the special object to subserve which each was written.

Indeed, the word 'to believe' first appears on the pages of the NT in quite OT conditions. We are conscious of no distinction even in atmosphere between the commendation of faith and rebuke of unbelief in Exodus or the Psalms and the same commendation and rebuke in the days just before the 'coming of faith' (Lk $1^{20.\,45}$); these are but specific applications of the thesis of prophetism, expressed positively in 2 Ch 20^{20} and negatively in Is 7^{9}. Already, however, the dawn of the new day has coloured the proclamation of the Baptist, the essence of which Paul sums up for us as a demand for faith in the Coming One (Ac 19^{4}), and which John reports to us (Jn 3^{36}). In the synoptic report of the teaching of Jesus, the same purpose is the dominant note. All that Jesus did and taught was directed to drawing faith to Himself. Up to the end, indeed, He repelled the unbelieving demand that He should 'declare plainly' the authority by which He acted and who He really was (Mt 21^{23}, Lk 22^{67}); but this was only that He might, in His own way, the more decidedly confound unbelief and assert His divine majesty. Even when He spoke of general faith in God (Mk 11^{22}), and that confident trust which becomes men approaching the Almighty in prayer (Mt 21^{22} ‖ Mk 9^{24}, Lk 18^{8}), He did it in a way which inevitably directed attention to His own person as the representative of God on earth. And this accounts for the prevalence, in the synoptic report of His allusions to faith, of a reference to that exercise of faith which has sometimes been somewhat sharply divided from saving faith under the name of 'miracle faith' (Mt $8^{10.\,13}$ ‖ Lk 7^{9}; Mt 9^{2}; Mt

9[22] ‖ Mk 5[34], Lk 8[48]; Mt 9[28. 29]; Mt 15[21]; Mt 17[20] ‖ Mk 9[20]; Mt 21[21. 22], cf. Lk 17[6]; Mk 4[40]; Mk 5[36] ‖ Lk 8[50]; Mk 10[52] ‖ Lk 18[42]; Lk 7[19]). That in these instances we have not a generically distinct order of faith, directed to its own peculiar end, but only a specific movement of that entire trust in Himself which Jesus would arouse in all, seems clear from the manner in which He dealt with it,—now praising its exercise as a specially great exhibition of faith quite generally spoken of (Lk 7[9]), now pointing to it as a manifestation of that believing to which 'all things are possible' (Mk 9[23]), now connecting with it not merely the healing of the body but the forgiveness of sins (Mt 9[2]), and everywhere using it as a means of attaching the confidence of men to His person as the source of all good. Having come to His own, in other words, Jesus took men upon the plane on which He found them, and sought to lead them through the needs which they felt, and the relief of which they sought in Him, up to a recognition of their greater needs and of His ability to give relief to them also. That word of power, 'Thy faith hath saved thee,' spoken indifferently of bodily wants and of the deeper needs of the soul (Lk 7[50]), not only resulted, but was intended to result, in focusing all eyes on Himself as the one physician of both body and soul (Mt 8[17]). Explicit references to these higher results of faith are, to be sure, not very frequent in the synoptic discourses, but there are quite enough of them to exhibit Jesus' specific claim to be the proper object of faith for these effects also (Lk 8[12. 13] 22[32], Mt 18[6] ‖ Mk 9[42], Lk 7[50]), and to prepare the way for His rebuke, after His resurrection, of the lagging minds of His followers, that they did not understand all these things (Lk 24[25. 45]), and for His great commission to Paul to go and open men's eyes that they might receive 'remission of sins and an inheritance among the sanctified by faith in Him' (Ac 26[18]).

It is very natural that a much fuller account of Jesus' teaching as to faith should be given in the more intimate discourses which are preserved by John. But in these discourses, too, His primary task is to bind men to Him by faith. The chief difference is that here, consonantly with the nature of the discourses recorded, much more prevailing stress is laid upon the higher aspects of faith, and we see Jesus striving specially to attract to Himself a faith consciously set upon eternal good. In a number of instances we find ourselves in much the same atmosphere as in the Synoptics (4[21 sq. 48 sq.] 9[35]); and the method of Jesus is the same throughout. Everywhere He offers Himself as the object of faith, and claims faith in Himself for the highest concerns of the soul. But everywhere He begins at the level at which He finds His hearers, and leads them upward to these higher things. It is so that He deals with Nathanael (1[51]) and Nicodemus (3[12]); and it is so that He deals constantly with the Jews, everywhere requiring faith in Himself for eternal life (5[24. 25. 38] 6[35. 40. 47] 7[38] 8[24] 10[25. 36] 12[44. 46]), declaring that faith in Him is the certain outcome of faith in their own Scriptures (5[46. 47]), is demanded by the witness borne Him by God in His mighty works (10[25. 36. 37]), is involved in and is indeed identical with faith in God (5[25. 38] 6[40. 45] 8[47] 12[44]), and is the one thing which God requires of them (6[29]), and the failure of which will bring them eternal ruin (3[18] 5[38] 6[64] 8[24]). When dealing with His followers, His primary care was to build up their faith in Him. Witness especially His solicitude for their faith in the last hours of His intercourse with them. For the faith they had reposed in Him He returns thanks to God (17[8]), but He is still nursing their faith (16[31]), preparing for its increase through the events to come (13[19] 16[29]), and with almost passionate eagerness claiming it at their hands (14[1. 10. 11. 12]). Even after His resurrection we find Him restoring the faith of the waverer (20[29]) with words which pronounce a special blessing on those who should hereafter believe on less compelling evidence—words whose point is not fully caught until we realize that they contain an intimation of the work of the apostles as, like His own, summed up in bringing men to faith in Him (17[20. 21]).

The record in Ac of the apostolic proclamation testifies to the faithfulness with which this office was prosecuted by Jesus' delegates (Ac 3[22. 23]). The task undertaken by them was, by persuading men (Ac 17[4] 28[24]), to bring them unto obedience to the faith that is in Jesus (Ac 6[7], Ro 1[5] 16[26], cf. 2 Th 1[8], 2 Co 10[5]). And by such 'testifying faith towards our Lord Jesus Christ' (Ac 20[21], cf. 10[43]) there was quickly gathered together a community of 'believers' (Ac 2[44] 4[4. 32]), that is, of believers in the Lord Jesus Christ (Ac 5[14] 9[42] 11[17] 14[23]), and that not only in Jerus. but beyond (8[12] 9[42] 10[45] 11[21] 13[48] 14[1]), and not only of Jews (10[45] 15[1] 21[20]) but of Gentiles (11[21] 13[48] 14[1] 15[7] 17[12. 34] 18[27] 19[18] 21[25]). The enucleation of this community of believers brought to the apostolic teachers the new task of preserving the idea of faith, which was the formative principle of the new community, and to propagate which in the world, pure and living and sound, was its chief office. It was inevitable that those who were called into the faith of Christ should bring into the infant Church with them many old tendencies of thinking, and that within the new community the fermentation of ideas should be very great. The task of instructing and disciplining the new community soon became unavoidably one of the heaviest of apostolic duties; and its progress is naturally reflected in their letters. Thus certain differences in their modes of dealing with faith emerge among NT writers, according as one lays stress on the deadness and profitlessness of a faith which produces no fruit in the life, and another on the valuelessness of a faith which does not emancipate from the bondage of the law; or as one lays stress on the perfection of the object of faith and the necessity of keeping the heart set upon it, and another on the necessity of preserving in its purity that subjective attitude towards the unseen and future which constitutes the very essence of faith; or as one lays stress on the reaching out of faith to the future in confident hope, and another on the present enjoyment by faith of all the blessings of salvation.

It was to James that it fell to rebuke the Jewish tendency to conceive of the faith which was pleasing to J″ as a mere intellectual acquiescence in His being and claims, when imported into the Church and made to do duty as 'the faith of our Lord Jesus Christ, the Glory' (2[1]). He has sometimes been misread as if he were depreciating faith, or at least the place of faith in salvation. But it is perfectly clear that with James, as truly as with any other NT writer, a sound faith in the Lord Jesus Christ as the manifested God (2[1]) lies at the very basis of the Christian life (1[3]), and is the condition of all acceptable approach to God (1[6] 5[15]). It is not faith as he conceives it which he depreciates, but that professed faith (λέγῃ, 2[14]) which cannot be shown to be real by appropriate works (2[18]), and so differs by a whole diameter alike from the faith of Abraham that was reckoned unto him for righteousness (2[23]), and from the faith of Christians as James understood it (2[1] 1[3], cf. 1[22]). The impression which is easily taken from the last half of the second chapter of James, that his teaching and that of Paul stand in some polemic relation, is nevertheless a delusion, and arises from an insufficient realization of the place occupied by faith in the discussions of the Jewish schools, reflections of which have naturally found their way into the language of both Paul and James. And so far are we from needing to suppose some reference, direct or indirect, to Pauline teaching to account for James' entrance upon the question which he discusses, that this was a matter upon which an earnest teacher could not fail to touch in the presence of a tendency common among the Jews at the advent of Christianity (cf. Mt 3^9 7^{21} 23^3, Ro 2^{17}), and certain to pass over into Jewish-Christian circles: and James' treatment of it finds, indeed, its entire presupposition in the state of things underlying the exhortation of 1^{22}. When read from his own historical standpoint, James' teachings are free from any discord with those of Paul, who as strongly as James denies all value to a faith which does not work by love (Gal 5^6, 1 Co 13^2, 1 Th 1^3). In short, James is not depreciating faith: with him, too, it is faith that is reckoned unto righteousness (2^{23}), though only such a faith as shows itself in works can be so reckoned, because a faith which does not come to fruitage in works is dead, non-existent. He is rather deepening the idea of faith, and insisting that it includes in its very conception something more than an otiose intellectual assent.

It was a far more serious task which was laid upon Paul. As apostle to the Gentiles he was called upon to make good in all its depth of meaning the fundamental principle of the religion of grace, that the righteous shall live by faith, as over-against what had come to be the ingrained legalism of Jewish thought now intruded into the Christian Church. It was not, indeed, doubted that faith was requisite for obtaining salvation. But he that had been born a Jew and was conscious of the privileges of the children of the promise, found it hard to think that faith was all that was requisite. What, then, was the advantage of the Jew? In defence of the rights of the Gentiles, Paul was forced in the most uncompromising way to validate the great proposition that, in the matter of salvation, there is no distinction between Jew and Gentile,—that the Jew has no other righteousness than that which comes through faith in Jesus Christ (Gal $2^{15\,\text{sq.}}$), and that the Gentile fully possesses this righteousness from faith alone (Gal $3^{7\,\text{sq.}}$); in a word, that the one God, who is God of the Gentiles also, 'shall justify the circumcision by faith, and the uncircumcision through faith' (Ro 3^{30}). Thus was it made clear not only that 'no man is justified by the law' (Gal 2^{16} 3^{11}, Ro 3^{20}), but also that a man is justified by faith apart from law-works (Ro 3^{28}). The splendid vigour and thoroughness of Paul's dialectic development of the absolute contrast between the ideas of faith and works, by virtue of which one peremptorily excludes the other, left no hiding-place for a work-righteousness of any kind or degree, but cast all men solely upon the righteousness of God, which is apart from the law and comes through faith unto all that believe (Ro $3^{21.\,22}$). Thus, in vindicating the place of faith as the only instrument of salvation, Paul necessarily dwelt much upon the object of faith, not as if he were formally teaching what the object is on which faith savingly lays hold, but as a natural result of his effort to show from its object the all-sufficiency of faith. It is because faith lays hold of Jesus Christ, who was delivered up for our trespasses and was raised for our justification (Ro 4^{25}), and makes us possessors of the righteousness provided by God through Him, that there is no room for any righteousness of our own in the ground of our salvation (Ro 10^3, Eph 2^8). This is the reason of that full development of the object of faith in Paul's writings, and especially of the specific connexion between faith and the righteousness of God proclaimed in Christ, by which the doctrine of Paul is sometimes said to be distinguished from the more general conception of faith which is characteristic of the Epistle to the Hebrews. This more general conception of faith is not, however, the peculiar property of that epistle, but is the fundamental conception of the whole body of biblical writers in OT and in NT (cf. Mt 6^{25} 16^{23}, Jn $20^{29.\,31}$, 1 P 1^8), including Paul himself (2 Co 4^{18} 5^7, Ro 4^{16-22} 8^{24}); while, on the other hand, the Epistle to the Hebrews, no less than Paul, teaches that there is no righteousness except through faith (10^{38} 11^7, cf. 11^4).

That in the Epistle to the Hebrews it is the general idea of faith, or, to be more exact, the subjective nature of faith, that is dwelt upon, rather than its specific object, is not due to a peculiar conception of what faith lays hold upon, but to the particular task which fell to its writer in the work of planting Christianity in the world. With him, too, the person and work of Christ are the specific object of faith ($13^{7.\,8}$ 3^{14} 10^{22}). But the danger against which, in the providence of God, he was called upon to guard the infant flock, was not that it should fall away from faith to works, but that it should fall away from faith into despair. His readers were threatened not with legalism but with 'shrinking back' (10^{39}), and he needed, therefore, to emphasize not so much the object of faith as the duty of faith. Accordingly, it is not so much on the righteousness of faith as on its perfecting that he insists; it is not so much its contrast with works as its contrast with impatience that he impresses on his readers' consciences; it is not so much to faith specifically in Christ and in Him alone that he exhorts them as to an attitude of faith—an attitude which could rise above the seen to the unseen, the present to the future, the temporal to the eternal, and which in the midst of sufferings could retain patience, in the midst of disappointments could preserve hope. This is the key to the whole treatment of faith in the Epistle to the Hebrews—its definition as the assurance of things hoped for, the conviction of things not seen (11^1); its illustration and enforcement by the example of the heroes of faith in the past, a list chosen and treated with the utmost skill for the end in view (11); its constant attachment to the promises ($4^{1.\,2}$ 6^{12} $10^{36.\,38}$ 11^9 13^{39}); its connexion with the faithfulness (11^{11}, cf. 10^{23}), almightiness (11^{19}), and the rewards of God ($11^{6.\,26}$); and its association with such virtues as boldness (3^6 4^{16} $10^{19.\,35}$), confidence (3^{14} 11^1), patience (10^{36} 12^1), hope (3^6 $6^{11.\,18}$ 10^{23}).

With much that is similar to the situation implied in Hebrews, that which underlies the Epistles of Peter differs from it in the essential particular that their prevailingly Gentile readers were not in imminent danger of falling back into Judaism. There is, accordingly, much in the aspect in which faith is presented in these epistles which reminds us of what we find in Hebrews, as, for example, the close connexion into which it is brought with obedience (1 P $1^{2.\,22}$ 2^7 3^1 4^{17}), its prevailing reference to what is unseen and future (1 P $1^{5.\,7-10.\,21}$), and its consequent demand for steadfastness (5^9, cf. 1^7), and especially for hope (1^{21}, cf. $1^{3.\,13}$ $3^{5.\,15}$). Yet there is a noteworthy difference in the whole tone of the commendation of faith, which was rooted, no doubt, in the character of Peter, as the tone of his speeches recorded in Acts shows, but which also grew out of the nature of the task set before him in these letters. There is no hint of despair lying in the near background, but the buoyancy of assured hope rings throughout these epistles. Having hearkened to the prophet like unto Moses (Dt 18$^{15.19}$, Ac 3$^{22.23}$), Christians are the children of obedience (1 P 1^{14}), and through their precious faith (1 P 1^{7}, 2 P 1^{1}) possessors of the preciousness of the promises (1 P 2^{7}). As they have obeyed the voice of God and kept His covenant, they have become His peculiar treasure, a kingdom of priests and a holy nation (Ex 19^{5}, 1 P 2^{9}). Naturally, the duty rests upon them of living, while here below, in accordance with their high hopes (1 P 1^{13}, 2 P 1^{5}). But in any event they are but sojourners and pilgrims here (1 P 2^{11} 1$^{1.17}$), and have a sure inheritance reserved for them in heaven (1^{4}), unto which they are guarded through faith by the power of God (1^{5}). The reference of faith in Peter is therefore characteristically to the completion rather than to the inception of salvation (1$^{5.9}$ 2^{6}, cf. Ac 15^{11}). Of course this does not imply that he does not share the common biblical conception of faith: he is conscious of no difference of view from that of OT (1 P 2^{6}); and, no less than with James, with him faith is the fountain of all good works (1 P 1$^{7.21}$ 5^{9}, 2 P 1^{5}); and, no less than with Paul, with him faith lays hold of the righteousness of Christ (2 P 1^{1}). It only means that in the circumstances of his writing he is led to lay special emphasis on the reference of faith to the consummated salvation, in order to quicken in his readers that hope which would sustain them in their persecutions, and to keep their eyes set, not on their present trials, but, in accordance with faith's very nature, on the unseen and eternal glory.

In the entirely different circumstances in which he wrote, John wished to lay stress on the very opposite aspect of faith. For what is characteristic of John's treatment of faith is insistence not so much on the certainty and glory of the future inheritance which it secures, as on the fulness of the present enjoyment of salvation which it brings. There was pressing into the Church a false emphasis on knowledge, which affected to despisesimple faith. This John met, on the one hand, by deepening the idea of knowledge to the knowledge of experience, and, on the other, by insisting upon the immediate entrance of every believer into the possession of salvation. It is not to be supposed, of course, that he was ready to neglect or deny that out-reaching of faith to the future on which Peter lays such stress: he is zealous that Christians shall know that they are children of God from the moment of believing, and from that instant possessors of the new life of the Spirit; but he does not forget the greater glory of the future, and he knows how to use this Christian hope also as an incitement to holy living (1 Jn 3^{2}). Nor are we to suppose that, in his anti-Gnostic insistence on the element of conviction in faith, he would lose sight of that central element of surrendering trust which is the heart of faith in other portions of the Scriptures: he would indeed have believers know what they believe, and who He is in whom they put their trust, and what He has done for them, and is doing, and will do, in and through them; but this is not that they may know these things simply as intellectual propositions, but that they may rest on them in faith and know them in personal experience. Least of all the NT writers could John confine faith to a merely intellectual act: his whole doctrine of faith is rather a protest against the intellectualism of Gnosticism. His fundamental conception of faith differs in nothing from that of the other NT writers; with him, too, it is a trustful appropriation of Christ and surrender of self to His salvation. Eternal life has been manifested by Christ (Jn 1^{4}, 1 Jn 1$^{1.2}$ 5^{11}), and he, and he only, who has the Son has the life (1 Jn 5^{12}). But in the conflict in which he was engaged he required to throw the strongest emphasis possible upon the immediate entrance of believers into this life. This insistence had manifold applications to the circumstances of his readers. It had, for example, a negative application to the antinomian tendency of Gnostic teaching, which John does not fail to press (1 Jn 1^{5} 2$^{4.15}$ 3^{6}): 'whosoever believeth that Jesus is the Christ is begotten of God' (1 Jn 5^{1}), and 'whosoever is begotten of God doeth no sin' (1 Jn 3^{9}). It had also a positive application to their own encouragement: the simple believer was placed on a plane of life to which no knowledge could attain; the new life received by faith gave the victory over the world; and John boldly challenges experience to point to any who have overcome the world but he that believes that Jesus is the Son of God (1 Jn 5$^{4.5}$). Accordingly, it is characteristic of John to announce that 'he that believeth hath eternal life' (Jn 3^{36} 5^{24} 6$^{47.54}$, 1 Jn 3$^{14.15}$ 5$^{11.12.13}$). He even declares the purpose of his writing to be, in the Gospel, that his readers 'may believe that Jesus is the Christ, the Son of God, and that, believing, they may have life in his name' (20^{31}); and in the First Epistle, that they that believe in the name of the Son of God 'may know that they *have* eternal life' (1 Jn 5^{13}).

III. THE BIBLICAL CONCEPTION OF FAITH.—By means of the providentially mediated diversity of emphasis of the NT writers on the several aspects of faith, the outlines of the biblical conception of faith are thrown into very high relief.

Of its *subjective nature* we have what is almost a formal definition in the description of it as an 'assurance of things hoped for, a conviction of things not seen' (He 11^{1}). It obviously contains in it, therefore, an element of knowledge (He 11^{6}), and it as obviously issues in conduct (He 11^{8}, cf. 5^{9}, 1 P 1^{22}). But it consists neither in assent nor in obedience, but in a reliant trust in the invisible Author of all good (He 11^{27}), in which the mind is set upon the things that are above and not on the things that are upon the earth (Col 3^{2}, cf. 2 Co 4$^{16-18}$, Mt 6^{25} 16^{33}). The examples cited in He 11 are themselves enough to show that the faith there commended is not a mere belief in God's existence and justice and goodness, or crediting of His word and promises, but a practical counting of Him faithful (11^{11}), with a trust so profound that no trial can shake it (11^{35}), and so absolute that it survives the loss of even its own pledge (11^{17}). So little is faith in its biblical conception merely a conviction of the understanding, that, when that is called faith, the true idea of faith needs to be built up above this word (Ja 2$^{14\text{ff.}}$). It is a movement of the whole inner man (Ro 10$^{9.10}$), and is set in contrast with an unbelief that is akin, not to ignorance but to disobedience (He 3$^{18.19}$, Jn 3^{36}, Ro 11$^{20.30}$ 15^{31}, 1 Th 1^{8}, He 4$^{6.2}$, 1 P 1$^{7.8}$ 3$^{1.20}$ 4^{18}, Ac 14$^{2.1}$ 19^{9}), and that grows out of, not lack of information, but that aversion of the heart from God (He 3^{12}) which takes pleasure in unrighteousness (2 Th 2^{12}), and is so unsparingly exposed by our Lord (Jn 3^{19} 5^{44} 8^{47} 10^{26}). In the breadth of its idea, it is thus the going out of the heart from itself and its resting on God in confident trust for all good. But the scriptural revelation has to do with, and is directed to the needs of, not man in the abstract, but sinful man; and for sinful man this hearty reliance on God necessarily becomes humble trust in Him for the fundamental need of the sinner—forgiveness of sins and reception into favour. In response to the revelations of His grace and the provisions of His mercy, it commits itself without reserve and with abnegation of all self-dependence, to Him as its sole and sufficient Saviour, and thus, in one act, empties itself of all claim on God and casts itself upon His grace alone for salvation.

It is, accordingly, solely from its *object* that faith derives its value. This object is uniformly the God of grace, whether conceived of broadly as the source of all life, light, and blessing, on whom man in his creaturely weakness is entirely dependent, or, whenever sin and the eternal welfare of the soul are in view, as the Author of salvation in whom alone the hope of unworthy man can be placed. This one object of saving faith never varies from the beginning to the end of the scriptural revelation; though, naturally, there is an immense difference between its earlier and later stages in fulness of knowledge as to the nature of the redemptive work by which the salvation intrusted to God shall be accomplished; and as naturally there occurs a very great variety of forms of statement in which trust in the God of salvation receives expression. Already, however, at the gate of Eden, the God in whom the trust of our first parents is reposed is the God of the gracious promise of the retrieval of the injury inflicted by the serpent; and from that beginning of knowledge the progress is steady, until, what is implied in the primal promise having become express in the accomplished work of redemption, the trust of sinners is explicitly placed in the God who was in Christ reconciling the world unto Himself (2 Co 5^{19}). Such a faith, again, could not fail to embrace with humble confidence all the gracious promises of the God of salvation, from which indeed it draws its life and strength; nor could it fail to lay hold with strong conviction on all those revealed truths concerning Him which constitute, indeed, in the varied circumstances in which it has been called upon to persist throughout the ages, the very grounds in view of which it has been able to rest upon Him with steadfast trust. These truths, in which the 'Gospel' or glad-tidings to God's people has been from time to time embodied, run all the way from such simple facts as that it was the very God of their fathers that had appeared unto Moses for their deliverance (Ex 4^5), to such stupendous facts, lying at the root of the very work of salvation itself, as that Jesus is the Christ, the Son of God sent of God to save the world (Jn 6^{69} 8^{24} $11^{21. 42}$ 13^{19} $16^{27. 30}$ $17^{8. 21}$ 20^{31}, 1 Jn 5^{15}), that God has raised Him from the dead (Ro 10^9, 1 Th 4^{14}), and that as His children we shall live with Him (Ro 6^8). But in believing this variously presented Gospel, faith has ever terminated with trustful reliance, not on the promise but on the Promiser,—not on the propositions which declare God's grace and willingness to save, or Christ's divine nature and power, or the reality and perfection of His saving work, but on the Saviour upon whom, because of these great facts, it could securely rest as on One able to save to the uttermost. Jesus Christ, God the Redeemer, is accordingly the one object of saving faith, presented to its embrace at first implicitly and in promise, and ever more and more openly until at last it is entirely explicit and we read that 'a man is not justified save through faith in Jesus Christ' (Gal 2^{16}). If, with even greater explicitness still, faith is sometimes said to rest upon some element in the saving work of Christ, as, for example, upon His blood or His righteousness (Ro 3^{25}, 2 P 1^1), obviously such a singling out of the very thing in His work on which faith takes hold, in no way derogates from its repose upon Him, and Him only, as the sole and sufficient Saviour.

The *saving power* of faith resides thus not in itself, but in the Almighty Saviour on whom it rests. It is never on account of its formal nature as a psychic act that faith is conceived in Scripture to be saving,—as if this frame of mind or attitude of heart were itself a virtue with claims on God for reward, or at least especially pleasing to Him (either in its nature or as an act of obedience) and thus predisposing Him to favour, or as if it brought the soul into an attitude of receptivity or of sympathy with God, or opened a channel of communication from Him. It is not faith that saves, but faith in Jesus Christ: faith in any other saviour, or in this or that philosophy or human conceit (Col $2^{16. 18}$, 1 Ti 4^1), or in any other gospel than that of Jesus Christ and Him as crucified (Gal $1^{8. 9}$), brings not salvation but a curse. It is not, strictly speaking, even faith in Christ that saves, but Christ that saves through faith. The saving power resides exclusively, not in the act of faith or the attitude of faith or the nature of faith, but in the object of faith; and in this the whole biblical representation centres, so that we could not more radically misconceive it than by transferring to faith even the smallest fraction of that saving energy which is attributed in the Scriptures solely to Christ Himself. This purely mediatory function of faith is very clearly indicated in the regimens in which it stands, which ordinarily express simple instrumentality. It is most frequently joined to its verb as the dative of means or instrument (Ac 15^9 26^{18}, Ro 3^{28} 4^{20} 5^2 11^{20}, 2 Co 1^{24}, He $11^{3. 4. 5. 7. 8. 9. 11. 17. 20. 21. 23. 24 \parallel 27. 28. 29. 30. 31}$); and the relationship intended is further explained by the use to express it of the prepositions ἐκ (Ro $1^{17. 17}$ $3^{26. 30}$ $4^{16. 16}$ 5^1 $9^{30. 32}$ 10^6 $14^{23. 23}$, Gal 2^{16} $3^{7. 8. 9. 11. 12. 27. 28}$ 5^5, 1 Ti 1^5, He 10^{38}, Ja 2^{24}) and διὰ (with the genitive, never with the accusative, Ro $3^{22. 25. 30}$, 2 Co 5^7, Gal 2^{16} $3^{12. 26}$ 3^7, 2 Ti 3^{15}, He 6^{12} $11^{23. 39}$, 1 P 1^5),—the fundamental idea of the former construction being that of source or origin, and of the latter that of mediation or instrumentality, though they are used together in the same context, apparently with no distinction of meaning (Ro $3^{25. 26. 30}$, Gal 2^{16}). It is not necessary to discover an essentially different implication in the exceptional usage of the prepositions ἐπί (Ac 3^{16}, Ph 3^9) and κατά (He $11^{7. 13}$, cf. Mt 9^{29}) in this connexion: ἐπί is apparently to be taken in a quasi-temporal sense, 'on faith,' giving the occasion of the divine act, and κατά very similarly in the sense of conformability, 'in conformity with faith.' Not infrequently we meet also with a construction with the preposition ἐν which properly designates the sphere, but which in passages like Gal 2^{20}, Col 2^7, 2 Th 2^{13} appears to pass over into the conception of instrumentality.

So little indeed is faith conceived as containing in itself the energy or ground of salvation, that it is consistently represented as, in its *origin*, itself a gratuity from God in the prosecution of His saving work. It comes, not of one's own strength or virtue, but only to those who are chosen of God for its reception (2 Th 2^{13}), and hence is His gift (Eph 6^{23}, cf. $2^{8. 9}$, Ph 1^{29}), through Christ (Ac 3^{16}, Ph 1^{29}, 1 P 1^{21}, cf. He 12^2), by the Spirit (2 Co 4^{13}, Gal 5^5), by means of the preached word (Ro 10^{17}, Gal $3^{2. 5}$); and as it is thus obtained from God (2 P 1^1, Jude ^{3}, 1 P 1^{21}), thanks are to be returned to God for it (Col 1^4, 2 Th 1^3). Thus, even here all boasting is excluded, and salvation is conceived in all its elements as the pure product of unalloyed grace, issuing not from, but in, good works (Eph 2^{8-12}). The place of faith in the process of salvation, as biblically conceived, could scarcely, therefore, be better described than by the use of the scholastic term 'instrumental cause.' Not in one portion of the Scriptures alone, but throughout their whole extent, it is conceived as a boon from above which comes to men, no doubt through the channels of their own activities, but not as if it were an effect of their energies, but rather, as it has been finely phrased, as a gift which God lays in the lap of the soul. 'With the heart,' indeed, 'man believeth unto righteousness'; but this believing does not arise of itself out of any heart indifferently (Mt 13^{1}), nor is it grounded in the heart's own potencies; it is grounded rather in the freely-giving goodness of God, and comes to man as a benefaction out of heaven.

The *effects* of faith, not being the immediate product of faith itself but of that energy of God which was exhibited in raising Jesus from the dead and on which dependence is now placed for raising us with Him into newness of life (Col 2^{12}), would seem to depend directly only on the fact of faith, leaving questions of its strength, quality, and the like more or less to one side. We find a proportion, indeed, suggested between faith and its effects (Mt 9^{29} 8^{13}, cf. 8^{10} 15^{28} 17^{20}, Lk 7^{9} 17^{6}). Certainly there is a fatal doubt, which vitiates with its double-mindedness every approach to God (Ja 1$^{6-8}$, cf. 4^{8}, Mt 21^{21}, Mk 11^{23}, Ro 4^{20} 14^{23}, Jude ^{22}). But Jesus deals with notable tenderness with those of 'little faith,' and His apostles imitated Him in this (Mt 6$^{30f.\ 20}$ 14^{31} 16^{8} 17^{20}, Lk 12^{28}, Mk 9^{24}, Lk 17^{5}, cf. Ro 14$^{1.\ 2}$, 1 Co 8^{7}, and see DOUBT). The effects of faith may possibly vary also with the end for which the trust is exercised (cf. Mk 10^{51} *ἵνα ἀναβλέψω* with Gal 2^{16} *ἐπιστεύσαμεν ἵνα δικαιωθῶμεν*). But he who humbly but confidently casts himself on the God of salvation has the assurance that he shall not be put to shame (Ro 11^{11} 9^{33}), but shall receive the end of his faith, even the salvation of his soul (1 P 1^{9}). This salvation is no doubt, in its idea, received all at once (Jn 3^{36}, 1 Jn 5^{12}); but it is in its very nature a process, and its stages come, each in its order. First of all, the believer, renouncing by the very act of faith his own righteousness which is out of the law, receives that 'righteousness which is through faith in Christ, the righteousness which is from God on faith' (Ph 3^{9}, cf. Ro 3^{22} 4^{11} 9^{30} 10$^{3.\ 10}$, 2 Co 5^{21}, Gal 5^{5}, He 11^{7}, 2 P 1^{1}). On the ground of this righteousness, which in its origin is the 'righteous act' of Christ, constituted by His 'obedience' (Ro 5$^{18.\ 19}$), and comes to the believer as a 'gift' (Ro 5^{17}), being reckoned to him apart from works (Ro 4^{6}), he that believes in Christ is justified in God's sight, received into His favour, and made the recipient of the Holy Spirit (Jn 7^{39}, cf. Ac 5^{32}), by whose indwelling men are constituted the sons of God (Ro 8^{13}). And if children, then are they heirs (Ro 8^{17}), assured of an incorruptible, undefiled, and unfading inheritance, reserved in heaven for them; and meanwhile they are guarded by the power of God through faith unto this gloriously complete salvation (1 P 1$^{4.\ 5}$). Thus, though the immediate effect of faith is only to make the believer possessor before the judgment-seat of God of the alien righteousness wrought out by Christ, through this one effect it draws in its train the whole series of saving acts of God, and of saving effects on the soul. Being justified by faith, the enmity which has existed between the sinner and God has been abolished, and he has been introduced into the very family of God, and made sharer in all the blessings of His house (Eph 2$^{13ff.}$). Being justified by faith, he has peace with God, and rejoices in the hope of the glory of God, and is enabled to meet the trials of life, not merely with patience but with joy (Ro 5$^{1ff.}$). Being justified by faith, he has already working within him the life which the Son has brought into the world, and by which, through the operations of the Spirit which those who believe in Him receive (Jn 7^{39}), he is enabled to overcome the world lying in the evil one, and, kept by God from the evil one, to sin not (1 Jn 5^{19}). In a word, because we are justified by faith, we are, through faith, endowed with all the privileges and supplied with all the graces of the children of God. (See further the articles on the several stages of the saving process.)

LITERATURE.—Schlatter, *Der Glaube im NT* (includes a section on 'Der Glaube vor Jesus') is the most comprehensive work on the biblical idea of faith. The general subject is also treated by Lutz, *Biblische Dogmatik*, 312; H. Schultz, 'Gerechtigkeit aus dem Glauben im A. u. NT' (in *JDTh*, 1862, p. 510); Hofmann, *Schriftbeweis*, i. 381; Riehm, *Lehrbr. d. Hebräerbr.* 700; Cremer, *Bib. Theol. Lex. s.* πίστις, πιστεύω; Hatch, *Essays in Biblical Greek*, 83. For OT, cf. the relevant sections in the treatises on *OT Theology*, especially those of Oehler, H. Schultz, Riehm, Dillmann; and the commentaries on the passages, especially Delitzsch on Genesis and Habakkuk. For NT, cf. Huther, 'ζωή und πιστεύειν im NT' (in *JBDTh*, 1872, p. 182), and the relevant sections in the general treatises on *NT Theology*, especially those of Neander (*Pflanzung*, etc.), Schmid, Reuss, Weiss, Beyschlag, Holtzmann, and in the treatises on the theology of the several NT writers, such as Wendt, *The Teaching of Jesus*; Usteri, *Paulinischer Lehrbegr.*; Pfleiderer, *Paulinism*; Stevens, *The Pauline Theology*; Lipsius, *Paulinische Rechtfertigungslehre*; Schnedermann, *De fidei ratione ethica Paulina*; Hausleiter, 'Was versteht Paulus unter christlichem Glauben?' (in *Greifswalder Studien*, p. 159); Riehm, *Lehrbegr. d. Hebräerbr.*; Reuss, 'Die Johan. Theologie' (in *Beiträge zur d. Theol. Wissenschaft*, i. 56); Köstlin, *Lehrbegr. Johann.*; Weiss, *Der Johann. Lehrbegr.*; Stevens, *The Johannine Theology*; Weiss, *Der Petrin. Lehrbegr.*: also such commentaries as Rückert on *Romans*; Sanday - Headlam on *Romans*; Lightfoot on *Galatians*; Haupt on *1 John*; Mayor on *James*; Spitta on *James*. The whole body of doctrinal discussion may be reviewed in De Moor, *Commentarius in J. Marckii Compendium*, iv. 287 f.; cf. also John Ball, *A Treatise of Faith* (3rd ed. London, 1637), Julius Köstlin, *Der Glaube, sein Wesen, Grund und Gegenstand* (1889), and *Der Glaube und seine Bedeutung für Erkentniss, Leben und Kirche* (1891). For some interesting historical notes, see Harnack, 'Die Lehre von der Seligkeit allein durch den Glauben in der alten Kirche' (in *Zeitschrift. f. Theol. u. Kirche*, 1895, p. 88); E. König, *Der Glaubensact des Christen* (1891); and for a general survey, Cunningham, *Historical Theology*, ii. pp. 56 ff.

B. B. WARFIELD.

FAITHLESS occurs only Mt 17^{17}, Mk 9^{19}, Lk 9^{41}, Jn 20^{27}, and always in the sense of 'unbelieving' (ἄπιστος). So Shaks. describes Shylock (*Mer. of Ven.* II. iv. 37) as 'a faithless Jew,' *i.e.* not 'untrustworthy,' but 'infidel,' an unbeliever in Christianity. J. HASTINGS.

FALCON.—RV tr. of אַיָּה *'ayyâh*, Lv 11^{14}, Dt 14^{13} (AV 'kite'), Job 28^{7} (AV 'vulture'). See GLEDE, HAWK, KITE, VULTURE. G. E. POST.

FALL.—In the sense of *happen*, 'fall' is both a Heb. and an Eng. idiom. It occurs Ru 3^{18} 'Sit still, my daughter, until thou know how the matter will fall'; and 2 Es 13^{58} 'such things as fall in their seasons.' Cf. Mt 18^{13}, Wyc. 'if it fall that he find it,' and Shaks. *Jul. Cæs.* III. i. 243—

> 'I know not what may fall; I like it not.'

Fall away is used in two senses. 1. To lose a position of goodness or of grace. The Greek is either ἀφίστημι, Sir 16^{7} 'the old giants who fell away in the strength of their foolishness' (RV 'revolted'), Lk 8^{13} 'in time of temptation fall away'; or παραπίπτω which occurs in the LXX of Est 6^{10}, Wis 6^{9} 12^{2}, Ezk 14^{13} 15^{8} 18^{24} 20^{27} 22^{4}, and 2 Mac 10^{4} [A], and once in NT, He 6^{6} 'it is impossible for those who were once enlightened . . . if they shall fall away, to renew them again unto repentance,' where the meaning is more than is found in the LXX, not merely falling into grievous sin, but renouncing the faith of Christ wholly (see Davidson, *in loc.*). 'A falling away' (RV 'the falling away') is the Eng. tr. of ἡ ἀποστασία, 2 Th 2^{3}, on which see MAN OF SIN. 2. To 'fall away to,' varied with 'fall to,' or 'fall unto' (2 K 7^{4} 'let us fall unto the host of the Syrians'), is to desert to an enemy. It is again both a Heb. and an Eng. idiom. See 2 K 25^{11}=Jer 52^{15}, 1 Ch 12$^{19\ bis}$, Jer 21^{9} 37$^{13.\ 14}$ 38^{19} 39^{9}, as well as 1 S 29^{3}, where the Heb. (if אֵלַי or עָלַי is added after LXX πρός με) is the same, always some part of נָפַל to fall. For the Eng. cf. Shaks. *Henry VIII.* II. i. 129—

> 'Where you are liberal of your loves and counsels,
> Be sure you be not loose; for those you make friends,
> And give your hearts to, when they once perceive
> The least rub in your fortunes, fall away
> Like water from ye.'

Again, *Henry VIII.* III. iii. 209—

> 'And as for Clarence, as my letters tell me,
> He's very likely now to fall from him.'

J. HASTINGS.

FALL (*παράπτωμα*, a word used of Adam's transgression in Wis 10^1, though not restricted to this anywhere in OT or NT).—Few chapters of the Bible have affected religious speculation more continuously and more deeply than the chapter which records the temptation and the weakness of primeval man. It would be out of place here to discuss all the topics which arise out of Gn 3, as to do so would be to write a treatise on Christian Theology. We can only consider—(i.) the character of the record, and its relation to other accounts of man's primitive state, which have come down to us from early times; (ii.) the influence of the story of Paradise and the Fall upon Hebrew belief as to man's destiny and his condition in the sight of God; (iii.) the inferences drawn by the NT writers, and notably by St. Paul, from the story of Adam's sin, read in the light of Christ's redemption. It will be impossible to give more than the briefest summary (iv.) of the interpretations of St Paul's doctrine of the Fall which have most widely affected Christian thought; but something must be said, in conclusion, (v.) of the bearing of modern theories of the origin and development of man upon the general doctrine of the Fall explained in Scripture and received by the Church.

i. We briefly recapitulate the leading points of the narrative in Gn 2^4–3, which forms the first section in Gn incorporated from the source described by critics as the Prophetical Code (J). Adam and Eve, the parents of the human family, are represented as living in innocence and peace in a fair garden where sin had not entered, and where death had no power, for in its midst stood the Tree of Life, of which they were permitted freely to eat. The fruit of one tree alone, the Tree of the knowledge of good and evil, was forbidden to them; and death was declared to be the penalty of disobedience. But their happy condition of purity and of fellowship with God did not remain undisturbed. The serpent seduced the woman to disobey the divine command; she, in turn, tempted her husband to his fall. And then came upon the guilty pair the consciousness of sin and the fear of the divine wrath, which they vainly tried to evade by excuses for their fault. The voice of God is heard, pronouncing a curse upon the serpent, and declaring a perpetual strife between it and mankind; the man and the woman, for their sin, are for ever subjected to pain in the fulfilment of their destiny, the woman in her childbearing, the man in his daily labour for daily bread. They are both expelled from Eden, and the Cherubim guard its gates against them, lest, eating of the tree of life, they should live for ever. The picture, however, is lightened by one ray of hope; for the seed of the serpent shall not finally prevail over the seed of the woman. 'It shall bruise thy head,' though 'thou shalt bruise his heel.'

Traditions of a state of primeval innocence, of man's fall from his pristine purity, and of the consequent entrance of death into the world, have, it is said, been gathered by travellers from races far removed from Hebrew literature or its sources.[*] Striking parallels to Gn 3 are to be found in the Zoroastrian legends as to the beginning of man's career. Yima, the first man, is said to have passed his days in a primeval paradise. But after a time he committed sin, was cast out of Paradise, and delivered up to the serpent (identified with an evil spirit), who finally brought about his death. A later version of the story is told in connexion with the first pair Masha and Mashyâna. The lying spirit grew bold, and, presenting himself a second time, brought them fruits, which they ate. As a punishment, of the hundred privileges they formerly enjoyed only one was left to them.[*] Few of the parallel stories that are adduced are, however, so exactly recorded as these; and we are inclined to believe that the similarities to the Bible narrative are often overstated. The fact that many people in many lands have sought to explain the existing disorders in the world as the consequence of man's lapse from a higher condition is deeply significant, and we shall return to it again. But the details of the legends in which such belief is embodied are not, as a rule, interesting save to the curious student of folk-lore, and they throw little light upon Scripture. It is to Assyria and the East that we naturally look for illumination. And it has been pointed out that the mythology of Babylonia and Assyria presents some curious parallels to the story of the serpent in the garden of which we read in Gn 3. On Assyrian inscriptions are found the names *Diglat*=Hiddekel, and *Bura*=Euphrates, in connexion with the word *Idinu* or 'field,' which is identified with Eden. Coniferous sacred trees appear frequently on Assyr. bas-reliefs and Bab. representations of a mythological character. On a Bab. stone cylinder, now in the British Museum, two human figures are depicted with a serpent behind them, having their hands stretched out towards the fruit that hangs from a neighbouring tree.[†] And the serpent figure is conspicuous in the legend of the Chaldæan tablets in which the evil serpent, Tiamat, is overthrown by Merodach. (See COSMOGONY, p. 505.) If the third Creation Tablet were not so extremely difficult to decipher as it is reported to be (partly in consequence of its fragmentary condition), it is probable that we should be able to trace in the story which it records even more striking similarities to the Scripture narrative. But Oriental scholars are not as yet entirely in agreement as to the translation of some of the more interesting portions of it; and the inferences that may be derived from the passage now to be cited must therefore be regarded as somewhat uncertain. The following is the rendering of Boscawen[‡]:—

> 'In sin one with the other in compact joins,
> The command was established in the garden of the God,
> The Asnan (fruit) they ate, they broke in two;
> Its stalk they destroyed;
> The sweet juice which injures the body.
> Great is their sin. Themselves they exalted;
> To Merodach their Redeemer he appointed their fate.'

If this translation be trustworthy, we have here something very like the biblical story of the forbidden fruit; but the rendering given by Pinches differs in some significant particulars. We recall, for our warning, that an inscription interpreted by Geo. Smith as a Bab. version of the story of the Fall turned out, when closely examined by Oppert, to be a hymn to the Creator.[§] Making all due allowances, however, for uncertainty of translation, it seems probable, when we bear in mind the affinity of the earlier Creation Tablets to Gn 1, as well as the other points of contact with the story of Eden to which we have adverted, that a legend of the fall of man, resembling in external features the account of Gn 3, was widely spread in Mesopotamia. Indeed, in another passage cited by Boscawen we are inevitably reminded of the victory over the serpent of Gn 3^{15}—

---

[*] See Baring Gould's *Legends of OT Characters*, i. 26–39, and the references there given.

[*] Compare Lenormant, *Histoire Ancienne de l'Orient*, i. 30 ff.

[†] There is a photograph of this in Boscawen's *Bible and the Monuments*, p. 89. It is to be borne in mind that there is nothing to suggest that the figures are not both males. And, as Schrader (*KAT*^{2} p. 37) points out, a specific feature of the Bible narrative, viz. that the woman gave the fruit to the man, is not indicated.

[‡] *Babylonian and Oriental Record*, iv. 251. Another translation by Pinches is given at p. 32. See also Sayce, *Ancient Monuments*, 65, 104; and Davis, *Genesis and Semitic Tradition*, p. 65, who questions the accuracy of Boscawen's rendering, and urges that we have here no true parallel to the Genesis narrative.

[§] See, for original, Delitzsch, *Assyrische Lesestücke*^{2}, p. 91.

> 'Tiamat, whom he had bound, then turned backward :
> So Bel trampled on the belly of Tiamat ;
> With his club unslung he smote her brain,
> He broke it, and caused her blood to flow ;
> The north wind bore it away to secret places.' *

There is nothing to surprise reason or to embarrass faith in the fact—if it be a fact—that traditional beliefs about the origins of human history should have been utilized in a purified form by the compiler of the Pent. or taken up into the Prophetical Code. It must be remembered that the period with which we are dealing is strictly prehistoric, and also that legendary history is not necessarily false or misleading. The truly remarkable circumstance is, that the early narratives in Gn are free from the extravagant and grotesque mythological accretions which generally gather round ancient beliefs among primitive peoples ; and that every touch in these narratives as we have them conveys a deep religious truth. The 'inspiration of selection' is a phenomenon which every candid student of Scripture must recognize ; and nowhere is its presence more instructive than in the first pages of OT, which present the early history of man in a form that can be understood by the simplest, and yet may be studied with spiritual benefit by the wisest of mankind.

We believe, then, that we have in the biblical record of the Fall a purified form of legendary narrative concerning man's early history which had wide currency among Semitic peoples. In an uncritical age it was interpreted literally, and it has been counted historical for many generations by the majority of those, whether Jews or Christians, who accept the authority of the OT. But another method of interpretation, viz. the allegorical, has had many adherents. Thus, of the account of the Fall, Philo asserts : *ἔστι δὲ ταῦτα οὐ πλάσματα μύθων, οἷς τὸ ποιητικὸν καὶ σοφιστικὸν χαίρει γένος, ἀλλὰ δείγματα τύπων ἐπ' ἀλληγορίαν παρακαλούντων κατὰ τὰς δι' ὑπονοιῶν ἀποδόσεις* (*De mundi opificio*, § 56), *i.e.* 'These things are not mere fabulous myths, but rather types shadowing forth some allegorical truth.' And, accordingly, he explains that Adam represents the rational and Eve the sensuous part of man, the serpent being the symbol of pleasure. The Christian teachers of Alexandria, Clement and Origen, favoured this allegorical mode of interpretation ; but Tertullian and Irenæus defended the literal truth of the narrative, as also did Augustine, who did not, however, reject the typical significance of OT history ; and through the scholastic philosophy it passed into the dogmatic theology of the Reformation. But the opinion that, however the story was intended to be taken by the compiler of the Bk. of Genesis, it might be interpreted as a parable of spiritual truth, has been defended by great names in every age of the Church.†

There are, then, these several methods of interpretation—(1) that the narrative of the Fall is literal history ; (2) that it is a legend, which conveys truth under mythological disguise ; (3) that it is, and was only intended to be, an allegory. The first and third can hardly be adopted in the present condition of exegesis, and it is probable that the second view of the narrative is that which is now most generally accepted by those who have studied the subject. That the biblical form of the legend should represent the facts as they actually took place more closely than the parallel stories which have been collected from the literature of the ancient world, is not surprising to any believer in the unique character of Scripture ; but it is not to be forgotten that it is the great religious truths which underlie the narrative that are of real importance, and these are brought out in the Bk. of Genesis in a quite unique fashion.

ii. The allusions in OT to the story of Gn 3 are few and uncertain. If the rendering of the RV may be pressed, there are indeed two undoubted references to the Fall, viz., 'If *like Adam* I covered my transgressions' (Job 31^{33}), and, 'But they *like Adam* have transgressed the covenant' (Hos 6^{7}). But it seems that, at least in the former passage, כְּאָדָם should be rendered 'after the manner of men,' and this rendering would also be admissible in Hos 6^{7} ; so that we have to look elsewhere for allusions to the Paradise narrative on which stress may be laid. The 'garden of Eden' is mentioned several times by the prophets of the Captivity (Ezk 28^{13} 31^{9}, Is 51^{3}, cf. Jl 2^{3}) ; and the Bk. of Proverbs occasionally mentions a 'tree of life' (see esp. Pr 3^{18} 11^{30}). Ps 90^{3} and Ec 12^{7} have been supposed to take up the language of Gn 3^{19}. It is possible also that we have a reminiscence of the curse upon the serpent (Gn 3^{14}) in Mic 7^{17} 'They shall lick the dust like a serpent,' and in Is 65^{25} 'Dust shall be the serpent's meat,' though the latter passage may be derived from Micah. The conception of a personal tempter of mankind appears in the story of Job and also in 1 Ch 21^{1} (see also Zec 3^{1}) ; but it is not until a later period that we come upon any explicit identification of 'Satan' or the 'Adversary' with the 'serpent,' the first trace of such being Wis 2^{24}. Cf. also Rev 12^{9} and Ro 16^{20} 'The God of peace shall bruise Satan under your feet shortly,' which manifestly has reference to Gn 3^{15}.*

So far, then, as the language of OT is concerned, we have not convincing evidence that the story of the Fall as given in Gn 3 was much in the thoughts of the sacred writers. But were we to conclude, therefore, that the doctrine of a Fall formed no part of their religious beliefs, we should be seriously mistaken. If there is one idea which is throughout conspicuous in OT, it is the idea of *sin.* No other nation of antiquity was possessed with so intense a consciousness of the wickedness of mankind, and of the sin of man as an offence against God. 'Behold, I was shapen in iniquity ; and in sin did my mother conceive me' (Ps 51^{5}). 'There is none that doeth good, no, not one' (Ps 14^{3}). These and many similar passages express the abiding sense of the Hebrew race, that man, as he is, is not in the condition which his Creator purposed for him. The contrast between such a conception of man and that, *e.g.*, present to the mind of a Greek, who viewed man as in his normal, healthy state, is only to be accounted for by a belief such as that which is presupposed and taught in the story of the Fall.

That this belief was, as a matter of fact, definitely, if not consistently, connected with the Paradise narrative in the later ages of Hebrew national life, is proved by the testimony of the books called *Apocrypha* and the literature of the Roman period. This testimony is so important that it will be well to present it in some detail.

(*a*) It is unnecessary to multiply passages which speak of the *depravity of human nature* ; but 2 Es 4^{11} 'How can he that is already worn out with the corrupted world understand incorruption?' is significant. Cf. also 2 Es 7^{68}.

(*b*) This depravity was traced to Adam's fall. The classical passage is 2 Es 3$^{21.22}$. The seer has been speaking of the creation of Adam, his dwelling in Paradise, the one commandment which he transgressed, and the consequent entrance of death into the world. He goes on: 'For the first Adam, bearing a wicked heart, transgressed, and was overcome; *and not he only*, but all they also that are born of him. Thus disease was made permanent; and the law was in the heart of the people along with the wickedness of the root; so the good departed away, and that which was wicked abode still.' Again: 'A grain of evil seed was sown in the heart of Adam from the beginning, and how much wickedness hath it brought forth unto this time!' (2 Es 4^{30}). And once more: 'O thou Adam, what hast thou done? for though it was thou that sinned, the evil is not fallen on thee alone, but upon all of us that come of thee' (2 Es 7^{118}). In this late book are recognized the moral consequences of Adam's sin; in the much earlier work of Ben-Sira there is an allusion to the curse of Gn 3^{19} 'Great travail is created for every man, and a heavy yoke is upon the sons of Adam' (Sir 40^{1}).

---

* *Bible and the Monuments*, p. 90.

† See an interesting note in Coleridge's *Aids to Reflection*, p. 171 (ed. Bohn).

* It may be observed that the temptation of the Second Adam by the devil (Mt 4, Lk 4) explains beyond doubt who was understood by the serpent which tempted the first Adam.

(*c*) That sin came through the *woman* is explicitly stated in Sir 25^{24} 'From a woman was the beginning of sin, and because of her we all die.'

(*d*) That man's seduction was due to the serpent, now for the first time in Jewish literature identified with Satan, is alluded to in Wis 2^{24} 'By the envy of the devil death entered into the world.'

(*e*) The connexion between *death* and *sin* is not so clearly conceived, and there was, apparently, no consistent doctrine on the subject;* but the generally prevailing view seems to have been that of 2 Es 3^{7} 'Unto him thou gavest thy one commandment: which he transgressed, and immediately thou appointedst death for him and in his generations.' Cf. also Wis 2^{24}, Sir 25^{24}. The same view is found in the *Apocalypse of Baruch* (xvii. 3, xxiii. 4) and in the *Book of Enoch* (xcviii. 4).

(*f*) Side by side with passages such as these we have others not less significant, which assert the *personal responsibility* of the sinner. *E.g.* 'They that inhabited the city did evil, in all things doing as Adam and all his generations had done: for they also bare a wicked heart' (2 Es 3^{25}). Cf. also 2 Es 8^{59} and 9^{11}, and, above all, *Apoc. Baruch* liv. 19: 'Non est ergo Adam causa, nisi animæ suæ tantum; nos uero unusquisque fuit animæ suæ Adam.'

It might be urged that 2 Es is a very late book, perhaps belonging to Christian times; but, at all events, that the author of the chapters from which our quotations are drawn was a non-Christian Jew is tolerably certain. And thus we may use the book in support of our conclusion that the Jews, at least from the Captivity onward, conceived of the sin of Adam as having left a permanent trace from the effects of which all mankind were suffering and to suffer.

iii. When we come to the NT, and especially to the Pauline Epistles, we find that this doctrine of the effects of Adam's fall receives at once explanation and relief in the facts of the Incarnation and the Atonement. If we take the points in the order followed in the last section, we see (*a*) that the universal depravity of mankind is everywhere presupposed, and is the basis of the argument of the Ep. to the Romans. To (*b*) we shall return again, and only cite here 1 Co 15^{22} 'As in Adam all die, so also in Christ shall all be made alive.' (*c*) finds illustration in two passages: 'the serpent beguiled Eve in his craftiness' (2 Co 11^{3}), and 'Adam was first formed, then Eve; and Adam was not beguiled, but the woman being beguiled hath fallen into transgression' (1 Ti 2^{14}). (*d*) St. Paul refers to the 'bruising of Satan' in Ro 16^{20}; and the devil is spoken of as 'a murderer from the beginning' in Jn 8^{44}. Cf. also 1 Jn $3^{8.\,12}$. We then come to (*e*), as to which the classical passage in NT is Ro 5^{12-21}. A commentary on these difficult verses cannot be written here; but certain broad principles laid down by St. Paul, who is undoubtedly following and interpreting the narrative in Gn 3, can hardly be mistaken.* That through one man sin entered into the world is his starting-point. Death came through sin (cf. Ro 6^{23} and Ja 1^{15}); and hence death is the common lot of man, first, because of his own personal sin; and, secondly, because it is part of the inheritance which Adam has transmitted to his descendants. At the same time, St. Paul is careful to insist (*f*) that man's personal responsibility for his own acts, and for his own acts alone, remains unimpaired. He does not supply any theory by which the two complementary truths of man's inherited tendency to evil and man's free will may be reconciled; but he leaves them side by side as equally parts of the doctrine which it has been given him to teach. And he goes on to show that the distinctive feature of the gospel is that 'if by the trespass of the one the many died, much more did the grace of God, and the gift by the grace of the one man, Jesus Christ, abound unto the many.' Thus the theology of St. Paul is inextricably bound up with the doctrine of the Fall. The whole point of the comparison and contrast of the first and second Adam is lost, if the destinies of the human race were not deeply affected by a backward step at the beginnings of human history, if it be not true that man's growth in holiness may be described as a recovery effected through grace.

iv. The interpretations of St. Paul's language which have from time to time been accepted by Christians are various; and they depend in part on the view that is taken as to the state of unfallen man, and the divine intention for him. It would be agreed by most theologians that, to use the language of the Church, the 'original righteousness' of which Adam was deprived, was, although in part natural, yet in part *supernatural.* That is to say, he is represented as divinely endowed with a virtuous character, without any such bias towards evil as we experience in ourselves. This is what constituted the unique perversity and heinousness of the first sin, and it is because of this that his sin is counted a 'fall' from a higher spiritual condition. His sin had a disturbing influence on the whole future development of the race, but the character of the disturbance has been differently estimated in different schools of thought. Speaking broadly, the Greek view was simply that the 'original righteousness' of the race was lost; the effect of Adam's sin was a *privatio*, an impoverishment of human nature which yet left the power of the will unimpaired. But the Latin writers who followed Augustine took a darker view of the consequences of the Fall. It is, for them, a *depravatio naturæ*; the human will is disabled; there is left a bias towards evil which can be conquered only by grace. And this is, undoubtedly, nearer to the language of Scripture than the former mode of representing the facts; but it was not always remembered, *e contra*, in Augustinian theology that the 'image of God' remained in man even after the Fall (Gn 9^{6}). It is therefore contrary to Scripture to represent man as *wholly* corrupt. And a deep and serious question arises here as to the relation between the Fall and the Incarnation. It may well be, as the Scotists taught, that it is unjustifiable to represent the high destiny which man may find in Christ as an after-thought in the divine counsels. The Incarnation may have been, for anything we can tell, the predestined climax of humanity, independently of human sin. Bearing these considerations in mind we return to Ro 5^{12-21}, and the various theories which have been proposed in explanation. They may be classified thus—*

---

* See Edersheim, *Life and Times of Jesus the Messiah*, i. 165 ff.

* For St. Paul's argument, as also for the witness of the *Apocrypha* to the doctrine of man's corruption, see Sanday-Headlam, *Romans* (ch. v.).

(*a*) It is urged that St. Paul's language requires us to conceive of the human race as *in Adam* potentially, in the same sense as the oak is in the acorn. Hence, for what he did, we may be counted responsible. The race, not the individual, is the true unit; it is with this unit that God deals. Thus, *e.g.*, David sinned in numbering Israel, but his people were the sufferers from the divine punishment. The words of our Lord in Lk 13^{2-4} suggest to us that there is such a thing as *national* responsibility, apart from the guilt of individuals. Most apposite of all, Levi is said to have paid tithes 'through Abraham' (He $7^{9.10}$). And in this conception of the solidarity of mankind there is, beyond question, a profound truth which is becoming more intelligently and sincerely accepted as the social teaching of the Incarnation is being opened out. 'As in Adam all die, so also in Christ shall all be made alive' (1 Co 15^{22}), are words which point to the unity of the human race as the root of the universality both of sin and of redemption. But we must be careful not to state this so as to do violence to our God-given sense of justice. This is the fault, *e.g.*, of teaching like that of Jonathan Edwards, who spoke of a psychological no less than a physical unity between Adam and his posterity. Ultimately based, as in Augustine, on a mistranslation of Ro 5^{12} (*in quo* as the rendering of ἐφ' ᾧ) and on the adoption in the Vulg. of the word *imputare*, familiar from its use in the courts of Roman law, this teaching may readily become either ultra-mystical or ultra-rationalistic. It becomes ultra-mystical, if the unity of the human race be so spoken of as to conceal the all-important fact that it is only for a person that morality has any intelligible meaning. It becomes ultra-rationalistic, when the phrases 'imputation of sin' and the correlative 'imputation of righteousness' are used as if sin and righteousness were transferable from one person to another. Sin is predicable only of a *person*, not of human *nature*; and the warning of Ezekiel, 'The soul that sinneth, it shall die,' needs to be ever kept in view. St. Paul does not teach that we are accomplices in Adam's sin or partakers of his guilt without a co-operation of our own will, although it be at the same time awfully true that we inherit from him a degraded nature. The abiding truth in the interpretation given by Augustine of St. Paul's teaching as to the Fall, is the truth of the unity of mankind. In this Adam is τύπος τοῦ μέλλοντος.

(*b*) Again, the effect of Adam's fall upon his posterity has been explained by speaking of Adam as *representative* of the race. 'The covenant was made with Adam as a public person, not with himself only, but for his posterity.' But the question arises, How could Adam, in justice, bind his posterity to a covenant of which they were not cognizant? A federal compact of this sort could only bind us, if we had empowered Adam to act on our behalf. And if it be urged that in Adam's case we should have done the same as he, and therefore may justly be punished for what he did, it may be replied that this is a gratuitous assumption, which goes perilously near to depriving the original transgression of moral blame by representing it as inevitable. Here is an important consideration which must not be overlooked. All profitable speculation on the subject of the Fall must recognize frankly its voluntary character. Adam was not necessitated to act as he did; otherwise his action would not involve moral responsibility.

(*c*) We come, then, to the view which is at once most widely accepted and most consonant to all the facts. It is, substantially, the view expounded by John of Damascus. We inherit from our first parents a degraded nature, so degraded that it is for us much harder to overcome sin than it was for Adam. For this inherited depravity of nature we are not responsible; we have inherited it in spite of ourselves. Hence the world is in a 'state of ruin,' and can be remedied only through grace. But we are not, therefore, *guilty*; guilt is incurred only when the evil is voluntarily embraced, when we take up Adam's sin by repeating it, as it were, in our own persons. The rule of Augustine, *Peccatum pœna peccati*, continually receives verification. Coleridge has pressed this view somewhat further. 'It belongs,' he says, 'to the very essence of the doctrine that in respect of original sin *every* man is the adequate representative of *all* men' (*Aids to Reflection*, p. 194). And he holds that Adam's fall is a typical experience repeated afresh in every son of Adam. *Mutato nomine, de te fabula narratur.* The corruption, he urges, 'must be self-originated.' There is an important sense in which this is true; but it is not the whole truth. It is deficient in recognition of the far-reaching character of the first sin. We are not at all in the same spiritual condition as that of the first man; we do not enter on the conflict with evil on the same terms. Our whole attitude to God is different from that of Adam, although we be still 'sons of God.' As the schoolmen put it, in the case of Adam the *person* corrupted the *nature*; with us it is the *nature* which corrupts the *person*. Man is still free, but man is *sick* with a sickness which is displeasing to the All-pure; and for healing of this sickness only a supernatural remedy will suffice. As our Lord taught in the Sermon on the Mount (cf. also Mt 15^{19}), the real seat of sin is within, the heart is the seat of the moral life (cf. Ps 78^{37}, Pr 4^{23}), although the translation of thought into act involves a fresh and distinct step in responsibility.* The advocates of the more rigorous Augustinian doctrine have been accustomed to designate this view as semi-Pelagianism; but it is free from the essential fault of the teaching of Pelagius, on which we say a final word.

(*d*) Pelagius is represented as having held that the infant enters on life crippled in no appreciable degree by any inherited infirmity or waywardness of the will. He begins the world with powers sufficient to cope with the machinations of the evil one. And thus, in so far as he does wrong, it is his own fault; in so far as he does right, he is deserving of approbation. It would seem that Pelagius and his disciples seriously underestimated the influence of Adam's fall on human nature at large. That this nature as corrupt and the seat of sin must be of itself and when unregenerate displeasing to the All-holy, they did not perceive with clearness. And though men, happily, do not always push their opinions to their logical conclusions, the result of such teaching as this would be the denial of any need of grace or of redemption.†

v. We pass on to the question, How far is the doctrine of the Fall affected by modern theories as to the evolution of the human species from lower and less developed types? It has been too often hastily assumed that the belief in the continuity of animal forms is inconsistent with belief in any special prerogative of man, and is still more incompatible with a doctrine which represents his history as having been retrogressive at one point. But neither of these positions can be established.

---

* See for a fuller classification, Schaff in Lange's *Romans* (Eng. tr. p. 191).

* See Hort's *Life and Letters*, ii. 330 f.; see also i. 78.

† See Neander's *Church History*, iv. 331 ff.

The doctrine of the evolution of species is not yet to be counted as more than an extremely probable hypothesis, by which the phenomena of life and growth become intelligible. Many details are, as yet, very obscure, and the laws of inheritance have not by any means been clearly and fully expounded. See HEREDITY. And the application of this doctrine to the descent of man is beset with peculiar difficulties, which cannot be said, as yet, to have been solved. But we are, nevertheless, content in this article to treat of the subject of man's early history in the light of this wonderful law. Evolution may not be the final word of science as to the laws of growth; but it expresses well the results to which investigation has so far attained. We conceive, then, of primeval man as a creature descended from brute ancestors, some of whom he closely resembled in instinct and habit as well as in structure. But there was one marked difference. In him there was present the faculty of self-consciousness; he was conscious of a reason which can make provision for a foreseen future, and of a will which is not necessarily determined by the strongest physical desire. Man is made *in the image of God*, although his bodily lineage be that of the ape-like creatures whom he sees round him. If we may illustrate the facts of his growth by a mathematical illustration, we shall say that the curve of his progress is a continuous curve, upon which he has come to a critical point. At this critical point the curvature seems to change its character; in other words, the man finds himself possessed of faculties which are not, so far as he can judge, the direct product of his former history. They are, to use at once the simplest and the truest words, the gift of God. There may be, perhaps, absolute and visible continuity between the bodily form of the man and of the higher apes; but continuity cannot be so exactly traced in his mental development. There has been a *μετάβασις εἰς ἄλλο γένος*, however it has come about. Henceforth he is not only an animal, but a man. If it be said that it is not scientific to postulate a *saltus* of this kind, it may be asked, Why not? The law of continuity is not a fetish before which we are called to prostrate ourselves; it is nothing more than a convenient working hypothesis, which we find it necessary to desert in this instance, as in others where it will not serve our purpose. And, indeed, it is by no means certain that to the Supreme Mind there is here apparent any breach of continuity whatever. The law may be obeyed, in fact, though the sequence may not be within our observation.

A creature thus emerging from a lower animal condition, even though endowed with the divine gifts of self-conscious reason and free will, would not, indeed, be perfect. He would be, at the earliest stage of a new period of growth, already raised above the ape, but still far removed from the civilized European of modern life. But then we remark that the narrative of Genesis nowhere describes the first man as perfect. When South said that 'Aristotle was but the rubbish of an Adam, and Athens but the rudiments of Paradise,'[*] he was not drawing his picture from Scripture. Neither OT nor NT speak of Adam as perfect, though they speak of him as innocent and pure (cf. Ec 7^{29}). And this was perceived by early Christian commentators. Theophilus of Antioch says that God placed Adam in Paradise *διδοὺς αὐτῷ ἀφορμὴν προκοπῆς ὅπως αὐξάνων καὶ τέλειος γενόμενος, κ.τ.λ.* (*Ad Autol.* ii. 24); and Clement of Alexandria states (*Strom.* vi. 12. 96) that Adam 'was not made perfect in respect of his constitution, but in a fit condition to receive virtue.'[*] This relation to God has been well described as not a state of perfection or a mere disposition, but 'a living commencement which contained within itself the possibility of a progressive development and a fulfilment of the vocation of man.'[†]

Such a state of things is so far removed from anything of which we have experience that we find ourselves continually at fault in the effort to imagine or to describe it. But we must, at least, suppose it to have been a condition in which man obeyed freely the law of that nature to which he had attained; the ideas 'right' and 'wrong' hardly presented themselves to his mind with full meaning, for 'the knowledge of good and evil' was not yet his. It may well have been that the image of God was a gift only germinally bestowed and gradually realized. Man did not come all at once into his splendid inheritance. In the Paradise narrative he is depicted as still at an early stage in his history. He is represented as living a life of communion with God, conscious, as it would seem, that he 'ought' to obey the laws of God, which, as yet, were presented in the simplest and most elementary form; but the consciousness of moral obligation could only be half realized where the knowledge of evil was not present. So far there is nothing in the story which would conflict with the teaching of science, whether physical or mental. In his primitive condition, man would have been able to recognize only the simplest moral commands. He was forbidden to taste of the fruit of 'the tree of the knowledge of good and evil': for so perilous an experience he was not prepared. And, in the absence of temptation from without, it was perhaps possible that this state of purity should have continued. The man's nature, though not developed to perfection, though not strong with the discipline which time and experience bring, was perfectly balanced; and in obeying its dictates he would obey the dictates of his Creator.

How into such a world could evil enter? That is the question which has vexed philosophy from generation to generation. It is a question to which no final or complete answer has been given. But the record of revelation at least puts the difficulty one step further back; it points to the region where the solution is to be sought. In the Bible the fall of the angels precedes the fall of man (Jude^{6}). Temptation came into human life through the machination of a spirit of evil distinct from man. The invitation to sin came from the serpent in the garden, and it took the form of a suggested violation of the command known to be divine. Sin is not an indigenous product, but is brought in *ab extra*, somewhat as it has been suggested that life was first brought to the earth in a meteoric stone. According to the Bible, the origin of evil is to be sought outside human nature.

We are not now in a region where science has anything to tell us. We have only the brief phrases of Scripture as our guide. And it will be observed that we cannot say positively that the temptation would not have been self-suggested, as the man grew in faculty and in strength, had there been no malign influence external to himself.

[*] Sermon on Gn 1^{27}.

[*] See Gibson, *Thirty-Nine Articles*, p. 366.

[†] Martensen, *Christian Dogmatics*, § 78.

We do not know, and cannot know. What is told is this. The man was in a state of innocence and purity, and the suggestion to sin came, as a matter of fact, in the first instance from a personal agency of evil outside the domain of his own will.

Here, then, is ignorance of evil dispelled, whichever course the man adopted. For the conscious refusal of evil, no less than its acceptance, would in a measure involve a knowledge of evil. An apostolic writer speaks of the τέλειος, or perfect man, as one 'who by reason of use has his senses exercised to discern good and evil' (He 5^{14}). True, there would be no personal realization of evil were it not consciously embraced. But its existence must henceforward be definitely conceived. And we may notice that whether man yielded to the temptation or overcame it, in any case he would have advanced a step in knowledge. To yield was a spiritual fall; to resist would have been a spiritual rise. But in any case the new experience would be an intellectual rise. This is a principle which has formed the starting-point of some remarkable speculations as to the Fall both in mediæval and modern times. The philosopher Erigena seems to have had a confused perception of this truth when he taught that sin was relatively necessary for the development of human nature. Schiller, again, interpreted the Fall as the necessary transition of reason from the state of nature to that of culture. The necessity of evil is a prominent feature in the Hegelian philosophy, according to which the life of the world is conceived as inevitably developing itself through antagonism and conflict. This is the *Divina Commedia* of human history, the perpetual tragedy of life. And theologians have pointed out that in Scripture itself the origin of the arts of civilization and of peace is traced to fallen and not to unfallen man. Tubal-cain, 'the forger of every cutting instrument in brass and iron,' and Jubal the father of musicians, are the descendants of Cain (Gn $4^{21.22}$). The truth which seems to underlie speculations such as these is that man would not begin to progress rapidly, in an intellectual point of view, until he became conscious of the resistance to his energies which evil presents. But this consciousness would not have been less intense had he overcome the temptation which assailed him instead of yielding to it. It is only the man who has successfully battled with evil that is conscious of its full strength, for upon him alone has it spent all its powers. And thus to assert that *sin* was relatively necessary for the development of human nature, is to confuse the yielding to temptation with the experience of it. Had primeval man been strong when evil presented itself, we know not to what heights of intellectual, as of spiritual excellence, the race might not have now attained. In this view only is it true that the first temptation marks the 'beginning and the foundation of the development of *mind*, the birth of man's intellectual nature.'*

We find, then, that the doctrine of the Fall, when subjected to examination, is in no way inconsistent with the theory of the evolution of man from lower types, and his growth 'from strength to strength' as the centuries have gone by. There has been a continuous intellectual development. When the pre-Adamite ancestor of the human family was fitted to receive the divine gift of reason, it was granted to him. Like Christ, Adam came *in the fulness of time*, when all things were ready. Up to this point the evolution had been unconscious; henceforward it was to be conscious, and partly assisted by voluntary effort. And the first experience of evil, explicitly recognized as evil, would afford a fresh starting-point for his growth. For such experience of evil, as has been said, would in any event—whether it was conquered or the conqueror—involve a rise in the intellectual scale. Had it been overcome, as it might have been overcome (for the act of Adam is represented as one of free choice), there would have been a rise in the spiritual scale as well. But in the event there was intellectual growth, accompanied by a descent to a lower spiritual level, from which it would be impossible for man to rise without the aid of divine grace. And so the Incarnation and the Atonement mark in the history of mankind a crisis as real, and introduce a force as potent, as when God *created man in His own image*.

Such a view of man's progress is in the strictest harmony alike with the Bible and with the teaching of modern science. For it is to be remembered that what science teaches us is that the history of man has been a history of development, but it does not and could not teach that this development has proceeded along the best conceivable lines.* It is no postulate of modern philosophy that this is the best of all possible worlds. And the Christian doctrine, that man as he presents himself to us in history and in life, though his education through the centuries has been divinely ordered, is not in the condition which was the divine intention for him, is a doctrine which receives verification from daily observation. The divine will has been thwarted, so to speak, by the perversity of the human will. And this has been recognized as the key to the problem of evil by men of all races and creeds. For what is the spectacle which the world of men presents? Newman has described it well in a splendid passage of his *Apologia* (ch. v.): 'To consider the world in its length and its breadth, its various history, the many races of man, their starts, their fortunes, their mutual alienation, their conflicts; and then their ways, habits, governments, forms of worship; their enterprises, their aimless courses, their random achievements and acquirements, the impotent conclusion of long-standing facts, the tokens so faint and broken of a superintending design, the blind evolution of what turn out to be great powers or truths, the progress of things, as if from unreasoning elements, not towards final causes, the greatness and littleness of man, his far-reaching aims, his short duration, the curtain hung over his futurity, the disappointments of life, the defeat of good, the success of evil, physical pain, mental anguish, the prevalence and intensity of sin, the pervading idolatries, the corruptions, the dreary, hopeless irreligion, that condition of the whole race, so fearfully yet exactly described in the apostle's words, "having no hope and without God in the world,"—all this is a vision to dizzy and appal; and inflicts upon the mind the sense of a profound mystery, which is absolutely beyond human solution. What shall be said to this heart-piercing, reason-bewildering fact? I can only answer, that either there is no Creator, or this living society of men is in a true sense discarded from His presence.' The 'outcast man' is, in short, the Great Exception. While every other living thing is striving for its good, man alone is found choosing what he knows to be for his hurt. And so to the believer in God his own experience confirms the eternal truth of the doctrine of the Fall. As Pascal says, 'De sorte que l'homme est plus inconcevable sans ce mystère, que ce mystère n'est inconcevable à l'homme.' That doctrine is indeed a *datum* of revelation; but it harmonizes well with what we know of ourselves and of others. There has been somewhere a backward step in the history of man, who was at the first created 'very good.' And the teaching of St. Paul about sin, stated in terms of the story of Gn 3, but based on the broad ground of observation and experience, gives, as we have seen, the *rationale* of this fact, and brings it into line with the revelation of the gospel. There are two points on which it is necessary to add a few concluding remarks.

---

* See Matheson, *Can the Old Faith live with the New*, p. 219 ff., where the argument of this paragraph is developed at length.

* See Gore, *Lux Mundi*^{10}, pp. 535, 536, and the passage there cited from Aubrey Moore's *Evolution and Christianity*: 'the change which took place at the Fall was a change in the moral region; but it could not be without its effect elsewhere. Even the knowledge of nature becomes confused without the governing truth of the relation of man to God.'

(1) St. Paul, following Gn 2^{17} and 3^{19}, states that death came through sin (Ro $5^{12.14}$). It is tolerably plain that by 'death' he means physical death, although it has been interpreted of the death of the soul (see Sanday, *in loc.*). And he here seems to come into collision with natural science, which teaches that death must have been known upon the earth long before the human species appeared. For ages before the creation or evolution of man, death in the case of the lower animals must have been a necessary concomitant and condition of life. It is not apparent, however, that this touches St. Paul's argument; for he is speaking of the death of *man.* And in the case of man it may well be that had he remained faithful to the law of his being, as communicated to him by his Creator, death would have had no dominion over him. As has been said already, of the condition of primeval man we have little information; it was so utterly unlike anything of which we have experience that confident statements would be out of place. But, at all events, the death of a being made *in the image of God* is a phenomenon of an order entirely different from the death of a beast. Death is the portion of the latter; it is part of the divine intention for him. Not so, for man. For him there is a further destiny in store. And his sin, as it involves alienation from God, involves the withdrawal of that higher life which has been the assurance of immortality. We do not assert of Adam the *non posse mori*, but the *posse non mori*, as long as his fellowship with God, the source of life, was unbroken. But sin reduced him to the state of a lower animal, and thus man became the prey of death. It may well be that, as has been surmised by many of the profoundest of Christian philosophers, there is some intimate connexion between moral evil and physical decay for a composite being such as Scripture represents man to be. And in the Fall of Adam his whole race were thus involved; death passed upon them, not indeed as a *punishment* for something which a remote ancestor had done, but as the inevitable *consequence* of the sin of the head of the race. They inherit a degraded nature, which is subject to the laws of physical dissolution as is the nature of a beast. But 'man's normal condition, according to the OT, is not mortality, with the possibility of attaining immortality by a later gift; but life in God's fellowship, with the possibility of losing it and falling into a condition of an existence which is not life.' * It is not by any means clear that it is within the power of natural science to negative this view.

(2) What may prove a more serious difficulty arises in connexion with the origin of the human race from a single pair, which seems to be presupposed in St. Paul's exposition of the parallelism between Adam and Christ. True, the unity of the race is not disproved by science; and it is believed by many on purely scientific grounds to be more probable than the hypothesis that mankind are descended from several pairs. But if the latter doctrine should command at any time the assent of the scientific world, it would be necessary to modify in some degree what has been said. This article has been written on the assumption that there is nothing contradictory to science in the doctrine of the unity of the human race as descended from common parents. This is certainly the doctrine expounded by St. Paul. But it is a matter which comes within the province of science; and should it ever be disproved, it would be necessary to admit that the apostle was using an illustration not scientifically apt in all respects. It must be observed, however, that in essentials nothing would have to be changed. The great truths, that sin began with the beginning of our race, that its baneful influence has been transmitted from generation to generation, that it is as widespread as mankind itself, that it cannot be eradicated without a gift of grace, are unaffected whether 'Adam' be taken as the name of a single individual, or as a term descriptive of the forefathers of the human species. The universality of sin is a sufficient indication that human nature has been corrupted at its base, whether by the fall of one or of several; and it would still remain true that 'as in Adam all die, so in Christ shall all be made alive.' So much it has been deemed necessary to say, although at present the balance of evidence seems distinctly to favour the doctrine that mankind are descended from one common stock, and so to confirm the analogy drawn out by St. Paul. See also ADAM, ATONEMENT, JUSTIFICATION, HEREDITY, PARADISE, SACRIFICE, SIN.

LITERATURE.—In addition to the books already mentioned, the following may be consulted with profit: Ryle, *Early Narratives of Genesis*; Orr, *Christian View of God and the World*; Laidlaw, *The Bible Doctrine of Man*; Müller, *Christian Doctrine of Sin.* The subject is discussed in all treatises on Systematic Theology.

J. H. BERNARD.

FALLOW-DEER.—This word occurs in the AV among the clean animals (Dt 14^5), and in the list of game furnished for Solomon's daily table (1 K 4^{23}). In each list *'ayyâl*, *zĕbî*, and *yaḥmûr* occur in the same order. The first is correctly translated, both in AV and RV, *hart* (see HART). The second is incorrectly tr. in AV *roebuck*, and correctly in RV *gazelle* (see GAZELLE). The third is incorrectly tr. in AV *fallow-deer*, and, we think, correctly in RV *roebuck* (see ROEBUCK).

G. E. POST.

FALSE WITNESS.—See LYING, OATH.

FAME.—The Gr. word φήμη (from φημί, to declare, say) was used for a divine voice, oracle, and then for a report or common saying. The Lat. word *fama*, beginning, where φήμη left off, with rumour or report, added to that the meaning of reputation or renown. The Eng. word 'fame,' though it once had all the meaning of Lat. *fama*, now retains only the sense of renown or celebrity. Thus in modern Eng. 'fame' is never a fair equivalent for φήμη.

That in 1611 'fame' had the meaning (1) of report, and (2) also of renown, is certain. Thus: (1) Sir T. Elyot, *The Governour*, 1531 (Croft's ed. ii. 291), says, 'all Greece was in great fear for the fame that was sprad of the commynge of the Persians with an infinite armye.' So Tindale's tr. of Mt 24^6 (ed. of 1534) is, 'Ye shall heare of warres, and of the fame of warres' (Gr. ἀκοάς; Wyc. 'openyouns'; Tind. 1526 'noyse'; Cran. 'tidinges'; Rhem. 'bruites'; Gen., Bish., AV, RV 'rumours'). And Bacon (*Adv. of Learning*, II. xxiii. 19) says, 'General fame is light, and the opinions conceived by superiors or equals are deceitful; for to such men are more masked; *verior fama e domesticis emanat.*' Again (2) in Shaks. (*Troilus and Cressida*, III. iii. 228), Achilles says—

'I see my reputation is at stake;
My fame is shrewdly gored';

---

* Salmond, *Christian Doctrine of Immortality*, p. 220.

and in *Henry V.* III. ii. 13, Pistol sings, 'And sword and shield, In bloody field, Doth win immortal fame'; to which the Boy replies, 'Would I were in an ale-house in London! I would give all my fame for a pot of ale and safety.'

In AV both meanings appear, but the former most frequently. The only manifest examples of the meaning 'renown' are 1 K 4^{31}, 1 Ch 14^{17} 22^{5}, Zeph 3^{19}, where the Heb. is *shêm* 'a name.' When the Heb. is *shêma'* (Nu 14^{15}, 1 K 10^{1}, 2 Ch 9^{1}, Job 28^{22}, Is 66^{19}), *shôma'* (Jos 6^{27} 9^{9}, Est 9^{4}, Jer 6^{24}), or *shĕmû'ah* (1 K 10^{7}, 2 Ch 9^{6}), the meaning is not very distinctly marked, but the Heb. words are properly report, tidings (lit. 'hearing'); and in Job 28^{22} (RV 'rumour') as well as in Jer 6^{24} that is manifestly the sense. It is evident also that in the only remaining OT passage, Gn 45^{16} (where the Heb. is *ḳôl*, lit. 'voice'), the sense is report. In NT that sense is probably the only one that occurs. The Gr. words are (1) *φήμη*, Mt 9^{26}, Lk 4^{14}, the only examples of the word, which is nearly as rare in LXX (Pr 16^{2} [for *shĕmû'ah*], 2 Mac 4^{39}, 3 Mac 3^{2}, 4 Mac 4^{22}), with the verb *διαφημίζω*, Mt 9^{31} (*διεφήμισαν αὐτόν*, 'they . . . spread abroad his fame'; Wyc. 1380 'thei . . . defameden hym,' 1388 'thei . . . diffameden hym,' from Vulg. *diffamaverunt eum*). (2) ἀκοή, lit. 'hearing,' Mt 4^{24} 14^{1}, Mk 1^{23} (RV always 'report'). (3) ἦχος, 'echo,' Lk 4^{37} the only occurrence of this meaning (RV 'rumour'). (4) λόγος, 'word,' Lk 5^{15} (RV 'report'), which has this meaning also in Mt 28^{15}, Jn 21^{23} (EV 'saying'). In Apocr., on the other hand, we find only 1 Mac 3$^{26.\,41}$, both with the mod. sense of renown (Gr. ὄνομα, 'name').

RV adds Jer 50^{43} (Heb. *shêma'*) for AV 'report.' 'Fame' is the Wyclifite tr^{n} of 1388 here, 'report' having come from the Geneva Bible of 1560.

J. HASTINGS.

FAMILIAR.—'Familiar spirit' is the tr. in EV of Heb. *'ôbh* wherever it occurs (except Job 32^{19} where in plu. it means 'skin-bottles,' EV 'bottles,' RVm 'wine skins'), on which see Driver on Dt 18^{11} and art. DEMON; also Van Hoonacker, 'Divination by *'Ob*,' in *Expos. Times*, Jan. 1898. 'Familiar' has in this phrase the sense of the Lat. *familiaris*, belonging to one's family, and so to oneself, ready to serve one as a *famulus* or servant. The oldest example in *Oxf. Eng. Dict.* is Stow, *Chron.* (1565) 107, 'A familiar spirit which hee had . . . in likenesse of a Catte.' But it is found in Geneva Bible of 1560, 1 S 28$^{7\,bis.\,8}$ etc., whence it passed into AV. Similar phrases seem to be older, as *Prose Legends* in *Anglia*, viii. 146 (14—), 'Hir famylier aungel thet hadde hir in kepynge'; and Capgrave, *Chron.* 25 (1460), 'That same familiar devel.'

In Jer 20^{10} we find the subst. 'familiars' (Lat. *familiares*), 'All my familiars watched for my halting,' for which RV gives 'familiar friends' as the same Heb. is tr. in Ps 41^{9} AV and RV.

The Heb. is lit. 'man (or men) of my peace.' It occurs also Jer 38^{22}, Ob 7. The most instructive occurrence is no doubt Ps 41^{9}, and the meaning is there at least not simply 'acquaintances, those to whom I should give the ordinary salutation, Peace be with you' (Streane); but rather, as Cheyne, those who are specially attached to me by a covenant.

Illustrations of the subst. 'familiars' are Knox, *Hist.* 38, 'they would chop their familiars on the cheeke with it [the New Testament]'; and Hos 10^{14} Cov. 'All thy stronge cities shalbe layed waist, euen as Salmana was destroyed with his familiers.'

J. HASTINGS.

FAMILY.—i. SCOPE, TERMS, AND DATA.—The term *family* is used in many different senses: (*a*) For larger or smaller groups of persons connected by blood or marriage, from the family in the narrowest sense—a man with his wives and children, and sometimes his mother—to the widest aggregate of kinsfolk between whom relationship is traced—the clan, tribe, nation, or even the human race. (*b*) In a looser sense for communities living in close and permanent intercourse, from the household—including dependants as well as kinsfolk—to the clan, etc., including persons not of the main stock. (*c*) In various fig. senses with which we are not concerned here. OT recognizes and connects the groups denoted by *family* in (*a*) and (*b*), but has no single term for them; still less has it any term corresponding to the Eng. *family*. בַּיִת *house*, approaches most closely to the range of meaning of *family* in (*a*) and (*b*); in Gn 7^{1} Noah with his wife and sons and daughters-in-law are called his *house*; we have also the *house* of David 2 S 3^{1}, of Levi (*i.e.* tribe) Nu 17^{8}, of Israel (*i.e.* the nation) Ex 16^{31}. In P and Ch בֵּית אָב, RV *fathers' house*, is a technical term for a subdivision of a tribe. The origin of these terms in the concrete dwelling connects them with (*b*), cf. similar use of אֹהֶל *tent*, in Ps 78^{67} 83^{6}. So also מִשְׁפָּחָה, EV *family*, is explained (Ges., Fuerst) as etymologically a *union*, obsolete √ שׁפח *to join*, but Buhl connects with Arab. *sapaha*, *to pour out*, and with שִׁפְחָה. מ׳ is strictly a *clan*, and is used in P and late writings (Nu 2, etc.) for the largest division of a tribe; but its meanings also range from the clan to the tribe (Jg 13^{2}) and the nation (Jer 33^{24}). Other terms are derived from the physical tie between kinsfolk, and connect with (*a*), זֶרַע seed (Gn 12^{7}), עֶצֶם bone (Gn 29^{14}), בָּשָׂר flesh (Gn 29^{14}), שְׁאֵר flesh (Lv 18^{12}), with its derivative שַׁאֲרָה (Lv 18^{17}), in the sense of blood-relation; the compounds of ילד bear, beget, מוֹלֶדֶת offspring (Gn 48^{6}), kinsfolk (Gn 31^{3}), תּוֹלְדוֹת clans (Nu 1^{20}). Also, young children collectively are טַף, √ טפף *take quick short steps*. גְּאֻלָּה (Ezk 11^{15}) is a misreading (Cornill, etc. *i.l.*).

This brief statement as to terms shows how the family was bound up with all the social and political arrangements of Israel. Hence it is difficult to draw any natural line of division between the family and other social and political groups, whose institutions are expressed in terms of the family, and derived in fact or theory from it. Moreover, it is often maintained that the idea of the family originated in a social group larger than and different from that consisting of a single man with his dependent women and children. If this is in any measure true, the relations between the family (in the narrower modern sense) and the larger social groups will be still more complicated. This article will be confined, as far as possible, to the family proper, and the larger social groups will be dealt with in the art. TRIBE; but it will be necessary to make some allusion to the relations of the family to the clan, etc.

The data for our subject are the narratives of the family life, esp. of the patriarchs, of Ruth, of David, and of Tobit; the laws dealing with the family; and the various allusions to the subject. OT narratives are, of course, valid authorities for the manners of the times in which they originated, whatever view may be held as to their historicity. Unfortunately, however, both narratives and—in a less degree—laws mostly treat of royal, noble, or wealthy families and their slaves, and we have little direct information as to the poorer free Israelites. Doubtless, the same general principles governed family life amongst all classes, and the wealthy families and their dependants constituted a large proportion of the population; but we have always to bear in mind that the familiar OT pictures are concerned chiefly with certain classes, and that for other cases we must allow for the effect of inferior rank and smaller means.

ii. MEMBERS.—The members of a Heb. family or household included some or all of the following:

the man, as supreme head of the household; his mother, if residing with him after the death of his father; his wives; his concubines; the wives' children; the concubines' children; children of other women, *e.g.* Jephthah (Jg 11^{1}); daughters-in-law; sons-in-law, for example, Jacob with Laban; other free Isr. relatives, friends, or dependants; *gerim* or resident foreigners, EV 'the stranger that is within thy gates' (see GER); male and female slaves, Isr. and foreign, home-born and purchased. Thus the ancient Heb. was larger than the modern family; polygamy increased the number of women and children dependent on a single man; married sons and their families often remained in their father's household; the insecurity of primitive life led individual resident aliens, etc., to attach themselves to households.

(*a*) *Husband's Mother.*—חָמוֹת *ḥāmôth*, AV and RV *mother-in-law.* In Mic 7^{6} (quoted Mt 10^{35}, Lk 12^{53}) the *ḥāmôth* is perhaps the wife of the living head of the household; in Ru, Naomi, herself a widow, is the *ḥāmôth* of widows. But the *ḥāmôth* attained special importance and dignity when, after the death of her husband, her son became the head of the family. She was then the most important and influential woman in the household; a man had many wives, only one mother; he had been trained in deference and obedience to his mother; his wives were his property, and absolutely subject to his authority. They had often been selected by his mother, *e.g.* Ishmael's wife by Hagar (Gn 21^{21}, cf. 2 Es 9^{47}). In the history of the families best known to us—the royal houses of Isr. and Judah—there are numerous indications of the exalted position of the mother of the reigning king. She bears the title גְּבִירָה *mistress.* Her name is regularly given in the paragraph describing an accession, while nothing is said about the wives. Maacah, Jezebel, Athaliah, and Nehushta (2 K $24^{8.\,12.\,14}$, cf. Jer 22^{26}) appear as exercising great influence in the reigns of their sons. The analogy of modern Eastern life fully warrants us in taking the position of the queen-mother as representing that of the mother of the head of any ordinary family. Sometimes a widow herself appears as head of a household, *e.g.* Micah's mother (Jg $17^{1\text{ff.}}$), Naomi in Ru, the Shunammite (2 K $8^{1\text{-}6}$), Tobit's grandmother (To 1^{8}); cf. also the position of the mother of our Lord during His ministry.

(*b*) *Husband, Wives and Concubines.* — The generic terms אִישׁ, אֱנוֹשׁ *man*, אִשָּׁה *woman*, are commonly used for husband and wife, as in most languages. This usage recognizes the fundamental nature of sexual characteristics. In spite of the similarity of the two words, *Oxf. Heb. Lex.* speaks of 'the impossibility of deriving אִישׁ and אִשָּׁה from the same root'; consequently, all deductions based on the reference of the two words to the same root are without any true foundation. The husband is בַּעַל *master*, as supreme over his wives, who are slaves acquired by capture in war (Dt $21^{10\text{-}14}$), or by purchase (Gn 34^{16}, Ex 22^{16}, Dt 22^{29}, Ru 4^{10}). It would be misleading to apply the term 'freewoman' to any Israelitess, except perhaps to a widow. Even in the Mishna, 'women, slaves, and children' are constantly grouped together, *e.g. Berachoth*, iii. 3, and 'a woman is always under the authority of her father until she is placed under the authority of her husband,' *Ketuboth*, iv. 3. The wife as in subjection to the *ba'al* is *be'ûlâh* (Is 54^{1}). The rights of a husband over his wives were limited by affection and custom, by the terms of the marriage covenant or contract (Gn $31^{49.\,50}$, To 7^{14}), by the influence of the wife's family, also by certain specific laws. The marital supremacy involved the right of divorce at the husband's discretion. This is laid down in Dt 24^{1}, which, however, imposes certain vague and obscure conditions, probably intended to discourage capricious divorce (Benzinger, *Heb. Arch.* 346). Is 50^{1}, Jer 3^{8} show that it was usual to give the divorced woman סֵפֶר כְּרִיתוּת 'a bill of divorce,' doubtless that she might be able to resist any attempt on his part to reclaim his rights over her, a divorced woman being in a sense an emancipated slave. Dt forbids a man to divorce his wife, if he has falsely charged her with unchastity before marriage ($22^{13.\,19}$), or if he himself seduced her and had been compelled to marry her in consequence ($22^{28.\,29}$). These enactments and the protest in Mal 2^{16} point to a frequency of divorce. A wife could not divorce her husband (Benzinger, 341). Other limitations of the husband's rights were that he might not marry a sister of one of his living wives (Lv 18^{18}); if a man hears his wife make a vow and does not disallow it at once, he may not do so afterwards (Nu 30^{11}). Even if a woman has been purchased from her parents as a concubine (לְאָמָה) and he does not wish to retain her, he may not sell her to strangers; he must either let her kinsfolk buy her back, or betroth her to one of his sons. If he takes another wife or concubine, he must either maintain the first in her full rights, or let her go free without payment (Ex $21^{7\text{-}11}$). Even a captive who has been taken to wife may not be sold as a slave, but if sent away must be dismissed free of payment (Dt $21^{10\text{ff.}}$). Similarly, in modern Arabia it is held disgraceful to sell a concubine. The rights of a wife would necessarily include those of a concubine.

No very clear information is given as to the relative status of wives and concubines. אִשָּׁה *woman*, is sometimes used as a general term for a wife or concubine (Gn 30^{4}); sometimes for wife as distinguished from concubine (1 K 11^{3}). The words אָמָה (in Hex., chiefly ED), שִׁפְחָה (in Hex., chiefly JP), and פִּילֶגֶשׁ, seem to be practically synonymous when used of concubines. In households where the person of every female slave was—with few exceptions—at the disposal of the master (Benzinger, 162), and where the relative status of the women depended chiefly on his favour, definite and nicely graduated distinctions were impossible. Amongst modern Mohammedans, a man may cohabit with any of his female slaves who is a Mohammedan, a Christian, or a Jewess; and, conversely, he cannot have as a slave a woman whom he acknowledges to be within the prohibited degrees of marriage (Lane, *Arabian Nights*, i. 55, 56). The only definite advantage claimed by wives over concubines is that their children should inherit a larger share, or even the whole, of their father's property, *e.g.* Sarah's claim for Isaac (Gn 21^{10}). Nevertheless the wife, because her position was the result of her husband's favour, and was often guaranteed by powerful relatives, would often enjoy superior consideration, and exercise a greater influence. Sarah, Rachel, and Leah had slave-girls, שְׁפָחוֹת (*shěphāhôth*), who were their own property; and when these became concubines, they were still under the authority of their mistresses. Polygamy is both recognized by the law and described in the history; nearly all the kings and judges of whom we have particulars have a large harem. Acc. to Justin (*Trypho*, 134), even in his time Jewish teachers permitted each man to have four or five wives (cf. Jos. *Ant.* XVII. i. 2; Mishna, *Kedushin*, ii. 7, etc.). But considerations of expense and the approximately equal numbers of the two sexes place narrow limits on polygamy. Nowack (*Heb. Arch.* i. 159) points out that Abraham and Elkanah have two wives, that צָרָה 'adversary' is a technical term for one of two wives, and that Dt $21^{15\text{ff.}}$ speaks of two wives, one beloved, the other hated. He thinks that such bigamy would be very common. In the nature of the case, a large proportion of the population must have been monogamous; cf. the cases of Adam (Gn 2^{22-24}), Noah and his sons (6^{18} 7^{13} 8^{18}), Lot (19^{15}), Isaac, and Joseph. Probably, the monogamy of these patriarchs is narrated as an example. The family quarrels arising out of polygamy are sufficiently illustrated from the familiar examples of Sarah and Hagar, Rachel and Leah, Hannah and Peninnah, and the family history of David (cf. Sir 37^{11} 26^{7} where ἀντιζήλον = צָרָה). On the other hand, Heb. family life must be judged from the point of view of the ancient East, and not from that of the modern West. From the former, there was nothing immoral in polygamy, and the status of wives and concubines was neither regarded by others nor felt by themselves to be humiliating. The acrostic on the Capable Woman, *'ēsheth ḥayil* (Pr 31^{10-31}), testifies to the honourable position of the faithful wife.

We have little information as to the marriages of slaves; apparently, the tie between them was not very binding. A couple who had come into a master's possession as a married couple were to be released together at the end of six years; but if, after a man became a slave, his master married him to another slave, and children were born, the man either went away alone, or remained a slave for the sake of his family (cf. MARRIAGE, WOMAN).

(*c*) *Parents and Children.*—The etymologies of אָב *father*, אֵם *mother*, are quite uncertain; they are common to most Sem. languages, are apparently connected with the terms for *father* and *mother* in the Aryan and other families of languages, and are probably older than the triliteral roots. בֵּן *son* and its *fem.* בַּת have been somewhat improbably connected with בָּנָה *to build*; they too, also, are probably older than the triliteral roots. The father was supreme over the children; he could dispose of the daughter in marriage (Gn 29), [but (Lv 19^{29}) he might not make her a prostitute], and arrange his son's marriage (Gn 24), or sell his children as slaves (Ex 21^{7})—where, however, the father is forbidden to sell his daughter to a stranger (Neh 5^{5}). The power of life and death is attested by the proposed sacrifice of Isaac, the case of Jephthah's daughter, and the practice of sacrificing children to Molech (Lv 18^{21} 20^{2-5}, 2 K 23^{10}, Jer 32^{35}). The utmost respect and obedience to both father and mother are insisted on in Ex 20^{12}, Lv 19^{3}, Dt 5^{16}, Pr 1^{8} 6^{20} 19^{26} 20^{20} 23^{22} 28^{24} $30^{11.17}$, cf. Ezk 22^{7}, Mic 7^{6}. Similarly, Ex $21^{15.17}$, Lv 20^{9} direct that any one smiting or cursing father or mother shall be put to death; Dt 27^{16} invokes a curse upon any one who is disrespectful to father or mother. Pr 13^{24} etc. insist on the duty of strict domestic discipline, though doubtless the 'rod' may be understood as including other chastisement besides corporal punishment (cf. Pr 17^{10}). Dt 21^{18-21} directs that a stubborn and rebellious son, a glutton and a drunkard, is to be stoned to death by his fellow-citizens, on the testimony of his father and mother given before the elders. Such laws really imposed limits on the authority of the father; he must not himself put his son to death, but must procure his punishment by a public legal process. The constant co-ordination of father and mother in such passages practically places the mother on the same level with the father with regard to the children. Indeed, polygamy makes each mother much more important to her own children than their father is. In a polygamous family, each mother and her children form a sub-family,—Jacob's wives and concubines have separate tents (Gn 31^{33}),—the management of which is in the hands of the mother. Hence the early education and training of children was mostly given by the mother. Children were named by the mother, *e.g.* Jacob's sons (Gn 29, 30); sometimes also by the father, *e.g.* Ishmael (Gn 16^{15}), Isaac (Gn 21^{3}). The long period of suckling—infants were not weaned till the second or third year—must have constituted an added bond between mother and children. The religious instruction appointed in Ex 12^{21-27} 13^{5-9}, Dt 4^{9} $6^{7.20-25}$ 11^{19} would probably be given by the mother. The sayings of king Lemuel (Pr 31^{1-9}) were taught him by his mother. On the other hand, Pr constantly refers to the *mûsār* (RV 'instruction') of the father, as well as to the *tôrâh* (RVm 'teaching') of the mother (1^{8}). Acc. to the rank and wealth of the family, the care of the children would devolve in whole or in part on female slaves. Rebekah (Gn 24^{59}) and Joash ben-Ahaziah (2 K 11^{2}) had each a foster-mother *mêneḳeth* (RV 'nurse'), though Rebekah, at any rate, had a mother living. Mephibosheth ben-Jonathan had an *'ômeneth* (RV 'nurse,' 2 S 4^{4}). The grandmother, on either side, would, by all analogy, have much to say about the training of the children; Naomi became the *'ômeneth* of Ruth's baby (Ru 4^{16}). We also have the masculine *'ômēn* (RV 'nursing father, Nu 11^{12}, Is 49^{23}). From the analogy of the guardians of the sons of Ahab (2 K $10^{1.5}$), and of Nathan (2 S 12^{25}), this would appear to have been a kind of tutor or παιδαγωγός. Schools for children are first mentioned in Josephus (*Ant.* XV. x. 5) and Mishna (*Shab.* i. 3). Acc. to Talm. Jerus. (*Kethub.* viii. 11) the first school for children was established by Simeon ben-Shetach, a century before Christ (Stapfer, 141); acc. to Talm. Bab. *Baba Bathra* (Nowack, i. 172), a system of schools in every town was established by Jesus ben-Gamla, who became high priest in A.D. 64. In such schools reading and writing would be taught; any other instruction would mainly consist of committing Scripture, etc., to memory, by repeating passages after the teacher.

(*d*) *Brothers and Sisters.*—The circumstances of Israelite life—the need of labour to till the soil, and of warriors to defend the homestead from the raids of neighbouring tribes, rendered a large family a great blessing (Ps $127^{4.5}$). The natural checks—war, famine, and pestilence—prevented all danger of over-population. The labour of girls in the household, the price that might be obtained for them as wives or concubines, and the alliances with powerful neighbours that might result from their marriages, gave a certain value to daughters; but the Isr. father's chief desire was for sons; it was the first-born sons who were sacred to J″ (Ex 22^{29}). The physical token—circumcision—of the national covenant with J″ is such as can be borne only by males; a mother is unclean for 14 days after bearing a daughter, but only for 7 after the birth of a son. Daughters are very rarely mentioned by name.

Each sub-family of full brothers and sisters, the children of one mother, had interests of its own, which clashed with those of the other sub-families. Domestic friction was specially strong in the numerous smaller households where there were two wives, *e.g.* Hannah and Peninnah [cf. the term צָרָה (Dt 21^{15-17}), and for two wives in a large household, Sarah and Hagar]. The relative status of the sub-families depended on the family relationships of the mother, the favour shown her by her husband, and in some measure on her being wife or concubine. We have already seen that claims were sometimes made that the children of a wife should oust those of a concubine from all or part of their share of the family inheritance. But these claims are not sustained by any legal ordinance or even by any general custom. The sons of Jacob's concubines rank as ancestors of tribes. It is true that they are reckoned in a sense as children of their mothers' mistresses, but the same was true of Ishmael, who was excluded from the seed of the promise. There was no difference of legitimacy in our sense between the sons of wives and concubines; even Jephthah, the son of a *zônâh* or prostitute, is brought up in his father's house, and his expulsion is evidently regarded as an act of unjust violence (Jg 11[1. 7]) (Benzinger, 148, 135). Apparently, all a man's acknowledged children were legitimate, without regard to the status of their mother. The bastard, *mamzēr* (Dt 23[3] [EV [2]], Zec 9[6]), is generally regarded as the offspring of incest or adultery (Dillm. and Driver on Dt 23[2]). Possibly, however, *mamzēr* may include children of prostitutes, whose fathers were unknown or did not acknowledge them.

In earlier times polygamous sub-families were so distinct that brothers married half-sisters, *e.g.* Abraham and Sarah (Gn 20[12]). In 2 S 13[13] Tamar thinks that David would certainly sanction her marriage with her half-brother. Such unions are, however, forbidden by Lv 18[9].

The same causes which rendered the mother more important to her children than the father, often rendered the brothers the special guardians of their full sisters, *e.g.* Laban of Rebekah, Simeon and Levi of Dinah (Gn 34), Absalom of Tamar. So, children often maintained a close connexion with their mother's family, Jacob (Gn 27[43]), Abimelech ben-Gideon (Jg 9[1]), Absalom (2 S 3[3], 13[37]).

The sons were the heirs, but in the absence of sons the daughters might inherit, and after the daughters other male relatives in order of kinship (Nu 27[1-11]). A special birthright and a larger share of the inheritance were given to the first-born, both in the history (Gn 49[3]) and the law (Ex 22[29]); but the *bĕkhôrâh*, or right of the first-born, was not purely a matter of priority of birth, it might be sold, *e.g.* by Esau to Jacob, or bestowed on a younger son by a partial father, Dt 21[17]—which forbids such a practice. Side by side, however, with the first-born, the youngest son constantly appears as the object of special favour, both from God and his parents, *e.g.* Abraham, Isaac, Bethuel, Jacob, Joseph, Ephraim, Moses, David, Solomon (cf. HEIR).

(*e*) *Married Children, Daughters-in-law, Sons-in-law.*—A married son would remain part of the father's family, though not necessarily of his household, while the father lived. He would still be in some measure subject to his authority. The patriarchs were married men with families when Isr. went down into Egypt, but Jacob was still the head of the family (cf. Job 1). So the daughter-in-law joined her husband's family and came under the authority of her father-in-law (To 10[12]), to whom she was subject even after her husband's death, *e.g.* Judah and Tamar (Gn 38). If her father-in-law was dead, she belonged to her brother-in-law or husband's next-of-kin (Dt 25[5], Ru 3[13]), or might remain with her mother-in-law (Ru 1[6]). Sometimes, however, a man joined his wife's family, at any rate for a time, and fell under the authority of his father-in-law, *e.g.* Jacob (Gn 29-31), Moses (Ex 2[20-22] 4[18], cf. Gn 24[5]; see § v.).

(*f*) *Other free Dependants.* — Doubtless, more distant relatives, cousins, etc., friends and free servants, would sometimes form part of the family in the narrower sense; but we have hardly any information on the subject. Little is said as to hired servants; probably they were hired only for short periods, and did not form part of the employer's family. Micah's Levite, indeed, was hired to be a priest permanently at a regular stipend, 'and the young man was unto him as one of his sons' (Jg 17[11]). The resident alien, *gēr* (RV 'stranger'), *tôshābh* (RV 'stranger' or 'sojourner'), is constantly referred to, and is commended to the good offices of the Israelites. The *gēr* is mentioned in close connexion with the other dependent members of the household (Ex 20[10], Lv 25[6]). He seems to have placed himself under the protection of the family rather than the clan; he probably rendered some services in return for protection and sustenance, and may often have been a hired servant; he was evidently a familiar figure in Isr. society. The *gēr* was united to his hosts by close ties. His legal status and personal safety depended upon their protection, and they were bound by the sacred obligations of Eastern hospitality to care for him as for one of their own kin. He was entitled to the Sabbath rest (Ex 20[10]), and to eat the passover if he became circumcised (Ex 12[48]). See GER, HIRED SERVANT, STRANGER.

(*g*) *Slaves.*—The slave was substantially one of the family. The master's authority over him did not differ essentially from that over wives and children, and the wife was purchased like the slave. Conversely, a female slave might become a concubine, and a male might marry his master's daughter (1 Ch 2[34. 35]), or become his heir (Gn 15[3]). Slaves were circumcised and ate the passover. The *yĕlîdh bayith*, or home-born slave, would have the closest, and the purchased Isr. slave, who had to be released at the end of six years, the loosest ties to his master's family. We gather, however, from Jer 34[14] that the custom of releasing Isr. slaves was not strictly observed. See SLAVE.

iii. MUTUAL RESPONSIBILITY. — In primitive times the family, in a narrower or wider sense, was the efficient social organization; and such functions of modern government as were discharged at all were represented by the mutual claims and duties of kinsfolk. Many laws and customs of Isr. are a legacy from this primitive system. In ancient times the only protection for life or property lay in men's willingness to defend and avenge their kinsmen. This right and duty is still recognized in OT; the next-of-kin, *gō'ēl*, must punish his kinsman's murderer, marry his widow if the deceased was childless, and may inherit his property. See GOEL, and section on Levirate Marriage under MARRIAGE. One would suppose that this strong sense of family duty would have led kinsfolk to provide for destitute relatives. But men were often obliged to sell themselves or their children for slaves, and widows and orphans are constantly spoken of as poor, helpless, and oppressed. Doubtless, the ordinary calamities —drought, dearth, famine, pestilence, invasion— would often ruin whole clans at the same time; but it is also clear that family feeling was no adequate substitute for legal provision for the poor.

iv. FAMILY RELIGION.—As the nation had its religious symbol of circumcision, its sanctuaries, sacrifices, priests, and festivals, so the family had its special *sacra*. According to Benzinger, 137, and Nowack, 154, following Stade, etc., the Israelite family was essentially a society bound together by common religious observances, *Cultgenossenschaft*. Thus, in the patriarchal narratives, the patriarchs, as head of the family, erect altars and offer sacrifices; similarly, the passover was a family rite, observed in the home, often, of course, temporary. In 1 S 20[29] we read of clan-sacrifice, *zebaḥ mishpāḥâh*, at Bethlehem. The family burying-place is sacred (Gn 23). Benzinger and Nowack see in the cutting off of the hair and the self-mutilation forbidden in Dt 14[1ff.], Lv 19[27. 28], remains of ancient ancestor worship; cf. the practice of necromancy (1 S 28). Teraphim are usually understood to have been images or symbols of ancestors. In later times the instruction directed to be given in Dt 6 would be matter for the family; and the regulations as to ceremonial cleanness tended to make the whole personal and family life a continuous series of religious observances. The later system, however, differed from the former in that in primitive times each family had rites peculiar to itself, in later times all families practised the same rites.

v. EARLY HISTORY OF THE FAMILY.—Under the monarchy, the family was constituted under the headship of the father, who was supreme over wives and children, and primogeniture was recognized in the transmission of authority (royal, priestly, etc.) and property. The Hex. traces these institutions back to the origin of the human race in Adam and Eve; at the same time it preserves many incidents which have been held to point to an altogether different state of affairs in early times. It is maintained by W. R. Smith and others that the head of the family was originally the mother (mother-right, matriarchate), and that descent was traced only through the mother. Marriage was then polyandrous (of which the levirate marriage is supposed to be a relic), and *be'ena* marriage, in which the man becomes one of the wife's family, and goes into her tent (cf. § 7 and Gn 2^{24}), as opposed to *ba'al* marriage, where the wife enters her husband's family. This view is based partly on parallels amongst other primitive peoples, and esp. amongst the Arabs; and partly on various traces in OT, some of which have been already mentioned. In connexion with this theory, it has also been maintained that exogamous totem-clans existed in ancient Israel. Such clans are united by the use of a common badge, connected with some animal or plant after which the clan was named; intermarriage between members of the clan is regarded as incest, and the totem may not be eaten. One example cited is the clan Caleb (dog), the dog being unclean (Dt $14^{4.5}$), and its flesh forbidden food. Even if it should ultimately be proved that such theories are partly true, it is clear that *be'ena* marriages and totemism were obsolete and forgotten in historic Israel, and that they can be traced only in customs whose original significance was no longer understood.

vi. THE FAMILY IN APOCR. AND NT.—Throughout the Bible, but esp. in the later books of OT, in Apocr., and in NT, the sacred history refers incidentally to the family institutions of numerous Gentile nations; but any general treatment of these would be beyond the scope of biblical archæology. Various subjects raise special questions of this nature, and these are dealt with in the articles on those subjects.

Our data do not point to any regular development in the later history of the Jewish family. Its character and principles were as permanent as social institutions mostly are in the East. Features of OT family life reappear in Apocr., NT, and Talm., and still persist amongst modern Arabs and Syrians. The family history of the Herods is very similar to that of David.

The Pent.—some of whose laws embody the most primitive customs of Israel—remained to the last the authoritative code of Judaism. Probably, however, much of the Pent. legislation was always a mere counsel of perfection, and other portions were obsolete in NT times. Often discussions in the Talm. are purely academic arguments on regulations which had no bearing on actual life. But if there was no continuous development of Jewish life, it would still vary with varying circumstances. For instance, under a strong, well-organized government, like that of some of the Jewish kings, of the Herods and the Romans, the jurisdiction of the head of the family and private blood-revenge would be controlled and limited. The settlement of a large Gentile population in Pal., and the dispersion of the Jews throughout the ancient world, would sometimes modify, sometimes also accentuate, the observance of Jewish customs. Probably, Western influences reinforced the tendency to monogamy, which we have already noticed in OT. It is doubtful whether 1 Ti $3^{2.12}$, Tit 1^6 inculcate monogamy, cf. 1 Ti 5^9. Our Lord's limitation of divorce (Mt $5^{31.32}$) followed the teaching of Shammaï.

LITERATURE.—For the early history of the family, W. R. Smith, *Kinship and Marriage in Early Arabia*, and 'Animal Worship and Animal Tribes among the Arabs and in OT' in *Journ. of Philology*, vol. ix.; J. F. M'Lennan, *Primitive Marriage*, and the essay on 'Totem-Clans in OT' in Joseph Jacobs' *Studies in Bibl. Archæology*; Bertholet, *Die Stellung d. Isr. u. Jud. z. d. Fremden*, esp. pp. 1–80. For the Bible history, the sections on the Family, and the laws of Marriage, Divorce, Parents and Children, etc., in Ewald, *Alterthümer*^{3} (Eng. tr. *The Ant. of Isr.* from 1st ed. 1844); Keil, *Handb. der Bibl. Arch.*^{2} 1875; Benzinger, *Heb. Arch.* 1894; Nowack, *Lehrb. der Heb. Arch.* 1894; J. F. McCurdy, *Hist. Proph. and the Monuments*, ii. 36–77; Dillmann and Driver on the passages from Pent., for OT; Schürer, *HJP*, for NT; also art. in Herzog's *RE*; Schenkel's *Bibellex.*; Riehm's *HWB*.

W. H. BENNETT.

FAMINE (רָעָב, *λιμός*) in Syria and Egypt in past times may be attributed to four causes—

i. Want of water, *i.e.* rainfall or inundations, in due season.
ii. Destruction of corn and fruit by hail and rain out of season.
iii. ,, of all growing crops by locusts and caterpillars.
iv. ,, of food supplies by the hand of man.

i. Owing to the want of water in due season the famine might be widespread in extent, but in other cases it would be only partial and local. In the train of famine always comes sickness, which develops into pestilence and other scourges according to the intensity of the want and privation to which the people and flocks and herds are subjected. In prehistoric times famines may have been due to a failure of rain at any time of the year, as the people were dependent upon the spontaneous vegetation for the sustenance of themselves, their herds, and their flocks; but, after agriculture was introduced, the severity of famines could be much mitigated by storing up reserves of corn, thus enabling the bulk of the people to live independently of their herds and flocks; and famines would result more from the failure of rain in due season, that is to say, at the time when it was required for the early growth of the corn. For the plenteous years cf. Lv $26^{4f.}$ 'Then I will give your rains in their season, and the land shall yield her increase, and the trees of the field shall yield their fruit. And your threshing shall reach unto the vintage, and the vintage shall reach unto the sowing time; and ye shall eat your bread to the full, and dwell in your land safely.' The opposite condition of things is described in Lv $26^{19f.}$ 'And I will make your heaven as iron and your earth as brass; and your strength shall be spent in vain: for your land shall not yield her increase, neither shall the trees of the land yield their fruit.' In countries which depend upon the natural rainfall for the growth of cereals, and not upon irrigation and inundations, recurrence of rain in due season is a matter of the utmost importance; and scarcity of wheat and barley may be due, not to any want of rain, but to its fall at a wrong season—for example, in summer time, instead of during the winter and spring.

The Wilderness of the Wanderings or Desert of Arabia Petræa, in common with those east of Pal., differs greatly from Syria and Egypt in its food supplies; but it is only in comparison with the extraordinary fertility of Syria and Egypt that it can be considered as a desert. It has, from the earliest time, consisted of arid tablelands, mountainous districts, and sandy dunes, intersected by fertile valleys and plains and cultivable tablelands, and its present parched and barren condition is due in a great measure to the action of the Turkish Government in drawing a revenue from the destruction of trees. There are in all directions ruins of vineyards and terraces on the slopes of hills, indicating former cultivation; and there are yet tablelands where corn is cultivated, and plains where there are thousands of date trees. The nomadic tribes do not exist solely on the produce of their herds and flocks, but from the earliest historic times have used corn for food, and have cultivated corn for themselves, either in conjunction with neighbouring villages or by means of slave labour. There is a scanty herbage at all times over a great portion of this wilderness, and in January and February water and grasses are found everywhere, and the flocks can roam about at will. During November, December, and March there are dense mists and fogs and heavy dews, which saturate the shrubs and even deposit moisture on the rocks, so that flocks do not require to go to water. These mists depend upon the direction of the wind, and alternate with intense droughts. As the summer advances the pasture is confined principally to the broad water-courses, which give good herbage for many weeks: as the drought increases the inhabitants are reduced to great straits, having to live with their flocks on pastures many miles (sometimes twenty miles) from water. The flocks are driven over to the water once or twice a week, and a small quantity is brought back for the use of the encampment. These nomads and their flocks are of the most hardy nature, and can go without water for many hours or even for days; but they live for a portion of each year on the borderland of famine, and a very little extra scarcity brings on such want and privations that they, with their flocks, either move on to more favoured localities or die.

Egypt has always been remarkable for its extreme fertility, and is well watered everywhere (Gn 13^{10}). It is not directly dependent on rainfall, the annual flooding of the river Nile inundating nearly the whole land and making the cultivation of the soil, as a general rule, a yearly certainty: a land where 'thou sowedst thy seed, and wateredst it with thy foot, as a garden of herbs' (Dt 11^{10}). These inundations are caused by the rainfall over the districts where the Nile rises, and they fail at rare intervals. This exposes the land to drought, and famine ensues from want of corn, and in a minor degree the pasturage also fails.

The extraordinary fertility of the Promised Land is constantly alluded to in the Bible: 'a land of hills and valleys, and drinketh water of the rain of heaven' (Dt 11^{11}). 'I will give the rain of your land in its season, the former rain, and the latter rain, that thou mayest gather in thy corn, and thy wine, and thine oil' (v.^{14}). Its soil is of a very rich description, and formerly clothed the hillsides in terraces, though now, for the most part, it lies at the bottom of the valleys. Although Pal. has been dependent mainly on its rainfall, its streams have been utilized largely for irrigation purposes in the plains and in the Jordan Valley, and on the banks of the Jordan itself the rich soil is subject to inundations in the spring (Jos 3^{15}).

The first famines mentioned in the Bible are those which occurred in the times of Abraham and Isaac (Gn 12^{10} 26^{1}). In the first case, Abraham went down into Egypt to sojourn there; in the second case, Isaac was about to do the same, but, being warned by God, went to Gerar to reside with Abimelech, king of the Philistines. It may be assumed that these famines were only partial in their extent.

The famine which took place in the time of Jacob was one of great extent, as it included Syria, Egypt, and the sources of the Nile, and was one of great severity and long duration; it is recorded that 'there was famine in all lands' (Gn 41^{54}). It lasted seven years, and was remarkable as having been preceded by seven years of plenty, which being foretold by Joseph, the Egyp. Government was enabled to gather up sufficient corn, not only to buy up all the lands and cattle of the Egyptians and to supply the people, but also to sell corn to foreigners. 'And all countries came into Egypt to Joseph for to buy corn; because the famine was sore in all the earth' (Gn 41^{57}). It is to be noted, however, that this is a famine restricted to want of corn, and that there is no indication that there was great want of pasturage. The sons of Jacob were able to take their asses to and from Egypt without difficulty. Waggons were sent to bring up Jacob and his households. 'And their father Israel said unto them, If it be so now, do this; take of the choice fruits of the land in your vessels, and carry down the man a present, a little balm, and a little honey, spicery, and myrrh, nuts and almonds' (Gn 43^{11}). 'And they took their cattle, and their goods, which they had gotten in the land of Canaan, and came into Egypt' (Gn 46^{6}).

Famines are mentioned in the time of the judges (Ru 1^{1}), and in the time of king David (2 S 21^{1}), but it is not until the time of Elijah that any account is given of the failure of the pasturage and springs. 'There shall not be dew nor rain these years, but according to my word' (1 K 17^{1}). 'And Ahab said unto Obadiah, Go through the land, unto all the fountains of water, and unto all the brooks: peradventure we may find grass and save the horses and mules alive, that we lose not all the beasts' (18^{5}). Amongst the signs of the end in Jesus' eschatological discourse are 'famines in divers places' (Mt 24^{7}, Mk 13^{8}, Lk 21^{11}). For the famine referred to in Ac 11^{28}, see CLAUDIUS.

ii. A graphic description of destruction of crops by hail is given Ex $9^{23.\ 31.\ 32.}$ 'The LORD sent thunder and hail, and fire ran down unto the earth; and the LORD rained hail upon the land of Egypt.' 'And the flax and the barley were smitten, for the barley was in the ear, and the flax was bolled. But the wheat and the spelt were not smitten; for they were not grown up.' The unusual occurrence of thunder and rain in the time of wheat harvest is accentuated in 1 S 12^{16}.

iii. The effect of the destruction of crops by plagues of locusts is depicted Ex 10^{15} 'For they covered the face of the whole earth, so that the land was darkened; and they did eat every herb of the land, and all the fruit of the trees which the hail had left; and there remained not any green thing, either tree or herb of the field, through all the land of Egypt.' Again, Jl 1^{4} 'That which the palmer-worm hath left hath the locust eaten; and that which the locust hath left hath the canker-worm eaten; and that which the canker-worm hath left hath the caterpillar eaten.' (See Driver, *ad loc.*)

iv. The most terrible results of famine related in the Bible are due to the hand of man; and this was well recognized by king David. 'And David said unto Gad, I am in a great strait; let us fall now into the hand of the LORD; for his mercies are great: and let me not fall into the hand of man' (2 S 24^{14}). 'And he shall eat the fruit of thy cattle, and the fruit of thy ground, until thou be destroyed: which also shall not leave thee corn, wine, or oil, the increase of thy kine, or the young of thy flock, until he have caused thee to perish' (Dt 28^{51}). 'And thou shalt eat the fruit of thine own body, the flesh of thy sons, and of thy daughters, which the LORD thy God hath given thee, in the siege, and in the straitness, wherewith thine enemies shall straiten thee' (v.^{53}). 'And there was a great famine in Samaria: and, behold, they besieged it, until an ass's head was sold for fourscore pieces of silver, and the fourth part of a cab of dove's dung for five pieces of silver' (2 K 6^{25}). 'And she answered, This woman said unto me, Give thy son, that we may eat him to-day, and we will eat my son to-morrow' (v.^{28}).

Josephus, in his *Antiquities* and *Wars of the Jews*, gives several accounts of the horrible atrocities which took place during the famines in besieged cities, but in no account does he give such distressing details as in the story of the last siege of Jerus. by Titus, in which he sums up that 'neither did any other city ever suffer such miseries' (*Wars*, V. x. 5). This account of Josephus is considered to be a description of the fulfilment of the prophecy by our Lord (Mt 24^{21}), 'For then shall be great tribulation, such as hath not been since the beginning of the world until now, no, nor ever shall be,' and is the history of the last famine connected with the Bible.

In the Bible there is no allusion to horrors and privations due to famine such as occur periodically in the world at the present time in the overcrowded portions of China and India.

C. WARREN.

FAMISH. — Occurring but four times in all, 'famish' is thrice used transitively. Zeph 2^{11} 'he will famish all the gods of the earth' (רָזָה, lit. as AVm 'will make lean'); Gn 41^{55} 'And when all the land of Egypt was famished, the people cried to Pharaoh for bread' (וַתִּרְעַב); Is 5^{13} 'their honourable men are famished' (כְּבוֹדוֹ מְתֵי רָעָב, lit., as AVm and RVm, 'their glory are men of famine,' but the reading is doubtful, see esp. Driver on Dt 32^{24}). This transitive use of 'famish' may be illustrated by Coverdale's tr. of Jl 1^{20} 'the shepe are fameszshed awaye,' and Shaks. *Tam. of Shrew*, IV. iii. 3—

> 'What, did he marry me to famish me?'

Tit. Andron. V. iii. 179—

> 'Set him breast-deep in earth, and famish him';

and Milton, *PL* xii. 78—

> 'Thin air
> Above the clouds will pine his entrails gross,
> And famish him of breath, if not of bread.'

The intrans. occurrence is Pr 10^{3} 'The Lord will not suffer the soul of the righteous to famish.' The Heb., translated 'suffer to famish,' is the same (though in Hiphil) as in Gn 41^{55}, and scarcely means more than 'cause to hunger'; so that the statement loses some of its comfort under the Eng. translation, if it does not even lose all its point. J. HASTINGS.

FAN, FANNER.—Fan is used both as verb and as substantive. 1. As verb (Heb. זָרָה in *Qal*) Is 41^{16} 'Thou shalt fan them [the mountains and hills], and the wind shall carry them away'; Jer 4^{11} for purifying; 15^{7} for chastisement; and (same Heb. in *Piel*) Jer 51^{2}. Amer. RV has 'winnow' throughout. 2. As subst. 'a winnowing-machine,' Is 30^{24}, Jer 15^{7} (מִזְרֶה); Mt 3^{12}, Lk 3^{17} (πτύον). *Fanner* occurs only in Jer 51^{2} 'I will send unto Babylon fanners, that shall fan her, and shall empty her land.' The Heb. of the Massoretic pointing (זָרִים) means 'strangers,' and so RV after Ewald and others. But the VSS (LXX. Pesh. Targ. Vulg.) point the Heb. differently (זֹרִים), and gain the word-play. Cheyne thinks the prophet possibly intended to suggest both meanings. The Eng. tr. may be traced from the Vulg. *ventilatores*, through Cov. 'fanners,' whom Geneva, Bishops', Douay, and AV all follow. So also Luther (*Worfler*), and Rothstein in Kautzsch; and the French translators Ostervald and Segond (*vanneurs*). See AGRICULTURE. J. HASTINGS.

FANCY is used as a verb absolutely in Sir 34^{5} 'And the heart fancieth, as a woman's heart in travail' (φαντάζεται; a verb which occurs elsewhere in LXX only Wis 6^{16}, 'showeth herself,' and in NT only He 12^{21} τὸ φανταζόμενον, AV 'the sight,' RV 'the appearance'). The previous Eng. Versions from Wyc. have 'fantasie' as a subst. (Douay 'phantasie'), AV is the first to use the verb, and to spell 'fancy.'* The *Oxf. Eng. Dict.* gives only one example of 'fancy' used absolutely, Locke (1698) 'we rather fancie than know.'

J. HASTINGS.

FAR.—1. 'Far' is often used in AV as an adj. qualifying 'country,' as Is 8^{9} 'all ye of far countries' (כֹּל מֶרְחַקֵּי־אָרֶץ); Zec 10^{9} 'they shall remember me in far countries' (בַּמֶּרְחַקִּים). Twice it qualifies other substantives, Dt 29^{22} 'a far land' (אֶרֶץ רְחוֹקָה); Mk 13^{34} 'a man taking a far journey' (ἄνθρωπος ἀπόδημος, RV 'sojourning in another country'). Modern usage would probably require 'distant,' as Aldis Wright suggests. Certainly as an adj. 'far' was once used more freely than it is now: thus, Bp. Barlowe, *Dialoge* (1531), ed. of 1897, p. 35, 'Now to compare these fruites unto the actes of these Lutheran factyons, ye shall fynde a farre difference.' In Mt 21^{33} 25^{14}, Mk 12^{1}, Lk 20^{9}, where the Greek is ἀποδημέω and AV has 'go into a far country,' RV more accurately translates 'go into another country.' But the same Greek is rendered by AV 'took his journey' in Mt 25^{15}, by RV 'went on his journey'; and in Lk 15^{13}, where the Greek is more fully ἀπεδήμησεν εἰς χώραν μακράν, AV renders 'took his journey unto a far country,' and RV retains.

2. Notice the phrases: (*a*) *thus far*, Jer 48^{47} 'Thus far is the judgment of Moab,' 51^{64} 'Thus far are the words of Jeremiah' (both עַד־הֵנָּה), and Lk 22^{51} 'Suffer ye thus far' (ἕως τούτου). (*b*) *So far forth* = 'to such an extent,' 1 Es 1^{52} (ἕως οὗ). (*c*) *Be it far from* or *far be it from*. This phrase, which comes from Wyclif (esp. ed. 1388) after Vulg. *absit hoc*, occurs eight times in AV of OT as the translation of *ḥâlîlâh*, a substantive formed from *ḥâlal*, to profane, with locative suffix, therefore lit. *ad profanum*! to the unholy! The passages are Gn $18^{25\ bis}$, 1 S 2^{30} 20^{9} 22^{15}, 2 S $20^{20\ bis}$ 23^{17}, Job 34^{10}. [Elsewhere the same Heb. expression occurs Gn $44^{7.17}$, Jos 22^{29} 24^{16}, 1 S 12^{23} 14^{45} 20^{2}, Job 27^{5}, where it is tr. 'God forbid' (AV and RV); also (combined with יהוה) 1 S 24^{6} 26^{11}, 1 K 21^{3} 'the LORD forbid'; and (combined with אֱלֹהִים) 1 Ch 11^{19} 'My God forbid.'] In Apocr. the same Eng. phrase is found, 1 Mac 13^{5} 'be it far from me' (μή μοι γένοιτο); and in NT Mt 16^{22} 'Be it far from thee, Lord' (Ἵλεώς σοι, where θεὸς γένοιτο is understood, as RVm 'God have mercy on thee').

The Lord is 'far from the wicked' (Pr 15^{29}), but He is 'nigh unto all them that call upon him' (Ps 145^{18}); so the Psalmists frequently cry, 'Be not far from me' ($22^{1.11.19}$ 27^{9} 35^{22} 38^{21} 71^{12}), for in His presence is fulness of joy (Ps 16^{11}). St. Paul taught the Athenians that He is 'not far from every one of us' (Ac 17^{27}), yet it is by the blood of Christ that we are 'made nigh' (Eph 2^{13}), so that we are encouraged and enabled to 'draw near with a true heart in fulness of faith' (He 10^{22}).

J. HASTINGS.

FARE, FAREWELL. — To 'fare,' from Anglo-Saxon *faran* (Ger. *fahren*, Gr. πορ-εύομαι), is to 'travel,' to 'go,' as Spenser, *FQ* I. x. 63—

> 'But let me here for aye in peace remaine,
> Or streight way on that last long voyage fare.'

Then comes the meaning 'get on' well or ill, as 1 S 17^{18} 'look how thy brethren fare' (תִּפְקֹד לְשָׁלוֹם, lit. 'visit thy brethren [and inquire] as to their wellbeing' [cf. Gn 37^{14}, 2 S 11^{7}]; Cov. 'loke how thy brethren do,' Wyc. 'thi britheren thou shalt visite, if thei right doon'); Sir 3^{26} 'A stubborn heart shall fare evil at the last' (κακωθήσεται, RV 'fare ill'); 32^{24} 'he that trusteth in him shall fare never the worse' (οὐκ ἐλαττωθήσεται, RV 'shall suffer no loss'); 2 Mac 9^{20} 'If ye and your children fare well'; 11^{28} 'If ye fare well' (both ἔρρωσθε). The perf. pass. of the Greek verb found in the two last-quoted passages (ῥώννυμι) was used in the imperative sing. (ἔρρωσο) or plu. (ἔρρωσθε) as a formula for closing a letter, lit. 'be strong, prosper.' This formula is accordingly expressed by the word **farewell** in English. In Ac 15^{29}, where the verb is plu., the older form is retained in AV and RV 'fare ye well'; but in 23^{30}, where the verb is sing., AV has 'Farewell' (RV with most edd. omits). Once 'farewell' is the tr. of χαίρειν, 2 Co 13^{11} 'Finally, brethren, farewell' (RVm 'rejoice' or 'be perfected'). 'Fare ye well' is the tr. of most previous VSS from Tind., but Wyc. 'ioie ye,' Cov. 'reioyse,' Rheims 'reioyce' (after Vulg. *gaudete*), and it is probable that the Gr. χαίρειν is inadequately represented by the Eng. 'farewell,' since it never lost the sense of 'rejoice,' by slipping into a mere formality of speech, as the Eng. word has done. See Lightfoot on Ph 4^4.

---

* On the spelling Trench (*Study of Words*, 301) may be quoted: 'When "fancy" was spelt "phant'sy," as by Sylvester, in his translation of Du Bartas, and other scholarly writers of the 17th cent., no one could doubt of its identity with "phantasy," as no Greek scholar could miss its relation with φαντασία.'

In Lk 16^{19} ('fared sumptuously every day') the Eng. word 'fared' is probably to be taken in a sense that is still common, 'feed,' 'be entertained with food.' Wyclif's tr. is 'eete euery dai schynyngli' (after Vulg. *epulabatur quotidie splendide*), Coverdale's 'fared deliciously euery daye.' Cov. was repeated by Cranmer and the Geneva of 1557; but the Gen. of 1560 gives 'fared wel and delicately,' the Bishops' 'fared very delitiously,' the Rhemish 'fared magnifically.' Now it is true that neither 'fared' nor 'sumptuously' is restricted to taking food. In More's *Utopia* (ii. 8, Lupton's ed. p. 264) we read, 'Thither they sende furth some of their citezeins as Lieuetenauntes, to lyue theire sumptuously lyke men of honoure and renowne'; and Sir T. Elyot (*The Governour*, 1531, ii. 192, Croft's ed.) says, 'Many mo princes and noble men of the Romanes . . . made solempne and sumptuouse playes in honour of their goddes.' But it is possible that it was a passage in the last-named work that suggested the tr. of AV, and in that passage the sense of feed or feast is unmistakable: (ii. 336) 'The noble emperour Augustus . . . fared sumptuously and delicately, the citie of Rome at that tyme beinge vexed with skarcitie of grayne.' If that is the meaning of AV, it is inadequate to express the original (εὐφραινόμενος καθ' ἡμέραν λαμπρῶς), where the verb means to 'make merry' (Lk 12^{19} $15^{23.\,24.\,29.\,32}$ and elsewhere), and the adverb (of which this is the only occurrence in biblical Greek) means 'brilliantly' (the adj. is often applied to dress, Lk 23^{11}, Ac 10^{30}, Ja $2^{2.\,3}$, Rev 19^{18}), so that the tr. is literally 'making merry every day brilliantly.' Luther's tr. is *lebte alle Tage herrlich und in Freuden*; Weizsäcker, *genoss sein Leben alle Tage im Glanze*; Ostervald, *se traitoit bien et magnifiquement*; Oltramare, *faisait brillante chère*; Segond, *menait joyeuse et brillante vie*; RVm 'living in mirth and splendour every day.' RV has given 'sumptuous fare' for AV 'delicate fare' in Sir 29^{22} (Gr. ἐδέσματα λαμπρά). J. HASTINGS.

FARTHING.—See MONEY.

FASHION (*facĕre*, to make, *faction-em*, a making, It. *fazione*, Old Fr. *façon*, Old Eng. *facioun*). There are some old uses in AV, and they are all retained in RV.

1. The *make* or *shape* of a thing: Ex 26^{30} 'thou shalt rear up the tabernacle according to the fashion thereof which was showed thee in the mount.' The Heb. (מִשְׁפָּט *mishpâṭ*) is the ordinary word for the decision of a judge, hence due or right measure, even in cases not decided by judging, right proportion (1 K 4^{28} [Heb. 5^8] 'charge'; Jer 30^{18b} of a city, 'manner,' rather weak; Is 40^{14}, in creation—giving each part its due place and function). In Ex 26^{30} it seems to be used as synonymous with תַּבְנִית (from בָּנָה to build, so 'building,' 'make'), which is employed in the parallel passages Ex $25^{9.\,40}$, and is there tr^d 'pattern.' This Heb. word *mishpâṭ* developed much as the Eng. word 'fashion' has done. In Gn 40^{13} and elsewhere it signifies manner or custom, and in 2 K 1^7 outward appearance. It is tr^d 'fashion' also in 1 K 6^{38}, Ezk 42^{11} (in both of parts of a building). Wyclif's word in Ex 26^{30} is 'saumpler.'

In 2 K 16^{10} 'king Ahaz sent to Urijah the priest the fashion of the altar,' the Heb. is דְּמוּת *dĕmûth* (from דָּמָה to be like), a common word in Ezk for the external appearance. Here it is probably a drawing or model. Cf. 2 Ch 4^3 'the similitude (*i.e.* images) of oxen.'

The remaining Heb. word is תְּכוּנָה *tĕkhûnâh* (from כּוּן, הֵכִין to set up), Ezk 43^{11} 'show them the form of the house and the fashion thereof.' The Heb. is probably here the arrangement or fittings. Wyclif has 'the figure of the hous, and makyng (1388 'bildyng') thereof.' 'Forme and fashion' come from Coverdale.

In Wis 16^{25} 'even then was it altered into all fashions,' the meaning seems to be (as Deane), that the manna changed its taste according to the palate of the eater, and fire modified its nature according to its Maker's will (Gr. εἰς πάντα, RV 'into all forms').

In NT we find 'fashion' with this meaning only Ac 7^{44} 'Our fathers had the tabernacle of witness in the wilderness, as he had appointed, speaking unto Moses, that he should make it according to the fashion that he had seen' (τύπος, as LXX in Ex 25^{40}, RV 'figure').*

2. The *appearance* of a thing, as Ja 1^{24} Tind. 'For assone as he hath loked on him silfe, he goeth his waye, and forgetteth immediatlie what his fassion was.' So in AV, Lk 9^{29} 'as he prayed, the fashion of his countenance was altered' (Gr. τὸ εἶδος τοῦ προσώπου αὐτοῦ). Especially outward visible appearance in contrast with inner reality, as Shaks. *Merch. of Venice*, IV. i. 18—

> 'Shylock, the world thinks, and I think so too,
> That thou but leadst this fashion of thy malice
> To the last hour of act; and then 'tis thought
> Thou'lt show thy mercy and remorse more strange
> Than is thy strange apparent cruelty.'

1 Co 7^{31} 'the fashion of this world passeth away,' and Ph 2^8 'being found in fashion as a man, he humbled himself.' The Gr. is σχῆμα, whose meaning is fully discussed in the Commentaries. See also Trench, *NT Syn.* pp. 252–258; Gifford, *Incarnation*, p. 22 ff.; *Expos. Times*, viii. 391 f. The English is perhaps more emphatic (in expressing *mere* outward appearance) than the Greek. In 1 Co 7^{31} Wyc. and the Rhemish have 'figure' after Vulg. *figura*; Tind. introduced 'fashion' ('fassion'), and the other VSS followed him. In Ph 2^8 'fashion' is not found before AV. Wyc. translates Vulg. (*habitus*) literally, 'habyt' (1386 'abite'); Tind. Cov. and Cran. give 'apparel'; Gen. 1557 'appearance,' 1560 'shape,' as Tomson and Rhem. NT; Bish. 'figure.'

3. In Ja 1^{11} AV has retained from Tind. 'the flower thereof falleth, and the grace of the fashion of it perisheth,' where the Gr. is πρόσωπον, 'face.' So in Old Eng. 'fashion' was used literally for the face, as *Pilgr. Lyf Manhode* (1430), III. xxxviii. 155, 'She shadwde hire visage and hire facioun vnder hire hood.' Cf. Lk 12^{56} Tind. 'Ypocrites ye can skyll of the fassion of the erth, and of the skye' (πρόσωπον; Wyc., Rhem., AV, RV, 'face').

4. *Manner*: 2 Es 4^{35} 'How long shall I hope on this fashion?' (*sic*, RV after the Syriac, 'How long are we here?'); 5^{53} 'They that be born in the strength of youth are of one fashion' (*alii sunt*); Wis 2^{15} 'his ways are of another fashion' (ἐξηλλαγμέναι, RV 'of strange fashion'); 14^{19} 'he . . . forced all his skill to make the resemblance of the best fashion' (ἐπὶ τὸ κάλλιον, RV 'toward a greater beauty'); Mk 2^{12} 'We never saw it on this fashion' (οὕτως). So in Pref. to AV 'they did not cast the streets, nor proportion the houses in such comely fashion, as had been most sightly and convenient'; and Shaks. *Hamlet*, I. iii. 111—

> 'My lord, he hath importuned me with love,
> In honourable fashion.
> Ay, fashion you may call it; go to, go to.'

5. *Manners and customs*: 2 Mac 4^9 'a place for exercise, and for the training up of youth in the fashions of the heathen' (the Gr. is simply ἐφηβίαν, *i.e.* youth, hence RV 'and *form* a body of youths *to be trained therein*'); 4^{13} 'the height of Greek fashions' (ἀκμή τοῦ Ἑλληνισμοῦ, RV 'an extreme of Greek fashions'); 6^8 'that they should observe the same fashions' (ἀγωγήν, RV 'conduct').

The verb to fashion is of frequent occurrence. In OT and Apocr. it has always the sense of give shape to, form. But the word was formerly used in the sense of 'transform,' *i.e.* change the form or fashion into something else. Thus Tindale, *Obedience of a Christian Man*, 97*b*, 'When a man fealeth . . . him selfe . . . altered and fascioned lyke vnto

---

* In He 8^5 the same quotation is made, and adheres still more closely to the LXX of Ex 25^{40}, but the Eng. (AV and RV) is 'pattern,' as it has been since Tindale.

Christe'; H. Smith, *Sermons* (1592), 'Fashion thyself to Paul.' In NT there are two examples of this meaning: Ph 3^{21} 'Who shall change our vile body, that it may be fashioned like unto his glorious body' (*σύμμορφος*; RV 'that it may be conformed to the body of his glory'); 1 P 1^{14} 'not fashioning yourselves according to the former lusts' (*συσχηματιζόμενοι*). J. HASTINGS.

FAST.—**1.** Fast is frequently used in AV both as adj. and adv. in the sense of *firm, secure*, as Ps 38^{2} 'thine arrows stick fast in me'; Ps 65^{6} 'Which by his strength setteth fast the mountains'; Pr 4^{13} 'Take fast hold of instruction'; 2 Es 2^{15} 'Mother, embrace thy children, and bring them up with gladness, make their feet as fast as a pillar' (*confirma pedes eorum*, RV 'stablish their feet'); Ac 16^{24} 'Who . . . thrust them down into the inner prison, and made their feet fast in the stocks' (*ἠσφαλίσατο*). Cf. Chaucer, *Anelida and Arcite* (Skeat's Student's ed. p. 117)—

> 'Almighty God, of trouthe sovereyn,
> Wher is the trouthe of man? who hath hit sleyn?
> Who that hem loveth shal hem fynde as fast
> As in a tempest is a roten mast.'

2. In reference to sleep, *sound*, as Jg 4^{21} 'he was fast asleep and weary' (RV 'in a deep sleep'; see RVm and Moore, *in loc.*). **3.** *Close, near*, only Ru $2^{8.\,21.\,23}$, as 2^{8} 'abide here fast by my maidens.' Cf. Milton, *PL* ii. 725—

> 'the snaky sorceress that sat
> Fast by Hell-gate, and kept the fatal key.'

In every case 'fast' is used to bring out the force of the verb or adj. used in the original; there is never a separate word for it in the Hebrew or the Greek. J. HASTINGS.

FASTING.—Often described in OT (esp. in P, where it is practically a technical term) by phrase 'to afflict the soul,' עִנָּה נֶפֶשׁ (Lv $16^{29.\,31}$ $23^{27.\,32}$, Nu 29^{7} 30^{13}, Ps 35^{13}, Is $58^{3.\,5.\,10}$), tr. by LXX in the passages in Nu by *κακοῦν τὴν ψυχήν*, in the others by *ταπεινοῦν τὴν ψυχήν*, for which see also Jth 4^{9}, and which may be assumed to have this precise reference, and not a more general one at Sir 2^{17} 7^{17}. The phrase does not denote primarily spiritual humiliation, even as the proper accompaniment of fasting. It has a physical meaning. This will be perceived if the material sense in which 'soul' was in early times used be remembered (cf. for a similar expression Ps 69^{11}). The more literal terms צוּם 'to fast,' צוֹם 'fasting,' are also common in OT. In NT the words are *νηστεύειν* and *νηστεία*.

(*A*) IN THE OT.—1. *The practice of fasting* (*a*) *in the times before the Captivity.*—The one *regular* fast, the institution of which is ascribed to this period, is that of the Day of Atonement (Lv $16^{29.\,31}$ $23^{27\text{-}32}$, Nu 29^{7}, Jer 36^{6}).* But there are many examples of fasts on special occasions, dictated by the sense of having transgressed, or of calamity, present or impending. Such a fast is inspired by Samuel (1 S 7^{6}); enjoined by Jehoiakim and the princes (Jer 36^{9}); hypocritically by Jezebel (1 K $21^{9.\,12}$). In like manner individuals are moved to fast—David when his child is smitten with sickness (2 S $12^{16.\,21\text{-}23}$), Ahab on hearing his doom (1 K 21^{27}).

The abstinence from food or drink for forty days by Moses on the Mount (Ex 34^{28}), and by Elijah (1 K 19^{8}), seem to be recorded rather as extraordinary or miraculous occurrences than as fasts purposely undertaken.

(*b*) *After the Captivity.*—Additional regular fasts now appear, the memorials of the times of bitter shame and calamity through which the nation had passed. Four are enumerated in Zec 8^{19}, cf. $7^{3.\,5}$. (*α*) 'The fast of the fourth month' (Tammuz). On the 9th of this month, the Chaldæans broke into the city (Jer 39^{2} and $52^{6.\,7}$). According, however, to Talm. tradition the fast in this month was observed on the 17th, on which day the breaking of the tables of the law by Moses is said to have occurred, and also the cessation of the daily offering in consequence of the famine during the siege by the Chaldæans. It was held also that later the day was further desecrated through the burning of the law by Antiochus Epiphanes (in Talm. called Apostemus), and his introduction of an idol into the Holy Place. (*β*) 'The fast of the fifth month' (Ab). The destruction of the temple took place according to 2 K 25^{8} on the 7th, according to Jer 52^{12} on the 10th of this month. The 9th was, however, the day which was observed, at all events according to the Talmud. The destruction of the second temple is said to have taken place on the same day; and the announcement was believed to have been made on this day also to the generation of Isr. who came out of Egypt that they should not enter Canaan. (*γ*) 'The fast of the seventh month' (Tisri), possibly held in commemoration of Atonement; the extinction of the government left in Jerusalem under Gedaliah took place in this month through his assassination (2 K 25^{25}). This, acc. to tradition, happened on the 3rd of Tisri. (*δ*) 'The fast of the tenth month' (Tebet). On the 10th of this month the siege by Nebuch. began (2 K 25^{1}, Jer 52^{4}). The reference in Ezk $24^{1.\,2}$ shows how the habit of marking it by a fast might arise.

From the Talm. we learn that, in the times for which it can be taken as evidence of the practice to which the prophet refers, the 9th of Ab was regarded as by far the most important, and that its observance was then universally binding. We should infer from Zec 7 and 8 that it always held this position of pre-eminence. The people ask only (7^{3}) whether they need continue to observe this fast. In the answer of God through the prophet, first one other fast is coupled with it (7^{5}), then all four of the fasts that had been instituted in consequence of their calamities are mentioned (8^{19}). It is probable that the three not referred to in the people's question were not regarded as of such strict obligation, and therefore not felt to be onerous. The prophet, on the other hand, names them all, because the principles on which he insisted applied to all equally. According to the Talmud those three were, after they had ceased to be kept, reintroduced subsequently to the destruction of the second temple; and it was taught that they need be observed only at times when the Jews were oppressed or were suffering calamities (cf. Brück, *Pharisäische Volkssitten und Ritualien*, p. 45 ff.). Jewish interpreters seem to have understood Zec.'s words (8^{19}) as giving a dispensation from the observance of the fasts in the interval between the restoration and the destruction of the second temple (Brück, *ib.*).

We may perhaps find a trace of the institution of one other regular fast in OT—in the Bk. of Esther. That book explains the origin of the Feast of Purim, and in Rabbinic times the celebration of that feast was accompanied by a fast in commemoration of the fasting of Esther, Mordecai, and the people ($4^{1\text{-}3.\,15\text{-}17}$). There may be an allusion to this part of the commemoration in 9^{31} end.

Naturally, there is no lack in the period from the Captivity onwards of instances of fasts on special occasions. Of such as the whole people joined in we have, in addition to the one in Est just referred to, Ezr $8^{21\text{-}23}$, Neh 9^{1}; and as examples of fasts by individuals, Neh 1^{4}, Dn 9^{3}. The references to fasting in the Apocr. are not so numerous as might have been expected, and do not throw much additional light upon the history of the practice (To 12^{8}, 1 Mac 3^{47}, 2 Mac 13^{12}).

2. *The manner of observing fasts.*—There can be little doubt that, in accordance with usual Oriental practice, fasting involved complete abstinence from food. The period for the Day of Atonement was 'from even till even' (Lv 23^{32}). No work was to be done (Lv $16^{29.\,31}$ 23^{32}, Nu 29^{7}). There are allusions also to the use of sackcloth and ashes (Dn 9^{3}, Jon 3^{6} etc.). Abstinence of another kind was also required, referred to in 1 Co 7^{5} (TR): various

---

* For the question whether the observance of the Day of Atonement was known in pre-exilic times, see p. 199b of this vol.

passages of OT might be quoted in confirmation, though none very distinctly connected with fasts. It is spoken of plainly in the Talmud.

3. *The purpose of fasting.*—W. R. Smith observes (*RS*^{2}, p. 434), 'The usage of religious fasting is commonly taken as a sign of sorrow, the worshippers being so distressed at the alienation of their god that they cannot eat; but there are very strong reasons for believing that in the strict Oriental form, in which total abstinence from meat and drink is prescribed, fasting is primarily nothing more than a preparation for the sacramental eating of holy flesh.' It is difficult, however, to discover traces of this view in OT. There we find fasting employed simply as a sign of mourning (1 S 31^{13}), or with the evident object of deprecating divine wrath, or winning divine compassion. Its suitability cannot well be explained in either of these connexions, except on the ground that it is often a natural effect of grief, and may therefore be purposely employed as a sign of it. In its religious use such a mute expression of sorrow would be an act of contrition for sin, or appeal for heavenly aid in distress. A superstitious idea of its efficacy was, no doubt, often entertained; but the particular form of error which the prophets found it necessary to condemn was the ordinary one of the formalist, who fails to perceive that his external observances can have no value when dissevered from purity and righteousness of life (Is 58^{3-7}, Jer 14^{10-12}, Zec 7, 8).

(*B*) IN THE NT.—1. *The Jewish practice.*—There is an allusion in Ac 27^{9} to 'the Fast,' which was so *par excellence*, *i.e.* the Day of Atonement. But the chief point which we learn from NT is that by this time frequent additional fasts had become customary with those in Judaism who desired to lead a specially religious life, *e.g.* Anna (Lk 2^{37}). Again, the Pharisee in the parable says, 'I fast twice in the week' (Lk 18^{12}). The allusion is to the two weekly fast-days, Thursday and Monday, on the former of which days Moses was said to have gone up into the Mount, and on the latter to have come down from it. Mention is made of them frequently in the Talmud. There is also an interesting reference to them in the *Didache* 8^{1}, where Christians are bidden not to fast with the hypocrites on the second and fifth days of the week, but on the fourth and on Friday. Further, the question asked of Jesus by the disciples of John and of the Pharisees (Mt 9^{14}, Mk 2^{18}, Lk 5^{33}), reveals the interesting fact that teachers who had gathered about them bands of scholars, used to give to their disciples special rules on the subject.

2. *The teaching of Jesus.*—There are two passages only, but those significant ones. (*a*) That in the Sermon on the Mount (Mt 6^{16-18}). Our Lord's whole aim here appears to be to secure perfect purity and simplicity of intention, a 'fasting unto God' (cf. Zec 7^{5}) in the fullest and deepest sense. This would be the most effectual cure for every error, practical or even intellectual (comp. His teaching on almsgiving and prayer, Mt 6^{1-15}, and see art. on former).

(*b*) His answer to the question of the disciples of John and of the Pharisees (Mt 9^{14-17}, Mk 2^{18-22}, Lk 5^{33-39}). This answer throws light on His whole method and aim. To understand it we must bear in mind the question which called it forth. There is no reason to believe that either our Lord or His disciples failed to keep any day of fasting which was generally observed by religious members of the class of artisans and small tradesmen in Galilee, such as the Day of Atonement. But He had imposed upon them no frequent additional fasts. He defends them from the stricture passed on them, and in so doing replies to the criticism of His own teaching, which was implied, by setting forth the principles on which He acted. He refrained from prescribing forms, not that He condemned them as mischievous or useless, but because it would have been the wrong end at which to begin. The course which He adopted was alone fitting, in view of the far-reaching change of character and thought which He designed to effect.

The precise force of the distinction which Jesus drew between the days while the bridegroom was present and those when he should be removed, deserves to be marked. The time of His presence on earth was a Messianic time, a foretaste of the restitution of all things. The thought that fasting would be discontinued in Messiah's days was already familiar to the Jewish mind. The language of Zec suggested it (8^{19}), and thus, as it is interesting to note, Jesus added emphasis to the claim to be the Messiah, which He virtually made in referring to Himself as the bridegroom, by what He said as to the unsuitability of requiring fasts from His disciples then. We may believe also that He wished them afterwards to look back to the time that they companied with Him as one of joy. But His clear prevision that the perfect fulfilment of the promise was not yet at hand, and that a period of sadness and trial would intervene before it, is not less remarkable, and His words unquestionably imply that there would be a place for fasting in the coming dispensation. Further, the inference which has frequently been drawn from them by Protestant commentators, that in the Christian Church fasting was to be practised only when dictated by special feelings of sorrow, and hence that it was to be a matter of individual choice, confined to occasions of widespread and exceptional calamity, hardly seems to be justified; for He characterizes broadly the difference between two whole periods.

On the other hand, in the parables which follow, and in His line of conduct, to which attention had been directed, He plainly shows that He intended questions of outward observance to be judged with reference to new principles which he inculcated, and that He left them to be decided by His Church under the guidance of the Spirit Who should come in His name (but see Hort, *Jud. Chr.* p. 24).

This intention was shown alike by what He did and did not conform to in the religious usages around Him. We have noticed that the keeping of the law of Moses was not in question on the occasion under consideration. But in point of fact His attitude to that law, the respect for it which He encouraged by word and example, His silence as to its approaching abrogation, were based on the same principle as the non-imposition of new forms. He intended the rites of the Mosaic law to be set aside or changed only as the result of a new spiritual growth.

3. *The practice of the early Church.*—The chief instances are before solemn appointments (Ac $13^{2,3}$ 14^{23}). St Paul alludes to his fasts (2 Co 6^{5} 11^{27}). It is somewhat difficult, however, to decide whether he is speaking of voluntary or involuntary ones. Perhaps both are included. The connexion of words seems rather to suggest voluntary fasts in the former passage, and involuntary ones in the latter. In places TR has an allusion to fasting where it is wanting according to the best evidence (Mt 17^{21}, Mk 9^{29}, Ac 10^{30}, 1 Co 7^{5}). This corruption of the text may have been due to the increasing value which was set on fasting in the Christian Church with the lapse of time. See further, FEASTS AND FASTS.

In the Oxyrhyuchus fragment discovered by Grenfell and Hunt, the 2nd Logion contains the words *ἐὰν μὴ νηστεύσητε τὸν κόσμον, οὐ μὴ εὕρητε τὴν βασιλείαν τοῦ θεοῦ.* The construction and the meaning of the saying are both difficult: Harnack (*Die jüngst entdeckten Sprüche Jesu*, 8 ff.) contends for a metaphorical sense of the word 'fast.' Amongst other discussions of the sense of this Logion we may refer to Grenfell and Hunt's *editio princeps* of the ΛΟΓΙΑ ΙΗΣΟΥ (10 ff.), Redpath (*Expositor*, Sept. 1897, p. 225), Heinrici in *ThL* (21st Aug. 1897), Swete (*Expos. Times*, Sept. 1897, p. 546 f.).

V. H. STANTON.

FAT.—See FOOD and SACRIFICE.

FAT.—As a verb 'fat' is now nearly displaced by 'fatten.' It occurs in Sir 26^{13} 'The grace of a wife delighteth her husband, and her discretion will fat his bones' (*πιανεῖ*, RV 'fatten'); and the ptcp. 'fatted' in 1 K 4^{23} ('fatted fowl,' Heb. בַּרְבֻּרִים, see FOWLS), Jer 46^{21} ('fatted bullocks,' RV 'calves of the stall'), Lk $15^{23.27.30}$; to which RV adds 1 S 28^{24} 'a fatted calf' (AV 'a fat calf').

J. HASTINGS.

FAT.—Fat, meaning a large vessel for holding liquids, has been displaced by 'vat' in literary

English. The difference between the spellings, says Skeat (*Etymol. Dict. s.v.*) is one of dialect only, 'fat' being northern and 'vat' southern. Fat occurs in AV, Jl 2^{24} 'the fats shall overflow with wine and oil,' and 3^{13} (both יֶקֶב); in the compound 'winefat' in Is 63^{2} (גַּת), Mk 12^{1} (ὑπολήνιον, AV 1611 'wine fat' as two words); and 'pressfat' (1611 'presse-fat') Hag 2^{16} (יֶקֶב).

RV gives 'vats' in Jl (see Driver's note, *ad loc.*), though in Pr 3^{10} it changes 'presses' of AV into 'fats' (יֶקֶב). 'Winefat' of Mk 12^{1} is made 'winepress,' and 'pressfat' of Hag 2^{16} 'winefat' (not by Amer. RV). Amer. RV prefers 'winevat' to winefat in Is 63^{2}. See WINE. J. HASTINGS.

FATE.—See WILL.

FATHER.—See FAMILY and GOD.

FATHOM.—See WEIGHTS AND MEASURES.

FATLING.—A fatling is an animal, especially a young animal, fattened for slaughter. It is the tr^{n} of three Heb. and one Greek word. (1) *Mĕrîʾ*, plu. *mĕrîʾim*, 2 S 6^{13}, Is 11^{6}, Ezk 39^{18}: which is elsewhere tr^{d} 'fat cattle' (RV 'fatlings'), 1 K $1^{9.19.25}$; 'fed beasts' (so RV), Is 1^{11}; 'fat beasts' (so RV), Am 5^{22}. (2) *Mêḥîm*, Ps 66^{15}: which elsewhere occurs only Is 5^{17} tr^{d} 'fat ones,' AV and RV. (3) *Mishnîm*, 1 S 15^{9}, which means 'seconds,' of a second, inferior sort (as AVm). But that is plainly not the meaning here. Hence the text is generally amended into *mashmannim* (מַשְׁמַנִּים), which is found in Neh 8^{10}, and means 'fat things,' 'delicacies' (EV 'the fat'). This is the reading followed by EV, and it has the support of Targ. Syr. and Arab. VSS. But Driver (*Notes on Sam.* p. 94) prefers to read *hasshĕmênîm*, which occurs (in the sing.) in Ezk 34^{16} (and elsewhere), and is tr^{d} 'the fat.' He then renders 'the best of the flocks and the herds, *even* the fat ones and the lambs' (הַשְּׁמֵנִים וְהַכָּרִים). (4) σιτιστά (lit. 'fed with grain'), Mt 22^{4} 'my oxen and my fatlings are killed' (Tindale's tr^{n}; Wyc. 'my bolis [bulls] and my volatilis [fowls],' after Vulg. *tauri mei et altilia*). To those RV adds (5) *bĕrîʾâh*, Ezk 34^{3} 'the fatlings' for AV 'them that are fed': the word is an adj., and is tr^{d} 'fat' in v.^{20} ('fat cattle' AV and RV), it is the 'fat' kine of Pharaoh's dream (Gn 41). J. HASTINGS.

FAUCHION.—Jth 13^{6} 'she . . . took down his fauchion from thence,' and 16^{9} 'the fauchion passed through his neck' (AV 1611 'fauchin,' RV 'scimitar'). The Greek is ἀκινάκης (in 16^{9} A has ἀκινάκις, to which Hatch and Redpath give a sep. entry in their *Concord to the Sept.*, but with a query), found only here. The ἀκ., a word of Persian origin, is often used in Herodotus to describe a short sword. See SWORD. The Eng. word was originally the name of 'a broad sword more or less curved on the convex side'; but in later use and in poetry signified a sword of any kind.

J. HASTINGS.

FAULT.—A fault is properly a defect or shortcoming (*fallitus*, late Lat. ptcp. of *fallĕre*, to fail, come short, Old Fr. *faute* *) either of material things, as Ld. Berners, *Froissart*, I. clix. 193, 'They had gret faut in their hoost of vitayle'; or from a recognized standard of physical beauty, workmanship, or moral rectitude. The defect expressed by 'fault' is in AV almost always moral, but the larger meaning, shortcoming in any sense, is seen in Rev 14^{5} 'they are without fault before the throne of God' (ἄμωμοι, RV 'without blemish'); cf. Jude ^{24} 'faultless' (ἀμώμους, RV 'without blemish'). In 1 Co 6^{7} the least degree of moral blame is expressed (Gr. ἥττημα, RV 'defect,' RVm 'loss').

Craik (*Eng. of Shaks.* p. 124) says, 'The word *fault* formerly, though often signifying no more than it now does, carried sometimes a much greater weight of meaning than we now attach to it.' And he gives as an example *Jul. Cæs.* I. iii. 5—

'Who ever knew the heavens menace so?
Those that have known the earth so full of faults.'

To which may be added *Tit. Andron.* v. ii. 173—

'You killed her husband, and for that vile fault
Two of her brothers were condemned to death.'

See also *Rom. and Jul.* III. iii. 25—

'O deadly sin! O rude unthankfulness!
Thy fault our law calls death.'

And Milton, *PL* xii. 337—

'Whose foul idolatries, and other faults
Heapt to the popular sum, will so incense
God, as to leave them.'

This greater freedom in the use of 'fault' enabled AV to retain Coverdale's tr^{n} of Gn 41^{9} 'This daye do I remembre my fawte,' though Wyc. had 'I knowleche my synne,' and the Heb. (חָטָא) is some thirty times translated 'sin.' Other words usually tr^{d} 'sin' are occasionally rendered fault,' as חָטָאת (vb.) Ex 5^{16}; * עָוֺן 2 S 3^{8}, Ps 59^{4}. Again, in Dt 25^{2} רִשְׁעָה, which is everywhere else tr^{d} 'wickedness,' is tr^{d} 'fault,' although all previous VSS had either 'sin' (Wyc. Douay) or 'trespass' (Cov. Gen. Bish.): RV gives 'wickedness.' And παράπτωμα tr^{d} 'trespass' Mt $6^{14.15}$, Mk $11^{25.26}$, 2 Co 5^{19}, Eph 2^{1}, Col 2^{13}; 'offence' Ro 4^{25} $5^{15.16.17.18.20}$; 'fall' Ro $11^{11.12}$; and 'sin' Eph 1^{7} 2^{5}, Col 2^{13}, is tr^{d} 'fault' 2 Co 5^{19}, Ja 5^{16}: RV gives 'trespass' always, except Ro 11^{11} 'fall,' marg. 'trespass.'

'Make no fault,' a very rare expression, is found Sir 9^{13} (μὴ πλημμελήσῃς, RV 'commit no fault').

In the trial before Pilate, St. John thrice uses αἰτία (18^{38} $19^{4.6}$), and St. Luke thrice αἴτιον ($23^{4.14.22}$). Except in Lk 23^{22} ('cause') AV renders in each case by 'fault'; but the meaning of both words is 'ground for committal,' 'legal cause for prosecution.' RV gives 'crime' in Jn, leaving Lk as in AV.

Faulty is now nearly confined to the expression of physical defects. In 2 S 14^{13} (אָשֵׁם adj.), Hos 10^{2} (אָשַׁם vb. = be held guilty) it is used as the expression of moral wrong, RV 'guilty.' J. HASTINGS.

FAVOUR.—Favour is of frequent occurrence in Shakespeare and elsewhere in the sense of *personal appearance*, and then as simply meaning the *face* (cf. COUNTENANCE and CHEER). Thus Spenser, *FQ* V. vii. 39—

'She knew not his favour's likelynesse,
For many scarres and many hoary heares,
But stood long staring on him mongst uncertain fears.'

More, *Utopia* (Robinson's tr^{n}, Lumby's ed. p. 19), 'whom by his favoure and apparell furthwith I judged to be a mariner.' Shaks. *As You Like It*, IV. iii. 87—

'The boy is fair,
Of female favour.'

Bacon, *Essays*, 'Of Beauty' (Gold. Treas. ed. p. 176, l. 17), 'In *Beauty*, that of Favour, is more then that of Colour.'

It is sometimes said that Ps 45^{12} 119^{58}, Pr 19^{6} 29^{26} are examples of this meaning. But, though the Heb. (פָּנִים) there tr^{d} 'favour' is literally 'face,' favour or goodwill is clearly the meaning. In the adjectives 'well-favoured' and 'ill-favoured,' however, we find this meaning, as Gn 29^{17} 'Rachel was beautiful and well favoured' (יְפַת מַרְאֶה, lit. 'fair to be seen.' So **evilfavouredness**, Dt 17^{1} (דָּבָר רָע, lit. 'evil thing').

---

* *Faute* is the more accurate spelling, the *l* being inserted from the influence of It. *falta* and Lat. *fallere*, although the *u* stands, of course, for the *l*. In the Psalter of 1539 the spelling is always *faute*, though modern editions of the Pr. Bk. spell *fault*. In AV of 1611 it is *fault* always.

* The correct tr. of חָטָאת עַמֶּךָ is doubtful. If the vb. be taken as 3rd sing. fem. (*Oxf. Heb. Lex.*) the meaning will be 'thy people is at fault' (but עַם is nowhere else fem., not even in Jg 18^{7}, see Moore, *ad loc.*); if as 2nd sing. masc., 'thou wilt wrong thy people' (so Pesh. LXX, ἀδικήσεις τὸν λαόν σου). This is accepted by Siegfried-Stade, who punctuate חָטָאתָ. Socin (in Kautzsch's *AT*) pronounces the MT unintelligible.

In Jos 11^{20} *favour* means scarcely more than *mercy*, 'for it was of the LORD to harden their hearts, that they should come against Israel in battle, and that he might destroy them utterly, and they might have no favour' (תְּחִנָּה: in Ezr 9^{8} the meaning is the same, but EV give 'grace'; everywhere else the Heb. word means 'intreaty'). Cf. Elyot, *The Governour*, ii. 298, 'And they, which by that lawe were condemned, were put to dethe without any fauour.' J. HASTINGS.

FAVOUR.—The interest of the biblical use of this word resides chiefly in its relation to the term *grace*. It has not, like that term, obtained any doctrinal significance. While χάρις in the LXX (Vulg. *gratia*) is its prevailing equivalent, it is used only six times in NT to tr. that word (see also Lk 1^{28} κεχαριτωμένη, 'highly favoured'; marg. 'graciously accepted' or 'much graced'). Grace, in fact, while including favour, implies much more. And it comes as a free gift ('Gratia, nisi gratis sit, non est gratia'), while favour may be won or deserved. To obtain favour is to please, to show favour is to be pleased.

In OT the distinction is, however, hardly perceptible. The instinct of the translators led them, it is true, to avoid the adjective 'favourable' as a rendering of חַנּוּן ('gracious') used only of God (with the one possible exception of Ps 112^{4}. See Cheyne, *The Book of Psalms, in loc.*), but the verb חָנַן and its other derivatives are often represented by 'favour.' Thus חֵן, 38 times rendered 'grace,' is 26 times tr^{d} 'favour.' Nor is the sense of *strengthening help*, so prominent in the former word, altogether absent from the latter. (See Ps 5^{12} 'with *favour* wilt thou compass him as with a shield.')

Eight other Heb. roots, implying *kindness, goodwill, pity*, are represented in the AV by 'favour.' The most frequent of these is רָצוֹן=acceptance, rendered 15 times 'favour.' For חֶסֶד *loving-kindness*, 'favour' is employed only 3 times.

The LXX vary much more than the Eng. tr., the idea of *pity* pronouncing itself in ἔλεος, while that of *goodwill* comes out in εὐδοκία, θέλημα, πρόσωπον (פָּנִים). So in the Vulg. we find *misericordia, voluntas, vultus.* A. S. AGLEN.

FEAR.—For the theology of Fear see next article. Some obsolete or archaic uses deserve notice.

1. Following the Heb. idiom, 'my fear,' 'thy fear,' etc., stands for the 'fear of me,' 'of thee,' etc.: Ex 23^{27} 'I will send my fear before thee' (אֵימָתִי, RV 'my terror'); Job 9^{34} 'let not his fear terrify me' (אֵמָתוֹ, RV 'his terror'); Jer 2^{19} 'my fear is not in thee' (פַּחְדָּתִי). Similarly Ps 90^{11} 'even according to thy fear, so is thy wrath' (כְּיִרְאָתְךָ, RV 'according to the fear that is due unto thee,' so Perowne; Del.* Cheyne, 'the fear of thee,' with the same meaning; De Witt, 'But who has yet learned the power of Thine anger, And Thy wrath as measured by the reverence due Thee?'); Is 63^{17} 'O LORD, why hast thou made us to err from thy ways, *and* hardened our heart from thy fear?' (מִיִּרְאָתֶךָ, so RV; Del. 'so that we fear thee not,' evidently the genitive of the object; Orelli, 'that it fears not thee'); Mal 1^{6} 'if I be a master, where is my fear?' (מוֹרָאִי). Earlier VSS contained this idiom yet oftener, as Gn 9^{2} Wyc. (1382) 'youre feer and youre tremblyng be upon alle the beestis of erthe' (1388 'youre drede and tremblyng,' AV 'the fear of you and the dread of you'). **2.** After another Heb. idiom 'fear' is used for the object of fear, that which is feared: Gn 31^{42} 'the God of Abraham, and the fear of Isaac' (פַּחַד, RV 'Fear,' as a proper name: but to personify is to miss the idiom, of which Spurrell (*Notes on the Text of Gen.*) gives examples from Pesh. Targ. etc.), so v.^{53}, Ps 31^{11} 'I was a reproach among all mine enemies, but especially among my neighbours, and a fear to mine acquaintance' (פַּחַד); Is 24^{18} 'he who fleeth from the noise of the fear shall fall into the pit' (פַּחַד); Ps 53^{5} 'There were they in great fear, *where* no fear* was' (שָׁם פָּחֲדוּ־פַחַד לֹא־הָיָה פָחַד); Pr 1^{26} 'I will mock when your fear cometh' (פַּחְדְּכֶם); Is 8$^{12.\,13}$ 'neither fear ye their fear, nor be afraid. Sanctify the Lord of Hosts himself; and *let* him *be* your fear, and *let* him be your dread' (מוֹרָאוֹ . . . מוֹרַאֲכֶם); Ps 34^{4} 'I sought the Lord, and he heard me, and delivered me from all my fears' (מְגוּרוֹתַי); Pr 10^{24} 'The fear of the wicked, it shall come upon him' (מְגוֹרַת רָשָׁע); Is 66^{4} 'I also will choose their delusions, and bring their fears upon them' (מְגוּרֹתָם). Cf. Pr 10^{29} Cov. 'The waye of the LORDE geueth a corage vnto ye godly, but it is a feare for wicked doers'; Herbert, *The Temple*, 120, l. 29—

> 'Call in thy death's-head there, tie up thy fears.'

3. There are two kinds of fear, a 'slavish feare, and a sonlike feare' (Hieron, *Works*, i. 130). The latter is now used only of our relation to God. But it was formerly applied to the reverence due to any superior, as Ro 13^{7} 'Render to all their dues: tribute to whom tribute is due; custom to whom custom; fear to whom fear.' Cf. Knox, *Hist.* 194, 'we deny neither Toll, Tribute, nor fear, to her [the Queen Regent] nor her officers.' Ascham (*Toxophilus*, B. fol. 35, ed. 1545) says that a priest should have 'a bodye ful of manlye authoritie to fear ill men.' **4.** The article being formerly used freely with abstract nouns, we find 'a fear,' Ezk 30^{13} 'I will put a fear in the land of Egypt' (יִרְאָה, RV retains); Ad. Est 15^{8} 'in a fear' (ἀγωνιάσας, RV 'in an agony').

In the quotation from Ascham above, the verb to fear is used in the active sense of put fear into, terrify. This meaning, though it occurs but once in AV, is common in the earlier VSS and in Eng. writers of the time.

Thus Lv 26^{36} Wyc. 'the sown of a fleynge leef shal fere hem'; Dn 4^{11} Cov. 'O Balthasar, let nether the dreame ner the interpretacion thereoff feare the'; 2 Co 10^{9} Gen. 1560, '*This I say* that I may not seme as *it were* to feare you with letters' (so Wyc.). Cf. Elyot, *The Governour*, i. 247, 'the good husbande, whan he hath sowen his grounde, settethe up cloughtes or thredes, which some call shailes, some blenchars, or other like showes, to feare away birdes, which he foreseeth redy to deuoure and hurte his corne.' So Foxe, *Actes and Mon.* i. 436 (ed. 1583), 'A wonderfull and terrible earthquake fell through out al England: wherupon diuers of the suffraganes being feared by the strange and wonderfull demonstration, doubting what it should meane, thought it good to leaue of from their determinate purpose'; Spenser, *FQ* II. xii. 25—

> 'For all that here on earth we dreadfull hold,
> Be but as bugs to fearen babes withall,
> Compared to the creatures in the seas enthrall.'

More, *Utopia* (Rob. tr^{n}, Lumby's ed. p. 145, l. 25), expresses his ideal of toleration in the words, 'They also which do not agree to Christes religion, feare no man from it, nor speake against any man that hath received it.' Tindale, *Works*, i. 7, says Scripture is 'a comfort in adversity that we despair not, and feareth us in prosperity, that we sin not'; and *Expositions*, 148, 'fearing you with the bug of excommunication.' From Shaks. take *Tam. of Shrew*, I. ii. 205—

> 'Have I not in a pitched battle heard
> Loud 'larums, neighing steeds, and trumpet's clang?
> And do you tell me of a woman's tongue,
> That gives not half so great a blow to hear
> As will a chestnut in a farmer's fire?
> Tush! tush! fear boys with bugs.'

---

* The suffix, says Delitzsch, is either the genitive of the subject, *i.e.* according to Thy fearfulness (יִרְאָה, as in Ezk 1^{18}); or of the object, 'acc. to the fear that is due unto thee.' The latter way of taking it is more natural in itself (cf. v.^{8}, Ex 20^{20}, Dt 2^{25}), and here characterizes the knowledge that is so rarely found as a knowledge that is determined by the fear of God and truly religious.

* Earle (*Psalter of* 1539, p. 291) says that in this example 'fear' is used in the ancient sense of *FÆR*, sudden alarm, shock of danger. But that sense seems to have been dropped very early, long before the days of Coverdale, who first uses 'fear' here (Wyclif as usual having 'dread'), and the Heb. is the same as in the other passages quoted above.

Davies quotes from Bp. Andrewes (v. 8), 'Knowing that we fear honour and power, though it last but for a small time, He feareth us with One whose honour and power lasteth for ever,' where the neuter and active senses of the word are found together.

The example in AV is Wis 17^{9} 'For though no terrible thing did fear them; yet being scared with beasts that passed by, and hissing of serpents, they died for fear' (ἐφόβει, RV 'affrighted'). A Heb. idiom is expressed in the phrase 'fear before,' which occurs 1 Ch 16^{30}, Ps 96^{9}, Ec $8^{12.13}$, Hag 1^{12}. Thus Ps 96^{9} 'O worship the Lord in the beauty of holiness: fear before him, all the earth' (חִילוּ מִפָּנָיו, RV 'tremble before him'). The verb is used in a grammatical misconstruction in Is 57^{11} 'And of whom hast thou been afraid or feared,' which is rectified in RV 'And of whom hast thou been afraid and in fear?'

Fearful in older Eng. meant 'greatly fearing' as well as 'greatly to be feared.' Both senses are used in AV and retained in RV. **1.** Dt 20^{8} 'What man *is there that is* fearful and fainthearted?' (הַיָּרֵא); Jg 7^{3} 'fearful and afraid' (יָרֵא); Is 35^{4} 'Say to them that are of a fearful heart, Be strong, fear not' (לְנִמְהֲרֵי־לֵב, lit. 'hasty of heart,' as RVm); Mt 8^{26} 'Why are ye fearful, O ye of little faith?' (δειλός; so Mk 4^{40}, Rev 21^{8} [all]); Sir 2^{12} 22^{18}, 1 Mac 3^{56}, 2 Mac 8^{13}. Cf. Adams, *II Peter*, 55, 'If thou lovest God, thou wilt be fearful to offend him, careful to please him'; and Chapman, *Homer's Iliads*, xxiii. 740—

> 'On the shore, far-off, he caus'd to raise
> A ship-mast; to whose top they tied a fearful dove by th' foot,
> At which all shot.'

2. Ex 15^{11} 'Who is like thee, glorious in holiness, fearful in praises, doing wonders?' (נוֹרָא תְהִלֹּת, lit. 'feared [in] praises'; usually understood 'to be feared even when praised'; Kalisch, 'awful *in* praises,—the qualities which are mentioned in praising Him fill the mind with awe and reverence'; in Kautzsch, *Du furchtbarer in Ruhmesthaten*, 'fearful in deeds of praise'; the last, or *Oxf. Heb. Lex.* 'terrible in attributes that call for praise,' being best); Dt 28^{58} 'that thou mayest fear this glorious and fearful name, THE LORD THY GOD' (נוֹרָא); Lk 21^{11} 'fearful sights' (TR φόβητρα, edd. φόβηθρα, RV 'terrors'); He 10^{27} 'a certain fearful looking for of judgment' (φοβερός; so v.^{31}, but in 12^{21} 'terrible,' RV 'fearful': φ. is always used of that which *inspires* fear); 2 Es 8^{22} 12^{8} 15^{13}, 2 Mac 1^{24}. Cf. Melvill, *Diary* (Wod. p. 271), 'The ministerie of Mr. Robert Bruce was verie steadable and mightie that yeir, and divers yeirs following, maist comfortable to the guid and godly, and maist feirfull to the enemies.' 'Awful' and 'dreadful' have both meanings also.

Fearfully is found only in Ps 139^{14} 'I am fearfully and wonderfully made' (נוֹרָאוֹת נִפְלֵיתִי,* Del. '"I am wonderfully come into being under fearful circumstances," *i.e.* circumstances that excite a shudder, *sc.* of astonishment'; Cheyne, 'graced so fearfully and gloriously').†

Fearfulness has in the earlier VSS both the meanings of fearful, as Ezk 30^{13} Cov. 'a fearfulness will I sende into the Egipcians londe'; 2 Mac 15^{23} Cov. 'sende now also thy good angell before us (o LORDE of heavens) in the fearfulnesse and drede of thy mightie arme.' But in AV 'fearfulness' means always the feeling of fear, apprehension, timidity: Ps 55^{5}, Is 33^{14} 21^{4}, 2 Es 5^{14} 11^{40} 15^{37}. RV adds Wis 17^{8} 'These were *themselves* sick with a ludicrous fearfulness' (καταγέλαστον εὐλάβειαν, AV 'fear worthy to be laughed at').

J. HASTINGS.

FEAR.—As in Eng., so in Heb. and in Gr. the same words are used to express emotions of fear which differ widely in their ethical character. At one end of the scale we have the fear of the LORD, which is the beginning of wisdom (Ps 111^{10}) and the whole duty of man (Ec 12^{13}); at the other end that fear of pain, shame, or death, which is craven, servile, and selfish, and which is often rebuked in Scripture. But it is impossible to draw any sharp line between the two kinds of fear, for in the imperfection of human character one motive shades off into another. Once even, by a bold anthropomorphism, God Himself is said to fear in the lower sense of the word (Dt 32^{27}, see Driver's note).

The fear which is merely self-regarding ought not to exist in a rational being who knows that God is his Father and understands enough to trust Him. Perfect love casteth out fear (1 Jn 4^{18}). But man, as he is, fears the forces of nature, which he does not understand or cannot control, because he does not trust God's providence. And he fears his fellow-man, because he is aware that brotherly instincts have grown weak with the sense of the loss of God's Fatherhood. 'Thus conscience doth make cowards of us all.' When Adam fell, he was afraid because he was naked (Gn 3^{10}), and he felt he could no longer face God: thus fear of God took its rise in the violation of peaceful fellowship with Him. Similarly, Cain violates human fellowship, and fears man because he is an outlaw and God's curse is upon him (Gn 4^{12-14}). Fear is thus the natural consequence of misdoing (Pr 28^{1}), and, accordingly, is sometimes expressly said to be inflicted as a punishment (Lv 26^{17}, Dt $28^{25.66}$). The effect of selfish fear is to unman the coward, he loses spirit (Jos 2^{11}; for the same phrase used in a higher sense, see 1 K 10^{5}): such men are to be rejected from active service in the army, lest the infection of their timidity spread (Dt 20^{8}, Jg 7^{3}). Courage is especially needed in a prophet (Jer 1^{8}, Ezk 3^{9}). Fear is to be overcome by faith in God (Ps $112^{7.8}$). In Rev 21^{8} the fearful are numbered with the unbelieving among the most grievous sinners.

The nobler fear has no thought of danger to self, so that the fear of God is the very opposite to the fear of man (Is $8^{12.13}$, Mt 10^{28}); but it arises from the sense of the nearness of some higher and holier being. Thus the beasts fear man (Gn 9^{2}), and man fears angels and spirits, and, above all, God. To fear the LORD (the phrase occurs far more often with J″ than with Elohim) means rather to feel awe of what He is, than fear of what He might do. It is fear of a Person (J″ is God's personal name), of His character, dignity, and holiness, rather than of His power or works. The fear of the LORD is to hate evil (Pr 8^{13}). Fear in the better sense of the word is the mainspring of religion, and 'to fear' is constantly used as signifying 'to worship,' whether the object be the true God or the gods of the heathen (*e.g.* 2 K $17^{35.36}$). Thus, too, Jacob, when dealing with Laban, calls J″ the Fear of his father Isaac (Gn $31^{42.53}$), that is, the object of his worship and religious awe. This kind of fear is so far removed from the lower sort, that it is one of the distinguishing qualities given by God's Spirit to the Messianic King (Is $11^{2.3}$, the spirit of the fear of the LORD), and the prayers of the Incarnate Son were heard because of His godly fear (He 5^{7}).

But men are only gradually trained to the level of this holy and disinterested fear. They often have to be taught to fear God at all, even in the lower sense; and this lesson is enforced by divine punishments (1 S 12^{18}), just as civil punishments teach men the authority of the law through fear (Dt 13^{11}). It is possible to trace progress in the conception of fear taught in the Bible. Thus at Sinai the people fear the fire (Ex 20^{18-20}); but at Horeb the prophet is taught to look for God in the still small voice rather than in the fire and tempest (1 K 19^{12}); and Ezekiel is told not to crouch before God, but to stand upon his feet when God speaks to him (Ezk 2^{1}). So in the NT boldness towards God is inculcated as much as fear, Christ having opened up the way of access for all who are united to Him: see Eph 3^{12}, He 4^{16} 10^{19}, 1 Jn 2^{28} 3^{21} 4^{17} (cf. Ro 8^{15} contrast bet. spirit of bondage and of adoption). But Christ does not encourage the idea that it is as yet possible to supersede the motive even of selfish fear; He gives grave warnings of the consequences that will follow sin hereafter, and, while He tells His 'friends' not to fear men, He bids them emphatically to fear Him who hath power to cast into hell (Lk $12^{4.5}$).

---

* See Davidson, *Syntax*, § 71, Rem. 2.

† See Cheyne's whole note (*Book of Psalms*, p. 352); it is particularly good. He says, 'Hitzig considers such a burst of admiration inappropriate to the case of human birth. But why? Take the production of a human hand. Why should not a sensitive poet thrill, like Browning's heroine (*James Lee's Wife*, viii.), at—

> "The beauty in this—how free, how fine
> To fear almost"?'

In Ac 'one that feareth God' is often used technically to mean a proselyte, even though uncircumcised (Ac 10^{2}). This is also the meaning of the word *σεβόμενος*, one that worshippeth God, also translated 'devout.' See COURAGE, REVERENCE.

W. O. BURROWS.

FEASTS AND FASTS.—It will be convenient to divide this article* into four parts—

I. Feasts connected with the institution of the Sabbath.
II. The great Historical Festivals, Passover, Pentecost, and Tabernacles.
III. The Minor Festivals.
IV. The Fast of the Day of Atonement and the Minor Fasts.

I. FEASTS CONNECTED WITH THE INSTITUTION OF THE SABBATH.

(1) The Sabbath. (2) The New Moon. (3) The Feast of Trumpets on the 1st day of the Sabbatical month. (4) The Sabbatical year. (5) The Jubilee year.

The sacred number 7 dominates the cycle of religious observances. Every 7th day was a Sabbath. Every 7th month was a sacred month. Every 7th year was a Sabbatical year. After 7 times 7 was the year of Jubilee. The Feast of the Passover, with the Feast of Unleavened Bread, began 14 days (2×7) after the beginning of the month, and lasted 7 days. The Feast of Pentecost was 7 times 7 days after the Feast of the Passover. The Feast of Tabernacles began 14 days (2×7) after the beginning of the month and lasted 7 days. The 7th month was marked by (1) Feast of Trumpets on the 1st day. (2) Fast of Atonement on the 10th day. (3) Feast of Tabernacles from the 15th day to the 21st. The days of 'Holy Convocation' were 7 in number—2 at the Passover, 1 at Pentecost, 1 at the Feast of Trumpets, 1 at the Day of Atonement, 1 at the Feast of Tabernacles, and 1 on the day following, the 8th day. (Willis, *Worship of the Old Covenant*, pp. 190, 191).

(1) *The Sabbath*, שַׁבָּת, שַׁבָּתוֹן, *σάββατον*.—In Am 8^{5}, 2 K $4^{22.23}$, Is 1^{13}, Hos 2^{11} it is connected with the *New moon*. Probably, the Sabbath was originally regulated by the phases of the moon, and thus occurred on the 7th, 14th, 21st, and 28th days of the month, the new moon being reckoned as the first Sabbath. 'Among the Assyrians the first twenty-eight days of every month were divided into four weeks of seven days each, the seventh, fourteenth, twenty-first, and twenty-eighth days respectively being Sabbaths, and there was a general prohibition of work on these days' (George Smith, *Assyrian Eponym Canon*, 19 f., quoted by Wellhausen, *Prolegomena*, 112, and Schultz, *OT Theol.* i. 204, who also mentions the primitive Delphic custom of giving oracles on the 7th day as the day dedicated to Apollo). Schultz also points out that it is a mistake to derive the name Sabbath from the planet Saturn, which the Rabbis call 'Shabbti,' and thus to bring the Sabbath holiday into connexion with the Chaldee worship of the planets. 'The naming of the days after certain planet-gods can hardly be so old as the Sabbath holiday.'

For the Sabbath law see Ex 16^{23-30} (P and J), 20^{8} (E), 23^{12} (J), 31^{13-16} (P), 34^{21} (JE), 35^{2} (P), Lv 19^{3} (H), 23^{3} (P), 26^{2} (H), Nu 15^{32-36} (P), $28^{9.10}$ (P), Dt 5^{12-15}. In Ex 20^{8} (E) it is to commemorate God's seventh day of rest at the creation. In Dt 5^{12-15} it commemorates the redemption of Israel from Egypt. On the Sabbath the daily morning and evening sacrifice—the 'continual sacrifice'—of a lamb as a burnt-offering was doubled. There is no evidence of Sabbath observance in the days of the Patriarchs. There is little evidence of Sabbath observance before the time of the Exile (Jer 17^{20-27}, Ezk $20^{12.13.16.20}$, Is 56^{2-6} 58^{13}). Greater strictness marks the post-exilic period (Neh 8^{9-12} 10^{31} 13^{15-22}). For the 39 kinds of work prohibited by the Rabbis on the Sabbath, and for many other actions and employments which cannot be summed up under any of them which were also forbidden, see Schürer, *HJP* II. ii. 96–105, cf. 1 Mac $2^{34-38.39-42}$, 2 Mac 5^{25} 8^{26-28} 12^{38} $15^{3f.}$, Mt 12^{9-13}, Mk 3^{1-5}, Lk 6^{6-10} 13^{10-17} 14^{1-6}, Jn 5^{1-18} 9^{14-16}. Sabbath-breaking was punishable with death (Nu $15^{32ff.}$ (P), Ex $31^{14ff.}$ (J)), cf. Ex 16^{5} (J), where the Manna ceases on the Sabbath, and Ex 35^{3} (P), where no fire is to be lighted. According to the testimony of Josephus, the high priest, although legally bound to officiate only on the Day of Atonement, yet actually officiated, as a rule, every Sabbath day, and on the occasion of the New Moons or other festivals in the course of the year (Jos. *BJ* v. v. 7),

(2) *The New Moon* (1) חֹדֶשׁ, (2) אֶחָד לַחֹדֶשׁ, (3) רֹאשׁ חֹדֶשׁ, (4) רָאשֵׁי חֳדָשִׁים, *νουμηνία*, *νεομηνία*.—Closely associated with the Sabbath (see above). 'When under the influence of the Chaldee method of dividing time, the course of the moon with its four phases was adopted as the unit of time measurement, the new moon and the 7th day were naturally regarded as the chief divisions of time, and therefore as holy days' (Schultz, *OT Theol.* i. 204). From 2 K 4^{23} it would appear that the prophets were in the habit of gathering the people around them, and perhaps of granting inquirers and suppliants an audience at new moons and on Sabbaths. At every new moon the number of burnt-offerings was largely increased; and in addition a kid of the goats was to be offered for a sin-offering (Ex $40^{2.17}$ (P), Nu 10^{10} (P) 28^{11-15} (P) 29^{6} (P), 1 S $20^{5.6.29}$, 1 Ch 23^{31}, 2 Ch 2^{4}, 2 Ch 29^{17}, Ps $81^{3.4}$, Is $1^{13.14}$, Hos 2^{11}, 1 Es $5^{52.53.57.}$ 8^{6} $9^{16.17.37}$, 1 Mac 10^{34}, Col 2^{16}).

(3) *The Feast of Trumpets* on the 1st day of the Sabbatical month, זִכְרוֹן תְּרוּעָה, *μνημόσυνον σαλπίγγων*.—The 7th month—Tisri—was the sacred month. On the new moon of the 7th month—the Feast of Trumpets—additional burnt-offerings were sacrificed (Nu 29^{1-6} (P), Lv $23^{24.25}$ (P)).

(4) *The Sabbatical Year*, שַׁבַּת שַׁבָּתוֹן לָאָרֶץ, *σάββατα ἀνάπαυσις τῇ γῇ* (Ex $23^{10.11}$ (J), Lv $25^{1-7.20.22}$ (H), Lv 26^{32-35} (H), Dt 15^{1-11} 31^{9-13}).—The Sabbatical year represented a still further consecration of time to God. The land was to keep a Sabbath. The fields were neither to be tilled nor reaped. 'Nature is to be set free, as it were, from the service which mankind exacts from her, and to be left entirely to herself. Only what she voluntarily offers is to be taken, and that not for any selfish purpose' (Schultz, *OT Theol.* i. 363). Hebrew slaves were to be set free unless they wished to remain in service (Ex 21^{2-6} (J)). A harvest was to

---

* The article is general. Fuller details will be found under the articles on the separate Feasts and Fasts. See also the article FASTING.

be given *gratis* to the poor of the people (Ex 23$^{10.11}$ (J)). Release from debt is prescribed (Dt 15$^{1-6}$). In Ex 23 (J) the arrangement is made for man; it is a limitation for the common good of private rights of property in land,—in fact, for the benefit of the landless, who in the 7th year are to have the usufruct of the soil; in Lv 25 (H) the arrangement is for the sake of the land,—that it may rest, if not on the 7th day, at least on the 7th year; and for the sake of the Sabbath,—that it may extend its supremacy over nature also (Wellhausen, *Prolegomena*, 118). At the F. of Tabernacles at the commencement of the Sabbatical year, the whole law was read in the hearing of the people (Neh 8$^{13-18}$). The 70 years' captivity and the land's desolation were regarded as making up for the unobserved Sabbaths of the land (*Camb. Comp. to the Bible*, p. 412) (2 Ch 36^{21}, Jer 34$^{14-22}$). After the return from exile Nehemiah bound the Jews by a covenant to keep them (Neh 10^{31}).

(5) *The Year of Jubilee* [*] דְּרוֹר, ἄφεσις, יוֹבֵל, ἐνιαυτὸς ἀφέσεως σημασία (Lv 25$^{8-55}$ 27$^{17-24}$).—Peculiar to P. As the Sabbatical year corresponded with the 7th day, so the year of Jubilee corresponded with the 50th, *i.e.* Pentecost. 'As the fiftieth day after the seven Sabbath days is celebrated as a closing festival of the forty-nine days' period, so is the fiftieth year after the seven Sabbatic years, as rounding off the larger interval; the seven Sabbaths falling on harvest time, which are usually reckoned specially (Lk 6^{1}), have, in the circumstance of their interrupting harvest work, a particular resemblance to the Sabbatic years which interrupt agriculture altogether. Jubilee is thus an artificial institution superimposed upon the years of fallow, regarded as harvest Sabbaths after the analogy of Pentecost' (Wellhausen, *Prolegomena*, 119). There were two main elements in the Jubilee—the emancipation of the Hebrew slave, and the return of mortgaged property to its hereditary owner. Cf. 2 Ch 36^{21}, Jer 34$^{8.14.15.17}$, Ezk 46^{17}, Is 61$^{1.2}$ 63^{4}, Lk 4$^{18-21}$. But in Jer the term דְּרוֹר used in Lv 25^{10} is applied only to the 7th year. The year of Jubilee was proclaimed by the sound of a trumpet on the Day of Atonement (Lv 25^{9}).

II. THE GREAT HISTORICAL FESTIVALS.[†]—As the new moon and the Sabbath were lunar feasts, the Passover (with the Feast of Unleavened Bread), Pentecost, and Tabernacles were solar festivals, *i.e.* festivals which followed the seasons of the year. 'Three times in the year shalt thou hold pilgrimage unto me, three times in the year shall all thy men appear before J", the God of Israel' (Ex 23$^{14.17}$ (J), 34^{23} (JE), Dt 16^{16}).

(1) *The Passover* פֶּסַח, πάσχα. *The Feast of Unleavened Bread* חַג הַמַּצּוֹת, ἑορτὴ τῶν ἀζύμων.—The Passover, though followed by the Feast of Unleavened Bread (*Mazzôth*), was distinct from it both in its origin and in its observance. In Ex 12 and 13 two narratives are combined. Ex 12$^{1-13}$ (P) refer to the Passover, 12$^{14-20}$ (P) refer to the seven days' F. of *Mazzôth*, 12$^{21-27}$ (JE) refer to the Passover, 12$^{43-50}$ (P) refer to the Passover, 13$^{3-10}$ (JE) refer to *Mazzôth* (Driver, *LOT*, 25). Josephus distinguishes the Passover from the F. of *Mazzôth* (*Ant.* III. x. 5), 'The F. of Unleavened Bread succeeds that of the Passover, and falls on the fifteenth day of the month, and continues seven days' (cf. Lv 23$^{5.6}$ (P), Nu 28$^{16.17}$ (P)). But in Mk 14$^{1.12}$, Lk 22^{1} they are practically identified. 'The Passover and the Feast of Unleavened Bread form a double festival, just as the Day of Atonement and the Feast of Tabernacles do. It is undoubtedly as a direct preparation for the F. of Unleavened Bread that the Passover is celebrated on the evening before the latter feast begins' (Schultz, *OT Theol.* vol. i. p. 364) [Lv 23$^{5-8}$ (P) $^{10-14}$ (H), Nu 9$^{2-14}$ (P) 28$^{16-25}$ (P) 33^{3} (P), Dt 16$^{1-8.16}$]. The parallelism between the feast of the first month and the feast of the seventh month should be noticed. The tenth day of the first month, for choosing the Lamb, is parallel to the tenth day of the seventh month, the Day of Atonement. The Passover on the fourteenth day of the first month and the seven days' F. of *Mazzôth* are parallel to the eight days of the F. of Tabernacles. The Passover, which was a sacrificial feast (Ex 12^{27}), was observed on the fourteenth day of the first month, Abib (the month of ears, because in it the ears of wheat first appear), later Nisan (Est 3^{7}, Neh 2^{1}). The Feast of Unleavened Bread was the opening as Pentecost was the closing festivity of the seven weeks' 'joy of harvest' (Dt 16^{9}, Lv 23^{10} (H)). Passover and *Mazzôth* must be distinguished. Wellhausen (*Prolegomena*, 87 ff.) has shown how the Passover פֶּסַח points back to the *sacrifice of the firstlings* (Ex 34$^{18ff.}$ (JE) 13$^{12ff.}$ (JE), Dt 15$^{19ff.}$ 16$^{1ff.}$). It is because J" smote the firstborn of Egypt and spared those of Israel that the latter thenceforward are held sacred to Him. Because Pharaoh refuses to allow the Hebrews to offer to their God the firstlings of cattle that are His due, J" seizes from him the firstborn of men. On the origin of the Paschal ritual and its connexion with Arabian and other customs, see W. R. Smith, *RS*, 227, 280, 344, 345, 406, 431, 464, 465; Schultz, *OT Theol.* i. p. 364; Cobb, *Origines Judaicæ*, 138. 'In the three great festivals we can plainly discern relics of the customs which preceded their legal institution. In the first (the Passover) we can distinguish the earlier belief, out of which the offering of the firstlings of the flock sprang, from the enactments which are proper to the institution of the Passover.' Cf. also for the feasts generally W. R. Smith, *The Prophets of Israel*, new ed. pp. 56, 384 ff., where he clearly, after Wellhausen,[*] proves that the chief occasions of worship in Israel (*Mazzôth*, Pentecost, and Tabernacles) were the agricultural feasts, just as among the Canaanites and other ancient nations. The real starting-point for a study of Jewish sacred feasts is Gn 4$^{2ff.}$ (J), 'Abel was a shepherd, and Cain was a husbandman. And in process of time it came to pass that Cain brought of *the fruit of the ground* an offering unto the LORD; and Abel also brought an offering of the *firstlings of his sheep.*' 'It is,' says Wellhausen (*Proleg.* p. 89), 'out of the simplest, most natural, and most widespread offerings, those of the first-fruits of the flock, herd, and field, the occasions for which recur regularly with the seasons of the year, that the annual festivals took their rise. The Passover corresponds with the firstlings of Abel the shepherd, the other three (*Mazzôth*, Pentecost, and Tabernacles) with the fruits presented by Cain the husbandman; apart from this difference, in essence and foundation they are all precisely alike.' Thus the Passover in its origin must be distinguished from the three agricultural feasts. It was a sacrificial feast, and had nothing to do with agriculture or harvest. The name 'sacrifice' (זֶבַח) is distinctly applied to it (Ex 12^{27} (JE) 34^{25} (JE), cf. 1 Co 5^{7}). In Nu 9$^{7-13}$ (P) it is a *korban* or offering (קָרְבָּן). Like the peace-offerings, the chief part of it was eaten by the worshippers;

---

[*] דְּרוֹר in Lv 25^{10} refers to the 'liberty' of Sabbatical year, in Jer 34$^{8.15.17}$ to the liberty of slaves in 7th year of service, in Ezk 46^{17} prob. to Jubilee. In Is 61^{11} its use is figurative.

[†] The distinctive feature of these חַגִּים is that they are not merely religious festivals like those of the 'sacred seasons' (מוֹעֲדִים), but imply, like the Arab. *ḥaj* (same word), *a pilgrimage to a sanctuary* (see Driver, *Deut.* 188 ff.).

[*] 'Not only in the Jahwistic but also in the Deuteronomic legislation the festivals rest upon agriculture, the basis at once of life and of religion' (*Proleg.* p. 91).

like the sin-offerings, there was an element of atonement in it (2 Ch 30^{16} 35^{11} refer to the sprinkling of the blood of the Passover); like the burnt-offerings, it was whole—no bone of it was broken; it was roast with fire—anything left was burnt with fire. In the two accounts of the Passover in Ex 12, several points of importance are omitted in the first, *e.g.* the character of the lamb, and the manner in which it was to be eaten; fresh points are added in the second, *e.g.* the hyssop, the basin, and that none were to leave their houses till the morning.

On each of the seven days of the F. of *Maẓẓôth*, which followed the Passover, 2 young bullocks and 1 ram and 7 lambs of the first year were offered as burnt-offerings, with their meal and drink-offerings, together with a goat for a sin-offering and the continual, *i.e.* daily burnt-offering (Nu 28^{19-25} (P)). On the second day of *Maẓẓôth*—Abib (Nisan) 16th—a sheaf of the new corn was offered as a wave-offering, together with a lamb of the first year for a burnt-offering (Lv 23^{10-14} (H)). The first and last days of the feast—the 15th and 21st days of the month—were days of 'holy convocation,' in which no servile work might be done (Lv 23^{7} (P)).

There are few references to the Passover in OT (Nu 9 (P), Jos 5^{10-12} (P), 2 Ch 30. 35, Ezr 6^{19}, 1 Es $1^{1.\ 6.\ 8.\ 9.\ 12.\ 17.\ 19.\ 20.\ 21.\ 22}$ $7^{10.\ 12}$). In NT see Mt $26^{2.\ 17.\ 18.\ 19}$, Mk $14^{1.\ 12.\ 14.\ 16}$, Lk 2^{41} $22^{1.\ 7.\ 8.\ 11.\ 13.\ 15}$, Jn $2^{13.\ 23}$ 6^{4} 11^{55} 12^{1} 13^{1} $18^{28.\ 39}$ 19^{14}, Ac 12^{4}, 1 Co 5^{7}, He 11^{28}. Later Jewish ordinances distinguish between the so-called 'Egyptian Passover,' that is, as it was enjoined for the first night of its celebration, and the 'permanent Passover,' as it was to be observed by Israel after their possession of the land of promise (Edersheim, *Bible History*, vol. ii.). On the later additions to the Paschal ceremonial, *e.g.* the recitation of the history of redemption, the four cups, the Hallel (Ps 113-118), the *Chagîgâh*, etc., see Edersheim, *The Temple: its Ministry and Services at the Time of Jesus Christ*, chs. xi. xii.; and for the Feast of Unleavened Bread, see ch. xiii. of the same.

(2) *The Feast of Pentecost.*—(i.) חַג שָׁבֻעוֹת, *ἑορτὴ ἑβδομάδων*, the Feast of Weeks (Ex 34^{22} (JE), Dt 16^{10}); (ii.) חַג הַקָּצִיר, *ἑορτὴ θερισμοῦ*, the Feast of Harvest (Ex 23^{16} (J)); (iii.) יוֹם הַבִּכּוּרִים, *ἡ ἡμέρα τῶν νέων*, the Day of Firstfruits (Nu 28^{26} (P); cf. Ex 22^{29} (J) 23^{19} (J) 34^{26} (JE)). Fifty days after the offering of the Paschal wave-sheaf, the Feast of Pentecost, or Weeks, or Harvest, was kept on or about the 8th of Sivan, the third month. It lasted a single day (Dt 16^{9-12}). The day was a day of 'holy convocation' (Lv 23^{21} (P)). The feast marked the completion of the corn harvest, and according to the later Jews it commemorated the giving of the law (Edersheim, *The Temple*, etc., ch. xiii. p. 225). It closed the New Year holiday season. The sacrifices were similar to those offered on the seven days of the F. of *Maẓẓôth* (Nu 28^{26-31} (P)). The characteristic ritual of this feast was the offering and waving of two leavened loaves of wheaten flour, together with a sin-offering, burnt-offerings, and peace-offerings (Lv 23^{15-20} (H)). As a wave-sheaf was offered at *Maẓẓôth*, which marked the commencement of harvest, as the consecration of the firstfruits, so two wave-loaves were offered at Pentecost, which marked the completion of the corn harvest. The feast is not referred to in OT, but see 2 Mac 12^{32}, Ac 2^{1} 20^{16}, 1 Co 16^{8} (cf. Edersheim, *The Temple*, pp. 225-231).

(3) *The Feast of Tabernacles.*—חַג הַסֻּכּוֹת, *ἑορτὴ σκηνῶν*, F. of Tabernacles or Booths (Lv 23^{34}, Dt 16^{13}); חַג הָאָסִיף, *ἑορτὴ συντελείας* (Ex 23^{16}), *ἑορτὴ συναγωγῆς* (Ex 34^{22}), the F. of Ingathering. This feast was observed from the 15th to the 22nd of Tisri (the seventh month), following closely upon the Fast on the 10th day of the month—the Day of Atonement. It marked the completion of the harvest of fruit, oil, and wine, and historically it commemorated the wanderings in the wilderness. It was the harvest-home at the close of the year, when people came 'from the villages and towns to the fruit gardens to live in booths, and enjoy a happy autumn holiday' (Ex 23^{16} (J) 34^{22} (JE), Lv $23^{34-36.\ 39-44}$ (PH), Nu 29^{12-40} (P), Dt 16^{13-15} 31^{10-13}). The sacrifices at this feast were far more numerous than at any other. On each of the seven days 1 kid of the goats was offered as a sin-offering, and 2 rams and 14 lambs as a burnt-offering. Also 70 bullocks were offered on the seven days, beginning with 13 on the first day and diminishing by one each day until on the 7th day 7 were offered (Nu 29^{12-34}). After the seven days a solemn day of 'holy convocation' was observed ('the last day, that great day of the feast,' Jn 7^{37}), which marked the conclusion, not only of the Feast of Tabernacles, but of the whole cycle of the festal year. On this day 1 bullock, 1 ram, and 7 lambs were offered as a burnt-offering, and 1 goat for a sin-offering (Nu 29^{35-38}). The feast is alluded to in 1 K 8^{2} 12^{32}, 2 Ch 5^{3} $7^{8\mathrm{ff.}}$, Ezr 3^{4}, Neh 8^{14-18}, Zec 14^{16-19}, Jn 7^{1}–10^{21}. On the later ceremonies connected with the feast, *e.g.* the procession to Siloam to fetch water and its solemn libation at the altar (Jn 7^{37}), the singing of the Hallel (Pss 113-118), the daily processions round the altar, and the sevenfold repetition on the seventh day (Ps 118^{25}), the lighting of the four great golden candelabra in the court of the women (Jn 8^{12}), the singing of Pss 105. 29. 50. 94. 81. 82, and the public reading of the law on the first day of the week in the Sabbatical year, see Edersheim, *The Temple*, etc., ch. xiv. pp. 232-249; Westcott on *St. John*, notes on ch. 7^{37} 8^{12}. [On the *daily service*, which formed the *substratum of the entire worship of the Temple*, the morning and evening sacrifices which were offered on every Sabbath and every festival day, see Schürer, *HJP* ii. 273-299.]

III. THE MINOR FESTIVALS.—(1) *The Feast of Purim* (פּוּרִים, *φρουραί*).—In 2 Mac 15^{36} it is called *ἡ Μαρδοχαϊκὴ ἡμέρα*, 'Mordecai's Day.' It is said to have been instituted by Mordecai to commemorate the overthrow of Haman and the failure of his plots against the Jews (Est 3^{7} 9^{15-32}). It was held on the 14th and 15th of the month Adar (the twelfth month). The 13th of Adar—'the day of Nicanor'—originally a feast to commemorate his death (1 Mac 7^{49}, 2 Mac 15^{36}), at a later time became a fast—'the Fast of Esther'—in preparation for the Feast of Purim, which was of a very joyous character. De Lagarde (followed by Schultz, *OT Theol.* p. 431, and *Encyl. Brit.* 9th ed. vol. xx. p. 115) thinks that the feast which dates from the Persian period is itself of Persian origin, Purim being derived from the Persian Furdigan (Pōrdigān, Pārdiyān) the *φουρμαία* and *φουρδία* of one of the Greek recensions of Esther pointing to a form *φουρδαία* instead of Purim.

Edersheim identifies the F. of Purim with the unnamed feast in Jn 5^{1}, 'for no other feast could have intervened between December (Jn 4^{35}) and the Passover (Jn 6^{4}), except that of the "Dedication of the Temple," and that is specially designated as such (Jn 10^{22}) and not simply as a Feast of the Jews' (*The Temple*, etc., p. 291). On the evening of the 13th of Adar the whole Book (*Megillah* or Roll) of Esther was read at the synagogue service, to keep the memory of the great deliverance by Esther alive, 'the children raising their loudest and angriest cries at every mention of the name of Haman, the congregation stamping on the floor, with Eastern demonstrativeness, and imprecating from every voice the curse, "Let his name be blotted out, the name of the wicked shall rot." Year by year in the Nazareth synagogue Jesus must have seen and heard all this, and how the reader tried to read in one breath the verses in which Haman and his sons are jointly mentioned, to show that they were hanged together' (Geikie, *The Life and Words of Christ*, i. 226). Edersheim (*The Life and Times of Jesus the Messiah*, i. 229) speaks of the 'good cheer and boisterous enjoyments' of the Feast of Purim, some of its customs 'almost reminding us of our fifth of November.'

(2) *The Feast of the Dedication of the Temple* (חֲנֻכָּה, חֲנֻכַּת הַבַּיִת, ἐγκαίνια, 1 Mac 4$^{56.59}$, 2 Mac 10$^{6ff.}$; φῶτα, Jos. *Ant.* XII. vii. 7).—It was instituted by Judas Maccabæus in B.C. 164, when the temple which had been desecrated by Antiochus Epiphanes was once more purified and re-dedicated to the service of J". It commenced on the 25th of Chislev (the ninth month), and lasted for eight days. 'All through the land the people assembled in their synagogues, carrying branches of palm and other trees in their hands, and held jubilant services. No fast or mourning could commence during the feast, and a blaze of lamps, lanterns, and torches illuminated every house, within and without, each evening. In Jerusalem the temple itself was thus lighted up. The young of every household heard the stirring deeds of the Maccabees, to rouse them to noble emulation, and with these were linked the story of the heroic Judith and the Assyrian Holofernes' (Geikie, *The Life and Words of Christ*, vol. i. p. 225). It will be noticed that in four particulars the Feast of the Dedication resembled the Feast of Tabernacles, (1) in its duration of eight days; (2) in the chanting of the Hallel (Pss 113–118); (3) in the practice of carrying palm branches; (4) in the illumination of the temple. Edersheim, in *The Life and Times of Jesus the Messiah*, ii. 227 f., thinks that the first three particulars were derived from the Feast of the Tabernacles, and that the last (the temple illumination) passed from the Feast of the Dedication into the observances of the Feast of Tabernacles. The date of the Feast of the Dedication, the 25th of Chislev, some hold to have been adopted by the ancient Church as that of the birth of our blessed Lord—Christmas—the dedication of the true temple, which was the body of Jesus (Jn 2^{19}) (Edersheim, *The Temple*, etc., p. 293, and 'Christmas a Festival of Jewish Origin' in *The Leisure Hour* for Dec. 1873). The F. of the Dedication is mentioned in Jn 10^{22}.

(3) *The Feast of Wood Offering* or of the *Wood-carriers*, ξυλοφορίων (Jos. *BJ*, II. xvii. 6), on the 15th of Abib—being the last of the nine occasions on which offerings of wood were brought for the use of the temple (cf. Neh 10^{34} 13^{31}).

The Feast of the Reading of the Law (1 Es 9^{50}, Neh 8^{9}); *The Feast of Nicanor* on the 13th of Adar (1 Mac 7^{49}); *The Feast of the Captured Fortress* on the 23rd of Iyyar (the second month) (1 Mac 13$^{50-52}$); and *The Feast of Baskets*, evidently 'never attained to any real religious significance' (see Schultz, *OT Theol.* i. 431, and Edersheim, *The Temple*, etc., 295 f., on the Feast of Wood Offering).

IV. FASTS.—(1) *The Day of Atonement.*—יוֹם הַכִּפֻּרִים, ἡμέρα ἐξιλασμοῦ, lit. Day of the Coverings or Atonements (Lv 16 (P) and 23$^{27-32}$ (H), Ex 30^{10} (P), Nu 29$^{7-11}$ (P)). It was the only fast day prescribed by the law (Lv 23^{27} (H)). In the Talmud it is called 'The Day' (יוֹמָא); in the NT it is called 'the fast,' ἡ νηστεία (Ac 27^{9}). The sacrifices were threefold: (1) the ordinary daily sacrifices; (2) the special expiatory sacrifices of the day; (3) the festive sacrifices (Nu 29$^{7-11}$). The characteristic feature of the day was the offering of the sin-offering of atonement by the high priest alone (Lv 16^{33})—not in his gorgeous official dress, but in the simple white linen robes of purity and consecration (Lv 16$^{4.29.31}$ 23$^{27.32}$, Nu 29^{7}).

The order of proceedings is given in Lv 16. In vv.$^{3-10}$ we have the general outline, in vv.$^{11-28}$ the details, which were as follows: (1) The killing of the bullock by the high priest as a sin-offering for himself and his house; (2) the burning of incense in the Holy of Holies by the high priest; (3) the sprinkling of the mercy-seat (ἱλαστήριον ἐπίθεμα) with the blood of the priest's sin-offering; (4) the casting lots upon the goats of the people's sin-offering, one goat for J", one for Azazel (עֲזָאזֵל, *Philo*, 'The one goat is given to "the fugitive creature," and the lot which it received is named in the prophecy "sent away" [referring to ἀποπομπαῖον by which the LXX tr. עֲזָאזֵל], because it is persecuted, expelled, and driven far away by wisdom.' *Willis*, 'Azazel, the name of a personal being, in opposition to J", the personal name of God.' *Schultz*, 'Some powerful being to whom the animal is assigned, and to whom it is sent with the now forgiven guilt of the reconciled people. . . . This being must be conceived of as strange and unholy. . . . An Aramaic name for an unclean and ungodlike power, which has its abode in the wilderness, in the accursed land outside the sacred bounds of the camp.' *Watson* in *Camb. Comp. to the Bible*, 'Azazel, the completely separate one, the evil spirit regarded as dwelling in the desert'). See AZAZEL. (5) The killing of the goat of the people's sin-offering by the high priest; (6) the sprinkling of the mercy-seat with the blood of the people's sin-offering; (7) the sprinkling of the blood of each sin-offering on the golden altar of incense and before it seven times; (8) atonement for the court and altar of burnt-offering; (9) confession of sin over the live goat, and his dismissal into the wilderness to Azazel; (10) resumption by the high priest of the gorgeous robes of his office; (11) the offering of burnt-offerings and burning the fat of the sin-offerings; (12) the burning of the sin-offerings without the camp (He 13$^{10-12}$). The chief purpose of the Day of Atonement was to preserve the holiness of the sanctuary as a fit place of meeting between God and man. There were five subjects of atonement: (1) The Holy Sanctuary (*i.e.* the Holy of Holies); (2) the Tent of Meeting (*i.e.* the Holy Place); (3) the altar (*i.e.* of burnt-offering); (4) the priest; (5) all the congregation.

It is significant that there is no mention of the Day of Atonement until Sir 50$^{5ff.}$. Zec 3^{9} is doubtful. In Neh 8 it might have been expected. Neh 7^{73b}–9^{38} records (1) the observance of the Feast of Trumpets on the first day of the seventh month of the year B.C. 444; (2) the celebration of the Feast of Tabernacles, including the reading of the books of the law day by day, from the 15th to the 22nd of the same month; (3) the observance of a day of general fasting and prayer on the 24th day of the same month. Either the 24th day was observed in place of the Day of Atonement on the 10th day, or the latter had not yet been appointed. It is difficult to avoid the latter alternative. 'This *testimonium e silentio* is enough; down to that date (B.C. 444) the great day of the Priestly code (now introduced for the first time) had not existed' (Wellhausen, *Prolegomena*, p. 111). For the references in the NT see Ro 3^{25} (ἱλαστήριον, כַּפֹּרֶת), He 2^{18} 4$^{14-16}$ 5$^{1-10}$ 6$^{19.20}$ 7$^{22-28}$ 8$^{1-6}$ 9$^{11-15}$ 13$^{10-12}$, 1 Jn 2^{2} 4^{10} (ἱλασμός) (Willis, *Worship of the Old Covenant*, pp. 201–214; Edersheim, *The Temple*, etc., ch. xvi. pp. 263–288). See further, ATONEMENT (DAY OF).

(2) *Other Fasts.*—The Day of Atonement was the only fast day prescribed by the law. But we read of individual and national fasts in Jg 20^{26}, 1 S 7^{6} 31^{13}, 2 S 12^{16}, 1 K 21$^{9.12.27}$, Jon 3$^{5.7.8}$, Jer 14^{12} 36$^{6.9}$, La 2^{10}, Jl 1^{14} 2$^{12.15}$, Is 58$^{3-7}$, Neh 9$^{1ff.}$, Est 4^{16}, Dn 10^{3}, 1 Mac 3^{47}. Two passages in Zec call for comment,

SYNOPSIS OF FEASTS AND FASTS.

Group.	Feast or Fast.	Exodus.	Leviticus.	Numbers.	Deuteronomy.	References outside Pentateuch.	References in New Test.

IV. *Fast.*	Day of Atonement .	30^{10}	16. 23^{27-32}	29^{7-11}	..	Zec 3^{9} (?), Sir $50^{5ff.}$	Ac 27^{9}, He 2^{18} 4^{14-16} 5^{1-10} $6^{19.20}$ 7^{22-28} 8^{1-5} 9^{11-15}.

7^{3-5} and 8^{19}. In 7^{3-5} Zechariah, in answer to an inquiry put to him by the men of Bethel about fasting, declares that J″ demands no fasts, but only observance of His moral commands. Two fasts had been in observance in the 5th and 7th months for seventy years,—the fast of the 5th month (9th Abib), in memory of the destruction of the city and temple by fire (2 K 25^{8}); and the fast of the 7th month (2nd Tisri), in memory of the murder of Gedaliah and the annihilation of all that remained of the Jewish state (Jer 41). In ch. 8 he pictures the Messianic future, when the fast days will become seasons of gladness and cheerful feasts. He adds to 7^{3-5} two other fasts: the fast of the 4th month (17th Tammuz), in memory of the capture of Jerusalem (Jer 39^{2}), and the fast of the 10th month (10th Tebeth), in memory of the commencement of the siege of Jerusalem by Nebuchadrezzar (2 K 25^{1}). Zechariah knows nothing of '*the* Fast'—the Day of Atonement. Later fasts 'came into a position co-ordinate with the feasts, and became a stated and very important element of the ordinary worship' (Wellhausen, *Prolegomena*, 112). Fasting degenerated into formalism and self-righteousness. In the NT cf. Mt $6^{16ff.}$ 9^{14}, Mk $2^{18ff.}$, Lk $5^{33ff.}$ 18^{12}, Ac 27^{9}, 2 Co 6^{5} 11^{27}. After the destruction of Jerusalem by Titus, the system of fasts received such an impulse that it was necessary to draw up a list of the days on which fasting was forbidden. The present Jewish calendar contains twenty-two fast-days, besides the Day of Atonement, the Fast of Esther, and the four fasts of Zec 8^{19} (Edersheim, *The Temple*, etc., pp. 297–301).

LITERATURE.—Edersheim, *The Temple: its Ministry and Services*, 144–300, *The Life and Times of Jesus the Messiah*; Geikie, *The Life and Words of Christ*; Wellhausen, *Prolegomena*, 83–120; Schultz, *OT Theology*, i. 189, 196, 202, 359–369, 372, 402. Smith, *The Prophets of Israel*, new ed. with introd. and notes by Prof. Cheyne, 38, 56, 384, *OTJC*², 240, 269, *RS*², 221, 227, 245, 280, 344 f., 396, 403 f., 416, 434, 452, 464; Cobb, *Origines Judaicæ*, 137–139; Robertson, *Early Religion of Israel*, 363, 372, 378, 385, 397, 401, criticism of Wellhausen; Schürer, *HJP* (*passim*); Watson, *Cambridge Companion to the Bible*, 411–417; Driver, *Deuteronomy* (*passim*), *Joel and Amos*, 16, 43 f., 55; Trumbull, *Threshold Covenant*, 209 f., 266.

E. ELMER HARDING.

THE END OF VOL I.

The following important articles, among others, may be expected in the Second Volume :—

First-fruits	Professor A. S. Peake.
Flood	Mr. F. H. Woods.
Food	Professor A. Macalister.
Fool	Professor Geerhardus Vos.
Foreigner	Mr. John A. Selbie.
Forgiveness	Mr. J. F. Bethune-Baker.
Fringes	Professor A. R. S. Kennedy.
Gabbatha	Professor Eb. Nestle.
Gad	Professor W. H. Bennett.
Gadara	Sir Charles Warren.
Galatia	Professor W. M. Ramsay.
Galatians (Ep.)	Professor Marcus Dods.
Galilee	Dr. Selah Merrill.
Games	Dr. Thomas Nicol.
Gate	Sir Charles Warren.
Genealogy	Professor Ed. L. Curtis and Professor B. W. Bacon.
Genesis	Professor H. E. Ryle.
Geology	Professor Edward Hull.
Gethsemane	Lieut.-Col. Conder.
Giant	Professor Willis J. Beecher.
Gilead	Professor Driver, Dr. Merrill, and Professor Bennett.
Gilgal	Dr. F. J. Bliss.
Glory	Mr. G. Buchanan Gray and Professor Massie.
God	Professor A. B. Davidson and Professor W. Sanday.
Golgotha	Sir Charles Warren.
Gospels	Professor V. H. Stanton.
Grace	Principal A. Stewart.
Habakkuk	Professor S. R. Driver.
Hades	Professor S. D. F. Salmond.
Haggai	Mr. G. A. Cooke.
Hamath	Professor W. Max Müller.
Hebrews (Ep.)	Professor A. B. Bruce.
Herod	Mr. A. C. Headlam.
Hexateuch	Mr. F. H. Woods.
Hinnom	Sir Charles Warren.
Hittites	Professor A. H. Sayce.
Holiness	Professor John Skinner and Professor G. B. Stevens.
Holy Spirit	Professor H. B. Swete.
Hosea	Professor A. B. Davidson.
House	Sir Charles Warren.
Hymn	Professor Walter Lock.
Idolatry	Professor W. P. Paterson.
Incarnation	Principal R. L. Ottley.
Isaiah	Professor G. A. Smith.

Dictionary of the Bible

VOLUME II

PREFACE

'GIVE heed to . . . teaching.' Perhaps the Church of Christ has never given sufficient heed to teaching since the earliest and happiest days. In our own day the importance of teaching, or, as we sometimes call it, expository preaching, has been pressed home through causes that are various yet never accidental; and it is probable that in the near future more heed will be given by the Church to teaching than has ever been given before.

As a contribution towards the furnishing of the Church for that great work, this DICTIONARY OF THE BIBLE is published. It is a Dictionary of the Old and New Testaments, together with the Old Testament Apocrypha, according to the Authorized and Revised English Versions, and with constant reference to the original tongues. Every effort has been used to make the information it contains reasonably full, reliable, and accessible.

As to fulness. In a Dictionary of the Bible one expects that the words occurring in the Bible, which do not explain themselves, will receive some explanation. The present Dictionary more nearly meets that expectation than any Dictionary that has hitherto been published. Articles have been written on the names of all Persons and Places, on the Antiquities and Archæology of the Bible, on its Ethnology, Geology, and Natural History, on Biblical Theology and Ethic, and even on the obsolete or archaic words occurring in the English Versions. The greater number of the articles are of small compass, for care has been exercised to exclude vague generalities as well as unaccepted idiosyncrasies; but there are many articles which deal with important and difficult subjects, and extend to considerable length. Such, for example, is the article in the first volume on the Chronology of the New Testament, and the article in the present volume on Jesus Christ.

As to reliability. The names of the authors are appended to their articles, except where the article is very brief or of minor importance; and these names are the best guarantee that the work may be relied on. So far as could be ascertained, those authors were chosen for each particular subject who had made a special study of that subject, and might be able to speak with authority upon it. Then, in addition to the work of the Editor and his Assistant, every sheet has passed through the hands of the three distinguished scholars whose names are found on the title-page. Those scholars are not responsible for errors of any kind, if such should be discovered in the Dictionary, but the time and care they have spent upon it may be taken as a good assurance that the work as a whole is reliable and authoritative.

As to accessibility. While all the articles have been written expressly for this work, so they have been arranged under the headings one would most naturally turn to. In a very few cases it has been found necessary to group allied subjects together. But even then, the careful system of black-lettering and cross-reference adopted should enable the reader to find the subject wanted without delay. And so important has it seemed to the Editor that each subject should be found under its own natural title, that he has allowed a little repetition here and there (though not in identical terms) rather than distress the reader by sending him from one article to another in search of the information he desires. The Proper Names will be found under the spelling adopted in the Revised Version, and in a few very familiar instances the spelling of the Authorized Version is also given, with a cross-reference to the other. On the Proper Names generally, and particularly on the very difficult and unsettled questions of their derivation, reference may be made to the article NAMES (PROPER), which will be found in the third volume. The Hebrew, and (where it seemed to be of consequence for the identification of the name) the Greek of the Septuagint, have been given for all proper and many common names. It was found impracticable to record all the variety of spelling discovered in different manuscripts of the Septuagint; and it was considered unnecessary, in view of the great Edition now in preparation in Cambridge, and the Concordance of Proper Names about to be published at the Clarendon Press. The Abbreviations, considering the size and scope of the work, will be seen to be few and easily mastered. A list of them, together with a simple and uniform scheme of transliterating Hebrew and Arabic words, will be found on the following pages.

The Editor has pleasure in recording his thanks to many friends and willing fellow-workers, including the authors of the various articles. In especial, after those whose names are given on the title-page, he desires to thank the Rev. W. SANDAY, D.D., LL.D., Lady Margaret Professor of Divinity in the University of Oxford, who has again read many of the articles and given valuable assistance in other ways; next, the Rev. G. M. MACKIE, M.A., of Beyrout, whose knowledge of modern Syrian life is both intimate and sympathetic; also Professor MAHAFFY of Dublin, who kindly read some articles in proof; Professor RYLE of Cambridge; Principal SALMOND of Aberdeen; Principal STEWART of St. Andrews; and Principal FAIRBAIRN and Mr. J. VERNON BARTLET, M.A., of Mansfield College, Oxford. The Editor regrets to have to record the death, since the issue of the first volume, of Dr. D. Shearer and the Rev. H. A. White, M.A., New College, Oxford.

⁂ Messrs. Charles Scribner's Sons, New York, have the sole right of publication of this DICTIONARY OF THE BIBLE in the United States and Canada.

LIST OF ABBREVIATIONS

I. General

Alex. = Alexandrian.
Apoc. = Apocalypse.
Apocr. = Apocrypha.
Aq. = Aquila.
Arab. = Arabic.
Aram. = Aramaic.
Assyr. = Assyrian.
Bab. = Babylonian.
c. = *circa*, about.
Can. = Canaanite.
cf. = compare.
ct. = contrast.
D = Deuteronomist.
E = Elohist.
edd. = editions or editors.
Egyp. = Egyptian.
Eng. = English.
Eth. = Ethiopic.
f. = and following verse or page; as Ac $10^{34f.}$
ff. = and following verses or pages; as Mt $11^{28ff.}$
Gr. = Greek.
H = Law of Holiness.
Heb. = Hebrew.
Hel. = Hellenistic.
Hex. = Hexateuch.
Isr. = Israelite.
J = Jahwist.
J″ = Jehovah.
Jerus. = Jerusalem.
Jos. = Josephus.
LXX = Septuagint.
MSS = Manuscripts.
MT = Massoretic Text.
n. = note.
NT = New Testament.
Onk. = Onkelos.
OT = Old Testament.
P = Priestly Narrative.
Pal. = Palestine, Palestinian.
Pent. = Pentateuch.
Pers. = Persian.
Phil. = Philistine.
Phœn. = Phœnician.
Pr. Bk. = Prayer Book.
R = Redactor.
Rom. = Roman.
Sam. = Samaritan.
Sem. = Semitic.
Sept. = Septuagint.
Sin. = Sinaitic.
Symm. = Symmachus.
Syr. = Syriac.
Talm. = Talmud.
Targ. = Targum.
Theod. = Theodotion.
TR = Textus Receptus.
tr. = translate or translation
VSS = Versions.
Vulg. = Vulgate.
WH = Westcott and Hort's text.

II. Books of the Bible

Old Testament.

Gn = Genesis.
Ex = Exodus.
Lv = Leviticus.
Nu = Numbers.
Dt = Deuteronomy.
Jos = Joshua.
Jg = Judges.
Ru = Ruth.
1 S, 2 S = 1 and 2 Samuel.
1 K, 2 K = 1 and 2 Kings.
1 Ch, 2 Ch = 1 and 2 Chronicles.
Ezr = Ezra.
Neh = Nehemiah.
Est = Esther.
Job.
Ps = Psalms.
Pr = Proverbs.
Ec = Ecclesiastes.
Ca = Canticles.
Is = Isaiah.
Jer = Jeremiah.
La = Lamentations.
Ezk = Ezekiel.
Dn = Daniel.
Hos = Hosea.
Jl = Joel.
Am = Amos.
Ob = Obadiah.
Jon = Jonah.
Mic = Micah.
Nah = Nahum.
Hab = Habakkuk.
Zeph = Zephaniah.
Hag = Haggai.
Zec = Zechariah.
Mal = Malachi.

Apocrypha.

1 Es, 2 Es = 1 and 2 Esdras.
To = Tobit.
Jth = Judith.
Ad. Est = Additions to Esther.
Wis = Wisdom.
Sir = Sirach or Ecclesiasticus.
Bar = Baruch.
Three = Song of the Three Children.
Sus = Susanna.
Bel = Bel and the Dragon.
Pr. Man = Prayer of Manasses.
1 Mac, 2 Mac = 1 and 2 Maccabees.

New Testament.

Mt = Matthew.
Mk = Mark.
Lk = Luke.
Jn = John.
Ac = Acts.
Ro = Romans.
1 Co, 2 Co = 1 and 2 Corinthians.
Gal = Galatians.
Eph = Ephesians.
Ph = Philippians.
Col = Colossians.
1 Th, 2 Th = 1 and 2 Thessalonians.
1 Ti, 2 Ti = 1 and 2 Timothy.
Tit = Titus.
Philem = Philemon.
He = Hebrews.
Ja = James.
1 P, 2 P = 1 and 2 Peter.
1 Jn, 2 Jn, 3 Jn = 1, 2, and 3 John.
Jude.
Rev = Revelation.

III. English Versions

Wyc. = Wyclif's Bible (NT *c.* 1380, OT *c.* 1382, Purvey's Revision *c.* 1388).
Tind. = Tindale's NT 1526 and 1534, Pent. 1530.
Cov. = Coverdale's Bible 1535.
Matt. or Rog. = Matthew's (*i.e.* prob. Rogers') Bible 1537.
Cran. or Great = Cranmer's 'Great' Bible 1539.
Tav. = Taverner's Bible 1539.
Gen. = Geneva NT 1557, Bible 1560.
Bish. = Bishops' Bible 1568.
Tom. = Tomson's NT 1576.
Rhem. = Rhemish NT 1582.
Dou. = Douay OT 1609.
AV = Authorized Version 1611.
AVm = Authorized Version margin.
RV = Revised Version NT 1881, OT 1885.
RVm = Revised Version margin.
EV = Auth. and Rev. Versions.

IV. For the Literature

AHT = Ancient Hebrew Tradition.
AT = Altes Testament.
BL = Bampton Lecture.
BM = British Museum.
BRP = Biblical Researches in Palestine.
CIG = Corpus Inscriptionum Græcarum.
CIL = Corpus Inscriptionum Latinarum.
CIS = Corpus Inscriptionum Semiticarum.
COT = Cuneiform Inscriptions and the OT.
DB = Dictionary of the Bible.
EHH = Early History of the Hebrews.
GAP = Geographie des alten Palästina.
GGA = Göttingische Gelehrte Anzeigen.
GGN = Nachrichten der königl. Gesellschaft der Wissenschaften zu Göttingen.
GVI = Geschichte des Volkes Israel.
HCM = Higher Criticism and the Monuments.
HE = Historia Ecclesiastica.
HGHL = Historical Geog. of Holy Land.
HI = History of Israel.
HJP = History of the Jewish People.
HPM = History, Prophecy, and the Monuments.
IJG = Israelitische und Jüdische Geschichte.
JBL = Journal of Biblical Literature.
JDTh = Jahrbücher für deutsche Theologie.
JQR = Jewish Quarterly Review.
JRAS = Journal of the Royal Asiatic Society.
JRL = Jewish Religious Life after the Exile.
KAT = Die Keilinschriften und das Alte Test.
KIB = Keilinschriftliche Bibliothek.
LCBl = Literarisches Centralblatt.
LOT = Introd. to the Literature of the Old Test.
NHWB = Neuhebräisches Wörterbuch.
NTZG = Neutestamentliche Zeitgeschichte.
ON = Otium Norvicense.
OTJC = The Old Test. in the Jewish Church.
PB = Polychrome Bible.
PEF = Palestine Exploration Fund.
PEFSt = Quarterly Statement of the same.
PSBA = Proceedings of Soc. of Bibl. Archæology.
PRE = Real-Encyclopädie für protest. Theologie und Kirche.
QPB = Queen's Printers' Bible.
REJ = Revue des Études Juives.
RP = Records of the Past.
RS = Religion of the Semites.
SBOT = Sacred Books of Old Test.
SK = Studien und Kritiken.
SP = Sinai and Palestine.
SWP = Memoirs of the Survey of W. Palestine.
ThL or *ThLZ* = Theol. Literaturzeitung.
ThT = Theol. Tijdschrift.
TSBA = Transactions of Soc. of Bibl. Archæology.
TU = Texte und Untersuchungen.
WAI = Western Asiatic Inscriptions.
WZKM = Wiener Zeitschrift für Kunde des Morgenlandes.
ZA = Zeitschrift für Assyriologie.
ZAW or *ZATW* = Zeitschrift für die Alttest. Wissenschaft.
ZDMG = Zeitschrift der Deutschen Morgenländischen Gesellschaft.
ZDPV = Zeitschrift des Deutschen Palästina-Vereins.
ZKSF = Zeitschrift für Keilschriftforschung.
ZKW = Zeitschrift für kirchliche Wissenschaft.

A small superior number designates the particular edition of the work referred to, as *KAT*^{2}, *LOT*^{6}.

AUTHORS OF ARTICLES IN VOL. II

Rev. Walter F. Adeney, M.A., D.D., Principal of the Lancashire Independent College, Manchester.

Ven. A. S. Aglen, M.A., D.D., Archdeacon of St. Andrews.

Rev. Willoughby C. Allen, M.A., Chaplain, Fellow, and Lecturer in Theology and Hebrew, Exeter College, Oxford.

Rev. Benjamin Wisner Bacon, M.A., D.D., Professor of New Testament Criticism and Interpretation in Yale University, New Haven.

Rev. John S. Banks, D.D., Professor of Systematic Theology in the Headingley College, Leeds.

Rev. W. Emery Barnes, M.A., D.D., Hulsean Professor of Divinity and Fellow of Peterhouse, Cambridge.

James Vernon Bartlet, M.A., Professor of Church History, Mansfield College, Oxford.

Rev. Llewellyn J. M. Bebb, M.A., Principal of St. David's College, Lampeter; formerly Fellow and Tutor of Brasenose College, Oxford.

Rev. Willis Judson Beecher, D.D., Professor of Hebrew Language and Literature in Auburn Theological Seminary, New York.

Rev. William Henry Bennett, D.D., Litt.D., Professor of Old Testament Exegesis in Hackney and New Colleges, London; sometime Fellow of St. John's College, Cambridge.

Very Rev. John Henry Bernard, D.D., Fellow of Trinity College, and Dean of St. Patrick's, Dublin.

Rev. J. F. Bethune-Baker, M.A., Fellow and Dean of Pembroke College, Cambridge.

Frederick J. Bliss, B.A., Ph.D., late Director of the Palestine Exploration Fund in Jerusalem.

The late Rev. Alexander Balmain Bruce, M.A., D.D., Professor of Apologetics and New Testament Exegesis in the Free Church College, Glasgow.

Rev. Charles Fox Burney, M.A., Lecturer in Hebrew, and Fellow of St. John Baptist's College, Oxford.

Rev. Winfrid O. Burrows, M.A., Vicar of Holy Trinity, Leeds.

Rev. George G. Cameron, M.A., D.D., Professor of Hebrew in the United Free Church College, Aberdeen.

The late Rev. James S. Candlish, M.A., D.D., Professor of Systematic Theology in the Free Church College, Glasgow.

Rev. William Carslaw, M.A., M.D., of the Lebanon Schools, Beyrout, Syria.

Rev. Arthur Thomas Chapman, M.A., Fellow, Tutor, and Hebrew Lecturer, Emmanuel College, Cambridge.

Rev. Robert Henry Charles, D.D., Professor of Biblical Greek in the University of Dublin.

Rev. Frederic Henry Chase, M.A., D.D., Norrisian Professor of Divinity, President of Queens' College, and Vice-Chancellor of the University of Cambridge.

Col. Claude Reignier Conder, R.E., LL.D., M.R.A.S.

Fred. C. Conybeare, M.A., formerly Fellow of University College, Oxford.

Rev. G. A. Cooke, M.A., The Parsonage, Dalkeith.

Rev. Henry Cowan, M.A., D.D., Professor of Church History in the University of Aberdeen.

W. E. Crum, M.A., of the Egypt Exploration Fund.

Rev. Edward Lewis Curtis, Ph.D., D.D., Professor of Hebrew Language and Literature in the Divinity School of Yale University, New Haven.

The late Rev. Andrew Bruce Davidson, D.D., LL.D., Professor of Hebrew in the New College, Edinburgh.

Rev. T. Witton Davies, B.A., Ph.D., M.R.A.S., Professor of Hebrew and Old Testament Literature in the Baptist College, Bangor, and Lecturer in Semitic Languages in University College, Bangor.

Rev. W. T. Davison, M.A., D.D., Professor of Systematic Theology in the Handsworth Theological College, Birmingham.

Rev. James Denney, M.A., D.D., Professor of Systematic Theology in the United Free Church College, Glasgow.

Rev. Marcus Dods, M.A., D.D., Professor of Exegetical Theology in the New College, Edinburgh.

Rev. Samuel Rolles Driver, D.D., Litt.D., Canon of Christ Church, and Regius Professor of Hebrew in the University of Oxford.

Rev. David Eaton, M.A., D.D., Glasgow.

Rev. William K. Eddy, of the American Mission, Sidon, Syria.

Rev. William Ewing, M.A., Glasgow, formerly of Tiberias, Palestine.

Rev. George Ferries, M.A., D.D., Cluny, Aberdeenshire.

Rev. Alfred Ernest Garvie, M.A., D.D., Professor of Philosophy and Ethics in Hackney College, London.

Rev. G. Buchanan Gray, M.A., D.D., Professor of Hebrew in Mansfield College, Oxford.

Rev. Alexander Grieve, M.A., Ph.D., Forfar.

Francis Llewellyn Griffith, M.A., F.S.A., of the British Museum; Superintendent of the Archæological Survey of the Egypt Exploration Fund.

Rev. George Harford, M.A., Balliol College, Oxford; Vicar of Mossley Hill, Liverpool.

J. Rendel Harris, M.A., Litt.D., Fellow and Librarian of Clare College, and Lecturer in Palæography in the University of Cambridge.

Rev. Arthur Cayley Headlam, M.A., B.D., Principal of King's College, London; formerly Fellow of All Souls College, Oxford.

Fritz Hommel, Ph.D., LL.D., Ord. Professor of Semitic Languages in the University of Munich.

Edward Hull, M.A., LL.D., F.R.S., F.R.G.S., late Director of the Geological Survey of Ireland, and Professor of Geology in the Royal College of Science, Dublin.

Frank Byron Jevons, M.A., Litt.D., Principal of Bishop Hatfield's Hall, Durham.

Rev. Archibald R. S. Kennedy, M.A., D.D., Professor of Hebrew and Semitic Languages in the University of Edinburgh.

Rev. James Houghton Kennedy, M.A., D.D., Assistant Lecturer in the Divinity School of Dublin University.

Eduard König, Ph.D., D.D., Professor of Old Testament Exegesis in the University of Bonn.

Rev. John Laidlaw, M.A., D.D., Professor of Systematic Theology in the New College, Edinburgh.

Rev. Walter Lock, M.A., D.D., Warden of Keble College, and Dean Ireland's Professor of New Testament Exegesis in the University of Oxford.

Alexander Macalister, LL.D., M.D., F.R.S., F.S.A., Fellow of St. John's College, and Professor of Anatomy in the University of Cambridge.

Rev. J. A. M'Clymont, M.A., D.D., Aberdeen.

Rev. George M. Mackie, M.A., D.D., Chaplain to the Church of Scotland at Beyrout, Syria.

The late Rev. John Macpherson, M.A., Edinburgh.

Rev. D. S. Margoliouth, M.A., Fellow of New College, and Laudian Professor of Arabic in the University of Oxford.

Rev. John Turner Marshall, M.A., Principal of the Baptist College, Manchester.

Rev. Alexander Martin, M.A., D.D., Professor of Apologetic Theology in the New College, Edinburgh.

John Massie, M.A., D.D., late Yates Professor of New Testament Exegesis in Mansfield College, Oxford; formerly Scholar of St. John's College, Cambridge.

Joseph Bickersteth Mayor, M.A., Litt.D., Emeritus Professor of King's College, London, and Hon. Fellow of St. John's College, Cambridge.

Rev. Selah Merrill, D.D., LL.D., U.S. Consul at Jerusalem.

Rev. James Millar, M.A., B.D., New Cumnock.

Rev. George Milligan, M.A., B.D., Caputh, Perthshire.

Rev. R. Waddy Moss, Professor of Classics in the Didsbury College, Manchester.

Rev. William Muir, M.A., B.D., B.L., Blairgowrie.

W. Max Müller, Ph.D., LL.D., Professor of Old Testament Literature in the Reformed Episcopal Church Seminary, Philadelphia.

Rev. J. O. F. Murray, M.A., Vice-Principal of St. Augustine's College, Canterbury; late Fellow of Emmanuel College, Cambridge.

Eberhard Nestle, Ph.D., D.D., Professor at Maulbronn.

Rev. Thomas Nicol, M.A., D.D., Professor of Divinity and Biblical Criticism in the University of Aberdeen.

Rev. James Orr, M.A., D.D., Professor of Apologetics and Theology in the United Free Church College, Glasgow.

Rev. Robert Lawrence Ottley, M.A., successively Student of Christ Church and Fellow of Magdalen College; sometime Principal of the Pusey House, Oxford.

Rev. William P. Paterson, M.A., D.D., Professor of Systematic Theology in the University of Aberdeen.

Rev. James Patrick, M.A., B.D., B.Sc., Examiner for Degrees in Divinity in the University of St. Andrews.

Arthur S. Peake, M.A., Professor in the Primitive Methodist College, Manchester, and Lecturer in Lancashire Independent College; sometime Fellow of Merton and Lecturer in Mansfield College, Oxford.

William Flinders Petrie, D.C.L., Litt.D., LL.D., Ph.D., F.R.S., Professor of Egyptology in University College, London.

T. A. Pinches, Sippar House, London.

Theophilus Goldridge Pinches, LL.D., M.R.A.S., of the Egyptian and Assyrian Department in the British Museum.

Rev. Alfred Plummer, M.A., D.D., late Master of University College, Durham.

Rev. Frank Chamberlin Porter, M.A., Ph.D., D.D., Professor of Biblical Theology in the Divinity School of Yale University, New Haven.

Rev. George Post, M.D., F.L.S., Professor in the American College, Beyrout, Syria.

Ira Maurice Price, M.A., B.D., Ph.D., Professor of Semitic Languages and Literatures in the University of Chicago.

Rev. Cyril Henry Prichard, M.A., late Classical Scholar of Magdalene College, Cambridge, and Lecturer at St. Olave's, Southwark.

The late Rev. GEORGE T. PURVES, D.D., LL.D., Professor of New Testament Literature and Exegesis in Princeton Theological Seminary, New Jersey.

WILLIAM M. RAMSAY, D.C.L., LL.D., Litt.D., Professor of Humanity in the University of Aberdeen, Honorary Fellow of Exeter and Lincoln Colleges, Oxford.

The late Rev. HENRY ROBERT REYNOLDS, D.D., Principal of Cheshunt College, Herts.

Right Rev. ARCHIBALD ROBERTSON, M.A., D.D., LL.D., Bishop of Exeter.

Very Rev. J. ARMITAGE ROBINSON, M.A., Ph.D., D.D., D.Th., Dean of Westminster.

Right Rev. HERBERT EDWARD RYLE, M.A., D.D., Bishop of Winchester.

Rev. STEWART DINGWALL FORDYCE SALMOND, M.A., D.D., F.E.I.S., Principal and Professor of Systematic Theology in the United Free Church College, Aberdeen.

Rev. WILLIAM SANDAY, D.D., LL.D., D.Sc., Lady Margaret Professor of Divinity, and Canon of Christ Church, Oxford.

Rev. ARCHIBALD HENRY SAYCE, M.A., D.D., Fellow of Queen's College, and Professor of Assyriology in the University of Oxford.

Rev. JOHN A. SELBIE, M.A., D.D., Maryculter, Kincardineshire.

Rev. DAVID W. SIMON, M.A., D.D., Principal of the United College, Bradford.

Rev. JOHN SKINNER, M.A., D.D., Professor of Hebrew and Old Testament Exegesis in Westminster College, Cambridge.

Rev. GEORGE ADAM SMITH, M.A., D.D., LL.D., Professor of Hebrew in the United Free Church College, Glasgow.

Rev. VINCENT HENRY STANTON, M.A., D.D., Fellow of Trinity College, and Ely Professor of Divinity in the University of Cambridge.

JOHN F. STENNING, M.A., Fellow and Lecturer in Hebrew and Theology, Wadham College, Oxford.

Rev. GEORGE B. STEVENS, Ph.D., D.D., Professor of Systematic Theology in Yale University.

Rev. ALEXANDER STEWART, M.A., D.D., Principal of St. Mary's College, and Professor of Systematic Theology in the University of St. Andrews.

Rev. JAMES STRACHAN, M.A., St. Fergus.

Very Rev. THOMAS B. STRONG, D.D., Dean of Christ Church, Oxford.

Rev. HENRY BARCLAY SWETE, M.A., D.D., Litt.D., Regius Professor of Divinity, Cambridge.

Rev. JOHN TAYLOR, M.A., D.Lit., Vicar of Winchcombe.

HENRY ST. JOHN THACKERAY, M.A., Examiner in the Board of Education, formerly Divinity Lecturer in Selwyn College, Cambridge.

Rev. G. W. THATCHER, M.A., B.D., Hebrew Tutor and Lecturer on Old Testament History and Literature in Mansfield College, Oxford.

The late Rev. JOSEPH HENRY THAYER, M.A., D.D., Litt.D., Bussey Professor of New Testament Criticism and Interpretation in the Divinity School of Harvard University.

Rev. GEERHARDUS VOS, D.D., Professor of Biblical Theology in Princeton Theological Seminary, New Jersey.

Rev. GEORGE WALKER, M.A., B.D., Aberdeen.

Lieut.-General Sir CHARLES WARREN, G.C.M.G., K.C.B., F.R.S., Royal Engineers.

Rev. ADAM C. WELCH, M.A., B.D., Glasgow.

The late Rev. HENRY ALCOCK WHITE, M.A., Tutor in the University of Durham, and formerly Fellow of New College, Oxford.

Rev. NEWPORT J. D. WHITE, M.A., B.D., Librarian of Archbishop Marsh's Library, and Assistant Lecturer in Divinity and Hebrew in the University of Dublin.

Rev. OWEN C. WHITEHOUSE, M.A., D.D., Principal and Professor of Biblical Exegesis and Theology, Cheshunt College, Herts.

Rev. A. LUKYN WILLIAMS, M.A., Vicar of Guilden Morden, late Tyrwhitt and Crosse Scholar of the University of Cambridge.

Major-General Sir CHARLES WILLIAM WILSON, R.E., K.C.B., K.C.M.G., D.C.L., LL.D., F.R.S.

Rev. FRANCIS HENRY WOODS, M.A., B.D., Vicar of Chalfont St. Peter, and late Fellow and Theological Lecturer of St. John's College, Oxford.

Rev. JOHN WORTABET, M.A., M.D., Beyrout, Syria.

DICTIONARY OF THE BIBLE

FEIGN (Lat. *fingĕre*, to mould, invent; Old Fr. *feindre*, ptcp. *feignant*).—**1.** To devise, invent: Neh 6^{8} 'There are no such things done as thou sayest, but thou feignest them out of thine own heart' (בָּדָא, only here and 1 K 12^{33} EV 'devise'); 2 P 2^{3} 'And through covetousness shall they with feigned words make merchandise of you' (πλαστοῖς λόγοις, only here in NT; Salmond 'made up or craftly constructed speeches'). Cf. Lk 24^{11} Tind. 'their wordes seemed vnto them fayned thinges'; and Knox, *Hist.* p. 177, 'Which reports are all (God knoweth) most vain, fained, and untrue.' **2.** To put on an appearance, pretend: 1 K 14^{5} 'she shall feign herself *to be* another *woman*' (מִתְנַכֵּרָה); so 14^{6}; 1 S 21^{13} 'he changed his behaviour before them, and feigned himself mad in their hands' (וַיִּתְהֹלֵל); 2 S 14^{2} 'feign thyself to be a mourner' (הִתְאַבְּלִי־נָא); Ps 17^{1} 'give ear unto my prayer, *that goeth* not out of feigned lips' (שִׂפְתֵי מִרְמָה, lit. 'lips of guile'). Cf. Knox, *Hist.* 101, 'yet was every head so fully answered, and especially one. . . . To wit, That Paul at the commandment of James, and of the Elders of Jerusalem, passed to the Temple, and fained himself to pay his vow with others'; and Elyot, *The Governour*, ii. 432, 'Unto euery man disclose nat thy harte, leest perauenture he wyl gyue to the a fained thanke, and after reporte rebukefully of the'; Barlowe, *Dialogue*, ed. 1897, p. 48, 'Then beganne he [Luther] stoutly to fortefy his fayned fayth voyde of good workes'; Tindale, *Works*, i. 94, 'For where right faith is, there bringeth she forth good works; if there follow not good works, it is (no doubt) but a dream and an opinion or feigned faith'; also Tind. *Expositions*, 163, 'And for them that would not receive such pardons feigned they purgatory, and for them that received them feigned they pardon, turning binding and loosing, with preaching God's word, unto buying and selling sin for money.'

Feignedly = with pretence, deceitfully: Jer 3^{10} 'Judah hath not turned unto me with her whole heart, but feignedly' (בְּשֶׁקֶר 'in falsehood,' as AVm); 2 Es 8^{28} 'Think not upon those that have walked feignedly before thee' (*false conversati sunt*). So Tindale, *Works*, i. 177, 'the children of the devil, in time of adversity, fly from Christ, whom they followed feignedly.'

J. HASTINGS.

FELIX, Antonius, procurator of Judæa (Ac $23^{25\text{f.}}$–24^{27}) at the time of St. Paul's last visit to Jerusalem and arrest there. The military tribune **Claudius Lysias** sends Paul under escort to Cæsarea, with a letter to Felix reciting, in a light favourable to his own conduct, the circumstances of the arrest. Arrived at Cæsarea, the apostle, after a purely formal interview, is remanded by Felix for trial, and detained in the government house (prætorium), originally a palace of Herod the Great, until the arrival of his accusers. On the fifth day the proceedings begin. The case against the prisoner is opened by an advocate (see TERTULLUS). Evidence is given by the Jews, and, upon a sign from the procurator, Paul makes a speech in defence. Felix, perhaps interested in the matter by his Jewish wife (Ac 24^{22}), then adjourns the trial till the arrival of Lysias, and Paul is again remanded as a prisoner, but under lenient conditions. We hear nothing of any resumption of the trial. But after some days Felix, accompanied by **Drusilla** (and, according to some authorities for the Western text, at her special request), sends for Paul and gives him audience concerning the belief 'in Christ' (or 'Jesus as Christ'). The apostle (taking, as usual, common ground with his hearer) addresses him upon broad moral truths, and the judgment (looked for by heathens as well as Jews) after death. Felix becomes alarmed, and sends him away till a future occasion. He sends for him ('secretly,' Gig.) 'somewhat often' for further conversation, excited mainly by the hope of a bribe (cf. Ramsay, *St. Paul the Trav.* p. 310 ff.). Two years after St. Paul's arrest Felix is recalled, and, to ingratiate himself with the Jews (or, according to some Western sources, for the sake of Drusilla), leaves Paul a prisoner.

The dubious light in which the character of Felix appears in the NT narrative is bright compared with that shed upon it by the other histories of the time. Felix was the (apparently) younger brother of Pallas, the well-known and all-powerful favourite of Claudius. That Antonius, not Claudius, was the *nomen* borne by Felix (Tac. *Hist.* v. 9; the nomen Claudius for Felix is based on a probably corrupt reading in Suidas, *s.v.*) suggests that Felix was a freedman of Antonia, mother of Claudius (so also probably Pallas; see Jos. *Ant.* XVIII. vi. 6; cf. Schürer, *HJP* I. ii. 175). The brothers claimed descent, as Tacitus ironically mentions, from ancient kings of Arcadia (*Ann.* xii. 53).

We first hear of Felix in connexion with the disorders in Samaria under his predecessor Ventidius Cumanus. The latter refusing to punish the Samaritans for the murder of some Galilæan pilgrims, the Zealots massacred many Samaritans, and were in turn massacred by Cumanus. Both sides appealed to Ummidius Quadratus, legate of

Syria, who intervened with great severity and sent Cumanus to Rome (Jos. *BJ* II. xii. 3 ff.; *Ant.* XX. vi. 1–3). According to Josephus, Felix was now, at the request of the high priest Jonathan, who had been sent to Rome with Cumanus, sent as successor to the latter; and Jos. proceeds to relate how, upon completing his twelfth year (Jan. 24, A.D. 53), Claudius gave certain territories to Agrippa. Coupled with the fact that Tacitus places the deposition of Cumanus in the year 52, this fairly fixes Felix' appointment to the latter year. A difficulty arises, however, from the fact that Tacitus, in his account (*Ann.* xii. 54) of what led to the deposition of Cumanus, speaks of Felix as '*iam pridem* Iudaeae impositus . . . ut [Cumano] Galilaeorum natio, Felici Samaritae parerent.' It has been attempted to combine the latter statement with the 'many years' of Ac 24^{10} by the hypothesis that before his appointment as procurator Felix had held some subordinate appointment in Samaria. But Josephus clearly intimates that Felix was first appointed to the province on this occasion; and on the whole, in spite of the authority of Mommsen and the arguments of Blass (*Act. Apost.* p. 21), we join Schürer in following Josephus here, as likely to be the better informed.

Felix received from his patron the (for a freedman) unprecedented honour of military command as well as civil jurisdiction ('cohortibus et alis prouinciaeque' . . . Suet. *Claud.* 28). His character as governor was that of a man raised from a low origin to unfitting eminence—'per omnem saeuitiam et libidinem ius regium seruili ingenio exercuit' (Tac. *Hist.* v. 9). The general results of his rule are aptly summed up by the same writer, 'intempestiuis remediis delicta accendebat' (*Ann.* xii. 54, and see TERTULLUS). His ferocity against the 'Zealots' and their supposed partisans gave birth, or new strength, to the Sicarii,—a more numerous and extreme class of fanatics,—who were in turn used by fanatical rebels (cf. Ac 21^{38}) until half the nation was in the wildest disaffection. St. Paul probably came into contact with Felix as stated above from two to four years after the accession of Nero (54), by whom Felix must have been confirmed in office. The πολλὰ ἔτη of Ac 24^{10} are hardly, therefore (as Harnack, *Chron.* 253, contends), compatible with a date earlier than the last named. During the last two years of Felix' tenure of office, and therefore during Paul's imprisonment at Cæsarea, fall the serious riots between the Jewish and Syrian inhabitants of the latter town about ἰσοπολιτεία. Felix, whose customary methods had failed to quell the disturbances, sent the heads of both parties to Rome for the emperor to decide the case. But before any final decision Felix was recalled. The violence with which he had interfered in this matter partly explains his anxiety to do the Jews a parting favour (Ac 24^{27}; see Jos *BJ* II. xiii. 7; *Ant.* XX. viii. 7). The Jews, however (Jos. *Ant.* XX. viii. 9), lodged an indictment against him, which failed only through the influence of Pallas. Of Felix' later history nothing is known (see Schürer, *HJP* I. ii. 174 ff., and the authorities cited by him. For the chronological questions involved, see FESTUS, and art. CHRONOLOGY OF NT, p. 417 f.). A. ROBERTSON.

FELLOW (from *fé*=property, money, and *lag* to lay; hence 'one who lays down money in a joint undertaking with others'). In AV two easily separated meanings are found.

1. *Partner, companion.* The Heb words are (*a*) רֵעַ *rêa'*, Ex 2^{13}, Jg 7$^{13.\ 14.\ 22}$, 1 S 14^{20}, 2 S 2$^{16\,bis}$, Is 34^{14}, Jon 1^{7}, Zec 3^{8}; RV adds 1 K 20^{35} for AV 'neighbour,' as the word is generally tr^{d} elsewhere in AV and RV. Once the fem. of this word (רֵעָה* *rê'âh*) is tr^{d} 'fellow,' Jg 11^{37}, though in the next verse it is 'companion' as in Ps 45^{14}, its only remaining occurrence. RV has 'companion' in all three places. (*b*) חָבֵר *ḥâbhêr*, Ps 45^{7}, Ec 4^{10}, Is 44^{11}, Ezk 37^{19}; RV in Ezk 'companion,' as the word is elsewhere tr^{d} in AV and RV, except Jg 20^{11} (כְּאִישׁ אֶחָד חֲבֵרִים, EV 'knit together as one man'); and Aram. forms חֲבַר *ḥăbhar*, Dn 2$^{13.\ 18}$ (in v.^{17} 'companion' as RV in all), and חַבְרָה *ḥabhrâh*, Dn 7^{20}. (*c*) עֲמִית *'âmîth*, Zec 13^{7} (גֶּבֶר עֲמִיתִי, EV 'the man that is my fellow'). The word is in form abstract, hence lit. 'the man of my fellowship'; but elsewhere it occurs only in Lv and in the concrete sense of 'neighbour.'

The Gr. words are (*a*) ἡ πλησίον, only once and fem., Bar 6^{43} 'she reproacheth her fellow' (cf. Jg 11^{37} above, where, however, the LXX is συνεταιρίς). The commonest word for 'neighbour' in NT is ὁ πλησίον. (*b*) ἑταῖρος, Mt 11^{16}. (*c*) μέτοχος, He 1^{9}, a quotation from Ps 45^{7}, where LXX has μ. (*d*) οἱ περί, Three ^{26}.

This meaning of 'fellow' may be illustrated by the foll. paragraph from T. Adams, *II Peter* (Sherman's ed. p. 42):—'As fellows, in due measure, with God himself: "Truly our fellowship is with the Father, and with his Son Jesus Christ," 1 Jn 1^{3}. We may have a society with man, this is requisite, for we are all of one mould; but to God, what, all fellows? Yes, we have a fellowship with God; such is his mercy, not our merits. The proud gallant scorns the poor mechanic: What, are you my fellow? Yet, *mors sceptra ligonibus æquat*, Death takes away difference between king and beggar, tumbles both the knight and the pawn into one bag. Well, let the world despise us, it is enough the Lord doth not disdain our fellowship.' Again (on p. 43) Adams says, 'Thus we partake of the Divine nature (with all reverence be it spoken) as fellows. But, not to deny the King his supremacy, we are fellows with Christ in his joy, reserving the throne to himself.' Cf. also Ac 4^{23} Wyc. (1388), 'thei camen to her *felowis*, and telden to hem, hou grete thingis the princis of preestis and the eldre men hadden seid to hem'; He 10^{33} Wyc. (1388), 'ye weren maad felowis of men lyuynge so.' Shaks. *Tempest*, III. i. 84—

'To be your fellow
You may deny me; but I'll be your servant.'

2. *Person*, first without and then with contempt; for the word has a history. Melvill (*Diary*, Wod. p. 78), can say of John Dury, 'He was a verie guid fallow, and tuk delyt, as his speciall comfort, to haiff his table and houss filled with the best men,' and thereby express reverence for him. But Adams (*II Peter*, p. 43) says, 'There is a generation of men that lavish their estates,—as we say, fling the house out at the windows,—that call themselves good fellows,' where the meaning is still 'companion,' but the glory is departing. The word was used to express easy familiarity, then by a superior in condescension to an inferior, and finally as the utterance of contempt. In Gn 39^{2} Tindale has, 'And the LORDE was with Ioseph, and he was a luckie fellowe,' where 'fellow' is simply 'man'; nor is contempt expressed in Mk 4^{41} 'what felowe is this? For booth winde and see obey him' (=Lk 8^{25}); and even in Mk 2^{7} 'how doeth this felowe so blaspheme?' (οὗτος), or Jn 6^{52} 'How can this felowe geve us his flesshe to eate?' (οὗτος) the sense is probably no more than 'this man,' or at least than we should express by 'this person.'

The Heb. words so translated in AV are (*a*) אִישׁ *'îsh*, 1 S 29^{4} 'Make this fellow return' (RV 'the man'); in plu. 'fellows,' Jg 18^{25} (אֲנָשִׁים מָרֵי נֶפֶשׁ, lit. 'men, bitter of soul,' as RVm; Moore, 'men of acrid temper'). RV adds Jg 9^{4} (AV 'persons') 11^{3} (AV 'men'). In these places neither the Heb. nor probably the Eng. means more than 'person.' And even when 'this fellow' is the tr^{n} of (*b*) זֶה *zeh*, 'this' (1 S 21$^{15\,bis}$ 25^{21}, 1 K 22^{27}=2 Ch 18^{26}, 2 K 9^{11}; to which RV adds 1 S 29^{4}), there is at least less contempt expressed than the words now carry. The Greek words correspond to the Hebrew. (*a*) ἀνήρ, 1 Mac 10^{61} 'certain pestilent fellows' (ἄνδρες λοιμοί); Ac 17^{5} 'took unto them certain lewd fellows' (τινὰς ἄνδρας πονηρούς). (*b*) οὗτος, Sir 13^{23},

---

* For the reading see Moore, *in loc.*

1 Mac 4[5], Mt 12[24] 26[61. 71], Lk 22[59] 23[2], Jn 9[29], Ac 18[13]. RV prefers 'man' except in Sir, where 'fellow' is simply omitted. (*c*) *ὁ τοιοῦτος*, Ac 22[22].

Perhaps the strongest expression of contempt is given when 'fellow' is added to an adj. The examples are (*a*) רֵקִים *rêḳîm*, 2 S 6[20] 'vain fellows'; (*b*) *τολμηρός*, Sir 8[15] 'bold fellow'; and (*c*) *λοιμός*, Ac 24[5] 'pestilent fellow' (cf. *ἄνδρες λοιμοί*, 'pestilent fellows,' 1 Mac 10[61] above).

The Amer. RV prefers '*base* fellow' to AV 'son (man) of Belial,' and '*base* fellows' to sons (men, children) of Belial.' See BELIAL.

In composition 'fellow' always means partner or companion. The foll. compounds occur in AV: (1) **Fellowcitizen** (*συνπολίτης*), Eph 2[19], RV adds He 8[11], reading *ὁ πολίτης* with edd. for *ὁ πλησίον* of TR which gave AV 'neighbour.' (2) **Fellowdisciple** (*συνμαθητής*), Jn 11[16]. (3) **Fellowheir** (*συνκληρονομός*), Eph 3[6]. (4) **Fellowhelper** (*συνεργός*, see 'fellow-worker'), 2 Co 8[23], 3 Jn [8]. (5) **Fellowlabourer** (*συνεργός*, see 'fellow-worker), Ph 4[3], 1 Th 3[2], Philem [1. 24]. (6) **Fellowprisoner** (*συναιχμάλωτος*), Ro 16[7], Col 4[10], Philem [23]. (7) **Fellowservant** (*σύνδουλος*), Mt 18[28. 29. 31. 33] 24[49], Col 1[7] 4[7] (= 'fellow-worker' in Col), Rev 6[11] 19[10] 22[9]. (8) **Fellowsoldier** (TR *συστρατιώτης*, edd. *συνστ.*), Ph 2[25], Philem [2]. (9) **Fellow worker** (so 1611, *συνεργός*), Col 4[11]. RV adds 'fellow-worker,' Ro 16[3. 9] (AV 'helper'), 1 Co 3[9] 'we are God's fellow-workers' (AV 'labourers together with God'), 2 Co 8[23] (AV 'fellowhelper'), Ph 2[25] (AV 'companion in labour') 4[3], Philem [1. 24] (AV 'fellowlabourer'), 3 Jn [8] (AV 'fellowhelper'). (10) **Workfellow** (*συνεργός*), Ro 16[21]. (11) **Yokefellow** (TR *σύζυγος*, edd. *σύνζυγος*), Ph 4[3]. To those RV adds (12) **Fellow-elder** (*συμπρεσβύτερος*, T. WH, *συνπρ.*), 1 P 5[1] (AV 'also an elder'). (13) **Fellow-member of the body** (TR, *σύσσωμος*, edd. *σύνσωμος*), Eph 3[6] (AV 'of the same body'). (14) **Fellow-partaker** (*συμμέτοχος*, T. WH, *συνμ.*), Eph 3[6] (AV 'partaker').

For **Fellowship**, see COMMUNION.

J. HASTINGS.

FENCE.—This Eng. word is not used in NT. In AV of OT it translates various Hebrew words. In the case of three of these, the tr. is a mistake, and is changed in RV (Is 5[2], 2 S 23[7], Job 10[11]). The words from the stems *ẓûr* and *bâẓar*, צוּר and בָּצַר, denote fortifications or fortified places (*e.g.* 2 Ch 8[5] 11[23], Dt 3[5] etc.) Those from the stem *gâdar*, גָּדַר, denote a stone wall (Ps 62[3], Job 19[8]). RV tr. the words of this stem by 'fence' in many places where we find 'wall' or 'hedge' in AV. A fence is properly that which fends or defends. The fence described in the Heb. words of this group is ordinarily the enclosure defending a field or vineyard or sheepfold. See HEDGE.

W. J. BEECHER.

FENCED CITIES (עָרֵי מִבְצָר, properly 'cut off' from outside, and hence inaccessible; RV generally substitutes 'fortified' for 'fenced').—Collections of houses in ancient times may be classed under three heads: (1) Cities, walled or fenced. (2) Unwalled towns and villages, with towers for resort of villagers in times of danger. (3) Unwalled towns and villages.

The number or size of the houses did not affect the question. A city might be of very small extent. Gn 19[20] 'Behold now, this city is near to flee unto, and it is a little one: Oh! let me escape thither (is it not a little one?) and my soul shall live.' On the other hand, the suburbs of a city might become so extensive that it became equivalent to a town without walls. Zec 2[4] 'Jerusalem shall be inhabited as villages without walls, for the multitude of men and cattle therein.'

Towns and villages that were without walls were a prey to any hostile foraging party, and were considered of no account. Lv 25[29. 31] 'If a man sell a dwelling-house in a walled city, then he may redeem it. . . . But the houses of the villages, which have no wall round about them, shall be reckoned with the fields of the country.' As a village or town prospered and more solid houses were built, they would for purposes of defence be joined together, and the town would thus become a walled city. Towns and villages appear to have been dependent upon fenced cities both for administrative purposes and for protection of the inhabitants. Jos 15[47] 'Ashdod with her towns and her villages; Gaza with her towns and her villages.' As an indication of absolute security, a land of safety is pictured as 'a land of unwalled villages . . . dwelling without walls, and having neither bars nor gates' (Ezk 38[11]). The suburbs of the cities were occupied by cattle (Jos 14[4] 21[2]). The villages, however, were not wholly without protection. The Israelites could not drive out the inhabitants of the valley or low country because they had chariots of iron (Jg 1[19], Jos 17[16]). Both at Jericho and Damascus houses were built on the city walls (Jos 2[15], 2 Co 11[33]).

Sufficient still exists of the remains of the ancient cities of Palestine, together with the historical accounts, to give us a clear idea of the positions and the general configuration of their walls. They were built in commanding positions both in the hill-country and the plains, and on the seashore they were generally on promontories. In many cases most inaccessible positions were taken advantage of, so that the battering-ram might be of no avail. Dt 1[28] 'The cities are great, and fenced up to heaven.' Cisterns were cut in the rock for the supply of rain-water, so as to be independent of water from without (2 Ch 26[10], Neh 9[25], Jos. *BJ* V. iv. 3, VII. viii. 3).

There are many remains of ancient cities still exposed to view in various parts of Palestine, inhabited by nomadic tribes, where the system of defence can yet be observed: as an example, Masada, built by Jonathan Maccabæus, and strengthened by Herod the Great, may be mentioned. None of the remains, however, can be accurately ascribed to the time of Joshua, though the sites may not have changed, and it is doubtful whether at that early date the walls of fenced cities were of the same solid type as that which necessarily obtained when the battering-ram came into use. Some of the fenced cities mentioned in the Book of Joshua were taken by stratagem, but others were taken by assault by a nation which did not possess the mechanical contrivances required for the capture of cities with strong walls. From what remains of the ruins of Jericho (assumed to be near 'Ain es-Sultân), it may be inferred that these walls were built from the earliest date of sun-burnt bricks; and from the knowledge we now possess of the walls about Jerusalem, it may be considered that at the time of the capture of the city by Joab the walls were built of small stones.

The stones of the ancient towers and walls of Jerusalem still existing are of considerable size, some of those in the wall of the temple enclosure weighing nearly 90 tons. At Baalbek the great temple stands on a massive wall, with courses of stone averaging 3 ft. 9 in. in height. Thirty feet in advance of this, N., S., and W., is a protecting wall, 10 ft. thick, of monoliths weighing 600 to 800 tons each, three of them being estimated to weigh over 1000 tons each.

The bulwarks of the fenced cities of Palestine, so far back as the time of the Jewish kings, appear to have consisted of a solid masonry wall of cut stone, with parapets and battlements, and with towers at intervals from which the foot of the wall could be seen (2 Ch 32[5], Jer 31[38]). In the walls were watchmen (2 K 9^{17}, 2 S 18^{26}, Is 62^{6}). Within the city was usually a citadel or acropolis (Jg 9^{51}), and without were walls, outworks, and towers (2 Ch 14^{7} 'Let us build these cities, and make about them walls and towers, gates and bars'; 2 S 20^{15}, Is 26^{1}, Nah 3^{8}, 2 Ch 26^{6}).

The protracted resistance offered by many of the fenced cities of Palestine may have been due as much to the strength of their position as to their walls; Samaria resisted the king of Assyria for three years, and Jerusalem successfully resisted the power of Rome, and only fell before Titus owing to the internal dissensions of the Jewish leaders.

The whole subject connected with the attack and defence of cities and fortified places is treated of under WAR, and special cases for reference will be found under JERUSALEM, SAMARIA, JERICHO, GATH, GAZA, and other strongholds of Philistia. See also GATE. C. WARREN.

FERRET (אֲנָקָה *'ănâḳah*, Lv 11^{30} AV).—The ferret is not found in Palestine or Syria, and cannot be the animal intended. It is probably, as in RV, the gecko. See GECKO. G. E. POST.

FERVENCY, FERVENT.—Fervency is found only in Jth 4^{9} 'every man of Israel cried to God with great fervency' (*ἐκτένεια* [B -*ία*], which in the same verse is tr^{d} 'vehemency,' as it is tr^{d} in 2 Mac 14^{38}; RV always 'earnestness.' The Gr. word occurs also 3 Mac 6^{41}, and in NT Ac 26^{7} *ἐν ἐκτενείᾳ*, AV 'instantly,' RV 'earnestly'). Knox (*Hist.* 132) says that after the martyrdom of Walter Mill 'began a new fervency among the whole people'; and *Works* (ed. Laing, iii. 289), 'Peter, in a fervencie, firste left his bote, and yet after feared.' The adj. *fervent* is twice applied literally in the sense of 'intense,' 2 P 3^{10} 'the elements shall melt with fervent heat' (*καυσούμενα λυθήσεται*), and 3^{12} (*καυσούμενα τήκεται*). 'With fervent heat' (lit. 'being burned up') is the Bishops' tr^{n}, and is retained in RV; most of the other VSS have simply 'shall melt with heat.' Cf. Elyot, *The Governour*, ii. 322, 'beynge sore chaufed with fervent heate and the lengthe of his iournay'; and Dt 28^{22} Gen. 'The Lord shall smite thee with a consumption, and with the feauer, and with a burning ague, and with feruent heat.' The word is also applied to cold, as R. Fox, *Chron.* 116, 'Hit was a fervent coolde weder'; Stewart, *Cron. Scot.* ii. 337, 'The fervent frost so bitter wes.' J. HASTINGS.

FESTIVAL.—See FEASTS AND FASTS.

FESTUS, Porcius, succeeded Felix as procurator of Judæa. On his arrival he visited Jerusalem, whither the priests endeavoured unsuccessfully to induce him to send for Paul. His reply (Ac 25^{16}), that to hand over a man unheard was 'not customary with Romans' (whatever it might be for Jews), has a touch of disdainful dignity. Endeavouring to induce Paul to consent to a trial at Jerusalem, he provokes and allows the appeal to Cæsar. Then follows the hearing before Festus and Agrippa, the latter of whom is there as an expert assessor. The attitude of Festus is throughout (25^{19} $26^{24.\ 31}$) one of official impartiality, touched with good-natured indifference to the technicalities of Jewish controversies.

The gens Porcia is not otherwise known to have comprised a family of Festi, nor is this Festus known to us apart from the NT and Josephus. According to the latter, the first important event of Festus' governorship was the decision of the emperor in favour of the Syrians at Cæsarea (FELIX, *sub fin.*). This was effected by Beryllus (so all MSS in Jos. *Ant.* XX. viii. 9; *vulgo* 'Burrus'), Greek secretary to the emperor, whom the Syrians had won by corruption. This decision provoked the Jews to riots, in which Josephus sees the first simmerings of the war of 66. This point must not be forgotten when we come to the question of dates. The other principal occurrences of Festus' tenure of office mentioned by Josephus were, *firstly*, the putting down of the Sicarii, and especially of one dangerous rebel, similar to the one of Ac 21^{38} (*Ant.* XX. viii. 10; cf. *BJ* II. xiv. 1); *secondly*, the disturbances at Jerusalem in consequence of the wall erected at the temple to intercept the view from the new wing of Agrippa's palace. Festus took the side of Agrippa, but allowed the priests to appeal to Rome. Before the result of this appeal was known Festus died.

The important question connected with the name of Festus is that of chronology (see art. CHRONOLOGY of NT, p. 417 ff.). According to Eusebius and Jerome (Eus. *Chron.*, Schöne ii. 148 f.; Hier. *de vir. illustr.*), Felix became procurator in the eleventh year of Claudius (51), Festus in the second year of Nero (56), Albinus succeeded Festus in the sixth or seventh year of Nero (60 or 61), and the Acts bring us (so Euthal. *Praef. in epp. Pauli*) to the fourth year of Nero (58). There has been a tendency lately, *e.g.* on the part of Blass and Harnack, to revert to this chronology. But apart from the fact that had Festus governed Judæa for four or five years, Josephus would surely have had more to tell us in connexion with his procuratorship, the authority of Eusebius in this matter is more than precarious. Eusebius, doubtless, made use of Julius Africanus, who in turn used Justus of Tiberias, who stated the death-year of Agrippa II. But that Justus stated the years of the procuratorships there is not a word of evidence to prove. Eusebius may be as far from the truth here as when he places the outbreak of the Neronian persecution in 67–68. At the same time the question is worth reconsidering, and the recent discussion of Harnack (*Chronol. d. altchr. Lit.* p. 233 ff.) deserves more minute discussion than the limits of this article allow. The chronology of Eusebius has the merit, be it what it may, of fitting in with Clemen's date for St. Paul's arrest, namely, A.D. 54 (1 CORINTHIANS, § 6). But that the rule of Festus was a short one, everything goes to prove; and, as we saw above, the disturbances which then began were viewed by Josephus as the first mutterings of the great storm of the year 66. But it would help us much if we could fix the date of the arrival of Albinus, which was separated by only a few stormy months from the death of Festus. Unfortunately, we have only the *terminus ad quem* firmly fixed, namely, the summer of 62 (Schürer, *HJP* I. ii. 183, note 47). That his successor Gessius Florus was procurator only from 64–66 may be taken as proved (*ib.* note 58). But we have only inferential evidence, though it amounts to high probability, that the rule of Albinus was short. Perhaps the date furnished by ARETAS, with which Harnack fails to deal satisfactorily, coupled with the general data of St. Paul's life (1 CORINTHIANS, § 6, small print), may suffice to make us pause before putting the arrival of Festus anything like as early as 56. On the other hand, as Albinus cannot have arrived later than 62, and the events of Festus' procuratorship, together with those which follow his death and precede the arrival of Albinus, though insufficient to fill five years, are yet too many for one year, it is hardly possible to place the arrival of Festus later than 60. The system adopted *s.v.* CHRONOLOGY may be right in going back two years further (60 to 58). On the whole this variation may be taken, upon a full review of all our materials, as the most probable limit of doubt as regards this important date. It may be remarked that if Festus arrived in 60, the διετία ὅλη of Ac 28^{30} ends about February 63; between this and the Neronian persecution of midsummer 64, to which Harnack would again bring back St. Paul's death, there is sufficient though hardly ample time for the events presupposed in the Epp. to Timothy and Titus (see Schürer, as quoted above, esp. note 38; Harnack, as quoted above; Blass, *Acta Apost. Ed. Philol.* p. 23, and the authorities for CHRONOLOGY OF NT).

A. ROBERTSON.

FETCH.—To fetch is to *cause to come*, as Fuller, *Holy Warre*, 230, 'If they should say the Templars were burned wrongfully, they may be fetched over the coals themselves for charging his Holinesse so deeply'; and this meaning is easily seen in most of its phrases.

1. *Fetch up*, 1 S 6^{21} 7^{1}. So Shaks. *Ant. and Cleop.* IV. xv. 35—

> 'Had I great Juno's power,
> The strong-wing'd Mercury should fetch thee up,
> And set thee by Jove's side.'

2. *Fetch again*, *i.e.* cause to come back (see AGAIN): 1 Es 4^{34} 'Swift is the sun in his course, for he compasseth the heavens round about, and fetcheth his course again to his own place in one day' (πάλιν ἀποτρέχει). Cf. Bunyan, *Holy Citie*, 252, 'Revivings that (like Aquavitæ) do fetch again, and chear up the soul'; and Tindale, *Expositions*, 165, 'He will return again unto his mercy, and fetch his power home again, which he lent to vex thee.' 3. *Fetch about*: 2 S 14^{20} 'To fetch about this form of speech hath thy servant Joab done this thing' (לְבַעֲבוּר סַבֵּב אֶת־פְּנֵי הַדָּבָר, lit. 'for the purpose of bringing round the face of the business,' or as RV 'to change the face of the matter'). See ABOUT, and cf. Shaks. *K. John*, IV. ii. 24—

> 'Like a shifted wind unto a sail,
> It makes the course of thoughts to fetch about.'

Bacon, *Essays*, 'Of Cunning' (Gold. Treas. ed. p. 95, l. 5), 'It is strange, how long some men will lie in wait, to speake somewhat they desire to say: and how farre about they will fetch; and how many other Matters they will beat over to come near it.' 4. *Fetch a compass*, *i.e.* 'make a circuit,' instead of going in a straight line. Thus Fuller, *Pisgah Sight*, IV. ii. 43, 'Wicked men may for a time retard, not finally obstruct our access to happiness. It is but fetching a compass, making two steps for one; a little more pains and patience will do the deed.' The Heb. is simply the verb סָבַב *ṣâbhabh*, which means to make a turning or a circuit. RV gives 'turn about' in Nu 34^{5}, Jos 15^{3}, and 'make a circuit' in 2 S 5^{23}, 2 K 3^{9}. The Gr. is περιέρχομαι, go round about, Ac 28^{13} (RV 'make a circuit').* In 'fetch a compass' as in 'fetch about' the idea of the circuitous route is not in the verb, but in its complement.† See COMPASS. Similar phrases are found, as T. Adams, *II Peter*, 54, 'Merchants would give much to know a short cut to those remote places of traffic, without passing straits or fetching bouts'; Fuller, *Holy Warre*, p. 29, 'As if sensible of his sad fate, and desirous to deferre what he cannot avoid, he [the Jordan] fetcheth many turnings and windings, but all will not excuse him from falling into the Dead sea.' 5. *Fetch a stroke*, Dt 19^{5} 'his hand fetcheth a stroke with the axe.' So Fuller, *Holy Warre*, 219, 'Being about to fetch another stroke, the Prince with his foot gaue him such a blow that he felled him to the ground'; and Bunyan, *Holy War* (Clar. Press ed. p. 47, l. 20), 'If I fetch my blow, *Mansoul*, down you go.' 6. *Fetch one's breath*, Sir 31^{19} 'he fetcheth not his wind short upon his bed' (οὐκ ἀσθμαίνει, RV 'he doth not breathe hard'). Cf. Shaks. 1 *Henry IV.* II. iv. 579, 'Hark, how hard he fetches breath. Search his pockets'; and *Troilus*, III. ii. 23, 'She does so blush, and fetches her wind so short, as if she were frayed with a sprite: I'll fetch her. It is the prettiest villain: she fetches her breath so short as a new-ta'en sparrow.'

In Old English there were two distinct verbs, *fet* and *fetch.* Fet seems to have been the older of the two. Indeed, Bradley (*Oxf. Eng. Dict. s.v.* 'Fetch') believes that Platt and Sievers are right in deriving fetch from fet by a singular series of changes. The *i* of the oldest form *feti-an* became a consonantal *y*, then this *ty* being sounded as *cc* became written so, and *cc* easily passed into the spelling *ch*. Cf. *ort-yeard*, in Old Eng. *orceard*, now *orchard.*

Fet and Fetch were synonymous in meaning, as we may see from Tindale, whose trn (1534) of Mt $24^{17.18}$ is, 'And let him which is on the housse toppe not come downe to fet (ἆραι) eny thinge out of his housse. Nether let him which is in the felde returne backe to fetche (ἆραι) his clothes.' Fet gradually gave way to fetch. In the Geneva version of 1560 it is found in the imperat., 1 S 20^{31} 'wherefore now send and fet him vnto me, for he shal surely dye,' and in the indic., Dt 19^{12} 'Then the Elders of his citie shal send and fet him thence.' And even in AV of 1611 the infin. is once employed, Jer 36^{21} 'So the king sent Iehudi to fet the roule.' But after the Old Eng. period the word was used chiefly in the past tense and past ptcp., as an alternative with 'fetcht' or 'fetched,' and that is its use elsewhere in AV.

In the 1611 ed. of AV 'fet' occurs 9 times (2 S 9^{5} 11^{27}, 1 K 7^{13} 9^{28}, 2 K 11^{4}, 2 Ch 12^{11}, Jer 26^{23} 36^{21}, Ac 28^{13}); 'fetcht' 5 times (Gn 18^{7}, 1 S 7^{1}, 2 S 14^{2}, 2 K 3^{9}, 2 Ch 1^{17}); and 'fetched' 6 times (Gn 18^{4} 27^{14}, Jos 15^{3}, Jg 18^{18}, 1 S 10^{22}, 2 S 4^{6}). In course of time, chiefly through the influence of Dr. Paris (1762) and Dr. Blayney (1769), 'fet' was banished from AV. In his *Camb. Paragraph Bible* of 1873, Scrivener restored it to all its original places, and Scrivener's text is used in the *Camb. Bible for Schools and Colleges*. But the Camb. and Oxf. Parallel Bibles do not use it once. They use even 'fetcht' only once, Gn 18^{7}; elsewhere always 'fetched.'

J. HASTINGS.

FETTER.—Three Heb. words are translated fetter. 1. נְחֹשֶׁת, Arab. *naḥâs*, copper. In La 3^{7} this word is rendered chain, in Jer 39^{7} 52^{11} (RV) fetters, also in Jg 16^{21}, 2 S 3^{34}, 2 K 25^{7}, 2 Ch 33^{11} 36^{6}. In the Arab. tr. by Van Dyck, נְחֻשְׁתַּיִם is rendered *silâsil naḥâs*, copper chains, or *silsilatain min naḥâs*, two chains of copper. It is still the custom in Syria to attach a chain to each of the rings put round a prisoner's ankles, the middle of the chain being fastened to his girdle. A prisoner is thus, according to the Arabic way of speaking, bound with two chains. 2. כֶּבֶל, Syr. *kĕbēl* (a late word borrowed from Aramaic. The Arab. *kabal* is probably a loan-word from the Aramaic). There are two passages in which this word is used, both referring to fetters of iron, Ps 105^{18} and Ps 149^{8}. 3. זֵק, זִקִּים (Is 45^{14}, Nah 3^{10} fetters of captives, Job 36^{8} fig.). Horses and other animals are usually tethered by ropes fastened to the fore foot and the hind foot on one side.

W. CARSLAW.

FEVER.—See MEDICINE.

FIELD.—See AGRICULTURE.

FIERY SERPENT.—See SERAPHIM and SERPENT.

FIGS (תְּאֵנִים *tĕ'ênîm*, the fruit of the *fig tree*, which is תְּאֵנָה *tĕ'ênâh*; in NT συκῆ is the *fig tree*, and σῦκον the *fig*).—The fig tree, *Ficus Carica*, L., is cultivated everywhere in the Holy Land, and also grows spontaneously in many places. It is a tree of moderate size, seldom attaining a height of 15 ft., but its spreading branches often cover a circle with a diameter of 25 to 30 ft. Fig trees are habitually planted near houses, and the people sit in their shade, and that of the vines which grow over the trellises. This familiar sight did not fail to be noted in OT and Apocr. as an emblem of peace and prosperity (1 K 4^{25}, Mic 4^{4}, Zec 3^{10},

---

* Lightfoot (*Fresh Revision*² 193) says, 'We have heard how the inquiring schoolboy has been perplexed at reading that St. Paul and his companions "fetched a compass" when they set sail from Syracuse (Ac 28^{13}), not being able to reconcile this statement with the date given for the invention of this instrument.'

† Fuller, *Holy Warre*, p. 119, says, 'His navie he sent about by Spain'; then on p. 120, 'behold his navie there safely arriving, which with much difficultie and danger had fetched a compass about Spain.'

1 Mac 14[12]). There are numerous varieties of figs cultivated, some of which bear a tart, blackish fruit, others a sweet, greenish or whitish one. The branches are straggling and naked in winter, but when the rains are nearly or quite over, small green knobs appear at the ends of the twigs. They are the young fruits, פַּג *pag*, 'green figs' (Ca 2[13]). The leaf-bud now expands, and the new pale green leaves soon more or less overshadow the little figs. This is a familiar sign of early summer (Mt 24[32]). Hence a fig tree with leaves must already have young fruits, or it will be barren for the season. The first figs ripen late in May or early in June. They are called in Heb. בִּכּוּרָה *bikkûrâh*, in Arab. *bâkûrah*, that is, *first ripe*, Is 28[4] (AV *hasty fruit*), Jer 24[2], Hos 9[10], Mic 7[1].

When our Lord came to the fig tree near Bethany (Mk 11[13]), just before the passover, *i.e.* from late in March to the middle of April, 'the time of figs was not yet,' that is, the season for ripe figs had not come. Among the various explanations of Christ's action which may be given, the only ones which seem to us worthy of consideration are the following: (1) That being hungry, and seeing from a distance that the tree had leaves, and therefore was not dead, he came, not to find *new figs*, but to find and eat any figs of the last season which might have remained over on the tree. The expression 'if haply he might find anything thereon' implies that he did not expect to find much. One or two figs will often stay an empty stomach marvellously. According to this opinion, the offence of the fig tree was the fact of not having what must have been a very exceptional relic of a former harvest. (2) That, finding leaves, he knew that there should be young fruit, and hoped that there might, even at that early period, be 'the first ripe figs,' *bikkûrâh*. According to this interpretation, the fault of the fig tree was in not having a precocious fig or two before the time, 'for the time of figs was not yet.' We will not dispute the possibility of finding a winter fig or two on a tree (although during a residence of thirty-three years in Syria we have searched and inquired in vain for them), or of the exceptionally early maturing of some variety of figs, perhaps not now cultivated. Neither of these theories, however, accords with our conception of Christ's justice. In neither case would the fig tree be blameworthy. We are not held accountable for *extraordinary* attainments in religion. (3) Christ was at the moment hungry. Orientals do not eat early in the morning. Labourers and artificers come fasting to their work, and often toil an hour or two before eating. So it is presumable that our Saviour, in his morning walk of two miles from Bethany to Jerus., had not broken his fast. The physical sensation of hunger as a basis gave direction to his thoughts, as he happened to see a most familiar spectacle, a fig tree, at a distance, with fresh, young foliage. The fact that it is mentioned that 'the time of figs was not yet' (AV), or 'it was not the season of figs' (RV), would seem to prove that Christ would not have thought it strange had he not found *winter figs* or *precocious first fruits*. It is hardly conceivable that he could have condemned the tree for that. But, when he arrived, he found *no fruit at all*. Immediately the disappointment of unsatisfied hunger was lost in the moral lesson which flashed across his mind. A fig tree with leaves should have at least green fruit. This one had none. There was *pretension*, which, in the moral sphere, is *hypocrisy*. Having leaves and no fruit, it was a *deceiver*. The *ripeness* of the fruit is not the point. If it had had *unripe* fruit, it would not have been condemned. It was condemned because it had *nothing but leaves*.

The failure of the fig and vine was a sign of great distress (Jer 5[17] 8[13], Jl 1[7. 12], Hab 3[17. 18]). Figs were dried and pressed into cakes for food (1 S 25[18]). These were used as poultices (2 K 20[7], Is 38[21]). Fig leaves are thick, palmately lobed, and often a span or more across. There is no good reason to doubt the identity of the leaves which Adam and Eve used to make aprons (Gn 3[7]).

G. E. POST.

FIGURE.—1. Dt 4[16] 'Lest ye corrupt yourselves, and make you a graven image, the similitude of any figure' (סֶמֶל *ṣêmel*, Driver 'statue.' The word is found also 2 Ch 33[7. 15] EV 'idol,' and Ezk 8[3. 5] EV 'image.' The meaning 'statue' is confirmed by the Phœn. inscriptions. See Driver on Dt 4[16] and Davidson on Ezk 8[3]). The Eng. word seems to be used in the obsolete sense of the distinctive shape or appearance of a person or thing. The Gen. version has 'a graven image or representacion of anie figure'; the Bishops', 'a graven image and picture of any maner of figure.' Cf. Chaucer, *Monk's Tale*, 232—

> 'And thanne had god of him [Nebuchadnezzar] compassioun,
> And him restored his regne and his figure'—

i.e. his proper shape as a man. So Shaks. *Hamlet*, I. i. 41—

> 'In the same figure, like the king that's dead.'

2. 1 K 6[29] 'he carved all the walls of the house round about with carved figures of cherubims' (מִקְלָעוֹת *miklā'ôth* occurs only in this ch. and the next: 6[18] EV 'was carved,' *i.e.* 'was carving of'; 6[32] EV 'carvings'; 7[31] EV 'gravings'). These 'carved figures' (as the single Heb. word is here tr[d]) were representations of cherubim cut in relief on the wood of the doors. See CARVING. For this use of the Eng. word, cf. Caxton, *Cato*, A iii. b, 'to adoure the ymages and other fygures humayn'; and Milton, *Lycidas*, 105—

> 'Next Camus, reverend sire, went footing slow,
> His mantle hairy, and his bonnet sedge,
> Inwrought with figures dim.'

3. Is 44[13] 'The carpenter . . . maketh it [the image] after the figure of a man' (תַּבְנִית *tabhnîth*). The Heb. is frequent for the outward appearance of a person or thing. It occurs long with *ṣêmel* (above) in Dt 4[16] and is tr[d] 'likeness.' The Eng. word is used in the same sense as 1 above. Cf. He 1[3] Wyc. 'he is the schynynge of glorie, and figure of his substaunce'; and Mk 16[12] Tind. 'After that, he appered unto two of them in a straunge figure.' 4. Ac 7[43] 'figures which ye made to worship them'; and Ro 5[14] 'who is the figure of him that was to come' (τύπος). Sanday-Headlam's note on the Greek word is as follows—

> τύπος (τύπτω): (1) the 'impression' left by a sharp blow (τὸν τύπον τῶν ἥλων, 'the print of the nails,' Jn 20[25]), in particular the 'stamp' struck by a die; (2) inasmuch as such a stamp bears the figure on the face of the die, 'copy,' 'figure,' or 'representation'; (3) by a common transition from effect to cause, 'mould,' 'pattern, 'exemplar'; (4) hence in the special sense of the word type which we have adopted from the Greek of NT, 'an event or person in history corresponding in certain characteristic features to another event or person.'

In Ac 7[43] the meaning is 'representations' or 'images of gods' (the second meaning above); in Ro 5[14] it is 'type' (the fourth meaning above). 5. He 9[24] 'Christ is not entered into the holy places made with hands, *which are* the figures of the true; but into heaven itself' (ἀντίτυπα τῶν ἀληθινῶν, RV 'like in pattern to the true'); and 1 P 3[21] 'The like figure whereunto *even* baptism doth also now save us' (ὃ καὶ ἡμᾶς ἀντίτυπον νῦν σώζει βάπισμα, RV 'which also after a true likeness doth now save you [reading ὑμᾶς with edd.], *even* baptism,' RVm 'in the antitype'). The antitype (τὸ ἀντίτυπον) is the event or person in history that corresponds with the type (ὁ τύπος)—see Sanday-Headlam above. The one that occurs first in history is the type, the second the antitype. Hence in He 9^{24} heaven is the type, the holy place in the tabernacle the antitype; but in 1 P 3^{21} the water of the deluge is the type, of which baptism is the antitype. See TYPE, and cf. Cartwright, *Cert. Relig.* (1651) i. 222, 'The Rock . . . was a Type and a Figure of Christ.' **6.** He 9^{9} 'a figure for the time then present,' and 11^{19} 'Accounting that God *was* able to raise *him* up, even from the dead; from whence also he received him in a figure' (παραβολή, RV 'parable,' in both). The meaning of 9^{9} is clear, but 11^{19} is much disputed.

There are two favourite interpretations: (1) 'As a parable,' *sc.* of the resurrection. Wyclif ('in to a parable') and the Rhemish ('for a parable') decline to commit themselves.* Tind. in ed. of 1534 translates 'for an ensample,' and is followed by Coverdale; but in 1526 ed. he had boldly 'as an ensample of the resurrection,' and this was adopted by Cranmer, and very nearly by the Bishops ('in a *certaine* similitude *of the resurrection*'). This trⁿ gives a well-recognized sense to παραβολή. The objection felt against it is that Isaac was actually *not* raised from the dead. Hence the favourite interpretation at present is that of AV 'in a figure,' *i.e.* figuratively; Isaac was not really dead, but he was as good as dead, and so figuratively was raised from the dead (see Westcott, *ad loc.*). Cf. Geneva 'in a sort.' The objection is that παραβολή has not elsewhere this meaning.

7. 1 Co 4^{6} 'And these things, brethren, I have in a figure transferred to myself and to Apollos' (μετεσχημάτισα). The Gr. verb trᵈ 'in a figure transferred' elsewhere means to change one's form or appearance (σχῆμα) into some other form, 2 Co $11^{13.\ 14.\ 15}$ (AV 'transform,' RV 'fashion into' or 'fashion as') and Ph 3^{21} (AV 'change,' RV 'fashion anew'). Here it is the truth stated that is to change its application: applied by the apostle to himself and Apollos, it really applies to the Corinthians.† **8.** Sir 49^{9} 'he made mention of the enemies under *the figure of* the rain' (ἐν ὄμβρῳ, RV 'he remembered the enemies in storm,' RVm 'in rain').

RV gives 'figure' for AV 'interpretation' in Pr 1^{6}, but with 'interpretation' in marg. (מְלִיצָה), elsewhere only Hab 2^{6} (EV 'proverb,' RVm 'riddle'); and for AV 'fashion,' Ac 7^{44} τύπος (see FASHION). RV also introduces the verb 'to figure,' not in AV text, Lv 26^{1} ('figured stone' as AVm, Heb. אֶבֶן מַשְׂכִּית, AV 'image of stone'); and Nu 33^{52} ('figured *stones*,' Heb. מַשְׂכִּיּת, AV 'pictures'). See IDOLATRY and STONE. This meaning of the verb (evidently 'adorned with figures or designs') may be illustrated from Shaks. *Rich. II.* III. iii. 150—

> 'I'll give my jewels for a set of beads, . . .
> My figured goblets for a dish of wood.'

J. HASTINGS.

FILL.—As a subst., meaning a full supply, fill is used of *food*, Lv 25^{19}, Dt 23^{24}; of *drink*, 2 Es 1^{20}, Jth 7^{21}; and metaphorically of *love*, Pr 7^{18} 'Come, let us take our fill of love until the morning.' Cf. S. Rutherford, *Letters*, xxxv., 'those who live long, and get a heavy fill of this life'; and Shaks. *Troil. and Cress.* V. viii. 4—

> 'Rest, sword; thou hast thy fill of blood and death.'

The verb to fill is frequently used by Wyclif (and other early writers) in the sense of execute, accomplish, modern *fulfil*. Thus Gn 27^{5} (1388) 'he hadde go in to the feeld to fille the comaundment of the fadir' (1382 'that he fulfille the heest of the fader'); Lk 9^{31} (1380) 'forsothe Moyses and Elye weren seyn in mageste; and thei seyden his goynge out, which he was to fillinge in Jerusalem' (1388 'which he should fulfille'). So once in AV, 2 Es 4^{38} 'when the number of seeds is filled in you' (*impletus fuerit*; RV 'fulfilled').

To 'fill up' is to fill to the full, the prep. *up*, like Gr. κατά, intensifying the verb: as Mt 23^{32} 'Fill ye up then the measure of your fathers' (πληρώσατε);* 1 Th 2^{16} 'to fill up their sins alway' (εἰς τὸ ἀναπληρῶσαι); Col 1^{24} 'Who now rejoice in my sufferings for you, and fill up that which is behind of the afflictions of Christ in my flesh for his body's sake, which is the church' (ἀνταναπληρῶ, RV 'fill up on my part,' which is Lightfoot's tr.)†; Mt 9^{16} 'No man putteth a piece of new cloth unto an old garment, for that which is put in to fill it up taketh from the garment, and the rent is made worse' (τὸ πλήρωμα αὐτοῦ, lit. 'its filling'; RV 'that which should fill it up'); so Mk 2^{21}; Rev 15^{1} 'in them is filled up the wrath of God' (ἐτελέσθη, RV 'is finished'). Cf. Shaks. 1 *Henry IV.* III. ii. 116—

> 'To fill the mouth of deep defiance up
> And shake the peace and safety of our throne.'

J. HASTINGS.

FILLET.—Two words are trᵈ so: (1) חוּט *ḥûṭ*, Jer 52^{21} of that which would 'compass' the pillars which king Solomon had made in the house of the LORD, and which the Chaldæans brake to carry the brass away; AVm 'thread'; RV 'line,' which is the translation in 1 K 7^{15} of both AV and RV. See PILLAR and TEMPLE. The same word is used for the scarlet 'thread' which Rahab placed in her window (Jos 2^{18}), and for the threefold 'cord' which cannot be broken of Ec 4^{12}. (2) [חָשׁוּק] *ḥâshûk*, only found in plu. and with suffixes, Ex $27^{10.\ 11}$ 36^{38} $38^{10.\ 11.\ 12.\ 17.\ 19}$, of that which clasped the pillars in the tabernacle, those of the pillars of the court being overlaid with silver, those of the pillars at the door with gold. See PILLAR and TABERNACLE. The verb חִשֵּׁק *ḥishshaḳ*, to furnish with fillets, is trᵈ 'fillet' where it occurs, Ex 27^{17} 'the pillars . . . shall be filleted with silver,' 38^{18} 'the pillars . . . were filleted with silver,' 38^{28} '[Bezalel] filleted them' (RV 'made fillets for them').

A fillet is a little thread (Lat. *fīlum*, a thread, Fr. *fil*, dim. *filet*). Its oldest and commonest application is to a ribbon for binding the hair. Thus Spenser, *FQ* I. iii. 4—

> 'From her faire head her fillet she undight';

and Fuller, *Holy Warre*, 125, 'They pleaded that the Crown was tied on Guy's head with a woman's fillet.' But it came to be used early, and is still in use, for any narrow strip of binding material.

J. HASTINGS.

FINE.—For the subst. *Fine* see CRIMES AND PUNISHMENTS. The adj. 'fine' is of frequent occurrence, but only in a few cases does it represent a Heb. or Gr. word. These are: (1) טוֹב *ṭôbh*, 2 Ch $3^{5.\ 8}$ 'fine gold,' Ezr 8^{27} 'fine copper,' La 4^{1} 'most fine gold' (in Gn 2^{12} it is trᵈ 'good,' its usual trⁿ, 'the gold of that land is good'). Aram. טָב *ṭâbh*, Dn 2^{32} 'fine gold.' (2) שָׂרִיק *sârîḳ*, Is 19^{9} 'fine flax,' lit. 'combed flax,' as RV. (3) פָּז *pâz*, Ca 5^{11} 'most fine gold,' Ges. 'refined gold.' (4) חֵלֶב

---

* But the Rhem. NT has a marginal note, 'That is, in figure and mysterie of Christ dead, and aliue againe.' This margin probably gave AV the word 'figure.'

† Field (*ON*, *ad loc.*) suggests 'by a fiction' for EV 'in a figure.' In illustration of the Gr. verb he quotes 1 S 28^{8} 'Saul disguised himself' (Sym. μετεσχημάτισεν ἑαυτόν); and 1 K 14^{2} 'Arise, I pray thee, and disguise thyself' (Theod. μετασχημάτισον σεαυτόν).

* Cf. Shaks. *K. John*, II. i. 556—

> 'I trust we shall,
> If not fill up the measure of her will,
> Yet in some measure satisfy her.'

† This is the only occurrence of the particular compound ἀντ-ανα-πληρόω in biblical Greek. Lightfoot gives classical quotations, in order to bring out that the special force of ἀντί is 'from another quarter.' That is what is sought to be expressed by 'on my part.' But T. K. Abbott ('Intern. Crit. Com.' *in loc.*) points out that ἀναπληρόω itself, in the two instances where in NT it is used with ὑστέρημα (1 Co 16^{17}, Ph 2^{30}), expresses a supply coming from a different quarter from the deficiency. He finds the idea of *balance* in the ἀντί, and hopes it is not an over-refinement to suggest that ἀνταναπληρόω is more unassuming than ἀναπληρόω, 'since part of the force of the word is thrown on the idea of correspondence.' Christ's afflictions are incomplete till Paul brings his quota of affliction to add to them. And every Christian must bring his quota of affliction to add to them before they are complete. For the afflictions are not the afflictions of the Redeemer, but of His Body the Church. They are His afflictions just because the Church is His Body.

ḥêlebh, Ps 81^{16} 147^{14} 'the finest of the wheat,' lit. as AVm and RVm 'fat of wheat': the fuller phrase 'kidney-fat of wheat' is found in Dt 32^{14}. (5) *καθαρός*, Jth 10^{5} 'fine bread' (RVm 'pure').

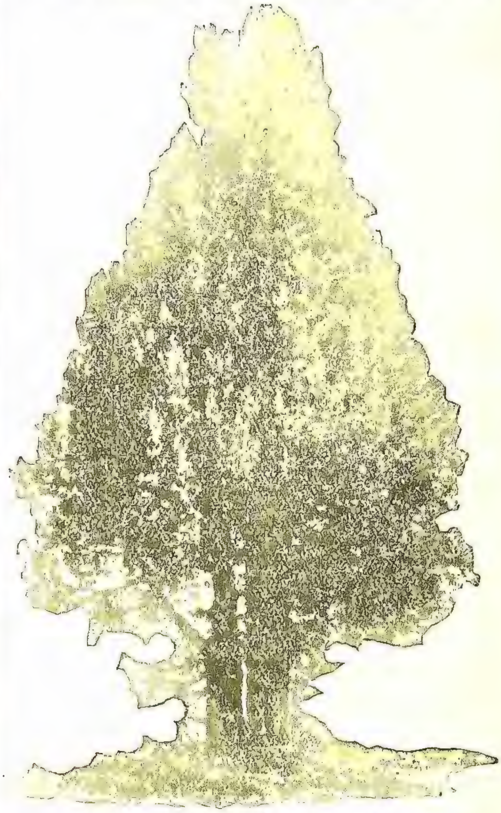
In all other cases 'fine' goes with its subst. in order to bring out the full meaning of the subst. in the Heb. or Greek. It is used (1) along with *linen* for שֵׁשׁ *shêsh*, Gn 41^{42}, Ex 25^{4} etc., Ezk $16^{10.\,13}$ 27^{7}; for בּוּץ *bûẓ*, 1 Ch 4^{21} 15^{27}, 2 Ch 2^{14} 3^{14}, Est 1^{6} 8^{15}, Ezk 27^{16}; for סָדִין *ṣâdhîn*, Pr 31^{24} (RV 'linen garments'), Is 3^{23}; for אֵטוּן *'êṭûn*, Pr 7^{16} (RV 'linen of the yarn'); for *βύσσος*, Lk 16^{19}, Rev 18^{12}; for (adj.) *βύσσινος*, 1 Es 3^{6}, Rev 18^{16} $19^{8\,bis.\,14}$; and for *σινδών*, Mk 15^{46} (RV 'a linen cloth'). (2) With *flour* for סֹלֶת *ṣôleth*, Lv 2^{1} etc., Nu 6^{15} etc., 1 K 4^{22}, 2 K $7^{1.\,16.\,18}$, 1 Ch 9^{29} 23^{29}, Ezk $16^{13.\,19}$ 46^{14}; and for *σεμίδαλις*, Sir 35^{2} 38^{11}, Bel ^{3}, 2 Mac 1^{8} 15^{39}, Rev 18^{13}. (3) With *gold* for פָּז *pâz*, Job 28^{17}, Ps 19^{10} 119^{127}, Pr 8^{19}, Ca 5^{15}, Is 13^{12}, La 4^{2}; for כֶּתֶם *kethem*, Job 31^{24}, Pr 25^{12}, Dn 10^{5} (RV 'pure gold'); and for חָרוּץ *ḥârûẓ* Pr 3^{14}, Zec 9^{3}. (4) With *brass* for *χαλκολίβανον* [*-os*], Rev 1^{15} 2^{18} (RV 'burnished'). Thus the adj., which was introduced to mark a distinction in the Heb. and Greek words, has been used so freely as to obliterate any distinction, and RV has done little to restore it. 'Fine' means '*finished*' (Lat. *finitus*, Old Fr. *fin*), and hence of superior quality, and that is its meaning in all those places. RV, however, has introduced the word in the sense of 'broken small,' 'of minute particles,' Dt 9^{21} 'as fine as dust' (דַּק לְעָפָר, AV 'small as dust').

The verb to *fine* (mod. 'refine') is derived from the adj., and signifies to make pure. It occurs only Job 28^{1} 'Surely there is a vein for silver, and a place for gold where they fine it' (יָזֹקּוּ, RV 'which they refine'). 'Fining' is used twice, Pr 17^{3} 'the fining pot is for silver' (מַצְרֵף, Amer. RV 'refining pot'), so 27^{21}. 'Finer' occurs only Pr 25^{4} 'a vessel for the finer' (צֹרֵף, Amer. RV 'refiner').

J. HASTINGS.

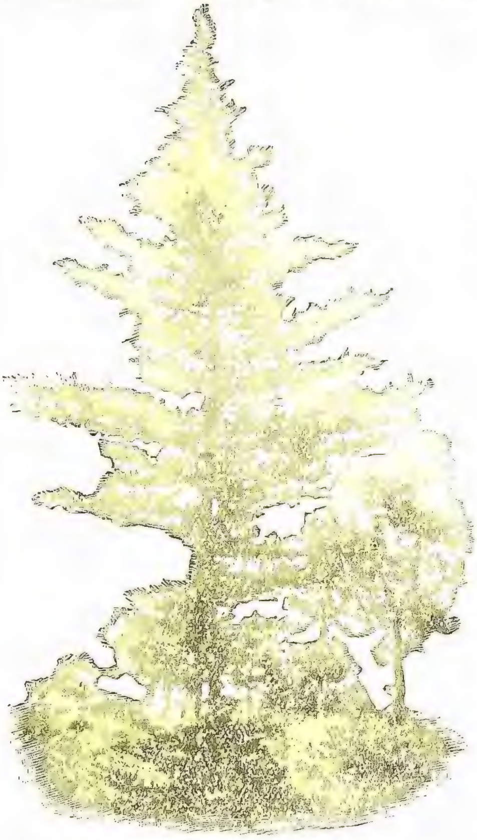
FIR (בְּרוֹשׁ *bĕrôsh*; once בְּרוֹתִים *bĕrôthîm*, Ca 1^{17}; *ἄρκευθος, κέδρος, πίτυς, κυπάρισσος, πεύκη*; *abies, cupressus*). From the numerous words by which the LXX has tr^{d} the Heb. original, it is clear that the learned men of that day were not agreed as to the identity of the tree intended. In a considerable number of passages the tr^{n} is not the name of a tree at all. The conditions required in the tree are—(1) That it could supply boards and planks and timber for doors (LXX *πεύκιναι*, 1 K $6^{15.\,34}$). (2) That it could supply beams (LXX *κέδρινοι*, 2 Ch 3^{5}) for the roofing of the temple. These must have been large, and very strong. (3) That it was useful in shipbuilding (Ezk 27^{5}). The LXX in this passage has transposed the words for *cedar* and *fir*, giving as follows: 'The cedar from Senir was built for thee, the planks of the decks were taken off the cypress of Lebanon, of which to make for thee pine masts.' It uses here *κυπάρισσος* for the transposed word. It is not clear why the word *pine* in the last clause was added. Perhaps it refers to the resinous quality of the wood. (4) It was suitable for musical instruments (2 S 6^{5}). The LXX, however, in this passage renders the word *bĕrôshîm* by *ἐν ἰσχύι, in strength*, and not by the name of any tree. This corresponds with the parallel passage 1 Ch 13^{8} 'with all their might,' where the Heb. text is בְּכָל־עֹז וּבְשִׁירִים instead of בְּכֹל עֲצֵי בְרוֹשִׁים. If we adopt the reading of 1 Ch in 1 S, the abruptness and apparent unseasonableness of the mention of the wood of which the musical instruments were made is avoided, and the two passages satisfactorily reconciled. The slight clerical error which would thus be corrected is obvious on a comparison of the two texts side by side. Budde has adopted this amended reading in his new edition of the text of Samuel. Should we also adopt it, there would no longer be any necessity to consider the adaptation of the *bĕrôsh* to the manufacture of musical instruments (see Wellh. and Driver, *ad loc.*).

Pinus Halepensis, Mill., has been proposed as the equivalent of *bĕrôsh*. But its wood is not durable, and would hardly have been chosen for the beams of the temple. Two other trees have been proposed as the equivalent of *bĕrôsh*, either of which would meet all the requirements: *Juniperus excelsa*, M.B., and *Cupressus sempervirens*, L. The former is called in Arab. *lizzâb* and *sherbîn*. It grows in the alpine and sub-alpine regions of Lebanon and Antilebanon, up to an altitude of 9000 ft. Its comus, when not hacked by the woodman, is ovate-lanceolate. Its trunk is straight, and its wood very solid and durable. It has dense ascending branches, small appressed leaves, and black berries as large as a marrowfat pea. The wood is well stored with resin—a fact which threatens the tree with extinction, as the remaining forests are fast being cut down by the tar smelters. Its trunks make solid and indestructible beams, and its wood, which is reddish and fragrant, is suitable for boards, planks, ship timber, and other purposes. But, notwithstanding the suitableness of the juniper as a tree to the requirements of the case, the weight of evidence is in favour of the *cypress*, *Cupressus sempervirens*, L. This tree has qualities resembling those of the last named. It has a straight trunk, horizontal, somewhat straggling branches, forming an ovate-oblong comus, small appressed leaves, and globular galbules, about an inch in diameter, composed of woody, shield-shaped scales. Its wood is useful for all the purposes indicated for the fir. Its name, *κυπάρισσος*, is one of the most frequent



'JUNIPERUS EXCELSA.' TALL JUNIPER.

translations of it in the LXX. It is called in Arab. *saru* and *sherbîn*, both of which are the equivalent of *cypress* in that language. Contrary to an opinion cited in *Oxf. Heb. Lex.*, under the head בְּרוֹשׁ, it is found in abundance in Lebanon and Antilebanon. A variety of it, with ascending branches, forming a lanceolate comus, is the familiar *cemetery cypress*, so common in the neighbourhood of Oriental cities. Many of these have tall straight trunks, which would make massive beams and ship timbers. G. E. Post.



'CUPRESSUS SEMPERVIRENS.' WILD CYPRESS.

FIRE (in OT most commonly אֵשׁ, *πῦρ*, *πυρισμός*, also אוּר, אִשָּׁה, בְּעֵרָה; in Dn occurs Aram. נוּר; in NT *πῦρ*, also *πυρά*, *φῶς*) denotes primarily the ordinary process of combustion, with its accompaniments of light and heat. The Scripture references to it are too numerous to classify exhaustively. Those which deserve special attention fall into two groups, according as the word is used in a literal or in a figurative sense.

I. Literal Usage.—Here we may distinguish —**1.** Fire accompanying God's presence. Besides numerous metaphorical allusions in connexion with theophanies, there are several references to fire as a physical phenomenon appearing on such occasions. See Gn 15^{17}, Ex 3^{2} (the burning bush), Ex 19^{18}, Dt 4^{36} (Mt. Sinai), Ex 40^{38}, Nu 9^{15}, Dt 1^{33}, Ps 78^{14} 105^{39} (the guiding pillar). **2.** Sacrificial fire. (*a*) Sacrifice by fire was a primitive mode of worship (Gn 8^{20} 22^{6}). (*b*) Under the Mosaic law fire was a most important means of offering the various prescribed sacrifices, which are described as 'offerings made by fire unto J".' For this purpose a fire was kept continually burning on the altar of burnt-offering (Lv 6^{13}, 1 Es 6^{24}). According to Lv 9^{24} it had a miraculous origin, and it was similarly rekindled in Solomon's temple (2 Ch 7^{1-3}). Some find a reference to this perpetual fire in Is 31^{9} (but see Cheyne, Delitzsch, *in loc.*), and in the name Ariel (the hearth of God?) applied to Jerus. in Is $29^{1.2.7}$. In 2 Mac 1^{19-22} there is a legend about the hiding of the sacred fire at the fall of Jerus., and its discovery by Nehemiah after the Exile. For the story of a later rekindling see 2 Mac 10^{3}. (*c*) Mention is made of special answers by fire when sacrifices were offered elsewhere than at the regular sanctuary, as in the cases of Gideon (Jg 6^{21}), Elijah (1 K 18^{38}), and David (1 Ch 21^{26}). (*d*) Fire was used for offering incense. It was carried in censers (Lv $16^{12.13}$), or placed on the altar of incense (Ex $30^{7.8}$), and the incense sprinkled upon it. To use any other than the sacred fire for this purpose was to offer 'strange fire,' the offence for which Nadab and Abihu perished (Lv 10^{1}, Nu 3^{4} 26^{61}). (*e*) Human sacrifice, especially child sacrifice, by fire was practised by certain of Israel's neighbours (Dt 12^{31}, 2 K 17^{31}). It was strictly forbidden in the law (Lv 18^{21}, Dt 18^{10}), but is repeatedly mentioned as a sin of Israel (2 K 17^{17}, Jer 7^{31} 19^{5} 32^{35}, Ezk 16^{21} $20^{26.31}$), being carried on in particular by Ahaz (2 K 16^{3}, 2 Ch 28^{3}) and Manasseh (2 K 21^{6}, 2 Ch 33^{6}). The scene of these rites was Topheth in the valley of Hinnom (Jer 7^{31}). See W. R. Smith, *RS*, pp. 352, 353, and Driver, *Deut.* p. 222. **3.** Lightning. In such expressions as 'fire from heaven,' 'the fire of God,' etc., which describe at times a destructive agency (Lv 10^{2}, 2 K $1^{10.12}$, Job 1^{16}), and at times the token by which sacrifice was approved (2 *c*, above), some such phenomenon as lightning is evidently to be understood, as also when 'fire and hail' are mentioned together (Ex $9^{23.24}$, Ps 105^{32} 148^{8}). **4.** Fire for domestic purposes. Its use in this respect was twofold. (*a*) For the preparation of food, as for roasting flesh (Ex 12^{8}, 2 Ch 35^{13}, Is 44^{16}, 1 Es 1^{12}), for broiling fish (Jn 21^{9}), for baking (1 K 17^{12}, Jer 7^{18}). (*b*) For warmth, as in Is 44^{16}, Jer 36^{22}, Mk 14^{54}, Lk 22^{55}, Jn 18^{18}, Ac 28^{2}. In Pal. fire is only occasionally used for heating, and there are no regular fireplaces except in kitchens, but portable braziers or 'fire-pans' are employed. The larger houses have special 'winter rooms' (Jer 36^{22}, Am 3^{15}). In these a cavity is made in the middle of the floor, in which the 'stove' (אָח) is placed. When the fire has burnt out a wooden frame is placed over it, and this is covered with a carpet so as to retain the heat (Keil, *Bib. Arch.* ii. 107; Nowack, *Heb. Arch.* 141; Benzinger, *Heb. Arch.* 124). The Arabs in the desert use as a hearth a hole lined with stones (Niebuhr, *Travels in Arabia*, i. 209). The use of fire on the Sabbath for domestic purposes was forbidden in the law (Ex 35^{3}; Jos. *Wars*, II. viii. 9). **5.** Fire in metallurgy. Fire has been employed from the earliest times for refining, casting, and forging metals. Among the Scripture allusions to this use are Ex 32^{24} (the golden calf), the various references to 'molten images,' and also Is 44^{12} 54^{16}, 2 Es 16^{73}, Sir 2^{5}, 1 P 1^{7}. **6.** Fire as a destroying agent. Among the effects of fire destruction is naturally prominent. Death by fire (or possibly burning *after* execution by another method) was the penalty for certain offences (Lv 20^{14} 21^{9}, Jos $7^{15.25}$), and was also a mode of inflicting vengeance (2 S 12^{31} [?], Jer 29^{22}, Dn $3^{11.15}$, 2 Mac 7^{5}). Conquerors burned the idols of vanquished nations (2 K 19^{18}, Is 37^{19}), and the Israelites were specially enjoined so to destroy those of the Canaanites (Dt 7^{5}, 1 Mac 5^{68}). Fire was a common means of destroying cities and property taken in war; and hence 'a fire shall go forth,' 'I will send (or kindle) a fire,' are formulæ which occur frequently in the prophetical books. Setting a crop on fire was one way of provoking a quarrel (Jg $15^{4.5}$, 2 S 14^{30}), and provision was made in the law (Ex 22^{6}) for making good the damage done by fire accidentally raised. Fire was a convenient method of destroying obnoxious writings (Jer 36^{23}, 1 Mac 1^{56}). The disposal of human bodies by burning was quite exceptional among the Hebrews (1 S 31^{12}, Am 6^{10}), but the refuse of the bodies of animals used in sacrifice was destroyed by fire (Lv 4^{12} 6^{30} 16^{27}, He 13^{11}). Garments infected by 'leprosy' were to be burnt (Lv $13^{52.57}$), and it was also common to burn rubbish of various kinds, as stubble (Is 5^{24}), chaff (Mt 3^{12}, Lk 3^{17}), and tares (Mt 13^{30}). Topheth (2 *e*, above) is said to have become in later times a receptacle and burning-place of rubbish. (This is doubted by Robinson; see *BRP*^{2} i. 274.) Fire is contemplated as the means by which the visible universe is to be destroyed (2 P 3^{7-12}). 7. Fire as a purifying agent. This use arises from the previous one in cases where impurities are of a combustible nature while the material to be purified is not so (Nu 31^{23}).

II. METAPHORICAL USAGE.—Many of the foregoing properties and uses of fire have suggested fig. applications of the word. Thus we find it employed as a symbol—1. Of God Himself. (*a*) Of His glory, in such visions as those described in Ezk $1^{4.13}$ $10^{6.7}$, Dn 7^{9} 10^{6}. (*b*) Of His protecting presence (2 K 6^{17}, Zec 2^{5}). (*c*) Of His holiness (Dt 4^{24}, He 12^{29}). 2. Of God's righteous judgment, which tests the deeds of men (Zec 13^{9}, Mal 3^{2}, 1 Co 3^{13}). 3. Of God's wrath against sin (Is $66^{15.16}$, Jer 4^{4} 21^{12}, La $2^{3.4}$, Ezk 21^{31} 22^{21}, Am 5^{6} 7^{4} etc.). 4. Of the punishment of the wicked (Ps 68^{2} 97^{3}, Is 47^{14}, Ezk 28^{18}, Mt $13^{42.50}$, 2 Th 1^{8}). Topheth or Gehenna (I. 6 above) suggests the language in Is 66^{24}, Jth 16^{17}, Sir 7^{17}, Mt 18^{9}, Mk 9^{43-48}. Fire is the emblem of the danger which the saved escape (Zec 3^{2}, Jude ^{23}). 'Eternal fire' and 'the lake of fire' are images of the punishment of the lost (Mt 25^{41}, Jude ^{7}, Rev 19^{20} $20^{10.14.15}$ 21^{8}). 5. Of sin (Is 9^{18} 65^{5}), and particularly of lust (Hos 7^{6}, Sir 23^{16}), and of the mischief of the tongue (Pr 16^{27}, Ja 3^{6}). 6. Of trouble and affliction (Ps 66^{12}, Is 43^{2}, Jer 51^{58}, Hab 2^{13}). 7. Of religious emotion (Ps 39^{3}), and especially of prophetic inspiration, as 'the word of the Lord' (Jer 5^{14} 20^{9} 23^{29}). 8. Of the law (2 Es 13^{38}). 9. Of the Holy Spirit (Mt 3^{11}, Lk 3^{16}, Ac 2^{3}).

Reference is apparently made in 2 Mac 10^{3} to the method of procuring fire by striking steel against flint. With regard to *fuel*, the material used for the sacrificial fire, both in primitive and in later times, was wood (Gn $22^{3.6}$, Lv 6^{12}). Special arrangements were made for supplying the altar fire. The Gibeonites were made 'hewers of wood' for the house of the Lord (Jos 9^{23}), and after the Exile a special wood-offering was appointed for the temple (Neh 10^{34} 13^{31}). It is called by Josephus the festival of Xylophoria (*Wars*, II. xvii. 6). For ordinary purposes the staple fuel was charcoal (see COAL), but other materials were also used, such as thorns (Ps 58^{9} 118^{12}, Ec 7^{6}, Is 33^{12}) and grass (Mt 6^{30}, Lk 12^{28}). The asphaltum found near the Dead Sea is combustible, as is also the 'stink-stone' found in the same neighbourhood, which is burnt along with camel's dung (Burckhardt, *Travels in Syria*, p. 394). The last mentioned, as well as other kinds of dung (Ezk 4^{15}), is also used alone as fuel (Niebuhr, *Travels in Arabia*, ii. 232; Wright, *Palmyra and Zenobia*, p. 369).

FIRSTBORN.—See FAMILY.

FIRST-FRUITS (בִּכּוּרִים, in Lv 23^{20} בִּכֻּרִים, LXX *πρωτογεννήματα*; רֵאשִׁית *ἀπαρχή*).—The custom of offering first-fruits was shared by the Isr. with many other ancient nations, and it is also found in many savage religions. Frazer (*Golden Bough*, ii. 68–90) cites many examples to show that the new corn was eaten sacramentally in order that the worshippers might share in the divine life of the corn-spirit, with which it was assumed that the grain was instinct. The eating of the first-fruits is, then, similar to the earliest form of animal sacrifice, in which the victim was regarded as divine, and the essence of the sacrifice lies in the communal feast and the participation of all the worshippers in the divine life. The two still remain separated by an important difference. The divine animal probably belonged to the kin of the worshippers, and the sacrificial meal strengthened the bond of kinship by a distribution of the common life. There is no reason for assuming this in the case of the corn-spirit. He gives, further, several instances of the offering of the first-fruits to the deity, in which the sacramental idea is absent (*Golden Bough*, ii. 373–384). The offering is in these cases of the nature of tribute or thank-offering. It is considered unsafe to eat of the new crops till the god has received his share, and the rite thus falls into the same category as numerous others familiar to the student of ritual and custom. The offering of the first-fruits does not sanctify the rest of the crop, but it makes it lawful food (W. R. Smith, *RS*,^{2} 241).

The Heb. first-fruits belong to the latter class; they are tribute, not the staple of a sacramental meal. The history is not in all points clear, partly owing to the shifting sense of the terminology. It is essential, if confusion is to be avoided, to keep the regulations of the codes distinct, and take them in their chronological order.

(*a*) In the oldest legislation (JE) the first-fruits of the harvest are required (Ex 23^{16} 34^{22}). Twice the curious phrase occurs, 'the first of the first-fruits' (רֵאשִׁית בִּכּוּרִים Ex 23^{19} 34^{26}, so in Ezk 44^{30}). This is taken by some to mean the first-ripe, by others the choicest, of the first-fruits. But probably 'of the first-fruits' is added to explain 'the first,' the first, that is, the first-fruits. It seems probable that in Ex 22^{29} first-fruits are referred to in the words מְלֵאָתְךָ וְדִמְעֲךָ (lit. 'thy fulness and thy tear,' paraphrased in RV as 'the abundance of thy fruits and of thy liquors'), on account of the mention of the firstborn in the parallel clause. If so, the first-fruits can hardly be confined to cereals, but will include wine and oil ('thy liquors'). The LXX gives *ἀπαρχαὶ ἅλωνος καὶ ληνοῦ* ('first-fruits of thy threshing-floor and winepress'). A feast was connected with the offering, 'the feast of harvest, the first-fruits of thy labour' (Ex 23^{16}), 'the feast of weeks, *even* of the first-fruits of wheat harvest' (Ex 34^{22}). The amount to be offered is not stated; it seems to have been left to the discretion of the offerer. It is interesting to observe that a man brought Elisha as a gift 'bread of the first-fruits, twenty loaves of barley, and fresh ears of corn' (2 K 4^{42}).

(*b*) In Deuteronomy (D) the Isr. is ordered to bring of his first-fruits in a basket to the central sanctuary and present it to the priest, with a profession of gratitude to God for deliverance from Egyp. bondage and the possession of the fruitful land of Palestine. A feast then follows, in which the Levite and the stranger are to share the offerer's hospitality (Dt 26^{1-11}). According to 18^{4} the priest is to receive the first-fruits of corn, wine, and oil, and the first of the fleece. The two regulations seem to be in conflict, and it has been supposed that 18^{4} is a later addition. Possibly there is no discrepancy. The basket of first-fruits may be only a portion, and this may be the first-fruits meant in 18^4, the rest being kept for the feast, or it may be the whole and the feast not made of the first-fruits at all. (See Driver, *Deut.* p. 290. He decides for the latter alternative.) It is not clear what was the relation of the first-fruits to the Tithe. Several scholars regard them as really identical, but this is not certain. See TITHE.

(*c*) As Dt 18^4 claims the first-fruits for the Levitical priests, so *Ezekiel*, whose legislation forms the transition to the Priestly Code, claims for the priests (*i.e.* the sons of Zadok) 'the first of all the first-fruits of everything,' and, in addition, the first of the dough (44^{30}).

(*d*) In the small code known as the Law of Holiness (H) it is enjoined that on the day after the Sabbath a sheaf of the first-fruits of the harvest should be brought to the priest, who should wave it before the Lord. A burnt-offering and a meal-offering are to accompany this ceremony, and, till it is accomplished, no bread, parched corn, or fresh ears must be eaten (Lv 23^{10-14}). Seven weeks later two wave loaves of two-tenths of an ephah of fine flour and leavened are to be offered as first-fruits (Lv 23^{17}. The additional regulations in 23^{18-20} are for the most part a later insertion interpolated from Nu 28^{27-29}).

(*e*) In the Priestly Code (P) the *rêshîth* and the *bikkûrîm* seem to be distinguished. In Nu 18^{12} the best of the corn, wine, and oil, that is, the *rêshîth*, belongs to the priest. In the next verse the *bikkûrîm* of all that is in their land also belong to the priest. Probably, the *bikkûrîm* should be interpreted as the first ripe raw fruits, while the *rêshîth* will be the prepared oil and wine and corn. (So Wellhausen, Nowack, and RV.) Accordingly, we find in Neh 10^{35} that the *bikkûrîm* of the ground and of the fruit trees were brought into the house of the Lord, while the *rêshîth* of dough, heave-offerings, fruit, wine, and oil were brought into the store-rooms of the temple (10^{37} 12^{44}). The distinction is observed in LXX and by Philo and Josephus. In Nu $15^{20.21}$ it is enacted that the first of the dough also shall be given as a heave-offering. According to Lv 2^{12} leaven and honey might be included in the first-fruits, though they could not be part of any offering made by fire. The meal-offering of first-fruits consisted of parched corn in the ear with oil and frankincense. Part of the corn and oil with all the frankincense was to be burnt (Lv 2^{14-16}). An interesting law, which rests on the same principle as the law of first-fruits, is that of Lv 19^{23-25}, which ordains that the fruit of a tree shall not be used for the first three years after it is planted ('three years shall they be as uncircumcised unto you'), and shall be consecrated to God in the fourth year. In the fifth year it may be eaten.

(*f*) In the later period a distinction was made between the *bikkûrîm* and the *tĕrûmôth* (תְּרוּמוֹת oblations); the fullest treatment of the subject is in the two tracts of the Mishna which bear these names. The *bikkûrîm* were taken from wheat, barley, grapes, figs, pomegranates, olives, and honey. The fruits were offered fresh by those who dwelt near Jerus., and dried by those who came from a distance. The companies came in a procession headed by the ox for the sacrifice, and marched to the music of pipes. They were met in Jerus. by the chief priests. The offerers then carried their wreathed baskets on their shoulders to the temple courts, and were welcomed by the Levites with the singing of Ps 30. Then the baskets were given to the priests, and the formula (Dt 26^{5-10}) was repeated. The *tĕrûmôth* were a tax for the support of the priests, and used only by them, and were levied on every kind of fruit of the ground and of trees. The choicest of the fruits were to be given; not more than $\frac{1}{40}$ or less than $\frac{1}{60}$ of the crop was expected. There was also the *Ḥallah* (חַלָּה), which was the first of the dough, $\frac{1}{24}$ of the whole piece in the case of private individuals, and $\frac{1}{48}$ in that of public bakers.

A. S. PEAKE.

FIRSTLING.—A firstling * is the first (in time) of its kind, Pr 3^9 Cov. 'Honoure the LORDE with thy substaunce, and with the firstlinges of all thine encrease.' In *Macbeth*, IV. i. 147, Shaks. uses the word of the first thoughts of the heart and the first acts of the hand—

> 'From this moment
> The very firstlings of my heart shall be
> The firstlings of my hand.'

In EV it is used only of the firstborn of beasts, though the Heb. words so tr^d (בְּכוֹר or בְּכוֹרָה, and פֶּטֶר) are used also of the firstborn of women.

FISH.—Fishes are very abundant in the inland waters of Pal. and Syria, except the Dead Sea, as well as in the adjacent Mediter. and the Nile. Even the intensely salt springs by the Dead Sea swarm with certain kinds of fish, while the water of that sea, which contains a large percentage of chloride of magnesium, is fatal to all animal life. Thousands of fish are borne by the rapid current of the Jordan into that sea, and, as soon as they reach its waters, are stupefied, and fall a prey to cormorants and kingfishers, or their bodies are washed up on the shore and feed the ravens and vultures. Tristram mentions forty-three species of fish found in inland waters. Of these the large number of twenty-two are peculiar to Pal. and Syria, and of this number fourteen are peculiar to the Jordan Valley and one to the mountain lake of Yamûni, S.E. of the cedars, and three inhabit only the Damascus lakes. Many of the species swarm in immense shoals in the Sea of Galilee and in the warm fountains by its shores, as well as in the Jordan and its affluents, the Leontes, the Orontes, and the lakes of Antioch, Ḥems, etc. Fresh-water fishes are also very abundant in all the perennial streams which flow into the Mediter., often ascending long distances, and not infrequently leaping up the rapids and cascades to reach their spawning places. The adjacent Mediter. is also well stocked with a large number of species of fish.

The large number and great fecundity of fish is expressed in the Heb. name דָּג *dâg*, from דָּגָה to *multiply abundantly*. They were taken from the earliest times, and many of them used as food (Gn $9^{2.3}$). Not a few of them are highly specialized in form and aspect; yet, while a considerable number of land animals and birds and even insects had names in Heb., not a single species of fish is named in the Scriptures. The only attempt at classification was into *clean* and *unclean* (Lv $11^{9.10}$). The former comprised those which had fins and scales; the latter, all others. This distinction was recognized in ancient Egypt (Wilkinson, *Anc. Egyp.* iii. 58, 59), and under el-Ḥâkim, who prohibited the sale of unclean fish (Lane, *Mod. Egyp.* i. 132). The good and bad fish (Mt 13^{48}) may have referred to this distinction, or to some other standard of excellence. The writer has seen a fisherman on the Mediter. coast in his anger beat to a jelly the head of a fish to which he objected.

---

* From *first* and *ling* a suffix with varying force but generally dimin., seen also in changeling, darling, fatling, fondling, foundling, gosling, hireling, inkling, nestling, nurseling, seedling stripling, starveling, underling, worldling.

At other times they cast them away on the shore, or back into the water.

The Hebrews seem to have classified together all creatures living in the waters, whether 'whales' AV, or 'sea-monsters' RV (Gn 1^{21}; Heb. *tannînîm*), or 'great fish' (Jon 1^{17} דָּג גָּדוֹל *dâg gâdhôl*), or the 'living creature that moveth' (Gn 1^{21}), or 'fish' (v.^{28}).

The fish was an object of idolatry in all the ancient world. The Philistines worshipped Dagon, the Fish-god (1 S 5^{4}), who was represented with the body of a man and the tail of a fish (but see DAGON, p. 544^{a}). Hence it was forbidden to make an image of a fish (Dt 4^{18}), which to the Heb. included, as before said, all living creatures in the water (Ex 20^{4}). G. E. POST.

FISHER.—Fisher, says Bradley (*Oxf. Eng. Dict.*), is now archaic, being superseded in ordinary use by 'fisherman.' AV has followed previous versions in giving 'fisher' in Is 19^{8}, Jer 16^{16}, Ezk 47^{10} (דַּיָּג, only plu.), Mt $4^{18.\ 19}$, Mk $1^{16.\ 17}$ (ἁλιεύς), though it has 'fisherman' after Tind. and the others (except Wyc. and Rhem.) in Lk 5^{2} (ἁλιεύς). For the 'fisher's coat' of Jn 21^{7} see COAT.

FISHING.—The natural history of Palestine fish has been little studied. Along the coast there are the usual Mediterranean varieties, with an undue proportion of mullet. Some 33 varieties of fresh-water fish have been counted in the Jordan Valley, where fish swarm in Galilee as remarked by Tristram, and in the waters of Merom one may see tons taken in one day by a drag-net. The fact that the fish of this basin resemble African species was first observed by Josephus. 'There are several kinds of fish in it (Galilee), different both to the taste and sight from those elsewhere.' Also he says of the Capharnaum fountain, 'it produces the Coracin fish' (*BJ* III. x. 8). Several Nilotic species abound. The Chromides, carp-like, are called by the Arabs 'combs,' from their flat shape and projecting spines. Of the Siluridæ, sheat fish (*Clarias Macracanthus*, Arab. *Berboot*) grows to the size of 3 or 4 ft.; its flesh is much prized. Most abundant are the barbel and bream, while dace, bleak, and loaches are found. Eels are in many streams, and swarm in the Orontes. Near Tripoli is a pool full of sacred fish. Fossil fish, beautifully preserved in the Lebanon limestone, are of existing genera. While not strictly fish, we may mention that along the coast are dolphins, seals, and whales—the two latter very rare. The 'badger skins'(AV Ex 26^{14}) were probably of the Red Sea dugong, a marine mammal, whose skin is used now; and the Hebrew term תַּחַשׁ corresponds to Arab. *tuḥas*, which includes this animal.

Fishes technically are not mentioned in the *creative* acts of the fifth period except as included in the terms שֶׁרֶץ, lit. 'swarmer' (AV 'moving creature'), and הַתַּנִּינִם הַגְּדֹלִים (AV 'great whales,' RV 'great sea-monsters'). The first of these terms occurs more specifically Lv 11^{10} שֶׁרֶץ הַמַּיִם. The dominion of man, however, it is interesting to note, is given over fish, דְּגֵי הַיָּם (Gn 1^{28}, renewed Gn 9^{2}, cf. Ps 8^{8}).

Fish were a staple article of diet in Egypt, and their loss part of the plague (Ex $7^{18.\ 21}$). The Israelites murmured, 'we remember the fish we did eat freely' (Nu 11^{5}). The ceremonial law declared all that had not 'fins and scales' an 'abomination' (Lv 11^{9-12}). The repeated prohibition of worship of anything 'that is in the water under the earth' (Ex 20^{4}), 'the likeness of any fish that is in the waters beneath the earth' (Dt 4^{18}), was needed, for the Philistines worshipped Dagon = 'little fish' (1 S 5^{2}; but see art. DAGON). It has also been alleged (but see Baethgen, *Rel.-ges.* 60) that 'Sîdon was the fish goddess of Phœnicia' (Tristram). This cult existed both in Assyria and India. Solomon, in his wisdom, 'spake of the fishes' (1 K 4^{33}). In the time of Nehemiah, fish, probably cured, were brought by the Tyrians to Jerusalem (Neh 13^{16}), where we know there was a 'Fish-gate.' See JERUSALEM.

The 'great fish (דָּג גָּדוֹל Jon 1^{17}) prepared' for Jonah has been supposed to be a shark or whale. Both AV and RV tr. κῆτος in Mt 12^{40} 'whale' (RVm 'sea-monster'). The fact that a killer-whale, 21 ft. long, can swallow porpoises and seals would imply that a much larger whale *might* swallow a man. Part of the skeleton of a whale, 43 ft. long, is in the museum of the Syr. Prot. College, Beirût. The carcass of this whale was cast by a storm on the coast near Tyre.

As a type of restoration, Ezk $47^{9.\ 10}$ tells us that in the Dead Sea 'shall be a very great multitude of fish.' 'These fish shall be according to their kinds, as the fish of the great sea, exceeding many.'

Fish in NT brought a livelihood to the apostles; they are one of the 'good gifts' (Mt 7^{10}) twice miraculously multiplied to the multitudes (Mt $17^{17ff.}$ $15^{34ff.}$). Broiled fish was eaten by our Saviour (Lk 24^{42}) and given by Him to the disciples (Jn $21^{9.\ 13}$). The discrimination between good and bad fish is used as a type of final separation of classes of men (Mt 13^{48}). To the early Christians the fish became a sacred symbol, the Greek word ἰχθύς being formed by the initial letters of the four Gr. words used in the confession, 'Jesus Christ, Son of God, Saviour' (Ἰησοῦς Χριστός, Θεοῦ υἱος, Σωτήρ). See *D.C.A. s.v.* Ἰχθύς.

As formerly, so now, in the East fishing is the occupation of the simple and poor, and wholly unknown as a pastime. The methods and means have likewise changed but little. These were principally—

(1) The small net cast by hand, חֵרֶם (Ezk $26^{5.\ 14}$ 32^{3} 47^{10}, Hab $1^{15.\ 17}$, Mic 7^{2}, Ec 7^{26}), δίκτυον (Mt 4^{20} etc.), ἀμφίβληστρον (Mt 4^{18}, Mk 1^{16}). This is very commonly employed still. The present writer has watched its use at Tabigha (probably Bethsaida), where fish gather at the outlet of streams into the lake.

(2) The seine, מִכְמֹרֶת (Is 19^{8}) or מִכְמֶרֶת (Hab 1^{15}), σαγήνη. This was used in two ways—either let down into the deep and drawn together in a narrowing circle and then drawn into the boat or boats (Lk 5^{4-9}), or as a semicircle drawn to the shore (Mt 13^{48}). Both these methods are seen daily.

(3) The hook, חַכָּה (Is 19^{8}, Job 41^{1}), צִנָּה, סִיר (Am 4^{2}), ἄγκιστρον (Mt 17^{27}). This was used with a line, חֶבֶל, but no mention is made of a rod, as fly-fishing is unknown. Hab 1^{15} mentions all the three methods we have described.

(4) The harpoon or spear (Job 41^{7}), EV 'barbed irons' (שֻׂכּוֹת), 'fish spears' (צִלְצַל דָּגִים). This is a method depicted on Egyptian and Assyrian monuments. At present it is practised only at night by torchlight.

In spite of the mistranslations 'fish pools' (Ca 7^{4} AV), 'ponds for fish' (Is 19^{10} AV), there is no evidence that the pools of the Bible were used for fish culture.

The Turkish Government now taxes fishing as an occupation, and also takes 20 per cent. of the price of the fish sold in the seaports, and collects this again if the fish are taken to another port. The fisheries of Merom and Galilee are farmed out to contractors, who forbid all others to engage in the trade.

As an occupation fishing has been honoured by the selection of its followers as apostles; by being the object of Jesus' special favour on two occasions

(Lk $5^{1ff.}$, Jn 21); and chosen as the type of earnest, skilful soul-saving (Mk 1^{17}, Lk 5^{10}).

W. K. Eddy.

FISH-GATE.—See Jerusalem.

FISH-POOL occurs in AV of Ca 7^{4} 'Thine eyes are [like] the fish-pools of Heshbon,' but the exact translation is simply 'pools' (so RV; Heb. בְּרֵכוֹת, LXX λίμναι). See Hitzig, *ad loc.*, and art. Heshbon. Equally unwarrantable is the introduction of 'fish' in Is 19^{10}, where AV, following Ibn Ezra, tr. כָּל־עֹשֵׂי שֶׂכֶר אַגְמֵי־נָפֶשׁ 'all that make sluices [and] ponds for fish.' The passage is obscure (see Skinner, *ad loc.*), but probably the correct trⁿ is that of RV, 'all they that work for hire shall be grieved in soul.'* It is possible that the elsewhere unexampled אַגְמֵי (for עַגְמֵי) was a play suggested by the employment of the 'workers for hire' in the construction of water-tanks (אֲגַמִּים; so Del. quoting Ehrentreu, *ad loc.*). The LXX, while agreeing with this trⁿ of אַגְמֵי־נָפֶשׁ (*λυπηθήσονται καὶ τὰς ψυχὰς πονέσουσιν*), gives 'manufacturers of strong drink' (*ποιοῦντες τὸν ζῦθον*),† instead of 'workers for hire.' They must have read שֵׁכָר for שֶׂכֶר.

J. A. Selbie.

FITCHES.—AV gives fitches in the text in two places. **1.** Ezk 4^{9}. Here the Heb. is כֻּסֶּמֶת *kuṣṣemeth*, trᵈ in AVm and RV *spelt*. We believe the plant intended is the *kirseneh* or *kirsennch* of the Arabs, *Vicia Ervilia*, L. The same Heb. word is used in two other places (Ex 9^{32}, Is 28^{25}), where AV has *rye* and RV *spelt* (see Rye). **2.** Is $28^{25.27}$. Here the Heb. is קֶצַח *keẓaḥ*. This is the *nutmeg flower*, *Nigella sativa*, L., a Ranunculaceous plant, cultivated everywhere in the East for its black seeds, which are used as a condiment and a medicine. It is called in Arab. *shûnîz*, or *shihnîz*, and *ḥabbat el-barakah*, *i.e.* the *seed of blessing*, or *el-ḥabbat es-sauda*, *i.e.* the *black seed*. An Arab. proverb says, 'in the black seed is the medicine for every disease.' Avicenna recommends it in dyspepsia, and for bronchial and other affections. Orientals often put a pinch of the seeds on the middle of the upper surface of the flat loaves of bread before baking. In baking they adhere. Pliny alludes to their use by bakers (*Nat. Hist.* xix. 52). They are believed to assist digestion. They have a warm aromatic flavour and carminative properties. Like other seeds produced in small quantities, as *cummin*, they are often beaten out with a stick, as mentioned in Is 28^{27}, instead of being threshed out with the *môrag*.

G. E. Post.

FLAG.—Two Heb. words are trᵈ by *flag*. **1.** אָחוּ (*'âḥu*; *ἄχει* [in LXX of Sir 40^{16} this was supposed till 1896 to represent the Heb. *'âḥû*] *βούτομον*) occurs in three connexions. (*a*) Where the kine feed in an *'âḥu* (Gn $41^{2.18}$). (*b*) Where Bildad asks, 'Can the *rush* (גֹּמֶא, *πάπυρος*) grow up without mire? can the *flag* (אָחוּ, *βούτομον*) grow without water?' (Job 8^{11}). (*c*) In a passage (Hos 13^{15}) where both AV and RV, following the LXX, give *brethren* for אַחִים *'âḥîm*, which the *Oxf. Heb. Lex.* regards as a plural of אָחוּ, abbreviated from אֲחָוִים *'ăḥâwîm*, the context seeming to point to a water plant, withering before the E. wind, which dries up its spring. In the passage in Job the *gôme* and the *'âḥu* occur in the two members of a parallelism. RVm gives for *gôme* 'papyrus,' and for *'âḥu* 'reed-grass' (cf. Ebers, *Egypten u. die Bücher Moses*, 338 f.). The latter is no more definite than *flag*, and therefore only confuses the question of identity by another term. We have the authority of the LXX that the *gôme* was the *πάπυρος*, *papyrus*, and the *'âḥu*, *βούτομον*, which some believe to be *Cyperus esculentus*, L., the edible galingale, and others *Butomus umbellatus*, L., the flowering rush, both swamp plants. אָחוּ (Gn $41^{2.18}$) should be rendered 'in the flowering rushes,' or 'in the sedges,' or 'in the fens.' Similarly, the doubtful אָחִים *'âḥîm* (Hos 13^{15}). The same indefiniteness is found in the Arab. term *rabi'*, which means literally 'spring,' and refers to 'spring herbage,' and *ḥalf*, which refers to *Gramineæ* and *Cyperaceæ* in general. It is also found in the English 'grass.'

2. סוּף (*ṣûph*, *ἕλος*, *carectum*) is used (*a*) of the *sedgy* or *reedy* plants on a river's bank (Ex $2^{3.5}$, Is 19^{6}); (*b*) of *weeds* (Jn 2^{5}), meaning *sea-weeds*. From the presence of these, and perhaps of other marine growths, as of coral, the Red Sea was named יַם־סוּף (*yam-ṣûph*).

G. E. Post.

FLAGON occurs five times in AV, but in only one of these instances is the trⁿ retained by RV, namely Is 22^{24}, where both VSS tr. כְּלֵי הַנְּבָלִים by 'vessels of flagons.' נֵבֶל or נֶבֶל (when not used for a musical instrument) generally means a leather pitcher. Here it is perhaps an earthenware bottle. On the other hand, RV introduces 'flagons' in two instances where it is not found in AV, namely Ex 25^{39} 37^{16} (in both קְשָׂוֹת). This trⁿ is probably correct (see Cup), although RV gives 'cups' for the same Heb. word in Nu 4^{7}. In all these three passages AV has 'covers.' In the remaining four instances where AV gives 'flagons,' the Heb. is אֲשִׁישָׁה (2 S 6^{19}, 1 Ch 16^{3}, Hos 3^{1} [אֲשִׁישֵׁי עֲנָבִים], Ca 2^{5} [אֲשִׁישׁוֹת]; cf. אֲשִׁישֵׁי קִיר חֲרֶשֶׂת 'the raisin-cakes [AV 'foundations'] of Kir-hareseth,' Is 16^{7}). The meaning of this word is a 'pressed cake . . . composed of meal, oil, and *dibs*' (W. R. Smith, *OTJC*¹ 434, n. 7). Hence in 2 S 6^{19}, 1 Ch 16^{3}, RV gives 'cake of raisins' for AV 'flagon [of wine],' in Hos 3^{1} 'cakes of raisins' for 'flagons of wine,' and in Ca 2^{5} 'raisins' (RVm 'cakes of raisins') for 'flagons.' The LXX has in 2 S 6^{19} *λάγανον ἀπὸ τηγάνου*, in 1 Ch 16^{3} *ἀμορείτη*, in Hos 3^{1} *πέμματα μετὰ σταφίδος*, and in Ca 2^{5} *μύροι*. Luther, who like AV adopted a false Rabbinical derivation and interpretation of אֲשִׁישָׁה, tr. in 2 S 6^{19} and 1 Ch 16^{3} *ein Nössel Wein*, and in Hos 3^{1} *eine Kanne Weins*. In Ca 2^{5} he has *Blumen*. In Kautzsch's *AT* we find for 2 S 6^{19} and 1 Ch 16^{3} *Rosinenkuchen*, and for Hos 3^{1} and Ca 2^{5} *Traubenkuchen*. See further under Food, p. 32^{b}.

J. A. Selbie.

FLAX (פִּשְׁתָּה *pishtâh*, *λίνον*, *linum*).—The Heb. and its equivalents in Gr., Lat., and Eng. are used (1) for the *growing plant* (Ex 9^{31}); (2) for the *stalks* when cut (Jos 2^{6} פִּשְׁתֵּי הָעֵץ, *λινοκάλαμη*, *stipulæ lini*); (3) for a *wick* made of the fibres (Is 42^{3} 43^{17}, AV 'tow,' RV 'flax,' marg. 'a wick'). The root form פֵּשֶׁת *pēsheth*, with suffix פִּשְׁתִּי *pishti*, LXX *ὀθόνιά μου*, is also used for the flax fibres (Hos $2^{5.9}$). The plural of the same, פִּשְׁתִּים *pishtîm*, is used for the *hackled fibres* (Pr 31^{13}, Is 19^{9}); these are twisted into *cords* (Jg 15^{14}) or woven into stuff (Dt 22^{11}). The shorter fibres are called נְעֹרֶת *nĕ'ôreth* = *tow* (Jg 16^{9}, Is 1^{31}). The plural *pishtîm* is also used for *linen* (Lv $13^{48.52}$), as well as for *linen garments* (vv.$^{47.59}$, LXX *ἱματίῳ στιππυίνῳ*, Ezk 44^{17} *στολὰς λινᾶς*).

Flax, *Linum sativum*, L., is a plant of the order *Linaceæ*, which has been cultivated from the earliest periods of the world's history. It is a perennial, with slender stalks, 2 to 3 ft. high, linear-lanceolate leaves, and showy blue flowers. Its stalks produce the strong fibres out of which linen is manufactured. These stalks were dried on the flat roofs of the houses (Jos 2^{6}), then steeped in water to cause the decay of the pulp, then hackled (Is 19^{9}) to straighten the fibres and comb out the shorter ones, which are *tow* (Jg 16^{9}, Is 1^{31}). It was regarded as a crop of importance (Ex 9^{31}, Hos 2^{9}). Linen garments were used by the priests, etc. (Lv $13^{47.\,59}$); the material is usually spoken of as שֵׁשׁ *shêsh* (a name still retained in the Arab. *shâsh*, which is used for the grade of cotton cloth known in English as *cheese-cloth*). The mummies of Egypt were swathed in linen bandages.

---

* Rashi has 'ponds of *rest*,' where the waters rest and are retained! Ibn Ezra gives 'where are the souls of the fish'; this is also adopted by Kimchi in his *Lexicon* ('pools in which they hunt fish'); in his *Comm.* he mentions it, but he himself offers the same explanation as the RV.

† Properly 'beer,' which was a favourite Egyptian beverage.

G. E. POST.

FLAYING.—See CRIMES AND PUNISHMENTS.

FLEA (פַּרְעֹשׁ *par'ôsh*, *ψύλλος*, *pulex*).—An insect, *Pulex irritans*, L., universal in warm climates, and a great pest to man and the animals which it infests. Insignificant as it is, its bite is very irritating, often causing considerable swelling and intolerable itching, which robs its victim of many an hour of sleep, and makes him ridiculous in his frequently vain efforts to catch his tormentor. The habit of the natives of the East of sleeping in the same clothes which they wear by day, and spreading their beds on the mats on which they sit, contributes much to the multiplication of the insect in their houses and camps. Fleas swarm esp. in the filthy tents of the Bedawîn, and in stables and dog kennels. The flea is mentioned by David (1 S 24^{14}),* who compares himself to this contemptible insect, in order to ridicule the insensate character of Saul's persecution by likening it to the vain hunt above alluded to. In Ex 8^{16} RVm has 'fleas' for 'lice' (wh. see).

G. E. POST.

FLESH, represented by בָּשָׂר, שְׁאֵר in OT, and by *σάρξ* and *κρέας* in NT. שְׁאֵר occurs very seldom in comp. with the constant word בָּשָׂר, but seems to cover some of the same meanings, particularly flesh for food, and flesh of consanguinity. Cf. Ps 73^{26} $78^{20.\,27}$, Pr 11^{17}, Jer 51^{35}, Lv 25^{49}. *κρέας* is only used twice in NT, and each time in the phrase *κρέα φαγεῖν*, Ro 14^{21}, 1 Co 8^{13}. It is impossible to do justice to the biblical uses of this term *Flesh* without clearly distinguishing at least the following five meanings:—

1. *Substance of an animal body*, whether of beast or of man (*e.g.* Gn 41^{2}, Lv 4^{11}, Job 31^{31}, 1 Co 15^{39}). For this use of the term in its application to FOOD and to SACRIFICES, see under these words. It denotes the living human body in such places as Ex 4^{7}, Lv 13^{10} 17^{14}. Indeed, through a great part of OT flesh is equivalent to the whole human BODY, on the principle mentioned *s.v.*, in which application, it is to be noted, that the LXX often renders בָּשָׂר (sing.), in accordance with Gr. idiom, by the plural *σάρκες* (*e.g.* Gn 40^{19}, Nu 12^{12}, Job 32^{25}), and even by *σῶμα* (*e.g.* Lv 15^{2}, 1 K 21^{27}).

2. *Relation, of consanguinity or by marriage* (*e.g.* Gn 2^{24} 37^{27}, Neh 5^{5}, Is 58^{7}, Mt 19^{5}, 1 Co 10^{18}). The literal word is used in the orig. in places where the versions, our own included, employ a periphrasis 'near of kin' (*e.g.* Lv 18^{6} 25^{49}). In the same significance, the fuller phrase 'flesh and bones' is peculiarly biblical (*e.g.* Gn 2^{23} 29^{14}, Jg 9^{2}, 2 S 5^{1} $19^{12.\,13}$, Eph 5^{30}, cf. Lk 24^{39}).

3. *Creature nature* generally, *human nature* particularly. In this use it can denote all terrestrial beings possessing life (Gn 7^{21}); especially the finite earthly creature in contrast with God and with the spirit which immediately comes from God. 'The Egyptians are men, and not God; and their horses flesh, and not spirit' (Is 31^{3}). The frailness and dependence of man is the thing marked by this contrast (*e.g.* Gn 6^{3}, Job 34^{15}, Ps 56^{4} 78^{39}, Is 40^{6-8} quoted 1 P 1^{24}). There is a persistent tendency in translators and commentators to ignore this peculiarly biblical antithesis, and confound it with the Greek antithesis between material and immaterial. Further, though finite and creaturely weakness is implied in it, there is not necessarily any moral disparagement, *e.g.* 'all flesh' is used for the 'whole human race' in connexions that are most honourable, *e.g.* Ps 65^{2} 145^{21}, Is 40^{5}, Jl 2^{28}. Conclusive as to this is the use of 'flesh' for the human nature of our Lord (Jn 1^{14}, Ro 1^{3} 9^{5}, 1 Ti 3^{16}). In the same line with this stands the more expanded phrase 'flesh and blood' for human nature on its earthly side in contrast with something greater than itself (Mt 16^{17}, 1 Co 15^{50}, Gal 1^{16}, Eph 6^{12}, He 2^{14}, to which should perhaps be added Jn 1^{13}). This phrase is peculiar to the NT, though germane to the OT idea 'the life of the flesh is in the blood,' and the beginning of the usage can be traced to the OT Apocr. writers (cf. Sir 14^{18} 17^{31}). It is common in Rabbinical literature. This whole biblical use of the term 'flesh' in application to man means that he is so called from his creaturely nature, or from his nature on its creaturely side.

4. As *one constituent of human nature* (the corporeal) combined or contrasted with the others.

OT usage presents a variety of such combinations. The whole of man is expressed as 'flesh' and 'soul' in Ps 63^{1}, Job 13^{14} 14^{22}; as 'flesh' and 'heart' in Ps 73^{26}, Ezk $44^{7.\,9}$, Ec 11^{10}, Pr 14^{30}; as 'flesh,' 'heart,' and 'soul,' Ps 84^{2}, in all which a duality of outer and inner, or lower and higher in man, is plainly intended. But so far is 'flesh' from being despised in these contrasts that it is joined with the higher elements in the relation of the whole man to God and to his future (?) hopes, as in Ps 63^{1} 16^{9} 84^{2}, Job 19^{26}. In the NT its use in this sense for the lower element in man, without any ethical disparagement, though not very frequent, is still clear. In a sufficient number of passages it occurs coupled with 'spirit,' in the Pauline writings as well as others, to show that these two are the natural elements of which man is made up, exactly as 'flesh' and 'soul,' 'flesh' and 'heart' are in the OT (*e.g.* Mt 26^{41}, Ro $2^{28.\,29}$, 1 Co 5^{5}). 'Flesh' is used by St. Paul of corporeal presence, cognizable by the senses, in contrast to fellowship in 'spirit' (2 Co 5^{16}, Col $2^{1.\,5}$), indeed of man's earthly or bodily life without moral qualification (Gal 2^{20}, Ph 1^{22}). Even when man's sinful state is the topic, the dual nature is sometimes expressed in the usual terms; 'desires of the flesh and of the mind' (Eph 2^{3}), 'defilement of the flesh and spirit' (2 Co 7^{1}), seem to mean that man's nature, in both its constituent parts, is affected by sin. There is a use of this antithesis, between flesh and spirit, in application to Christ, which points to lower and higher elements in His personality quite peculiar to Himself (*e.g.* Ro $1^{3.\,4}$, 1 Ti 3^{16}, 1 P 3^{18}).

5. Its *ethical* or *doctrinal sense*. Besides the morally indifferent applications of flesh already discussed, there is in the NT, and esp. in the Pauline writings, a use of it which is charged with ethical or doctrinal content. It is thus used once in contrast with 'mind' (Ro 7^{25}), more frequently with 'spirit' (Ro $8^{4.\,5.\,6.\,7\ \mathrm{RV}\ 8.\,9.\,12.\,13}$, Gal 5^{16-25} 6^{8}). In the same manner the adjectives 'fleshly,' 'carnal' are contrasted with 'spiritual' in Ro 7^{14}, 1 Co $3^{1.\,3.\,4}$, 2 Co 1^{12}, Col 2^{18} 'fleshly mind,' orig. 'mind of the flesh.'* That in the connexions cited above flesh with its adjective has reference to the principle of sin and its seat in man's fallen nature, while 'spirit' and 'spiritual' refer to the principle of the regenerate or divine life in man, will hardly be questioned. But various have been the accounts given of the *rationale* of this metaphorical or indirect use of flesh and 'fleshly' in a theological or doctrinal sense. Writers like Holsten, Pfleiderer, Schenkel make strenuous efforts, without much success, to derive this peculiarly Pauline application of the term from the older sense of it as denoting the weakness and frailty of man's nature. The only account which seems to satisfy all the ideas involved is that the 'carnal' denotes the sinful element in man's nature, because that element entering his nature now in the ordinary course of human production is an inheritance of the flesh; whereas the 'spiritual' is that which comes into it from above, or is given in the New Birth. This explanation is confirmed by our Lord's words, reported in Jn 3^6. For some further remarks on this question and on the possible connexion of all the meanings of flesh here noted, see PSYCHOLOGY. J. LAIDLAW.

---

* Its mention in 1 S 26^{20} is due to corruption in MT (see Driver, Wellh., Budde, *ad loc.*).

* There occurs in the same writings a quite unethical use of 'carnal' as equivalent to 'corporeal' or 'earthly,' *e.g.* Ro 15^{27}, 1 Co 9^{11}, 2 Co 3^{3} 10^{4}, He 7^{16}; for the complications both of reading and rendering in these passages, created by the use of *σαρκικός* or *σάρκινος*, see Trench, *N.T. Synonyms*, *s.v.*

FLESH-HOOK.—See FOOD.

FLESHLY, FLESHY.—Modern editions of AV have retained the distinction between 'fleshly' and 'fleshy' of 1611. Fleshly is that which belongs to the flesh and not the spirit, *carnal*. It occurs in NT 2 Co 1^{12}, 1 P 2^{11} (σαρκικός), Col 2^{18} 'fleshly mind' (νοῦς τῆς σαρκός, 'mind of the flesh'). In Ad. Est 14^{10} the meaning is apparently simply *mortal* (σάρκινος). Fleshy is that which is made of flesh (and not of stone), soft, *tender*, Sir 17^{16}, 2 Co 3^3 (σάρκινος). The distinction did not appear in the earlier versions: Wyc. Tind. Gen. Bish. have 'fleshly' in 2 Co 3^3, Cov. has 'fleshy.' Nor was it observed by Eng. writers of the day: T. Wright (1604), *Passions*, v. iv. 212, says, 'Fleshy concupiscence deserveth rather the name of Mercenarie Lust then Love,' and Culpepper and Cole, *Anat.* I. xvii. 45, 'Such as are given to fleshy desires have larger Kidneys than ordinary.' But once made it is well worth maintaining.

FLIES.—See FLY and PLAGUE.

FLINT (in OT חַלָּמִישׁ, ἀκρότομος, στερεὰ πέτρα; צֹר, ἀκρότομος, πέτρα, ψῆφος; צַר, στερεὰ πέτρα; in Apocr. ἀκρότομος, κόχλαξ) is the term by which the foregoing Heb. words are rendered, in AV generally, and in RV uniformly. The reference in every case is to a rock or stone whose characteristic quality is hardness or sharpness. The Gr. equivalents have a general rather than a definite meaning, ἀκρότομος being elsewhere (Sir 40^{15} 48^{17}) tr^d 'hard (RV sheer) rock,' while in Is 2^{21} 51^1 στερεὰ πέτρα stands in LXX for צוּר (rock); though, on the other hand, in Job 22^{24} צוּר is represented in Vulg. by *silex*. On the whole, flint is the substance which best fulfils the conditions stated, and in the passages where small stones rather than masses of rock are referred to it is probably the true rendering.

חַלָּמִישׁ corresponds to Assyr. *elmêšu* (*ZDMG* xl. 728), which seems to mean any hard stone used for striking fire, even rock crystal or diamond. According to Hommel (*PSBA*, xv. 291), *elmêšu* is abbreviated from *algamîšu* (Heb. אֶלְגָּבִישׁ Ezk $13^{11.13}$ 38^{22}), both being variants of *gilgamish* or *gibilgamish*, which is a synonym of *Gišdubar*, an ancient Bab. fire deity.

Flint is the name given to the rock from which Moses brought water in the wilderness (Dt 8^{15}, Ps 114^8, Wis 11^4). Flints were the primitive instruments of circumcision (Ex 4^{25} RV, Jos $5^{2.3}$ RV). In the latter passage LXX expands חַרְבוֹת צֻרִים into μαχαίρας πετρίνας ἐκ πέτρας ἀκροτόμου. The LXX additions to Joshua relate how these knives of flint were preserved as a memorial in Timnath-serah, and were buried with Joshua there (21^{42d} 24^{30a}). In 1 Mac 10^{73} the absence of flints in a plain is given as a reason why cavalry should not be encountered there, as slingers would thus be at a disadvantage. The word used is κόχλαξ, and it is found in a similar connexion in the LXX of 1 S 14^{14}, which, however, does not correspond with the MT (Wellhausen, *Text der BB. Sam.* 87, 88; Driver, *Heb. Text of Sam.* 82, 83). In the Song of Moses 'oil from the rocky flint' (Dt 32^{13}) is a poetical way of describing olives growing on rocky soil (see Job 29^6). In Job 28^9, to illustrate man's power and skill, it is said that the miner puts forth his hand upon the flinty rock, and overturns the mountains. The hoofs of the Assyrian horses are compared to flint (Is 5^{28}), which is also an emblem of prophetic resoluteness (Is 50^7, Ezk 3^9).

Flint is a form of silica, a mineral which occurs in its purest condition as quartz. Flint is found in bands and nodules in certain calcareous rocks, notably in chalk, in various parts of the world. It is exceedingly hard, and breaks with a glassy fracture and sharp edges. When pieces of it are struck together, or against steel, sparks are emitted, and this method of obtaining fire has been used from the earliest times. It is probably alluded to in 2 Mac 10^3. Flints are often dark coloured owing to impurities. Their origin is one of the problems of geology not yet completely solved, but it is supposed that the siliceous framework of certain marine organisms was dissolved, and afterwards deposited in cavities, or actually substituted for the material of other organic remains.

A great part of Palestine and the Sinaitic peninsula is composed of Cretaceous strata, which pass on the W. into Nummulitic (Eocene) limestone. In both of these formations flints are found; and in some of the strata, especially those which line the Jordan Valley, they are particularly abundant (Green, *Physical Geology*, 231–33; Hull, *SWP* 61).

JAMES PATRICK.

FLOCK.—Four Heb. words are tr^d flock:—

1. עֵדֶר *'êder*, ποίμνιον, ἀγέλη. This word, when used alone (Gn $29^{3.8}$, Jg 5^{16}, 1 S 17^{34}, Ps 78^{52}, Ca 1^7 etc.), usually signifies a *flock* of sheep or goats, or both mingled. It corresponds to the Arab. *ḳaṭi'*. The exception to this is in Gn $32^{16.19}$, where it is tr^d *drove*. עֶדְרֵי צֹאן (Gn 29^2, Jl 1^{18}, Mic 5^8) signifies *flocks of sheep*, and עֶדְרֵי בָקָר, in the same sentence in Jl, is *herds of cattle*, and עֵדֶר הָעִזִּים (Ca 4^1 6^5) *flock of goats*. עֵדֶר יהוה (Jer 13^{17}) is the *flock of J"*, that is, *God's people* (cf. Zec 10^3), and עֵדֶר הָרְחֵלִים (Ca 6^6) a *flock of ewes*. מִגְדַּל עֵדֶר the *tower of 'êder* (the *flock*) (Gn 35^{21}) is a place near Bethlehem, mentioned again (Mic 4^8) as the 'hill' (marg. 'Heb. Ophel') of the daughter of Zion. Some suppose it to have been a tower on the hill Ophel at Jerusalem. If Ophel be Zion, the allusion would be perfect in its details. See HERD.

2. צֹאן *ẓô'n*. This word, which means *sheep*, is the original of most of the passages in OT tr^d *flock*. It corresponds to the Arab. *ḍân*, but *ḍân* refers to *sheep* as distinguished by having wool, from *goats*, which are known by the name of *ma'z*. *Ẓô'n* may include both, Gn 38^{17} RV (cf. AV) 'I will send thee a kid of the goats from the flock' (*ẓô'n*). In some cases the context makes it clear that it does not include both, as in 1 S 25^2 'he had three thousand sheep (*ẓô'n*), and a thousand goats (*'izzîm*), and he was shearing his sheep (*ẓô'n*) in Carmel.' Where *ẓô'n* and *bâḳâr* are mentioned together, they are always tr^d *flocks* and *herds*. It would be better, in every case where the context does not clearly demand the rendering *flock*, to translate *ẓô'n sheep*.

3. מִקְנֵה הַצֹּאן *miḳneh hazzô'n* (Gn 47^{17}), is tr^d AV, RV 'flocks,' RVm 'cattle of flocks.' It would

have been better rendered *possession of sheep*, and *miḳneh habbâḳâr*, in the same verse, *possession of oxen* (cf. Ec 2^{7}).

4. מִקְנֶה *miḳneh* (Ps 78^{48}), is tr^{d} AV, RV 'flocks.' It is elsewhere generally rendered 'cattle'; once 'possessions' (Ec 2^{7}).

The NT words for flock are *ποίμνη* and *ποίμνιον*, the latter of which is used exclusively in a fig. sense of the Church (Lk 12^{32}, Ac 20^{28}, 1 P 5^{2} etc.).

G. E. POST.

FLOOD (Gn 6–9^{17}).—A story connected with the early history of man, which tells how, in consequence of their sins, especially those of violence, God destroyed by a flood the whole race, excepting only Noah and his family and two (or seven) pairs of every animal. These were saved in a huge ark or chest, which Noah had been directed to make when first warned of the coming flood. As the waters were abating, Noah sent forth a raven which did not return, and afterwards a dove twice at a week's interval, in order to ascertain whether the ground was dry. This was shown to be so by the dove returning the second time with an olive leaf in her mouth. The ark finally settled on Mt. Ararat. On leaving the ark, Noah offered up a sacrifice which appeased God, who promised never again to destroy the earth with a flood.

Simple and uniform as this story appears, it is a fact admitting of no reasonable doubt that the account of Genesis is really composed of two Flood stories, which, while agreeing in general purport, differ considerably both in character and detail. One belongs to the early source of the Hexateuch known as J, the other to the post-exilic P. They may be clearly distinguished here by the names of God and other well-known characteristics of these documents. The sections ascribed to J in Kautzsch's *AT* are $6^{1\text{-}8}$ $7^{1\text{-}5.\ 7\text{-}10.\ 12.\ 16b\text{-}17.\ 22\text{-}23}$ $8^{2b\text{-}3a.\ 6\text{-}12.\ 13b.\ 20\text{-}22}$, to P $6^{9\text{-}22}$ $7^{6.\ 11.\ 13\text{-}16a.\ 18\text{-}21}$ 7^{24a}–8^{2a} $8^{3b\text{-}5.\ 13a.\ 14\text{-}19}$ $9^{1\text{-}17}$ (on $7^{8.\ 9}$ see below). It will be sufficient to notice that in P we find the minute directions regarding the construction and size of the ark, the blessing of Noah, the laws against murder and eating blood, the covenant of the rainbow; in J only we have the picturesque narrative of sending out the raven and the dove, and the sacrifice of Noah, which so pleased J″ that He determined never again to curse the ground. In some respects the accounts of J and P contradict each other. (*a*) According to P one pair of *every* kind of animals is to be selected ($6^{19\text{-}20}$), according to J seven pairs of clean and two of unclean ($7^{2.\ 3}$). But in $7^{8.\ 9}$, where the actual entry is made, a reviser has, it would seem, combined the statements of J and P so as to agree with P. As it stands, the distinction between clean and unclean animals in that verse is purposeless, and indeed has the effect of emphasizing what appears like an act of disobedience on Noah's part, who took only one instead of seven pairs of clean animals as directed in 7^{2}. In J this verse must have run much as follows: 'Of clean beasts, seven and seven, of unclean beasts, two and two, went unto Noah into the ark.' In P the statement was probably, 'Of the fowl after its kind, and of the cattle after its kind, and of everything that creepeth upon the ground after its kind, two of every (sort) did he bring into the ark, as God commanded Noah.' (*b*) According to P it was 150 days before the waters began to subside (8^{3}), and it was 8 months and 13 days before the tops of the mountains were visible (cf. 7^{11} and 8^{5}), and a whole year and 10 days before the earth was perfectly dry (8^{14}). According to J the duration of the Flood was only 40 days (7^{12} 8^{6}), and even before this the water had considerably abated ($8^{2b.\ 3a.\ 6\text{-}10.\ 12.\ 13b}$). (*c*). What is in P a covenant with Noah that the waters should 'no more become a flood to destroy all flesh' (9^{15}), is in J the self-deliberation of J″ in consequence of Noah's sweet-smelling sacrifice ($8^{21.\ 22}$). See HEXATEUCH.

I. HISTORICITY OF THE FLOOD.—Until comparatively recent times the belief in a deluge covering the whole world and destroying all men and animals except those providentially preserved in the ark was practically universal among Christians. The fossil remains of marine animals, and the Flood traditions common to people in so many different parts of the world, were confidently appealed to as establishing the truth of the Bible story. Our increased knowledge of geology on the one hand and of comparative mythology on the other have now shown the little value of such evidence, and on these and other grounds this belief has been now surrendered by most biblical scholars as untenable. (*a*) It has been frequently pointed out that the whole quantity of moisture contained in the world, whether in an aqueous or vaporous form, if all reduced to water, would not be nearly enough to cover the highest mountains, supposing that the earth's surface was in anything like its present condition. But there is no evidence or scientific probability that the whole surface was ever so contracted or so levelled as to admit such a possibility. (*b*) Again, a thorough examination and a comparison of the numerous Flood myths make it impossible to refer them all to one single event. (*c*). Anthropological science points in the same direction. The diversity of the human race and of language alike makes it extremely improbable that men were derived from a single pair, and this, together with what we know of the early civilization of man, makes it impossible that a universal Flood should have occurred within at least many centuries of the time assigned by biblical chronology. The early relics of primitive man found in caves, ancient graves, etc., all over the world, point to an unbroken succession of human beings, their advance in civilization developing by gradual stages, and the whole extending over many thousands of years.

(*d*) But, after all, the most obvious difficulties are those which lie on the surface in the narrative itself, supposing that it describes a flood extending over the whole world *as we now know it*. Noah is said to have collected together animals of every kind, one pair at least of each. Let us try to imagine the long journeys necessary to different parts of the world, including the Tropics and the Arctic Regions, and that in an age when the difficulties and dangers of travelling must have made it almost impossible, and the difficulty of capturing and bringing home the animals when captured. How many years will it still take the Royal Zoological Society, with all the resources of modern civilization, to collect even *single* specimens of all the known larger animals of the world, to say nothing of the hundreds of species still unknown, nothing of the myriads of insects, *crustaceæ*, etc., included in the 'creeping things' of the Bible! Again, the dimensions of the ark could not possibly have allowed room for the housing of all the creatures; for, supposing that they were shut up in separate cells ('nests,' Gn 6^{14} RVm), almost as much space would have been required for passages to get at them as for the cells themselves. We have also to take into account the immense amount of room required for the storage of food, especially that needed for the larger animals, such as hay for the elephants, and animals of different sorts for the *carnivoræ*, besides all the food necessary for some time after the Flood, before revived vegetation should make fresh food procurable. Even if we could suppose that the dimensions of the ark permitted all this, how would it have been possible to keep all these animals alive? The polar bear would have required very different conditions from the tiger or the boa-constrictor. How, again, is it conceivable that eight persons should have been sufficient to attend to the wants of all these animals, as well as to their own? But besides all this, there is no provision for making the ark seaworthy. It is merely a huge wooden box liable to capsize, and quite incapable of weathering a storm. The difficulties here pointed out readily suggest the true answer. The Flood was not in the writer's view universal, as we should understand a universal Flood, simply because the world he is writing of is a totally different world from ours. It is a very little world. Men and animals are all living within easy reach of each other. Man is still the lord of creation. He can gather together the animals to be saved, whether beast of the field or fowl of the air, at his will. No difficulties, even such as would have occurred in the writer's own day, have any place in that ideal world of the distant past, where holy men walked with God, and there was no need of miracles, because everything was of course so different. That the writers and compilers of Genesis sincerely believed the story we need have no doubt, but in the light of scientific and historical criticism it must be frankly recognized as one of those many stories or legends which are found in the folk-lore and early literature of all peoples.

II. The Relation of the Bible Flood Stories to similar Stories of other Peoples.—It was formerly supposed that the many Flood stories found in different parts of the world were all traditions of the Bible Deluge brought by various peoples from the ancient cradle of the human race. A comparison, however, of the stories with one another and with the Bible narrative makes it quite clear that they stand severally in a very different relation to the latter, and are due to many different causes. We may roughly divide these stories, according to their resemblance to the Flood story of Genesis, into the following classes:—

i. First and foremost stands the *Babylonian or Accadian* account of the Deluge. This is so like the Bible story, both in its general drift and many of its details, that it cannot be other than a different version of the same. The Babylonian legend itself exists in two forms. One is contained in the fragments of Berosus, an Egyptian priest of the 3rd cent. B.C., who wrote a history of Babylon. The second is contained in a cuneiform inscription on tablets preserved in the British Museum, and first deciphered by George Smith in 1872.

(*a*) Of these the first is very short and of comparatively little importance, except that some differences of detail in comparison with the other prove that the Babylonian story had a wide currency. The main differences are the clay which Xisuthros, the hero of the Flood, finds on the legs of the birds when they return for the second time, and the translation of Xisuthros' daughter and the pilot of the ship, as well as that of Xisuthros himself and his wife.

(*b*) The story of Berosus is altogether thrown into the shade by the far fuller and more circumstantial account found on the Accadian tablets. These contain an epic poem in 12 parts. Each part is connected with a sign of the Zodiac, and the 11th, containing the Flood story, has the sign corresponding to Aquarius, 'the water-bearer.' In this part the deified Ṣît-napišti, or, as the name is sometimes written, Khasisadra (Xisuthros), communicates the history of the Flood at the mouth of the Euphrates to his grandson Gisdubar (the Nimrod of Genesis). Ea, the god of wisdom, reveals to Ṣît-napišti the intention of the gods of Surippak—Anu, Bel, etc.—to bring a Flood, and commands him to build a ship, and save what he can of the germ of life. Ṣît-napišti expostulates on the absurdity of building a ship on dry land, but finally consents. The making of the ship is then given in some detail, among other things its dimensions (according to G. Smith, 600 cubits long, 60 broad, 60 high; omitted by Sayce), *and the pouring of bitumen over its sides, inside and out.* Food was brought into the ship, including beer and wine, and also all that he had of gold and silver. 'Slaves and concubines, the cattle of the field, the beasts of the field, the sons of the people: all of these did I bring up.' The ship was built by the help of the sun-god Samas, who fixed the season for the Flood on the evening before Ṣît-napišti *shut the door.* A highly poetical description is then given of the storm, brought about by the direct agency of the gods of wind, water, etc., so terrible that even the gods trembled and sought refuge in the heaven of Anu, where they crowded in a heap 'like a dog in his kennel,' and gods and goddesses wept for pity. For six days and nights the storm continues, and subsides on the seventh. The sea begins to dry. Sît-napišti opens the windows and sees the corpses floating on the water. On the horizon he sees land, and the ship is steered for the mountain of Nizir, which it reaches the second day. *On the seventh day after this he sends forth a dove, which finds no resting-place and returns*; then a swallow, which does the same; and lastly *a raven, which feeds on the carrion and does not return.* The animals are sent forth to the four winds, and *a sacrifice is offered on an altar which he builds* on the peak of the mountain. The gods *smelt the savour*, and 'gathered like flies over the sacrifice.' Thereupon the great goddess *lighted up the rainbow* which Anu had created. Bel, angry with the gods that his will had not been fully carried out, alone refused to come to the altar. He stayed by the ship and would have stopped the exit of the survivors; but Adar explained that Ea had revealed the counsel of the gods to Ṣît-napišti. Then Ea himself expostulates with Bel for wishing to destroy the faithful with the sinners. Better at any rate to send wild beasts, or famine, or plague. After all, it was only by a dream that he had revealed the determination of the gods. Then Bel enters the ship and very graciously *makes a covenant with Ṣît-napišti*, saying that henceforth he and his wife are to be as gods, and Ṣît-napišti is to dwell at the mouth of the river. (Sayce, *Fresh Light*, ch. ii.)

This story is said by experts to be as old at least as 3000 years B.C. That the early Hebrews derived the story from Babylonia, and not *vice versâ*, may be considered a practical certainty. While Babylonia from the days of the Patriarchs was highly advanced in civilization, the Jews, even far down into their history, were comparatively simple and far less civilized even than the Canaanitish tribes, who themselves derived their culture from Babylon. The Babylonian language and script had already before the Exodus become naturalized in Palestine, and been made, as the Tel el-Amarna tablets show, the official means of communication between the Babylonian court and the various Canaanitish tribes. Thus there was more than one channel by which a popular story of Babylonia might become part of Jewish folk-lore. At the same time the variations in the story suggest that it is likely to have passed through many mouths before it reached its Bible form. Even the differences in its religious character are more probably due to gradual changes of thought and feeling than to a single literary process. It is, however, quite possible that if several variations of the story were, as is probable, current, some few particulars in the Bible story may be actually more original than in the Accadian version. The sending out of the birds in the latter is rather pointless, as the non-return of the raven, which fed upon the corpses, proved nothing. Both the J and P stories are derived from the Babylonian, each document selecting for the most part, and sometimes enlarging upon, those details which best accorded with its own character and aim.

ii. A very large number of Flood stories bear only a very general and probably accidental resemblance to the biblical or Accadian Deluge. The mere fact that a legend has to do with a flood, even though it be a universal one, is not enough to constitute any real relationship to the Bible Deluge-story. For such legends can be proved to have arisen from several different causes. These causes may be roughly divided into three classes: **1.** Some theory of Creation which connects it with water as perhaps a creative element. Flood stories dealing with Creation bear comparison with 'the deep' of Gn 1^2 rather than with Noah's Flood. Thus the Binnas in the Malay Peninsula held that the earth was originally completely covered with a hard crust. God in early ages broke through the crust, so that the water covered the whole world. Out of the water He afterwards let rise Mt. Lulumet and other hills, as well as the plain on which the Binnas now live. This conception of the centre of the world as a vast body of water we find again in a Flood story of the Acawoio (British Guiana), and is probably to be understood in the biblical phrase 'the water under the earth' (Ex 20^4), the idea being that the land floated on the water.

2. Most frequently, however, the Flood story is the highly coloured tradition of some historical event or extraordinary natural phenomenon.

A. *Among island and coastland peoples* (*a*) the early settlement of their ancestors, who came in boats across the ocean. In such stories the particular land in which they live was the land of refuge from the great Deluge. In the story of the Binnas this tradition is combined with the notion of Creation. The primeval man and woman were created in a boat, which moved over the waters until at last it stranded on dry land. (*b*) The appearance or disappearance of an island by a volcanic eruption. Thus the inhabitants of the Minahassa (the northern volcanic peninsula of Celebes) relate that the land originally rose out of a flood; and the stories of the Fiji and Pelew islanders appear to have originated from the disappearance of islands by volcanic action. (*c*) A tidal wave resulting from an earthquake. The Flood story current among the Eskimo in the Prince of Wales Peninsula is expressly connected with an earthquake. In a story of the Makah Indians (Washington Territory) it is related how the water flowed into the land from the Pacific, until Cape Flattery became an island. Similar features are found in the stories of some other Indian tribes—among them the Araucanians (in Chili), with whom the Flood is the result of an earthquake accompanied by volcanic eruptions.

B. *Among inland peoples* the causes of Flood stories are (*a*) very frequently the overflow of some river, especially where, by the bursting of its banks, a large plain is inundated. This is the case in China, where, however, the Flood stories have hardly passed out of the region of sober history into that of myth, and deal with floods similar to those which have been known to have taken place,—the last two during the 19th cent. in 1852 and 1881. In the second of these no fewer than two millions are said to have perished. The Chinese Flood stories, then, are evidently not derived from Babylonia, and we should avoid yielding to the temptation of appealing to the early connexion in language and script between China and Babylonia.* (*b*) The formation of a lake or inland sea, or its disappearance by the water eating out a channel for itself through soft rock, such as limestone. Livingstone tells a legend describing how the Dilolo Lake in Central Africa (on the southern border of the Congo State) came into existence as the consequence of a woman's curse pronounced upon a native chieftain who refused hospitality. The inhabitants of Thibet relate how once a flood covered the whole country and destroyed the ape-like inhabitants. By the compassion of a god the waters were drained off, and the new people taught civilization. In Santa Fé de Bogotá in Colombia there is a story that there was once a huge flood brought about by the witchery of a wicked woman, who caused the Rio de Bogotá to overflow and fill the basin-like plain of Cundinamarca. Her good husband changed her into the moon, and opened the present outlet through the limestone rock by which the water now flows down over the Falls of Tequendama (cf. Schwarz, *Sintfluth*, noticed in *Expos. Times*, viii., 1897, 271 f.). (*c*) The melting of the winter snows. In the district of the Indian tribe of the Chippewas there is a story telling how a mouse once gnawed through the bag which held the heat, and this escaping, the melting snow became a flood, which covered the whole world.

3. Not infrequently, and sometimes in connexion with one or more of the causes already mentioned, the Flood story appears to have originated in an attempt to account for some otherwise unexplained fact, as—(*a*) The dispersion of peoples and difference of language. This is especially frequent among, if not indeed peculiar to, the Indian tribes of N. America. Among the Thlinkeets in the North West the difference of speech between them and the rest of mankind is naïvely accounted for by the breaking of the ark in two, their ancestors having been in one half, those of all other races in the other! More frequently, the dispersion is the result of the boats drifting away in the waters of the Deluge, as, *e.g.*, with the Bella Coola Indians (between 52° and 53° N. lat. on the coast of the Pacific). The ancient rock-carvings found among the aborigines of Mexico, in which, as it is said, a dove is depicted distributing gifts of speech in the form of tongues to the survivors of the Flood, would be a striking illustration of this kind of Flood story, could we be certain that this interpretation of it is correct; but it is at least doubtful. (*b*) The red colour of some of the N. American tribes. This colour is, according to the Crees, the direct consequence of the Flood, the Red Indians of to-day being the descendants of the single woman who was rescued, when the waters had all but covered her (see below, III. 9). On the other hand, the Herero, a native tribe of South Africa, relate that it was the Flood that brought to their ancient home the white man and woman from whom they are descended; hence their pale colour. (*c*) The existence of fossil remains on dry land, and even on hills. It is curious that the same evidence which, from the days of Tertullian at any rate, has been frequently adduced as evidence of the Bible Flood has been appealed to by several different peoples as evidence of their own Flood stories; and if the remains did not in every, or perhaps in any, case actually give rise to the story, they certainly helped to give it credence and permanence. With the Leeward islanders the mussels and corals on their hills are a standing proof of an ancient flood, in which all but one small coral island were immersed. The Samoan islanders call attention to the fish which have been turned into stone; and the central Eskimos of N. America can still see the outer shells of many mussels, fish, sea-dogs, and whales which were left upon the dry land by the Flood. (*d*) The same Eskimo tribes give a similar explanation of glaciers. They are the icebergs left on the tops of the mountains by the receding waters.

---

* See, *e.g.*, 'The Origin of Chinese Culture and Civilization,' Lippincott's *Monthly Magazine*, June 1890; De Lacouperie, 'The Old Babylonian Characters and their Chinese Derivatives,' in *Bab. and Oriental Record*, March 1888; and 'New Accadian' Papers by Ball in *PSBA*, Nov., Dec., 1889; Feb., June, 1890.

It is also important to observe that the cause of the Flood story has very often a special connexion with the locality to which it belongs. Thus we notice that the melting of the ice is a frequent cause with the extreme northernly tribes of N. American Indians. Earthquakes are a common feature in the Flood legends of tribes on those coastlands of America where they frequently occur. The submergence or emergence of islands accounts for those of tribes inhabiting volcanic districts. In China the Flood stories are associated with the bursting of the banks of the great rivers where such events occur, and are accompanied with great loss of life and property. Still more remarkable is it, on the other hand, that in Africa, where the overflow of the great rivers is a regular and expected phenomenon, and, in fact, has become necessary to cultivation, and therefore cannot be considered as the result of *special* divine agency, Flood stories are singularly rare, and never of this kind.

iii. Very frequently an old myth has become mixed up with, or at any rate coloured by, the Babylonian or Bible story. Thus the account of the Grecian Flood (Deucalion's) as given in the *de Deâ Syrâ* of the pseudo-Lucian, a writer of the 2nd cent. A.D., differs from the earlier form of the story as contained in Ovid (*Met.* i. 163–437), for instance, by the addition of several details belonging to the Babylonian and biblical stories, such as the name Sisythes (=Xisuthros), the building of a chest, the saving in it of Deucalion's family and pairs of every animal. Plutarch similarly introduces Deucalion's sending out the dove to ascertain the *weather* (!), according as it returned or remained behind. This colouring is probably, however, in most cases due to the teaching of Christian missionaries, who would naturally emphasize and unconsciously, or perhaps even intentionally, exaggerate points of resemblance between native folk-lore and Bible stories. Andree (see *Literature* below) quotes a story to show how easily the Bible Flood could find its way into the folk-lore of an imaginative people. A missionary heard a Flood story from a native Hottentot which bore a suspicious resemblance to that of the Bible, and yet he was assured that it had been handed down from early ages. Shortly after he met another missionary, who told him that he had himself taught the native the Bible story. It is not always easy to say positively that a legend has been influenced by the Bible Flood, but in the following cases it may be considered highly probable:—(*a*) When the legend resembles the Bible story in one or more definite particulars, but in general drift or in its more important features differs widely from it. In that of the Mandari (a branch of the Kohls, East India), the flood out of which a brother and sister only had been rescued under a tree, is put an end to by the serpent Lurbing, *in connexion with whom appears the rainbow.* In the Lithuanian story the rainbow is sent to comfort a pair of wretched survivors, and counsels them to obtain offspring by jumping over the bones of the earth. The Lummi Indians (north of Washington Territory) have a story that an old man escaped on a raft to a mountain, and *thence* twice sent forth a crow, which returned the second time with a leaf. (*b*) When the parts corresponding with the Bible story break the context, and do not fit in well with the rest. This is obviously the case with a story of the Algonquins (an Indian tribe of N. America), preserved in a very curious pictographic document, where, in the middle of a passage describing how some of the people were rescued on Turtle Island, the mention of a boat, as though an independent means of rescue, is very awkwardly introduced. (*c*) Where two forms of the story exist, in one of which the biblical features occur and in the other are absent. When, as with Deucalion's Flood, the former is known to be later, the probability of interpolation may be considered a certainty. Among the Mandans, an Indian tribe on the Missouri River, according to a current Flood legend the ark is a tower-like building, and the supposed model of the building, which is preserved as a relic in a public place, is in shape like a wooden cylinder. But not only is this model called 'the great canoe,' but, in the festival which commemorates the Flood, the representative of 'the First Man,' who was saved therein, tells how 'the great canoe' stranded on a high mountain. Moreover, the festival is always arranged to take place when the willows are in leaf, because, so they say, it was a branch of that tree, with all its leaves on, which the bird brought back to the ark. It is clear that we have here a confusion between two stories—an ancient legend according to which the survivors were saved in a tower, and the Bible Flood. (*d*) Where the Flood legend is mixed up with other stories from the Bible. Thus in that of the Papagos (an Indian tribe, east of California), Montezuma, the hero of the Flood, is so ungrateful to his deliverer, that he presumes to build a house whose top is to reach to heaven, whereupon the great Spirit sends his thunder and destroys the building. This evident borrowing from the Tower of Babel story makes us suspect that his sending out the jackal after the Flood to see how far the land extended, originated in the sending forth of birds from Noah's ark. In one of the Mexican legends, current in the neighbourhood of Cholulu, an artificial mountain, raised as a memento of the mountain in the caves of which the seven giants were saved from the Flood, threatened to reach to heaven, whereupon the gods sent down fire and destroyed several of the builders. This legend, connected with a half-finished pyramid, shows how readily Bible stories found their way among the aborigines of Mexico, and explains why features of the Bible Flood so often occur in the Flood myths of various Mexican tribes. In the story of the Mandari, above referred to as giving special prominence to the Bible feature of the rainbow, the creation of man *out of earth* stands in close connexion with the Flood. Similarly, the Flood story of the Macoushi (near British Guiana) relates how the first man found, on waking out of a deep sleep, a woman standing by his side. After this we can feel very little confidence in the originality of the statement that after the Flood the rat sent out by a survivor returned with an ear of maize in its mouth. This is evidently nothing else but a local adaptation of the dove and the olive branch. (*e*) The stories of the Papagos and Macoushi give another ground for suspecting biblical influence, namely, where some well-known features of a class of Flood legends appear so changed as to agree with the Noachian Deluge. The object of the sending forth of animals in the Indian stories is, as a rule, to obtain earth to create dry ground for the survivors. A rat is sent forth as well as other animals for this purpose in the legend of the Ojibways and the Chippewas, a fish in those of the Sac and Fox Indians. But in the stories of the Papagos and Macoushi the object is, as in the Bible, to discover the extent of dry land.

In some cases, however, the appearance of biblical details may be after all a mere coincidence. The likelihood of such coincidence becomes far greater than we might have thought when we take into account the very large number of Flood stories and the singular variety of detail. The following is an attempt to give as shortly as is practicable some idea of the extraordinary extent of this variety.

III. VARIETY OF DETAILS IN DIFFERENT FLOOD LEGENDS.—(1) *The Beings destroyed by the Flood* are often described as strange or unnatural beings, such as baneful monsters (Persian *Bundehesh*); ape-like men (Thibet); descendants of a primeval man and woman, who were drowned in the sea and became a whale and a crab; the descendants appear, however, to have been human in form, at any rate capable of religious and moral delinquency (Andamanese); giants (later Scandinavian *Edda*); men, one tribe of whom consisted only of women, another of men with dog-like tails (Fiji islanders); gods of the earth upon whom the Flood was sent at the request of the nether gods (the Sac and Fox Indians); a demigod (Ojibways, see above); imperfect men (Quiché Indians of Guatemala); the descendants of gods and men (Miztecs of Mexico, cf. Gn 6^{1-4}).

(2) *The reasons for the Flood* are differently given. Very frequently to get rid of these monstrous forms of life (in the *Bundehesh* a second Flood is necessary to purify the world of the poison which the monsters still left behind them); as in the Bible, to punish men for their wickedness (Andamanese); or, more frequently, for some definite crime or offence, as the refusal to wash and work (Mandari); killing and eating a huge serpent (Dyaks of Borneo); cooking a fish in violation of a sacred promise (Gipsies of the Sieben Gebirge); the crime of the demigod Menaboshu against the water-serpents in killing their king and three sons in revenge for the destruction of his little pet wolf (Ojibways); the inhospitality of a local S. African chieftain towards a woman who, in consequence, brought about a local flood through her incantation (Dilolo Lake); the insult perpetrated on a sea-god by a fisherman who fished in sacred waters and caught the god by his hair (Leeward Islands); the injury done to the raven by 'the wise man,' who had punished it by throwing it into the fire (Hare Indians, North America). In one case, as already noticed, the Flood is the result of a quarrel between the gods of the nether and upper world (the Sac and Fox Indians).

(3) The *direct cause of the Flood* is usually the rise and overflow of the sea, or of some river or lake; rather less frequently a prodigious storm and rainfall. An exceptional case is the melting of the winter snow (Chippewas, see above, II. 2 B *c*). Once it is occasioned by the blood flowing from a slaughtered giant (later *Edda*). Occasionally, the Flood consists of hot water (Finns). In the legend of the Quiché there is a second Flood of resin after one of water, and occasionally fire takes the place of water (so with the Yuracarés in Bolivia, among whom a legend of this sort has many parallels with the Flood stories of other peoples). In an Eskimo story the people are destroyed by heat as well as by the water. In one case the Flood is caused by the accidental breaking of a jar (examined through curiosity) containing the waters of the ocean (Haiti Island). Similarly, a flood is caused by an inquisitive ape taking away the mat placed in a hollow tree to stop up the water which communicated with the water beneath the earth (Acawoio, British Guiana).

(4) The Flood generally seems to have come *unexpectedly*; but sometimes *the survivors were forewarned*, as a rule by a god, but occasionally through the medium of animals. In the sacred books of India it is the fish, which is no other than the incarnate Vishnu, or, in one form of the legend, even the great Brahma himself. In the legend of the Cherokee Indians (N. America) it is a dog which tells his master, having first attracted his attention by standing up to his neck in the water and refusing to stir. In one of the Peruvian stories it is the llamas which warn their shepherd. He had noticed that they looked sad and gazed at the stars, upon which he inquired the cause, and was told of the coming Flood.

(5) The Flood is generally represented as *universal*, though originating in some definite place; but sometimes it is purely *local*.

(6) Men are usually *drowned*, but in one legend some of them are devoured by sea-monsters (Algonquins). In several of the Peruvian Flood stories they are changed into fish, and in one instance the dead bodies become salmon and frogs (Maidu, near Sacramento).

(7) The *number of survivors* varies very greatly in the different stories. Where the inhabitants of the world are monsters, they are, of course, all destroyed. Sometimes even men are all destroyed, and a new set of men created. Sometimes, on the other hand, they appear to have all escaped (Kabadi, a south-east district of New Guinea). As a rule, the survivors are very few, most frequently a single family, or even less; in several cases only one man or woman. Once it is only the coyote (prairie-wolf) of all living beings (Wappo, California); in another story it is the coyote and the demigod Montezuma (Papagos); in another the raven and his mother (Thlinkeets, Indian tribe of N. America, see below, III. 9).

(8) *The reason why the particular survivors were permitted to escape* is generally left unexplained. But when it is explained, it is usually, of course, because they had no part in the cause for which the Flood was sent. Thus in the Gipsy legend (see above, III. 2), while the wife who cooked the fish is struck by the first lightning flash of the storm which preceded the Flood, the husband, who was faithful to his promise, was saved. In the legend of the Leeward Islands (see above, III. 2), however, by a strange want of poetic justice, the penitent fisherman succeeds in appeasing the wrath of the god, and he and his family alone escape.

(9) The *methods of escape* exhibit also great variety. In many cases it is by fleeing to a mountain or an island, the latter generally being left unimmersed by the rising water, not so much from its elevation as from its sacred character (Algonquins, Victoria, Leeward Islands, Greece, etc.). Sometimes the place of refuge is the top of a tree (Karens in Burmah, Tupi in Brazil, Acawoio in British Guiana), or underneath (!) a tree (Mandari), or in caves (Mexicans of Cholula); once in the hole of a huge crawfish in a rice field (Uraus, a branch of Kohls); in a tower expressly built for the purpose (Mandans, see above, II. iii. *c*). The most usual method of escape, however, is by a boat or raft of some kind. In one of the Fiji stories, two gods themselves come in a boat, and fish the drowning bodies out of the water. The raft or ship is usually allowed to drift, but sometimes, as in the Accadian story, it is regularly steered. In the legends of India it is towed by the god-fish with a rope tied to his horn. Sometimes, to prevent its drifting away, it is secured by a rope, fastened either to a stone acting as an anchor (Kamtschatka), or, more frequently, to a tree (Pelew islanders, Twanas of Puget Sound, Washington Territory). Occasionally, as in the Bible story, the means of escape is a floating chest (Banar in Cambodia); in one legend

a nut-shell, which conveniently fell from a god, who was eating nuts in heaven during the Flood, on to the topmost peak of a mountain, whither men had fled for refuge (Lithuanians). Usually, as in the Accadian and Bible stories, the ark lands on a mountain; but, curiously enough, in some of the Persian legends the mountain of refuge itself floats like a boat. Other means of escape are still more quaint. In one legend the raven and his mother, presumably in a pre-raven state of existence, put on birds' skins and fly up to heaven, which the former, in his impetuosity, hits so violently that his beak gets stuck. In this predicament he is obliged to wait till the waters reach him (Thlinkeets). In another the single surviving maiden succeeds in catching hold of a bird, which flies up with her to a rock of safety (Crees).

(10) The Flood usually *disappears* by subsidence or evaporation; but, in isolated instances, it flows away down a hole (Deucalion's Flood, Tinney Indians), or into a rift in a mountain, and so finds its way into the sea (Maidu).

(11) The survivors in several legends *send out animals* from their various retreats, usually to dive down into the waters, that they may get earth, out of which new land is created. Of this we have a characteristic example in the story of the Ojibways, in which the surviving Menaboshu, after having stood on the topmost peak of a mountain for five days, with the water up to his mouth, in despair prays a passing sea-gull to dive down and discover whether the land has been entirely washed away. After the gull has dived several times to no purpose, Menaboshu sees the stiffened body of a musk-rat floating by. Having restored it to life, he sends it down on a similar quest. After a long while the dead body of the musk-rat appears on the surface with a few grains of sand in its claws. These Menaboshu throws on the water, and they become little islands, which grow and join together until they form habitable earth. In the stories of the Sac and Fox Indians, it is a fish which returns with its huge mouth full of earth; in that of the Chippewas, the beaver, otter, musk-rat, and northern diver, all dive down, and the last returns with mud in its webbed feet. Sometimes, as in the Bible, and presumably the Accadian stories, the animals are sent forth to discover whether or where the land is dry (Papagos, etc., see above, II. iii. *e*).

(12) The survivors, *hard put to it for food*, sometimes feed on fish, which they either cook by putting them under their armpits (!) (Tolowa in California), or with fire procured by rubbing sticks together, at which the god is angry, and turns the fish into dogs (an old Mexican story in the Codex Chimalpopoca). Fire is obtained in a similar way in the legend of the Dyaks of Borneo. In the Andamanesian story an arctic bird sends down a firebrand from heaven. In one of the Peruvian legends, meals are provided for the two surviving brothers by two parrots.

(13) There is a very curious variety with regard to the *methods by which the world was re-peopled after the Deluge.* When all the inhabitants were destroyed, there was, of necessity, a new creation. Most frequently, as in the Bible, the new men were simply the offspring of the few survivors, but in several legends they appear as propagated in some strange and miraculous manner, as by stones thrown over the survivors' heads (Deucalion's Flood, Acawoio and other Indian tribes on the Upper Orinoco). In one story cocoa-nuts are thrown with a similar result (Maypuri and neighbouring tribes of S. America). In the Lithuanian story men come into being by the survivors leaping over the bones of the earth. According to the Pelew islanders, it was by intercourse of the gods with a woman whose dead body was brought to life, and indwelt for a time by a goddess. Another legend ascribes it to the union between the single surviving maiden and a great eagle (Crees). Still more curious is the legend of the Wappo, who ascribe the re-peopling of the world to the coyote, which planted the tail feathers of various birds in the places where wigwams formerly stood. According to the Tinney Indians, it was brought about by the gods changing animals into men.

(14) The deification of Xisuthros after the Flood in the Accadian story has hardly a parallel in the myths of other peoples. Sometimes the survivor is already a sort of god (Papagos). In the story of the Pelew islanders the gods wish to deify the last woman, whom they had already restored to life, but are prevented by the malice of the bird Tariit (*Rallus pectoralis*).

If we now examine these legends in connexion with their locality, we shall find that features which repeat themselves (leaving out of consideration what has been borrowed from the Bible story) in several legends are of two kinds: (*a*) those which characterize the legends of neighbouring or related tribes; and (*b*) those which appear sporadically, so to speak, in far separated peoples. As examples of the first we may notice, generally, the tendency to combine Flood stories with animal fables common to almost all tribes of American Indians, and more especially the fables of the coyote, the jackal, and the raven, each of which marks off a definite group of tribes. We may instance also the floating mountain, which is confined to the neighbourhood of Peru. In many cases the second class belongs to the form which the legend would be most likely to take. It is more likely that men would escape a flood by going up into a mountain, or by means of a boat or raft, than in any other way, and therefore we find this to be most frequently the case. But when we consider the great multiplicity of stories, it is not at all surprising that, in a few isolated cases, the imagination of different peoples should independently hit upon the same idea. Where so many methods of escape suggested themselves, it might easily have occurred to more than one people that the boat of safety was like a chest, or, again, that the boat was tied by a rope. In the same way we may account for the really far stranger incident, the subsequent creation of men out of stones.

It is of the greatest importance to notice that this second class of similarities is by no means confined to features contained in the Bible story. Those who argue for the truth of the latter on the ground that several of its details are confirmed by other legends, are in danger of proving too much. The same argument makes equally for the truth of other details not found in the Bible. If all these stories are really the traditions of one single event, does not the evidence point to a boat rather than an ark, if indeed the survivors did not merely ascend a mountain; and is not the statement of the boat being moored by a rope, which appears in legends so widely scattered, at least as probable as that of the sending out of animals, on the presence of which, in different legends, so much stress is often laid? For, as a matter of fact, the stories which contain this feature are often liable to the suspicion of a Christian colouring on the grounds above given, and indeed it is just this picturesque touch which would inevitably most strike the imagination, and most easily find its way into the popular stories of a people. It must also be borne in mind that there is a vast difference between *sending out* animals to ascertain how far the waters were dry, and *begging them to dive down* under the water to obtain earth for making dry land. The clay on the feet of the birds in the

Babylonian story is connected with the first, that on the feet of the diver in the story of the Chippewas with the second. In a word, all that the multifarious Flood stories really can be said to prove is, that there was among a very large number of ancient peoples the belief in a Flood, and often, though by no means so frequently, in a universal Deluge; but this alone does not prove that they all describe one real event, still less that the one true account of that event is the Bible Flood. It is rather the case that a thorough study and comparison of these stories make both these hypotheses extremely improbable.

IV. The Cause of the Accadian Flood Story.—Four theories as to the origin of the Flood story are possible. That it was originally (1) a mere product of the fancy, (2) a nature myth, (3) a cosmogonie fable, (4) the poetical presentation of some natural occurrence. The first is contrary to the analogy of similar legends among all peoples, and hardly needs serious discussion. The second has in its favour the connexion of the Flood story with Aquarius, and possibly, perhaps, the location of Ṣît-napišti at the mouth of the Euphrates; but, on the other hand, this watery subject, supposing the story to be already in existence, was specially suited for this particular zodiacal sign; and the mouth of the Euphrates might be deemed a fitting place for the deified hero of the Flood. The third finds some analogy among the Flood legends of other nations, but the analogy of the great majority of Flood stories is strongly in favour of the fourth, and there can be no doubt that it is correct.

The question then arises, 'What event is likely to have given rise to the Accadian story?' (*a*) That it was a universal Deluge is, for reasons already given, quite out of the question. (*b*) Writers have, however, still maintained (and founded their arguments on scientific grounds) that this Flood was much more than a local flood, and really covered a very considerable area. Among these is the late Professor Prestwich, a man who, on account of his geological researches, is entitled to the highest respect (see *Literature*). He maintains the view, that long after the appearance of palæolithic man there was a submergence of the crust of the earth, chiefly in Western Europe, but extending to the N.W. of Africa, though probably not as far as Egypt, causing a great inundation of the sea, which rose (relatively speaking) at its highest to about 1500 ft. on the Continent, and 1000 ft. in England. It seems to have risen suddenly and to have subsided soon; that is to say, the inundation did not probably last more than a year or two at most. It destroyed a vast amount of animal and some human life, so that some species of animals became extinct in regions which they formerly inhabited: for example, the lion, panther, spotted hyæna, caffir cat, hippopotamus, African elephant in Europe and N. Africa, and all the then existing mammalia in Malta. The proofs of this inundation are: (1) the various forms of what the Professor calls distinctively *Rubble Drift* (distinct in character from the *Glacial Drift* in its various forms of *breccia*, etc.), and (2) a sedimentary deposit (*loess*) found on mountains (distinct from all valley deposits left by rivers). It seems probable to him that, when the Flood rose, animals of all sorts were driven to the mountains, where some escaped, from which the submerged districts were again re-stocked after the Flood. In one instance (at Palermo) it would appear that the light-footed animals, which would have had little difficulty in making their escape, survived, whereas the hippopotamus became extinct. Without attempting to call in question the geological arguments on which this view is maintained, it will be readily seen that it is extremely difficult to make it square with the evidence of the Flood traditions of different peoples, to which Professor Prestwich himself appeals to fortify his case. Had this view been correct, we should certainly have expected to find wide recollections of the Flood throughout the region where it occurred, and more faint traditions in other parts. But this is by no means the case, and the district of Babylonia, from which the most important and graphic Flood story originates, is, according to our present knowledge, wanting in those geological phenomena on which the Professor depends (indeed they have not yet been discovered even in the east of Europe), and therefore is apparently beyond the region of the supposed Deluge. On the other hand, in Europe Flood legends are comparatively scarce, and usually of a very mythical type (*Edda*, Lithuanians, etc.); in N.W. Africa they are altogether absent. Again, they are most frequent by far in Northern and Central America, regions far removed from the supposed locality of the Flood. The same objection, though not to the same extent, lies to the view that the Accadian Flood story is to be referred to geological changes in Thibet, by which what was once a great inland sea became a plain (see above, II. 2 B *b*).

Judging from the genesis of similar legends, this Accadian story is far more likely to have originated in Babylonia itself, and to be due to some local cause. The same analogy, if we take also into account the character of the country, suggests that our choice lies between a great overflow of the Tigris and Euphrates caused by an extraordinary rainfall, and the incursion of a tidal wave through an earthquake somewhere in the south. Edward Süss, whose views are mentioned by Andree, is inclined to think that both these causes were at work. He argues from the description of the Accadian story, which speaks not only of the earth trembling, and the breaking out of the floods below the earth, and the waves of the storm-god reaching up to heaven—expressions which point to an earthquake accompanied by a tidal wave—but also of the whirlwind, and the thunder, and the overflow of the canals. Del. (*Gen.* 1887, p. 164), Haupt (*Amer. Journ. Philol.* ix. 423 f.), and esp. Huxley (*Essays on Controverted Questions*, 586 ff., 619), agree with Süss, and Dillm. (*Gen.*^{6} p. 175) inclines to the same view. Andree gives several instances, recorded in history, showing to what an enormous distance an earthquake affects the movement of the sea. For example, an earthquake which took place in Peru on the 13th of August 1868, caused a great wave which struck the Sandwich Islands on the following day, and on the day after washed the coastlands of Australia and New Zealand. How terrible the destruction wrought by a local inundation may be, is shown by the cyclone which struck the coast of India on Nov. 1st, 1864, and involved the loss of 60,000 lives. It is not so very surprising that in Babylonia, as in many other countries, such a flood should by long oral tradition have been magnified into a universal Deluge, from which only a few survived.

It has been necessary in this article to lay considerable stress on points of resemblance between the Flood story of the Bible and the numerous Flood legends of other peoples. We have shown that, looked at from a merely historical point of view, they stand on a similar footing, and, in fact, that the Bible story is merely a later variant of one of them. Here, however, the resemblance ends. In tone and religious character the Bible story is immeasurably above all others. It is true, indeed, that the God of the Flood, Who took pleasure in the sweet smell of Noah's sacrifice, stands far below the God of the psalmist, Who delighted not in burnt-offerings and sacrifice, but in a broken and troubled spirit. But for all that, it is a God who hated iniquity, transgression, and sin as utterly unworthy of His own creation, not a deity avenging a merely personal insult, far less, as in the original story, a troop of gods wrangling with each other in jealous rivalry. Even though it be true that the Israelites found this Flood story handed down from the religious mists of a far distant past, a religious student of Scripture will have no difficulty in recognizing that divinely guided religious feeling and insight by which an ancient legend became the vehicle of religious and spiritual truth.

LITERATURE.—George Smith, *The Chaldean Account of Genesis*, new ed. by Sayce; *KAT*², 55–79; Sayce, *HCM*, 107 ff.; J. Prestwich, *On Certain Phenomena belonging to the close of the last Geological Period, and on their bearing upon the Tradition of the Flood*, Macmillan, 1895; Andree, *Die Flutsagen, ethnographisch betrachtet*, Brunswick, 1891,—an excellent work giving a summary of the Flood legends of a large number of races, and made much use of in this article; Charles Hardwick, *Christ and other Masters*, Cambridge, contains some Flood legends, see esp. pt. II. iii. 3, pt. III. ii. pp. 162–164; F. Lenormant, *Origines de l'histoire d'après la Bible*, Paris; see also in this *DB* the art. BABYLONIA, p. 221.

F. H. WOODS.

FLOOD.—A flood is a *flow* of water. In early Eng. (as in late) it is used of the flow of the tide, as *Trin. Coll. Hom.* (1200) 177, 'For swiche flode, and for swich ebbinge the prophete nemmeth this woreld se.' But in the earliest quotation in *Oxf. Eng. Dict.* it is applied to a stream,—an application which has long since dropped out of prose, though it is still in use poetically. In this sense 'flood' is of frequent occurrence in AV. The following is a complete list of the passages in which the word is found.

1. A stream: Job 14^{11} (*nâhâr*, usual word for 'river,' RV 'river'); 20^{17} 'the floods, the brooks of honey and butter' (*nâhâr*, RV 'the flowing streams'); 28^{11} 'he bindeth the floods from overflowing' (*nâhâr*, RV 'the streams that they trickle not,' RVm '*Heb.* from weeping,' the allusion is to the use of lime or clay to prevent water percolating into the mine—Davidson); Ps 98^{8} (*nâhâr*); Job 28^{4} 'the flood breaketh out from the inhabitant' (*naḥal*, usual word for 'brook,' here understood of the miner's 'shaft,' RV 'he breaketh open a shaft away from where men sojourn'); Ps 74^{15} 'Thou didst cleave the fountain and the flood' (*naḥal*, in ref. to the stream from the rock in the wilderness); Is 44^{3} 'I will pour water upon him that is thirsty, and floods upon the dry ground' (*nôzĕlîm*, ptcp. of *nâzal*, to flow, RV 'streams'). In Apocr., 2 Es 16^{60} (*flumen*, RV 'river'), Ad. Est 11^{10} 'a great flood' (ποταμὸς μέγας, distinguished from μικρὰ πηγή, 'a little fountain'; RV 'river'); Sir 21^{13} 39^{22} (κατακλυσμός). This meaning is found in Shaks., but more rarely: *Much Ado*, I. i. 318—

> 'What need the bridge much broader than the flood?'

2. A special river: (*a*) The *Euphrates*, Jos 24^{2} 'Your fathers dwelt on the other side of the flood in old time' (בְּעֵבֶר הַנָּהָר, RV 'beyond the River'); so 24^{3} (מֵעֵבֶר 'from,' etc.), $24^{14.\,15}$. In Apocr., 2 Es 13^{44} 'the most High . . . held still the flood, till they were passed over' (*statuit venas fluminis*, RV 'stayed the springs of the River'); 1 Mac 7^{8} 'Bacchides . . . who ruled beyond the flood' (ἐν τῷ πέραν τοῦ ποταμοῦ, RV 'in the country beyond the river'). Cf. Rev 9^{14} Wyc. 'Vnbynde foure aungels, that ben bounde in the great flood Eufrates'; Milton, *PL* i. 419—

> 'With these came they who from the bordering flood
> Of old Euphrates to the brook that parts
> Egypt from Syrian ground, had general names
> Of Baälim and Ashtaroth.'

(*b*) The *Nile*: Ps 78^{44} (נֹזְלֵיהֶם, RV 'their streams'); Am $8^{8\,bis}$ $9^{5\,bis}$; the Heb. is *yĕ'ôr*, the word for the Nile, *the* River, as RV; in 8^{8b} and 9^{5b} *Mizraim* 'of Egypt' is added, but that is quite exceptional. Sometimes RV translates boldly by 'Nile,' Is $19^{7\,ter.\,8}$ (AV 'brook'), $23^{3.\,10}$ (AV 'river'), Jer $46^{7.\,8}$ (AV 'flood'), Zec 10^{11} (AV 'river'). Cf. Ac 7^{21} Wyc. 'whanne he was put out *in the flood*, the daughter of Farao took hym up.' (*c*) The *Jordan*: Ps 66^{6} 'they went through the flood on foot' (*nâhâr*, RV 'river'). Cf. Pr. Bk. 1549, 'by the Baptism of thy well-beloved Son Jesus Christ, thou didst sanctify the flood Jordan, and all other waters, to this mystical washing away of sin' (so 1552, 1559, and Scot. Liturgy, 1604; but in 1662 changed to 'the river Jordan').

3. An overflow of water, a torrent: Job 22^{16} 'whose foundation was overthrown with a flood' (lit., as Dav., 'was poured away *and became* a flood,' RV 'was poured out as a stream,' Heb. *nâhâr*); Ps 32^{6} 'in the floods of great waters' (לְשֵׁטֶף מַיִם רַבִּים, RV 'when the great waters overflow'); 69^{2} (שִׁבֹּלֶת *shibbôleth*, the word which baffled the Ephraimites to pronounce, see SHIBBOLETH); 69^{15} 'waterflood' (*shibbôleth mayîm*, 1611 'water flood'); 90^{5} 'Thou carriest them away as with a flood' (זְרַמְתָּם, lit., as Cheyne, 'thou stormest upon them'); Is 28^{2} 'a flood of mighty waters overflowing' (*zerem*, properly a flood of *rain*, a downpour; RV 'tempest'); Jer 47^{2} 'an overflowing flood' (*naḥal*, RV 'stream,' Cheyne 'torrent,' who says, 'It is in autumn-time that the torrents of Palestine become dangerous, and water-courses, dry or almost dry in summer, become filled with a furiously rushing stream'); Dn 9^{26} 11^{22}, Nah 1^{8} (*shêṭeph*). In Apocr., Wis 5^{22} 'the floods shall cruelly drown them' (ποταμός, RV 'the rivers shall sternly overwhelm them'). In NT, Mt $7^{25.\,27}$ (ποταμοί), Lk 6^{48} (πλήμμυρα, fr. root of πίμπλημι, to fill); Rev $12^{15.\,16}$ (ποταμός, RV 'river'); and 12^{15} 'that he might cause her to be carried away of the flood' (ποταμοφόρητον, RV 'carried away by the stream').

4. Noah's flood is always designated in Heb. *mabbûl*, in LXX κατακλυσμός, and in Vulg. *diluvium* (whence Eng. 'deluge'). The reff. in OT are Gn 6^{17} $7^{6.\,7.\,10.\,17}$ $9^{11\,bis.\,15.\,28}$ $10^{1.\,32}$ 11^{10}, Ps 29^{10}; in Apocr., 2 Es $3^{9.\,10}$, Wis 10^{4}, Sir 40^{10}* $44^{17.\,18}$; and in NT, Mt $24^{38.\,39}$, Lk 17^{27}, 2 P 2^{5}. See preceding article.

The only doubtful ref. is Ps 29^{10} 'The LORD sitteth upon the flood' (לַמַּבּוּל יָשָׁב, RV 'sat *as king* at the Flood'). The majority of recent commentators take it with RV to be a ref. to Noah's Flood. 'The storm,' says Kirkpatrick, 'reminds the poet of the great typical example of judgment and mercy, in which Jehovah's judicial severity was exhibited.' The chief argument in favour is the use of the word (observe that it has the article '*the* Flood'). Against is the unexpectedness of the reference to the Flood, and the prep. (לְ) 'at,' 'to,' or 'on.' Kirkpatrick says of the prep.: 'we may render, *Sat for the Flood*; with His seat on His throne in order to execute that memorable judgment (Ps 97).' The trⁿ of AV (which is that of Geneva Bible) makes the ref. to be to a flood of water in the storm itself. This is clear from the note in the Gen. Bible. Johnson (*Speaker's Com.*) agrees. But the storm is a storm of wind, not of water; of rain there is no mention in the psalm, although it may be argued that it is presupposed. Cheyne carries the psalmist's mind beyond the Noachic Flood to the original meaning of the word. That is 'destruction'; 'a wasting flood' being only secondary. He therefore boldly ignores the Flood and any ref. to water, and tr. 'At the storm Jehovah sat enthroned' (*Book of Psalms*, p. 81, and Crit. Note on p. 380).†

5. It is only in poetic parallelism that 'flood' is used of the *sea*: Ps 24^{2}—

> 'He hath founded it [the earth] upon the seas,
> And established it upon the floods';

Ps $93^{3\,ter}$, Jon 2^{3} (all *nâhâr*); and Ex 15^{8} (*nôzĕlîm*, of the waters of the Red Sea). In Apocr., 2 Es $4^{15.\,17.\,19.\,21}$ (*fluctus*, RV 'waves').

---

* So plainly in AV, since the marg. ref. is to Gn 7^{11}; and the Gr. is κατακλυσμός: but RV omits the ref., and prints 'flood,' not 'Flood'; and the recently discovered Heb. text gives 'river' (Cowley and Neubauer).

† This cancels the 'Parchment' trⁿ 'Jehovah has seated himself above the flood,' and its note, 'either the deluge or the heavenly ocean already referred to in v.³.'

6. Finally, the word is thrice used metaphorically: 2 S 22^{5}=Ps 18^{4} 'the floods of ungodly men made me afraid' (נַחֲלֵי בְלִיַּעַל, lit. 'streams of Belial'; RV 'floods of ungodliness'; see Selbie, Cheyne, and Hommel in *Expos. Times*, viii. [1897] 360, 423, 472; and Baudissin, Cheyne, Jensen, *ib.* ix. 40, 91, 283, 332). Cf. Shaks. *Timon of Athens*, I. i. 42—

> 'You see this conference, this great flood of visitors.'

Also 1 Mac 6^{11} 'a flood of *misery*' (ποταμός, RV simply 'a flood'). Cf. Milton, *On Time*, 13—

> 'And joy shall overtake us as a flood.'

J. HASTINGS.

FLOOR.—The word 'floor' is now most familiar as the part we tread on in a room; but it once as readily suggested the platform on which corn was threshed. Hence in AV (after earlier VSS) 'floor' stands as the tr^{n} of גֹּרֶן *gôren*, fourteen times, which elsewhere is mostly tr^{d} 'threshing-floor.'

The Heb. word occurs altogether 36 times: it is tr^{d} 'threshing-floor' (1611 two sep. words) 19 times (Gn 50^{10}, Nu 15^{20} $18^{27.30}$, Ru 3^{2}, 1 S 23^{1}, 2 S 6^{6} $24^{18.21.24}$, 1 Ch 13^{9} $21^{15.18.21.22.28}$, 2 Ch 3^{1}, Jer 51^{33}), and 'floor' 11 times (Gn 50^{11}, Dt 15^{14}, Jg 6^{37}, Ru $3^{3.6.14}$, Is 21^{10}, Hos 9^{2} 13^{3}, Jl 2^{24}, Mic 4^{12}). RV gives 'threshing-floor' everywhere except Gn 50^{11}, Is 21^{10}, and Jl 2^{24}, retaining 'floor' in these places. Elsewhere *gôren* is tr^{d} 'barnfloor' 2 K 6^{27} (1611 'barn floor'; RV 'threshing-floor'), 'threshingplace' 2 S 24^{16} (1611 'threshing place,' RV 'threshing-floor'); 'a void place' 1 K 22^{10}=2 Ch 18^{9} (RV 'an open place'), 'barn' Job 39^{12} (RV 'threshing-floor'), 'corn' Dt 16^{13} ('after that thou hast gathered in thy corn and thy wine,' RV 'after that thou hast gathered in from thy threshing-floor and from thy wine-press'), and in Hos 9^{1} [all] the fuller phrase *kol-gornôth dâgân* is tr^{d} 'cornfloor' (1611 'corn floor').

The only other OT word is אִדַּר *'iddar*, which occurs only Dn 2^{35} and is tr^{d} 'threshing-floor' (אִדְּרֵי־קַיִט, EV 'summer threshing-floors'). In NT ἅλων occurs only Mt 3^{12}, Lk 3^{17} and is tr^{d} 'floor,' RV 'threshing-floor.' In Apocr. *area* is tr^{d} 'floor' 2 Es 4^{32} (so RV), $4^{35.39}$ (RV 'threshing-floor'). See AGRICULTURE.

For the floor of a room see HOUSE.

J. HASTINGS.

FLOTE.—The timber for the temple, being cut in Lebanon, was conveyed by sea to Joppa in flotes: 1 K 5^{9} (דֹּבְרוֹת, RV 'rafts'), 2 Ch 2^{16} (רַפְסֹדוֹת). The logs themselves would form the raft; hence in 1 Es 5^{55} it is said that for the building of the second temple the timber was brought to the haven of Joppa, not '*by* rafts' (AV, as if σχεδίαις), but '*in* rafts' (RV, cf. LXX σχεδίας). In 1 K 5^{9} LXX reads σχεδίας, in 2 Ch 2^{16} σχεδίαις.

AV 1611 spells 'flotes' at each occurrence. Modern editions give 'flotes' in 2 Ch 2^{16}* and 1 Es 5^{55}, but 'floats' 1 K 5^{9}. Scrivener restores 'flotes,' and is followed in *Camb. Bible for Schools and Colleges*.

FLOUR.—See FOOD.

FLOURISH.—Two stages may be marked in the use of the verb to flourish: **1.** To flower, blossom, said (*a*) literally or (*b*) metaphorically, as (*a*) Lyte (1578), *Dodoens*, II. xx. 117, 'It beginneth to floure at the toppe of the stalke, and so goeth florishing downewarde.' So in AV Ec 12^{5} 'the almond tree shall flourish' (יָנֵאץ, RV 'shall blossom'); Ca 6^{11} 7^{12} of the vine (פָּרַח, RV 'bud'; cf. Chaucer, *Parsonnes Tale*, § 43, Student's ed. 697, 'To smelle the sote savour of the vyne whanne it florissheth'); Is 17^{11} 'in the morning shalt thou make thy seed to flourish' (תַּפְרִיחִי, RV 'thou makest thy seed to blossom'); Ps 90^{6} of the grass (יָצִיץ, Del., Cheyne 'blossoms'). (*b*) Metaphorically of persons or things: Ps 103^{15} 'As for man, his days are as grass: as a flower of the field so he flourisheth' (כְּצִיץ הַשָּׂדֶה כֵּן יָצִיץ, lit. 'as the flower of the field so he flowereth': so Ps 72^{16} 92^{7} 132^{18}, all *ẓûẓ* [in Hiph.], which means to bring forth flowers, and is tr^{d} 'blossom' in Is 27^{6} as well as [in Qal] Ezk 7^{10}); Sir 39^{14} 'flourish as a lily' (ἀνθήσατε ἄνθος; RV 'put forth flowers'). **2.** To shoot up quickly, or grow vigorously, again said literally of plants and metaphorically of persons and things. Thus Ezk 17^{24} in the Wyclifite version of 1388 is 'Y made the drie tree to brynge forth boowis,' but the earlier version has 'Y made the drye tree for to florisshe,' which is retained in AV. In this sense are all the remaining instances of the word, the Heb. being some part of פָּרַח, or (in Ps 92^{14}) the adj. רַעֲנָן (Aram. רַעֲנַן Dn 4^{4}); the Greek ἀναθάλλειν, Sir 1^{18} 11^{22} 46^{12} 49^{10}, Ph 4^{10}; and the Lat. *florēre*, 2 Es 6^{28}.

J. HASTINGS.

FLOWERS.—Visitors to Palestine unite in their enthusiasm over the flowers. Everywhere they brighten the landscape with their brilliant colours, white, yellow, blue, violet, purple, maroon, crimson, scarlet, brown, and even black. Fields, many acres in extent, are aglow with anemones, ranunculi, poppies, chorisporas, silenes, clovers, milk vetches, chamomiles, groundsels, crocuses, colchicums, irises, ixiolirions, gladioli, and tulips. The hedges are gay with their wealth of broom, roses, and brambles. The sandstone is clothed with pink and white rock-roses, and dainty little heaths. The hillsides are adorned with the lavish blossoms of the styrax, the redbud, the arbutus, and the myrtle. Even the bleak shingle of alpine Lebanon, 10,000 ft. above the sea, is covered with large patches of *Vicia canescens*, Lab., and *V. gregaria*, Boiss. et Held., with their beautiful racemes of blue and white flowers. The table-land of Moab is gorgeous with deep purple irises. Finally, the deserts have a rich and varied flora, numbering over 400 species, not found in other localities. Flowers are an emblem of beauty (Mt $6^{28f.}$), but at the same time of frailty and instability (Job 14^{2}, Ps 103^{15}, Is 28^{1} 40^{6}, Ja 1^{10} etc.). The coming of flowers is a sign of spring (Ca 2^{12}). 'The flower of her age' is the bloom of a maiden's youth (1 Co 7^{36}).

G. E. POST.

FLOWERS in Lv $15^{24.33}$ signifies the menstrual discharge (נִדָּה, RV 'impurity'). So Andrew, *Brunswyke's Distyll-Waters*, A iii. 'the same water . . . causeth women to have her flowers, named menstruum.' In the same sense Fr. *fleurs*; but both are now obsolete.

FLUE-NET.—In Hab 1^{15}m 'flue-net' is given as an alternative for 'drag' of the text (Heb. מִכְמֶרֶת). The form *flu* is found in French, and *fluwe* for a fishing-net in Dutch. The flue (together with the 'trammel or hooped net whatsoever') is forbidden to river fishermen in early laws. The word is still in occasional use, as *Three in Norway* (1882), vi. 44, 'Seven boats . . . were out with a huge flue net.' Coverdale has 'yarne' in this and the foll. verse, and is followed by the Geneva and Bishops' Bibles.

FLUTE.—See MUSIC.

FLUX.—Ac 28^{8} 'the father of Publius lay sick of a fever and of a bloody flux,' *i.e.* lit. a flow of blood (from *fluxus*, ptcp. of *fluĕre*, to flow, through Fr. *flux*; the spelling in 1611 is 'flixe' ['bloody-flixe'], a spelling derived from the Fr. pronunciation with ü—Bradley); Gr. δυσεντερία in TR, but edd. prefer the later form δυσεντέριον; RV 'dysentery.' The AV tr^{n} comes from Wyclif, who in ed. 1380 has 'Sothli it befel, the fadir of Puplius for to ligge trauelid with feueres and dissenterie, or flix,' thus using 'flix' without the adj., for it often stood alone in early Eng. as a synonym for dysentery. But the ed. of 1388 has 'blodi flux.' So in Mt 9^{20} Wyclif (1380) gives 'And loo! a womman that suffride the flix, or rennynge of blood (Gr. *αἱμορροοῦσα*) twelve yeer, cam to byhynde and touchide the hemme of his clothe,' but ed. 1388 'the blodi flux.' And so T. Fuller, *Holy Warre* (ed. 1640), p. 216, 'The siege was no sooner begun but the plague seised on the Christian armie: whereof thousands died; amongst others, Tristram, King Lewis his sonne: And he himself of a flux followed after.' But p. 94, 'King Almerick himself, wearied with whole volleys of miseries, ended his life of a bloudy flux.' See MEDICINE. J. HASTINGS.

---

* Why was *flotes* left in 2 Ch? Because less read, and reckoned of less consequence? So in the Heb. Bible some explain the presence of *Esh-baal*, 1 Ch 8^{33} 9^{33}, when the name was changed in 2 S into *Ish-bosheth*.

FLY.—In 1 S 14^{32} (reading וַיַּעַט with Ḳerê, for Kethîbh וַיַּעַשׂ) and 15^{19} (וַתַּעַט) AV gives (and RV retains) 'fly upon the spoil,' a more forcible rendering than that of the previous versions 'turn to' (the Bishops' have 'gate them to' in 14^{32}). In 1 S 25^{14} 'flew upon' (AV 'railed on') is used figuratively: עַיִט 'bird of prey' comes from the same root.

In Lv $11^{21.\,23}$ occurs the curious combination 'flying creeping thing' (שֶׁרֶץ הָעוֹף). As Driver points out (art. CREEPING THINGS, see also *Com.* on Dt 14^{19} where the phrase is 'every creeping thing that flieth'), the Heb. word here used does not describe *creeping* but *swarming* creatures; so that the tr^{n} should be 'winged swarming things,' not as in RV 'winged creeping things,' the reference being to insects like the locust.

FLY, FLIES.—Two Hebrew words are translated *fly*:—**1.** זְבוּב *zĕbhûbh*, *μυῖα*, *musca*. This word is found only in two places (Ec 10^{1}, Is 7^{18}). It corresponds to the Arab. *dhubâb*, which is specially applied to *house flies*, but is also understood in the general sense of insects resembling them. It is used in Arab. as an emblem of *weakness*, 'he is more frail than the fly'; and of *contemptibleness*, 'he is more contemptible to me than the buzzing of the fly.' 'The refuge of the fly' is a proverb, applied to him who is protected by his ignobleness. 'The father of the fly' signifies a person with a stinking breath (cf. Ec 10^{1}). It is also said of such a person that he is 'more stinking in breath than the father of the fly.' From these qualities *dhubâb* has come to signify *evil* or *mischief*. An unlucky man is 'a fly man.' The same expression is also used to denote *demoniacal possession*, or *insanity*, or *ignorance*. More or fewer of these various significations in the Arab. may have obtained also in the Heb. word, which would account for the god of Ekron being called Baal-zebub (2 K 1^{2}), 'the *god of flies*.' See BAAL-ZEBUB.

2. עָרֹב *'ârôbh*, *κυνόμυια*, *omne genus muscarum*, EV Ex 8^{21-31} *swarms of flies*, AV Ps 78^{45} 105^{31} *divers sorts of flies*, RV *swarms of flies*. In all three passages LXX gives *κυνόμυια*, *dog-fly*, a word the significance of which in Greek is not clear. The Rabbins interpret *'ârôbh* as referring to a mixture of noxious insects, as if from עָרַב *'ârab*, to mix. Some have argued from Ex 8^{31} 'there remained not one,' that the fly referred to must be a definite species, which was sent as a plague, and totally destroyed at its close. But even if the expression 'not one' is to be pressed to its literal interpretation, it would not necessarily imply that the swarms were all of one kind. They might have been 'divers sorts.' The fact that the swarms of flies 'devoured' the Egyptians, has been supposed to imply that they were flies that bit them. But, apart from the fact that a biting fly could hardly be said to devour its victim, the true interpretation is to be sought in the comparison of the two members of the parallelism, 'flies which devoured them, and frogs which destroyed them.' Both are strong expressions of the ruinous nature of the plague, and in both the reference is probably more to the corruption of their food and drink than to the destruction of their bodies. As it is impossible to determine whether a particular insect, or a mixture of insects, is intended, we may accept *swarms of flies* as conveying the essential meaning in the passages in question. See PLAGUE.

A resident in the cooler parts of Europe and America can hardly realize the number and persistence of the flies which swarm in Egypt and Syria. They not only defile food, but convey contagion, particularly that of *ophthalmia*, *diphtheria*, and, one kind of fly, that of *malignant pustule*. They also deposit their eggs in wounds and sores, and sometimes in the nose and ears of filthy people, and their larvæ hatch out, and fill these cavities, to the great distress and injury of the unfortunate patient. G. E. POST.

FODDER occurs only once in AV (Job 6^{5} as tr^{n} of בְּלִיל, strictly *mixed food, farrago* [see *Oxf. Heb. Lex.*]). RV not only retains the term here, but introduces it in Jg 19^{21}, where the denom. vb. בָּלַל ('give fodder,' AV 'give provender') occurs. The same Heb. word בְּלִיל occurs in Job 24^{6}, but here RV has 'provender' (AV 'corn'), and in Is 30^{24} (AV and RV 'provender'). This last term (see PROVENDER) is more frequently the tr^{n} of מִסְפּוֹא Gn $24^{25.\,32}$ 42^{27} 43^{24}, Jg 19^{19}. See further under AGRICULTURE.

FOLD.—(*A*) IN OT.—**1.** גְּדֵרָה (only in plur.), properly the walls or fences erected to shelter and defend the flock, Nu $32^{16.\,34.\,36}$, Zeph 2^{6}. **2.** דֹּבֶר Is 5^{17} Mic 2^{12} prob. means 'pasture' (so RV), but both the text and the meaning of this passage are doubtful (see Nowack, *ad loc.*). **3.** מִכְלָה, a transcriptional error for מִכְלָא (from כָּלָא 'shut up') in Hab 3^{17}. The correct form appears in Ps 50^{9} 78^{70}. **4.** נָוֶה 'farm' or 'homestead' (2 S 7^{8}), including both farm-house and lands; often used in connexion with sheep and shepherds (Is 65^{10}, Jer 33^{12}), and also poetical for 'habitation,' whether of men or flocks (Is 23^{20}, Jer 31^{23} of Jerus.; Pr 3^{33} of the righteous; Ex 15^{13}, 2 S 15^{25} of J″). **5.** [נָאָה] only in pl. const. נְאוֹת 'pastures' (Jl 2^{22}, Ps 65^{12}, Jer 23^{10}, Am 1^{2}, where see Driver's note). **6.** שְׁפַתַּיִם, which in AV of Ps 68^{13} is tr^{d} 'pots,' prob. means 'sheepfolds' (so RV), like **7.** מִשְׁפְּתַיִם Gn 49^{14} (of Issachar 'couching between the sheepfolds' [RV], 'between two burdens' [AV]), Jg 5^{16} (of Reuben; see Moore's note). **8.** In Is 13^{20} where AV has 'neither shall the shepherds make their fold there,' it is a verb that is used, הִרְבִּיץ, which RV accurately tr. 'make their flocks to lie down.' **9.** In 2 Ch 32^{28} עֲדָרִים לָאֲוֵרוֹת cannot mean as in RV 'flocks in folds'; the AV 'cotes for flocks' is prob. correct, although this involves a transposition and the reading אֻרוֹת לַעֲדָרִים (see Kittel in *SBOT*, *ad loc.*).

(*B*) IN NT.—**1.** *αὐλή*, the enclosed space or court within which the sheep were penned, Jn $10^{1.\,16}$. **2.** *ποιμνή*. In Jn 10^{16} AV has 'there shall be one *fold*,' a mistranslation which suggests an erroneous doctrine of the Church. The meaning is correctly given by RV 'they shall become one *flock*' (cf. Mt 26^{31}, Lk 2^{8}, 1 Co 9^{7}).

Folds were used mainly as a protection at night from wild beasts (cf. Gn 31^{39}, 1 S 17^{34}). They consisted of an enclosure surrounded by a stone wall (Nu 32^{16}), by preference near a well (Ex $2^{16\text{ff.}}$, Ps 23^{2}), and had often the extra protection of a tower (Gn 35^{21} (?), 2 Ch 26^{10}, Mic 4^{8}). The flocks were carefully counted as they passed in and out (Jer 33^{13}). Sometimes a number of flocks might be kept in one fold under the charge of a 'porter' (*θυρωρός*), who opened to each shepherd as he came to reclaim his flock (Jn 10^{3}). See further under SHEEP, SHEPHERD. J. A. SELBIE.

FOLDEN.—This earlier ptcp. of the verb to fold is found in Nah 1^{10} 'while they be folden together as thorns' (RV 'like tangled [Amer. RV entangled] thorns'). The meaning is that the thorns are intertwined so as to form an impenetrable hedge. The tr^n comes from the Geneva Bible, 'For *he shall come as* unto thornes folden one in another,' with the marginal gloss, 'Thogh the Assyrians thinke them selves like thornes that pricke on all sides, yet the Lord wil set fyre on them.' For this sense of the verb to fold cf. Mt 27^{29} Wyc. 'thei foldynge a crowne of thornis,' and Ca 7^5 Cov. 'The hayre of thy heade is like the kynges purple folden up in plates.' The Heb. (סְבֻכִים) is used in Job 8^{17} of roots entwined round a heap of stones, EV 'His roots are wrapped about the heap.'

J. HASTINGS.

FOLK was at one time used as equivalent to 'nation' (Ger. *Volk*). Thus Ac 10^{35} Wyc. 'in eche folk he that dredith God and worchith rightwisnesse is accepte to hym'; Ps 33^{12} Cov. 'Blessed are the people that holde the LORDE for their God, and blessed are the folke whom he hath chosen to be his heritage' (a tr^n preferred by 'Four Friends': see *Psalms Chron. Arranged*, 1891, p. 387); 2 Es 5^{26} Cov. 'Amonge all ye multitudes of folkes thou hast gotten the one people.' So in AV Jer 51^{58} 'the people shall labour in vain, and the folk in the fire' (לְאֻמִּים; RV 'the nations for the fire'). So in Pr 30^{26} the meaning is 'nation,' though the application is to the 'conies,' after Cov. 'the conyes are but a feeble folk' (Heb. עַם). But in Gn 33^{15} (עַם) the word is used of a chieftain's followers or retainers, a special sense which is now only Scottish.* Cf. G. Pettie (1581), Tr^n of Guazzo's *Civ. Conv.* iii. 170, 'The maister of the house . . . ought . . . to shewe himselfe more seuere towards his owne folke, then towards others.' In NT the word is thrice used for people or persons indefinitely (Mk 6^5, Jn 5^3, Ac 5^{16}), and there is no corresponding Greek word. In the last passage a plural form is employed ('sicke folkes' in 1611), which is now used only of relatives, esp. in the phrase 'young folks,' the word 'folk' being itself collective. See KINSFOLK.

J. HASTINGS.

FOLLOW, FOLLOWER.—In the OT 'follow' is sometimes the tr^n of the adv. אַחַר *aḥar* (often in plur. constr. אַחֲרֵי), *after*, with some verb meaning to go or walk, thrice with הָיָה to be (Ex 23^2, 2 S 2^{10}, 1 K 16^{21}). This verb is often omitted, however, a pregnant Heb. idiom being the result, as 1 S 13^7 'all the people followed him trembling' (חָרְדוּ אַחֲרָיו, literally, as AVm 'trembled after him'); Am 7^{15} 'the Lord took me as I followed the flock' (מֵאַחֲרֵי הַצֹּאן, lit. as AVm 'from behind the flock,' RV 'from following'). Still more idiomatically, the verb 'to fill' is used with this adv., and then the Eng. is 'follow fully' or 'wholly,' as Dt 1^{36} 'he hath wholly followed the LORD' (מִלֵּא אַחֲרֵי יהוה, lit. 'he hath filled up after the LORD,' or as AVm 'fulfilled [to go] after').

Occasionally, the meaning is to follow so as to overtake, to pursue, when the Heb. is רָדַף, as Ps 38^{20} 'I follow the thing that good is.' Then the Eng. is most often 'follow after,' as Gn 44^4 'Up, follow after the men; and when thou dost overtake them, say unto them.' The force of these passages is probably lost to the modern Eng. reader. Thus in Is 5^{11} 'Woe unto them that rise up early in the morning, that they may follow strong drink,' though RV retains 'follow,' the word conveys the sense of determined pursuit (LXX διώκειν, Vulg. *sectari*, Luther *sich befleissigen*). Cf. Shaks. *Coriol.* IV. v. 104—

> 'Since I have ever followed thee with hate.'

In Ps 23^6 'Surely goodness and mercy shall follow me all the days of my life,' the Heb. is the same (יִרְדְּפוּנִי), but the Eng. is probably rather 'accompany me,' as 1 Co 10^{13} Tind. 'There hath none other temptacion taken you, but soche as foloweth the nature of men.'

To the Heb. text רִדְפוּ, *i.e.* 'pursue' of Jg 3^{28} (EV 'Follow after me'), Moore prefers רְדוּ, *i.e.* 'follow down,' after LXX Καταβῆτε ὀπίσω μου, and the Heb. of the next clause.

Another Heb. phrase tr^d 'follow' is lit. 'at the feet of,' as Jg 8^5 'the people that follow me' (בְּרַגְלָי, lit. 'at my feet'); so Ex 11^8, 1 S 25^{27}, 1 K 20^{10}, 2 K 3^9. Finally, the Heb. verb דָּבַק *to cleave to* is occasionally translated 'follow close after,' Jer 42^{16}, or 'f. hard after,' Ps 63^8 (and in Hiph. 1 S 14^{22}, 2 S 1^6, 1 Ch 10^2); or 'f. hard upon,' 1 S 31^2 (Hiph.) 'And the Philistines followed hard upon Saul and upon his sons.' Cf. Job 13^{25} Cov. 'Wilt thou be so cruell and extreme unto a flyenge leaf, and folowe upon drye stubble?' and Bingham (1623), *Xenophon*, 115, 'They dare and will be readie to follow upon us if we retire.' RV adds Jg 20^{42} 'the battle followed hard after them' (AV 'overtook them').

In 2 Mac 4^{48} προαγορεύω in its solitary occurrence in bibl. Greek is tr^d in AV 'followed the matter' (οἱ προηγορήσαντες, RV 'they that were spokesmen'). The word is common enough in class. Greek in the sense here intended, viz. to speak for, or claim a right, in public. The Eng. of AV means to pursue the matter to its accomplishment, to prosecute the affair; for which cf. *Hum. Town* (1693), i. 30, 'giving his lawyer double Fees, that his Cause may be well followed'; and Shaks. 2 *Henry IV.* I. i. 21—

> 'O! such a day,
> So fought, so followed, and so fairly won,
> Came not till now to dignify the times,
> Since Cæsar's fortunes.'

No other obsolete or unusual expression seems to be used in the Apocr. which is not represented in OT or NT. But the variety of words tr^d in AV 'follow' is instructive. The foll. are found: ἀκολουθέω, Jth 15^{13}, Sir 23^{28} (RV omits), 2 Mac 4^{17} 8^{36}; ἐξακολουθέω, Sir 5^2, Three ^{18}; ἐπακολουθέω, Ad. Est 15^4, Sir 46^6; κατακολουθέω, Jth 11^6; παρακολουθέω, 2 Mac 8^{11}; διώκω, Sir 11^{10} (RV 'pursue') 27^8 29^{19} (Gr. διώκων ἐργολαβείας, AV 'he that undertaketh and followeth other men's business for gain,' RV 'undertaketh contracts for work') 31^5 34^2; καταδιώκω, Sir 27^{17} (RV 'pursue'); πορεύομαι, To 4^5; πορεύομαι ὀπίσω, Sir 46^{10}, RV 'walk after'; ἐπιπορεύομαι, 2 Mac 2^{28} (Gr. τὸ δὲ ἐπιπορεύεσθαι τοῖς ὑπογραμμοῖς τῆς ἐπιτομῆς ἀτονοῦντες, AV 'labouring to follow the rules of an abridgement,' RV 'and again having no strength [marg. 'making no effort'] to fill in [marg. 'enlarge on'] the outlines of our abridgement'); ἐξέρχομαι ὀπίσω, 1 Mac 2^{27} (RV 'come forth after'); γίνομαι πρός, 2 Mac 11^{29}; ζηλόω, Sir 51^{18} (AV 'earnestly I followed,' RV 'I was zealous for'), 2 Mac 4^{16} (AV 'followed so earnestly,' RV 'earnestly followed'); σύνειμι, 2 Mac 9^4 (RV 'accompany'). Besides those verbs there are the expressions τὴν ὑπογεγραμμένην ἐπιστολήν, 1 Es 2^{16}, AV 'these letters following,' RV 'the letter following'; τὰ ὑπογεγραμμένα, 'as followeth'; τῇ ἐχομένῃ, 'on the day following'; and in 2 Es *sequor* $6^{7.9}$ 11^{13}, *subsequor* 7^{35}.

In NT the most frequent word is the simple verb ἀκολουθέω, which is used 77 times in the Gospels of following Jesus, and only once otherwise (Mk 14^{13}) of following the man with the pitcher of water. We find also 5 of its compounds tr^d either 'follow' or 'follow after': (1) ἐξακολουθέω, to follow out or to the end, 2 P 1^{16} $2^{2.15}$; (2) ἐπακολουθέω, to follow close upon, Mk 16^{20}, 1 Ti 5^{10} (EV 'diligently followed'), 5^{24} ('Some men's sins are open beforehand, going before to judgment; and some men they follow after,' *i.e.* may be undetected by man, but follow them hard to God's judgment-seat), 1 P 2^{21}; (3) κατακολουθέω, to follow behind, used only of women in NT, Lk 23^{55}, Ac 16^{17}; (4) παρακολουθέω, to follow close, to follow up, tr^d 'follow' in AV only in 'Mk' 16^{17} 'these signs shall follow them that believe,' but the same vb. is used in Lk 1^3 of following up the details of a narrative (AV 'having had understanding,' RV 'having traced the course'), also in 1 Ti 4^6 of closely following Paul's teaching, so as to teach alike (AV 'good doctrine whereunto thou hast attained,' RV 'which thou hast followed *until now*), and in 2 Ti 3^{10} so as to practise it (AV 'hast fully known my doctrine,' RV 'didst follow my teaching'); (5) *συνακολουθέω*, to follow by one's side, to accompany a leader, Mk 5^{37} 14^{51}, Lk 23^{49}.

---

* Cf. Kethe's version of Ps 100^3 (as it first appeared in Daye's Psalter, 1560–61)—

> 'The Lord ye know is God in dede
> with out our aide, he did us make:
> We are his folck, he doth us fede,
> and for his shepe, he doth us take.'

Modern editors have altered 'folck,' which represents 'people' in the prose versions, into 'flock,' which represents nothing.

As *rādhaph* in OT is almost invariably trd by *διώκω* in LXX, so *διώκω* itself is sometimes trd in NT by 'follow,' He 12^{14} 'Follow peace with all men,' 1 Th 5^{15} 'f. that which is good,' 2 Ti 2^{22} 'f. righteousness,' and Lk 17^{23}; or 'follow after,' Ro $9^{30.31}$ 14^{19}, 1 Co 14^1, Ph 3^{12}, 1 Ti 6^{11}. RV has 'follow after' throughout, except Ph 3^{12} 'press on.' The compound *καταδιώκω* is used in Mk 1^{36}, its only occurrence, and trd in EV 'followed after'; but, as Gould says, that trn is inadequate, since the *κατά* gives the idea of hard, persistent search, as in our phrase 'to hunt down,' hence rather 'pursued him closely.' In all those passages, however, the Eng. 'follow,' even with the addition of 'after,' is now inadequate.

In the trn of some of the compounds of *ἀκολουθέω* the sense of 'follow' is very nearly 'imitate.' This is unmistakably the meaning where the Gr. is *μιμεῖσθαι*, 2 Th $3^{7.9}$, He 13^7, 3 Jn ^{11}. Thus in He 13^7 'whose faith follow.' RV has always 'imitate.' Cf. T. Adams (1615), *Spirit. Navig.* 41, 'Glasse among stones is as a foole amongst men; for it followes precious stones in colour, not in virtue.' So *μιμητής* in all its occurrences (1 Co 4^{16} 11^1, Eph 5^1, 1 Th 1^6 2^{14}, He 6^{12}) is rendered by 'follower' in AV, by 'imitator' in RV; and *συνμιμητής*, Ph 3^{17}, is in AV 'followers together,' in RV 'imitators together.' Cf. Burke (1781), *Corresp.* ii. 437, 'We, who ought to have taken the lead in so noble a work, are but ill followers even of the examples which are set to us.'

In 1 P 3^{13} the edd. prefer *ζηλωταί* after the best MSS to *μιμηταί* of TR, hence 'zealous' in RV for AV 'followers.'

J. Hastings.

FOLLY.—See Fool.

FOOD.—I. The material eaten for the sustenance of the body is often mentioned in the Bible, in AV most commonly as *bread*, but often as *meat*, occasionally as *food* or *victuals*. מַאֲכָל *ma'ăkhāl*, or victual in general, is used about 29 times, always in its literal sense; לֶחֶם *leḥem*, literally bread, is used for food in general about 230 times, and is often used figuratively (see Bread). אֹכֶל *'ōkhel* is used 42 times for food or victuals in the literal sense, and the cognate *'okhlah* is used by Ezekiel for fuel, in the sense of food for the fire. In the NT *βρῶμα* is the word used 17 times, and *τροφή* 16 times. *βρῶσις* is used 4 times by St. John and 5 times in the Epistles, often in a metaphorical sense. The commonest metaphorical uses are (1) that which refreshes the soul, doing the will of God, Jn 4^{32}; and in a cognate sense Christ our Saviour is the food of the soul, Jn 6^{55}; (2) advanced doctrinal teaching, 1 Co 3^2, He 5^{14}; (3) mere ceremonial observances, He 9^{10} 13^9 (for other uses see Bread).

II. Food-stuffs.—According to Gn 1^{29} the original food of mankind consisted of fruits and seeds which the earth produced naturally. In this respect man resembled those of the higher mammals which are most nearly allied to him in structure, which are for the most part herbivorous and frugivorous. After the primary dispersion the spoils of the chase were added to the primitive dietary even from the earliest times, for the broken bones of wild animals and the shells of molluscs which had served as food are among the earliest traces of primeval man as yet discovered. There were mighty hunters even before Nimrod (Gn 6^{11} 10^9), and implements of the chase were among the first of man's inventions.

In process of time, as agricultural and pastoral industries developed, the produce of the tilled field and of the herd and flock supplied men with additional food-stuffs (Gn $4^{2.3.4.20}$). The expression of the divine sanction for these additions, recorded in Gn 9^3, seems to have for its special object the injunction of the taboo concerning the eating of blood.

A. The inhabitants of the Bible lands lived chiefly on *vegetable food*. At the present day, bread, olives and oil, butter, milk, and cheese, fruit and vegetables, with meat on special occasions, or in particularly wealthy households, make up the dietary of most of their descendants in the East (Thomson, i. 98). The staff of life was, and is, bread made of cereal grains, especially wheat, millet, dhûrah, and barley, to which is now added rice, unknown in Bible times (see Bread).

(*a*) **Parched corn** is 5 times mentioned as an article of diet, and is coupled with bread in Lv 23^{14}. One form of this, called קָלִי (*ḳālî*), was made of the common, nearly ripe wheat by heating the grain on an iron 'girdle' (Lane, i. 251; Robinson, ii. 50), or by binding the ears into wisps and roasting them over the fire (*ib.* iii. 393). In Arabic *ḳali* means anything done in the frying-pan, and the material of the parched corn may be meal, or polenta, or flour, or else the unground grain. It is a common food of labourers (Ru 2^{14}), and is sold ready prepared in Eastern towns as a convenient food for travellers. David brought 3 pecks of it to his brethren at Elah (1 S 17^{17}); and Abigail brought 5 pecks to David's men (1 S 25^{18}). In Lv 2^{14} 'green ears of corn dried by the fire' are mentioned, and in Lv 23^{14} these are coupled with parched corn. This form is made, according to Abu'l Walid, of finer garden wheat, which is called כַּרְמֶל *karmel* (2 K 4^{42}). In RV this is called 'bruised corn of the fresh ear,' alluding to its being beaten in a mortar (Pr 27^{22}). When this bruised corn was dried in the sun it was called רִיפוֹת *rîphôth* (Pr 27^{22}, 2 S 17^{19}). Grain of this kind was used to cover the well in which Ahimaaz and Jonathan were hidden at Bahurim (LXX *ἀραφώθ*, Vulg. *siccans ptisana*). The flour and parched corn of 2 S 17^{28} is called *ἄλευρον καὶ ἄλφιτον*, flour and polenta or meal in LXX (see Herod. vii. 119). *Ἄλφιτον* is used in Homer for barley-meal only, but Hippocrates uses this word for meal in general. For classic and Hebrew usage of polenta see Gruner, *de oblatione Primitiarum*, in Ugolini, vol. xvii. Royle has contended that *ḳali* is not corn, but some leguminous plant, as *ḳalee* is the Hindi for pulse; but R. Salomon in his Commentary on *Aboda Zara* says that there are two kinds—one of corn and one of cicer or lentiles. For mention of parched peas see Plautus, *Bacch.* iv. 5. 7, and Horace, *de art. poet.* 249. Robinson speaks of a variety of this parched corn which is first boiled, then bruised in a mill to take off the husk, then dried; this is named *burgoul* (ii. 394). According to Burckhardt, *burgoul* is wheat boiled with leaven and dried in the sun, cooked by being boiled with butter and oil. It is the common dish with all classes in Syria (*Notes*, i. 59).

(*b*) The leguminous plants, beans and lentiles, form an important part of the diet of the Western Asiatics. These were probably included in the זֵרֹעִים *zērô'îm*, or pulse of Dn 1^{12}, which was despised but sufficient nourishment (v.$^{10.15}$); in Theod. the word is *σπέρματα* (LXX *ὄσπρια*, RVm herbs), which meant any vegetable food; see the name of the herbseller in Aristoph. *Lysist.* 457. In 2 S 17^{28} the word pulse is not in the Hebrew.

Lentiles (עֲדָשִׁים *'ădāshîm*, LXX *φακός*), the seeds of *Ervum lens*, which is still, as formerly (2 S 23^{11}), cultivated in Palestine, and used as food (Thomson, i. 253; Burckhardt, *Arabia*, i. 65). There are two varieties, one pale red the other dark brown, and the pottage made by boiling either of these is savoury (Gn 25^{34}), pleasant to the taste, and red, hence Esau called it 'the red, this red' (see incident in Diog. Laert. vii. 3). In Egypt lentiles were called *āršāna* (*Pap. Anastasi*, iv. 15), and in Assyria *a'ssu*. In Greece they were used as food by the poor (Aristoph. *Plutus*, 1004–5; and Pherecrates, *ap. Athen.* iv. p. 159). The Romans regarded lentiles as an Egyptian plant (Virg. *Georg.* i. 228; and Martial, *Epig.* xiii. 9), and they were sometimes used as a bread-stuff (Athenæus, *Deipnos*, iv. 158; see also Ezk 4^{9}). An allied species of vicia is used as a camel-food by the Arabs, and called *kersenna* (Robinson, ii. 83). Lentile flour is sold in this country under the name 'revalenta.' Lentiles were brought by Barzillai to David in exile (2 S 17^{28}). Pottage is sometimes made by boiling the lentiles with meat, more commonly a little suet is added to the water when boiling (Kitto).

Beans (פּוֹל *pol*, LXX κύαμος), the seeds of the common bean, *Faba vulgaris*, are also used in Palestine for food, especially by the poor. The bean is originally a native of Persia, and was sometimes used as a bread-stuff, as it is still in Savoy and other parts of Europe (Ezk 4^{9}; Pliny, xviii. 12); it is sometimes eaten parched or roasted (Theocritus, *Id.* 7. 65; Robinson, iii. 87). Food of this kind was brought to David in exile (2 S 17^{28}, but LXX omits the parched pulse). More commonly, beans are boiled in oil with garlic (Shaw, *Travels*, i. 257) or in water, and made into pottage, with or without meat; sometimes they are eaten with butter and pepper. Robinson describes raw beans, soaked in water until they sprout, as part of the Lenten fare of the monks at Mount Sinai (i. 259). In Egypt beans were used, and have been found sometimes in mummy cases; they were called *kat'a*, *ari*, and sometimes *pir*, but the last was probably the bean of the *Nelumbium lotus*, and *kat'a* is tr. by Lieblein the Opuntia fruit. Birch and Eisenlohr tr. *khcp* in the Harris papyrus as 'bean'; if so, they formed a part of the offering to Ptah; although Herodotus says that they were not eaten in Egypt, and were accounted impure (ii. 37). For similar prejudices against beans, see Porphyry, *de Abstinentia*, i. 26; Diog. Laert. viii. 19; Clement Alex. *Strom.* iii., and other authors. The high priest was forbidden to eat beans and lentiles on the day before the great Day of Atonement (Gemara, *Joma*, i. § 4), and the Flamen Dialis was forbidden to eat them also, as they were thought to dull the senses and cause disturbing dreams. For other superstitions concerning beans see Pliny, xviii. 12.

Husks (κεράτια) in the parable of the Prodigal Son (Lk 15^{16}) are the dark purple horn-like pods of *Ceratonia siliqua*, the charrub tree of the Arabs and of the Talmud. This is a large handsome spreading tree common in Mediterranean countries, whose sweet, fleshy pods, the caroba beans of the Italians, are used as food by the poor (Robinson, ii. 250). In Greece and Italy they were used by the Stoics as a disciplinary food for youths (Persius, iii. 55; Juv. xi. 58), and Horace's reference, *Ep.* II. i. 123, is well known. In Palestine, where the tree is fairly common, the beans are used as cattle food (*Shabbath*, xxiv. § 2), and are occasionally mentioned in the Talmud (see Maimon. in *Demai*, ii. § 1, and Buxtorf, *s.v.*). Pliny refers to their use in feeding swine (xv. 24; see Columella, vii. 9), and in Italy they are thought to give a sweet taste to the animal's flesh. They are imported into this country, and are sometimes called 'locust-beans' or St. John's bread, from a mistaken notion that they were the ἀκρίδες of Mt 3^{4}. Steeped in water they are used to make a pleasant, sweetish drink (see Pliny, xiii. 16 and xxiii. 8).

Fitches in Ezk 4^{9} (*kuṣṣemoth*) were cereal grains, probably spelt (see BREAD). The same word in AV of Is 28^{25-27} is in Heb. קֶצַח *ḳeẓaḥ*, LXX μελάνθιον, and signifies the black cummin, which is the seed of a ranunculaceous plant, *Nigella sativa*, a native of the Eastern Mediterranean countries. These seeds are beaten out of the pod-like follicles with a *maṭṭeh* or staff, and sprinkled on bread as a carminative, as we use caraway seeds (Pliny, xix. 7). They have a hot but not unpleasant taste. The plant is called *ḳizaḥ* by the Arabs and *kuzatu* in the Assyr. plant list, and in Vulg. is named *git*. For references to the use of these seeds, see Plautus, *Rudens*. v. 2, 39; Ausonius, 344, 8; Dioscorides, iii. 83; Pliny, xix. 8, xx. 17, etc.

(*c*) Of cucurbitaceous plants, melons, cucumbers, and gourds are mentioned in the Bible. The two former are fruits much relished in Egypt (Nu 11^{5}).

Cucumbers (קִשֻּׁאִים *kishshu'îm*, LXX σίκυοι) are the fruit of *Cucumis chate* (the *khata* of the Arabs) and *C. sativus*, the common cucumber. Both species grow freely in Egypt (Nu 11^{5}) and in Palestine, and, according to Kitto, are eaten by all classes to an extent that would scarcely be credible in this country; and Forskål says this is the commonest fruit in Egypt (*Fl. Ægypt.* 168). Finn speaks of Arabs eating cucumbers by the wayside for refreshment (*Byeways in Palestine*, 2). Robinson saw fields of them (iii. 344), and Thomson describes a garden of cucumbers with a booth for a watchman (Is 1^{8}). As birds do not eat them, a scarecrow is useless in such a place (Bar 6^{70}). In Assyr. they are called *kissu* and in Egyptian *skheptu*. Hippocrates speaks of them as eaten when green (*de Vict. Ratione*, ii.). The fruit of the *chaté* is longer and greener than the common cucumber. They are often eaten with vinegar or bread, or filled with mince-meat and spices. Tristram notes Arab children bringing to school as their dinner barley-bread and cucumber, which they ate rind and all. Forskål describes the method whereby a delicious drink is made from its juice.

Melons (אֲבַטִּחִים *'ăbaṭṭiḥîm*, LXX πέπονες, Nu 11^{5}), called by the Arabs *baṭṭîkh*, are grown and used abundantly both in Egypt and Palestine. Both the water-melon (*Citrullus vulgaris*) and the flesh-melon (*Cucumis melo*) are cultivated, and both were probably included under this name. The Talmudists distinguish these, calling the former *melapepon* and the latter *'ăbaṭṭiḥîm* (*Maaseroth*, i. § 4; *Terumoth*, viii. § 6; *Chilaim*, i. § 2), but in *Aruch* they are both known by their Heb. name. It is singular that in Coptic they are called by their Greek name.

Wild Gourd (פַּקֻּעָה), in plural *pĕḳāîm*, 1 K 6^{18} 7^{24}, or *paḳḳuôth*, 2 K 4^{39}, tr. in former passage 'knops,' in the latter 'wild gourd,' is the fruit of the vine-like *Citrullus colocynthis*, which is common in the Jordan Valley. 'To human nature it is of so mortal bitterness that little indeed, and even the leaf, is a most vehement purgative. They say that it will leave a man half dead, and he may only recover his strength by eating flesh meat' (Doughty, i. 132). It is very rare in the hill-country of Ephraim, hence the son of the prophet who gathered it did not know the plant, but mistook it for the non-poisonous *Cucumis prophetarum* or globe cucumber common in Samaria. In an Arabic version of La 3^{15} the text is rendered 'he hath sated me with colocynth,' so proverbial is its bitterness. Its elegant shape suggested its imitation in the ornamenting of the carved panelling of the temple and of the edge of the molten sea. In Assyr. it is *pikkuti*.

Jonah's Gourd (קִיקָיוֹן *ḳîḳāyôn*, LXX κολοκύνθη) was supposed from the likeness of the name to the Egyptian *kiki* (Herod. ii. 94) to be the *Ricinus communis*, the *Palma Christi* or castor-oil plant, a rapidly-growing herb which Pliny describes as becoming almost tree-like and capable of affording shade; even in our gardens its growth under favourable conditions is extraordinarily rapid. It is not quite clear what the *kiki* of the hieroglyphic texts was, as *ricinus* is in Coptic called *jismis*, which represents the ancient form *kesmes* or *kesbet*. Maimonides in *Shabbath*, ii. 1, says, however, the oil of kik is from a plant called by the Arabs *kherua*, which is *ricinus*. Tristram objects to this identification, as the *ricinus* is not a climbing plant, but the passage in Jon 4^6 does not describe it as such; he supposes the plant to have been the roof-gourd or *Lagenaria vulgaris* of which Pliny states that 'shooting upwards with the greatest rapidity it soon covers the arched roofs of houses and trellises' (xix. 24). The Vulg. renders it *hedera* or ivy, and this occasioned a controversy between Jerome and Augustine (see Hieron. in Jon 4^6 and *Epist.* 89). In early Christian art the plant is fancifully represented as a trailing melon-like plant covering a trellis-work, as on the sarcophagus in the Lateran from St. Peter's crypt (Parker's *Photog.* No. 2905; see also Bellorius, *de Antiq. Lucernis*, pl. iii. fig. 30, for a representation on a lamp). An undetermined species of climbing plant in Assyrian was called *ḳaḳulla*.

(*d*) Of alliaceous vegetables there are three mentioned as favourite foods of the Israelites in Egypt—onions, leeks, and garlic (Nu 11^5). All these are still much cultivated in Bible lands, and are in constant use among Orientals either raw or cooked.

Onions (בְּצָלִים *bĕẓālîm*, LXX κρόμμυον), the bulbs of *Allium cepa*. These are commonly eaten raw as a relish with bread, or boiled with meal (Robinson, ii. 211), or with lentiles (*Terumoth*, x. 1; Martial, *Epig.* iii. 376), or with beef (Apicius, 224). By the Assyrians the onion was called *sursu*, and by the Egyptians *het* (Copt. *mejol*). Herodotus tells that on the casing of the great pyramid was inscribed the value of the onions, garlic, and radishes eaten by the builders (ii. 25). The later Latin writers say that the onion was deified by the Egyptians (Juv. xv. 9; Plut. *de Iside*, 353). Pliny (xix. 6) says that garlic and onions are invoked by them when taking an oath; and Lucian (*Jup. Trag.* 42) says that the inhabitants of Pelusium were especially devoted to this cultus. There is, however, no native evidence for this. Among the Greeks onions were highly esteemed, and Homer speaks of Hecamede giving Patroclus an onion as a relish (*Il.* xi. 630); but Lucian describes them as food for the poor (*Dial.* Mer. 14. 2; *Ep. Sat.* 28).

Leeks (חָצִיר *ḥāẓîr*, LXX πράσα). The Heb. name used in Nu 11^5 literally means 'green herb,' and is rendered grass, hay, or green herb in 15 other passages; but as these are not human food, the translators have here followed the LXX, leeks being supposed to resemble grass in habit and colour. Leeks are eaten raw with bread, or sliced and put into vinegar, or boiled in pottage (Artemidorus, i. 67). Nero is said to have on stated days fed only on leeks and oil to improve his voice (Pliny, xix. 6). The Egyptian leek was particularly esteemed by the Romans. It was known as *āga* (Copt. *ēgi*), while the Assyrians called it *ezallu usuratti*. Ludolf translates *ḥāẓîr* 'lettuce,' and Scheuchzer says that it probably means the *Nelumbium lotus*; but the balance of evidence is in favour of the common leek (*Allium porrum*).

Garlic (שׁוּם *shûm*, LXX σκόρδον). The cloves or bulbs of *Allium sativum* were so commonly used as flavouring that the Jews were reproached for their liking for these strongly-scented herbs. In *Shabbat Jehuda* they are said to smell foully of garlic; and Salomon Levi defends their taste in *Theriac. Jud.* i. § 20. In Egypt this plant was, and is still, much used (Herod. ii. 125; Wilkinson, i. 169; Lane, i. 257). Garlic was supposed to have the power of neutralizing the poison of the asp, and its use by penitent criminals was believed to purify them and absolve them of guilt. In *Maaser sheni*, v. § 8, garlic is called the 'Lord of tears.' At the present day it is much prized in the East as a remedy for many ailments and as an antidote for many poisons; Pliny enumerates 61 ways in which it was recommended medicinally, and Prudentius speaks of an altar to the garlic as being erected at Pelusium. The Egyptians called it *ṣeṣen* (Copt. *ṣeṣen*).

Bitter Herbs (מְרֹרִים *mĕrōrîm*, LXX πικρίδες, Vulg. *lactucæ agrestes*) are mentioned in Ex 12^8, Nu 9^{11}, and referred to in La 3^{15} (EV 'bitterness'). Bitter salads are often eaten with meat in Egypt, Syria, and elsewhere, the commonest plant used for this purpose being the lettuce (*Lactuca sativa*), the *āfa* of the Egyptians, called by the Hebrews *ḥazereth* (probably the Assyrian *haserottu*). According to the rabbinical writers (*Pesachim*, ii. § 6), there were five bitter herbs which might be eaten with the paschal lamb: the endive (*Lactuca endivia*) was the second of these, called by them *ulshin* (probably the Assyr. *harussu*); it also is common in Egypt. The third is called *tḥamkah*, described by Maimonides as a garden endive, the *cichorium* of Pliny (xix. 6), but said in *Aruch* to be a *carduus*, in the Gemara to be a *gingidium*, probably the *Artedia squamata* of botanists, a bitter aromatic umbelliferous plant. In *Zematṭ David* it is said to be a kind of helminthia which grows near date palms. The fourth, *ḥarḥabina*, was probably *marrubium*, or the horehound, but according to Lightfoot the beet; and the fifth, *maror*, is called in *Aruch* a pot-herb, possibly *Inula Helenium* or *Elecampane*, which was a plant highly esteemed as a stomachic in the *Regimen sanitatis* of Salernum. Maimonides says it was a bitter coriander, which, according to Varro, was often pounded, mixed with vinegar, and sprinkled over meat; but Lightfoot thinks that *maror* is horehound (*Ministerium Templi*, XIII. v. 2).

It is probable that the words of the ordinance of the passover were not meant to specify any particular bitter herb. According to *Pesachim*, ii. § 6, the herbs might be eaten fresh or dried, but must not be soaked, stewed, or boiled. Delitzsch gives *marru* and *muraru* as the names of bitter garden plants (*Assyr. Handwörterbuch*, 427).

For **Mandrakes** see MEDICINE.

(*e*) The fruits mentioned in the Bible are not very numerous.

Almonds (שָׁקֵד *shâḳēd*, LXX κάρυον) are mentioned in Gn 43^{11} as part of the present sent by Jacob to the Egyptian viceroy. They are said not to be common in Egypt, and the Egyptian name of the fruit is doubtful. Brugsch believes it to be the tree called *net'*; but the Coptic uses the Greek name, which means any nut. According to Heracleon, Epicharmos, and Philyllius, κάρυον is specially used for the almond, the bitter almond being distinguished in Greek as κάρυα πικρά or ἀμυγδάλα (see Athenæus, *Deipnos*, ii. 38). The almond was supposed to prevent the intoxicating effect of wine, and was consequently taken at wine banquets (Pliny, xxiii. 8; Plutarch, *Quæst. Conviv.* vi. 4). This tree grows wild on Carmel and in Moab, and is cultivated extensively in Palestine. The Heb. name means 'hastener' in reference to its early blossoming, hence the paronomasia in Jer 1^{12}. The blossoms, which look white at a distance, are compared to grey hair in Ec 12^5, and their shape was the pattern from which the cups of the seven-branched candlestick were made (Ex 25^{33}). Aaron's rod was probably an almond branch

(Nu 17^8); but there was an old tradition that it was of *storax* wood, and that its bearing almonds was miraculous (see the verses falsely attributed to Tertullian, *contra Marcion.* iv. 117). In Gn 30^{37} the almond tree is named לוּז *lûz*, the word from which the old name of Bethel was derived. Robinson notes a sweetmeat made of a mixture of almonds and dates as a present given to distinguished guests (i. 115). The ancient Medes mixed almonds with their bread.

Apples (תַּפּוּחַ *tappûaḥ*, LXX *μῆλον*), mentioned in Ca 2^{3-5} 7^8 8^5, Pr 25^{11}, Jl 1^{12}, cannot be the fruit to which we give this name, as it does not grow freely in Palestine, of which country it is not a native (see H. C. Hart, *PEFSt*, 1885, 282). Thomson says that he has seen it growing luxuriantly (i. 172), but Tristram believes that he has mistaken the tree (*N.H. of Bible*, 334). Robertson Smith, on philological grounds, has defended the claims of the common apple (*Pyrus malus*) to be identified with the *tappûaḥ*, but its scarcity renders this very improbable (*Journal of Philology*, xiii. 1885, p. 65). Kitto believed it to be the citron, which now grows freely in Palestine, and is described in Jos. (*Ant.* XIII. xiii. § 5) as one of the trees whose boughs were used at the feast of Tabernacles; but the citron is a native of N. India and China, and was probably of late introduction. Tristram has claimed the apricot as the apple of Canticles. It is a very widely cultivated tree, but is a native of Armenia (hence called by Dioscorides *μῆλον Ἀρμενιακόν*, *HP* i. 160), and is probably also a late import. The characteristics suggested by the texts are—(1) a shady tree, (2) with golden coloured fruit, (3) which is fragrant, (4) and pleasant to taste, (5) and which is the symbol of love. All these conditions are fulfilled by the quince. The tree is not very large, but it is one under whose shade one could sit or lie, as in the texts, and it is as suitable for this purpose as the vine or fig tree. Its fruit is extremely fragrant, and some varieties might be called golden by contrast if gathered in a silver filigree basket (Pr 25^{11}). It is pre-eminently the fruit of love (see the mass of evidence on this gathered in Celsius' *Hierobotanicon*, i. 255 ff.). The quince is called *μῆλον* without any adjective by some of the Greek authors (see, however, *Il.* ix. 542, where the *μῆλον* tree is called tall), and is the first of the apples described by Pliny (xxiii. 6). In the light of the description in the passage in Ca 8^5 the weight of evidence is in favour of regarding this tree as the quince, which, though unpleasing to the taste of most Europeans, is yet eaten with relish by many in the East, and esteemed most wholesome. Athenæus says that full ripe quinces are better food than any other kind of apple (*Deipnos*, iii. 20). For a discussion on the nature of the *tappûaḥ*, see Houghton, *PSBA*, 1889, 42. The quince has a special name in the Talmud, *parish* (see *Kelaim*, i. 4), and in Arabic, which forms the basis of Robertson Smith's argument; but in Jerus. Talmud, according to Abu'l Walid, *parishim* means asparagus; see Guisius, *in loco*, *Chilaim* (I. iii.). A common tradition identifies the quince with the tree of the knowledge of good and evil.

Dates, the fruit of the date-palm, *Phœnix dactylifera*, though given in the AVm 2 Ch 31^5 as a possible translation of דְּבַשׁ *dĕbash* (elsewhere rendered 'honey'), are not otherwise mentioned in the Bible. This is remarkable considering how frequently palms are referred to, and it has been supposed that the word honey in the phrase so often used in the Pentateuch descriptive of Palestine may refer to *dibs* or date-honey made by boiling down the fruit. This sweetmeat was made in Babylonia where palms abounded (Herodotus, i. 193), and was also made at Jericho (Jos. *BJ* IV. viii. § 3). LXX translates קַיִץ in 2 S 16^1 *φοίνικες*, 'dates,' and the palm is put among the fruit trees in Jl 1^{12}. As a cultivated tree the palm is little grown now in Palestine west of the Jordan. In Egypt the date-palm was called *ám* and *bà*, and dates *benrà*. In Assyria the date-palm was *gisimmaru*, and date-honey *dispu*. According to Doughty (i. 148), there is no worse food than the date, and he reports the Arabs as saying that when the date is eaten alone human nature decays. For references to the palm in classical and Oriental literature, see Celsius, *Hierobot.* ii. 445 ff.

Figs (תְּאֵנָה *tĕ'ēnâh*, LXX *συκῆ*), the fruit of *Ficus carica*, next to the grape the most highly prized of all the fruits of Bible lands, and 53 times mentioned in the Bible. Mohammed says of it that if any fruit has really come from Paradise it must have been the fig. Botanically speaking, what is called the fruit is the soft fleshy receptacle within which are the flowers and later the grain-like, hard, dry achenes. Hence the ancient authors speak of the fig tree as bearing fruit without flowers (Macrobius, *Saturnalia*, ii. 16); but as the fig itself is the inflorescence, the language of Hab 3^{17} is strictly correct. The buds or young figs appear before the leaves, hence a fig tree in full leaf should have its fruit developed. The precocious tree of Mt 21^{19} and Mk 11^{13} was therefore unnaturally barren. The fig tree bears every year (Thomson, ii. 101), but the Rabbinists speak of a variety called *benoth shuaḥ*, which only brings forth fruit each third year (Maimon. *Demai*, i. 1, and Bartenora in *Shebiith*, v. v. 1), and it has been supposed that this is referred to in Mk 11^{13}. The manuring of such an unpromising tree is alluded to by Cato, as in the parable, Lk 13^6.

The first crop, called בִּכּוּרָה *bikkûrâh*, *πρόδρομοι*, begins to redden in March and is ripe by June; unripe figs are called פַּגִּים *paggim* (hence the place-name Bethphage, 'house of green figs'). LXX calls the unripe figs in Ca 2^{13} *ὄλυνθοι*; but according to Theophrastus (vi. 8) and Hippocrates (574. 23) these are winter figs, which grow under the leaves and do not ripen. The early figs are the most delicious and refreshing (Is 28^4, Jer 24^2, Mic 7^1, Hos 9^{10}), and are easily shaken off (Nah 3^{12}). See Macrobius, ii. 16. The untimely figs of Rev 6^{13} are *olynthi*.

The summer figs, קַיִץ (2 S 16^1), ripen in August and September (see also Mic 7^1, Am 8^1). These are either eaten fresh or dried in the sun (*Shabbath*, viii. § 6), or made into cakes called דְּבֵלִים *dĕbēlîm* (1 S 25^{18} 30^{12}, 2 K 20^7, 1 Ch 12^{40}, Is 38^{21}). In making these the figs are sometimes first beaten in a mortar, then pressed into a cake (*Taanith*, xxviii. 1). These cakes, called by LXX *παλάθη*, were either round or square (see *Terumoth*, iv. § 8; *Baba mesia*, ii.). Herodotus uses the name *παλάθη* of other fruit cakes (iv. 23), but Athenæus distinguishes fig cakes as *π. Συρίακη*. Such cakes are still used by the Arabs (Burckhardt, i. 51), and with barley-bread are the common food of poor travellers in the East. The town Beth-diblathaim means the house of the two cakes of figs. On the two crops of figs see the *διφόρου συκῆς* of Arist. *Eccles.* 708.

A third crop of winter figs appears in August, and ripens at the end of November. These sometimes hang on the tree when the leaves are shed, unless the tree be exposed to frost.

Figs are liable to disease, both from parasitic fungi and from insects. There are several species of both, which attack the fruit and cause it to be shed prematurely, or to shrivel and become uneatable (Jer 24^8 29^{17}). For reflections on this vision see Hieron. *Comment. in Jer.*, on 5^{24}.

Sycomore Figs (שִׁקְמָה, pl. *shiḳmîm* or *shiḳmôth* in Ps 78^{47}) are the small fig of the *Ficus sycomorus*, a bluish-purple fruit eaten by the poorer classes, but considered unwholesome and indigestible (Dioscor. i. 182). The tree grows to a large size, and is found in Palestine in the lower lands from Joppa to Egypt (1 K 10^{27}, 2 Ch 1^{15}; see Bartenora in *Shebûth*, ix. 2). Jerome notes that they are easily killed by frost, and so they were destroyed by the storm-plague in Egypt (Ps 78^{47}). As in the hollow receptacle the flowers which bear stamens are at the upper and those bearing pistils at the lower part, it ensures fertilization to pinch or incise them, thereby facilitating the entrance of the insects whose movements in the plant promote fertilization; this is known as caprification (Pliny, xiii. 14; Theophrastus, iv. 2). Amos calls himself a בּוֹלֵס *bōleṣ*, or scratcher of sycomore fruit, in allusion to this (LXX *κνίζων συκάμινα*, RV 'dresser of sycomore trees'). The superintendence of this was probably the function of Baal-hanan (1 Ch 27^{28}). This tree is abundant in Egypt, and of its wood most mummy coffins are made; as its branches generally arise from the trunk low down, it is easily climbed (Lk 19^{4}). The fruit was free from tithing among the Jews (*Demai*, i. 1).

Mulberries (בָּכָא *baca*, LXX *συκάμινος*) are not mentioned as fruit; but as the tree is common in Palestine, and as the berries are now eaten freely, they were probably used in Bible times. The trees are named in 2 S 5$^{23f.}$ and 1 Ch 14^{15}, and the place named from them 'Baca's vale' in Ps 84^{6}. Our Lord refers to the tree under the name sycamine in His lesson on faith (Lk 17^{6}). For a description of the marvels of this tree see Pliny, xvi. 41, where it is described as being as remarkable as a creature possessed of animation (see also xxiii. 7).

Nuts (בָּטְנִים *boṭnîm*, LXX *τερέβινθος*) are the fruit of the *Pistacia vera*. This tree is a native of Syria, although not very abundant, and was brought into Europe by the Romans. The nut is the stone in the centre of the greenish drupe, and its kernel is oily, soft, and not unpleasant to taste. It is mentioned only in Gn 43^{11}. The tree is often mentioned, but its name אֵלָה *'ēlâh* or *'ēlôn* is translated oak or teil tree, as Is 6^{13} (RV terebinth tree).

Olives (זַיִת *zayith*, LXX *ἐλαία*), the same name for both tree and fruit. These are often mentioned in Scripture (37 times in OT and 18 in NT), and the *Olea Europæa* is a native of Palestine, and much cultivated for the sake of the oil extracted from its drupes. In Egypt the tree was called *degam*, and was esteemed in early days as a specific for all ailments (see *Papyrus Ebers*, p. 47; in the *Harris Pap.* it is called *degetu*). The tree is small, slow of growth, and irregularly branched. Its wood is hard and fine-grained, and its leaves like those of a large privet, but whitish beneath. It has a small white flower growing in racemes, and its fruit is well known. The wild plants of the olive are sometimes used as stocks on which to graft cultivated varieties with larger fruit (Ro 11^{17}). The low size of the tree made the olive leaf brought by the dove to Noah significant (Gn 8^{11}). These trees are cultivated in orchards or olive yards (Ex 23^{11}); when ripe they are beaten (Dt 24^{20}) in order to strike off the fruit (in Is 17^{6} and 24^{13} badly tr. 'shaken'), and the fruit is brought to the oil mills, which consist of circular stone basins in which the drupes are crushed by a heavy stone wheel that is rolled over them. The mass is then put into small wicker baskets, which are piled over each other in a *m'aẓerah* or handpress, in which they are squeezed either by means of a long lever or a screw. The ancient presses were all lever presses. After the first pressing the pulp is put into copper pans, sprinkled with water and heated, and then pressed again. Where there is water-power the press is larger, and the mill is called a *mutrûf*; in this the olives are pressed in a stone cylinder, within which an iron-shod shaft rotates. In old presses the pressure of the lever was supplemented by heavy stones (Thomson, i. 286). The oil is allowed to stand until the sediment subsides, and it is then poured off; sometimes salt is used to clarify it. Among those who have no oil presses the pulp is put in hot water and the oil skimmed off. The fruit is sometimes kept until soft and black before crushing. It is possible that in this state it may sometimes have been trodden by the feet, but that is never done now (Mic 6^{15}). The oil is kept in cisterns of stone or cement (1 Ch 27^{28}), or in jars (*khawabics*) kept in cellars. For a description of the oil presses see Robinson, *BRP* iii. 365; and Thomson, *Land and Book*, ii. 286 ff. Gethsemane means an oil press.

The oil of the olive was one of the most important products of the Holy Land: corn, wine, and oil were its three staple crops. 'Certe oleo et vino gaudebat Palæstina præ Ægypto' (Reland, *Palæstina*, ccclvii.). The oil is used in cookery (Lv 2^{4}), and is spread on bread (Ex 29^{23}), or burnt in lamps for lighting (Ex 25^{6}), or used externally for anointing. This use is referred to in Jotham's parable (Jg 9^{9}). The excessive use of oil was a luxury which brought men to poverty (Pr 21^{17}). Olive oil is called שֶׁמֶן זַיִת *shemen zayith*; the finer oil which runs out of pounded olives without compression is distinguished as כָּתִית *kāthîth* (Ex 27^{20}, Lv 24^{2} etc.). Olive oil was one of the exports from Judah to Tyre (Ezk 27^{17}). Oil was occasionally carried as a part of their provisions by travellers (Lk 10^{34}).

The olive tree is liable to a parasitic mould disease, a mildew which causes it to cast its fruit or makes its flower to shrivel (Dt 28^{40}, Job 15^{33}). It is also liable to be attacked by insects (Am 4^{9}). The olive tree is used as a type of heavenly favour (Ps 52^{8}, Hos 14^{6}, Jer 11^{16}), and of family prosperity (Ps 128^{3}). Oil is used metaphorically as expressive of divine grace (see ANOINTING); or the salutary reproof of the righteous (Ps 141^{5}). The oil of joy is spoken of in Is 61^{3}, see Erman, p. 231. The oil tree, *'ēẓ shemen* of Neh 8^{15}, 1 K 6^{23}, Is 41^{19}, is generally believed to be the *zackum* or *Balanites Ægyptiaca*, a native of the Jordan Valley, and one whose oil is esteemed as a useful medicine.

Pomegranates (רִמּוֹן *rimmôn*, LXX *ῥόα*), used both for the tree and the fruit. This is also an abundant fruit in Palestine, of which it is a native, and is mentioned 32 times in the Bible. Pomegranates were among the fruits brought back by the spies from Eshcol (Nu 13^{23}). The tree (*Punica granatum*) grows to about 20 ft. in height, and has myrtle-like leaves and scarlet flowers, which come out early in the spring (Ca 6^{11}). The fruit is well known, and was a favourite with the Jews; its bright colour is referred to in Ca 4^{3}. Its sour juice was, and is, used in cookery (Russell, i. 85; Thomson, i. 286) and in making cooling sherbet, as we use lemons. The juice is sometimes fermented (Dioscorides, v. 34), but the wine is rather tasteless unless spiced (Ca 8^{2}). 'In this fruit Nature has shown to us a grape, and indeed not must, but wine ready made' (Pliny, xxiii. 6). The pomegranate supplied a pattern for ornament (1 K 7^{20}, Ex 28^{33}. In RV 'pomegranates' in 1 K 7^{18} is tr. 'pillars').

Vines (גֶּפֶן *gephen*; in Nu 6^{4}, Jg 13^{14} גֶּפֶן הַיַּיִן *gephen hayyayin*, the wine-vine). The *Vitis vinifera* was the fruit tree most abundantly cultivated in Palestine and Egypt in ancient times. It is a native of the hilly countries north of Syria, but early spread along the shores of the Mediterranean. Grape kernels have been found in mummy cases of the 11th dynasty in Egypt, dating from about B.C. 2000. A special variety with dark red grapes is called שׂרֵק *sôrēḳ* (Is 5^{2}, Jer 2^{21}, Gn 49^{11}); these grapes have very small kernels. Figuratively, the unpruned vine in the sabbatic year and jubilee is called נָזִיר *nāzîr*, being compared to the untrimmed hair of the Nazirite. The colocynth plant in 2 K 4^{39} is called *gephen sādeh*, a vine of the fields. A wild grape-vine bearing worthless grapes is called *gephen nokri* in Jer 2^{21}, 'the degenerate plant of a strange vine.' Palestine, especially in its hilly parts, is well suited for vine-growing—'Apertos Bacchus amat colles' (Virgil, *Georg.* ii. 113). The valley of Eshcol, named from its bunches of grapes, produced the great cluster which the two spies carried home between them on a staff, Nu 13^{24} (see Wagenseil, *Sota*, 709^{a}). Modern travellers have seen bunches of 10 to 12 lb. in weight; still larger bunches up to 19 lb. have been grown in this country under glass. The hills about Jezreel, where Naboth's vineyard was situated, were famous for their vines, as were the grapes of Ephraim (Jg 8^{2}). The Moabite hills of Sibmah (Is 16$^{8.\,9}$, Jer 48^{32}), and those of Heshbon and Elealeh, were also renowned, and those of Engedi (Ca 1^{14}) in Judah. It was in the hill-country of Judah that the *sôrēḳ* grew (Gn 49^{11}), and the valleys of Sorek and Eshcol were named from these, as was Beth-haccherem, 'the house of vines,' near Tekoa (Jer 6^{1}). A bottle of Bethlehem wine was a present fit for a king (1 S 16^{20}). The wines of Lebanon (Hos 14^{7}) and of Helbon (Aleppo *) (one of the exports from Syria to Tyre, Ezk 27^{18}) are also named (Robinson, *BRP* iii. 472).

In preparing the vineyard, the stones had to be gathered out of the soil (Is 5^{2}). This is noticed by Cato (*De Re Rustica*, 46), who says that the vineyard should be 'bipalio delapidato.' It needed also to be fenced with a hedge (Mt 21^{33}), a stone wall (Nu 22^{24}), or a ditch, to protect it from the wild beasts, such as jackals (Ca 2^{15}, Ezk 13^{4}), boars (Ps 80^{13}), and from robbers (Jer 49^{9}). The favourite site was a hillside (Is 5^{1}, Jer 31^{5}, Am 9^{13}), and the plants are set about three paces from each other in rows (Robinson, ii. 80 f.). When the vines grew up they were sustained on stout stakes, over which the branches were trained (Ezk 19$^{11.\,12}$). This was also the practice in Egypt; see Lepsius, *Denkmäler*, ii. 53, 61. All these conditions may be observed to this day, although the Mohammedan rule has discouraged viticulture in Palestine. There is usually a tower (πύργος) in a large vineyard, as described in Mt 21^{33}, in which the watchers of the vineyard stay. Vineyards were called in Heb. כֶּרֶם *kerem*. In Am 5^{11} this is coupled with חֶמֶד *ḥemed*, 'pleasant,' in Is 27^{2} with חֶמֶר *ḥemer*, 'of wine,' but Targ. reads *ḥemed* here also, and LXX καλός. The towers in the vineyards for the keepers or vine-dressers (כֹּרְמִים) (Ca 1^{6}) are mentioned in *Chilaim*, v. § 3, but in smaller vineyards they lived in booths (Is 1^{8}). The vineyard must not be sown with two kinds of seed, else the whole produce was forfeited as a קֹדֶשׁ *ḳōdesh*, or sanctified thing (Dt 22^{9}); but trees of other sorts, as fig trees, might be planted in a vineyard (Lk 13^{6}, Mic 4^{4}). Ramses III. had olive trees in his large vineyard, which was called the 'spirit of Egypt,' *Pap. Harris*, i. 8. 7.

The vine-buds appear in March, and send out new branches, which are called שָׂרִיגִים *sarîgîm*. These are not tendrils, for in Gn 40^{10} they are described as bearing fruit; when living, these new branches are green, but when the surface is eaten by locusts the skeleton branch looks white (Jl 1^{7}). The tendrils are called זַלְזַלִּים *zalzallîm* in Is 18^{5}, or *ṣalṣillôth* in Jer 6^{9} (see Basket). The flowers appear in early April, and have a slight fragrance (Ca 2$^{11.\,13}$). This was the time when the vines were pruned, hence it is said in the passage that in the spring-time the period of the זָמִיר or pruning of vines (RVm) has come (so LXX, Aq. Symm. Targ. Vulg.). AV follows Parchon and Kimchi in rendering it 'the time of the singing of birds is come.' The reference to the pruning of vines in Jn 15^{9} is familiar.

The grape (עֵנָב *'ēnāb*) grows in clusters, which are named אֶשְׁכֹּל *'eshkôl*, LXX σταφυλή. The fruit-bearing branch is in Nu 13^{23} called זְמוֹרָה *zĕmôrâh*, which is the word used in the phrase descriptive of the worship of the sun in Ezk 8^{17} 'they put the branch to the nose,' usually taken as referring to an old Persian custom of holding a bundle of vine-rods, called *barsom*, before the face of the priest when praying to the unextinguished fire of the Pyrætheia (Strabo, ed. Casaubon, xv. 733). For a different meaning see Tract *Joma*, 77^{a}.

The ripening grapes are called בֹּסֶר *bōṣer* in Is 18^{5}, and nearly the same word is used in Job 15^{33}. These are sour and set the teeth on edge (Ezk 18^{2}). Sickly vines sometimes drop their grapes in this stage (as in Job 15^{33}), the result of a blight. In June or July the early grapes are ripe (Is 18^{5}), and in September the vintage (בָּצִיר *bāẓîr*) begins. This is a season of rejoicing, and during the grape-harvest the people live in booths in the midst of the vineyards. It has been conjectured that the ordinance of the Feast of Tabernacles was a mode of turning this custom to the service of religion. This vintage season was celebrated at Shechem (Jg 9^{27}). The grapes are cut with a מַזְמֵרָה *mazmērâh*, or pruning hook (Is 2^{4}, Jl 3^{10}), which is called מַגָּל *maggâl*, or sickle in Jl 3^{13}, and are collected in baskets. There was no vine-harvest in the sabbatic or jubilee year. For particulars on viticulture see Thomson, *The Grape Vine*; and Barron, *Vine Culture*.

The best grapes were dried in the sun into raisins, which were compressed into צִמּוּק *ẓimmûḳ*, or cakes (Kimchi). Abigail brought 100 such cakes to David (1 S 25^{18}), and David refreshed the fainting Egyptian with two such cakes (1 S 30^{12}). Similar cakes were brought by Ziba to David (2 S 16^{1}; see also 1 Ch 12^{40}). These raisins, as well as fresh grapes, were forbidden to the Nazirite while under his vow. To him all that comes of the grape, from the חַרְצַנִּים *ḥarẓannîm*, or kernels, to the זָג *zāg*, or husks, was taboo (see Jg 13^{14}). The אֲשִׁישׁוֹת *'ăshîshôth*, given by David to those who accompanied him in bringing the ark to Jerusalem (2 S 6^{19}, 1 Ch 16^{3}), and tr. in AV 'flagons of wine,' were probably cakes of raisins, as in RV, which has made a similar change in Ca 2^{5}. The reading in the AV is supported on Talmudic authority, but this rests on a very doubtful etymology. For the use of these fruit-cakes by travellers see Russell, i. 82. Cakes of this kind were used as offerings to Baal (Hos 3^{1}).

The grape gatherers were forbidden to glean, the עֹלֵלוֹת *'ôlēlôth* or gleanings being left for the stranger, the widow, and the fatherless. In the prophetic picture of rebellious Jerusalem as a vine, the fruit is described as being completely gleaned, the gatherer turning his hand back into the tendrils of the vine (Jer 6^{9}; see also Jer 49^{9}).

A portion of the grape-harvest is used in making artificial honey or *dibs*, the juice expressed from the grape being boiled into a syrup, 'dulcis musti Vulcano decoquit humorem, et foliis undam trepidi despumat aheni' (Virg. *Georg.* i. 295). The Heb. name is דְּבַשׁ *dĕbash*, or honey, and it was an article of commerce exported from Palestine to Tyre (Ezk 27^{17}), and sent by Jacob to Egypt (Gn 43^{11}). (See Dates, above.) *Dibs* forms 'a part of the food of the present inhabitants of Palestine' (Thomson, i. 279; Russell, i. 82). It was, and is, the ordinary sweetener of cakes and pastry (Lv 2^{11}, Robinson, iii. 381).

Most of the crop was carried in baskets by girls and children to the wine-presses (see description of the shield of Achilles, *Il.* xviii. 562 ff.). These were cavities either hollowed out of the rock or built on the ground, and lined with masonry and cement (Mt 21^{33}). Each press, called

---

* But Schrader (*COT*^{2} ii. 121) disputes the identification.

גַּת *gath*, LXX ληνός, was made of two parts. The upper was the פּוּרָה *pûrâh* (LXX προλήνιον), or wine-press proper (Is 63^3 5^2). From the bottom of this a pipe, צִנּוֹר *ẓinnôr*, leads into the lower receptacle or יֶקֶב *yeḳeb* (LXX ὑπολήνιον, the 'fat' or vat of Jl 2^{24} and 3^{13} as in Mk 12^1 AV, wine-press RV). The names *yeḳeb* or *gath* are used, however, for the whole wine-press. In Hag 2^{16} the *pûrâh* is called the press-fat (AV) or wine-fat (RV, see *Aboda Zara*, iv. 8). In these presses the grapes were trodden. The whole process is shown in several Egyptian pictures (Lepsius, ii. 13, 53, 96, iii. 11^a; Wilkinson, i. 385), in one of which the treaders are represented holding by cords from the roof over the *pûrâh*. Sometimes flat stones are put over the grapes to assist the treading. The garments and feet of those treading are dyed with the 'blood of the grape' (Dt 32^{14}, Is 63^3). As they trod they shouted (Jer 48^{33}) and sang their vintage songs (Is 16^{10}). It has been supposed that there is a line of one of these preserved in Is 65^8 (see Smith, *OTJC*^{2} 209). The same customs are still observed wherever wine is made in the East (Robinson, i. 431 and ii. 81). The wine-press is a favourite figure with the prophets, typifying God's judgments on sin (Is 63^3, La 1^{15}, Rev 14^{20}).

The first part of the juice which entered the *yeḳeb* was the first-fruits (Ex 22^{29}), and was offered to God. In Egypt the residuum from the press is put into a sack and squeezed by wringing; see Lepsius, ii. 53.

There is no mention in the Bible of the subsequent processes of wine-making, but probably the expressed juice was left in the 'fats' until fermentation had set in (Hag 2^6), or put, as represented in the Egyptian picture (Wilkinson, i. 385), into jars, or, when fermented, it was transferred for storage to large ox-skins. These at the present day are kept ranged around the storehouse or cellar, which is called in 1 Ch 27^{27} אוֹצַר הַיַּיִן *'ōẓar hayyayin*. Bruce speaks of ox-skins capable of holding 60 gallons, and greased on the outside to prevent evaporation (*Travels*, iv. 334; see Athenæus, ii. 28. Herodotus speaks of camel-skin vessels, iii. 9). When the deposit of the tartarous matter or lees (שְׁמָרִים *shĕmārîm*, LXX τρυγέας, δόξα, or φύλαγμα) had taken place, the clear supernatant wine was poured off into a new vessel (Jer 48^{11}), and this is the well-refined wine of Is 25^6. In this passage *shĕmārîm* is used in alliteration with *shĕmānîm*, 'fat things,' in the earlier clause. Drinking the lees is used allegorically in the sense of the bitter penal consequences of sin (Ps 75^8; see also Zeph 1^{12}, Jer 48^{11}).

Wine is known by nine names in the OT, but these do not necessarily mean different kinds. The varieties of wines are named from the locality of their production. Thus we read of the wines of Kerotim, Tolim, Bethrima, Bethlaba, and Signa as those suited for the service of the sanctuary (*Menachoth*, viii. 6). Other well-known wines were those of En-gedi, Acco, and Gaza. In Egypt the wines of Bubastis (Herod. ii. 126), of Sebennytus, and of Mareotis (Strabo, xvii. 779; Athenæus, i. 33) were highly esteemed. Saronitie wine was so strong that it needed two parts of water to dilute it (*Shabbath*, lxxvii. 1), and Babylonian wine needed also to be diluted (*Berachoth*, i.). See Kimchi (*Comm.* on Hos 14^8).

The commonest word used for wine is יַיִן *yayin*, a loan word from a non-Semitic root. This occurs 143 times, being first mentioned in connexion with Noah's drunkenness. It is the word used for wine in the blessing of Jacob (Gn 49$^{11.12}$); it is said to cheer God and man (Jg 9^{13}), and to make glad the heart of man (Ps 104^{15}). Repentant and returning Israel is to be rewarded by again drinking the wine of her vineyards (Am 9^{14}), as she had done before (Ec 9^7). It was to be given to them of heavy heart (Pr 31^6), but its use had to be limited, for it was intoxicating, as in the cases of Nabal (1 S 25^{37}), Lot (Gn 19^{32}), Amnon (2 S 13^{28}), the drunkards of Ephraim (Is 28^1). It was the wine used by Job's family (Job 1^{13}); but king Lemuel was dissuaded from its use, because it is said to prevent judgment (Pr 31^5), and to cause vomiting (Is 28^7 5^{11}, Hos 7^5). It is called a mocker (Pr 20^1; see also Jer 23^9). It was this form of wine with which Melchizedek welcomed Abraham's return (Gn 14^{18}). It is usually rendered οἶνος by LXX. In general, this word is used when wine is spoken of as a beverage.

תִּירוֹשׁ *tîrôsh* occurs 38 times, and is rendered by LXX by οἶνος, ῥώξ (Is 65^8), or μέθυσμα (1 S 1^{15}, Jer 13^{13}, Hos 4^{11}). It is so called because it takes possession of the brain and inebriates (Gesenius; but most moderns reject this etymology). In enumerating the products of the land, corn and wine (*tîrôsh*) are mentioned 21 times, and oil is coupled with *tîrôsh* 15 times. The Targumists, Onkelos, and Jonathan render it by *ḥamer*. It is said to take away the understanding in Hos 4^{11}, and its intoxicating qualities are referred to by the Talmudists, 'Tirosh easily takes possession of (יוֹרֵשׁ, a play upon the word) the mind,' *Sanhedrin*, lxxvi. § 1. In *Joma*, lxxvi. 2, it is said, 'If thou abuse it thou shalt be poor (רָשׁ), if thou rightly use it thou shalt be head (רֹאשׁ)'; and in the Gemara on this, 'Wherefore is it called tirosh? Because all taken by it shall be poor.' In Jer 40$^{10.12}$ the words *yayin* and *tîrôsh* are used as synonyms, and in general *tîrôsh* is translated 'new wine' in AV. It has been argued that *tîrôsh* meant grapes, because the phrase is used 'to gather *tîrôsh*'; but the same is used of *yayin*, and both are spoken of as trodden out, *yayin* in Is 16^{10}, *tîrôsh* in Mic 6^{15}. Collating all the references, it seems as if *tîrôsh* was especially used for wine as the produce of the vineyard. See further, Driver, *Joel and Amos*, 79 f.

שֵׁכָר *shēkār*, LXX σίκερα, is the word tr. in general 'strong drink,' which occurs 23 times in OT. It was used for the drink-offering (Nu 28^7), and was permitted to be bought with the tithe money and consumed at the temple (Dt 14^{26}). In excess it caused merriment (Is 24^9, Ps 69^{12}) and intoxication (Is 56^{12}); it is often coupled with wine, as if another intoxicating fluid; Ibn Ezra says it was made from palm-juice or wheat, Kimchi says from fruit juice, Jerome from grain, grapes, or honey (*Epist. ad Nepotianum*, ii. 11), so it may have been like the barley wine of the Egyptians (Herod. ii. 77), or like arrack, which is at present often used in Palestine (Robinson, iii. 195). It is mentioned, among other places, in Lv 10^9, Nu 6^3, Dt 29^6, Jg 13$^{4.7.14}$, 1 S 1^{15}, Mic 2^{11}. Strong drink was to be given to those ready to perish (Pr 31^6), which has been supposed to refer to the practice of giving intoxicants to deaden the pain of execution. Lightfoot says that it was the practice of wealthy women in Jerusalem to provide the strong drink for this purpose (*Hor. Heb.* xi. 366). The vinegar given to our Lord may have been intended for this purpose. *Shēkār* seems to be named from its effects (שָׁכַר 'to be drunk').

חֶמֶר *ḥemer*, used twice in Heb. (Dt 32^{14}, Is 27^2, but last probably mistake for חָמַר) and six times in Aram. (Ezr 6^9 7^{22}, Dn 5$^{1.2.4.23}$), seems to be derived from the sparkling, foaming appearance of fermenting wine. In Is 27^2 the clause in which it occurs appears to be another line from a vintage song. It was wine of this kind that Cyrus gave for the temple use (Ezr 6^9). In Dt 32^{14} it is called the pure blood of the grape, *i.e.* not mixed with water; but RV has tr. it the blood of the grape, wine. It is red wine in Is 27^2, and it was the wine which Belshazzar drank out of the temple vessels (Dn 5^1).

עָסִיס *'āsîs*, a poetical synonym meaning that which is trodden out. It is the new wine of Ca 8^2: the sweet intoxicating wine of Is 49^{26}, the sweet wine lamented by the drunkards in Jl 1^{5}, and that which is supplied to the restored remnant of Israel as a blessing (Jl 3^{18}). It is rendered in LXX *νᾶμα, γλυκασμός*, but the sweet wine of Am 9^{13} is *μέθη*. It is probably the same as 'the sweet' of Neh 8^{10}, where it is called מַמְתַּקִּים *mamtaḳḳîm*, or sweetnesses.

סֹבֶא *sōbe'*, intoxicating drink in general, the wine of Is 1^{22}, which was spoiled by mixture with water, or that in Hos 4^{18}, which had become sour, or that which drenched the drunkard to helplessness (Nah 1^{10}).

מֶסֶךְ *meṣek*, in Ca 8^{2} מֶזֶג *mezeg*, LXX *κέρασμα*, is mixed wine, to which spices have been added to make it hotter and improve its flavour. In Pr 23^{30}, Ps 75^{8}, Is 65^{11} it is called *mimṣāk*. In Pr $9^{2.5}$ it is used metaphorically for the inspiring drink supplied by wisdom, and in Is 5^{22} for the strong drink which warps the judgment. In Pr 23^{30} it is a parallel synonym for *yayin*.

חֹמֶץ *ḥōmeẓ*, or vinegar, is sour wine, the common refreshing drink for labourers, forbidden to the Nazirite while under his vow (Nu 6^{3}), used in the harvest field (Ru 2^{14}), and prophetically mentioned in Ps 69^{21}. In Pr 10^{26} LXX renders it *ὄμφαξ*, an unripe grape.

In NT the word commonly used is *οἶνος*, as at the marriage feast at Cana. This wine in excess produced *μεθύσις* (Jn 2^{10}). New wine was regarded as inferior to old (Lk 5^{39}). Γλεῦκος, 'new sweet wine,' is mentioned in Ac 2^{13} as that by which the Jews thought the apostles were intoxicated at Pentecost. It cannot have been unfermented, as that would not have produced the effect, and Pentecost was eight months after the vintage.

The collecting of juice from the grapes, which the chief butler in his dream squeezed into the cup, was plainly only a symbol, as in the dream he saw the whole process of budding, blossoming, and fruiting taking place. There is no evidence of any such custom as squeezing grapes into a cup for royal or guest refreshment. There are several figurative names for wine: 'the fruit of the vine' (Lk 22^{18}), 'the blood of the grape' (Dt 32^{14}); the former reminds us of Pindar's *δρόσος ἀμπέλου* (vii. 3), or of the name of the vine *οἴνου μήτηρ* in Æschylus (*Persæ*, 614).

The study of the names applied to wine shows that they are, for the most part, evidently synonyms, and that the substance indicated by them all was one which, if used to excess, was liable to cause intoxication. An attempt has been made to obtain a textual support for total abstinence by differentiating intoxicating from unfermented wine in the biblical terminology; but it is only special pleading without adequate foundation. The teaching of Scripture as to the pernicious effects of intemperance in any form is clear and explicit, and the Apostle Paul has stated the case for total abstinence in Ro 14 in a way which does not require the treacherous aid of doubtful exegesis for its support.

The wine stored in the large skins in the cellar was drawn for use into smaller skins, the bottles of Scripture, called חֵמֶת *ḥēmeth* in Gn $21^{14\text{ff.}}$, נֵבֶל *nēbel*, 1 S 1^{24} 10^{3}, 2 S 16^{1} (this word is used figuratively for the clouds in Job 38^{37}), or נֹאד *nōd*, Jos 9^{4-13}, Jg 4^{19}, 1 S 16^{20}. This word is also used figuratively in Ps 56^{8} in alliteration with *nōd*, 'wandering,' for there is no evidence of the use of lacrymatories among the Jews. The *nōd* was liable to shrivel if hung up in the heat (Ps 119^{83}). In LXX and NT bottle is *ἀσκός*. These were made of goat-skins, prepared by cutting off the head, tail, and feet, and then drawing off the skin from the body without other cutting, and stuffing it with straw, into which wooden wedges were then driven, to stretch it to its fullest capacity. The hair was left on the outer surface, the tail and limb holes were closely sewn up, and the neck hole left open. The skin was thereafter tanned with oak or acacia bark. These skins are prepared in this manner at the present day, and are called *zumzammim* or *mattaru*. When filled, the neck hole is tied round with a thong. Robinson saw about 500 of these bottles in one tanyard (ii. 75). The larger bottles are of he-goat skins, the smallest of the skins of kids. This variety of size is alluded to in Is 22^{24}. When active fermentation is in progress these skins become much distended, and are liable to burst. This is especially liable to occur with new skins of young animals, which are called אֹב, as in Job 32^{19}. These are called in Vulg. *lagunculæ*. Skins which are old are liable to crack, and cannot bear the tension of the carbonic acid produced during fermentation. This is referred to in Mt 9^{17}, Mk 2^{22}, Lk 5^{37}. The preservation of the wine did not mean keeping it from fermentation,—for, with the total absence of antiseptic precautions characteristic of Orientals, it would have been impossible to do so,—but the storing of it in a bottle which could resist the strain. One of these bottles was a load for a man (1 S 10^{3}).

Wine was largely used in Egypt, and the figures of drinking feasts, and the painting of an inebriated female from a tomb of the New Empire, are well known (see Wilkinson, i. 392, 424, etc.). There is an interesting letter written by the scribe Amen-em-apt to Penta-ur, in which the evils of intemperance are graphically described (*Pap. Sallier*, I. ix. 9, etc.). The commonest beverage in Egypt was beer, made from barley, and called *heḳ*. The wine made from the grape, also commonly used, was called *arp*, and date wine was called *baḳ*. Among the presents to Ptah enumerated in the *Harris Papyrus* were 2366 wine vessels of one form and 820 of another; and in the inventory of presents on pl. 72 of that papyrus are 486,303 vessels of beer. The Persians were also much addicted to wine (Herod. i. 133), and the royal wine of Est 1^{7} is referred to by Athenæus (*Deipnos.* i. 51); it was called Chalybonian, and Posidonius says that it is made in Damascus. Figuratively, the washing of garments in wine means plenty and prosperity (Gn 49^{11}). Wine of astonishment, Ps 60^{3} (RV staggering), is a figure of God's judgment on sin, making its objects helpless, as if intoxicated. This is called the cup of staggering in Is 51^{17}.

The **Vine of Sodom** (Dt 32^{32}) is probably, as Seetzen and Robinson have supposed, the *'ōsher* or *Calotropis procera*, an asclepiadaceous plant, whose fruit looks attractive, but is full of dry cottony hairs. These are the 'grapes of gall.' Pococke supposed that it referred to diseased pomegranates, and Hooker conjectures that the colocynth may have been meant; but its fruit has no resemblance to grapes (see **Wild Gourd**, above). Elliot suggests oak galls as referred to, and Hasselquist the egg plant, either *Solanum melongena* or *S. Sodomæum*; but the first identification is most probably correct, more especially as the *Calotropis*, while not very common, grows abundantly in one locality by the Dead Sea.

Walnut (אֱגוֹז *'ĕgōz*, *καρύα*) is not mentioned as a fruit; but a garden of nuts, which is mentioned in Ca 6^{11}, is taken by the rabbinical authorities as meaning a garden of walnuts. The Arabs call the tree *gyaus*, and it is very common in Palestine. The common walnut, *Juglans regia*, is too well known to need description.

Fruit is referred to metaphorically in the sense of (1) the result of a course of conduct (Ro 6^{21}); (2) the work of the Holy Spirit in the conduct (Gal 5^{22}, Eph 5^{9}); (3) children (Ps 127^{3}); (4) praise (Is 57^{19}); (5) the results of industry (Pr $31^{16.31}$), etc.

Mallows (מַלּוּחַ *mallûaḥ*, LXX *ἅλιμον*, Vulg. *Ar-*

borum cortices) are spoken of in Job 30^{4} as plants eaten by starving outcasts. They have been variously identified as nettles by R. Levi, as possibly a mesembryanthemum by Kitto, as mallows (*malva*) by Thomson (*L. and B.* i. 291), as *Corchorus olitorius* by Sprengel; but are most probably the saltwort, as in the RV, the *Atriplex halimus* or sea-purslain, which is called by the Arabs *mulluaḥ*, and grows on the shores of the Dead Sea and of the Gulf of Akabah. It is a plant with sour leaves, and has been known to form a part of the diet of the people in periods of scarcity. Thomson saw poor people cutting coarse green food of this kind as a relish for bread (ii. 345). The mallow in Arabic is called *khŭbbarzeh.* In a parallel passage in Job 24^{5} the poor are said to cut בְּלִיל for their children, which may be cattle food (Is 30^{24}) or coarse vegetables in general, and probably the אֹרֹת or greens which the prophet went to gather were of the same nature (2 K 4^{39}). The Syriac uses this name *mallûaḥ* for the חָרוּל or 'nettle' of Zeph 2^{9}.

Juniper roots (רֹתֶם *rōthem*). This occurs along with the last as part of the food of the outcast in Job 30^{4}, but the word occurs also as the name of the tree under which Elijah sheltered (1 K $19^{4f.}$), and in the phrase 'coals of juniper' in Ps 120^{4}. LXX renders it Ῥαθμέν or Ῥαμάθ, and in Job ῥίζας ξύλων. Symm. tr. it ῥίζαν σίτων ἀγρίων, and Josephus does not name the tree, but calls it 'a certain tree' (*Ant.* VIII. xiii. 7). The Syriac VS calls it a terebinth, and Clement a *Paliurus* (*Pædagog.* iii. 236). The later Jewish authorities, however, recognized it as the desert broom, *Retama retem*, which the Arabs call *retama*. It is a shrub with pale pink flowers and very bitter roots. It grows about 10 ft. high, and in many places in the desert is the only shrub under which one could shelter. Robinson describes it in such places; and one of the wilderness stations of Israel was called Rithmah = broomy (Nu 33^{18}). The roots were used as fuel (Ps 120^{4}), and the Revisers have put 'to warm them' in marg. of Job 30^{4}, which, considering the uneatable nature of the roots, is a more intelligible rendering. The word לַחְמָם may be regarded as a derivative of the verb חָמַם 'to heat,' in which sense the same word occurs in Is 47^{14}. This sense is taken by some Heb. commentators, as R. Levi ben-Gerson (*in loc.*), but the rendering of the text is that in the Gemara, *Aboda Zara*, i. Juniper roots are often used for fuel in the wilderness (Thomson, i. 345).

B. Animal food consisted either of flesh or of animal products, such as milk, eggs, and honey. Flesh was habitually used only in royal or great houses, and among ordinary people was chiefly used at feasts. Its sources were restricted by law among the Jews, by custom among the neighbouring nations. The word שְׁאֵר, which literally means flesh meat (Ps $78^{20. 27}$), was sometimes used for food in general (Ex 21^{10}).

The division of beasts into clean and unclean, mentioned in the story of the Deluge (Gn 7^{2}), was written in the light of later legislation, but embodies a distinction which can be traced back to a very early period of human history. The two lists of clean and unclean animals (Lv $11^{3ff.}$ and Dt $14^{4ff.}$) are practically identical. The mammals permitted to be eaten were the ruminants proper, except the camel, which, with the *hyrax*, hare, and swine, are prohibited by name. There is reason to believe that this selection is of more than arbitrary value, and that the danger of the transmission of parasitic diseases by the flesh of these is less than in the case of the excluded forms (see Guéneau de Mussy, *Étude sur l'hygiène de Moïse*). For fanciful representations of the forbidden animals as types of vices, see Eusebius, *Præp. Evang.* viii. 9; Clement, *Pædag.* ii. 10; Novatianus, *de cibis Judæorum*, iii.

The permitted mammals named in Dt are ten. (*a*) The three domestic groups, **oxen, sheep,** and **goats.** The first group was called in general בְּהֵמָה *bĕhēmâh*, or cattle (Dt 14^{4}), neat cattle being distinguished as בָּקָר *bāḳār*, LXX βόες, tr. the herd, as distinguished from the flock. The calf is in Heb. עֵגֶל *'ēgel* (Is 27^{10}); an *'ēgel marbēḳ* or fatted calf was killed for Saul by the witch (1 S 28^{24}); see also Gn 18^{7} (where the calf is *ben bāḳār*, 'the son of the herd') and ὁ σιτευτὸς μόσχος of Lk 15^{30}. שׁוֹר *shôr* (LXX μόσχος) is used for a bullock, as in Lv 22^{27}, Neh 5^{18}, or else פַּר *par*, as in Nu 8^{8}, Ps 22^{12}; and a heifer is called *'eglath bāḳār* (Gn 15^{9}, Dt 21^{3}) or *pārāh* (Gn 41^{2}, Nu 19^{2}). Bulls are named (poet.) אַבִּירִים *'abbîrîm* (Is 34^{7}, Ps 22^{12}), and cows or cattle in general אֲלָפִים *'ălāphîm.* The commonest breed were black or brown, short limbed and small, and they were principally kept in the valleys and in the low country. Fat oxen were part of Solomon's daily provision (1 K 4^{23}); these were fed in a אֵבוּס or stall, and hence are called stalled oxen (Pr 15^{17}); Solomon had also pasture-fed oxen (1 K 4^{23}, see also Elisha, 1 K 19^{21}). The aurochs or wild bull (the Hebrew *rĕ'ēm*) was probably seldom captured, even in nets (Is 51^{20}). The buffalo was not originally a native, but has been imported into Palestine since Bible times.

From the flock צֹאן *ẓôn* (Gn 4^{2}) the food animals were טָלֶה *ṭāleh*, or sucking lambs (LXX ἀρνὸς γαλαθηνός), as in 1 S 7^{9}. A hogget or lamb from one to three years old was named כֶּבֶשׂ *kebes* (Nu 7^{15}) or כֶּשֶׂב *keseb* (Lv 3^{7}), LXX ἄμνος or ἀρνός. In Aramaic a young sheep is called אִמַּר *'immar*, as in Ezr 6^{9}; a ewe is רָחֵל *rāḥēl* (Gn 31^{38}); and a fatted sheep כַּר *kar* (2 K 3^{4}); while sheep in general are called שֶׂה *seh* (Jg 6^{4}). The commonest breed of sheep in Palestine is the fat-tailed variety, whose tail is wide and flat, and may weigh 10 lb., most of which is pure fat. This fat tail (RV) is the אַלְיָה *'alyâh* or rump (AV) of Ex 29^{22} (see Herod. iii. 113). In Northern Palestine and Syria there is also a short-woolled small sheep, resembling the merino; both are varieties of the one species *Ovis Aries.* The lamb was the commonest of all meats for feasts, and is still the animal often killed for a guest (Doughty, i. 16). The ram, אַיִל *'ayil*, possibly the *beden* or wild-goat (Gn 15^{9}), was also used as food (Gn 31^{38}). For the use of lambs see 2 S 12^{4}, Is 53^{7}, and the paschal lamb (Ex 12^{3}).

The goat (שָׂעִיר *sā'îr*) was commonly kept in flocks in the more mountainous districts, while the sheep was fed in the lower pastures; the two species of goat, *Capra hircus* and *C. mambrica*, were not apparently differentiated by name; the former is the common goat, the latter has a sheep-like head and long pendulous, flapping ears. The male or he-goat of the former breed is the תַּיִשׁ *tayish*, Gn 30^{35}, Pr 30^{31}, and of the latter עַתּוּד *'attûd* (Gn 31^{10}), or in Aramaic צְפִיר *ẓĕphîr*, as Ezr 6^{17}. The עֵז *'ēz* may have been the *Capra Ægagrus* or *Sinaitica*, both of which are natives of Bible lands, and probably the source of Esau's savoury meat. The kid, גְּדִי *gĕdî* (Dt 14^{21}), is mentioned as the material for a small feast (Jg 6^{19} 13^{15}). Compare the ἔριφος of the parable (Lk 15^{29}), and the elder brother's implied comparison between the kid and the calf. As the lamb is useful for his fleece as well as his flesh (Pr 27^{26}), the kid is commonly used by the poorer or more economical classes (see 1 Es 1^{7}). Rebekah used it for making Isaac's savoury meat (Gn 27^{9}).

The thrice-repeated taboo concerning seething a kid in its mother's milk (Ex 23^{19} 34^{26}, Dt 14^{21}) has been interpreted: (1) As a prohibition of the slaughter of the mother and offspring at the same time (as in Lv 22^{28}). (2) As forbidding the killing of the young animal before it was eight days old; we learn from the passage just quoted that an animal was not allowed to be sacrificed until it had reached that age, and it has been thought that it was also unclean as food. (3) The most probable explanation is that it had reference to some custom among the surrounding nations, such as that described by Cudworth and Spencer (*de legibus Hebr. ritual.* ii. 335), in which a kid was boiled in its mother's milk, and the broth sprinkled on the ground as a sacrifice to propitiate the harvest gods and ensure fruitfulness. (4) Michaelis has supposed that mother's milk is a euphemism for butter, and that the food forbidden was meat drenched with butter. For other views on this תּוֹעֵבָה *to'ēbâh*, or abomination, see Tract *Chullin*, viii. § 4, and Maimonides, *More nebochim*, iii. 48.

Milk and its derivatives formed an important element of the food of the Bible peoples, Palestine is described as a land flowing with milk and honey (Ex 3^{8} and eighteen other places). חָלָב *ḥālāb*, LXX γάλα, is used for fresh milk (Ca 5^{12}, Is 28^{9}), or of cream from which butter is made (Pr 30^{33}). Milk of goats was esteemed the best (Pr 27^{27}), then that of sheep (Dt 32^{14}). Cow's milk is rarely as good as either of the others, on account of the unsuitability of the pasture, and is not often specified in the Bible. Camel's milk was probably used by the patriarchs, as we infer from Gn 32^{15}; but it sours more quickly than other milk, and often pains strangers when they first take it (Doughty, i. 216).

Milk is used as a drink with meals (Gn 18^{8}, Ezk 25^{4}), and so is coupled with wine (Ca 5^{1}, Is 55^{1}). When the pasturage is good, sweet milk is still handed round after an Arab meal. It is also offered as refreshment to travellers. Jael opened for Sisera a *nōd*, or leathern bottle of milk (Jg 4^{19}), which Deborah (Jg 5^{25}) calls a *ṣēphel 'addîrîm*, 'a cup of the nobles' (EV a lordly dish). Goat's milk is spoken of as the staple drink of servants (Pr 27^{27}); and, as the Hebrew children were mother-nursed, milk was their sole sustenance until they were weaned, hence the metaphorical sense of milk-feeding in 1 Co 3^{2}, He 5^{12}. The comparison of the law to milk was used by the Jews; thus Kimchi on Is 55^{1} says, 'As milk feeds and nourishes a child, so the law feeds and nourishes the soul.' Milk mixed with flour or rice, and eaten with salad, or occasionally with meat, forms a large part of the food of the poor in Aleppo (Russell, i. 118) and elsewhere. Among some Jews milk is not eaten with meat, on account of their interpretation of Ex 23^{19} (see above).

Butter (חֶמְאָה *ḥem'âh*, LXX βούτυρον) is used for cream and thick preparations of it, as well as for butter proper. In Is 7^{22} it probably means cream, and in Jg 5^{25} the milk which was called *ḥālāb* in Jg 4^{19} is named *ḥem'âh*; but it was liquid enough to be kept in a skin bottle, and was used to quench thirst. The 'butter' of Gn 18^{8} was probably soured milk, which is now much used in the East, and called *leben* (Burckhardt, *Bedouins*, i. 240). The process of churning is called מִיץ *mîẓ*, or 'pressure,' in Pr 30^{33}. It is now performed by rocking a skin of milk upon the knees (Doughty, i. 221), or by beating with a stick a skin of milk hung up in a frame, or jerking a skin thus suspended to and fro (Robinson, i. 485). The milk used is that of goats (Robinson, iii. 69) or cows (Dt 32^{14}); some forms of butter are semi-fluid, and hence the figurative language of Job 20^{17} 29^{6}. The amount of butter eaten by Arabs is large, when it can be procured. Kitto says that all well-prepared Arab food swims in it; and Burckhardt describes the Arabs as taking a cupful of butter as breakfast in the morning (see Robinson, i. 449). Melted butter is used, poured over bread in a bowl, as a breakfast dish, and is called *samen* (cf. Doughty, ii. 67 f., 208 f., 655 f.). Metaphorically, the smoothness of hypocritical words is compared to butter (Ps 55^{21}).

Cheese (חָרִיץ *ḥārîẓ*) is mentioned as a delicacy sent by Jesse to the captain of the troop in which his sons were (1 S 17^{18}), the expression used there meaning ten slices of curd. The [שָׁפָה] *shāphāh* (pl. *shāphôth*) of 2 S 17^{29} was probably the *leben*, which here was made of cow's milk. Cheese is often made of the milk of the ewe or of the goat.

A third word, גְּבִינָה *gĕbînâh*, means a clot, and is compared (Job 10^{10}) with the material out of which the body develops (cf. גֹּלֶם *gôlem* of Ps 139^{16}).

The Arabs use dried milk, which they rub up with water when wanted (Doughty, i. 262); this they call *mereesy*. It is also mentioned by Burckhardt (i. 60).

(*b*) Besides the three domestic groups, seven forms of large game were allowed to be eaten; these were the **fallow deer**, *Dama vulgaris* (אַיָּל, LXX ἔλαφος, the hart of RV and AV, as in Ps 42^{1}, La 1^{6}); the **gazelle**, *Gazella dorcas* (צְבִי *ẓĕbî*, LXX δορκάς, AV roebuck, 2 S 2^{18}), called by the Egyptians *gahs*, and often used as a sacrifice; the **wild cow antelope**, *Bubalus boselaphus* (יַחְמוּר *yaḥmûr*, LXX πύγαργος, Vulg. *bubalus*, AV fallow deer, RV roebuck), called *shes* by the Egyptians.

These three were hunted (Dt 12$^{15.\,22}$, Pr 6^{5}), and formed elements in Solomon's daily provision (1 K 4^{23}). The other large game were: the **ibex or wild goat**, *Capra beden*, the *n'eafu* of Egypt; the Sinaitic ibex is also called יָעֵל (Job 39^{1}, Ps 104^{18}), hence the name of Heber's wife Jg 4$^{17.\,18}$ (אַקּוֹ *'akkô*, AV and RV wild goat); the **addax**, *Antilope addax* (דִּישׁוֹן *dîshôn*, AV and RV 'pygarg,' the ancient Egyptian *nudu*), an antelope with lyrate horns and white hinder part, not uncommon in some parts of Western Asia, and found in Palestine; the **oryx**, *Oryx beatrix* (תְּאוֹ *tĕ'ô*, LXX ὄρυξ, AV wild ox, RV antelope), a straight-horned antelope, extending in distribution from N. Africa to Persia; the African form, called in Egyptian *maud*, differs from the Asiatic in some respects, and is called *O. leucoryx*; it is very commonly represented as being sacrificed in Egyptian pictures; and lastly, the kibisch or **moufion**, *Ovis tragelaphus* (זֶמֶר *zemer*, LXX καμηλοπάρδαλις, AV and RV chamois). This is a mountain sheep which is found in Lebanon, Moab, and the Taurus, as well as in Corsica. Neither the chamois nor the giraffe is a native of Palestine.

(*c*) The law of clean *birds* is one of exclusion. All carnivorous or predaceous birds and seabirds, together with the ostrich, raven, heron, and stork, are declared unclean. On the positive side, the birds named as articles of diet were six: (1) the **pigeon** (*Columba livia*, יוֹנָה *yônâh*, LXX περιστερά); (2) the **turtle dove** (*Turtur communis*, תּוֹר *tôr*, LXX τρυγών). These two were the commonest birds used for food in Palestine, and the only ones admitted as sacrifices. (3) The **partridge**, of which two species are found in Palestine, *Caccabis chukar*, the large Indian partridge, and *Ammoperdix Heyi*, the small partridge of Judæa (1 S 26^{20}). This bird is *hunted*, as it runs when pursued, and is slow to rise in flight (Robinson, iii. 403). Its nest is sought after on account of the eggs, which are favourite articles of food (Jer 17^{11}, Sir 11^{30}). LXX renders it νυκτικόραξ, which is a kind of heron. The place-name Beth-hoglah means the house of the partridge. Partridges as food are represented on an Assyrian sculpture in the British Museum. (4) The **quail** (*Coturnix communis*, שְׂלָו *sĕlâv*, LXX ὀρτυγομήτρα), which furnished meat to the Israelites in their wilderness journey (Ex 16^{13}). These are common in Egypt, where they are salted and eaten raw (Herodotus, ii. 77). The quail annually migrates in immense bevies across the desert nearly along the line of the Israelites' march (Robinson, i. 260). (5) Fatted fowl, which were prepared for Solomon's table (1 K 4^{23}), are called בַּרְבֻּרִים. They were probably **ducks or geese**, so largely used in Egypt, where they are called *aptiu* and *terpu*. They were apparently not domesticated, but caught in nets, fattened and eaten (Lepsius, ii. 46 and 132). (6) Fowl in Neh 5^{18} צִפֳּרִים *ẓippŏrîm*, were probably **domestic fowl** introduced from Babylonia, to which they had been brought from India, their native country. In NT times they had become domesticated in Palestine. It is said in the Mishna that fowl were not allowed in Jerusalem (*Baba Kama*, vii. 7); but this is a mistake (see Mt 26^{75} and parallel passages). Our Lord was familiar with them and their habits, see Mt 23^{37}, where He quotes from 2 Es 1^{30}.

Eggs as articles of food in early times were those of wild birds (Dt 22^{6}, Is 10^{14} 59^{5}); but with the introduction of geese from Egypt and domestic fowl from India they became much more important as a part of the diet, and now are very largely used (Lk 11^{12}). There is no reference to the ancient modes of cooking them, but at the present day they are boiled, or eaten swimming in hot butter and with honey (Finn. 141), or eaten with olives (*ib.* 272), or boiled with rice (Robinson, i. 91), or fried in fat.

The *white of an egg* (רִיר חַלָּמוּת *rîr ḥallāmûth*) of Job 6^{6} may be either the material literally expressed, see Tract *Chull.* 64*a*, or curdled milk; but is understood by some as a succulent, tasteless plant like purslain, *Portulaca oleracea*, as in the RVm. This plant is common in most places in Palestine, and is in Arabic associated with imbecility. Golius quotes the proverb '*more* foolish than purslain,' *Sentent. Arab.* 81. For other meanings see Gesenius, *Thesaurus*, *sub voce.*

Dove's dung, mentioned in connexion with the famine during the siege of Samaria, has been variously understood by commentators. It is said (2 K 6^{25}) that one imperial pint of it was sold for about 12s. 6d. חֲרֵייוֹנִים *ḥărîyōnîm*, or as it is in Ḳerê דִּבְיוֹנִים *dibyōnîm*, is understood by Josephus literally, and he supposes it to have been used as a condiment in place of salt (*Ant.* IX. iv. 4). The threat in Rabshakeh's appeal to the Jews (2 K 18^{27}) is in favour of this view. Others have supposed that this material was used for fuel, as the cow dung in Ezk 4^{12}; and Harmer thinks it was used to manure melons and other vegetables grown within the city (*Obs.* iii. 185; see Morier's *Second Journey*, p. 141). Fuller surmised that it might be the contents of the pigeon's crop. Linnæus and Smith identify it as the root of a liliaceous plant, the *Ornithogalum umbellatum* or star of Bethlehem; but this as well as Bochart's conjecture, that it was a chick-pea or small species of *cicer*, and the view that it was a small species of *sorghum*, are without foundation, as there is no reason why the price of these rare foods should be specified. On the whole, there is as much evidence for the literal interpretation as for any of these guesses.

(*d*) No *reptile* was permitted to be eaten; of *fishes* all that have fins and scales were clean; but it is a remarkable fact that no species of fish is mentioned in the Bible, nor is there any discrimination except good or bad (Mt 13^{48}), and big and little (Jon 1^{17}, Jn 21^{11}, Mk 8^{7}). The Sea of Galilee abounds in fishes, which are delicate and well flavoured (Robinson, ii. 386). Altogether 43 species have been found by Lortet, Tristram, and others, of which 14 are peculiar to the lake and to the Jordan. One of the largest of these, *Clarias macracanthus*, being scaleless, was unclean (κορακῖνος, Jos. *BJ* III. x. 8). The largest of the clean fishes are species of *Chromis*, which resemble the carp, and have large scales. One of these, *Chromis Niloticus*, called *Moncht* by the fishermen of Tiberias, has been found up to 5 lb. in weight; another, *C. Tiberiadis*, is peculiar to the lake, and very plentiful; *C. Andreæ* and *C. Simonis* are also peculiar, as is the *C. Flavii Josephi*. There are also four species of barbel of the genera *Barbus*, *Scaphiodon* and *Capoeta*, as well as one species each of dace, loach, and bleak, and two blennies, *B. Lupulus* and *B. varius*. Sea fishery was carried on at Tyre (Ezk 26^{5}), and from thence preserved fish were imported into Jerusalem (Neh 13^{16}), probably dried and cured. It was likely some dried fishes which formed part of the food with which the 5000 were fed. The fish-market at Jerusalem was probably at the fish-gate (2 Ch 33^{14}). The fishpools of Heshbon (Ca 7^{4}) have been regarded as indicating that the Jews kept fish in them for use; but the word 'fish' is here an interpolation. Abundance of fish was one of the elements in the prosperity of Joseph, according to his blessing, Gn 49^{25}. Fish was one of the staple foods in Egypt (Nu 11^{5}). See picture of fishing in Baedeker's *Egypt*, p. 411, and Wilkinson, ii. 102.

(*e*) Four *insects* were allowed to be eaten according to the list in Lv; these were: (1) the אַרְבֶּה *'arbeh*, LXX βροῦχος, the swarming locust, *Ædipoda migratoria*; (2) סָלְעָם *ṣol'âm*, LXX ἀττάκης, probably *Acrydium peregrinum*, the bald locust of AV; (3) חַרְגֹּל *ḥargôl*, LXX ὀφιομάχος (AV beetle), a leaping animal, and therefore not a beetle, probably the *khardjala* of the Arabs, which the Rabbins supposed to be a grasshopper, more probably the largest of the locusts, *Ædipoda cristata*; and (4) חָגָב *ḥāgāb*, LXX ἀκρίς, probably the little black locust found in the Sinaitic desert which the Arabs call *Faras el-jundi* or soldiers' horses, recalling the description of the locusts in Rev 9^{7}. It is, however, not possible precisely to identify these two latter forms. Locusts formed part of the food of the Baptist (Mt 3^{4}, Mk 1^{6}). Doughty describes them as being prepared by salting, and then being stived into a leathern sack in which they kept good a long while. They mingle them, brayed small, with butter-milk. The best is the fat spring locust; the later brood is dry and unwholesome (i. 203). Burckhardt says they are put alive into boiling brine, then dried in the sun, the head, legs, and wings being plucked off and then stored in bags. They are sometimes mixed with butter and spread on bread. They taste not unlike shrimps. On one of the Assyrian sculptures in the British Museum two slaves are represented with long *sticks* of locusts.

Honey took the place of sugar in cookery, either the natural product (1 S 14^{25}, Mt 3^{4}, Lk 24^{42}, AV, not RV) or the artificial *dibs* made of grapes or dates, described above. True honey is collected by the bee, *Apis fasciata* (see BEE). It is found in hollows in rocks (Dt 32^{13}, Ps 81^{16}) or in hollow trees (1 S 14^{26}), from which it drops on the ground. A shrub or tree on which was a honeycomb was called יַעַר, a word used for honeycomb in Ca 5^{1}. Birds, jackals, and ants would soon reduce a lion to a dry skeleton, so that in a few days a swarm of bees might take possession of it (Jg 14^{8}). Herodotus tells us that the head of Onesilus, suspended over the gate of Amathus, became filled with honeycomb (v. 114). See also the account of the Egyptian practice of killing a calf and placing it in a favourable place, when in nine days bees swarm within the carcase (Virgil, *Georg.* iv. 300 ff.). Compare with this Pythagoras' theory of the origin of bees, Ovid, *Metamorph.* xv. 27.

As honey is liable to ferment, it was forbidden to be used in any offering to God (Lv 2^{11}), the preservative material salt being used instead. Honey was one of the exports of Palestine to Tyre. Along with it is named the substance PANNAG, supposed by some to be a sweetmeat. LXX translates it 'cassia,' and the Vulgate 'balsam.' In the Syriac it is said to be millet.

At the present day honey is used by the Arabs to sweeten cakes (Ex 16[31]) as we use sugar. It is sometimes, but not often, eaten by itself from the comb (Jg 14[9]), or as it drops from the comb (1 S 14[27]). The liquid honey as it has dropped, called צוּף *ẓûph* (Pr 16[24], Ps 19[10]), is the best, and a cruse of this was part of the present brought by Jeroboam's wife to Ahijah (1 K 14[3]). Honey was brought with the other provisions to David in exile (2 S 17[29]), and wild honey (*μέλι ἄγριον*) was part of the Baptist's diet (Mt 3[4]). Butter and honey is expressive of a rich diet, see Burckhardt, *Arabia*, i. 54, but not Is 7[15. 22]. Milk and honey are the products of a fertile land (*Odyss.* xx. 68). The effects of a surfeit of honey are graphically described in Pr 25[16]. Honey is still stored in jars or skins as of old (Jer 41[8]).

Salt (מֶלַח), eaten with food as a condiment to flavour it (Job 6[6], Sir 39[26]), used to preserve food, and given to cattle (Is 30[24]), was extracted from the salt beds by the Dead Sea, or made by evaporation from sea water. There are masses of rock salt several miles in extent on the S.E. of the Dead Sea (Robinson, ii. 108), and the salt of Sodom is named in a Gemara; see also Josephus, *Ant.* XII. iii. 3, XIII. iv. 9. Much of this salt was very impure, hence it sometimes lost its savour as well as its preserving power, and was cast out on the land as waste (Mt 5[13], Lk 14[35]). This was due to the rain washing out the salt and leaving only the earthy dross. Too much salt rendered the land barren, and to sow with salt meant to doom to perpetual desolation (Dt 29[23], Jg 9[45], Zeph 2[9], Jer 17[6], Job 39[6]). Salt was to be used with all the sacrifices (Lv 2[13], Ezk 43[24], Mk 9[49] TR). See *Il.* i. 449, and *Æneid*, ii. 133. For this purpose salt was sold in the temple market; see Maii, *de usu Salis Symbol. in rebus sacris Dissert.*, Giessen, 1692; *Middoth*, v. 3. The addition of salt to the animal sacrifice was probably a later arrangement. See Philo, ii. 255; Hottinger, *Jur. Heb. Leg.* p. 168, and *de Usu Salis in Cultu sacro*, Marburg, 1706; Wokenius, *de Salitura Oblationum*, 1747. Salted incense is referred to in Ex 30[35]. Salt is much prized, both in Syria and Egypt. A Bedawi prefers salt to sugar when both are offered to him. It is an emblem of hospitality; to eat bread and salt with one is to be bound to him by ties of hospitality, a covenant of salt (Lv 2[13], Nu 18[19], 2 Ch 13[5]). A similar alliance is expressed in Ezr 4[14]. See Niebuhr, *Beschreibung*, 48; Bæhrdt, *de Fœdere Salis*. For the washing of infants in salt see MEDICINE. It is possible that the Sidonian Misrephoth-maim of Jos 11[8] 13[6] may have been a place of salt-pans where sea water was evaporated.

Hyssop (אֵזוֹב), which may be mentioned as an accessory to the feast of Passover, though in itself not a food-stuff, is a labiate herb of inconspicuous size, which was used by the Egyptian priests for food (Porphyry, *de Abstinentia*, iv. 7), but is mentioned in the Bible only as a means of aspersion, considered by Celsius to be the *Hyssopus officinalis*, a thyme-like plant. In *Negaim*, xiv. 6, there are five kinds recognized—the Greek (*Origanum Smyrnœum*), the Egyptian (*Origanum Ægyptiacum*), the wild (*O. Syriacum*), the Cochali (*Origanum maru*), and the Roman (*Satureja Juliana*). As the hyssop had a firm stem and could be tied in a bundle, it was probably the *O. maru*. Kitto conjectures that it is the poke (*Phytolocca decandra*); but this is not a native of Palestine. Royle, Tristram, and Stanley believe it to be the caper (*Capparis spinosa*); but this does not fulfil the conditions; it is soft, smooth, and irregularly branched, besides it is mentioned under another name as אֲבִיּוֹנָה *'ăbîyōnâh* (Ec 12[5], 'desire' AV, 'caperberry' RV). The flower-buds of the caper are supposed to stimulate passion and appetite, and were eaten with vinegar along with meat as they are still; hence the metaphorical use in the passage, whose real meaning is better conveyed by the AV than by the RV literal reading.

The following fruits or herbs are used with meats as condiments:—

Anise or **dill** (Mt 23[23]), an umbelliferous plant, *Anethum graveolens*, whose fruits were used as a carminative. It is a native of Palestine. The allied *Pimpinella anisum* is the anise of Pliny; but the dill is called by Hippocrates *ἄνηθον*, and by Dioscorides *ἀνίκητον*, the word used in the text. Its properties are much the same as those of the caraway seed. For an account of references in classical literature see Pliny, xx. 17; and for a figure see Woodville's *Med. Botany*. In *Maaseroth*, iv. § 5, Rabbi Eliezer says the seeds, leaves, and stem of the *shabath* or anise are liable to tithe. Dill is called in Arabic *shibt*. At the present day the fruit of *Anethum* is called dill, and that of *Pimpinella* is anise-seed.

Coriander, the small round fruit of *Coriandrum sativum* to which the manna was compared, used in the same way as anise, especially in Egypt (Ex 16[31], Nu 11[7]). It is an umbelliferous plant, and grows in Syria and Egypt (see Pliny, xx. 20; and for figures of this and the following plants see Woodville).

Cummin, also an umbelliferous plant (*Cuminum sativum*), whose fruit was cultivated as a carminative, and was beaten with a rod off the plant when it was ripe (Is 28[25], Mt 23[23]). In Heb. it is called כַּמֹּן, *kammôn*, and in Gr. *κύμινον*. For its use see Pliny, xix. 8. As to the doubt of its being tithed see *Demai*, ii. § 1.

Mint (*ἡδύοσμον*, Heb. דנדנא), the well-known aromatic labiate plant *Mentha sylvestris*, mentioned with the last in Mt 23[23]. For its use among the Jews see Celsius, *Hicrobot.* i. 546, and Pliny, xix. 47. See *Ukctzin*, i. § 2; also *Nedarim*, 51*b*; *Shcbiith*, vii. §§ 1, 2.

Mustard (*σίναπι*), the small seed of the common *Sinapis nigra*, which grows to a very large size in Palestine as the 'greatest of herbs' (Mt 13[32] 17[20], Lk 13[19] 17[6]), and is used as a condiment. See Thomson, *Land and Book*, i. 453. The pungent seeds of a small tree, *Salvadora persica*, have been supposed by Dr. Royle to be the mustard of the parable; but this is rarely, if at all, found in Palestine, and is not an herb, but a tree. The only claim is, that it is called in India *kharjal*, while *khardal* is the Arabic for mustard (see Royle, *Journ. Asiatic Soc.* 1844, No. xv., and Lambert, *Trans. Linn. Soc.* xvii. 449).

To the miraculous food by which the Israelites were fed, the name **Manna** is given. This has been supposed to be the gummy exudation of the *Tamarix mannifera*, a shrub which grows in the wilderness; but the whole description indicates that it was a miraculous food.

III. TABOOS.—There are certain prohibitions specially mentioned in the Pentateuch. One of these, the kid in mother's milk, has been already discussed. **Blood** is one of the most ancient of these taboos, and in connexion with it all animals which died of themselves or were killed otherwise than by being bled, were forbidden. Any such נְבֵלָה, *nĕbēlâh*, or carcase, might be given to strangers, or sold to foreigners, but was an abomination to the Jews (Dt 14[21]). The eater of it was rendered unclean (Lv 17[15] 22[8]). Likewise that which was torn of beasts (Ex 22[31]), while it might be eaten by the stranger, was not allowed to the Israelite (Lv 17[15]). Hunting by dogs was therefore not practised. The observance of this taboo of פִּגּוּל *piggûl*, or abominable flesh, is referred to in Ezk 4[14] and Ac 10[14] (*πᾶν κοινὸν καὶ ἀκάθαρτον*), and it was one of the four 'necessary things' prohibited to the Gentile converts by the Jerusalem Council, Ac 15[28] ('things strangled'). The eating of blood, which is one of the most ancient prohibitions (Gn 9[4]) re-enacted in the Mosaic law in which it is frequently repeated, had not only a hygienic basis, but had reference probably to the drink-offerings of blood which were parts of the heathen rituals (Ps 16[4]). It was thus a law of demarcation, and in Lv 19[26] eating with the blood and auguries are bracketed together. The poisonous effects of bull's blood are referred to by several authors; Midas (Strabo, I. xi. § 21) and Psammenitus (Herodotus, iii. 15) are said to have been killed by it.

The **Fat** of animals was also forbidden (Lv 7[30]) as food, and in the sacrificed victims this is called 'the food of the burnt-offering' Lv 3[11]. 'All the fat is the Lord's' (v.[16]), see 1 S 2[16], 2 Ch 7[7], Gn 4[4]. What is specially referred to is the thick subcutaneous layer, and that around the kidneys and other viscera, as well as the fatty tails of the sheep. The 'fat things' of the promised spiritual feast in Is 25[6] as well as in Neh 8[10] are מַשְׁמַנִּים *mashmannim*, delicate things, not חֵלֶב *ḥēleb*, suet.

The **Sinew that shrank** (Gn 32[32]), which it was the custom of the Jews to avoid, was a tribal taboo although not specially interdicted by statute. It is not known what part is particularized by the name גִּיד *gîd*, as the word is a general one, used of the sinews of the whole body in the vision of dry bones, Ezk 37[6]. Some have supposed it to be the great sciatic nerve at the back of the hip (Josephus, *Ant.* I. xx. 2), but that is not situated in the hollow of the thigh. This region, *kaph hayyerek*, evidently means the groin, which was facing his antagonist when Jacob was wrestling. There are two sinews there which if cramped cause lameness—one the tendon of the *psoas*, which exactly fits the description, but is very seldom cramped; the other, that of the *adductor longus*, is exceedingly liable to cramp when the thigh is twisted, and this causes agonizing pain and lameness, and would effectually disable a wrestler. I have known it to be severely strained in athletic exercises, causing lameness for several weeks. Some Jews have recommended that the hind legs of animals should not be eaten, lest by accident this sinew should be partaken of by mistake. This was not the practice in early times, for Samuel's cook set the thigh of the animal before Saul as the piece of honour (1 S 9[24]. AV and RVm tr. שׁוֹק here 'shoulder'). See Tract *Chullin*, 7.

Swine, forbidden as food to the Jews, were eaten by the surrounding peoples in general. The Egyptians also considered the pig unclean (Herod. ii. 47), for a reason the Greek author forbears to mention, but which we learn from the Book of the Dead, as the demon Set once appeared in the form of a pig. Hence they are never represented in the older monuments, but appear in those of the New Empire (Wilkinson, ii. 100). The foul habits and coarse feeding of swine, their supposed liability to glandular disease [which has given us the Latin name of such swellings 'scrofula' (Celsus, v. xxviii. 7), and its Greek equivalent χοιράς (Hippoc. *Aph.* 1248)], and the notion that leprosy followed the eating of swine's flesh, contributed to this dislike. After the Captivity, however, especially under Syrian and Roman domination, the keeping of swine was practised for commercial purposes if not for food, hence our Lord's references Mt 7[6], Lk 15[15], Mt 8[30] (see Thomson, i. 355 ff.). Swine's flesh is taboo to the Mohammedan as well as to the Jew. For a detailed consideration of this prohibition see Spencer, *de legibus Hebræorum ritualibus*, Cambridge, 1727, i. p. 131.

The **Camel**, which is eaten by the Bedawin, was forbidden by the Levitical code. It is coarse and rather dry meat. The milk, however, was used in patriarchal times (see above). It was probably camel's milk which Jael gave to Sisera.

The **Hare** (אַרְנֶבֶת), only mentioned as being unclean because it is not cloven-footed, was common in the hilly regions. In the North the commonest species is *Lepus Syriacus*, in the South *L. Ægyptiacus*, and in the Arabah and Dead Sea district *L. Sinaiticus*. It is said to chew the cud from its habit of sitting in its form, but it is not a true ruminant. The same is the case with the *shaphan* or coney, which is the *Hyrax Syriacus*.

The oldest taboo is that of the fruit of the tree הַדַּעַת טוֹב וָרָע 'of the knowledge of good and evil.' Conjecture as to the actual tree meant is useless, but it is worth noting that the banana was identified with it by many mediæval writers; see Brocard's *Descript. Terra Sancta*, xi. See also Celsius, *Hierobot.*, in which it is supposed to be the quince.

In the NT there is added the taboo of things offered to idols (Ac 21[26], 1 Co 8[1]). The early ecclesiastics increased the stringency of the apostle's ordinance, and by the Council of Ancyra (c. 7) it was forbidden to a Christian to eat in any place which was connected with idolatrous worship, even if he brought his own food. On the other hand, Gregory, in writing to Augustine (*Ep.* xi. 76), recommends that the heathen sacrifices of oxen should be allowed to be continued in the English temples to accustom the people gradually to the change of ritual, but that they should be made on saints' days. For the tabooed vineyard on account of mixed seeds see above; and for rabbinical comments on taboos see *Aboda Zara*, especially v. § 9.

The **Ass**, though an unclean animal, was eaten during periods of famine. In 2 K 6[25] it is said that during the siege of Samaria a רֹאשׁ־חֲמוֹר *rōsh-ḥămôr*, or ass's head, was sold for about £10. It has been supposed that this meant a measure of corn, but this is unlikely. In periods of dearth, distinctions of food are impracticable (Ezk 4[13]); for parallels see Plutarch (*vit. Artax. Mnemon*, i. 1023, and Xenophon, *Anab.* i. § 5). Even human flesh was eaten in such straits, see 2 K 6[29], La 4[10], Ezk 5[10].

IV. FOOD PREPARATION.—In primitive times the field, the flock, and the herd supplied all that was needful to the family, who procured it directly when wanted as in Gn 18[5]; but with the growth of towns and the consequent division of labour, food became a matter of merchandise. It was so in time of famine (Gn 42[4]), or to those on journeys (Dt 2[6. 28]). Markets or bazaars became established in the towns (Jer 37[21]), and merchants and shopmen (1 K 10[15]) supplied the wants of the town-dwellers. We read of such sellers of victual in Jerusalem (Neh 13[15]) and Samaria (Jn 4[8]). In this way, bread, water, fruit, milk, and flesh are purveyed to the people of the cities of the East.

Cookery was practised or supervised by the wife (Gn 18[6]), or by a slave (Gn 18[7]). At set feasts there was a cook employed (1 S 9[23]) who killed the animals, and hence was called טַבָּח *ṭabbâḥ*, a word also applied to soldiers or executioners (Jer 39[9]). Some of these were female cooks (1 S 8[13]) who dressed the meats, and differed from the אֹפוֹת or bakers, and the רַקָּחוֹת who were perfumers or spice mixers (1 S 8[13] AV and RV 'confectionaries').

The animals were killed immediately before being cooked (Gn 18[7], Lk 15[23]); the throat was cut and the blood poured out in accordance with Lv 7[26] (see 1 S 14[32ff.]); they were then flayed (Mic 3[3]) and cut up into joints, except in the case of small animals such as lambs, which were cooked whole (Ex 12[46]). With larger animals the flesh was separated from the bones, and these broken when the flesh was to be boiled (Mic 3[3]). The doubtful ἅπ. λεγ. פִּימָה is tr. in Job 15[27] *collops*.

Boiling was the ordinary method of cooking, hence בָּשַׁל *bāshal*, to boil, is used of cooking in general (2 S 13[8]). The vessels used for this purpose were pots or caldrons of different kinds, which are called by six different names (see below). Some of the sacrifices were boiled, having first been flayed, the fat alone being burned (2 Ch 35^{13}). This was especially the case with the sacrificial feasts, peace-offering, or *hostia honorifica*. In boiling, the caldron was first partly filled with water, and the flesh put in (Ezk 24^{3}); sometimes milk was used, as Burckhardt describes being done at the present day (i. 63), and occasionally the bones were used to make the fire burn briskly, as Ezekiel describes. When the scum rises it is taken off (Ezk 24^{6}, but RV tr. חֶלְאָה *hel'âh*, as 'the rust of the pot,' not scum, LXX *ἰός*). In Ezk 24^{10} AV tr. הַרְקִיחַ *harkîaḥ*, 'spice it well," as if derived from רָקַח to mix spices, but LXX has it *ἐλαττώθῃ ὁ ζωμός*, and RV renders it 'make thick the broth.' Spicing, that is, mixing with savoury or carminative herbs, was used to render meat savoury (Gn 27^{4}), and such food was called 'dainty meat' (Pr 23^{3-6} מַטְעַם *mat'am*, but called *man'am* in Ps 141^{4}). Salt was also added, and when boiled the broth, מָרָק *mâraḳ* (Is 65^{4} *Ḳerê*, but the *Kethib* has *paraḳ*, which means a stew or a mess of mincemeat in broth), was served separately (Jg $6^{19.\,20}$). In modern Hebrew, soup is רַקְרֶקֶת *raḳreḳeth*. The broth may be used as a sauce for meat (Burckhardt, i. 63), or eaten with bread and butter (Gn 18^{6}). Vegetables or rice or meal may be boiled in it or eaten mixed with it. Vegetable food was also boiled in water, with butter or with milk, to make pottage (Gn 25^{29}, 2 K 4^{38}), which was of the consistence of thick Scotch broth or thin porridge.

Roasting was practised with small animals, such as the paschal lamb, which was cooked whole (Ex 12^{46}) over an open fire (Ex 12^{8}, 2 Ch 35^{13}), which was of wood (Is 44^{16}). Animals taken in the chase were also roasted (חָרַךְ *ḥārak*, Pr 12^{27}). Or the meat was baked in an oven, which may have been sunk in the ground (see BREAD). The paschal lamb was flayed before being roasted (2 Ch 35^{11}). Eli's sons (1 S $2^{12\text{ff.}}$) sinned in that they took part of the flesh, which should have been boiled, and roasted it. They also seem not to have been content with the priestly share, which was ultimately fixed as the breast of the peace-offering and the right shoulder (Lv 7^{31-32}). The only method of cooking fish mentioned in the Bible is broiling (*ὀπτός*, Lk 24^{42}, see Jn 21^{9}) on the coals. In the Gizeh Museum there is a representation of shepherds broiling fish over the fire, and wiping the ashes from them with little bundles of straw (see Perrot-Chipiez, *Hist. de l'Art dans l'antiquité*, i.).

V. VESSELS used in the conveyance and cooking of food. There were several kinds of **basket** (see BASKET). The **pots** were of six kinds: **1.** סִיר *sîr*, LXX *λέβης*, called in Jer 1^{13} a *sir nāphûaḥ* or boiling caldron. Of this kind were the flesh-pots of Egypt (Ex 16^{3}) and the great pot used by the sons of the prophets (2 K 4^{38}), as well as the caldron of Ezekiel's visions ($11^{3.\,7}$ 24^{6}), and of Zechariah ($14^{20.\,21}$). In the list of temple furniture this word is tr. 'pot' in 1 K 7^{45} and 'pan' in Ex 27^{3}, in which cases it was a brazen vessel for ashes, not for boiling. It is tr^{d} 'washpot' in Ps 60^{8} and 'caldrons' in Jer 52^{18} (RV pots). **2.** דּוּד *dûd*, usually tr. basket (which see), is the kettle of 1 S 2^{14} and the caldron of 2 Ch 35^{13}, tr. *λέβης* by LXX in the latter case. **3.** The pan of 1 S 2^{14}, 1 K 7^{38}, and 2 Ch 4^{6} is כִּיּוֹר *kiyyor*, LXX *λέβης*. This word is variously tr. 'torch' (Zec 12^{6}, RV 'pan'), 'laver,' or washing vessel (Ex 30^{18} etc.), and seems to have been a shallow, wide-mouthed utensil. The כִּירַיִם of Lv 11^{35}, which like the *tannûr* or oven could be broken down, was probably, as AV and RV render it in the text, a firehearth or range for pots (RVm has 'stewpan'), perhaps of two sides as the dual indicates, LXX *χυτρόποδες*. **4.** The caldron of Mic 3^{3} is קַלַּחַת *ḳallaḥath*, similarly tr. in 1 S 2^{14}, LXX *χύτρα*, an earthenware vessel for boiling. These were slightly glazed by means of salt and litharge. This may be referred to in the סִיגִים or silver dross of Pr 26^{23}. **5.** The pot of 1 S 2^{14} is פָּרוּר *pārûr*, tr. 'pan' in Nu 11^{8} (RV pots); in Jg 6^{19} it was a pot for holding broth, LXX *χυτρά*. **6.** The pan of 2 Ch 35^{13} is צֵלָחָה *ẓēlāḥâh*. This is the word tr. 'cruse' in 2 K 2^{20}, and 'dish' in 2 K 21^{13} and Pr 19^{24} (AV tr. it here 'bosom' as LXX *κόλπος*).

The caldron of AV Job 41^{20} is properly translated 'rushes' in RV. The figure being that leviathan's snortings make the pool in which he swims to boil like a caldron and the reeds to seem as if on fire.

The מַזְלֵג or **flesh hook** was a brazen fork (Ex 27^{3}), which had three teeth (1 S 2^{13}). The hooks of Ezk 40^{43} for hanging up the slaughtered carcases of the offered animals are called שְׁפַתַּיִם *shĕphattaim*.

The **firepan** or chafing dish of 2 K 25^{15} מַחְתָּה *maḥtâh* was used for carrying burning coals. These vessels were of gold in the first temple.

The dishes or trays or other vessels in which food and drink were served are known by various names. Pottage was eaten out of the pot in which it was boiled (2 K 4^{40}). Thomson describes the Bedawin sitting around a large saucepan and doubling their bread spoon-fashion to eat their lentil pottage (i. 253). Many of the vessels named were employed only in the temple service.

אֲגַרְטָל *'ăgarṭâl*, LXX *ψυκτήρ*, Vulg. *phiala*, only used in Ezr 1^{9} and tr. 'charger,' was a gold bowl or basin, said by Ibn Ezra to be the same as that called *mizrâḳ*.

אַגָּן *'aggân*, LXX *κρατήρ*, used in Ex 24^{6} for a wash-vessel or basin for sacrificial blood, made of gold, silver, or brass. Its plural is tr. *cups* in Is 22^{24}; see also Ca 7^{2}.

אָסוּךְ *'āsûk*, an oil vessel 2 K 4^{2} tr. 'pot,' after Kimchi, but more probably a flask or bottle.

אַרְגָּז *'argâz*, a coffer or box, which could be slung to the side of a cart, such as that in which the votive offerings of the Philistines were sent (1 S 6^{11}).

בַּקְבֻּק *bakbuḳ*, a wide-mouthed bottle or cruse for carrying honey (1 K 14^{3}). It was of earthenware, and so was easily broken (Jer $19^{1.\,10}$); LXX renders it *βικός*, which is the name given by Herodotus to the Babylonian casks of palm wine (i. 194). Athenæus uses it for a drinking vessel (784 D). In Maltese a large vessel of this kind is called *bakbyka*.

גָּבִיעַ *gābîa'*, wine bowls (as Jer 35^{5}, LXX *κεράμιον*), of earthenware, from which wine was poured into goblets. A silver cup used for drinking and divination Gn 44^{2}; LXX *κόνδυ*, said to be a Persian word. It is used for the pots of wine out of which Jeremiah filled the *kôṣôth* for the Rechabites, Jer 35^{5}.

גֻּלָּה *gullâh*, LXX *στρεπτὸν ἀνθέμιον*, a round vessel for holding oil in a lamp Zec 4^{3}, the golden cruse of Ec 12^{6}, used also for the rounded bowls above the capitals of the temple-pillars in 1 K 7^{41} and 2 Ch $4^{12.\,13}$, possibly volutes such as those shown on the tablet of Samas in the Brit. Museum.

כַּד *kad*, a pail or barrel to hold meal 1 K 17^{14}, or water 1 K 18^{33}. This name is given to Rebekah's pitcher Gn $24^{14.\,15\text{ff.}}$, and to Gideon's men's pitchers Jg 7^{16}; see also Ec 12^{6}.

כְּלִי *kĕlî*, a vessel in general, of gold and silver Gn 24^{53}, or of clay Lv 11^{33}, apparently so called irrespective of shape, used for the vessels of the temple Is 52^{11}, Ezr 1^{7}, Nu 4^{15}.

כּוֹס *kôṣ*, a wine cup as in Gn $40^{11.\,13.\,21}$. Pharaoh's wine chalice, the cup which passed around the circle at a meal 2 S 12^{3}. See also Pr 23^{31}, used metaphorically Ps 11^{6} 116^{13}, Is 51^{17-22}, Hab 2^{16} etc.

כֹּר and קַב were vessels of measurement, the former about 8 bushels, the latter about 4 pints. סְאָה, also a measure, nearly equals the English peck, and is a little greater than the *μόδιος* or 'bushel' of Mt 5^{15}. See WEIGHTS AND MEASURES.

כְּפוֹר *kĕphôr*, a deep cup or chalice as 1 Ch 28[17], Ezr 1[10], and 8[27], probably a cup with a cover.

מַחֲבַת *maḥăbath*, a flat plate (?) for frying or baking bread Lv 6[14] 7[9], 1 Ch 23[29], Ezk 4[3]. See Bread.

מַחְתָּה *maḥtâh*, a firepan 2 K 25[15], or an incense bowl Lv 16[12], a coalpan Ex 27[3] 25[38], LXX πυρεῖον.

מְנַקִּיָּה *mĕnakkîyâh*, a sacrificial dish Ex 25[29] 37[16], Nu 4[7], Jer 52[19], probably a libation vessel.

מְדֹכָה *mĕdōkâh*, a mortar in which *e.g.* the manna was beaten before being baked Nu 11[8].

מִזְרָק a bowl; of these Hiram made a hundred 2 Ch 4[8], 1 K 7[45. 46]. See Ex 25[29], 1 Ch 28[14. 17], Nu 7[13], Zec 9[15]. For the numbers of these φιάλαι and σπονδεῖα see Jos. *Ant.* VIII. iii. 7, 8. It is a sacrificial bowl for dashing (זָרַק) the blood in a volume against the altar (see Driver's note on Am 6[6]).

נֹאד *nōd*, a skin bottle, see above under Wine.

נֵבֶל *nebel*, a skin of wine 1 S 1[24] 10[3], 2 S 16[1]; this word is also used for an earthen vessel as in Is 22[24] 30[14]. It is also the name of a musical instrument, a lute (RV) or psaltery or viol Is 5[12].

סַף *ṣaph*, a basin or bowl for blood Ex 12[22], Jer 52[19], for wine Is 51[17], Zec 12[2].

סֵפֶל *sēphel*, a bowl Jg 5[25] 6[38]; LXX λεκάνη; also in 1 K 7[50] and 2 K 12[13].

פַּךְ *pak*, a vial or flask of oil 1 S 10[1], 2 K 9[1-3]; LXX φακός, probably the same as the *bakbuk*.

צַפַּחַת *ẓappaḥath*, a water bottle 1 S 26[12], 1 K 19[6], or an oil bottle 1 K 17[12]; an oryballus or round vessel with a narrow neck, see Thomson, ii. 21. See 2 K 9[1-3] for box of ointment.

צֵלָחָה *ẓēlāḥâh*, a dish or bowl in which sacrifices were boiled as in 2 Ch 35[13], or a flat saucer for salt 2 K 2[20] 21[13], Pr 19[24] 26[15].

צִנְצֶנֶת *ẓinẓeneth*, in Ex 16[33], was the pot in which the manna was laid up, a vase or jar according to Abu'l Walid and Sa'adya.

'Αλάβαστρον of Mt 26[7] was a vessel made of satin spar or Oriental alabaster, which is a variegated kind of marble of calcium carbonate, not the gypsum or calcium sulphate now called alabaster. Vessels of this kind are described by Theophrastus (*de Odoribus*, 41) and by Pliny (ix. 56) as elongated or pear-shaped with fairly narrow necks. Some alabastra were made of glass, gold (Plutarch, *Vit. Alex.*), or earthenware (Epiphanius, *de mensuris et ponderibus*, xxiv. 182).

Πίναξ, the charger in which the Baptist's head was sent (Mt 14[8. 11]), was a flat dish. Finn refers to a case in which some Bedawin sent the head of an enemy on a dish on the top of a pillau of rice (p. 35). The παροψίς of Mt 23[25] was a smaller dish on which dainty food was served.

Of other NT vessels, ποτήριον is the drinking cup of Mk 7[4], and that used at the Last Supper Mk 14[23] etc. ξέστης in Mk 7[4] is a Latinism, a corruption of *sextarius*, a pint measure. The word is used by Sicilian writers. χάλκιον in the same passage is a copper or bronze vessel of any shape. ὑδρίαι λίθιναι at the feast at Cana (Jn 2[6]) were stone pitchers of considerable capacity. Early figures of these from sarcophagi and from the well-known ivory plaque in Ravenna are published by Bottari and Bandini, and an ancient *hydria* is shown as one of these in the Ch. of St. Ursula in Cologne; for others see Didron, *Annales Archéol.* xiii. 2.

VI. The usual MEALS in ordinary life were two—a mid-day meal or dinner, and an evening meal or supper, which was the more important. Breakfast was, and still is, an informal repast. That in Jn 21[13] was a meal after a night of toil, so 'dine' in AV is replaced in RV by 'break your fast' (ἀριστήσατε). The meal at the Pharisee's house in Lk 11[37] is also, as in RVm, a breakfast or early meal. Peter, defending the apostles, points out that they could not be drunken, as it was only 9 o'clock in the morning (Ac 2[15]). Early drinking of wine at such a time was a sign of degradation (Is 5[11]), and eating in the morning is deprecated as culpable luxury (Ec 10[16]) and out of due season.

It is still the custom in the East to make the morning repast a very slight one—a cup of milk, a piece of butter. Robinson describes melted butter (*semen*), or oil poured over bread, as a breakfast dish (ii. 70), or cakes baked on the ashes and broken up and mixed with butter in a dish (ii. 18). The morning meal of the Bedawi is about 9 or 10 o'clock (Burckhardt, *Notes*, i. 69). Drummond notices how his negro bearers in tropical Africa rose from sleep and began their day's work without food (*Tropical Africa*, p. 100).

The mid-day meal or dinner in Egypt was at noon (Gn 43[16]), and probably was at the same time in Palestine (Ru 2[14]). Abstinence from this is called fasting (Jg 20[26], 1 S 14[24], 2 S 1[12] 3[35]). From these passages it is evident that the people were accustomed to 'eat bread' at mid-day. God promised to Israel bread in the morning and flesh in the evening (Ex 16[12]). This early meal is the ἄριστον of Lk 14[12]. St. Peter's intended meal, interrupted by Cornelius' messengers, was at 12 o'clock. This meal took some time to prepare, so the good housewife began to make ready this חק while it was yet night (Pr 31[15]). The meal is called אֲרֻחָה *'ăruḥâh*, as in Jer 40[5] 52[34], 2 K 25[30], and Pr 15[17]. The noon meal is described in Lane's *Modern Egyptians*, p. 156 ff. (Gardner's ed.). It sometimes was a period of excess (1 K 20[16]).

The supper after the day's work is done (Ru 3[7]) is, and was, the more important meal (see Burckhardt's *Notes*, i. 69), and the one at which flesh meat was more commonly used. At these meals the whole family was gathered together. According to Josephus, the law required dinner to be at the sixth hour on the Sabbath day (*Life*, 54), *i.e.* at 12 o'clock; but in § 44 he speaks of feasting with his friends at the second hour of the night = 8 p.m. See also *BJ* I. xvii. 4, and the great supper of Lk 14[15ff.]

In the patriarchal days they seem to have sat on the ground as they do at present. Abraham's guests probably thus sat while he stood and served (Gn 18[8]). Jacob says to his father 'sit and eat of my venison,' but that was probably because the blind old man was recumbent (Gn 27[19]). Jacob's sons also sat down to eat (Gn 37[25]), as the Egyptian shepherds are represented in a painting from Sakkarah, now in the Gizeh Museum. The Levite and his concubine sat down to eat (Jg 19[6]). Saul also sat at meat (1 S 20[5. 24]), as did Samuel when he brought Saul to feast with him (1 S 9[22]), and Jesse and his family (1 S 16[11]). The old prophet and his guest likewise took the forbidden meal sitting at a table (1 K 13[20]). Sitting at meat is mentioned in Pr 23[1], Jer 16[8], Ezk 44[3]. Sitting, however, might have in some of these cases meant reclining, for Oholibah is described as sitting on a stately bed with a table prepared before it (Ezk 23[41]), and the guests at Esther's banquet reclined on couches (Est 7[8]). The table is also mentioned in Ps 23[5]. Sitting on the ground was, however, regarded as a sign of humiliation and abasement in prophetic times, as in Is 3[26] 47[1] 52[2], Jer 13[18] RVm, La 2[10], Ezk 26[16].

In NT times the usual attitude was reclining and resting on the left elbow; as at the supper described in Jn 13[23], John reclined in front of our Lord, and so when he leant back to speak to Him John's head was on Jesus' breast. It has been supposed from these expressions that the patriarchal custom changed, and that the practice of sitting as the Egyptians did was adopted by early Israel, the fashion changing in later time into the Græco-Roman custom of reclining on a couch with a cushion for the left elbow, and the right arm free; but it is probable that these changes were slight, and that the phrase sitting at meat does not specify a posture such as that to which we give the name. Thus our Lord uses the phrase of the attitude in His own time (Lk 14^{8} 17^{7} 22^{27}), and the multitude whom He miraculously fed sat down on the ground (Jn 6^{10}). Of the tables, we have preserved a figure in the shewbread table on the Arch of Titus. They must have been high enough in the days of Adonibezek for the 70 captive kings to sit on a lower level (Jg 1^{7}); but the same phrase is used in NT times of the crumbs falling to the dogs under the table (Mt 15^{27}, Mk 7^{28}), and Lazarus is said to have sat at table at the feast (Jn 12^{2}). The couches or mattresses on which the eaters sat or reclined are never mentioned except in the cases given above, and the stool in the prophet's chamber is the only material seat specified in the OT, except royal thrones. At ordinary meals it is probable that the family squatted around the dish, out of which they all helped themselves, even as is done at the present day by the Bedawin. For an account of the ancient tables see Athenæus, *Deipnosophistæ*, especially ii. 32. The costly couches for reclining, with ivory corners, are mentioned in Am 3^{12} and 6^{4}. Homer refers to sitting at food, *Il.* x. 578; *Odyss.* i. 145.

The food at an ordinary meal at present consists of messes of lentile-pottage (נָזִיד *nāzîd*) eaten with bread or wooden spoons (Robinson, ii. 86; Gn 25^{34}). Sometimes this is thickened with vegetables, or pillaus of rice with or without meat, thin sheets of bread serving for plates, and used to sop up the gravy (Finn, 24). Sometimes bread, cheese, olives, and *leben* make up the repast (Finn, 272). Doughty describes an Arab meal in which the family surrounded a vast trencher heaped with boiled mutton 'and great store of girdle bread.' Pieces torn off with the hand from the meat were lapped in the thin cakes of bread and handed to those who could not reach the dish (i. 46). Robinson saw, likewise, the guests surrounding a circular tray on which was a mountain of pillau of rice boiled with butter, and small pieces of meat strewed through it. Other dishes used are sausages stuffed with rice and chopped meat. Burckhardt gives a graphic account of the discomforts of such a feast to one unaccustomed to Eastern habits, *Notes*, i. 63. The poorer classes of Bedawin live chiefly on bread, eaten with raw leeks or radishes for flavouring, which is the 'dinner of herbs' (Pr 15^{17}; see Ro 14^{2}, Dn 1^{12}). For such a meal the son of the prophets went out to collect the *'ôrôth* or herbs (2 K 4^{39}). The Bedawi meal described in Ezk 25^{5} consisted of bread, dates, and milk. For an ordinary meal there is generally one dish, so that the member of the family who cooks, when it is brought in, has no further work. Hence our Lord's remonstrance with Martha, that one dish alone was needful (Lk 10^{42}). It was the duty of the cook to bring in the dishes when prepared (1 S 9^{23}), and that of the head of the family to distribute the portions (1 S 1^{5}), whose size might be varied according to his affection for the members of the circle. So Joseph gave Benjamin a fivefold mess, and Elkanah gave Hannah a double portion (but LXX says that he gave her only μερίδα μίαν, 'a single portion,' *because* she had no child). Very often, however, the circle help themselves when they can reach the dish, and as the meat has been cut up before being cooked it does not need any carving. At the present day the Mussulmans drink water or milk or *leben* with their meals, but probably in earlier times wine was used as a drink. In ancient times barley or polenta was used as rice is now, and the pillau was the ἠλφιτωμένα κρέα of the classics (see Gruner, *de Primit. Oblatione*). The food carried on journeys consisted of bread, cakes of figs or raisins, parched corn, and water. The good Samaritan carried also wine and oil. Dough is sometimes carried tied in a wallet or cloth (see Doughty, i. 231).

VII. FEASTS, or special meals, were provided on particular occasions, and are frequently mentioned. These were of various kinds—(1) Feasts of hospitality for the entertainment of strangers (Gn $18^{2\text{ff.}}$). These might be at any time—Abraham's was at the heat of the day, Lot's (Gn 19^{1-8}) was in the evening. For such feasts at the present day see Burckhardt, Robinson, Doughty, etc. (2) Entertainments of friends specially invited (Lk 14^{16} and many other passages). These were usually evening feasts. (3) Religious or sacrificial feasts, non-Jewish or Jewish, 'eating bread before God' (Ex 18^{12}), eating of sacrifices (Ex 34^{15} 29^{32}, Lv $19^{5.\,6}$, Nu $29^{12\text{ff.}}$, Dt 12^{7} $27^{6.\,7}$, 1 S 9^{13}, 2 S 6^{19}, 1 K 1^{9} 3^{15}, Zeph 1^{7}); also at the offering of tithes (Dt 14^{26}). Closely allied were (4) anniversary feasts, such as Passover (Ex 12^{14}), Purim (Est 9^{22}), and the Lord's Supper. (5) Celebrations of the completion of a great work, such as the building of the temple (2 Ch 7^{8}), the carrying home of the ark (2 S 6^{19}), a great deliverance (Jg 16^{23}), or the ratification of a treaty (Gn 26^{30} and 31^{54}). (6) At the beginning of a great work or laying a foundation. A reference to such a feast is in Pr 9^{1-5}. (7) Harvest-homes (Ex 23^{16}), sheepshearing (1 S 25^{36}, 2 S 13^{23}), vintage (Jg 9^{27}), and other agricultural events, were likewise the occasions of feasting. (8) Family events were celebrated by feasts of relatives and friends: circumcision (Lk 2^{58-59}), weaning (Gn 21^{8}), marriage (Jn 2^{1}, Gn 29^{22}, To 8^{19}, Jg 14^{10}, Mt 22^{2}), the return of a wandering member (Lk 15^{23}), funerals (2 S 3^{35}, Jer 16^{7}, Hos 9^{4}, To 4^{17}). Birthday feasts were not common among Jews, some of whom thought them profane (Lightfoot, Iselius), probably because other nations, such as the Persians, honoured them so conspicuously (see Herod. i. 133). Birthday feasts are mentioned in Gn 40^{20}, Job 1^{4}, Mt 14^{6-9}). Among modern Jews the circumcision feast is an important occasion (see CIRCUMCISION).

Any such feast was called מִשְׁתֶּה *mishteh*, the primary meaning of which is a banquet of wine, such as that given by queen Esther (Est 5^{6} 7^{7}). Abraham's feast at Isaac's weaning is called a *mishteh gādôl*, or great drinking. Job feared lest his sons should be led into excess at their periodic feasts (1^{5}) Such drinking feasts are specially mentioned in 1 S 25^{36}, 2 S 13^{28}, Dn 5^{1}, and reprobated by the prophets Amos (6^{6}) and Isaiah (5^{11}). In the NT κῶμοι are spoken of in Ro 13^{13}, Gal 5^{21}, and 1 P 4^{3}. The feast in 2 K 6^{23} is named כֵּרָה *kērâh*, perhaps because the prisoner guests sat in a ring (cf. נָסֹב in 1 S 16^{11}).

For these banquets the food animals were slain early in the day (Is 22^{13}, Pr 9^{2}, Mt 22^{4}), and a second invitation sent to remind just before the feast (Est 6^{14}, Pr 9^{3}, Mt 22^{3}). The guests on arrival were sometimes welcomed with a kiss (To 7^{6}, Lk 7^{45}; see Goezius, *de Osculo*, in Ugolini, xxx.), and provided with water to wash their hands, as they put their hands in the common dish (Mk 7^{3}; see *Odyss.* i. 136). These washings were made burdensome by traditional rituals (Mk 7^{2-18}). When the visitors came from a distance they were supplied with water to wash their feet. So Abraham did for the angels at their noontide feast (Gn 18^{4}), and Lot for their evening feast (Gn 19^{2}). So the old man at Gibeah did for the Levite and his concubine (Jg 19^{21}). See our Lord's rebuke to Simon (Lk 7^{44}), His own practice (Jn 13^{4}), and apostolic reference (1 Ti 5^{10}). The anointing of guests is referred to in Ps 23^{5}, Am 6^{6}, Lk 7^{38}, Jn 12^{3} (see ANOINTING; and in addition to the literature quoted there, see Weymar, *de Unctione Sacra Heb.*, in Ugolini, xii.; Reinerus and Verwey, *de*

Unctionibus, and Graberg, *de unctione Christi in Bethania*, in Ugolini, xxx.). The crowning of guests with garlands is mentioned in Is 28^{1}, Wis 2^{8}, Jos. *Ant.* XIX. ix. 1. See Plutarch, *Symp.* III. i. 3, and Martial, x. 19. After these preliminaries they sat down, males and females together (Ru 2^{14}, 1 S 1^{4}, Job 1^{4}, Lk 10^{40}); and grace was said in Jewish feasts (Mt 14^{19}, Lk 9^{16}, Jn 6^{11}). The guests were arranged in order of rank (Gn 43^{33}, 1 S 9^{22} 20^{25}, Lk 14^{8}, Mk 12^{39}, Jos. *Ant.* XV. ii. 4), the highest occupying the 'chief room,' the seat on the *protoklisia*. In Assyr. feasts they are represented as sitting (Layard, *Nineveh*, ii. 411). For Jewish practice see above. According to the Tosaphoth to *Berachoth*, vi., each guest had a separate table, but Pr 23^{1} speaks of sitting at meat with the host; and David says that he sat at table with Saul (1 S 20^{5}). The food was distributed either by the cook or by the head of the house (2 S 6^{19}, Gn 43^{24}), and the most honoured guest received the largest portion (Gn 43^{34}; see Herod. vi. 57), or else the tit-bit (1 S 9^{24}). To guests who could not come, presents of food were sometimes sent (2 S 11^{8}, Neh 8^{10}, Est 9$^{19-22}$).

At a feast in NT times the guests reclined on a *triclinium*, the couches being arranged on three sides of a square, the fourth side being open for serving, and strangers might stand around on the outer side (see Rashi, *ad Berachoth*, 46*b*. 16; *Pesachim*, vii. 13). A wine cup was passed round containing wine mixed with three parts of water (*Shabbath*, viii. 1); to this there are many metaphorical allusions in which the cup in the hand of the Lord is spoken of (Ps 75^{8}, Jer 25^{15}; see Buxtorf, *Synagog. Jud.* xii. 242, and Werner, *de Poculo Benedictionis*). The guests were entertained with music (2 S 19^{35}, Is 5^{12}, Am 6$^{4.5}$, Lk 15^{25}; see Maimonides, *de Jejuniis*, 5), dancing (Mt 14^{6}), and riddles (Jg 14^{12}). After the feast the hands were washed, as they were soiled by eating. Finn saw a guest taking handfuls of buttered rice from the dish, out of which he squeezed the butter between his fingers and licked it as it flowed down (*Byeways*, 171; Burckhardt, *Notes*, i. 63). Grace was said at the close of the meal (Dt 8^{10}, Ro 14^{6}; see *Berachoth*, vi. § 8). Wedding feasts were given by the bridegroom (Jg 14^{10}), but the arrangements were carried out under the direction of a *symposiarch* or ruler of the feast, and they sometimes lasted seven days (Jn 2^{9}, To 7^{8}; see Selden, *de Uxor. Heb.* ii. 11). Wedding garments given to guests are mentioned in Mt 22^{11}.

The giver of the feast sometimes marked distinguished guests by giving them a sop of bread held between the thumb and finger. A ψωμίον of this kind dipped in the *ḥarôseth* was given by our Lord to Judas. Sops are used to catch and convey pieces of meat (Lane, i. 193; Burckhardt, i. 63). In Proverbs the laziness of the sluggard is said to be such that he will not even lift up a sop (19^{24} 26^{15}).

For metaphorical allusions to feasts see Is 25^{6}; the feast of angels at the finishing of creation is referred to in Job 38^{7}. For Jewish feasts in general see Buxtorf, *de conviviis vet. Hebræorum*.

A. MACALISTER.

FOOL.—*A.* IN OT. The words tr^{d} by 'fool,' 'folly,' 'foolishness,' are the following: 1. נָבָל, נְבָלָה (opp. חָכָם in Dt 32^{6}, see Driver, *ad loc.*, and on 22^{21} 32$^{15.21}$). 2. כְּסִיל, כֶּסֶל, כִּסְלָה, כְּסִילוּת, סָכָל, סֶכֶל, סִכְלוּת (the root כסל means possibly 'to be thick, plump, sluggish'). 3. אֱוִיל, אֱוִלִי, אִוֶּלֶת (root-conception possibly the same as in the preceding). 4. מְהוֹלָל, הוֹלֵלוֹת, הוֹלֵלוּת (from a root suggesting the idea of wild frantic folly). 5. תָּפֵל, תִּפְלָה (from a root 'to be insipid'), only in Job 1^{22} 24^{12}, Jer 23^{13}. 6. תָּהֳלָה (supposed by Dillm. to be connected with Eth. *tahala*, 'to err'), Job 4^{18}.

All these terms denote something distinct from imbecility on the one hand and insanity on the other hand. It is in the forms under 4 only that the notions of 'folly' and 'madness' come together (cf. Job 12^{17}, Is 44^{25} with 1 S 21^{13}, Jer 25^{16}). As a rule, different words (derivatives from שָׁגַע) are used for 'madman' and 'madness.' The OT idea of 'folly' can be best understood from the antithesis it forms to 'wisdom.' Wisdom is not a theoretical or abstractly scientific apprehension of things, but such a practical immediate insight into their reality and manner of action as enables one to use them to advantage. Correspondingly, a fool is not one who is deficient in the power of logical thought, but one who lacks the natural discernment and tact required for success in life. Both wisdom and folly are teleological conceptions, and rest on the principle of adjustment to a higher law for some practical purpose. This general idea is, however, applied with considerable variety as to particular shades of meaning.

(*a*) In the widest sense folly is lack of common-sense in ordinary affairs (Gn 31^{28}, 1 S 25^{25} [נָבָל, נְבָלָה], 26^{21} [הִסְכַּלְתִּי], 2 S 15^{31} [סַכֵּל]). Here the element of unreasonableness and inexpediency is most prominent.

(*b*) A moral and religious element enters into the conception where it expresses flagrantly sinful conduct such as offends against the fundamental principles of natural law and usage. In this sense fools are great sinners—impious, reprobate people. But the original idea is retained in so far as the thought of sudden divine retribution lies in the background, it being considered the height of folly, by violating the elementary rules of religion and morality, to expose one's self to the untimely end which frequently befalls the fool (Jos 7^{15}, 2 S 3^{33} (cf. Driver, *in loco*), Job 2^{10} 30^{8} 5$^{2.3}$ [all נָבָל, נְבָלָה], Ps 107^{17} [אֱוִיל]). A profounder and more spiritualized turn is given to this idea in some of the psalms, where it is applied to sin as such (Ps 38^{5} 69^{5} [אִוֶּלֶת], cf. 2 S 24^{10} [נִסְכַּלְתִּי]). This whole usage, with its identification of what is sensible and right, bespeaks a high development of the popular moral sense in Israel.

(*c*) A special usage connected with the foregoing characterizes as folly sexual sins of various kinds (Gn 34^{7}, Dt 22^{21}, Jg 19$^{22.23.24}$ 20$^{6.10}$, Jer 29^{23}). The standing phrase is 'folly in Israel,' 'which ought not to be done,' the implication being that such offences go against all reason in undermining the foundations of society as well as destroying the holiness of Israel. נָבָל and נְבָלָה are regularly used in this meaning; a synonym is זִמָּה 'lewdness'; cf. further the sense of נַבְלוּת in Hos 2^{12}, and of the verb in passages like Jer 14^{21}, Mic 7^{6}, Nah 3^{6}; further, נְבָלָה in Job 42^{8}.

(*d*) Inasmuch as in the Mosaic law a special norm has been given for the wise guidance of Israel's life, disregard of this law is equivalent to foolishness. Apostate Israel is 'a foolish (נָבָל) people and unwise' (Dt 32^{6}); the Gentiles, not possessed of such a revelation, are 'a foolish nation,' 'a no-people' (Dt 32^{21}; cf. Dt 4^{6}, Jer 4^{22} [סָכָל]). The heathen diviners stand revealed as fools when the divinely-guided course of history foretold to Israel mocks their prognostications (Is 19$^{11.13}$ 44^{25}, Ezk 13^{3}). Especially the higher classes among Israel might be expected to have profited by this wisdom (Jer 5^{4}).

(*e*) A more specialized meaning is assumed by the term 'fool' in the so-called Ḥokhma-literature of the OT (Job, Proverbs, Ecclesiastes, and some psalms and prophetic passages). Here also foolishness is the opposite of wisdom. But wisdom has developed, out of the unreflecting instinctive gift of seeing right and doing right, into the conscious art of successfully ordering the whole of individual life and conduct in harmony with the teleological principles of the divine government of the world, especially as embodied in the revealed law. Hence wisdom and folly are here introduced as personifications; and the divine wisdom, as the archetypal source of every teleological arrangement, is distinguished from human wisdom. Wisdom in this sense is 'practical virtuosity in the entire domain of ethics' (Riehm); it is equivalent to methodically applied religion and morality, as appears from the frequent interchange between it and the terms denoting piety and righteousness. Folly, as its contrast, is presented under two aspects, being either confined to a simple disregard of the rules of wisdom, or proceeding to open denial of the principle of divine government on which these rules are based. In the former character the fool is elaborately depicted in Proverbs. While wisdom consists primarily in circumspect behaviour, self-control, self-restraint, and teachableness, the fool is he who lets his undisciplined nature have free play—the self-reliant, self-pleased, arrogant, indocile, hasty with words, contentious, envious, quick to anger, intemperate, credulous, sluggish, given to pursuit of vain things, unable to conceal his own folly and shame. As easily seduced, he is called פְּתִי 'simple,' as unreceptive of instruction either by counsel or experience כְּסִיל, as by nature stupid בַּעַר, as insensible to the claims of God or man נָבָל; cf. the definition of נָבָל in Is 32^{6} (in Pr נָבָל occurs only $17^{7.\,21}$ 30^{22}, אֱוִיל 19 t., כְּסִיל 49 t.).

Folly, in the most advanced sense of a systematically conceived and applied theory of life opposed to that of wisdom, is equivalent to practical atheism. The fool (נָבָל) is he who has said in his heart, 'There is no God'; by which, not a theoretical denial of the divine existence, but a practical negation of God's moral government is meant (Ps 14^{1} 53^{1} 39^{8}, Is 9^{17}). Synonymous with נָבָל in this meaning is לֵץ 'mocker.'

B. In NT. Analogies for most of the above meanings may be found in NT, usually with a somewhat larger admixture of the intellectual element.

(*a*) Foolishness appears as the lack of common-sense perception of the reality of things natural and spiritual, or as the imprudent ordering of one's life in regard to salvation; *ἄφρων*, *μωρός*, *ἀνόητος* (Mt 7^{26} 23^{17} $25^{2\text{ff.}}$, Lk 11^{40} 12^{20} 24^{25}, Gal $3^{1.\,3}$).

(*b*) The OT נָבָל as a moral reprobate reappears in the *μωρέ* of Mt 5^{22}, a term of opprobrium distinguished by its ethical import from the Aramaic Ῥακά, occurring in the same verse and expressing merely intellectual imbecility.

(*c*) Of the natural foolishness belonging to the heathen mind, the only remedy for which lies in the wisdom supplied by revelation, we read in Ro 2^{20}, Tit 3^{3}. The counterpart of the OT idea of the law as an institution for the wise guidance of Israel is furnished by St. Paul, who represents the gospel as a teleological arrangement in which the highest wisdom is manifested and recognized by the believer (Ro 11^{33}). Inasmuch, however, as the Gentile mind sustains a radically wrong relation to the moral world, it fails to see this marvellous adaptation and decries the gospel as foolishness. Even the converted Greek is under temptation to justify its reasonableness from the worldly point of view by such a presentation as will materially alter its character. Hence the sharp antithesis, 1 Co $1^{21\text{-}25}$ 2^{14} $3^{18\text{-}23}$ 4^{10}, the wisdom of the world is foolishness to God, the foolishness of Christ crucified is the wisdom of God.

(*d*) In Ro 16^{19}, Eph $5^{15.\,17}$ we are reminded of the Ḥokhma usage. The fool under whose mask St. Paul speaks 2 Co $11^{16\text{ff.}}$ corresponds in a formal sense to the boasting fool of Proverbs.

Geerhardus Vos.

FOOLERY.—Sir 22^{13} 'Talk not much with a fool . . . and thou shalt never be defiled with his fooleries' (*οὐ μὴ μολυνθῇς ἐν τῷ ἐντιναγμῷ αὐτοῦ* BS, *-γματι* A; RV 'thou shalt not be defiled in his onslaught'). The form in A, *ἐντίναγμα*, is found in Aq. at Is 28^{2} 32^{2}, and in Symm. Theod. at Is 28^{2}; neither form elsewhere in Greek. The verb from which the subst. is derived, *ἐντινάσσω*, is used in LXX, 1 Mac 2^{36} and 2 Mac 4^{41} of casting stones, and in 2 Mac 11^{11} of charging an enemy. It is probably with the last passage in mind that RV renders 'onslaught.' Edersheim (*Speaker's Com.*) prefers the more etymological trⁿ 'that which he throws out,' but understands that either *saliva* is meant literally, or that it is used figuratively for foolish words; Bissell follows Fritzsche and Bunsen, and renders *slaver*, 'which, of course, is used for low and foolish words.' For the Eng. word, cf. Shaks. *Winter's Tale*, III. ii. 185—

> 'Thy tyranny
> Together working with thy jealousies,—
> Fancies too weak for boys, too green and idle
> For girls of nine,—O, think, what they have done,
> And then run mad, indeed; stark mad! for all
> Thy bygone fooleries were but spices of it.'

J. Hastings.

FOOT (רֶגֶל, *πούς*).—There are various ideas connected with the foot due to its position as the lowest part of the human body.

1. *Subjection*, Jos 10^{24}, 2 S 22^{39}, Is 49^{23}, 1 Co $15^{25.\,27}$. The foot on the neck is seen on the Egyptian monuments. The promise made to Joshua of possessing every place that the sole of his foot should tread upon, is literally claimed and acted upon by Islam. The Sultan is *the Shadow of God*, the token of the Almighty's presence and power; military conquest is therefore a triumph of the faith and an inalienable possession. After the war with Greece in 1897, this article of belief created a religious dilemma with regard to withdrawing from conquered Thessaly.

2. *Humility*, as in the relationship of disciple sitting at the feet of master (Dt 33^{3}, Lk 10^{39}, Ac 22^{3}), and generally of inferior to superior in the act of obeisance and worship (Nu 16^{4}, Ru 2^{10}, Ezk 11^{18}, Mt 18^{29}, Rv 5^{14} etc.). Such prostration forms part of the ordinary Moslem devotions.

3. *Defilement*, Ex 3^{5}. Contact with the common earth was considered defiling, and gave rise to the Oriental rule about removing the shoe, and on certain occasions washing the feet before entering sacred places, such as buildings devoted to worship, shrines, and in houses the carpeted rooms where prayer is offered. Shaking the dust from the feet is an easy and often-repeated act on the dusty roads of the East. The shoe or slipper is not usually removed, but the foot is held out and shaken with the shoe hanging down from the toes, until the dust falls out. It was a symbol of scornful and complete rejection (Mt 10^{14}, Ac 13^{51}). The same thought is now more commonly expressed by shaking the collar of the coat (cf. Ac 18^{6}).

The feet were put in stocks (Job 13^{27}), fastened with fetters (Ps 105^{18}; see Chain). They were also adorned with anklets (Is 3^{18}).

When the word of God is called *a lamp to the feet* (Ps 119^{105}), the reference is to village or town life, with ditches, refuse, and dogs in the pathway. A lantern was carried in the hand, or by a servant walking in front. Until recently, before the streets began to be lit by lamps at distant intervals, any one found walking at night without a lantern was liable to be arrested as a thief. In the journeys of the desert the direction is by the stars; or where there is a path the horse or baggage animal is trusted to keep it.

Washing the feet was rendered necessary by the heat and dust of the road, and by the open sandals or loose shoes that were worn. As an attention rendered to a guest, both on account of the humility of the service and the comfort to the traveller, it belonged to the inner graces of hospitality (Lk 7^{38}, Jn 13^{5}, 1 Ti 5^{10}).

For 'foot-breadth,' Dt 2^{5}, RV gives 'for the sole of the f. to tread upon.' For 'foot' of laver Ex 38^{8} RV gives 'base' (כֵּן). By the *lex talionis* (Ex 21^{24}, Dt 19^{21}) 'foot for foot' was exacted. In Dt 11^{10} a contrast is drawn between the climate and the methods of cultivation characteristic of Palestine and of Egypt. When Israel was in the last-named country they 'sowed their seed and *watered it with the foot*.' The reference here appears to be to the use of some machine by which water was raised and distributed for irrigation purposes (see Lane, *Modern Egyptians*, ed. 1871, ii. 25 ff.), but the precise method is doubtful (cf. the full and interesting note in Driver's *Deut.* p. 129, and in 2nd ed. p. xxi).*

G. M. MACKIE.

FOOTMAN.—This word is used in two different senses: **1.** A foot-soldier, always in plu. 'footmen,' foot-soldiers, infantry. The Heb. is either רַגְלִי *raglî* (always sing. except Jer 12^{5}, where the meaning is, however, not foot-soldiers but foot-runners; see below), or more fully אִישׁ רַגְלִי *'ish raglî* (Jg 20^{2}, 2 S 8^{4}, 1 Ch 18^{4} 19^{18}). The Greek is mostly πεζοί (1 Es 8^{51}, Jth 1^{4} 2$^{5.\,19.\,22}$ 7^{20} 9^{7}, 2 Mac 11^{4} 13^{2}), but we also find ἀνδρές 1 Mac 9^{4}, φάλαγξ 1 Mac 10^{82}, δυνάμεις 1 Mac 12^{49}, and πεζικοί (א^{1} -ή) 1 Mac 16^{5}. Footmen probably composed the whole of the Isr. forces (1 S 4^{10} 15^{4}) before the time of David. From Solomon's day onwards Israel certainly possessed also chariots and cavalry (1 K 4^{26} EV). See ARMY. The Eng. word is used freely in old writers in this sense, as Malory, *Morte Darthur*, I. ix. 'And when he came to the sea he sent home the footmen again, and took no more with him but ten thousand men on horseback'; I. xiv. 'ever in saving of one of the footmen we lose ten horsemen for him.'

2. A runner on foot: 1 S 22^{17} 'And the king said unto the footmen that stood about him, Turn, and slay the priests of the LORD' (רָצִים *raẓîm*; AVm 'or *guard*, Heb. *runners*'; RV 'guard,' RVm 'Heb. *runners*'). 'Runners' would be the literal, and at the same time the most appropriate tr^{n}. The king had a body of runners about him, not so much to guard his person as to run his errands and do his bidding. They formed a recognized part of the royal state (1 S 8^{11}, 2 S 15^{1}); they served as executioners (1 S 22^{17}, 2 K 10^{25}); and, accompanying the king or his general into battle, they brought back official tidings of its progress or event (2 S 18^{19}, and see AHIMAAZ). Out of this running messenger the Persian kings developed a regular postal system (Est 3^{13}, and see POST).

Runners were at one time in England an essential part of a nobleman's train. Thus Prior (1718), *Alma*, i. 58—

> 'Like Footmen running before Coaches
> To tell the Inn what Lord approaches.'

But the *Bee* (1791) says 'their assistance was often wanted to support the coach on each side, to prevent it from being overturned.' The modern footman has a different function, but he is the lineal descendant of the 'running footman,' as he came to be called, of an earlier day.

In Jer 12^{5} both the Heb. (רַגְלִים) and the Eng. (footmen) seem to be used in the more general sense of racers *on foot*: 'If thou hast run with the footmen, and they have wearied thee, then how canst thou contend with horses?' Cf. Webster (1654), *Appius and Virg.* I. i.—

> 'I have heard of cunning footmen that have worn
> Shoes made of lead, some ten days 'fore a race,
> To give them nimble and more active feet.'

J. HASTINGS.

FOOTSTOOL.—Although this word occurs repeatedly in the Bible, it is remarkable that only twice at most is it used in its literal sense. In OT it appears in 2 Ch 9^{18} as tr^{n} of כֶּבֶשׁ (fr. כָּבַשׁ 'tread under foot'), the golden footstool of Solomon's throne, but here Kittel (see his note in Haupt's *OT*) would read כֶּבֶשׂ 'lamb.' The one clear reference to a literal footstool is in Ja 2^{3} 'sit under my footstool' (ὑποπόδιόν μου). Everywhere else, both in OT (1 Ch 28^{2}, Is 66^{1}, La 2^{1}, Ps 99^{5} 110^{1} 132^{7}, in all of which it is tr^{n} of הֲדֹם רַגְלַיִם, the word הֲדֹם being poet. or late) and NT (Mt 5^{35}, Mk 12^{36}, Lk 20^{43}, Ac 2^{35} 7^{49}, He 1^{13} 10^{13}, all ὑποπόδιον τῶν ποδῶν, tr^{d} by RV with strict accuracy 'footstool of my [thy, his] feet' instead of AV 'my [thy, his] footstool'),* it is used metaphorically. Originally הֲדֹם רַגְ׳, spoken of God, seems to have designated the *ark*, 1 Ch 28^{2}, but was naturally extended to include the whole of the *temple*, La 2^{1} (see notes of Thenius and Löhr), Ps 99^{5} 132^{7} (cf. Is 60^{13}, Ezk 43^{7}). In Ps 110^{1} the vanquished foes of the Messianic King are put as a footstool under His feet. In Is 66^{1} earth is the footstool of Him whose throne is heaven.

J. A. SELBIE.

FOR.—Both as prep. and as conj. 'for' has some archaic or obscure uses that deserve attention.

1. When the meaning is *on account of*, as Gn 20^{3} 'Behold thou art but a dead man, for the woman which thou hast taken' (עַל, RV 'because of'). The RV has changed 'for' into 'because of' in Ezk 6^{11} (Heb. אֶל); Gn 20^{3}, Est 9^{26}, Hos 9^{15} (Heb. עַל); Lv 16^{34}, La 4^{13}, Dn 5^{19} (Heb מִן); 2 S 13^{2} (Heb. בַּעֲבוּר); 2 K 16^{18}, Jer 9^{7} 38^{9} (Heb. מִפְּנֵי); Jer 11^{17} (Heb. בִּגְלַל): and into 'by reason of' in Lv 17^{11}† (Heb. בְּ); Dt 28^{47}, Is 31^{9}, Ezk 27^{18}, Hos 8^{10}, Zec 2^{4} (Heb. מִן). In NT ἀπό, ἐν, ἕνεκα, ἐπί with dat. and διά with acc. are all used in this sense, and tr^{d} 'for.' When the Gr. is διά, with acc., RV changes 'for' into 'because of' in Jn 4^{39}, Ro 3^{25} 13^{5}, 1 Co 7^{5}, Col 1^{5}, He 2^{9}, Rev 4^{11}; and into 'by reason of' in 1 Co 7^{26}, 2 Co 9^{14}, He 5^{12}. For this meaning cf. Chaucer, *Romaunt*, A 1564—

> 'Abouten it is gras springing,
> For moiste so thikke and wel lyking,
> That it ne may in winter dye,
> No more than may the see be drye.'

Sometimes the meaning approaches that of *against*, as 2 K 16^{18} 'the king's entry without, turned he from the house of the LORD for the king of Assyria' (מִפְּנֵי, RV 'because of'); so Ps 27^{11} Wyc. 'dresse thou me in thi path for myn enemyes'; and Is 32^{2} Cov. 'He shalbe unto men, as a defence for the wynde, and as a refuge for the tempeste.'

2. For means *instead of*, or *in exchange for*, as in Dn 8^{8} 'the great horn was broken; and for it came up four notable ones' (תַּחַת, RV 'instead of it'); Is 61^{7} 'For your shame ye shall have double; and for confusion they shall rejoice in their portion' (תַּחַת); so Nu 8^{18} (תַּחַת, RV 'instead of');

---

* In modern Syria, where level irrigated ground like that of Egypt is planted with vegetables or mulberry trees in rows, the field or patch is laid out in shallow drills, and, as each receives its sufficiency of water, a little earth is taken from the end of the next drill and patted by the naked foot into a dam, so that the water may pass to the drill next in order.

* In Mt 22^{44} for AV 'till I make thine enemies thy footstool' RV gives 'till I put thine enemies under thy feet' (ἕως ἂν θῶ τοὺς ἐχθρούς σου ὑποκάτω [TR. ὑποπόδιον] τῶν ποδῶν σου).

† On the translation and meaning of this important passage see especially Kalisch, *in loc.*

Gn 47^{17} (בְּ, RV 'in exchange for'); Pr 21^{18} (לְ, RV 'in the stead of'); Nu 18^{31} (חֵלֶף, RV 'in return for'). Cf. Philem ^{16} Wyc. 'now not as a servaunt, but for a servaunt a most dere brother.'

3. For is occasionally equivalent to *as*: Is 43^{3} 'I gave Egypt for thy ransom' (כָּפְרְךָ, RV 'as thy ransom'); Mt 21^{46} 'they took him for a prophet' (ὡς); 1 P 2^{16} 'not using your liberty for a cloke of maliciousness' (ὡς). Cf. *Merlin* (E.E.T.S.), iii. 642, 'Thei clayme Bretaigne for thiers, and I clayme Rome for myne'; Defoe, *Rob. Crusoe* (Gold Treas. ed. p. 522), 'I was never pursued for a Thief before.'

4. For, as a conj., is used to introduce the cause or reason. Sometimes modern usage would prefer 'because' or 'seeing that,' as in Wyclif, *Select Works*, iii. 105, 'And for God made alle thinges to help of mankynde, therfore we sholde axe thes thynges of God'; and p. 110, 'And ones they reprovede Crist, for his disciples wesche nought here hondes whanne they sholde eete, as here custome was'; and Tindale's tr^{n} of 1 Jn 3^{12} in *Expositions*, 191, 'And wherefore slew he him? For his deeds were evil, and his brother's righteous' (in edd. of NT 1526 and 1534 'because'). So in some places of AV, as Jn 11^{47} 'What do we? for this man doeth many miracles.' In the foll. passages RV changes 'for' into 'because': Nu 21^{7} 27^{14} 32^{12}, Dt 14^{7}, 1 S 9^{24}, Job 15^{25} 32^{16}, Jer 20^{11} 51^{11}, Ezk 36^{18}, Dn 9^{19}, Mt 23^{13}, Lk 1^{13} 4^{41} 6^{48} 21^{28}, Ac 22^{18}, Eph 5^{30}, Ph 1^{29}, 1 P 4^{14}, 1 Jn 3^{9}, Rev 12^{12}: to which Amer. RV adds Jer 3^{21}, 1 Jn 3^{20}. Some of those changes, however, are due to a change in the construction of the sentence, especially Ezk 36^{18}. There is, indeed, no glaringly obsolete example of 'for' in this sense in AV, such as we find so often in Shaks. Cf. *Tempest*, I. ii. 272—

> 'And, for thou wast a spirit too delicate
> To act her earthy and abhorred commands,
> Refusing her grand hests, she did confine thee,
>
> . . . .
>
> Into a cloven pine.'

5. The foll. phrases are archaic or obsolete: (1) *For all*, Ps 78^{32} 'For all this they sinned still' (בְּכָל־זֹאת); Jn 21^{11} 'for all there were so many, yet was not the net broken' (τοσούτων ὄντων). Cf. Chaucer, *Knightes Tale*, 1162—

> 'The sowe freten the child right in the cradel;
> The cook y-scalded, for al his longe ladel.'

(2) *For because*, Gn 22^{16} 'By myself have I sworn, saith the LORD, for because thou hast done this thing . . . that in blessing I will bless thee' (כִּי יַעַן אֲשֶׁר, RV 'because'); Jg 6^{22} 'Alas, O Lord God! for because I have seen an angel of the LORD face to face' (כִּי־עַל־כֵּן, RV 'forasmuch as'). So Knox, *Hist.* 110, 'Let him be judged of you both foolish, and your mortall enemie: Foolish, for because he understood nothing of Gods approued wisdome; and enemie unto you, because he laboured to separate you from Gods favour'; and p. 159, 'One of the Bishops sons thrust thorow with a Rapier one of Dundie, for because hee was looking in at the Girnel door'; Barlowe, *Dialoge*, 76, '*W*. Why do ye then despise the vniuersall churche, because some of them be noughte. *N*. Mary for because the more somme of the euyll, surmountethe the lesse number of the good.' (3) *For that* = 'because,' Ex $16^{7.\,8}$ (בְּ), ^{29} 'See, for that the LORD hath given you the Sabbath, therefore he giveth you on the sixth day the bread of two days' (כִּי); 1 Es 7^{15} (ὅτι), 1 Mac 4^{58} (καί, RV 'and'); Jn 12^{18}, 2 Co 1^{24} (RV 'that'), 1 Ti 1^{12} (all ὅτι); He 7^{15} (εἰ, RV 'if') 5^{2} (ἐπεί), 2 Co 5^{4} (TR ἐπειδή, edd. ἐφ' ᾧ), Ro 5^{12} (ἐφ' ᾧ), Ja 4^{15} 'For that ye ought to say' (ἀντὶ τοῦ λέγειν, RVm 'Instead of your saying'). RV shows a fondness for this phrase, omitting it from AV only where marked above, and adding Jg $5^{2\,bis}$, Ezk 16^{5} 23^{30} (Heb. בְּ); Nu $12^{11\,bis}$, Neh 2^{10}, Is 19^{25} (Heb. אֲשֶׁר); Jn 2^{24} (διὰ τό with inf.); 2 Th 2^{13} (ὅτι). Cf. Shaks. *Mer. of Venice*, I. iii. 43—

> 'I hate him for he is a Christian,
> But more for that in low simplicity,
> He lends out money gratis.'

(4) *For to*: The infinitive of purpose used often to be strengthened by *for*, an idiom that is still in use locally. Thus Gn 43^{30} Tind. (1530), 'Joseph made hast (for his hert dyd melt upon his brother) and soughte for to wepe' (changed in Matthew's Bible of 1537 into 'where'); Pr. Bk. 1549 (Keeling, p. 33), 'To be a light for to lighten the Gentiles' (the 'for' is omitted in the 1552 ed. and afterwards); Fuller, *Holy Warre*, 215, 'As for his good father, he was content to let go the staff of his age for to be a prop to the Church.' Although in AV this 'for' seems always to express purpose, it was formerly added to the infin. even when no purpose was expressed, as Berners, *Froissart*, I. cxxvi., 'The king of England being at Airaines wist not where for to pass the river of Somme.' The 'for' is retained or omitted in AV at the mere good pleasure of the translators. Moon (*Eccles. English*, 117) gives a curious list: Gn 31^{18} 'for to go,' Ru 1^{18} 'to go'; Is 41^{22} 'for to come,' Jer 40^{4} 'to come'; Gn 41^{57} 'for to buy,' 42^{7} 'to buy'; and so on through a list of fifteen couples. The RV for the most part leaves these inconsistencies alone; but it adds some of its own. Thus in AV ἵνα is tr^{d} 'for to' in Mk 3^{10}, Jn 10^{10} 11^{53}, Ac 17^{15} 22^{5}, Eph 2^{15}, Rev 9^{15} 12^{4}; RV changes all into 'that' with subj. except Ac 22^{5}, which it leaves untouched. Again, in Mt 11^{8} RV retains 'for to see,' but in the parallel passage, Lk 7^{21}, omits the 'for,' though the Greek is the same.

6. 'For' as the tr^{n} of ἀντί, περί, or ὑπέρ (and it is the frequent rendering of each of these prepositions) assumes considerable theological importance. The RV has been particularly careful and discriminating in this case. Beyond that, the English reader must consult the exegetical commentaries, and such articles as ATONEMENT, PROPITIATION.

J. HASTINGS.

FORAY occurs once in RV (2 S 3^{22} 'from a foray,' AV 'from [pursuing] a troop'). The Heb. word גְּדוּד, which frequently means *a marauding band* (*e.g.* 1 S $30^{8.\,15.\,23}$, 1 K 11^{24}), seems in this instance to bear the transferred but natural sense of an expedition of such a band.

FORBEAR, FORBEARANCE.—In the still common meanings of *abstain from*, *refrain*, or *desist*, forbear is used in AV both absolutely and with an infin. following. Thus absolutely, 1 K 22^{6} 'Shall I go against Ramoth-gilead to battle, or shall I forbear?'; Zec 11^{12} 'If ye think good, give me my price; and if not, forbear' (both חָדַל, the usual word so tr^{d}); 2 Co 12^{6} (φείδομαι). Or with foll. infin., Pr 24^{11} 'If thou forbear to deliver them that are drawn unto death, and those that are ready to be slain' (אִם־תַּחְשׂוֹךְ; RV 'Deliver them that are carried away unto death, and those that are ready to be slain see that thou hold back,' taking אִם as a particle expressing a wish, not as a conj. 'if'; so *Oxf. Heb. Lex.* and most edd.; RVm 'forbear thou not to deliver'); Ezk 24^{17} 'Forbear to cry' (הֵאָנֵק דֹּם, lit. 'sigh, be silent'; RV 'Sigh, but not aloud'; Skinner, 'Sigh in silence': the Geneva Bible gives 'Cease from sighing'; Bishops', 'Mourne in silence'; Douay, 'Sigh holding thy peace'; Segond, 'Soupire en silence'; Siegfried, 'Seufze still'); 1 Co 9^{6} 'Have not we power to forbear working?' ([τοῦ] μὴ ἐργάζεσθαι); Eph 6^{9} 'forbearing threatening' (ἀνιέντες τὴν ἀπειλήν; T. K. Abbott, 'giving up your threatening,' which they had been accustomed to use before they were Christians).

Forbear is used once in AV (and retained in RV) reflexively, a construction which is very rare: 2 Ch 35^{21} 'forbear thee from meddling with God, who is with me, that he destroy thee not' (חֲדַל־לְךָ מֵאֱלֹהִים, *Oxf. Lex.* 'leave off provoking God'). Here forbear means restrain thyself, refrain: cf. Ad. Est 16^{11} Cov., 'he coude not forbeare him self from his pryde.'

But the most noticeable use of 'forbear' is as a *transitive* verb, in the sense of *bear with, be patient with.* The examples are, Neh 9^{30} 'Yet many years didst thou forbear them' (וַתִּמְשֹׁךְ עֲלֵיהֶם, lit. as AVm, 'didst protract over them'; LXX εἵλκυσας [A ἤλ-] ἐπ' αὐτούς; Vulg. 'protraxisti super eos'); 2 Es 1^{9} 'How long shall I forbear them, unto whom I have done so much good?' (*usquequo eos sustinebo*); Eph 4^{2} = Col 3^{13} 'forbearing one another' (ἀνεχόμενοι ἀλλήλων). So Tindale's tr. of Rev 2^{2} 'thou cannest not forbeare them which are evyll'; T. Adams, *II Peter*, on 1^{1}, 'Rotten kernels under fair shells, full of Herod's and Naaman's exceptives: in this forbear us'; Livingstone, *Memorable Characteristics* (Wodrow, *Select Biog.* i. 324), 'somewhat forborn for their non-conformity'; and Shaks. *Othello*, I. ii. 10—

> 'with the little godliness I have,
> I did full hard forbear him.'

RV introduces 'forbearing' in this sense into the text of 2 Ti 2^{24} from AVm, the text of AV being 'patient' (Gr. ἀνεξίκακος, lit. 'patient of wrong,' from fut. of ἀνέχομαι to bear, and κακόν wrong); and it is in this sense only that **Forbearance** occurs, Ro 2^{4} 3^{25} (ἀνοχή), both of God's forbearance with men; and in RV, Ph 4^{5} 'Let your forbearance be known unto all men' (τὸ ἐπιεικές; AV 'moderation,' RVm 'gentleness': Vincent, 'From εἰκός, reasonable, hence *not unduly rigorous*'; Wyc. 'pacience,' Tind. 'softenes,' so Cov. Cran.; Gen. 'patient mind,' so Bish.; Rhem. 'modestie,' after Vulg. *modestia*, Luther 'Gelindigkeit,' Weizsäcker 'Lindigkeit,' the French VSS 'douceur.' The idea, says Vincent, is 'Do not make a rigorous and obstinate stand for what is your just due'). See next article. J. HASTINGS.

FORBEARANCE, LONG-SUFFERING.—Forbearance is the tr. in AV of NT of ἀνοχή, and long-suffering of μακροθυμία. Their close connexion in meaning is shown by their combination in various passages. Thus in Ro 2^{4} the wealth of God's 'forbearance and long-suffering' is mentioned as designed to lead men to repentance. In Ro 3^{25} the f. of God is the ground, not of the forgiveness of sins, but of their pretermission; not of the annulling, but of the suspension of His punishment. The same combination is required of Christians in Eph 4^{2}; they are to walk worthy of their calling, 'with long-suffering, forbearing one another in love,' where the last words interpret the first. In OT ἀνοχή seems to occur only in 1 Mac 12^{25} in the technical sense of 'truce'; the corresponding verb is used in a wide range of meanings, which, however, are easily connected with each other. Μακρόθυμος, again, in the LXX is the regular rendering of the Heb. אֶרֶךְ אַפַּיִם. It is most frequently used of God, and in combination with such words as πολυέλεος, οἰκτίρμων, ἐλεήμων. It designates that attribute of God in virtue of which He bears long with that which provokes His anger, and does not proceed at once to execute judgment upon it.

Where μακροθυμία is used of men, the meaning is sometimes rather different. It becomes akin to patience as well as to forbearance. Thus it is combined with ὑπομονή in Col 1^{11} and with κακοπάθεια (-ία WH) in Ja 5^{10}; cf. also 2 Ti 3^{10}. These examples, as well as those in He 6^{15}, Ja 5$^{7f.}$, Sir 2^{4}, prove that Trench's distinction is hardly accurate, viz. that μακροθυμία will be found to express patience in respect of persons, ὑπομονή patience in respect of things. In the passages just quoted μακροθυμία is shown in bravely enduring the pressure of what seem adverse circumstances, the trials of the good life, and is better reproduced by 'patience' or 'endurance' than by 'long-suffering.' A real parallel to this use is found in 1 Mac 8^{4}, where we are told how the Romans subdued all Spain by their counsel and their μακροθυμία; where the word evidently means their stubborn persistence, that quality in virtue of which, though sometimes defeated in battle, they were always victorious in war. But though this sense of μακροθυμία is represented in NT, the prevailing one is that which is akin, not to endurance but to forbearance; it is a slowness, like that of God, in avenging wrongs, a restraint of anger, a gentleness and meekness in dealing with those who treat us unjustly. The synonymous word in this direction is rather πραότης than ὑπομονή. There is a difficult passage about God's long-suffering in Lk 18^{7}. If we compare Sir 32^{22} ὁ κύριος οὐ μὴ βραδύνῃ οὐδὲ μὴ μακροθυμήσει ἐπ' αὐτοῖς, ἕως ἂν συντρίψῃ ὀσφὺν ἀνελεημόνων, it can hardly seem doubtful that the evangelist meant by his last words, 'though he shows long indulgence to them,' *i.e.* to the enemies of the elect; if, however, ἐπ' αὐτοῖς must refer to the elect, then there seems no clear meaning to be got but by confining the force of the οὐ to the first clause, and saying that God surely does not exercise long-suffering (this would be the effect of the interrogative μή) where the interests of His elect are at stake, but avenges them speedily. But whatever we make of this case, there is no doubt that long-suffering and forbearance are characteristically and conspicuously qualities both of the divine and of the Christian character. As distinguished from each other, ἀνοχή suggests that it is merely a temporary restraint that is being practised; this may be the case with μακροθυμία also, indeed it is the case, and hence such warnings as we have in Ro 2$^{4f.}$, but it is not suggested by the word itself. J. DENNEY.

FORBID.—To forbid is to order one not to do a thing, and the proper construction is a personal object and an infin., as 1 Th 2^{16} 'Forbidding us to speak to the Gentiles that they might be saved.' But custom allows the omission of the person, as Lk 23^{2} 'We found this fellow perverting the nation, and forbidding to give tribute to Cæsar'; or of the infin., as Nu 11^{28} 'My lord Moses, forbid them,' Mt 3^{14} 'But John forbad him.' But when 'forbid' is found with an impers. object and that alone, the construction is quite irregular. There are two instances, 2 P 2^{16} 'a dumb ass speaking with man's voice forbad the madness of the prophet' (RV 'stayed'),* and Ac 10^{47} 'Can any man forbid water that these should not be baptized?' In both cases the Greek verb (κωλύειν) is that usually translated 'forbid,' and in Greek writers it has the meanings of 'restrain' (as 2 P 2^{16}) and 'refuse' (as Ac 10^{47}), but the Eng. verb 'forbid' has not properly these meanings, and should not have been used. In both places 'forbid' is as old as Wyclif, who, following the Vulg. *prohibere*, used the word very freely: compare its use in Ac 11^{17} 'Who was Y, that myghte forbeede the Lord, that he gyue not the Hooli Goost to hem that bileueden in the name of Jhesu Crist?'

From Wyclif also comes **God forbid**, the strong and striking translation of חָלִילָה *ḥâlîlâh* and of μὴ γένοιτο.

Ḥâlîlâh is a subst. formed from the verb *ḥâlal* to pollute or (ceremonially) profane, the suffix being locative. It is used only as an exclamation, *Ad profanum*! Away with it! Far be it! Twice it stands alone in the sentence, 1 S 14^{45} 20^{2} (חָלִילָה לֹא תָמוּת, EV 'God forbid; thou shalt not die'). Sometimes a pronoun accompanies it, 1 S 2^{30} (חָלִילָה לִּי, EV 'Be it far from me'), so Gn 18^{25b}, 1 S 20^{9} 22^{15}. But most frequently it is connected with the sentence by a conjunction, מִן with infin. Gn 18^{25} 44$^{7.17}$, Jos 24^{16}, 1 S 12^{23}, 2 S 23^{17}, 1 Ch 11^{19}, and (attached to the 'profane' thing) Job 34^{10} (חָלִלָה לָּאֵל מֵרֶשַׁע, EV 'Far be it from God that he should do wickedness'); or אִם 1 S 14^{45} 24^{7}, 2 S 20^{20}, Job 27^{5}. The exclamation tended to assume the form of an oath, and in four places the name of J″ is added, 1 S 24^{7} 26^{11}, 2 S 23^{17}, 1 Ch 11^{19}. The shorter form חָלִלָה is used Gn 18^{25} *bis*, Job 34^{10}.

---

* Cf. Paraphrase 62^{10} (1775)—

> 'The contrite race he counts his friends,
> Forbids the suppliant's fall.'

The LXX translates the word variously: by *μὴ γένοιτο* Gn 44$^{7.17}$, Jos 22^{29} 24^{16}, 1 K 21^{3}; by *μηδαμῶς* (with or without *μοι, σοι*) Gn 18^{25} *bis*, 1 S 2^{30} 12^{23} 20$^{2.9}$ 22^{15} 24^{6} 26^{11}; by *ἵλεώς μοι [ὁ θεός]* 2 S 20^{20} *bis* 23^{17}, 1 Ch 11^{19}; by *ζῇ Κύριος* 1 S 14^{45}; and by *μή μοι εἴη* Job 27^{5}.

The Vulg. is more uniform, rendering by *Absit* (hoc) *a me* (*te*, etc.) in all places except Gn 18^{25b} *nequaquam*, 44^{7} where *absit* of Old Lat. may have dropped out, 1 S 14^{45} *Hoc nefas est*, and *Propitius sit mihi Dominus* in 1 S 24^{6} 26^{11}, 2 S 23^{17}, 1 K 21^{3}.

Wyclif followed the Vulgate, the later version having 'Fer be it fro me, thee,' etc., wherever Vulg. has *Absit* (*hoc*) *a me, te*, etc., and 'The Lord be merciful to me' in 1 S 24^{6} 26^{11}, 2 S 23^{17}, 1 K 21^{3}; while Gn 44^{7} is 'Whi speketh oure Lord so,' and 1 S 14^{45} 'This is unleueful.' The earlier version is less uniform, thus Jos 22^{29} 'God shilde fro us this hidows gilt,' 1 Ch 11^{19} 'God sheelde,' 1 S 14^{45} 'that is felony.' So, wherever *μὴ γένοιτο* occurs in NT the earlier Wyc. vers. has 'Fer be it,' but the later has always 'God forbede.' And this phrase was accepted by Tindale, and after him by nearly all the Versions both in OT for *ḥâlîlâh* and in NT for *μὴ γένοιτο*.

AV and RV translate *ḥâlîlâh* by 'God forbid' ('The Lord forbid' 1 S 24^{6} 26^{11}, 1 K 21^{3}, and 'My God forbid it me' 1 Ch 11^{19}) everywhere except Gn 18^{25} *bis*, 1 S 2^{30} 20^{9} 22^{15}, 2 S 20^{20} *bis* 23^{17}, where the Wyclifite phrase 'Far be it from' or 'Be it far from' has been retained. This phrase Amer. RV prefers throughout OT.

As we have seen, *μὴ γένοιτο* is only one of the renderings of *ḥâlîlâh* in LXX. Of the others *μηδαμῶς* occurs twice in NT, Ac 10^{14} 11^{8} (EV 'Not so, Lord'), and *ἵλεώς σοι* once, Mt 16^{22} (EV 'Be it far from thee, Lord'). But *μὴ γένοιτο* is found fifteen times, all but Lk 20^{16} being in St. Paul's Epistles, and in twelve of St. Paul's fourteen instances it is used to express the apostle's abhorrence of an inference which he fears may be falsely drawn from his argument. See Burton, *NT Moods and Tenses*^{2}, p. 79. EV translates everywhere by 'God forbid,' a phrase which is undoubtedly more forcible than the original, and for which Lightfoot suggests 'Nay, verily,' or 'Away with the thought.'

'God forbid' occurs also in Apocr., 1 Mac 2^{21} 'God forbid that we should forsake the law and the ordinances' (*Ἵλεως ἡμῖν καταλείπειν*, RV 'Heaven forbid,' RVm 'Gr. *May* he be propitious. Cf. 2 S 23^{17} Sept.'); 9^{10} 'Then Judas said, God forbid that I should do this thing' (*Μή μοι γένοιτο ποιῆσαι*, RV 'Let it not be so that I should do this thing'). J. HASTINGS.

FORCE.—The subst. 'force' has become restricted in meaning since 1611. It then signified a man's personal *might*, as Jer 23^{10} 'their course is evil, and their force is not right' (גְּבוּרָה, Cheyne 'their might or heroism'); even *physical strength*, as Dt 34^{7} 'his eye was not dim, nor his natural force abated' (לֵחַ, only here, but adj. לַח is *moist*, *fresh*, of fruit, Nu 6^{3}, or of growing or freshly-cut wood, Ezk 17^{24}, Gn 30^{37}, hence 'neither had his freshness fled'—Driver); Job 40^{16} 'his force is in the navel (RV muscles) of his belly' (אוֹן, here of behemoth, in 18$^{7.12}$ of man's strength); Am 2^{14} 'the strong shall not strengthen his force' (כֹּחַ). Cf. Ps 102^{23} (Sternhold and Hopkins)—

> 'My wonted strength and force he hath abated in the way.'

Force as a personal attribute is now restricted to strength in action or application, as it is in Ezk 34^{4} 'with force and with cruelty have ye ruled them' (חָזְקָה); and in the phrase 'take by force,' which in Mt 11^{12}, Jn 6^{15}, Ac 23^{10} is the tr^{n} of the single verb *ἁρπάζειν*, to seize.

The phrase 'of force' is now replaced by 'in force.' It occurs He 9^{17} 'a testament is of force after men are dead' (*βέβαιος*); and in a slightly different sense, 2 Es 7^{35} 'the good deeds shall be of force, and wicked deeds shall bear no rule' (*iustitiæ vigilabunt*, RV 'shall awake'): cf. 9^{37} 'the law perisheth not, but remaineth in his force' (*permansit in suo honore*, RV 'in its honour'). The phrase was also used in the sense of 'by compulsion,' as we still use 'perforce'; so often in Shaks. as *I Henry IV*. II. iii. 120—

> 'Will this content you, Kate?
> It must, of force';

Jul. Cæs. IV. iii. 203—

> 'Good reasons must, of force, give place to better';

Milton, *PL* iv. 813—

> 'No falsehood can endure
> Touch of celestial temper, but returns
> Of force to its own likeness';

and i. 144—

> 'Our conqueror (whom I now
> Of force believe almighty)'—

though Craik thinks 'of force' in the last passage may mean 'in power.'

For Force, Forces = military strength, see ARMY.

J. HASTINGS.

FORD (מַעְבָּרָה, מַעֲבָר. In Jg 12$^{5.6}$ AV needlessly substitutes 'passages' for 'fords'; in 2 S 15^{28} 17^{16} RV has 'fords' (עברות) where AV has 'plains' (ערבות). See Driver's note, *ad loc.*).—Fords were important landmarks in early OT times, when there were no bridges across rivers. There seem to have been two principal fords across the Jordan—(1) that opposite Jericho (Jos 2^{7}, Jg 3^{28}, 2 S 19^{15}), used to this day for crossing from Pal. into Moab, except in early summer when the river is in flood (Jos 3^{15}); (2) Bethabara (the reading of TR and AV, but WH and RV have Bethany) where John baptized (Jn 1^{28}). The site has been identified by the officers of the Ordnance Survey, and described by Conder as the spot called *'Abârah*, where the Jalûd river, flowing down the Valley of Jezreel, debouches into the Jordan (*Tent Work in Pal.* p. 229). Some of the fords of the Jordan, of which about forty were identified by the *Pal. Survey*, are impassable in spring or early summer, as the waters, swollen by the melting of the snows of the Lebanon and adjoining regions, rise and overflow their banks, covering the alluvial plains on either side. Such was the case when the Isr. under Joshua crossed on dry ground by command of J″ to besiege Jericho (Jos 3^{15}). Amongst the other fords mentioned in Scripture are those of the Jabbok (Gn 32^{22}) and the Arnon, a river descending from the tableland on the east of the Jordan Valley, and at the time of the Isr. invasion forming the boundary between the Moabites and the Amorites (Nu 21^{13}), also referred to in Is 16^{2}. The Romans were probably the first great bridge-builders over the streams of Palestine. (See, further, G. A. Smith, *Hist. Geog.* 266, 337 n.; Moore, *Judges*, 102 f. 214; Driver, *Text of Sam.* 245, 257.) E. HULL.

FORECAST.—In the phrase 'forecast devices,' Dn 11$^{24.25}$ (חָשַׁב מַחֲשָׁבֹת, RV 'devise devices'), the meaning is 'contrive beforehand,' as Golding (1587), *De Mornay*, xiii. 203, 'At the first sight the thing which was forecast by good order, seemeth to happen by adventure.' In Wis 17^{11} the word occurs in the sense of 'think beforehand,' 'forbode': 'Wickedness . . . always forecasteth grievous things' (ℵ$^{c.a}$ *προειληφεν*, but B *προσειληφεν*, whence RVm 'hath added').

FOREFRONT.—In earlier use the 'forefront' was opposed to the 'backfront,' as Evelyn (1659), *To R. Boyle*, 3 Sept. 'To the entry fore front of this a court, and at the other back front a plot walled in of a competent square,' and Leoni (1726), *Alberti's Archit.* I. xxxix. 2, 'From the . . . Forefront of the Work I draw a Line quite thro' to the Back-front.' But the 'back' being no longer called a 'front,' 'forefront' is mostly replaced by 'front.' It is used in AV as tr^{n} of (1) פָּנִים *face*, 2 K 16^{14}, Ezk 40^{19} *bis* 47^{1}; (2) מוּל פָּנִים *overagainst the face*, Ex 26^{9} 28^{37}, Lv 8^{9}, 2 S 11^{15}; (3) שֵׁן *tooth*, 1 S 14^{5}; (4) ראשׁ *head*, 2 Ch 20^{27}; and πρόσωπον *face*, 1 Mac 4^{57}. RV changes Lv 8^{9} 'upon the mitre, even upon his forefront,' into 'upon the mitre, in front'; and 1 S 14^{5} 'The forefront of the one was situate northward' into 'The one crag rose up on the north.' RV also adds Jos 22^{11} 'in the forefront of the land of Canaan' (אֶל־מוּל, AV 'over against'); and Ezk $40^{15\,bis}$ 'And from the forefront of the gate at the entrance unto the forefront of the inner porch' (עַל־פְּנֵי הַשַּׁעַר הָיְאתוֹן עַל־לִפְנֵי אֻלָם, AV 'from the face . . . unto the face').

FOREGO.—Sir 7^{19} 'Forego not a wise and good woman: for her grace is above gold' (*μὴ ἀστόχει γυναικὸς σοφῆς καὶ ἀγαθῆς*, RV 'Forgo not a wise and good wife'). The Gr. verb occurs elsewhere in LXX only in 8^{9} 'Miss not the discourse of the elders' (RV 'aged'). In NT it is found only in the Pastoral Epistles, 1 Ti 1^{6} (EV 'swerve'), 6^{21} (EV 'err'), 2 Ti 2^{18} (EV 'err'), and at each occurrence RVm gives 'miss the mark,' which is its lit. meaning (ἀ and στόχος, *a mark*). The meaning here is almost certainly that suggested by Wahl *noli separari ab uxore sapiente*, 'do not separate yourself from, *i.e.* do not divorce a wise wife.' And that is probably the meaning of AV, which seems to be a new trⁿ, the earlier Versions having uniformly 'Depart not from a discreet and good woman,'[*] with the addition, 'that is fallen unto thee for thy portion in the fear of the LORD,' after Vulg. *quam sortitus es in timore Domini*. For in earlier Eng. 'forgo' had the meaning of *forsake*, as *Cursor Mundi* (1340), 13,280, 'Petur and andrew . . . with o word haue thei ship forgone'; and Shaks. *Henry VIII.* III. ii. 422—

> '*Crom.* O my lord,
> Must I then leave you? Must I needs forgo
> So good, so noble, and so true a master?'

And this sense is still in use poetically, as in Mrs. Browning, *Catarina to Camoens*, iv.—

> 'And if they looked up to you,
> All the light which has forgone them
> Would be gathered back anew.'

The spelling of modern editions of AV is *forego*, but *forgo*, which is the spelling of 1611 ('forgoe'), is the correct form. Forego is a different word, and means 'to go before,' as Fotherby (1619), *Atheom.* II. iii. 2. 214, 'The cause doth alwayes his effect fore-goe.' The prep. in 'forgo' is *for* (Ger. *ver*), not *fore*, and reverses the meaning of the verb, as in forbid, fordo, forget, forswear, forspent, forspoke. In forbear and forgive it adds force to the simple verb.

J. HASTINGS.

FOREHEAD (מֵצַח, *μέτωπον*).—This word occurs repeatedly in the Bible, both in a literal and in a metaphorical sense. It was upon his forehead that the high priest wore the plate of gold inscribed 'Holy to the LORD' (Ex 28^{38}); the stone slung by David entered the forehead of Goliath (1 S 17^{49}); leprosy broke out in the forehead of Uzziah when he sought to burn incense (2 Ch $26^{19\text{ff.}}$). In Jer 3^{3} 'a harlot's forehead' is the type of shamelessness; in Ezk $3^{7.\,8.\,9}$ the people in their obstinacy are described as 'of an hard forehead,' but the prophet's forehead is to be made hard against them, his determination is to be equal to their own. In Ezk $9^{4\text{ff.}}$ a mark is directed to be put on the forehead of the faithful in Jerusalem. The name for this mark is תָּו *tav*, a letter (ת) which may have been used in much the same way as a × amongst ourselves (cf. Job 31^{35}, where, however, the sense appears to be somewhat different; see Davidson's and Dillmann's notes, *ad loc.*). It is even possible that the reference in Ezk is to practices such as that described in Is 44^{5} 'Another shall mark on his hand, Unto the LORD.' See CUTTINGS IN THE FLESH, vol. i. p. 538^{b}. These OT passages suggested the NT usage (Rev 7^{3} 9^{4} 13^{16} $14^{1.\,9}$ 17^{5} 20^{4} 22^{4}).

In Ezk 16^{12}, where AV has 'I put a jewel on thy forehead,' RV gives more correctly 'I put a ring upon thy nose' (וָאֶתֵּן נֶזֶם עַל־אַפֵּךְ).

For Lv $13^{41\text{ff.}}$ ('forehead bald') see BALDNESS.

J. A. SELBIE.

FOREIGNER occurs four times in AV. It is the trⁿ in Ex 12^{45} of תּוֹשָׁב (RV more accurately 'sojourner'), in Dt 15^{3} and Ob ^{11} of נָכְרִי, and in Eph 2^{19} of πάροικος (RV 'sojourner'). RV substitutes 'foreigner' for AV 'stranger' as trⁿ of בֶּן־נֵכָר in Lv 23^{25}, and of נָכְרִי in Dt 17^{15} 23^{20} 29^{22}. Amer. RV makes the same change in Ru 2^{10}, 2 S 15^{19}, where the Heb. word is the same.

A cognate term is alien(s), which occurs in AV of Ex 18^{3} as trⁿ of גֵּר (RV correctly 'sojourner'), of בְּנֵי נֵכָר in Is 61^{5}, and of נָכְרִי in Dt 14^{21} (RV 'foreigner'), Job 19^{15}, Ps 69^{8}, La 5^{2}. RV adds Ex 12^{43}, Ezk $44^{7.\,9}$, Pr 5^{10}, where AV has 'stranger,' and Ps $144^{7.\,11}$, where AV has 'strange children' (Heb. in all these בְּנֵי נֵכָר).

Strangers is the favourite rendering in AV, not only of נָכְרִי or בֶּן־נֵכָר and זָר (see below), but also of גֵּר and תּוֹשָׁב. The latter circumstance is specially unfortunate, because it obscures to the Eng. reader the distinction between the *foreigner* and the *gêr*, which in Heb. is marked clearly enough, and on which not a little depends for the understanding of many passages. The *gêr* is indeed a foreigner by birth, but he resides in Israel and is protected by the community; whereas the foreigner proper (נָכְרִי) is not only an alien by birth, but has neither home nor rights in Israel. It would have been well if RV had uniformly, instead of occasionally, substituted 'sojourner' for 'stranger' as the trⁿ of גֵּר, and left 'stranger,' 'foreigner,' 'alien' to represent such words as נָכְרִי and זָר.

We shall now examine the linguistic usage of the last two Heb. words and their equivalents in LXX and NT.

(*a*) זָר (*zâr*) in its root meaning appears scarcely to differ from *gêr*, although ultimately the two words have very different connotations. The orig. sense of both is *one who turns aside from the way* (*sc.* to lodge somewhere). It is easy to connect this with the idea of a *stranger* or *alien*. Amongst other applications זָר is used to designate one who is not of a priestly family, Ex 29^{33} 30^{33}, Nu $3^{10.\,38}$ 18^{7} (all P), Lv $22^{10.\,12.\,13}$ (H), or who does not belong to the tribe of Levi, Nu 1^{51} 18^{4} (P). The plur. זָרִים is a frequent designation of foreign (generally hostile) peoples in contrast to Israel, Hos 7^{9} 8^{7}, Is 1^{7}, Ezk 7^{21}, Jl 3^{17}, Ob ^{11} etc. The LXX equivalents are ἀλλότριος and ἀλλογενής, the former of which occurs not infrequently in NT, the latter only once (Lk 17^{18} of the Samaritan leper).

(*b*) נָכְרִי (*nokhri*) or בֶּן־נֵכָר (*ben-nēkhâr*). If the root idea here is *strangeness*, perhaps 'stranger' might with advantage be reserved as the special trⁿ of these two equivalent terms. נָכְרִי is ∥ גֹּלֶה 'exile' in 2 S 15^{19} (of Ittai the Gittite); it is opposed to a 'brother' (אָח), *i.e.* a fellow-Israelite, in Dt 15^{3} 17^{15}; it is used of the stranger who directs his prayer towards the temple of Israel's God, 1 K 8^{41}=2 Ch 6^{32}; of the foreign wives (נָכְרִיּוֹת), Ezr 10^{2}; of foreign garb (מַלְבּוּשׁ נָכְרִי perhaps referring to the uniform of the foreign body-guard), Zeph 1^{8} (cf. כָּל־נֵכָר 'everything foreign,' Neh 13^{30}). The commonest LXX equivalent is ἀλλότριος (cf. Ac 7^{6}, He $11^{9.\,34}$). ἀλλογενής also occurs (*e.g.* Gn 17^{27}, Ex 12^{43}, Lv 22^{25}, Is $56^{3.\,6}$) and ἀλλόφυλος (Is 2^{6} 61^{5}). This last, which is the favourite LXX trⁿ of פְּלִשְׁתִּים (Philistines), occurs only once in NT (Ac 10^{28} of Cornelius). Another favourite LXX rendering of נָכְרִי is ξένος (*e.g.* 2 S 15^{19} of Ittai). It is the exact opposite of ἐπιχώριος. The only instances of its occurrence in NT are Mt $25^{35.\,38.\,43}$ 27^{7}, Ac 17^{21}, Eph $2^{12.\,19}$, He 11^{13}, 3 Jn ^{5}.

As in olden times *foreigner* and *enemy* were almost convertible terms, we find both זָר and נָכְרִי used so as to include the idea of hostility or barbarism (cf. Is 1^{7}, Ps 54^{3}, Ezk 11^{9}, Hos 7^{9} [all זָרִים], Ps $18^{44.\,45}$ [בְּנֵי נֵכָר]. The same meaning of *hostile* is contained in the ἀλλότριοι of He 11^{34}, 1 Mac 1^{38} 2^{7}, Sir 45^{18} etc.).

PRESENCE AND POSITION OF FOREIGNERS IN ISRAEL.—In the early stages of their history, the relations of Israel to foreigners did not differ essentially from those of other nations. As the law, however, was gradually introduced, the attitude of Israelites to non-Israelites underwent a material change, until ultimately the 'nations' outside

---

[*] Except Wyclif (1382), 'Wile thou not gon awei fro a wel felende womman, and a good.'

Israel became the 'heathen,' while the stranger domiciled in Israel, the '*gêr*,' became the 'proselyte' (Bertholet).

(*a*) *The pre-Deuteronomic Period.*—Our earliest sources contain abundant references to foreigners, whether passing strangers or residents in Israel. Trade was frequently the motive of their visits. The two words for 'merchant,' סֹחֵר and רֹכֵל, both mean originally 'traveller'; in Pr 31^{24} and Job 41^{6} 'Canaanite' is synonymous with 'trader,' showing that in early times the travelling merchantmen in Palestine had been, not Israelites, but Canaanites. The danger of travelling alone (Jg 5^{6}) was avoided by caravans, some of the most important of whose trade-routes traversed Palestine (Gn 37^{25}, 1 K 10^{2}, Is 8^{23} [Eng. 9^{1}] $60^{6.7}$, Ezk 26^{2}). It must never be forgotten that from the occupation of Canaan downwards Israel was in constant contact with foreigners in the shape of the large remnants of the original inhabitants of the land. Our different sources offer different explanations of the survival of the Canaanites, but they all agree as to the fact (Ex 23^{29}, Dt 7^{22}, Jg 2^{23} $3^{1ff.}$). We have the well-known story of the Gibeonites (Jos 9), as well as a whole list of Can. towns enumerated amongst the various Isr. tribes (Jg $1^{27ff.}$); in $1^{32f.}$ it is the Isr. that dwell among the Can., while Issachar is actually tributary to the latter (Gn $49^{14f.}$). In Jg 5^{14} (cf. 12^{15}) we hear of Amalekite remnants, in Jg 5^{24} (cf. Ex $18^{13ff.}$), Nu 10^{31}, 1 S 15^{6} of Kenites, Midianites, etc. The Jerahmeelites, the clans of Caleb, Othniel, Kenaz, etc. (1 S $30^{14.29}$), appear to have been of Arabian or Edomite origin. Even at the era of the Exodus the early narrative JE speaks of a 'mixed multitude' which attached itself to Israel (Ex 12^{38}, Nu 11^{4}). Shechem was still a Can. city in the time of Abimelech (Jg 9); Jerus. continued in the possession of the Jebusites down to the time of David (2 S $5^{6ff.}$), and even after its conquest by the latter we find Araunah the Jebusite still in possession of property there (2 S 24; cf. Jos 15^{63}, Jg 1^{21}); Rahab's descendants dwell in Israel 'to this day' (Jos 6^{25}, JE); Gezer is first taken from the Can. by the Pharaoh who was Solomon's father-in-law (1 K 9^{16}).

The general attitude to foreigners was one of hostility, where some special agreement or safeguard was not present. Driven out from his old settlement, Cain protests, 'Whosoever findeth me shall slay me' (Gn 4^{14}). The Song of Deborah (Jg 5), the story of Samuel and Agag (1 S $15^{32f.}$), the cruelties of David to his prisoners (2 S 8^{2} 12^{31}), illustrate the prevailing temper towards a foreign foe. Conduct passes uncensured when non-Israelites are concerned, which would have been considered improper towards a fellow-countryman (Gn 12 Abraham and Pharaoh, Gn 26 Isaac and Abimelech, Gn $30^{37ff.}$ Jacob and Laban, Ex 3^{22} the 'spoiling' of the Egyptians).

The position of the foreigner being so precarious, people were slow to leave their own country, esp. as this implied also abandoning the service and losing the protection of their ancestral gods (1 S 26^{19}). Amongst the most frequent causes that led to such self-expatriation were famine (Gn 12^{10} Abraham, 26^{1} Isaac, 47^{4} Jacob and his sons, Ru $1^{1ff.}$ Elimelech and his family, 2 K $8^{1ff.}$ the Shunammite), blood-feud (Gn 4^{16} Cain, Ex 2^{15} Moses, 2 S 13^{34} Absalom) or political reasons (1 S 27^{2} David, 1 K 11^{40} Jeroboam, 11^{17} Hadad).

There were, however, three circumstances that helped to mitigate the lot of the stranger in a strange land—(1) The hospitality to strangers, which is one of the noblest virtues of ancient peoples: 'the stranger did not lodge in the street, but I opened my doors to the traveller' (Job 31^{32}; cf. Gn 18. 19. 24. 43, Jg 13. 19, 2 S 12^{4}, 1 K 17). Public inns in the modern sense (the Eastern *khan* is something quite different) were unknown and unneeded. In Lk 10^{34} we first hear of an inn (πανδοχεῖον) where the host (πανδοχεύς) takes payment for accommodating travellers. While spies naturally received no consideration (Gn 42^{9}, Jos $2^{3ff.}$), the narratives of Gn 19 and Jg 19 show how scrupulously the old Israelites guarded their guests. In an age when the altar was universally an asylum (see ALTAR, p. 76^{b}), the helpless stranger was frequently considered to be under the special protection of the god of the land, hence the 'fear of God' (Gn 20^{11} 42^{18}) was an extra safeguard to him. (2) The alliances with other nations of which we read must have exercised a considerable influence upon Israel's attitude towards foreigners (1 K $15^{18ff.}$ Asa with Benhadad, 2 K 16^{5} Is 7^{1} Pekah with Rezin, 2 K 16^{8} Ahaz with Tiglath-pileser, 2 K 17^{4} Hosea with So, 2 K $20^{12ff.}$ Is 39 Hezekiah with Merodach-baladan, Ezk 17^{15} Zedekiah with Egypt). Those who had fought shoulder to shoulder against a common foe would not be strangers in each other's country. One of the most familiar results of this intercourse is seen in the syncretism in religious matters, against which the prophets protest (Is 17^{10}, Ezk $8^{7ff.}$ etc.). (3) Israel's own trading enterprises, which carried her citizens beyond the confines of Palestine (Ezk 27^{11} to Tyre, 1 K 9^{28} 10^{11} 22^{48} to Ophir, 20^{34} to Damascus), taught the Israelites to sympathize with the feelings of a stranger who came to sojourn in their land (Ex 23^{9}).

In Israel, as in most Oriental nations, the king encouraged the presence of foreigners at his court, and depended upon their fidelity more than upon that of his own subjects (1 S 21^{7} 22^{9} Doeg the Edomite, 2 S 15^{18} 20^{7} 1 K $1^{38.44}$ Cherethites and Pelethites, 2 S 15^{19} Ittai the Gittite, 2 K $11^{4.19}$ Carites). By foreign marriages the Isr. king also sought to strengthen his position. Amongst David's wives were Abigail a Kalibbite, Maacah a Geshurite (1 S 25^{42}, 2 S 3^{3}), while his sister was married to Ithra an Ishmaelite (1 Ch 2^{17}, not *Israelite* 2 S 17^{25}). Solomon's harem included, besides Pharaoh's daughter, Moabites, Ammonites, Edomites, Zidonians, and Hittites (1 K 11^{1}). The wife of Ahab was Jezebel, daughter of Ethbaal king of the Zidonians (1 K 16^{31}). Intermarriages with the Can. are forbidden in Ex $34^{15f.}$ (JE), and there were doubtless many in Israel who disliked mixed marriages (Gn 29^{19} $24^{3.37}$, Nu 12^{1}, Jg 14^{3}); yet these must have been quite common. Unfortunately, the story of Dinah and Shechem (Gn 34), which is of composite origin (Wellh. *Comp.* 47 f., 312 f.; Kuenen, *Abhandl.* 255 ff.; see also artt. SHECHEM, SIMEON), has been so often worked over that it is impossible to draw inferences from it with certainty, but Jg $3^{5ff.}$ doubtless gives a true picture of the condition of things (cf. Gn 38^{2}, Jg 8^{31}, 1 K 7^{14}). It was really more through amalgamation than by war that the Can. were subdued. The tribe of Judah confessedly contained a large admixture of Can. elements (see CALEB), and Ed. Meyer goes the length of maintaining (*ZAW*, 1886, pp. 1 ff.) that Joseph was originally a Can. tribe. It is this process of amalgamation that helps to account for the rapid increase in the number of Israel's warriors between the time of the judges and the early days of the monarchy (cf. Jg 5^{8} with 2 S 24^{9}).

Besides foreign traders and resident *gêrim*, there must always have been in Israel a number of foreign *slaves*, either taken captive in war, or bought from Phœn. or other traders (Gn 17^{12}, Lv $25^{44f.}$, Nu $31^{26ff.}$). See SLAVES.

(*b*) *The Period of the Deuteronomic Legislation.*—To protest against religious syncretism had always been a chief part of the prophet's work. The worship of the Tyrian Baal, and the corrupting influences of foreign civilization, were specially distasteful to Elijah, whose feelings were shared by Elisha and the usurper Jehu (2 K 9. 10). It is significant that Jehonadab the son of Rechab is associated with Jehu (2 K $10^{15\text{ff.}}$), for the whole *raison d'être* of the Rechabite movement lay in opposition to Can. civilization and in attachment to the primitive simplicity, alike in religious and secular matters (Jer 35, cf. W. R. Smith, *Proph. of Isr.* 84 f.). The attitude of the prophets who have left us their *writings* is equally clear (Am 2^{11} 3^{15} $5^{11.\,25}$ 6^{8} 8^{5}, Hos 2^{19} 8^{14} 9^{10} 10^{13} $12^{7\text{ff.}}$ 14^{4}). Specially noteworthy is Hos 9^{1} 'Rejoice not, O Israel, like the peoples,' where already 'peoples' is almost ='heathen.' The same disinclination to foreigners appears in Is 2^{6} 10^{4} 17^{10} 28^{15} $30^{1\text{-}5}$ (protest against foreign alliances), Zeph $1^{8.\,11}$, Jer $2^{36\text{f.}}$ 10^{25} (although this last may be a late interpolation) $35^{1\text{ff.}}$ $37^{6\text{f.}}$. These feelings find expression in the highest degree in the Deuteronomic 'law-book' of Josiah's reign (2 K 22). Israel is a 'holy people' (Dt 7^{6}), and the land must not be 'defiled' (21^{23}) or 'caused to sin' (24^{4}). The relation of Israelites to non-Israelites is henceforth *determined by law.* The watchword is *separation.* The old injunction of Ex $23^{31\text{f.}}$ (JE) is repeated in much stronger terms in Dt $7^{1\text{-}5}$ $20^{16\text{-}18}$ (where the *present* aversion takes the form of a *past* command to exterminate the Can.), and special stress is laid upon the prohibition of intermarriages with Can. (Dt 7^{3}, Jos 23^{12}). Further, in Dt 15^{3} and 23^{20}, the foreigner (*nokhri*) is expressly excluded from participation in two of the Israelite's privileges—that of having a creditor's claims waived every seventh year, and that of borrowing without having to pay interest. In Dt 14^{21} he is allowed to use for food the flesh of an animal that has died of itself, a concession which, although made in the same passage to the *gêr*, is ultimately withdrawn from the latter, and pronounced to be improper for any *dweller* in the land of Israel (Lv 17^{15}). See GER.

It is well to remember that universalism as well as particularism may be traced in the conduct and the teaching of the early prophets (cf. 1 K $17^{8\text{ff.}}$ Elijah and the widow of Zarephath, 2 K 5 Elisha and Naaman, Is $2^{2\text{-}4}$=Mic $4^{1\text{-}3}$ the oracle of the mountain of the Lord's house). This element found expression, however, in the direction of proselytizing the *gêr*, not in that of cultivating friendly relations with foreigners proper. For the development of this subject see GER.

(*c*) *The Exilic and Post-Exilic Periods.*—If an approximation of *gêr* to Israelite was fostered by the Deut. legislation, and grew as time went on, upon the other hand the gulf between Israelite and *foreigner* became always wider. Even in the 'unclean' land of their exile (Ezk $4^{13\text{f.}}$), where sacrifice could not be offered, Israel could cling to her Sabbaths and to circumcision, and probably meetings akin to those of the later synagogue contributed to the maintaining of her separate existence and manner of life. The legislative programme of Ezekiel is specially instructive for our subject. The uncircumcised foreigners who kept guard in the temple (2 K $11^{4\text{ff.}}$), and probably performed other services (see CHERETHITES), are henceforward to be strictly excluded (Ezk $44^{6\text{-}10}$), and such functions are to be discharged by the Levites (cf. 44^{22} priests to marry only virgins of the seed of the house of Israel or the widow of a priest).

The exiles who returned from Babylon had to solve the problem of their relations with the other inhabitants of Judæa and with their neighbours. A large number of the original inhabitants had never been carried captive at all, Edomites and others had taken possession of unoccupied settlements, and the colonists planted by the Assyr. king in Samaria (2 K $17^{24\text{ff.}}$) had probably also encroached on Judæa. The majority of the old inhabitants, and a section of the returned exiles, were quite willing to coalesce with their neighbours (Neh 13^{24}, Mal 2^{11}), but, thanks to the fiery zeal of Ezra and Nehemiah, such an incorporating union was prevented. The unsparing rigour with which the two reformers carried out their work is matter of history. See EZRA, NEHEMIAH. It was a veritable crisis. Weapons of various kinds were used on both sides. It may be that literature was pressed into the service. If Dt $23^{4\text{-}6}$ be, as Wellhausen and Cornill think, a later interpolation, it may date from this period, while the Book of Ruth may have been a manifesto issued by the party of toleration. The triumph of the puritan party was completed when the covenant was sealed (Neh 10^{30}), 'that we would not give our daughters unto the peoples of the land, nor take their daughters for our sons,' and when the Torah (P) was accepted as the norm of Israel's conduct (Neh 8). The ideal of P, even more than of D, is a holy people dwelling in a holy land, and serving God according to the prescriptions of His law (Nu 35^{34}, cf. Lv $19^{26\text{-}31}$). The narrative portions of P carefully omit or modify what does not tally with this conception (*e.g.* no mention of Moses' sojourn in Midian, or his relations with the priest of that people; Balaam, again, could not be a prophet of J″, but becomes a Midianite counsellor, by whose instrumentality Israel was led into immorality). In accordance with the above conceptions, Ezra deliberately sought to erect a hedge, not only around the law, but around Israel, and thus to prevent all contact, except what was absolutely unavoidable, with those outside the pale of Judaism. If the *gêr* had become the *proselyte* to be welcomed, the *nokhri* had become the *heathen* to be shunned. For the further development of the subject see GENTILES, HEATHEN.

J. A. SELBIE.

FOREKNOW, FOREORDAIN.—Both these words translate the same Greek verb προγινώσκειν, the former in Ro 8^{29}, the latter in 1 P 1^{20}. 'Foreordain' does not appear before 1611, but Tindale introduced 'ordain before' in 1 P 1^{20}, which was the more surprising that in Ro 8^{29} he translated both verbs correctly, οὓς προέγνω καὶ προώρισεν, 'those which he knewe before, he also ordeyned before.' Both verbs are rare in English, the earliest certain example of 'foreordain' found by *Oxf. Eng. Dict.* being Norton's tr$^{\text{n}}$ of Calvin's *Institutes* (1561), iii. 202, 'Some to be foreordeined to saluation, other some to destruction,' though the ptcp. is found in the Prol. to Wyclif's Mark (1420), 'The for-ordencde John.' RV tr. 1 P 1^{20} correctly 'was foreknown,' and retains 'foreordain' for προορίζειν wherever it occurs, Ac 4^{28} (AV 'determine before'), Ro $8^{29.\,30}$ (AV 'predestinate'), 1 Co 2^{7} (AV 'ordain'), Eph $1^{5.\,11}$ (AV 'predestinate').

FOREKNOWLEDGE.—As an attribute of God, foreknowledge is simply a special case or aspect of omniscience. God knows all things, therefore not only the present and the past, but the future also, must lie open to His sight. This is implied in all His *promises*, whether they refer to the individual only, as where offspring is promised to Abraham (Gn 18^{14}), or are on a national scale, as when the glory of Abraham's descendants is foretold (Gn 18^{18}). It is implied also in the *warnings* which God gives, or causes to be given, as in the story of Lot and Sodom (Gn 19), or in that of Moses before Pharaoh (Ex 8–11). To an earlier Pharaoh God shows in a dream 'what he is about to do' (Gn 41^{25}), and similarly, at a later period, to Nebuchadnezzar 'what shall be in the latter days' (Dn $2^{28.29}$). In all such cases, however, it may be objected that they are less examples of foreknowledge than declarations regarding His own future action on the part of One who has full power of doing what He wills; that they illustrate therefore omnipotence rather than omniscience. This close association of the two attributes must always be allowed for in the usage of Scripture. Where all events are referred to the direct action of the Deity, it is not strange that He should know and foretell what He is about to do. It may be the sense that thus to foreknow and bring about events demonstrates the existence and activity of the divine, or it may be that the course of the world was already regarded as possessing a relative independence, which forms the ground of the appeal to the foreknowledge of God as proving His superiority to the idols of the nations. Such an appeal occurs more than once in Deutero-Isaiah, *e.g.* Is 42^{9} 'Behold, the former things are come to pass, and new things do I declare; before they spring forth I tell you of them'; 46^{10} 'Declaring the end from the beginning, and from ancient times things that are not yet done; saying, My counsel shall stand'; cf. also 44^{6-8} $48^{3.5.6}$. In the NT Jesus asserts foreknowledge on the part of God of what is yet hidden even from the Son (Mk 13^{32}); and St. James (Ac 15^{18}), quoting the words of Amos ($9^{11.12}$), substitutes for 'the LORD that doeth this,' 'the LORD who maketh these things known from the beginning of the world.' All the references, indeed, to the fulfilment of prophecy, which are so frequently found in the NT, are intelligible only on the assumption that they are taken as evidencing the foreknowledge of God.

It is, however, in its application, not to events generally, but to *salvation*, and that both of the individual and of the community, that the question of the divine foreknowledge has arrested the attention, engaged the thoughts, and sometimes tried the hearts of men. True piety refers all things to God, and rejoices to see in the individual life of faith and love the manifestation of divine activity. It seems to it that, were the case otherwise, there could be no assurance of salvation, and the peace which is the most priceless possession of God's children would be impossible to them. It is argued that, as God is both able and willing to bring about the salvation of the individual, He must know beforehand, not only His purpose to do so, but its fulfilment. We refer salvation, along with all other events, to the Divine Will; but, as God is not only Supreme Will but Supreme Intelligence, before, or accompanying the forthputting of that will there must be an act of knowledge. Thus foreknowledge comes to be associated with ELECTION and PREDESTINATION (which see) as a constitutive element in the ultimate ground of the salvation made known in Christ. But in proportion as this conclusion removes difficulties on the one side, it raises them on the other. While theoretically admitting the determinative influence of the divine action upon the course of events in general, we recognize that to us they are contingent, and we are not perplexed by a difficulty which we scarcely feel. But with the question of personal salvation it is different. Foreknowledge here implies a determinative action which seems to leave no room for choice, or moral freedom. Further, experience shows that there are gradations in the extent of spiritual privileges accorded, and infinite variations in the degree to which men avail themselves of these. Are we then to argue a limitation of the divine power, or of the divine will, to save? The interests of piety and morality, the facts of religion and experience, seem incompatible here, the one demanding an absoluteness of determination which the other cannot admit. It is the difficulty which has divided schools of earnest men and powerful thinkers, like the Augustinian and the Pelagian, the Calvinist and the Arminian, which in various forms and degrees enters into and moulds men's whole conception of the religious life. Into its later phases we cannot here enter; we must confine ourselves to stating the data of the problem as they are presented in Scripture.

In the OT the question in this special form scarcely occurs. The prophets regard Israel as having been chosen from among the peoples of the earth to be God's special heritage (Dt 7^{6-8}, Neh $9^{7.8}$, Is $41^{8.9}$ $44^{1.2}$); but the thought of a decree affecting the eternal destiny of individuals could not present itself to those who had only a dim conception of the future life, and who regarded religious blessings as coming to the individual only through his membership of the elect nation. In the NT the difficulty is for the most part not acutely felt, the two sides of the problem being in turn referred to without any apparent sense of antagonism or incompatibility. Thus Jesus recognizes the Father's action in revealing to babes what is hidden from the wise and prudent (Mt $11^{25.26}$), declares that to some it is given to know the mysteries of the kingdom of heaven, while from others it is withheld (Mt 13^{11-16}), says that many are called, but few chosen (Mt 22^{14}; cf. Jn 6^{44} 12^{40}). On the other hand, He preaches the gospel of repentance (Mt 4^{17}), and laments over Jerusalem for neglecting or abusing her opportunities (Mt 23^{37}). Nowhere is it made an excuse for the rejection of salvation that any one has not been included in the saving purpose of God.

It is in connexion with certain passages in the writings of St. Paul that the questions in regard to foreknowledge definitely arise. These are two. How far does foreknowledge imply predestination, decision of the fate of an individual anterior to his personal existence and therefore to his own moral choice? and, What is the relation of foreknowledge to the ground of salvation; is there anything foreknown which accounts for the saving choice falling upon one and passing by another? In Ro $8^{29.30}$ we read: 'For whom he foreknew (οὓς προέγνω), he also foreordained (AV did predestinate) to be conformed to the image of his Son, . . . and whom he foreordained, them he also called; and whom he called, them he also justified; and whom he justified, them he also glorified.' Here the process of salvation is represented as a chain, as a succession of stages, of which the origin was a divine purpose based upon a divine foreknowledge. The word προγινώσκω in its ordinary classical use means simply 'to know previously,' 'to have knowledge of beforehand,' and hence, since 'all demonstration depends on previously existing knowledge' (ἐκ προγινωσκομένων πᾶσα διδασκαλία, Arist. *Eth. Nic.* vi. 3), present knowledge leads to forecasting the future by tracing out the probable course of events; cf. 2 P 3^{17} 'Ye therefore, beloved, knowing these things beforehand, beware.' But, with men, the course of events can at best be foreknown only with a high degree of probability, it is never more than an inference founded on experience; but God's foreknowledge must, we argue, be absolute, and involves the actual occurrence of that which is the object of it,—if it refers to time πρόγνωσις seems inevitably to involve πρόθεσις. There is, however, a certain vagueness in the way in which προέγνω is used in Ro 8^{29}, which is still more apparent in Ro 11^{2} 'God did not cast off his people which he foreknew.' There is something wanting to fill up the conception. Cremer (*Bibl.-Theol. Lex.*) therefore suggests taking these passages in connexion with another class of passages, where the simple verb is used, of which 1 Co 8^{3} may be taken as an example:

'If any man loveth God, the same is known of him' (*ἔγνωσται ὑπ' αὐτοῦ*). The union between God and man thus expressed is represented in *προέγνω* as anticipated and determined upon 'in the divine counsels before their manifestation in history.' Another shade of meaning which *προγινώσκειν* in these texts appears to bear is that in the chain of events leading to salvation it denotes the *self-determination* of God to that work. With the *προορίζειν* the first active step to its fulfilment has been taken, but the foreknowledge of God implies His own adoption of the plan. It thus, as Cremer remarks, ideally precedes even the *ἐκλέγεσθαι* of Eph $1^{4.5}$ 'Even as he chose (*ἐξελέξατο*) us in him before the foundation of the world . . . having foreordained (*προορίσας*) us unto adoption as sons,' *ἐκλέγεσθαι* expressing 'a determination directed to the objects of the fellowship' into which God has resolved to enter with His people. *Πρόγνωσις* thus 'denotes the foreordained fellowship between God and the objects of His saving counsels, God's self-determination to enter into such fellowship preceding the realization thereof.' This definition establishes the place of foreknowledge in the order of the saving acts, but does not free it of the difficulty which its connexion with that order involves. In the self-determination of God to save, if this has an individual application, the whole problem is raised. It is evident that the apostle, anxious to establish the Christian's faith upon a sure foundation, overlooks for the moment the bearing of his explanation upon the question of moral choice. There is no reason to think that he would ignore the latter. His Epistles are full of appeals which recognize the moral nature and responsibilities of man. But the key to his attitude is probably to be found in that personal experience which he describes in Gal 1^{15}, where, as Lightfoot remarks, he heaps up words to emphasize the point he is maintaining ('the sole agency of God as distinct from his own efforts'), 'the *good pleasure* of God, who *separated me* (set me apart, devoted me to a special purpose), even from my mother's womb, and *called* me through his *grace*.' As he felt that he had been destined and was being prepared for his high office, even when he had been unconscious of it, and had been making in the opposite direction, so it was with humanity in general; man was moving towards the goal prepared for him, and God's purpose in spite of human recalcitrancy was being realized. But neither in the one case nor in the other did the leadings of Providence mean that the human will was being set aside.

But now, turning to the other question, has the *προέγνω* of Ro 8^{29} 11^{2} any special qualitative import? God knows, foreknows, His people—what constitutes them His people, is there anything in them or about them which accounts for foreknowledge becoming foreordination, which explains the ground of election? Here opinions differ, and it is probable that each exegete will read into the word what agrees with his general doctrinal standpoint. Thus, to take one or two examples, Cremer appears to think there is no such import, the conception being complete in itself, and the word not indicating 'a decision come to concerning any one'; Grimm (*NT Lex.*, Thayer's ed.) holds the meaning to be that 'God foreknew that they would love him, or (with reference to what follows) he foreknew them to be fit to be conformed to the likeness of his Son.' This explanation (that of foreseen love) is adopted also by Weiss (*NT Theology*, § 88), while Godet (*Romans*, Eng. tr. ii. 109) takes 'faith' to be the other object of foreknowledge, the condition of salvation which God foreknew that His people would fulfil. It is doubtful, however, whether St. Paul had followed out his thought on this side into a definite form. He was concerned with the purpose of God, not with the ground of that purpose. Both in Gal 1^{15}, as we have seen, in reference to himself, and in Eph $1^{5.11}$ in reference to the Church, he lays stress upon the fact that God's action is 'according to the good pleasure of his will, to the praise of the glory of his grace'—'according to the purpose of him who worketh all things after the counsel of his own will.'

To these indications from the Pauline writings, the occurrences of *προγινώσκειν* and *πρόγνωσις* in other parts of NT (Ac 2^{23} 26^{5}, 1 P $1^{2.20}$, 2 P 3^{17}) add nothing in regard to the questions we have been considering. St. Paul founds upon election, as the method appointed by Providence for the education of humanity, his religious philosophy of history. Some are set apart for special privilege, but have also laid upon them special duty. The Jews are set aside until the Gentiles be come in; salvation is extended to the Gentiles in order that the Jews might come to share its blessings; but 'God does not cast off his people which he foreknew'; His purpose is not abandoned, but worked out according to the dictates of infinite wisdom and perfect love. It has been suggested (Plumptre, *Epp. of St. Peter*, in 'Cambridge Bible for Schools') that in the words 'the foreknowledge of God *the Father*' (1 P 1^{2}) 'we find, perhaps, the secret of their (the apostles') acceptance of this aspect of the divine government. The choice and the knowledge were not those of an arbitrary sovereign will, capricious as are the sovereigns of earth, in its favours and antipathies, seeking only to manifest its power, but of a Father whose tender mercies were over all His works, and who sought to manifest His love to all His children.' 'In what way,' says the same writer, 'the thought of man's freedom to will was reconcilable with that of God's electing purpose, the writers of NT did not care to discuss. They felt, we may believe, instinctively, half-unconsciously, that the problem was insoluble, and were content to accept the two beliefs, which cannot logically be reconciled.' In this condition of unsolved antinomy the Bible leaves all such doctrines as those of grace and election, a heritage of discussion and speculation to age after age of the Church; yet, however difficult to the intellect, constantly receiving its practical solution and reconciliation in the Christian experience of the soul, which is at once conscious of its own moral responsibility and of its dependence upon God.

Literature.—In addition to the authorities cited above, see Sanday-Headlam, *Romans*, *ll.cc.*; the *Biblical Theologies* of Beyschlag, Bovon, and Schmid; Cunningham, *Historical Theology*, ii. 441 ff.; K. Müller, *Die göttliche Zuvorersehung und Erwählung*; Bruce, *Providential Order of the World* (1897), Lect. x.; and the Literature at end of articles Election, Predestination.

A. Stewart.

FOREPART.—The forepart (always one word in 1611) is either the front portion of a thing (Heb. פָּנִים *face*), Ex 28^{27} 39^{20} (of the 'ephod'), 1 K 6^{20} (of the 'oracle'), Ezk 42^{7} (of the 'chambers' of Ezekiel's temple, RV 'before'); or specifically the prow or bow of a vessel (*πρώρα*), Ac 27^{41}, where it is opposed to the 'hinder part' (so 1611) or stern (*πρύμνα*). RV gives 'foreship' in the last passage, so as to correspond with v.^{30} (the only other occurrence of the Gr. word), where AV and RV have 'foreship.' The *Oxf. Eng. Dict.* queries if 'forepart' is obsolete in this sense; it has found no later instance than Dampier (1699), *Voyages*, II. i. 74, 'The head or fore-part is not altogether so high as the Stern.' For illustration of 'forepart,' meaning generally the front, take T. Adams, *II Peter*, on 1^{2} 'There is a helmet for the head, a corselet for the breast, a shield for the foreparts; but no guard, no regard for the back'; and Bunyan, *Holy War* (Clar. Pr. ed. p. 224, l. 35), 'Every door also was filled with persons who had adorned every one their fore-part against their house with something of variety and singular excellency, to entertain him withal as he passed in the streets,' where the 'fore-part' is explained by the editor as 'the space lying between a house and the public street or highway, the plot of ground forming a garden or fore-court.'

J. HASTINGS.

FORERUNNER (πρόδρομος) occurs once in Apocr. and once in NT. Wis 12^{8} 'Thou sentest hornets as forerunners of thy host'; He 6^{20} 'whither as a forerunner Jesus entered for us.' The meaning of both these passages is illustrated by the classical usage of πρόδρομος as a military term (Herod. i. 60, iv. 121, 122; Æsch. *Theb.* 80; Thuc. ii. 22, etc.). It was applied especially to the light-armed soldiers who were sent in advance of an army as scouts. A special corps of πρόδρομοι was attached to the Macedonian army (Arrian, *Anab.* i. 12; Diod. xvii. 17). When a king was to travel, a forerunner was sent to see that the way was in good order (Is $40^{3ff.}$; cf. Mal 3^{1}). Both these OT passages are applied in NT to John the Baptist as the forerunner of Jesus (Mt 11^{10}, Mk 1^{2}, Lk 7^{27}). In Lk 9^{52} Jesus sends 'messengers before his face to make ready for him.' Cf. Jn 14^{2} 'I go to prepare a place for you.' The kings of Israel had runners before their chariots (1 S 8^{11}); Doeg the Edomite was the mightiest of Saul's runners (1 S 21^{7}, reading רָצִים for רֹעִים); Absalom and Adonijah prepared fifty men to run before them (2 S 15^{1}, 1 K 1^{5}); Elijah ran before the chariot of Ahab (1 K 18^{46}). See further under GUARD, RUNNERS.

J. A. SELBIE.

FORESHIP.—In AV, Ac 27^{30} only, 'under colour as though they would have cast anchors out of the foreship' (1611 'fore-ship,' Gr. πρώρα, the bow of a ship). RV adds v.^{41}. See FOREPART. It was Tindale that gave 'forshippe' as the tr^{n} of πρώρα in v.^{30} and 'foore parte' in v.^{41}. The translators of AV retained the variety according to their precept, 'that nicenesse in wordes was alwayes counted the next step to trifling' (*The Translators to the Reader*). 'Foreship' is still in use. For the anchorage of ships see Smith, *Voyage and Shipwreck of St. Paul*, 132, and art. SHIP.

FORESKIN.—See CIRCUMCISION.

FOREST.—There are five Heb. words for collections of trees and shrubs:—1. יַעַר *ya'ar*, δρυμός. This word, which is by far the most common, is tr. sometimes *forest* (Jer 46^{23}, Mic 3^{12}), more frequently *wood* (Dt 19^{5} RV 'forest,' 2 K 2^{24}, Ps 96^{12} etc.). Its Arab. equivalent, *wa'r*, signifies *difficult*, and is used for rugged and stony regions, whether wooded or not. The expression 'thickets of the forest' (Is 9^{18}) refers to a forest with tangled undergrowth.

2. חֹרֶשׁ *ḥoresh* is used twice for collections of trees:—(*a*) *Wood* (1 S 23^{15} etc.), where (reading חרשׁ) LXX has the proper name Καινη. RV text has *wood*, marg. the proper name *Ḥoresh* (wh. see, and cf. Driver, *Text of Samuel, ad loc.*). Many believe that the reference here is to a town and not to a forest. (*b*) *Forest* (2 Ch 27^{4}), where it is tr^{d} in LXX by δρυμός. The same word is used for *dense foliage* (Ezk 31^{3} 'shadowing shroud'). It is also used for a 'bough' (RV 'wood') Is 17^{9}. The LXX here tr. 'of the Amorites and the Hivites,' and this is probably correct. In every instance of the genuine occurrence of this word, the proper meaning appears to be 'wooded height.'

3. סְבָךְ *sĕbhak, thicket* (Is 9^{18} 10^{34}, Jer 4^{7}). This word is given as a proper name in LXX (Gn 22^{13} Σαβέκ). It is also tr^{d} by δρυμός, Ps 74^{5} (AV 'thick trees,' RV 'a thicket of trees').

4. עָבִים *'âbhîm*, ἄλση, 'thickets' (Jer 4^{29}), called so on account of the *darkness* of such places.

5. פַּרְדֵּס *pardêṣ*, παράδεισος. This is a word of Persian origin, found in Sanskrit, *paradeṣa*; Armenian, *pardes*; Syriac, *pardaysâ*; Arab. *firdaus*. It is used once (Neh 2^{8}) of a royal (AV) 'forest' or (RVm) 'park,' under the care of an officer, whose permission had to be obtained in order to fell wood within its limits. It is twice used for *orchards* (Ca 4^{13}, Ec 2^{5} pl. RV 'parks').

Pal. and Syria were doubtless much more heavily wooded in ancient times than now. Numerous forests are mentioned in Scripture. (1) The wood lands of the Canaanites and Rephaim clothed the mountains of Samaria and Galilee, and extended apparently to Beth-shean (Jos 17^{15-18}). Tabor is a representative of this *wood of Ephraim*. For another 'wood of Ephraim' see (9) below. (2) There was a forest near Bethel, clothing the sides of the ravines coming up from the Jordan Valley (2 K $2^{23.24}$). (3) The 'forest of Hareth' was on the W. slopes of the Judæan hills (1 S 22^{5}). (4) A forest in the hill-country, probably near Aijalon (1 S $14^{25.26}$, cf. v.^{31}), where Jonathan ate the honey. (5) The 'fields of the wood' (Ps 132^{6}) refer to the region of Kiriath-jearim, the 'village of the woods' (1 S 7^{2}). (6) The forests where Jotham 'built castles and towers' (2 Ch 27^{4}) were in the mountains of Judah. (7) If *ḥoresh* (1 S 23^{15} etc.) refers to a *wood*, then there was a forest at the edge of the Judæan desert, near Ziph. The LXX seems to regard it as a place, Καινη. Conder located it at *Khurbet-Khureisa*. Tristram, however, thinks that a forest was intended. (8) The latter opinion is strengthened by the allusion (Ezk $20^{46.47}$) to the 'forest of the south field' and 'forest of the south' (AV), and 'forest of the field in the south' (Negeb), 'forest of the south' (RV). These must have been forests of S. Judæa, overlooking the Judæan wilderness and et-Tîh. (9) There were extensive forests in Bashan (Is 2^{13}) and Gilead (2 S 18^{6} 'the wood [RV 'forest'] of Ephraim'). (10) Lebanon was noted for its forests (1 K 7^{2}), as also Carmel (2 K 19^{23}). RV tr^{s} כַּרְמִלּוֹ in this passage 'fruitful field' (*sc.* of Lebanon, which seems demanded by the context). Forests are mentioned in Apocr. (1 Mac 4^{38}).

Forests were an emblem of *pride* (Zec 11^{2}). They were contrasted with cultivated ground, as an emblem of *neglect* (Is 29^{17}).

Notwithstanding the ravages of conquerors, and the improvidence of the people, there are still considerable wooded regions, even in W. Palestine. The slopes of the hills, and not a few of the sides of the ravines, are clothed with thickets, and in a few places there are groves of trees, as on the flanks of Carmel and Tabor. Gilead and Bashan have quite extensive open woods of oak, terebinth, arbutus, and pine. There are still traces of the old cedar groves of Lebanon, and large open groves of pine, oak, cypress, juniper, and spruce. There are also many scrubs of dwarf oaks and carobs. Willows and poplars and plane trees are abundant along the watercourses, and tamarisks along the seashore and in the deserts. Acacias are fairly numerous in the valleys around the Dead Sea, and southward to Sinai. Terebinths, carobs, evergreen oaks, ash, hackberry, and Pride of India are scattered freely over the whole country. Large forests of full-grown trees are found in N. Lebanon, and in the heart of Amanus in N. Syria. In the latter chain are large districts, wholly occupied by forests of cedar of Lebanon, beech, pine, oak, hornbeam, cypress, spruce, and yew.

G. E. POST.

FORETELL.—Thrice 'foretell' occurs in AV, each time for a different Gr. verb, and twice in the sense of 'tell beforehand,' not specially prophesy or prognosticate: Mk 13^{23} 'Behold, I have foretold you all things' (προείρηκα, RV 'I have told you all things beforehand'); 2 Co 13^{2} 'I told you before, and foretell you, as if I were present, the second time' (*προείρηκα καὶ προλέγω*, RV 'I have said beforehand, and I do say beforehand,' RVm 'plainly' for *beforehand*). For this meaning see Shaks. *Tempest*, IV. i. 149—

> 'These our actors,
> As I foretold you, were all spirits';

and *III Henry VI.* IV. vii. 12—

> 'For many men that stumble at the threshold
> Are well foretold that danger lurks within.'

In the third instance the meaning is prophesy, predict, Ac 3^{24} 'all the prophets . . . have likewise foretold of these days' (TR *προκατήγγειλαν*, but edd. *κατήγγειλαν*, whence RV 'they also told of these days'). [*προκαταγγέλλω* is accepted by edd. in Ac 3^{18} (AV 'God before had shewed,' RV 'God foreshewed'), and 7^{52} (EV 'shewed before')]. J. HASTINGS.

FOREWARD.—In 1 Mac 9^{11} it is said of the army of Bacchides, 'they that marched in the foreward were all mighty men.' The Gr. for 'they that marched in the foreward' is *οἱ πρωταγωνισταί*, whence comes our 'protagonist.' The same word occurs in 2 Mac 15^{30}, where Judas is called *ὁ πρωταγωνιστὴς ὑπὲρ τῶν πολιτῶν*, AV 'the chief defender of the citizens,' RV 'the foremost champion of his fellow-citizens.' It signified first the principal actor in a play, and then the person taking a leading part in any enterprise, the one who 'plays first fiddle,' in fact, as Liddell and Scott suggest. The Eng. phrase 'in the foreward' comes from Geneva, 'they that foght in the forewarde were all valiant men.' The *foreward* (='front-guard') was the foremost line of an army, its vanguard; thus Caxton (1489), *Sonnes of Aymon*, i. 41, 'Fyrste of alle came the forewarde wyth the Oryflame'; and Shaks. *Rich. III.* V. iii. 293—

> 'My foreward shall be drawn out all in length,
> Consisting equally of horse and foot.'

RV translates, 'the mighty men that fought in the front of the battle'; which is almost a return to Wyclif (1382), 'the first of the bateil al the mighty.' J. HASTINGS.

FORFEIT.—From Old French *forfait* or *forfet* after late Latin *forisfactum*, a trespass, or fine (Lat. *foris* without, and *facere* to do), a 'forfeit' was originally an act outside of righteousness, and 'to forfeit' was to act unrighteously, to sin. Thus Berners, *Froissart*, I. ccccxxxi. 'Sir, ye know well the Flemings that be yonder have done us no forfeit'; and Chaucer, *Parsones Tale*, 275 (Student's ed. p. 682^a), 'And al this suffred Jesu Crist, that neuere forfeited.' From this the meaning passed early into the expression of a penalty due for transgression, a fine; and the verb came to signify to lose, or lose the right to, something, a meaning in which both subst. and vb. are still used. But in its only occurrence in AV the vb. 'forfeit' (the subst. is not found) is used with direct reference to the authority or executive power to confiscate; and in that sense it is marked by *Oxf. Eng. Dict.* as obsolete: Ezr 10^8 'And that whosoever would not come within three days, according to the counsel of the princes and the elders, all his substance should be forfeited' (יָחֳרַם, AVm and RVm 'devoted'). Cf. Dn 2^5 Wyc. (1382), 'your housis shuln be maad commoun *or forfetid*.'

RV introduces 'forfeit' into Dt 22^9 'Thou shalt not sow thy vineyard with two kinds of seed; lest the whole fruit be forfeited' (תִּקְדַּשׁ, AV 'defiled,' RVm 'consecrated'; Driver, 'lit. *become holy* or *sacred*, *i.e.* be forfeited to the sanctuary'); Mt 16^{26}, Mk 8^{36} 'forfeit his life' (*ζημιωθῇ τὴν ψυχὴν αὐτοῦ*, AV 'lose his own soul'); and Lk 9^{25} 'and lose or forfeit his own self' (*ἑαυτὸν δὲ ἀπολέσας ἢ ζημιωθείς*, AV 'be cast away'). In the remaining occurrences of *ζημιοῦν* (1 Co 3^{15}, 2 Co 7^9, Ph 3^8), RV renders 'suffer loss.'

J. HASTINGS.

FORGE, FORGER.—Forge and fabricate come both from Lat. *fabricare*, the former through the Old French *forgier*, the latter directly. To 'forge' is therefore to make or shape, as Ex 4^{11}, Wyc. (1382), 'Who made the mouth of man, or who forgide (1388 'made') the dowmbe and the deef, the seer and the blynde?'; Tindale, *Works* (ed. Russell, 1831), i. 93, 'The power of God . . . altereth him, changeth him clean, fashioneth and forgeth him anew.' It is especially used of shaping metals by fire and hammer; and in this sense RV uses the subst. *forger*, Gn 4^{22} 'Tubal-cain, the forger of every cutting instrument of brass and iron' (לֹטֵשׁ כָּל־חֹרֵשׁ, AV 'an instructer [m. 'whetter'] of every artificer in brass and iron'; so RVm). The passage is difficult, perhaps corrupt; it is fully discussed in Dillmann and in Spurrell. But in AV 'forge' and 'forger' are used only in the metaphorical sense of framing or inventing lies: Job 13^4 'ye are forgers of lies' (טֹפְלֵי־שֶׁקֶר); Ps 119^{69} 'The proud have forged a lie against me' (טָפְלוּ עָלַי שֶׁקֶר); and Sir 51^2 'lips that forge lies' (*ἐργαζομένων ψεῦδος*). The Geneva tr. of Lk 19^8 is, 'If I have taken from any men by forged cauillation, I restore hym foure folde.' And Shaks. *Rich. II.* IV. i. 40, gives—

> 'If thou deny'st it twenty times, thou liest;
> And I will turn thy falsehood to thy heart,
> Where it was forged, with my rapier's point.'

J. HASTINGS.

FORGETFULNESS.—Forgetful in the sense of *heedless*, *neglectful*, is perhaps still in use colloquially, but in literary English we should not now say as AV after Tindale in He 13^2 'Be not forgetful to entertain strangers' (*τῆς φιλοξενίας μὴ ἐπιλανθάνεσθε*, RV 'Forget not to show love unto strangers'). 'A forgetful hearer' (Ja 1^{25}) is more modern, but RV prefers 'a hearer that forgetteth' (*ἀκροατὴς ἐπιλησμονῆς*, lit. 'a hearer of forgetfulness,' as in 2^4 'judges of evil thoughts' = evil-thoughted judges').

In Sir 23^{14} the meaning is again, probably, *heedless* and so unmannerly, 'Remember thy father and thy mother, when thou sittest among great men. Be not forgetful before them, and so thou by thy custom become a fool' (*μή ποτε ἐπιλάθῃ*). But the passage is obscure. Wyclif has it, 'Lest perauenture God forgete thee in the sighte of hem,' after Vulg. *Ne forte obliviscatur te Deus in conspectu illorum*; and he (or the Vulg.) is followed by Rogers', Coverdale's, the Bishops', and the Douay versions; the Geneva has 'lest thou be forgotten in their sight.' RV slightly alters the construction of the sentence, and so gets a new meaning—

> 'Remember thy father and thy mother,
> For thou sittest in the midst of great men;
> That thou be not forgetful before them,
> And become a fool by thy custom.'

The great men are presumably the father and mother; if so, 'great ones' would have been better; the Gr. is simply *ἀνὰ μέσον μεγιστάνων*. Ball, in *QPB*, follows Fritzsche and AV, and explains, 'Low language reflects upon one's upbringing.'

Forgetfulness occurs in Ps 88^{12} 'Shall thy wonders be known in the dark? and thy righteousness in the land of forgetfulness?' (אֶרֶץ נְשִׁיָּה), where 'forgetfulness' is not the condition of losing all recollection, but of being forgotten, *oblivion*,—a meaning which Bradley (*Oxf. Eng. Dict.*) marks as probably obsolete. The condition of losing recollection might be represented as a blessed one, as in Shaks. *II Henry IV.* III. i. 8—

> 'O sleep! O gentle sleep!
> Nature's soft nurse, how have I frighted thee,
> That thou no more wilt weigh my eyelids down,
> And steep my senses in forgetfulness?'

But the Psalmist's thought is rather as in Norton (1561), *Calvin's Inst.* IV. xviii. 704, 'This Masse

. . . shamefully . . . putteth his death in forgetfulnesse'; and Gray, *Elegy*, l. 85—

> 'For who, to dumb Forgetfulness a prey,
>   This pleasing anxious being e'er resigned,
> Left the warm precincts of the cheerful day,
>   Nor cast one longing ling'ring look behind?'

This is the meaning also of Wis 17^{3} 'they were scattered under a dark vail of forgetfulness' (ἀφεγγεῖ λήθης παρακαλύμματι, Vulg. *tenebroso oblivionis velamento*'); but in 14^{26} 16^{11}, Sir 11^{25}, the word is used in its usual sense of a tendency to forget.

J. HASTINGS.

FORGIVENESS.—In OT three words especially are used to express the idea of forgiveness—כִּפֶּר* 'cover' or 'pacify'; סָלַח (root meaning unknown); נָשָׂא 'lift up' or 'away.' AV and RV render all three usually 'forgive,' sometimes 'pardon.' The first and second are always used of divine forgiveness—the first, rarely (Ps 78^{38}, Jer 18^{23}, Dt 21^{8}, 2 Ch 30^{18}), the second, frequently (*e.g.* 1 K $8^{30f.}$, Lv $4^{20f.}$); the third is in common use of ordinary human forgiveness as well (*e.g.* Gn 50^{17}, Ex 10^{17}, 1 S 15^{25} 25^{28}). In nearly all instances the context implies repentance for the offence, and an intention to avoid a repetition of it, as a condition of the forgiveness; and as a result of it, that the offender is placed again in the position which he occupied before the offence, in the old covenant relation to God, or in the same friendly relation as before to the person affected. Under the sacrificial system the repentance and the amends are represented by the sacrifice which is offered by the offender through the priest (see Oehler, *Theology of the OT*, § 139); but in other cases in the Psalms and the Prophets there is no suggestion of more than acknowledgment of sin, repentance, and that intention of amendment which is expressed by the phrase 'turning to the Lord.' Forgiveness is a free act on the part of God or of man; it restores the offender to the state in which there is no obstacle to his communion with him from whom he has been alienated; it gives peace of mind (Ps 32), a consciousness of the divine mercy (Ps 103); it removes the fear of punishment and quickens love (2 S 12^{13}, Job 33^{28}, Ps 103^{2}). Nor is it only an individual matter; the whole nation may be alienated from God through neglect of his will, and may by forgiveness be restored,—such is the burden of many a prophetic exhortation.

It has been said that 'no permanent state of reconciliation' was established under the old covenant; that there was only such forgiveness for the past as might enable men to begin again to seek justification through the works of the law. It has also been maintained that the old covenant furnished only a 'passing over' of sin, a 'closing the eyes' to it on the part of God—by which, though satisfaction was not made, though there was no real remission of sin, punishment was forgone. The consideration of these questions involves the whole subject of ATONEMENT (wh. see); but it may be stated here that neither the national and individual experiences recorded in the OT, nor the words and general language used, seem to suggest any fundamental difference in the idea of forgiveness from that which we find in the NT. When St. Paul in a particular passage (Ro 3^{25}) uses, with reference to sins committed by men living under the old covenant, a word (πάρεσις) different from that (ἄφεσις) which is in common use in the NT to express 'forgiveness,' he has in mind a different thought. He is arguing that because in former ages God had not exacted from men the punishment which was due for their sins (cf. Ac 14^{16}, 17^{30}), his forbearance had been misunderstood; he had 'passed by' sins till the world was in danger of forgetting that he was a God of righteousness; and the time had come for a signal exhibition of his hatred of sin in the propitiation made in Christ Jesus (see Ro $3^{25.\ 26}$ RV, the sense of the argument is lost in AV). With men such 'passing by' might involve forgetting, it could not be the same as 'forgiving'; with God it would be neither (see Trench, *Synonyms*, § xxxiii.). No argument with regard to the nature of forgiveness under the old covenant can be drawn from the passage. Indeed, so far as the relation between the individual and God is concerned, there is nothing to indicate that the forgiveness granted by God in the experience of his people before the coming of Christ was different in kind from that which Christ proclaimed. A difference in the requirement of it from men in their relations with one another, no doubt, may readily be detected between the teaching of the OT and the NT. It is here that the real development in the ethical teaching of the NT on the subject is to be found. The duty of forgiving injuries and wrongs committed against oneself or others cannot be said to occupy the prominent place in the OT that it has in the teaching of Jesus. It must be recognized that in this respect there is a real distinction to be drawn. But true as it is that the revelation of the divine will and of the ideal of human life and character, the power of the whole revelation made in Christ, has immeasurably facilitated the individual's opportunity of conscious enjoyment of the divine forgiveness, and stimulated his readiness to bestow forgiveness in his measure upon others; yet it is none the less true that the same forgiveness of sin was offered to previous generations of men—'they are not to be heard, which feign that the old fathers did look only for transitory promises.' The materials for determining the idea of forgiveness are, however, so much richer in the NT than in the OT, that we turn to it rather than to the OT for the elaboration of the idea.

So closely, indeed, is the principle associated with the teaching and work of Christ, that forgiveness has been called 'Christ's most striking innovation in morality,' and the phrase a 'Christian' spirit is commonly regarded as synonymous with a disposition of readiness to forgive an injury. The pagan ideal of manly life was to succeed in doing as much good to your friends and as much injury to your enemies as possible; and if it be not true that forgiveness was a virtue unknown in the ancient world, it was at all events not one that was demanded or proclaimed as a duty by any ethical system. Indeed it is clear that without a sense of the need of personal holiness and the consciousness of guilt, without—in the widest meaning of the phrase—a conviction of sin, there could be no true repentance, no sense of the need of forgiveness. And such a conviction of sin neither Greek nor Roman religion produced.

The words which are used in the NT are the Gr. representatives of the Heb. words in the OT. We have, though rarely, the word (καλύπτω) meaning 'cover' or 'hide' (Ro 4^{7}, 1 P 4^{8}, Ja 5^{20}, all quoted from LXX); and once, with reference to former times, the word for 'passing by' (Ro 3^{25}); but by far the commonest word is that which expresses the idea of 'sending away,' or 'letting go' or 'releasing' (ἄφεσις), which is rendered in this connexion either 'forgive,' 'forgiveness,' or 'remit,' 'remission.' The noun occurs in this sense eleven times in the synoptic Gospels (not at all in Jn) and Ac (Mt 26^{28}, Mk 1^{4} 3^{29}, Lk 1^{77} 3^{3} 24^{47}, Ac 2^{38} 5^{31} 10^{43} 13^{38} 26^{18}; eight times in Lk and Ac, a favourite word of St. Luke), and four times elsewhere (Eph 1^{7}, Col 1^{14}, He 9^{22} 10^{18}). In eleven of these instances there is added 'of sins,' in one 'of trespasses,' in one the same words are in the immediate context, and in the two remaining instances the word stands absolutely. (AV renders nine times 'remission,' six times 'forgiveness.') The verb with the same meaning occurs about forty times in the synoptic Gospels, once in Ac (8^{22}), three times in Jn [Gospel once (20^{23}), 1 Ep. twice (1^{9} 2^{12})], and twice elsewhere (Ro 4^{7}, Ja 5^{15}). It is found predominantly with the usual word for 'sin' (*ἁμαρτία*) or 'sins' expressed or implied in the context, but other words—'debt,' 'trespasses,' 'iniquities'—are also used. The verb implies the complete removal of the cause of offence. The sin is taken out of the way, out of sight. The debt is cancelled: the debtor released from his obligation (cf. Mt 18^{23-35}). As far as the offender is concerned, the trespass is done away. He no longer has the sense of sin, of guilt and liability to punishment; he is restored to the harmonious relations which existed before. (It is noticeable that though this is the favourite word of the Gospels and Acts, it is scarcely found in the NT outside them: the idea of forgiveness is merged in the wider ones of justification and salvation). Instead of this word St. Paul uses one (*χαρίζεσθαι* ten times) which has the special sense 'confer a favour on,' 'be gracious to'—of men towards one another and of Christ in relation to them (2 Co $2^{7.\,10}$ 12^{13}, Eph 4^{32}, Col 2^{13} 3^{13}). St. Luke has this word twice (Lk $7^{42.\,43}$), each time of a debt (AV 'frankly forgave'), and twice he has also a word (*ἀπολύω*, $6^{37\ bis}$), meaning to 'loose from,' 'release,' 'set at liberty.' In the Apocalypse the nearest equivalent is found probably in the idea of the blood 'loosing' from sin and 'cleansing' (*e.g.* Rev 1^{5} 7^{14}; cf. 1 Jn $1^{7.\,9}$)-

---

* On this important term see *Oxf. Heb. Lex. s.v.*, also Driver, *Deut.* 243, 425 f., and art. PROPITIATION.

The teaching of the NT as to forgiveness is sufficiently represented by (1) the sayings of Christ which led up to St. Peter's question and the answer to it (Lk $17^{3.\,4}$, Mt 18^{15-17} and $18^{21.\,22}$), and the Parables of the Prodigal and of the great Debtor (Lk 15^{11-32}, Mt 18^{23-35}); (2) the clause in the Lord's Prayer (with the comment which is added Mt $6^{14.\,15}$, cf. Mk $11^{25.\,26}$); and (3) the allusion to blasphemy against the Holy Spirit (Mt 12^{31} and parallels), and St. John's mention of sin 'unto death' (1 Jn 5^{17}).

(1) The teaching is given much more fully in Mt than in Lk, but the full essence of it is in the words of Lk, 'If thy brother trespass against thee, rebuke him; and if he repent, forgive him. And if he trespass against thee seven times in a day, and seven times in a day turn again to thee, saying, I repent; thou shalt forgive him.' It is clear at once that, if certain conditions are satisfied, the teaching of Christ admits of no limitations to the law of forgiveness. The account in Mt more vividly enforces this point. It represents Christ as at first only enunciating the general principle. St. Peter seeks for further guidance, wishing to reduce the principle to the compass of a definite rule, and asking, 'Lord, *how oft* shall my brother sin against me, and I forgive him? till seven times?' and it is in answer to his question that the words are elicited which raise the duty out of the sphere of mere numerical calculation—'I say not unto thee, Until seven times: but, Until seventy times seven.' There is to be no limit whatever to the readiness of a follower of Christ to forgive. On the other hand, it is equally clear that something is required on the part of the offender before he can be the recipient of forgiveness. 'If thy brother . . . turn again to thee, saying, I repent'—this is the condition: there must be the consciousness of sin, the free avowal of error (cf. Lk 15^{21}), the recognition of wrong-doing and the turning away from it, and, it seems, the willingness to make amends (cf. Lk 19^{8}). That there must be such repentance * (change of mind, acceptance of a new ideal of life) is still more plainly shown in the account of Mt: the Christian is not to remain passive till the offender of his own accord comes to him penitent and begging reconciliation—he is, on the contrary, to adopt all rational means he can to bring home to him the error and evil of his conduct; and should he still remain inpenitent and obdurate, there is no forgiveness for him—he places himself outside the pale of Christian life—'Let him be unto thee as a heathen man and a publican.'

The Parable of the Prodigal Son shows the same relation between forgiveness and repentance. The wish to leave the father—the revolt against his will, his plan of life—was the sin: the return is in itself sufficient proof of repentance, even though it was prompted by the sense of failure and physical hunger; the father recognizes it as such, and hastens to meet and welcome the offender, and forgives him before he has had time to put into words his confession of sin; the son is in that moment restored to the position in his father's household which he had forfeited. (The teaching of the apostles as described in Ac lays similar emphasis on repentance as a first condition of salvation [*e.g.* Ac 2^{38}], baptism being from one point of view the outward mark of repentance). So, too, the publican goes down to his house 'justified' because penitent (Lk 18^{14}).

Nature of
Forgiveness.

Similarly, a readiness to forgive others is laid down as a condition for a man's own forgiveness (cf. Mt 6^{12}, Mk $11^{25.\,26}$, Mt 5^{7}). The Parable of the great Debtor shows that the absence of a forgiving spirit in men prevents their being themselves forgiven.

(2) The instances of Christ's teaching which have been cited might be interpreted as having reference only to relations between men, though it is scarcely conceivable that the parables are not intended to be significant of the relations of mankind as sons to God the Father, the ideal of character. The clause in the Lord's Prayer (Mt 6^{12}, Lk 11^{4}) makes it evident that human forgiveness and divine forgiveness are represented as strictly analogous. There is indeed no indication of any fundamental difference between the forgiveness which the Christian wins from God and that which he in turn bestows upon his 'brother.' It is the same phrase which is used throughout—a phrase denoting actual 'remission' of sin; and it is used by Christ of his own action, and alike of God's and of man's part in the mysterious process. If it were not so, it would be mockery to offer up the petition, 'Forgive us our trespass, as we forgive them that trespass against us.' The comment on the clause, which Mt appends to the Prayer, and the similar saying, which Mk introduces in connexion with the exhortation to faith in praying, forbid any differentiation (cf. Col 3^{13}). The statements are quite general. Forgiveness is to be won by repentance and confession, whatever the nature of the offence, whoever the persons concerned may be. (In view of the indisputably general application of the Parable of the Prodigal Son and the other references to forgiveness, it seems impossible to accept the interpretation of Mt 18^{15-17} which would limit its teaching to relations between Christians).

(3) There are, however, two references which seem to set a limit to the possibility of divine forgiveness. One is the case of the blasphemy against the Holy Spirit; the other is St. John's

---

* Two words are used which imply change of mind (involving regret for the course pursued and change of conduct for the future) Mt 4^{17}, Mk 1^{15}, Lk $15^{7.\,10}$, and change of will Mt 21^{29} (on the question whether the distinction holds or not, see Trench, *Synonyms*, § lxix.); and there are also words which mean 'turning' or 'conversion,' Lk 22^{32}, Mt 18^{3}.

allusion to 'sin unto death.' The first of these references declares that there is a supreme sin for which no man can ever hope to be forgiven—'All their sins shall be forgiven unto the sons of men, and their blasphemies wherewith soever they shall blaspheme' (Mk 3^{28}); but with these sins and blasphemies there is pointedly contrasted one—'Whosoever shall blaspheme against the Holy Spirit hath never forgiveness, but is guilty of an eternal sin,' and it 'shall not be forgiven him, neither in this world, nor in that which is to come' (Mt 12^{32}). All that can be said with certainty as to the nature of this sin is that the opposition of the scribes and Pharisees to Christ was a sign and indication of it, and that the Pharisaic charge that it was by the powers of evil that he was enabled to perform his works of healing, was the immediate occasion of his denunciation of it. Augustine regarded the sin as deliberate persistence in evil (for other interpretations see Westcott, note on 1 Jn 5^{17}). It would appear from the rest of Christ's teaching on forgiveness that it was in any case of such a character as to deaden and destroy the spiritual sense in him who yielded himself up to its influence, so that repentance would become impossible to him. The idea of unpardonable sin is further suggested by St. John's exception of 'sin unto death' from the subjects of intercessory prayer (1 Jn 5^{16}). To one who thus sins the way of forgiveness is closed; at least it is not to be opened through the intercession of his brethren, which in other cases would avail.

There remains to be considered the problem of the significance of Christ's cry from the Cross, 'Father, forgive them; for they know not what they do' (Lk 23^{34}). It is evident that it is a prayer for the forgiveness of those who have not repented, who have not even come to knowledge of their guilt. It cannot, however, be regarded as limited in its scope to the Roman soldiers, and excluding any reference to the share in the final tragedy taken by the party of the scribes and Pharisees. The soldiers could not be thought of as in any real sense needing forgiveness for carrying out their orders in what they could only consider an ordinary execution: even Pilate was treated as comparatively guiltless. The cry must therefore be the supreme expression of the human sympathy and love of Christ, of the great principle which he had always inculcated. The sin embodied in the conduct of the Pharisaic party he had condemned in burning words; towards it there could not be any change of feeling; but they might be brought to repentance late though it was, and the words which are under consideration are a prayer for that result, a loving hope for the enlightenment of those blind leaders of the blind. It may be a hope against hope, but the cry does not constitute an exception to the principles and conditions of forgiveness which are to be drawn from other parts of the NT. It is a crowning example of 'forgivingness,' if so be that the divine mercy may transcend the usual conditions of the bestowal of the boon. Such a spirit of 'forgivingness' may be present (it has been noticed that it is required in all cases from the individual who has been injured), whether 'forgiven-ness' (the remission of the offence as regards the person who has offended) ensues or not. The word 'forgiveness' is capable of the active and of the passive sense. In the active sense it is clear that it is an ordinary Christian duty; in the passive sense, before it can be realized the conditions which have been elicited must be fulfilled.

LITERATURE.—Oehler, *Theol. of OT*; Schmid, *Bib. Theol. of NT*; Martensen, *Christian Ethics*; Seeley, *Ecce Homo*; Dorner, *System of Christian Doctrine*. See also Literature under arts. ATONEMENT, PROPITIATION.

J. F. BETHUNE-BAKER.

FORM.—Numerous as are the Heb. and Gr. words tr^{d} 'form,' the meanings of the word in AV and RV may be reduced to the following: **1.** Shape, as an orderly arrangement of parts, Gn 1^{2} 'The earth was without form' (תֹּהוּ, RV 'waste'; so in Jer 4^{23}); Wis 11^{17} 'thy Almighty hand, that made the world of matter without form' (*ἐξ ἀμόρφου ὕλης*, RV 'out of formless matter'). Cf. Shaks. *K. John*, III. i. 253—

> 'All form is formless, order orderless.'

2. Such orderly arrangement as produces *beauty, comeliness*, Is 52^{14} 53^{2} 'he hath no form nor comeliness' (תֹּאַר); Wis 15^{5} 'they desire the form of a dead image, that hath no breath' (*εἶδος*; Farrar, 'he yearns for the unbreathing beauty of a dead image'). For this meaning see Shaks. *Mids. Night's Dream*, I. ii. 233—

> 'Things base and vile, holding no quantity,
> Love can transpose to form and dignity.'

3. The special or characteristic shape of a person or thing, Ezk 8^{3} 'And he put forth the form of an hand, and took me by a lock of mine head' (תַּבְנִית; so 10^{8}); Dn 3^{19} 'Then was Nebuchadnezzar full of fury, and the form of his visage was changed' (צְלֵם); Mk 16^{12}, Ph $2^{6.7}$ (*μορφή*, the characteristic form of the Son of God and His characteristic form as the Son of Man; see Gifford, *The Incarnation*, p. 22 ff.; and art. FASHION). Cf. Shaks. *Com. of Errors*, II. ii. 200—

> 'Thou hast thine own form.
> No, I am an ape.
> If thou art changed to aught, 'tis to an ass.'

Milton, *Comus*, l. 70—

> 'Their human countenance,
> Th' express resemblance of the gods, is chang'd
> Into some brutish form of wolf or bear.'

And *Par. Reg.* iv. 599—

> 'True image of the Father, whether thron'd
> In the bosom of bliss, and light of light
> Conceiving, or remote from Heav'n, enshrin'd
> In fleshly tabernacle, and human form,
> Wand'ring the wilderness.'

4. The representation or pattern of anything, Ezk 8^{10} 'And behold, every form of creeping things . . . pourtrayed upon the wall round about' (תַּבְנִית); 2 Ch 4^{7} 'he made ten candlesticks of gold according to their form' (מִשְׁפָּט, RV 'according to the ordinance concerning them'); Ezk $43^{11\ quater}$ (צוּרָה); Ro 6^{17} 'that form of doctrine which was delivered you' (*τύπος*, RVm 'pattern'); 2 Ti 1^{13} 'Hold fast the form of sound words which thou hast heard of me' (*ὑποτύπωσις*, RV 'pattern'). So Wyclif's tr. of 1 Th 1^{7} 'so that ye ben maad fourme, *or ensaumple*, to alle men bileuynge'; and Locke, *Human Underst.* III. iii. 230, 'To make abstract general Ideas, and set them up in the Mind, with Names annexed to them, as Patterns, or Forms (for in that sense the word Form has a very proper signification).' **5.** Outward aspect (*a*); often the mere outward appearance as opposed to the inner reality (*b*): Thus (*a*) Job 4^{16} 'It stood still, but I could not discern the form thereof' (מַרְאֶה, RV 'appearance'); 1 S 28^{14} 'And the woman said unto Saul, I saw gods ascending out of the earth. And he said unto her, What form is he of?' (תֹּאַר); Dn 2^{31} 3^{25} (רֵו, RV 'aspect'). So Shaks. *Coriol.* III. iii. 109—

> 'Art thou a man? thy form cries out thou art';

and *Henry V.* III. vi. 72, 'Why, 'tis a gull, a fool, a rogue: that now and then goes to the wars, to grace himself at his return unto London under the form of a soldier.' (*b*) 2 S 14^{20} 'To fetch about this form of speech hath thy servant Joab done this thing' (פְּנֵי הַדָּבָר, RV 'to change the face of the matter'); Ro 2^{20}, 2 Ti 3^{5} 'Having a form of godliness, but denying the power thereof' (both μόρφωσις, which is not so purely as σχῆμα the mere outward form, but seems to be so used in both these passages, esp. 2 Ti 3^{5}, and that is clearly the meaning of AV. See Sanday-Headlam on Ro 2^{20}). In illustration, take again Shaks., *Henry V.* II. ii. 116—

> ‘And other devils that suggest by treasons,
> Do botch and bungle up damnation
> With patches, colours, and with forms, being fetch'd
> From glistering semblances of piety’;

and *Othello*, II. i. 243, ‘a knave very voluble, no further conscionable than in putting on the mere form of civil and humane seeming, for the better compassing of his salt and most hidden-loose affection.’

The word ‘form’ has been occasionally introduced into RV when it is not in AV. It is used to tr. (1) Heb. תְּמוּנָה in all its occurrences except one, either for AV ‘likeness’ (Ex 20^{4}, Dt 4$^{23.\,25}$ 5^{8}), or ‘similitude’ (Nu 12^{8}, Dt 4$^{12.\,15.\,16}$), or ‘image’ (Job 4^{16}). The exception is Ps 17^{15} ‘I shall be satisfied when I awake with thy likeness,’ where RV gives ‘form’ in marg., Amer. RV in text. (2) קֶצֶב in 1 K 6^{25} 7^{37} for AV ‘size’; but not in the only other occurrence of that word Jon 2^{6} (EV ‘bottom’—‘I went down to the bottoms of the mountains,’ AVm ‘Heb. cuttings off’). (3) εἶδος Lk 3^{22}, Jn 5^{37} (AV ‘shape’), 1 Th 5^{22} (AV ‘appearance’). (4) τύπος Ac 23^{25} (AV ‘manner’).

J. HASTINGS.

FORMER.—This comparative adj. was at one time freely used to express the more advanced of two positions. Thus Wyclif (1388), after saying that Jacob ‘departide (1382 ‘dyuydide’) the puple that was with hym . . . in to twei cumpenyes,’ adds (Gn 32^{17}), ‘And he comaundide to the formere (1382 ‘forther’), and seide, If thou schalt mete my brothir Esau,’ etc.; and Knox, *Hist.* 88, ‘Fiftie horse and men of the first rank lay dead at once, without any hurt done to the Scottish Armie, except that the Speares of the former two rankes were broken.’ In this way ‘former’ is used in Zec 14^{8} ‘Living waters shall go out from Jerusalem; half of them toward the former sea, and half of them toward the hinder sea’ (הַיָּם הַקַּדְמוֹנִי, AVm and RV ‘the eastern sea’); the ‘eastern’ sea being the Dead Sea, and the ‘hinder’ or ‘western’ sea (הַיָּם הָאַחֲרוֹן) the Mediterranean.

FORNICATION.—See CRIMES AND PUNISHMENTS.

FORSOMUCH.—Wis 12^{15} ‘Forsomuch then as thou art righteous thyself’ (δίκαιος δὲ ὤν, RV ‘But being righteous’); and Lk 19^{9} ‘forsomuch as he also is a son of Abraham’ (καθότι, RV ‘forasmuch as’). The form is rare. Far more common is ‘forasmuch,’ which occurs forty-three times in AV, and was introduced generally by Tindale (it does not seem to occur in the Wyclifite versions). Tindale always keeps the parts of the word distinct, ‘for as moche’; AV always presents an undivided word. It is Rogers (*Matthew's Bible*) that gives ‘for so much’ in Wis 12^{15}; but in Lk 19^{9} AV is the first to use that form (perhaps by a slip of the pen or the printer), Tindale and others having ‘for as moche.’

FORSWEAR.—To ‘forswear’ is to undo one's swearing, in accordance with the meaning of *for* (see under FOREGO). In AV it is always used reflexively, ‘to forswear oneself,’ with the meaning to swear falsely, to perjure oneself: 1 Es 1^{48} ‘And after that king Nabuchodonosor had made him to swear by the name of the Lord, he forswore himself, and rebelled’ (ἐφιορκήσας ἀπέστη); Wis 14^{28} ‘they . . . lightly forswear themselves’ (ἐπιορκοῦσιν ταχέως); and Mt 5^{33} ‘Thou shalt not forswear thyself, but shalt perform unto the Lord thine oaths’ (οὐκ ἐπιορκήσεις; AV is Tindale's tr^{n}, Wyclif has the intrans. form, ‘Thou shalt not forswere’: with which we may compare T. Adams, *II Peter*, on 1^{4} ‘Peter swore like a ruffian, and forswore like a renegade, till Christ looked on him, and then he wept’). For the AV tr^{n} cf. Shaks. *III Henry VI.* V. v. 75—

> ‘*Clarence.* Did'st thou not hear me swear I would not do it?
> *Q. Margaret.* Ay, but thou usest to forswear thyself:
> 'Twas sin before, but now 'tis charity.’

FORT.—See WAR.

FORTH.—As Germ. *fort* from *vor*, so ‘forth’ is an adverb formed from ‘fore’; and its general meaning is ‘to the front.’ When used with such verbs as ‘bring’ or ‘come’ it means *forward into view*, as Pr 25^{6} ‘Put not forth thyself in the presence of the king’ (RV ‘put not thyself forward,’ RVm ‘*Heb.* glorify not thyself’); Jn 8^{42} ‘I proceeded forth, and came from God’ (ἐξῆλθον, RV ‘I came forth’). In this, its most characteristic meaning, it is used both literally and figuratively, and accompanies a great many different verbs, as *bring*, Gn 1^{11} ‘Let the earth bring forth grass,’ Is 41^{21} ‘bring forth your strong reasons’; *come*, Job 14^{2} ‘He cometh forth like a flower, and is cut down’; *put*, Mt 13^{24} ‘Another parable put he forth unto them’ (παρέθηκεν αὐτοῖς, RV ‘set he before them’); *stretch*, Ex 25^{20} ‘the cherubims shall stretch forth their wings on nigh’ (RV ‘spread out’); *shoot*, Gn 40^{10} ‘her blossoms shot forth’; *send*, Ex 15^{7} ‘Thou sentest forth thy wrath’; *show*, Mt 14^{2} ‘mighty works do show forth themselves in him’ (αἱ δυνάμεις ἐνεργοῦσιν, RV ‘these powers work’); and in like manner: *set*, Lk 1^{1}; *stand*, Jer 46^{4}, Mk 3^{3}; *call*, Is 31^{4}; *bud*, Ca 7^{12}; *spring*, Job 38^{27}; *creep*, Ps 104^{20}; *reach*, Pr 31^{20}; *shed*, Ac 2^{33}.

Sometimes the idea expressed is motion from a confined place to a more open, as 2 S 22^{20}=Ps 18^{19} ‘He brought me forth also into a large place’; Nu 24^{6} ‘As the valleys are they spread forth’; 2 S 11^{1} ‘at the time when kings go forth to war.’ This meaning is also expressed by ‘abroad.’ When ‘forth’ is used, it is always with a verb of motion; never as in Shaks. *Comedy of Errors*, II. ii. 212—

> ‘Sirrah, if any ask for your master,
> Say, he dines forth, and let no creature enter.’

Then ‘forth’ expresses generally *movement away from a place*, as Gn 3^{23} ‘God sent him forth from the garden’; and more particularly movement *onwards from a given point*, as Jos 18^{11} ‘the coast of their lot came forth between the children of Judah and the children of Joseph’ (RV ‘the border of their lot went out’); Mt 9^{9} ‘Jesus passed forth from thence’ (RV ‘by’); Ph 3^{13} ‘forgetting those things which are behind, and reaching forth unto those things which are before’ (RV ‘stretching forward’). Cf. Ezk 6^{14} Cov. ‘from the wildernesse off Deblat forth’; and Ps 72^{8} (Stern. and Hopk.) ‘His large and great dominion shall from sea to sea extend: it from the river shall reach forth unto earth's utmost end.’

It is in this last sense only—‘forward from a given point’—that ‘forth’ is used with expressions of time. These are: (1) ‘from this time forth’ (מֵעַתָּה Ps 113^{2} 115^{18} 121^{8}); (2) ‘from that time forth’ (מִן־הַיּוֹם הַהוּא Neh 4^{16}; מִן־הָעֵת הַהִיא 13^{21}; ἀπὸ τότε, Mt 16^{21} [RV omits ‘forth’]); and (3) ‘from that day forth’ (ἀπ’ ἐκείνης τῆς ἡμέρας, Mt 22^{46}, Jn 11^{53}).

In many of the foregoing expressions modern usage would prefer ‘forward’ or ‘out.’ In the following examples ‘out’ is distinctly the modern word: with *put*, Ac 9^{40} ‘Peter put them all forth’ (so Gn 8^{9}, Jg 6^{21}, Mt 9^{25}); with *break*, 2 S 5^{20} ‘The LORD hath broken forth upon mine enemies’; with *give*, Ezk 18$^{8.\,13}$ ‘He that hath not given forth upon usury’;* with *set*, Ezk 27^{10} ‘they set forth thy comeliness'; with *spread*, Ezk 47^{10} 'a place to spread forth nets' (RV 'for the spreading of nets'); with *cast*, Jon $1^{5.\,12.\,15}$; *let*, Lk 20^{9} 'A certain man planted a vineyard, and let it forth to husbandmen' (RV 'out'); *look*, Ca 2^{9} 'he looketh forth at the windows' (RV 'in,' Heb. מִן); or omitted altogether, as in Jn 2^{11} 'Jesus . . . manifested forth his glory.'

---

* Cf. Pref. to AV 1611, ‘He gaue foorth, that hee had not seene any profit.’

The phrase 'forth of,' which occurs in AV Gn 8^{16} 9^{18}, Jg 11^{31}, 2 Ch 23^{14}, Job 5^{6}, Am 7^{17}, Jth 2^{21}, has sometimes been taken to be a prep., as by Abbott (*Shaks. Grammar*, § 156). It seems, however, to be a contracted form of 'forth out of,' which is found Gn 8^{19} 'Every beast . . . went forth out of the ark.' Thus Gn 8^{16} 'Go forth of the ark'; Jg 11^{31} 'whatsoever cometh forth of the doors of my house to meet me'; Am 7^{17} 'Israel shall surely go into captivity forth of his land' (RV 'out of'); and even 2 Ch 23^{14} 'Have her forth of the ranges' (RV 'forth between the ranks'). In illustration of the phrase, cf. Knox, *Hist.* 365, 'Herewith was the Queen more offended; and commanded the said *John* to passe forth of the Cabinet, and to abide further of her pleasure in the Chamber'; and his tr^{n} of Ps 18^{16} (*Works*, iii. 320), 'he hath drawen me forth of many waters'; and so Bacon, *Essays* ('Of Prophecies,' Gold. Treas. ed. p. 150, l. 13), 'In *Vespasians* Time, there went a *Prophecie* in the East: That those that should come forth of Iudea, should reigne over the World.' A further ellipsis sometimes takes place, the 'of' being omitted (not in AV), as Shaks. *Mids. Night's Dream*, I. i. 164—

> 'If thou lov'st me then,
> Steal forth thy father's house to-morrow night.'

J. HASTINGS.

FORTIFICATION, FORTRESS.—See WAR.

FORTUNATUS (Φορτούνατος), a member of the Church at Corinth, is mentioned in the first Epistle to that Church (16^{17}) as having visited St. Paul at Ephesus, along with Stephanas and Achaicus. They had gone as deputies to seek the apostle's help and advice regarding certain ethical questions, and especially regarding marriage, meats offered to idols, and spiritual gifts, and to strengthen the tie between him and the Corinthians. The state of affairs which their statements disclosed is dealt with at length in the Epistle in which they are mentioned, and which most likely they carried back with them, perhaps in company with Titus. Weiss suggests that the way in which the names are mentioned, seems to show that F. and Achaicus in some way belonged to the house of Stephanas. The name F., which is Roman, was a very common one, and hence it is precarious to identify St. Paul's visitor, as some have proposed to do, with the F. mentioned by Clement of Rome (*Ep.* 59). W. MUIR.

FORTY.—See NUMBER.

FORUM.—Only in *Appii forum* (so 1611, not *Forum* as in mod. ed.) Ac 28^{15}, one of the stages in St. Paul's journey to Rome. The Gr. Ἀππίου φόρου is a transliteration of the Lat., which has been taken directly into English. Wyclif translated the word: 'the cheping of Appius'; so did the Geneva translators, 'the Market of Appius,' whom RV follows. But the other versions present various forms of the Lat.: Tind. 'Apiphorum' (though he translates the other name 'the thre taverns'), so the Great Bible; Cov. 'Apiforum'; the Rhemish 'Apij-forum'; Matthew's Bible, the Bishops' Bible, and AV 'Appii forum.' See APPIUS (MARKET OF).

FORWARD, FORWARDNESS.—Forward is used both as adj. and as adv. in AV, but the adj., though independent in early Eng., seems to have been lost, and afterwards re-formed from the adverb. So the adv. properly comes first.

As an adv. 'forward' means 'towards the front,' as opposed to 'backward,' as Job 23^{8} 'Behold I go forward, but he is not there; and backward, but I cannot perceive him,' and Nu 32^{19} 'For we will not inherit with them on yonder side Jordan, or forward, because our inheritance has fallen to us on this side Jordan eastward' (הָלְאָה, 'further on,' as 1 S 20^{22} 'the arrows are beyond thee,' מִמְּךָ וָהָלְאָה, lit. 'from thee and onwards'). So Berners, *Froissart*, I. xvii. 18, 'All his barones went out of the cite, and the first nyght they lodged vi. myle forwarde.' In the same sense it is applied to time, as Ezk 39^{22} 'from that day and forward'; 43^{27} 'upon the eighth day, and *so* forward.' Cf. Stubbes, *Anat. Abus.* ii. 34, 'If sixtie would serue, they must have an hundred, and so forward.' A bold expression is found in 2 Es 3^{6} 'before ever the earth came forward,' that is, into existence (*antequam terra adventaret*), a tr^{n} retained in RV, though it is perhaps unique in Eng. literature.

When used figuratively with certain verbs 'forward' has the meaning of 'advance the interests of, help the progress of an undertaking.' The verbs in AV are (1) *set*, 1 Ch 23^{4} 'to set forward the work of the house of the LORD' (לְנַצֵּחַ, RV as AVm 'to oversee': so in Ezr $3^{8.\,9}$ RV changes AV 'set forward' into 'have the oversight,' though in 2 Ch 34^{12} 'to set it forward' is accepted for the same* Heb. with RVm 'to preside over it'; and in 34^{13} 'overseers' of AV is changed into 'set forward,' for Heb. מְנַצְּחִים). The phrase is applied to evil works as well as to good, Job 30^{13} 'they set forward my calamity' (יֹעִילוּ); Wis 14^{18} 'the singular diligence of the artificer did help to set forward the ignorant to more superstition' (προετρέψατο, RV 'urged forward by the ambition of the artificer'). To those examples RV adds 1 Co 16^{6} 'that ye may set me forward on my journey,' and 2 Co 1^{16}, 3 Jn ^{6} (all προπέμπω), where the meaning is somewhat different, to start one upon a journey. Shakespeare often uses the phrase intransitively (never trans. as here), as *I Henry IV.* II. iii. 38, 'We are prepared. I will set forward to-night.' The expression 'set forward' in this literal sense is also found in AV, but only in Nu, where it occurs 15 times of the marching of the Israelites in the Wilderness. (2) *Help*, only Zec 1^{15} 'they helped forward the affliction' (עָזְרוּ לְרָעָה, RVm 'helped the evil'), that is, the heathen not only acted as God's instruments in chastising Israel, but went further. (3) *Haste*, only 1 Es 1^{27} 'the Lord is with me hasting me forward' (ἐπισπεύδων). (4) *Bring*, only 3 Jn ^{6} 'whom if thou bring forward on their journey after a godly sort, thou shalt do well' (RV 'set forward,' as above). The same meaning is found *intransitively* with *go* in Gn 26^{13} 'waxed great, and went forward' (וַיֵּלֶךְ הָלוֹךְ וְגָדֵל, lit. as AVm, 'went going'; RV 'grew more and more'); and Ad. Est 13^{4}. The literal sense occurs in Nu 2^{24} 10^{5} and ('go on forward') 1 S 10^{3}. Cf. Goldsmith, *Vicar*, xi. (Globe ed. p. 21^{a} l. 3), 'Mr. Burchell, who was of the party, was always fond of seeing some innocent amusement going forward'; and Shaks. *Mids. Night's Dream*, IV. ii. 17, 'If our sport had gone forward, we had all been made men.'

In modern English 'forward' as an adj. means presumptuous, impertinent. This meaning is found as early as the beg. of the 17th cent.; thus, Warner, *Alb. Eng.* IX. xlvii. 221, 'They tould how forward Maidens weare, how proude if in request.' But it does not occur in AV. There the adj. means either *ready*, 2 Co 8^{10} 'to be forward a year ago' (τὸ θέλειν, RV 'to will'), or *zealous*, 2 Co 8^{17} 'being more forward, of his own accord he went unto you' (σπουδαιότερος, RV 'very earnest'); Gal 2^{10} 'which I also was forward to do' (ἐσπούδασα, RV 'was zealous'); and 1 Mac 1^{13}, where the zeal is in a bad cause (προεθυμήθησάν τινες). Cf. Hall, *Contemplations* (*Works*, ed. 1634, ii. 52), 'What marvell is it if God bee not forward to give, where we care not to aske, or aske as if we cared not to receive?' and (for the meaning 'ready') Livingstone (*Select Biographies*, Wod. i. 229), 'Mr. James went back with him, and finding him forward to go in with him . . . believed him.'

---

* The only remaining occurrence of the infin. is 1 Ch 15^{21}, where AV has 'to excel,' AVm 'to oversee,' and RV 'to lead.' The meaning is undoubtedly always 'to preside over,' whether workmen or more especially a choir of singers. The ptcp. seen in 2 Ch 34^{13} is found in the title of many psalms and translated 'the chief (RV Chief) Musician.'

Forwardness occurs once in Shakespeare, and then in later writers frequently in the mod. sense of over-confidence, presumption. *As You Like It*, I. ii. 159—

> 'Since the youth will not be intreated,
> His own peril on his forwardness.'

But in AV the only meaning is readiness or zeal. Once it is in a bad cause, Wis 14^{17} (σπουδή; RV 'zeal'); elsewhere only 2 Co 8^{8} (σπουδή, RV 'earnestness'), and 9^{2} 'I know the forwardness of your mind' (τὴν προθυμίαν ὑμῶν, RV 'your readiness'). So Hall (*Works*, ii. 16), referring to the Wise Men from the East, says, 'God encourages their holy forwardnesse from heaven.'

J. HASTINGS.

FOUL (Old Eng. *fúl*) is of the same root (Sanskrit *pū*, to stink) as Gr. πύον and Lat. *pūs*, purulent matter, as from a sore, and its earliest meaning is *loathsome*, whether to sight or smell. It is applied, for example, to blood, Wis 11^{16} 'a perpetual running river troubled with foul blood,' in reference to the Egyptian plague (αἵματι λυθρώδει, the only occurrence of this adj. in bibl. Greek, lit. 'with blood like gore,' RV 'with clotted blood'). In this sense 'foul' is applied to disease, as Shaks. *Hamlet*, IV. i. 21—

> 'But, like the owner of a foul disease,
> To keep it from divulging, let it feed
> Even on the pith of life';

and *Lear*, I. i. 167—

> 'Kill thy physician, and the fee bestow
> Upon thy foul disease.'

2. From this to *moral uncleanness* the step was easily and early made. In AV it is so applied only to unclean spirits, and only twice, Mk 9^{25}, Rev 18^{2} (both ἀκάθαρτος).

The adj. ἀκάθαρτος is used 22 times in NT with πνεῦμα (Mt 2, Mk 11, Lk 5, Ac 2, Rev 2) and once with πνεῦμα δαιμονίου (Lk 4^{33}). Tindale translates by 'unclean spirit' generally, but he gives 'foul spirit' in Mk 1^{27} 5^{8} 7^{25}, Lk 4^{36} 6^{18} 8^{29}, and is always followed by Cov., Cran., Gen., and (except in Mk 7^{25}) Bish. Wyclif., and the Rhem. NT, after Vulg. *spiritus immundus*, have 'unclean spirit' everywhere. AV seems quite accidentally to retain 'foul' in Mk 9^{25}; but in Rev 18^{2} it is probably retained for variety, the same Gr. word as applied to birds being tr^{d} 'unclean' in the same verse. RV gives 'unclean' everywhere.

Since ἀκάθαρτος is properly ceremonially unclean, the moral element is less prominent than when πονηρός is applied to πνεῦμα (Mt 12^{45}, Lk 7^{21} 8^{2} 11^{26}, Ac $19^{12.13.15.16}$, AV 'evil' or 'wicked,' RV always 'evil'), and consequently 'foul' with its suggestion of separation through loathsomeness is a very appropriate tr^{n}, and is frequently used of evil spirits, or their abode, in English literature. Thus Shaks. *Tam. of Shrew*, Induc. ii. 17—

> 'O, that a mighty man of such descent,
> Of such possessions and so high esteem,
> Should be infused with so foul a spirit.'

Cf. Watts, *Ps* cxxi. (L. M.) 25—

> 'On thee foul spirits have no power.'

Shaks. has 'foul devil' (*Rich. III.* I. ii. 50), and often 'foul fiend' (14 times, of which 11 are in *K. Lear* and always in the mouth of 'Edgar'), as *Rich. III.* I. iv. 58—

> 'With that, methoughts, a legion of foul fiends
> Environed me.'

3. 'Foul' is often set in opposition to fair, and that (1) in the sense of *ugly*. Thus Chaucer, *Clerk-Merchant* (E. 1209)—

> 'If thou be fair, ther folk ben in presence
> Shew thou thy visage and thyn apparaille;
> If thou be foul, be fre of thy dispence,
> To gete thee frendes ay do thy travaille.'

This is the meaning of Job 16^{16} 'My face is foul with weeping,' though RVm gives 'defiled,' as if a closer rendering of the Heb. (חֳמַרְמַר); but the Heb. root is to be red, and the most probable tr^{n} 'my face is red with weeping.' So Livingstone, *Select Biog.* 306, 'When he came out all his face was foull with weeping.' (2) As applied to weather: 1 Es 9^{6} (χειμών), 9^{11} (ὥρα χειμερινή), and Mt 16^{3} (χειμών).

4. Foul is twice found in AV with the meaning of *disgraceful*: Sir 5^{14} 'a foul shame is upon the thief' (αἰσχύνη; RV 'upon the thief there is shame'); 20^{24} 'A lie is a foul blot in a man' (μῶμος πονηρός). Examples of both phrases are found in Shaks. Thus *Rich. III.* I. iii. 249—

> '*Hast.* False-boding woman, end thy frantic curse,
> Lest to thy harm thou move our patience.'
> *Q. Marg.* Foul shame upon you! you have all moved mine';

and *Much Ado*, III. i. 64—

> 'Nature, drawing an antick,
> Made a foul blot.'

5. The Amer. RV introduces 'foul' in the mod. sense of *dirty*: Is 19^{6} 'And the rivers shall become foul' (AV 'And they shall turn the rivers far away'; RV 'And the rivers shall stink'). So Job 30^{6} Cov. 'Their dwellinge was beside foule brokes.' This is the meaning of the verb 'to foul' in Ezk 32^{2} $34^{18.19}$, its only occurrences, where it refers to the polluting of running water.

J. HASTINGS.

FOUNDATION.—In the OT the words 'found' and 'foundation' are for the most part tr^{n} of יָסַד and its derivatives, which are freely used in a metaphorical as well as a literal sense. The foundation stones of some of Solomon's buildings are described as huge and costly (1 K 7^{10}). In connexion with the laying of the foundation stone various superstitious rites were widely practised, the offering of a human victim being a not infrequent accompaniment of the ceremony (see Trumbull, *Threshold Covenant*, 22, 51, 55; Strack, *Der Blutaberglaube*, 68). It is possible that the record of such an incident was embodied in the original form of the tradition preserved about Hiel the Bethelite, 'He laid the foundation [of Jericho] on (? בְּ) Abiram his firstborn, and set up the gates thereof on his youngest son Segub' (1 K 16^{34}).

In NT 'foundation' is used in two distinct senses, an active and a passive. In the former sense it represents καταβολή (properly 'founding'), which (except in He 11^{11} καταβολὴ σπέρματος, used of Sarah) is confined to the collocation καταβολὴ κόσμου, 'the foundation of the world,' Mt 13^{35} 25^{34}, Lk 11^{50}, Jn 17^{24}, Eph 1^{4}, He 4^{3} 9^{26}, 1 P 1^{20}, Rev 13^{8} 17^{8}. In the passive sense 'the foundations of the earth' (מוֹסְדֵי אֶרֶץ, once Job 38^{6} אֲדָנִים 'pedestals,' once Ps 104^{5} מְכוֹנוֹת 'bases') frequently appears in OT, Mic 6^{2}, Is 24^{18} 40^{21}, Jer 31^{37}, Ps 82^{5}, Pr 8^{29}. The passive sense of the word is in NT represented by θεμέλιος (both literal and metaphorical). This word is used, *e.g.*, in our Lord's simile of the two buildings (Lk $6^{48\text{f.}}$), as well as in St. Paul's simile of the building tested by fire (1 Co $3^{10\text{ff.}}$). In 1 Co 3^{11} the Church's foundation is Christ, in Eph 2^{20} she is built upon the foundation of (the gospel of) the apostles and (NT) prophets, Jesus Christ being the chief corner-stone.

In Jer 50^{15}, where AV has 'foundations,' the meaning of אָשְׁיוֹת is prob. ‘bulwarks’ (RV) or ‘buttresses’ (see *Oxf. Heb. Lex.*). In Is 16^7 ‘raisin-cakes’ seems to be the meaning, not ‘foundations’ (see FLAGON). The ‘gate of the foundation’ (שַׁעַר הַיְסוֹד) in 2 Ch 23^5 is obscure. Perhaps we should read שַׁ׳ סוּר ‘the gate Sur,’ as in 2 K 11^6, or שַׁ׳ הַסּוּסִים ‘the horse gate’ (see *Oxf. Heb. Lex. s.* יְסוֹד). In 2 Ch 3^3 for AV ‘these are the things wherein Solomon was instructed,’ RV substitutes ‘these are the foundations which Sol. laid’ (taking הוּסַּד as Hoph. infin. of יָסַד). RV further gives ‘foundations’ for ‘posts’ in Is 6^4 as tr. of אַמּוֹת, a derivative from אַם in metaph. sense. Finally, in two instances (Ps 89^{14} 97^2) where AV tr. מָכוֹן ‘habitation,’ RV gives the correct sense ‘foundation.’

J. A. SELBIE.

FOUNTAIN.—**1.** A fountain is a natural outflow, or spring, of water, and is in this way distinguished from a well of artificial construction (see WELL). Palestine, owing to its physical structure, is especially rich in fine springs of water. Remarkably appropriate is the statement (Dt 8^7), ‘For the Lord thy God bringeth thee into a good land, a land of brooks of water, of fountains (עֲיָנוֹת) and depths springing forth in valleys and hills.’

2. The Cretaceous limestone of which W. Palestine is mainly composed being open and porous, the rain (or snow) which falls during the winter months percolates downwards and forms underground reservoirs in the strata, which burst forth along the sides of the Jordan depression, as also on the western flanks of the central table-land.[*] Equally favourable is the geological structure of the eastern sides of the Jordanic depression for the production of springs; for the heavy falls of snow which cover the Lebanon and Hermon ranges in winter give rise to copious fountains which supply the head waters of the Litany, the Jordan, and the rivers of Damascus. Not less remarkable are some of the fountains of the region of Trachonitis and the Peræa, which have their sources in the volcanic mountains of the Hauran, and their outlets into the Jordan by the Hieromax and the Jabbok. Fine springs are also numerous along the western shore of the L. of Tiberias, scattering verdure and fertility along their course. Amongst the Edomite mountains and those of the Sinaitic peninsula the most important fountains are those of the Wady Musâ, which flows down through the city of Petra; the 'Ain Abu Werideh (or el-Weibeh), and 'Ain Ghurundel in the Arabah; the Wady el-'Ain at the entrance to the grand gorge of es-Sûḳ, between Jebel Musâ and 'Aḳabah;[†] and those which descend from the flanks of Jebel Mûsa (Mount Sinai) itself. The spring of 'Ain Ḳadis, which issues forth at the base of a limestone cliff in the Badiet et-Tîh (Wilderness of Paran), has been identified, with much probability, as the site of Kadesh-Barnea.[‡]

3. *Thermal Springs.*—Many of the springs which flow directly into the Dead Sea and the lower waters of the Jordan have a high temperature, due partly to the existence of volcanic rocks (basalt), still highly heated, with which the waters come in contact; and partly to the depth below the surface to which the underground waters descend before issuing forth into day.

The following are the most important thermal springs[§]:—

1. *Ḥammam* (or *Ḥammath*), situated on the W. side of the Sea of Tiberias, near to which Herod the tetrarch built the city of that name.[*] Temp. 143·3° Fahr., water sulphurous.[†] **2.** *Yarmuk*, N. of Umm Ḳeis (Gadara). Temp. 109° Fahr., water sulphurous.[‡] **3.** *Zerḳa Ma'in* (Callirrhoë), ten principal warm and sulphurous springs, of which the lowest reaches a temperature of 143° Fahr.[§] Here Herod the Great bathed during his last illness.[‖] **4.** *'Ain Zara* enters the Dead Sea on the E. side. Temp. 109° Fahr.[¶] **5.** *'Ain es-Sulṭân*, in the Plain of Jericho (el-Ghôr), W. of the Jordan. Temp. 71° Fahr. (See ARABAH, JERICHO.) **6.** *'Ain el-Beida* enters the Wady el-Jeib S. of Jebel Usdum. Temp 91° Fahr. **7.** *'Ain el-Khubarah*, W. of the Dead Sea, water sulphurous. Temp. 88–93° Fahr.[**] **8.** *'Ain Feshkhah*, W. of the Dead Sea. Temp. 82° Fahr.[††] **9.** The springs of *Ænon* (*'Ainun*) near to Salim in Samaria, where John baptized (Jn 3^{23}). According to Conder the head springs issue from an open valley, surrounded by desolate hills; but the water gushes forth over a stony bed and rapidly produces a fine perennial stream surrounded by oleanders.[‡‡] **10.** *Kishon.* The springs forming the head waters of the Kishon are remarkable for their copiousness. Stanley describes them as ‘full-grown from their birth.’ They rise at the foot of Mt. Tabor and form a chain of pools and springs, together with quagmires and swamps, which were fatal to many of Sisera's army[§§] (Jg 5^{21}). The river enters the Mediterranean at the northern base of Mt. Carmel. **11.** *Baniâs.* The springs at the head of the Jordan at Baniâs (Cæsarea Philippi) issue from a cavern above the town, constituting the ‘upper sources,’ and are augmented by a still larger fountain below, which is known as ‘the lower springs’; so that the Jordan is full-grown from its birth.[‖‖] **12.** *The Jerusalem fountains.* Jerus. in former times was supplied from several sources; but we are here concerned only with the natural fountains. Of these the most remarkable are the *Upper Springs of Gihon*,[¶¶] which are intermittent, and break out underground in the Kidron Valley (Wady en-Nar), forming the chief source of this stream, from whence the water is carried by an underground conduit to a pool, now known as the ‘Fountain of the Virgin’ (*'Ain Umm ed-Deraj*), to the west side of the City of David. This conduit, 1760 feet (or 1200 cubits) in length, was constructed by Hezekiah on the approach of the Assyrian army (2 K 20^{20}, 2 Ch 32^{30}). In 1880 a pupil of Schick observed an inscription which was afterwards deciphered by Sayce and Guthe. It contains in old Heb. characters a record of the construction.[***] This fount is the only natural spring of water at Jerusalem, and is the chief source of supply of pure water at the present day. The *pools of Solomon*, near Bethlehem, were formerly the chief sources of supply for Jerus., and were conducted into the city by an upper and lower conduit hewn in stone, now fallen into disuse. The pools are supplied by a fine spring which issues forth from the limestone rock above the upper pool. The water is still carried by a conduit to Bethlehem, and also fertilizes 'the gardens of Solomon' in the valley below. E. HULL.

---

[*] The average rainfall at Jerus. is about 30 inches, nearly the whole of which falls between Nov. and Feb.; in the Lebanon it is probably considerably greater. See Glaisher, ‘Meteorological Observations at Jerus.’ in *PEFSt*, 1887–98.

[†] Described by Rüppell, Miss Martineau, Dean Stanley, and Major Kitchener (*Mount Seir*, App. 208).

[‡] This fountain was discovered by Rowlands, and his identification of it with Kadesh-Barnea has been supported by Holland and Trumbull after personal inspection of the spot (*Kadesh-Barnea*, 1884).

[§] Some of the Jordan Valley springs appear to burst forth along the line of the great ‘fault,’ by which the valley is traversed. (See ARABAH.)

FOUNTAIN GATE.—See GATE and JERUSALEM.

FOUR.—See NUMBER.

FOURSQUARE.—Now that 'square' is confined to that which has *four* equal sides, 'foursquare' is looked upon as redundant, though writers like Ruskin, steeped in biblical phraseology, use it still. Formerly 'square' meant simply equal-sided, and the number of sides had to be expressed. Thus 'fivesquare,' 1 K 6^{31m}, taken from the text of the Geneva Bible, 'the upper poste and side postes were fiue square.' 'Foursquare' is used of the altar of burnt-offering (Ex 27^{1} 38^{1}), of the incense-altar (Ex 30^{2} 37^{25}), and of the high-priest's breastplate (28^{16} 39^{9}), the meaning being clearly expressed in 30^{2} 'A cubit shall be the length thereof, and a cubit the breadth thereof; foursquare shall it be' (רָבוּעַ). It is also used of the borders of the brazen bases in Solomon's temple (1 K 7^{31} מְרֻבָּע); of the inner court of Ezekiel's temple (Ezk 40^{47}) and of the 'holy oblation' (48^{20}); and, finally, of the holy city, new Jerusalem (Rev 21^{16}, *τετράγωνος*).

FOWL.—The word 'fowl,' now restricted to the domestic cock and hen, 'the barn-door fowl,' was formerly applied to all feathered animals, and occasionally even to all winged creatures. Thus Sir 11^{3} in Wyclif's tr^{n} of 1382 is 'Short in foules (Vulg. *in volatilibus*) is a bee,' though Purvey's Revision of 1388 gives, 'A bee is litil among briddis.' Indeed, when Wyclif has to make a distinction between feathered and unfeathered creatures that fly, he uses 'fowl' of the latter: Ezk 39^{17} 'Saye thou to eche bryd, and to alle foulis' (אֱמֹר לְצִפּוֹר כָּל־כָּנָף, Vulg. *dic omni volucri et universis avibus*), though Rogers and Coverdale reverse the order, 'Speake unto alle the foules and euery byrde.'* And AV uses 'fowls' of unfeathered winged creatures in Lv 11^{20} 'All fowls that creep, going upon all four, shall be an abomination unto you' (כֹּל שֶׁרֶץ הָעוֹף). This is Wyclif's tr^{n} 'Alle of foules (1388, 'Al thing of foulis') that goth on foure feete'; after Vulg. *Omne de volueribus quod graditur super quatuor pedes*; and Tindale's, 'all foules that crepe and goo upon all iiii. shalbe an abhominacion unto you.' The LXX has *πάντα τὰ ἑρπετὰ τῶν πετεινῶν*; RV 'All winged creeping things' (see art. CREEPING THINGS).† T. Adams (*Works*, i. 13) distinguishes 'fowls' from 'flies': 'the eagles hunt no flies so long as there be fowls in the air.' He thus uses 'fowls' exactly as we now use 'birds,' and that was its commonest use by far. Thus Bacon, *Essays* (Gold. Treas. ed. p. 181, l. 22), 'Why, doe you not think me as wise, as some Fowle are, that ever change their Aboad towards the Winter?'

RV accepts the AV rendering 'fowl' or 'fowls' throughout OT, except Lv 11^{20}, Ezk 39^{17}, already noted, and in the three passages in which the Heb. is עַיִט *'ayiṭ*, a bird of prey: Gn 15^{11} (RV 'birds of prey'), Job 28^{7} (RV 'bird of prey'), Is 18^{6} (RV 'ravenous birds'). Cf. Bacon, *Essays* (p. 240, l. 2), 'But now, if a Man can tame this *Monster*, and bring her to feed at the hand, and govern her, and with her fly other ravening Fowle, and kill them, it is somewhat worth'; and Milton, *PL* x. 274—

> 'A flock of ravenous fowl.'

In Wis 19^{11} 'a new generation of fowls' (*νέαν γένεσιν ὀρνέων*) is changed into 'a new race of birds.' In NT the Gr. (always plu.) is either *ὄρνεον* (Rev 19$^{17.\,21}$) or *πετεινόν* (Mt 6^{26} 13^{4}, Mk 4$^{4.\,32}$, Lk 8^{5} 12^{24} 13^{19}, Ac 10^{12} 11^{6}), and, except in the two places in Ac, RV changes into 'birds.'

J. HASTINGS.

FOWL.—Neither in AV nor in RV has any system been followed in the rendering of the various words for birds in the Heb. original. These words are—**1.** עוֹף *'ôph*. This word signifies collectively birds or winged creatures, It is often in the construct state with הַשָּׁמַיִם *the skies*. It corresponds with the Arab. *ṭair*, the root of which seems to signify to *fly*. It ought to be tr^{d} everywhere *birds*. It is, however, more generally tr^{d} *fowl*, but also often *birds* (Jer 4^{25}). It is usually collective (Ezk 31$^{6.\,13}$), but sometimes singular (?) (Gn 1$^{21.\,30}$, Lv 17^{13}). It is sometimes used for *carrion birds* (2 S 21^{10}).

2. עַיִט *'ayiṭ*, usually collective (in Is 46^{11} singular, applied to Cyrus) for *birds of prey*, is, however, tr^{d} in AV *fowls* (Gn 15^{11}), RV *birds of prey*; also AV *fowls* (Job 28^{7}, Is 18^{6}), RV *birds of prey* and *ravenous birds*, AV and RV עַיִט צִפּוֹר *ravenous birds* (Ezk 39^{4}).

3. צִפּוֹר *ẓippôr* is in many places a collective term for birds, from the root צָפַר *ẓâphar*, to 'twitter,' or 'chirp,' or 'whistle' (cf. Arab. *ṣafar*, to 'whistle'). It is used collectively, Gn 15^{11}, Lv 14$^{4\text{-}53}$, Dt 14^{11}, etc., where it is tr^{d} AV and RV 'birds'; Dt 4^{17}, Neh 5^{18}, Ps 8^{8}, where it is tr^{d} EV 'fowl.' It is sometimes in construct state with כָּל־כָּנָף (Ezk 17^{23} etc.), at others with כָּנָף (Ps 148^{10}). *Ẓippôr*, like its Arab. equivalent *'uṣfûr*, is also used for the smaller twittering birds, particularly the sparrow (Ps 84^{3} etc.).

The *ẓippor* is said to nest in the cedar (Ps 104^{17}), to flee to the mountains (Ps 11^{1}), to be taken in nets and snares (Ps 124^{7}, Pr 6^{5}, Am 3^{5}). Four different ways of taking animals and birds are alluded to in a single passage (Job 18$^{8\text{-}10}$). In all there are seven different Heb. words for the various sorts of traps. The 'cage full of birds' (Jer 5^{27}) may refer to the custom of hanging cages of birds on the trees, on which birdlime or snares are placed, or near which the sportsman lies concealed, to entice the birds by the singing of the captives (but see CAGE). The voice of the *ẓippôr* (Ec 12^{4}) is the morning song, announcing the dawn.

4. בַּעַל כָּנָף *ba'al-kânâph* (Pr 1^{17}), the 'possessor of a wing,' is a figurative expression for a bird.

5. In NT (and Sir 43^{14}) *πετεινά* (or *τὰ π.*) is general for *birds*, by which it is tr^{d} in RV, while AV gives *fowls* (Mt 13^{4}, Lk 13^{19}). When birds of prey are intended *ὄρνεα* is used (Rev 19^{17}).

Birds are divided into *clean* and *unclean* (Dt 14$^{11\text{-}20}$). Lv gives the list only of the unclean birds (11$^{13\text{-}20}$). The 'fowls that creep' or 'creeping thing that flieth,' RV 'winged creeping things' (Lv 11$^{20.\,23}$, Dt 14^{19}), may refer to such as the bats, and the insects that do not leap as well as fly (see full discussion in art. CREEPING THINGS). The birds allowed in sacrifice were *turtle-doves* and *pigeons* (Lv 1$^{14\text{-}17}$), and *ẓippŏrîm* (Lv 14$^{4\text{-}53}$). The last were prob. any twitterers or clean birds except the two above mentioned. Among the birds mentioned as having been used as food are *quails*, *partridges*, *fatted fowls* (*barburîm*, 1 K 4^{23}, see COCK), and *fowl* (*ẓippôr*, Neh 5^{18}). The last may refer to small birds. It is prob. that the *sparrows*, sold two for a farthing and five for two farthings (Mt 10^{29}, Lk 12^{6}), were for food. They and other small birds are caught and sold in immense numbers at this day, and at prices similar to those of our Saviour's day. **Cocks** and **hens** are mentioned in NT, and were doubtless used for food.

---

* The Geneva Bible of 1560 translated more accurately (as LXX Εἰπὸν παντὶ ὀρνέῳ πετεινῷ), 'Speake unto euerie feathered foule.' This was accepted by AV, with marg. 'to the fowl of every wing.' RV has 'Speak unto the birds of every sort'; Siegfried, *Sprich zu den mannigfach beschwingten Vögeln.*

† This use was either unknown to or ignored by Shakespeare when he wrote, *Comedy of Errors*, III. i. 79—

> 'I pray thee, let me in.
> Ay, when fowls have no feathers, and fish have no fin.

The *migrations of birds* are especially noteworthy in the Holy Land, as a country midway between the tropics and cooler regions of the north. They are noted in Scripture (Ca $2^{11.\,12}$, Jer 8^{7}).

Their *singing* is also alluded to (Ec 12^{4}, Ps 104^{12}), and their *flight* (Ex 19^{4}, Dt $32^{11.\,12}$).

Eggs were eaten (Lk 11^{12}). The eggs of wild birds, on which the hen was sitting, could be taken, but not the hen at the same time (Dt 22^{6}). Ostrich eggs are mentioned (Job 39^{14}, see OSTRICH). 'Eggs that are left' (Is 10^{14}) may refer to the supplementary eggs of the ostrich, or to the nests that have been deserted owing to fright of the parent birds. Eggs of serpents are alluded to (Is 59^{5}). For the expression 'sitteth on eggs' (Jer 17^{11} RV, AVm 'gathereth young'), see PARTRIDGE. Birds' nests are often found in places of worship (Ps 84^{3}). For general subject of birds, their habits, etc., see NATURAL HISTORY. G. E. POST.

FOWLER is marked by the *Oxf. Eng. Dict.* as 'now rare,' the more commonplace 'bird-catcher' being its substitute. It is found in AV, Ps 124^{7} (יוֹקֵשׁ, ptcp. of [יָקֹשׁ] to lay snares); Hos 9^{8} (יָקוּשׁ [all]); Ps 91^{3}, Pr 6^{5} (יָקוּשׁ, found also in Jer 5^{26}, AV 'he that setteth snares'; RV 'fowlers,' which is Wyclif's word). Shaks. has the word but once—*Mids. Night's Dream*, III. ii. 20—

> 'As wild geese that the creeping fowler eye.'

For **Fowling** see under HUNTING.

FOX (שׁוּעָל *shû'âl*, *ἀλώπηξ*, *vulpes*).—There can be no doubt that *shû'âl* meant both *jackal* and *fox*. It is used in the sing. only once in OT (Neh 4^{3}), where the intention is doubtless to refer to a small animal, and *fox* is more likely to be meant than *jackal*. The plural *shû'âlîm* is used in a number of places in OT. AV has tr^{d} it in all of them *foxes*. In two of these (Jg 15^{4}, Ps 63^{10}) the context makes it pretty certain that the *jackal* is intended. In the first passage Samson is said to have caught 300 *shû'âlîm*. This would be well-nigh impossible in the case of foxes, which are shy, solitary animals, but not difficult in that of jackals, which are gregarious. In the second the expression 'they shall be a portion for foxes' implies a carrion-eater. Foxes may sometimes join other animals in feasting on the slain, but it is jackals that share with vultures the carrion of a battlefield. In the other passages of OT *shû'âlîm* may mean either animal, though the context points rather to the habits of the fox than to those of the jackal. Thus La 5^{18} represents *shû'âlîm* as walking on the ruins of Zion, and Ezk 13^{4} '*shû'âlîm* in the deserts' (RV 'waste places'), and Ca 2^{15} speaks of 'the foxes, the little foxes that spoil the vines' (RV 'vineyards'). A special word for *jackals* occurs in OT אִיִּים (see DRAGON under תַּנִּים, and JACKAL).

The Gr. *ἀλώπηξ* means the fox only. In NT the sing. occurs once (Lk 13^{32}), where Herod is spoken of as a fox. Here the reference is to the well-known cunning of this animal. It occurs twice in the plu. (Mt 8^{20}, Lk 9^{58}) 'foxes have holes.'

The fox of Syria does not differ essentially from the common fox of Europe, *Vulpes vulgaris*, L. Its body is about 14 in. long, and its bushy tail almost as long. It is of a grey colour, has a long pointed snout, and small cunning eyes. It is a nocturnal animal, prowling about houses and encampments. It captures poultry, and small birds and animals. It is also very fond of grapes, and both it and the jackal do much mischief in vineyards. G. E. POST.

FRAGMENT.—The word *κλάσμα* (from *κλάειν*, to break) is used in the plu. (*κλάσματα*) of the remains of the loaves and fishes in the account of the Feeding of the Five Thousand (Mt 14^{20}, Mk 6^{43}, Lk 9^{17}, Jn $6^{12.\,13}$), the Four Thousand (Mt 15^{37}, Mk 8^{8}), and in the reference to these miracles (Mk $8^{19.\,20}$), and it is used nowhere else in NT.*

The Versions have offered a great variety of tr^{n}. Wyclif varies between 'broken gobbets' (Mt 14^{20}), 'relefis' (Mt 15^{37}, Mk 8^{8}, Jn $6^{12.\,13}$), and 'broken meat' or 'metis.' Tind. has 'gobbets' in Mt 14^{20} and Mk 6^{43}, elsewhere 'broken meate' (1526 ed. in Mk 8^{20} 'levinges'). Rogers (Matthew's Bible) introduces 'scrappes' (Mt 14^{20}), has 'gobbettes' in Mk 6^{43}, and 'broken meate' in the rest. Coverdale gives 'broken meate' everywhere except Mk 6^{43} 'broken peces.' The Great Bible offers 'fragments' as a new tr^{n} (Mt 14^{20}), and 'leauinges' (Mk 8^{20}), says simply 'baskettes full ther of' in Mk 6^{43}, and for the rest has 'broken meate.' The Geneva and Bishops' Bibles follow the Great Bible in all places except Mk 6^{43} 'fragments,' and (Gen. 1560 only) Mt 15^{37} 'fragments' again. The Rhemish NT prefers 'fragments' everywhere except Mt 14^{20} 'leauings.' AV accepts 'fragments' in all but the two passages which refer to the miracle of the Four Thousand, where it falls back on the rendering 'broken meat.' RV chooses 'broken pieces' (which has appeared only once before, Mk 6^{43} Cov.), and uses it consistently throughout.

Why were the Revisers not content with AV 'fragments'? 'For some mysterious reason,' says Sir Edmund Beckett (*Should the Revised New Test. be Authorised?* 1882, p. 91), 'they prefer "broken pieces" to "fragments that remained over" of the two sets of loaves and fishes. We have all heard of "broken victuals"; but the victuals were once whole, and had been broken. Each piece of bread or fish is a piece, and not broken, though broken off, if they will be so precise. But a fragment is a piece broken off. So here is another miserable bit of pedantry of some kind, and for some unknown reason, which only turns right into wrong for nothing; for the AV is certainly quite as accurate a translation: indeed the Durham Greek professor said more so.'

But there are two good reasons. In the first place the word 'fragment' carries, and has always carried, a sense of contempt. Shaks. uses the word seven times, and this is always present, mostly prominent. The aptest instance is perhaps *Troil. and Cress.* V. ii. 159—

> 'The fragments, scraps, the bits, and greasy reliques
> Of her o'er-eaten faith, are bound to Diomed.'

Cf. T. Fuller, *Holy Warre*, iv. 16 (p. 195), 'Yea, now full willingly would the Christians have accepted the terms formerly offered them; and now their hungrie stomachs would make dainties of those conditions which before, when full of pride, they threw away as fragments.' In the second place the 'broken pieces' were not fragments of larger pieces; all that the disciples gave to the multitude were 'broken pieces,' and these which were gathered up were the broken pieces that were in excess of the requirements.

J. HASTINGS.

FRAME.—To 'frame' (from Old Eng. *framian*, to profit, succeed) is primarily to make good progress, to prosper, as Melville, *Diary*, p. 272, 'The Bischope haid lurked a yeir or twa lyk a tod in his holl, as his custom was when things framed nocht with him.' Then it is used in a neutral sense, to get on well or ill as the case may be, as Rutherford, *Letters*, No. xxxii., 'But let us, however matters frame, cast over the affairs of the bride upon the Bridegroom.' And then come the various transitive meanings of preparing, fitting for use. In AV the verb is used with a direct object, except once with a foll. infinitive.

1. To contrive, to manage, Jg 12^{6} 'he could not frame to pronounce it right' (יָכִין לְדַבֵּר כֵּן, lit. 'fix to speak so,' perhaps 'fix the mind,' *i.e.* catch the slight difference in the pronunciation).

---

* Its occurrences in LXX are Lv 2^{6} 6^{21}, Jg 9^{53} 19^{5}, 1 S 30^{12}, 2 S $11^{21.\,22}$, Ezk 13^{19}; where EV give 'piece,' except Jg 19^{5} 'morsel' (of bread), and Ezk 13^{19} 'handful' (of barley).

Cf. *Return from Parnass.* IV. v. 62 (2nd pt.), 'Schollers must frame to liue at a low sayle.'

2. To direct, Hos 5^{4} 'They will not frame their doings to turn unto their God' (לֹא יִתְּנוּ, lit. as AVm 'they will not give'; RV as AVm. 'Their doings will not suffer them to turn unto their God,' with AV text in marg.). Cf. Rutherford, *Letters*, No. clxxxvii., 'Frame yourself for Christ, and gloom not upon his Cross': Ps 145^{21} (L. M.), Stern. and Hopk.—

> 'Therefore my mouth and lips I'll frame
> To speak the praises of the Lord.'

3. To form, Is 29^{16} 'Shall the thing framed say of him that framed it, He had no understanding?' (יֵצֶר אָמַר לְיֹצְרוֹ; Amer. RV 'formed'); and in RV, Job 10^{8} 'Thine hands have framed me and fashioned me' (עִצְּבוּנִי; AV 'made me'). So Ps 106^{19}, Stern. and Hopk.—

> 'Upon the hill of Horeb they an idol-calf did frame';

and Shaks. *Merch. of Venice*, I. i. 51—

> 'Nature hath framed strange fellows in her time.'

4. To fit together, make, Eph 2^{21} 'all the building fitly framed together' (συναρμολογουμένη); He 11^{3} 'the worlds were framed by the word of God' (κατηρτίσθαι); and in RV, Eph 4^{16} 'all the body fitly framed and knit together' (συναρμολογούμενον). Cf. Spenser, *FQ* II. ii. 30—

> 'And, thinking of those hranches green to frame
> A girlond for her dainty forehead fit,
> He pluckt a bough; out of whose rift there came
> Smal drops of gory bloud, that trickled down the same.'

5. To devise, Ps 50^{19} 'thy tongue frameth deceit' (תַּצְמִיד); 94^{20} 'which frameth mischief' (יֹצֵר); Jer 18^{11} 'Behold, I frame evil against you' (יוֹצֵר); and in Amer. RV, Dt 31^{21} 'I know their imagination which they frame' (עֹשֶׂה, lit. 'do,' EV 'go about'). So Barclay (1514), *Cyt.* (Percy Soc.) 23—

> 'Than frame they fraudes men slyly to begyle';

and Ps 10^{2}, Stern. and Hopk.—

> 'In these devices they have framed
> Let them he taken sure.'

6. To express, embody, 2 Mac 15^{39} 'speech finely framed delighteth the ears of them that read the story' (τὸ τῆς κατασκευῆς τοῦ λόγου; RV 'the fashioning of the language'). AV is a modification of the Geneva tr^{n}, 'the setting out of the matter,' and may be illustrated from Milton, *PL* v. 460—

> 'His wary speech
> Thus to th' empyreal minister he framed.'

As a subst. 'frame' occurs twice in AV, and means something constructed. 1. The structure of the body, Ps 103^{14} 'he knoweth our frame; he remembereth that we are dust' (יִצְרֵנוּ). To this RV adds Ps 139^{15} 'My frame was not hidden from thee, when I was made in secret' (עָצְמִי, AV 'my substance,' AVm 'or, strength; or, body'); and Amer. RV, Job 41^{12} 'his [leviathan's] goodly frame' (חִין עֶרְכּוֹ, EV 'his comely proportion'). So frequently in *Paraphrases in Verse* (1775), as 57^{4}—

> 'With sympathetic feelings touch'd
> He knows our feeble frame';

and 51^{4}—

> 'We know, that when the soul uncloath'd
> Shall from this body flie,
> 'Twill animate a purer frame
> With life that cannot die.'

2. The structure of a city, Ezk 40^{2} 'a very high mountain, by which was as the frame of a city' (כְּמִבְנֵה־עִיר, Davidson, 'a building of a city, that is, a city-like or citadel-like building').

3. RV adds Nu $4^{10.\,12}$, a frame *fitted together* for carrying things upon (מוֹט, AV 'bar').

J. HASTINGS.

FRANKINCENSE (לְבֹנָה *lĕbhônâh*, λίβανος, λιβανωτός).—*Lebhônâh* is erroneously tr^{d} in some places in AV 'incense' (Is 43^{23} 60^{6}, Jer 6^{20} etc. In RV it is correctly rendered *frankincense*). Incense, however, is the proper rendering of another word קְטוֹרָה *ḳĕṭôrâh.* This substance was compounded of f. and other aromatic gums, and *seasoned with salt* (Ex $30^{34.\,35}$), or *sweet*, *i.e.* not so seasoned (Ex 25^{6}, Lv 16^{12}). All incense not so made was a strange incense, and could not be offered (Ex 30^{9}, cf. 'strange fire' Lv 10^{1}).

F. is the fragrant resin of an Indian tree, *Boswellia serrata*, Stackh., procured by slitting the bark. It is imported through Arabia (Is 60^{6}, Jer 6^{20}). It is known in Arabia by a name kindred to the Heb., *i.e.* *lubân.* It was one of the gifts offered by the Magi (Mt 2^{11}). The 'incense' of both AV and RV (Rev 8^{3}) should be 'frankincense.'

G. E. POST.

FRANKISH VERSION.—See VERSIONS.

FRANKLY.—In Lk 7^{42} the verb ἐχαρίσατο is tr^{d} 'he frankly forgave.' The older VSS have simply 'he forgave' (except Wyclif, 1380, 'he gaf frely'), and RV returns to that. The purpose of the AV translators was, no doubt, to bring out on a special occasion the special force of this word, which, as Bruce says (*Expos. Gr. Test. ad loc.*), is a warmer word than ἀφιέναι, and was welcome to St. Luke as containing the idea of grace (χάρις). It occurs only in the writings of St. Luke (Lk $7^{21.\,42.\,43}$, Ac 3^{14} $25^{11.\,16}$ 27^{24}) and St. Paul (Ro 8^{32}, 1 Co 2^{12}, 2 Co $2^{7.\,10}$ 12^{13}, Gal 3^{18}, Eph 4^{32}, Ph 1^{29} 2^{9}, Col 2^{13} $3^{13\,bis}$, Philem ^{22}).

The Eng. word 'frankly' is used, not in the mod. sense of *candidly*, *openly*, but in the old and literal sense of *freely*, *unrestrainedly*, as in Elyot, *The Governour*, ii. 234, 'puttynge out of their citie their women and all that were of yeres unhabill for the warres, that they mought more frankely sustayne famyne'; and in Shaks. *Meas. for Meas.* III. i. 106—

> 'O, were it hut my life,
> I'ld throw it down for your deliverance
> As frankly as a pin.'

J. HASTINGS.

FRANTICK.—Sir 4^{30} 'Be not as a lion in thy house, nor frantick among thy servants' (φαντασιοκοπῶν, lit. 'conceiving fancies,' RV 'fanciful': Fritzsche understands 'suspicious,' 'mistrustful,' *argwöhnisch*, and is followed by Ball [*QPB*]; but Bissell thinks the AV tr. suits the context best, and translates 'as a crazy man'). Tindale has 'frantick' for AV 'lunatick' in Mt 17^{15} 'Master have mercy on my soune for he is franticke'; and Sir T. More (*Workes*, p. 270) uses the word in nearly the same sense of Luther, 'And therfore among many folishe wordes of Luther, as foolishe as euer heretyke spake, he neuer spake a more frantike, than in that he saith that God hath nede of our faith.'

FRAY occurs in Zec 1^{21} of the terrifying of the 'horns' of the Gentiles, and 'fray away' in Dt 28^{26}, Jer 7^{33} of the driving away of wild beasts from a dead body (all as tr^{n} of הֶחֱרִיד). Amer. RV prefers 'frighten.' 'Fray' is also found in 1 Mac 14^{12} 'every man sat under his vine and his fig tree, and there was none to fray them' (οὐκ ἦν ὁ ἐκφοβῶν αὐτούς, RV 'to make them afraid'); and 'fray away' in Sir 22^{20} 'whoso casteth a stone at the birds frayeth them away' (ἀποσοβεῖ αὐτά).

Fray is what philologists call an aphetic form of 'affray.' That is to say, the old vb. 'affray' lost its unaccented initial vowel by aphesis [ἀφιέναι], as 'esquire' became 'squire,' and the like; and this happened to 'affray' while still spelt 'afray,' a spelling preserved in its past ptcp. 'afraid' (='afrayed'). To 'fray' is therefore originally to 'disturb' (Anglo-Fr. *afrayer*, late Lat. *ex-fridare*, from *ex* and *fridus* [Old High Ger. *fridu*], 'peace'), a meaning well illustrated by the examples in AV.

In Hos 10^{11} Cov. uses both forms, 'Yee as a lyon roareth he, that they maye be afrayed, like the children of the see: that they may be scarred awaye from Egipte, as men scarre byrdes: and frayed awaye (as doues use to be) from the Assirians londe.' The only occurrence of the vb. in Shaks. is *Troil. and Cress.* III. ii. 24: 'She does so blush, and fetches her wind so short, as if she were frayed with a sprite.' J. HASTINGS.

FRECKLE.—In Lv 13^{39} Tindale uses this word as tr^n of Heb. *bôhaḳ*, which occurs only in this place: 'Yf there appeare in their flesh a glisterynge white somewhat blackesh, then it is but frekels growen upp in the skynne: and he is cleane.' Wyclif's tr^n (1382) was 'a wemme of whijt colour,' (1388) 'a spotte of whijt colour' (after Vulg. *macula coloris candidi*, whence also Douay, 'a spotte of white colour'). Cov. preferred 'a whyte scabbe,' Gen. 'a white spot.' But the Bishops' restored 'freckle' (in sing. 'a freckle'), and that was accepted by AV, 'a freckled spot.' RV prefers 'a tetter,' for the Heb. means more than we now understand by 'freckle,' though that word formerly described an eruption on the skin, as in Whitehead, *Goat's Beard*—

> 'The freckles, blotches, and parch'd skins,
> The worms, which, like black-headed pins,
> Peep through the damask cheek, or rise
> On noses bloated out of size,
> Are things which females ought to dread.'

The word occurs also in Preface to AV 1611, 'A man may be counted a vertuous man, though hee haue made many slips in his life (els, there were none vertuous, for *in many things we offend all*), also a comely man and louely, though hee haue some warts vpon his hand, yea, not onely freakles vpon his face, but also skarres'—where also the word probably means more than it does now. See TETTER. J. HASTINGS.

FREE, FREEDOM, FREELY.—The adj. *free* 'has been a chief heirloom from Saxon times, and has made a figure in all stages of the national story. Perhaps no other Saxon adj. is comparable for length and variety of career. Originally meaning lordly, noble, gentle, it has with each change of the national aim so changed its usage as still to take a prominent place. In the growth of the municipal bodies the privileged members were designated *free-men*; in the constitutional struggles it managed to represent the idea of liberty; and in these latter days, when social equality is the universal pretension, it signifies the manners thereon attendant in the modern coupling *free and easy*.'—Earle, *Philology of the Eng. Tongue*^{5}, 413.

The most modern meaning to be found in AV is also the most common, and it may be best to begin with that and work backwards.

1. *At liberty, not fettered*, whether physically, as Milton, *Samson Agonistes*, 1235—

> 'My heels are fetter'd, but my fist is free';

or morally, as Locke, *Human Underst.* II. xxi. 8, 'So far as a man has a power to think or not to think, to move or not to move, according to the preference or direction of his own mind, so far is a man free.' So Job 3^{19} 'The small and great are there; and the servant is free from his master' (חָפְשִׁי, the common Heb. word), and 1 P 2^{16} 'As free, and not using your liberty for a cloke of maliciousness, but as the servants of God' (ἐλεύθερος, the common Gr. word).

Passages deserving attention are: (1) Ps 88^5 'Free among the dead' (בַּמֵּתִים חָפְשִׁי, RV 'cast off among the dead,' RVm 'cast away'). Hitzig, Ewald, and others tr. 'among the dead is my couch' (taking חָפְשִׁי from חֹפֶשׁ, something spread, a couch, after the doubtful occurrence in Ezk 27^{20}); but most edd. now, as AV or RV (taking the word as the adj. usually tr^d 'free'). Cheyne in 'Parchment' *Psalms* (1884) gives, 'I am one turned adrift among the dead'; but in *Book of Psalms* (1888), 'I am a freedman among the dead,' remarking there, 'The psalmist alludes to the grim eulogy of death in his favourite poem Job 3^{19} [see above]. But he gives a new turn to the phrase. Unlike Job, he regards such freedom as the reverse of a benefit'—which Kirkpatrick describes as 'a far-fetched interpretation.' There is no question, however, that the phrase recalls Job 3^{19} to our minds, and yet that the word is used here, and here only, in a bad sense. It means either separated from human friendship, or more probably from divine protection. Delitzsch's interpretation, *set free, discharged*, from the responsibilities of life, like Lat. *defunctus*, is less appropriate to the context. The cognate subst. חָפְשִׁית [חפשות] is used in 2 K 15^5=2 Ch 26^{21} of the *separate* house or lazaretto to which Uzziah was confined. (2) Ac 22^{28} 'And Paul said, But I was *free* born.' The Gr. is simply Ἐγὼ δὲ καὶ γεγέννημαι, 'But I was even born'; the word to be supplied is, however, Ῥωμαῖος, 'Roman,' from the previous verse: so RV 'But I am a Roman born.'

RV adds Is 45^{13} 'he shall let my exiles go free' for AV 'let go my captives' (יְשַׁלֵּחַ).

2. *Unhindered, unimpeded*, as Shaks. *Love's Labour's Lost*, V. ii. 732, 'For mine own part, I breathe free breath.' So 1 Es 4^{53} 'And that all they that went from Babylon to build the city should have free liberty' (ὑπάρχειν τὴν ἐλευθερίαν, RV 'should have their freedom'); 2 Th 3^1 'Pray for us, that the word of the Lord may have free course' (τρέχῃ, lit. 'may run,' as AVm and RV). The AV tr^n is a combination of Tind. 'maye have fre passage' and Rhem. 'may have course'; RV is a return to Wyclif's 'that the word of God renne.' RV adds with this sense 1 Co 7^{39} 'If the husband be dead, she is free to be married to whom she will' (ἐλευθέρα, AV 'at liberty').

3. *Exempt*, Dt 24^5 'When a man hath taken a new wife he shall not go out to war, neither shall he be charged with any business; but he shall be free at home one year' (נָקִי), *i.e.* exempt from public duties. 1 Ch 9^{33} 'the Levites, who remaining in the chambers were free' (פְּטוּרִים, RV 'free from service'); 1 Mac 15^7 'And as concerning Jerusalem and the sanctuary, let them be free' (ἐλεύθερα, *sc.* from tribute); Mt 15^6=Mk 7^{11} 'he shall be free'—words added *in italics* to complete the sense without equivalent in Greek; they are omitted by RV; Mt 17^{26} 'Then are the children free.' RV adds He 13^5 'Be ye free from the love of money' (ἀφιλάργυρος ὁ τρόπος, AV 'Let your conversation be without covetousness'; RVm 'Let your turn of mind be free': Vaughan is more modern and literal, 'Let your disposition be unavaricious').

4. *Acquitted* after trial, often equivalent to *innocent*, as Shaks. *Hamlet*, II. ii. 590—

> 'He would drown the stage with tears,
> And cleave the general ear with horrid speech;
> Make mad the guilty, and appal the free,
> Confound the ignorant; and amaze, indeed,
> The very faculty of eyes and ears.'

In AV, Nu $5^{19.\,28.\,31\,\mathrm{RV}}$; and the verb Ro 6^7 'For he that is dead is freed from sin' (δεδικαίωται, RV 'is justified'), *i.e.* is acquitted from the guilt of sin.

5. *Voluntary, gratuitous*, Ex 21^{11} 'then shall she go out free without money' (חִנָּם, RV 'for nothing'). So the phrase 'free gift,' 1 Es 2^9 (εὐχαῖς, *i.e.* votive offerings, RV 'gifts that were vowed'); Jth 4^{14} (ἑκούσια δόματα), 1 Mac 10^{39} (δόμα, RV 'a gift'); Ro $5^{15.\,16.\,18}$ (χάρισμα [not in v.^{18}, but understood there also], a word which is almost peculiar to St. Paul, occurring elsewhere only in 1 P 4^{10}, and 'is used of those special endowments which come to every Christian as the result of God's free favour (χάρις) to men, and of the consequent gift of faith'—Sanday-Headlam, *Romans*, p. 358 ff. It is tr^d 'free gift' only in Ro $5^{15.\,16}$, to which RV adds 6^{23}; elsewhere simply 'gift'). So again we find 'free offering' for the usual 'freewill offering' in Ex 36^3, Am 4^5, Jth 16^{18}.

6. *Generous* or even *noble*, the earliest meaning of the word according to Earle (as above), who quotes Shaks. *Troil. and Cress.* IV. v. 139—

> 'I thank thee, Hector:
> Thou art too gentle and too free a man.'

This is Chaucer's meaning also in *Nonne Preestes Tale*, 94—

'For certes, what so any womman seith,
We alle desyren, if it mighte be,
To han housbondes hardy, wyse, and free.'

This sense occurs twice in AV, 2 Ch 29^{31} 'And the congregation brought in sacrifices and thank offerings; and as many as were of a free heart burnt offerings' (RV 'willing'), and Ps 51^{12} 'uphold me with thy free spirit' (RV 'with a free spirit,' Amer. RV and RVm 'willing'; both נָדִיב, which as a subst. means 'prince,' 'noble,' in Pr 25^{7} and elsewhere).

On Ps 51^{12} Earle (*The Psalter of* 1539, p. 290) says, 'So 1535 [Coverdale's Bible] after the Vulg. *et spiritu principali confirma me'*—which, again, is after Sept. πνεύματι ἡγεμονικῷ στήρισόν με. Here there can be no doubt that 'free' was used, not in any of its lower senses, as when it is the equivalent of *liber* as opposed to *servus*; or even in the sense of liberal, bounteous in gifts; but (inclusive perhaps of this latter) with special eye to that higher sense of lordly, noble, generous, princely, royal; which is conspicuous in the best mediæval usage of the word, and which qualified it to represent *principalis* and ἡγεμονικόν. Keble brought this out well—

'With that free Spirit blest,
Who to the contrite can dispense
The princely heart of innocence.'

Keble, it should be added, has also suggested the correct translation. What the psalmist prays for is not, as AV, that he may be upheld by God's free Spirit, but, as RV, that under the influence of the Spirit of God his own spirit may become willing or spontaneous in the right.

Freedom in Ac 22^{28} 'With a great sum obtained I this freedom,' is Roman citizenship (πολιτεία, RV 'citizenship'). See CITIZENSHIP. RV has changed 'liberty' of AV into 'freedom' for Gr. ἐλευθερία in Gal 5$^{1.\,13\,bis}$, 1 P 2^{16}, though retaining 'liberty' for the same Gr. word in Ro 8^{21}, 1 Co 10^{29}, 2 Co 3^{17}, Gal 2^{4}, Ja 1^{25} 2^{12}, 2 P 2^{19}. In every case but the last it is the freedom of those who are not under law but under grace; 'freedom' is therefore the best word, and might have been used throughout. See LIBERTY.

Freely is found in the sense of (1) *unrestrainedly*, as in Lv 14^{53} Wyc. 'And whanne he had left the sparewe to fle in to the feeld frely'; and in AV Gn 2^{16} 'Of every tree of the garden thou mayest freely eat' (אָכֹל תֹּאכֵל, lit. 'eating thou shalt eat,' as AVm; so 1 S 14^{30}); Ad. Est 16^{19} 'that the Jews may freely live after their own laws' (χρῆσθαι, RV 'live'); Ac 2^{29} 'let me freely speak unto you' (ἐξὸν εἰπεῖν μετὰ παρρησίας, RV 'I may say unto you freely'); 26^{26} 'I speak freely' (παρρησιαζόμενος λαλῶ); to which RV adds Jn 2^{10} 'when men have drunk freely' (ὅταν μεθυσθῶσιν), lit. 'when they are drunken,' as Lk 12^{45}, and as Vulg. here 'cum inebriati fuerint.' Wyclif has 'whanne men ben fulfillid' (1382 'filled'); Tind. 'when men be dronke,' so Matthew's and the Great Bibles; Cov. 'whan they are dronken'; but the Geneva preferred 'when men have wel droncke,' and it was followed by Bish., Rhem., and AV. RV is a compromise between the two older translations.

(2) *For nothing, gratuitously:* the most common meaning. It occurs in Nu 11^{5} 'We remember the fish, which we did eat in Egypt freely' (חִנָּם 'gratis,' or as RV 'for nought'). 'Freely' was Wyclif's tr^{n} [1388, but 1382 'gladly'], and he no doubt used the word in the sense of 'for nothing' after LXX δωρεάν and especially Vulg. *gratis*, which gave the Douay 'gratis'; 'freely' is the Bishops' word also; but all others 'for nought' (Tind., Rog.), or 'for naught' (Cov., Gen.). Also in 1 Mac 10^{33} 'I freely set at liberty every one of the Jews' (ἀφίημι ἐλευθέραν δωρεάν, RV 'I set at liberty without price'); cf. Lk 4^{18} Tind. 'frely to set at liberty them that are bruised' (an attempt to express the pregnant phrase ἀποστεῖλαι τεθραυσμένους ἐν ἀφέσει, lit. 'to send away the shattered [so as to be] in release'). And in NT δωρεάν 'as a gift,' from δωρεά, a gift, is so rendered in Mt 10$^{8\,bis}$, Ro 3^{24}, 2 Co 11^{7}, Rev 21^{6} 22^{17}, where the prominent thought is the *grace* (gratis) of the giver, as Mt 10^{8} 'freely ye received, freely give.' And this is no doubt the meaning in Ro 8^{32} and 1 Co 2^{12} where χαρίζομαι is tr^{d} 'freely give.' Illustrations are Ex 21^{11} Wyc. 'sche schal go out freli without money' (AV 'free,' RV 'for nothing'); Is 52^{5} Cov. 'my people is frely caried awaye' (EV 'for nought'); and Shaks. *Winter's Tale*, I. i. 19, 'You pay a great deal too dear for what's given freely.'

(3) *Voluntarily, spontaneously*, approaching the meaning of 'generous,' 'noble' given last for 'free': Ps 54^{6} 'I will freely sacrifice unto thee' (בִּנְדָבָה, RV 'with a freewill offering,' after most commentators, but Cheyne prefers 'with a free will' both here and at Nu 15^{3}); Hos 14^{4} 'I will heal their backsliding, I will love them freely' (נְדָבָה, LXX ὁμολόγως, Vulg. *spontanee*, Wyc. [1382] 'of my free will,' [1388] 'wilfuli'; Rog. 'wyth al my heart,' Gen. 'frely,' Dou. 'voluntarily,' Cheyne 'spontaneously'). And this is the meaning of 'freely' in Ezr 2^{68} (RV 'willingly') 7^{15}, where it is used to bring out the force of the Heb. verb. This is Milton's meaning (*PL* viii. 443) where God addresses Adam—

'My image, not imparted to the brute;
Whose fellowship therefore, unmeet for thee,
Good reason was thou freely shouldst dislike.'

Freeman: 1 Es 3^{19} (ἐλεύθερος); 1 Co 7^{22} 'the Lord's freeman' (ἀπελεύθερος, RV 'freedman'), so as to bring out the spiritual emancipation and to distinguish from the natural 'freeman' (ἐλεύθερος) following. RV adds Col 3^{11} (ἐλεύθερος, AV 'free').

Freewoman: 1 Mac 2^{11}, Gal 4$^{22.\,23.\,30}$, all ἐλευθέρα, of the natural condition, and directly opposed to 'bond-slave' (1 Mac) or 'bondmaid' (Gal). RV adds Gal 4^{31}.

J. HASTINGS.

FREEWILL OFFERING.—See SACRIFICE.

FREQUENT.—In the sense of crowded, well-attended, 'frequent' is common in writers of the 17th cent. and earlier, as a 'frequent assembly'—Sanderson, *Works*, ii. 242, 258, a 'frequent college'; 'the College was sa frequent as the roumes war nocht able to receaue them'—Melvill, *Diary*, 50. The sense in which the word occurs in AV is akin to this, but more exactly *well-acquainted, conversant*: 2 Co 11^{23} 'in prisons more frequent,' exactly as Knox, *Works*, iv. 139, 'Be frequent in the prophetis and in the epistillis of St. Paul.' The Gr. is περισσοτέρως, and RV follows Bish. and Rhem. 'more abundantly,' the other VSS having 'more plenteously.' Amer. RV and RVm give 'frequent' in 1 S 3^{1} for 'open' of AV, 'the word of the Lord was precious in those days; there was no open vision' (אֵין חָזוֹן נִפְרָץ).

FRET.—To 'fret' is primarily to eat up, consume (*for*, intensive prefix, and *etan* to eat, like Ger. *ver-essen*), as in Alisaunder of Macedoine (E.E.T.S.) i. 1159—

'Fayre handes and feete freaten too the bonne.'

But a very early meaning and very common is to *eat into, gnaw, corrode*, as of a disease, and the word being used in this sense by Tind. in Lv 13$^{51.\,52.\,55}$ 14^{44}, it was retained in AV. The uses in AV, then, are—

1. Transitively: 1. Literally to *eat away, corrode*, Lv 13$^{51.\,52}$ 14^{44} 'a fretting leprosy' (צָרַעַת מַמְאֶרֶת), and 13^{55} 'it is fret* inward' (פְּחֶתֶת). So

---

* It will be observed that in Lv 13^{55} 'it is fret inward,' *fret* is the past ptcp. Cf. More, *Utopia*, i. (Lumby, p. 46, l. 14), 'For he (and that no marveile) beynge so touched on the quicke, and hit on the gaule, so fret, so fumed, and chafed at it, and was in such a rage that he could not refraine himselfe from chidinge, skolding, railing, and reviling.' Similar forms are 'lift' Gn 7^{17}, Lk 16^{23}; 'whet' Ps 64^{3} Pr. Bk.

Fuller says of the death of Godfrey (*Holy Warre*, Bk ii. ch. 6, p. 51), 'It may be the plague took him out of the hands of that lingring disease, and quickly cut off what that had been long in fretting'; and Shaks. makes Lear in the bitterness of his soul say of his daughter Goneril (*Lear*, I. iv. 276)—

> 'If she must teem,
> Create her child of spleen; that it may live
> And be a thwart disnatured torment to her!
> Let it stamp wrinkles in her brow of youth;
> With cadent tears fret channels in her cheeks.'

The tr^{n} of Ps 39^{12} in the Great Bible of 1539 was 'When thou with rebukes dost chasten man for sinne, thou makest his bewtye to consume awaye, like as it were a mothe.' In 1540 the explanatory phrase 'fretting a garment' was added, which being thereafter adopted into the text appears in the Pr. Bk. version. Cf. Bacon, *Advancement of Learning*, II. ii. 5, 'As for the corruptions and moths of history, which are epitomes, the use of them deserveth to be banished, as all men of sound judgment have confessed, as those that have fretted and corroded the sound bodies of many excellent histories, and wrought them into base and unprofitable dregs.'

2. Figuratively, in two senses. (1) To *vex*. Tindale says (*Expos.*, Parker Soc. p. 31), 'And the nature of salt is to bite, fret, and make smart'; whence Adams passes to the fig. sense (*II Peter*, p. 47 on 1^{4}) 'Do we cut, and fret, and trouble you: remember we are salt, the sharper the better.' So in AV, Ezk 16^{43} 'Because thou hast not remembered the days of thy youth, but hast fretted me in all these things' (וַתִּרְגְּזִי־לִי; Amer. RV 'raged against'). (2) To *disquiet oneself*, Ps 37^{1} 'Fret not thyself because of evildoers' (אַל־תִּתְחַר, so $37^{7.\,8}$, Pr 24^{19}); Is 8^{21} 'when they shall be hungry they shall fret themselves' (הִתְקַצַּף, Del. 'it is roused to anger'; Cheyne, 'he shall be deeply angered'; Skinner, 'he shall break out in anger').

The AV tr^{n} is partly from the Gen. 'he shal euen freat him self,' and partly from the Bish. 'they will bee out of patience.' 'He is out of pacience' is Coverdale's; Wyc. [1382] 'it shal wrathen,' [1388] 'it schal be wrooth,' and the Douay 'he will be angrie,' are both nearer the meaning of the verb, being both after the Vulg. 'irascetur'; but both miss the force of the special form [Hithpael], which is found only here. The LXX gives λυπηθήσεσθε; Luther, 'werden sie zürnen.' A very close parallel occurs in Sir Thomas Wiat (Skeat's *Specimens*, p. 225)—

> 'And whilst they claspe their lustes in armes a-crosse,
> Graunt them, good Lord, as thou maist of thy might,
> To freate inward, for losyng such a losse.'

2. Intransitively, *be irritable*, *chafe*, *grieve*, the modern meaning: 1 S 1^{6} 'And her adversary also provoked her sore, for to make her fret' (בַּעֲבוּר הַרְּעִמָהּ), and Pr 19^{3} 'his heart fretteth against the LORD' (יִזְעַף). So Shaks. *Jul. Cæs.* IV. iii. 42—

> 'Fret till your proud heart break.'

J. HASTINGS.

FRIEND.—Heb. history has supplied the world with an example of true friendship, as romantic and beautiful as any in Grecian story; and Heb. literature, though it contains no treatise *de Amicitiâ*, abounds in proverbs, setting forth, as eloquently as Laelius himself, the nature of this fine human relation, the claims which it makes, and the blessings which it brings. If Jonathan and David are the Pylades and Orestes of the Bible, the pithy sayings of the *Ḥokhma* Lit. contain the philosophy of friendship. A genuine attachment is possible only between the virtuous—this is implied in all the directions given in the Book of Pr to the young man for his guidance in life, and expressly indicated in the warnings of 13^{20} 28^{7}, where the word (רֹעֶה) rendered *companion* is that elsewhere often translated *friend*. That even natural ties cannot compare with the bond of friendship for strength and endurance, is said, not without a touch of satire, in 18^{24} 'He that maketh many friends doeth it to his own destruction; but there is a friend that sticketh closer than a brother.' David, in his lament, describes the affection of Jonathan for him as 'passing the love of women.' That, as Lord Bacon puts it in his Essay, the principal fruits of friendship are healthful and sovereign, both for the affections and the understanding, comes out in the striking proverb (27^{17}), 'Iron sharpeneth iron; so a man sharpeneth the countenance of his friend'; while the anguish inflicted on a true heart when one trusted and loved proves false or unkind, is exhibited in a concrete form in the behaviour of Job's three friends, and in many a passionate cry wrung from that patriarch (Job $6^{14.\,27}$ 19^{21}), or from a psalmist under similar provocation (Ps 41^{9}).

Among the duties of friendship Cicero places high that of frankness in reproof and counsel; and this could not fail of characteristic recognition in the proverbs of Israel, 'Faithful are the wounds of a friend; but the kisses of an enemy are deceitful' (Pr 27^{6}), while in 17^{9} are indicated the tact and delicacy necessary in the discharge of this duty.

Pr 27^{10} is the Heb. equivalent for the saying that 'old friends are best'; and that poverty and trouble are, like length of time, tests of the genuineness of friendly profession, in contrast with the pretended attachment of flatterers and parasites, is the theme of proverbs like 14^{20} $19^{4.\,7}$. True friends are rare with the great and powerful, yet, as Bacon says, they set a higher rate than others on the rare possession, and the Bible gives many instances of the confidence of intimacy between kings and subjects, *e.g.* David and Hushai; prophets and apostles and their disciples, *e.g.* Elijah and Elisha, Paul and Timothy.

But, while the Bible presents an ideal of friendship equal to that demanded by other literature, it does not leave it there. It elevates it in a manner all its own to a transcendent height. It presents it, not only as a human relationship, but one possible between God and man. Abraham was the friend of God (2 Ch 20^{7}, Is 41^{8}, Ja 2^{23}). With Moses, too, J" spake 'face to face as a man speaketh unto his friend' (Ex 33^{11}), and the Son of God used the name *friend* in preference to *servant*, not only of the apostles, but also of all for whom He laid down His life (Jn $15^{13.\,14.\,15}$).

There are nine Heb. words or phrases rendered *friend* in the AV. Those of most frequent occurrence are connected with the roots אָהֵב, expressing *affection*, and רָעָה *sociability*, the most common being רֵעַ, rendered 41 times *friend*, 104 times *neighbour*, and sometimes *companion* and *fellow*. The most usual equivalents in LXX and Vulg. are φίλος and *amicus*. As a term of salutation the vocative ἑταῖρε is three times in NT rendered *friend* (Mt 20^{13} 22^{12} 26^{50}).

Of course the term *friends* sometimes implies no more than political associates or allies, *e.g.* 1 S 30^{26}, Jer $20^{4.\,6}$.

A. S. AGLEN.

FRINGES (Heb. צִיצִית *ẓiẓîth*).—In the time of our Lord, the Jews, especially those of the Pharisaic party (cf. esp. Mt 23^{5}), attached the greatest importance to three material reminders or 'sensible signs' of their obligations under the Law. These were the *ẓiẓîth* (EV 'fringes'), the *tĕphillîn* or phylacteries (wh. see), and the *mĕzûzah* (Dt 6^{9} 11^{20}) on the doorpost. Of these the first-named was the sign to which the greatest virtue was ascribed. Its observance is first required by the law of Dt (22^{12}), where we read 'Twisted cords (גְּדִלִים, LXX στρεπτά: AV, RV incorrectly 'fringes,' but RVm 'twisted threads') shalt thou make thee upon the four corners (*'arba' kanphôth*, AV 'four quarters,' RV 'four borders') of thy mantle (lit. 'covering' as Ex 22^{27} [Heb. ^{26}], see below) wherewith thou coverest thyself.' The object here termed *gĕdîlîm* acquired later the special designation *ẓiẓîth* צִיצִית,—it is so rendered by the Targum *Jerus.* i. (pseudo-

Jonathan) in Dt 22^{12},—for there can be no doubt that we meet the same enactment in an expanded form in the priestly legislation: 'And the LORD spake unto Moses saying, Speak unto the children of Israel, and bid them that they make them fringes * in the borders (so AV, RV; more correctly 'tassels upon the corners'; cf. RVm) of their garments throughout their generations, and that they put upon the fringe of each border (*i.e.* the tassel of each corner) a cord of blue' (Nu $15^{37.38}$). There can be no question that the interpretation suggested by the EV, that a fringe attached to the hem of the garment is intended, is quite erroneous. We have only to turn to Hag 2^{12}, where a still common Eastern practice is referred to, to see that *kānāph* applied to an article of dress can only mean 'corner' or loose flowing end of a garment.† Now, the Hebrews seem to have worn as an outer garment a large piece of cloth of the shape of a Scotch plaid (generally called *simlah*, see DRESS), which also served as a covering (כְּסוּת) by night (Ex 22^{26}).‡ To the four corners of this garment, then, the 'twisted cords' of Dt were clearly intended to be fastened. The more extended enactment of the Priestly Code, however, evidently contemplates a more elaborate arrangement of a tassel attached to each corner by a cord of blue. To these tassels the Greek translators give the name κράσπεδα, the term exclusively used by the NT writers. It has even found its way into Targ. Onk. (כרוספדין) (cf. Dalm. *Gram. Aram.* 149) in both passages from the Pentateuch. The *simlah* was worn like the Greek *himation*, which is its NT equivalent, the loose end being thrown over the left shoulder. It was the *ẓiẓîth* attached to this corner (τ. κρασπέδου τ. ἱματίου) that was reached with comparative ease by the woman with the issue of blood approaching our Lord in the crowd from behind (Mt 9^{20}, Lk 8^{44}).

When we attempt to go behind the prescription of the Torah, there is reason to believe that we have here an ancient custom,§ perhaps with originally magical or superstitious associations (see W. R. Smith, *RS* 416, note; Nowack, *Heb. Arch.* ii. 123) taken up and impressed with a new significance by the Hebrew legislation. Even so late as NT times a special virtue was supposed to be attached to the 'tassels on the four corners' (Mt 14^{36}, Mk 6^{56}; cf. the special sanctity of the four horns of the altar, Lv $4^{7ff.}$, 1 K $1^{50f.}$). To the more spiritually minded, however, they were, as they were intended to be, continual reminders of the obligation resting on J″'s people to walk in His Law, and to keep all His commandments (see esp. Nu $15^{39.40}$).

With the change in the fashion of the outer garments of the Jews, and with the increasing frequency and cruelty of heathen and Christian persecution, the Jews gradually ceased to wear the tassels in the way prescribed by the original legislation. A special article of clothing was devised of the shape of a modern chest-protector—one part covering the breast, the other the back—with the necessary aperture in the centre for the head to pass through. This garment, to which the names of *ṭallith* (טַלִּית) and *'arba' kanphôth* (Dt 22^{12}) were given, had the tassels attached to its four corners, and was worn as an undergarment, a practice still observed by all orthodox Jews. The more zealous, however, wear it so that one or more of the tassels may be visible. The *ṭallith* now described came, later, to be known as *ṭallith ḳaṭôn* or 'small ṭallith,' to distinguish it from the *ṭallith gadôl*, 'large ṭallith' or prayer-shawl. The latter more nearly corresponds in shape to the ancient *simlah*, being a quadrangular piece of white woollen (or silken) cloth to which the tassels are attached in the manner about to be described. It is worn universally by the Jews during the daily service in the synagogue, either thrown over the head or round the shoulders, but always so that the tassels shall be visible in front. Special prayers are said before and during the act of adjusting the *ṭallith*.

The rabbinical prescriptions with regard to the צִיצִית or tassels have been elaborated with characteristic detail, and fill many pages of the Jewish codes (see literature at end of art.). Only a very few of these need be cited here. From a reference in the Mishna (*Menakh.* iv. 1) it would appear that the former practice of making the *ẓiẓîth* by twisting three white threads with one of blue (or blue-purple) was falling into desuetude, perhaps owing to the increasing difficulty of procuring the expensive dye required; and that it was henceforth permissible to use white threads alone so long as the numbers were complete (see Levy, *Wörterb. s. voc.* עכב). Somewhat later we learn from the curious, and in part obscure, paraphrase of Nu 15^{38} in the Targum *Jerus.* i. (pseudo-Jonathan) apparently based on Talmudic decision, that the threads must be spun expressly for the purpose, not made of the refuse of the loom, and that they must be tied with five knots (קיטרין). According to the prescription still in force, it is required that four (white) threads (חוטין) shall be taken, of which one—technically called the *shammesh* or 'servant'—shall be considerably longer than the rest. A small hole or eyelet (נקב) is made in each corner of the *ṭallith* three thumb-breadths (גודלים) from each margin; through this the four threads are drawn and the ends brought together. A double knot is tied close to the margin of the *ṭallith*, the *shammesh* is then twisted tightly 9 times round the remaining 7 threads and another double knot is tied; then round 9 times and a knot; then round 11 times and a knot; and finally round 13 times and a knot, and the *ẓiẓîth* is complete. Various mystic significations are attached to the number of knots and twistings. The most interesting, perhaps, is that which deduces from the whole a symbol of the complete Torah: thus the numerical value of the letters of the word ציצית is 90+10+90+10+400=600, which with the 8 threads and the 5 knots makes a total of 613, the exact number, according to rabbinic calculation, of the positive (248) and negative (365) precepts of the Torah. This has led to the exaggerated statement that the wearing of the *ẓiẓîth* is of equal merit with the observance of the whole Law.

Males only are to wear the *ṭallith* (so already Targum pseudo-Jonathan on Dt 22^{5}). This is compulsory after the 13th year, when the Jewish boy becomes a *bar-mizvah*, but the small *ṭallith* may be worn earlier. The size of the latter is said by Maimonides to be such that a boy, just able to walk alone, shall be completely covered by it. It is not necessary to wear the *ṭallith* at night; this is inferred from the words of the Law, 'that ye may *look* upon it and remember' (Nu 15^{39}), an injunction impossible of fulfilment in the darkness of the night.* As an illustration of the importance attached to the wearing of the *ẓiẓîth*, the following anecdote is frequently quoted. The son of a famous Rabbi was asked which of the commandments above all others his father had especially charged him to keep. His reply was: 'The law concerning the *ẓiẓîth.* On descending a ladder my father stepped on one of the threads and tore it off. He refused to move from the spot till it was replaced' (*Shabb.* 118*b*). See also DRESS.

---

* The MT has here צִיצִת in the singular, but probably we ought to read with the Samaritan צִיצִיֹת; cf. LXX κράσπεδα.

† Cf. 1 S 15^{27} $24^{4.5.11}$ where the LXX renders כָּנָף by the exact terms τὸ πτερύγιον τῆς διπλοΐδος, for which see Jevons and Gardner, *Manual of Gr. Antiq.* 52.

‡ That one and the same garment is intended in Dt and Nu is confirmed by the Targum of Onkelos, which in both passages has כְּסוּת.

§ The practice of wearing tassels was known to the ancient Persians, as appears from the monuments of Persepolis.

* This question was one of the differences between the schools of Hillel and Shammai (*Ediyyoth*, iv. 10).

LITERATURE.—The rabbinical prescriptions are found in the authoritative codes of Maimonides (*Yad Ha-ḥazakah, Hilkoth Ẓiẓîth*) and Joseph Caro (*Shulḥan 'Aruk Yoré De'a*, ch. viii.-xxiv.). A convenient compendium of the latter work is the ספר חיי אדם על־שלחן ערוך אורח חיים, Wilna, 1888 (rules concerning the *ẓiẓîth*, pp. 33–38). Also in the tractate *Ẓiẓîth* in Raph. Kirchheim, *Septem libri Talmudici parvi Hierosolymitani*, Frankfort, 1851; Hiller, *De vestibus fimbriatis Hebræorum*, in Ugolini *Thesaurus*, vol. xxi. More easily accessible is Bodenschatz, *Kirchliche Verfassung d. heutigen Juden*, 1748, pt. iv. pp. 9–15; Buxtorf, *Synagoga Judaica*, pp. 160-170. Art. 'Fringes' in Kitto's *Biblical Cyclopædia*^{3}. See also Driver on Dt 22^{12}.

A. R. S. KENNEDY.

FROCK.—'A linen frock' is named in Sir 40^4 as the dress of the poor in contrast to the 'purple' of the rich (*ὠμόλινον*, lit. 'raw linen'; RV 'a hempen frock'; the word occurs only here in bibl. Greek). The 'frock' was once the coverall of the English labourer, and still remains as 'smock-frock.' See DRESS.

FROG (צְפַרְדֵּעַ *ẓĕphardēaʿ*, *βάτραχος*, *rana*).—An amphibious animal, noted in two connexions in the Bible. 1. As one of the plagues of Egypt (Ex 8^{2-14}, Ps 78^{45} etc.). 2. As a form assumed by unclean spirits (Rev $16^{13. 14}$). It is also mentioned in Wis 19^{10}. The frog referred to in the story of the plagues is the *Ranula esculenta*, L., the *edible frog*. It is found in all stagnant waters in the Holy Land. The Arab. name for the frog, *dufdaʿ*, bears a strong resemblance to the Hebrew.

G. E. POST.

FROM.—Following the Gen. Bible, 'from' is used in 1 Es 3^{23} as equivalent to 'away from': 'But when they are from the wine, they remember not what they have done.' This is the only occurrence of a meaning that is common in Shaks. Thus *Macbeth*, III. i. 132—

> 'For 't must be done to-night,
> And something from the palace';

and *Jul. Cæs.* I. iii. 35—

> 'But men may construe things after their fashion,
> Clean from the purpose of the things themselves.'

FRONTLETS.—See PHYLACTERIES.

FROWARD.—Froward is the Northern form of 'fromward,' as we have 'to and fro' for 'to and from.' Cf. Sidney, *Arcadia*, ii., 'As cheerfully going towards, as Pyrocles went frowardly fromward his death.' Froward is thus the opposite of 'toward,' and is used by Spenser (*FQ* VI. x. 24) in the literal sense of *turned from*—

> 'And eeke them selves so in their daunce they bore,
> That two of them still froward seem'd to bee,
> But one still towards shew'd her selfe afore.'

In AV 'froward' is always figurative, *turned from* in sympathy, *opposed, hostile*, as in Ps 18^{26} 'with the froward thou wilt show thyself froward' (עִם־עִקֵּשׁ תִּתְפַּתָּל, RV 'with the perverse thou wilt show thyself froward'). Then, by an easy transition, that which goes the wrong way to accomplish its ends, twisted, tortuous, not straightforward. Thus Dt 32^5 Tind., 'The frowarde and overthwarte generation hath marred them selues to himward' (עִקֵּשׁ), EV 'perverse,' which does not adequately express the sense, says Driver. Tindale's 'froward' is better than 'perverse,' for its meaning is just what Driver gives as the meaning of the Heb. here, 'the opposite of what is sincere, straightforward, and frank,' denoting 'a character which pursues devious and questionable courses for the purpose of compassing its ends.' Thus Latimer (*Sermons before Edw. VI.*, Arber's ed. p. 115), 'The herte of man is naughti, a croked, and a froward pece of worke.' Still, 'froward' was frequently used in the sense of obstinate, as T. Lever, *Sermons* (1550, Arber's ed. p. 103), 'The father draweth not by force violentlye them that be stubborne and frowarde, but by loue them that be gentyll, and come wyllyngly.' And the union of the crooked with the obstinate gives perversity. RV prefers 'perverse' in 2 S 22^{27}=Ps 18^{26} (as above), Pr 2^{15} (not Amer. RV) 3^{32} 11^{20}; and Amer. RV further in Dt 32^{20}, Pr 2^{12} 6^{12} 8^{13} 10^{31} $16^{28. 30}$ 22^5. RV gives 'crooked' in Pr 8^8 21^8, and Amer. RV 'wayward' in Pr 2^{15} 4^{24} 17^{20}, and 'cunning' in Job 5^{13}. But 'froward' is introduced into 2 S 22^{27} (AV 'unsavoury'), Pr 23^{33} (AV 'perverse'). It will be observed that the ideas represented by this word refer to conduct, especially in public life; it is therefore of most frequent occurrence in Pr, where 'froward' is found 14 times, elsewhere only 7 times.

Wyclif rarely uses the word; not in any of the places where it occurs in AV, his words being 'shrewd,' 'perverted,' or 'wayward.' But it is found in Dt 21^{18} (1382), 'If a man gete a rebel sone, and a fraward (1388 'overthewert'), that herith not the fadres and modres heest'; and as a various reading in 2 Ti 3^4. The introduction of the word so freely into Pr was made by Rogers and Coverdale. Its single occurrence in NT is from Tindale, 1 P 2^{18} 'Servauntes obey youre masters with all feare, not only yf they be good and courteous; but also though they be frowarde' (1526 and 1534). The Gr. is *σκολιός*, which means *tortuous* as of a river, and then ethically *not straightforward*. Here, says Salmond, it means not exactly 'capricious' (as Luther), or 'wayward' (as Rhem.), or even 'froward' (as Tind. Cov. Rog. Cran. Gen. Bish. AV, RV), but 'harsh' or 'perverse,' the disposition that lacks the reasonable and considerate, and makes a tortuous use of the lawful.

The adv. **frowardly** occurs only Is 57^{17} 'and he went on frowardly in the way of his heart' (וַיֵּלֶךְ שׁוֹבָב, lit. 'he walked turning away,' as AVm and RVm; Amer. RV 'backsliding'). For the Eng. word cf. Knox, *Hist.* 137, 'Then began she to frowne, and to look frowardly to all such as she knew did favour the Gospel of Jesus Christ.'

Frowardness is used only in Pr 2^{14} 6^{14} 10^{32}, תַּהְפֻּכוֹת, a word which is found only in the plu. and means lit. 'turnings about,' *i.e.* 'lines of action, or modes of speech, adopted for the sake of escaping unpleasant realities, or evading the truth, *perversions* of truth or right'—Driver on Dt 32^{20}; see his note. The word is trd by the adj. 'froward' in Pr 8^{13} ('the froward mouth,' lit. 'the mouth of evasions') 10^{31} 16^{28}; by 'very froward' in Dt 32^{20}; and by 'froward things' in Pr 2^{12} 16^{30}. Cf. Barlowe, *Dialoge* (Lunn's ed. p. 106), 'And no meruell, thoughe Saull fared the worse for hys people, wher as Moyses the most faythfull seruaunte of god was partely by their frowardnes debarred fro the pleasaunt lande of behest.'

J. HASTINGS.

FRUIT.—Palestine is always described as a fruitful land (Ps 107^{34}, Is 5^1). The number of 'kindly fruits of the earth' produced here is very large. The great diversity of climate makes possible the cultivation of plants from almost every quarter of the globe. The following list of the products of the soil may be taken as an index, not exhaustive but illustrative of the capabilities of this 'land of promise':—Fitches (Is $28^{25. 27}$), opium poppy, mustard, cabbage, cauliflower, turnip, cress, radish, flax, sorrel, rue, vine, Indian fig, jujube, lemon, orange, citron, lupine, beans, horsebeans, peas, lentils, chick peas, mâsh (*Vigna Nilotica*, L.), carob, strawberry, blackberry, peach, plum, almond, apricot, nectarine, apple, quince, medlar, Photinia Japonica, hawthorn, pomegranate, myrtle, watermelon, cantelope, squash, pumpkin, cucumber, coriander, dill, fennel, caraway, anise, celery, parsley, parsnip, carrot, carthamus (bastard saffron), chicory, lettuce, artichokes, potato, tobacco, tomato, eggplant, henbane, nightshade, castor oil, sesame, olive, fig, sycomore, mulberry, hemp, walnut, edible pine, saffron, banana, date, colocasia, maize, wheat, barley, sorghum, sugar cane. G. E. POST.

FRUIT.—The figurative, and indeed all the literal uses of the word 'fruit,' except the primary one of the fruit of fruit-bearing trees, are suggested by the Hebrew idioms, and belong to what may be called biblical English. Thus it is used of the general products of the earth, Ex 23^{10} 'And six years thou shalt sow thy land, and shalt gather in the fruits thereof' (תְּבוּאָה, RV 'increase'). It is also used of the offspring of animals, including man, as Ps 127^{3} 'Lo, children are an heritage of the LORD: and the fruit of the womb is his reward' (פְּרִי, the common word for 'fruit'). In this sense notice La 2^{20} 'Shall the women eat their fruit, and children of a span long?' (פְּרִי).

It has been maintained (*Psalms Chron. Arranged*, pp. 150, 446) that 'fruit' in Ps 72^{16} has this meaning in AV, 'There shall be an handful of corn in the earth upon the top of the mountains; the fruit thereof shall shake like Lebanon' (פְּרִי). This might be true of Wyclif's trn (1388), 'Stidefastnesse schal be in the erthe, in the higheste places of mounteyns; the fruyt therof schal be enhaunsid aboue the Liban'; and more confidently of Coverdale's, 'There shalbe an heape of corne in the earth hye vpon the hilles, his frute shal shake like Libanus,' though the 'his' probably refers to 'corn.' But the Geneva trn is 'An handful of corne shalbe sowen in the earth, euen in the top of the mountaines, and the frute thereof shal shake like the trees of Lebanon: and the children shal florish out of the citie like the grasse of the earth,' with the marg. note, 'Vnder suche a King shalbe moste great plentie, bothe of frute and also of the increase of mankinde.' And there is little doubt that AV followed the Gen. Bible here.

Whether in the *Heb.* 'fruit' refers to the fruit of the earth or of the King's body is another matter. Ewald takes it to be the King's offspring, his posterity, as in Ps 21^{10}; so also Burgess, 'Let His fruit be abundant, on the top of the hills, like (the cedars of) Lebanon,' who compares Ps 92^{12} and Hos 14^{5}. Cheyne refers the 'fruit' to the people, 'May abundance of corn be in the land, upon the top of the mountains may it wave; [and the people]—like Lebanon be its fruit.'

Figuratively four meanings are found: 1. The product of effort, as Pr 31^{31} 'Give her of the fruit of her hands' (פְּרִי); Ro 1^{13} 'I purposed to come unto you, (but was let hitherto,) that I might have some fruit among you also, even as among other Gentiles' (*καρπός*). 2. Benefit, profit, Jn 4^{36} 'And he that reapeth receiveth wages, and gathereth fruit unto life eternal' (*καρπός*, cf. Eng. 'harvest,' the same word philologically). Ro 6^{21} 'What fruit had ye then in those things whereof ye are now ashamed?' (*καρπός*). 3. By a strongly idiomatic Heb. phrase, 'The fruit of the lip,' that is, *praise*, Is 57^{19} 'I create the fruit of the lips' (נִוב, cf. vb. in Pr 10^{31}), an idiom that was accepted into bibl. Gr., He 13^{15} 'By him, therefore, let us offer the sacrifice of praise to God continually, that is, the fruit of our lips giving thanks to his name' (*καρπός* from LXX of Hos $14^{2 [3]}$, פְּרִי for פָּרִים). 4. Of *moral* consequences of action, Is 3^{10} 'the fruit of their doings,' cf. Jer 17^{10} 21^{14} etc. This differs from (1), for it is often undesigned, and from (2), for it is often used of punishment.

J. HASTINGS.

FRUSTRATE.—2 Es 10^{34} 'Forsake me not, lest I die frustrate of my hope' (*ut non frustra moriar*), and Jth 11^{11} 'That my lord be not defeated and frustrate of his purpose' (*ἄπρακτος*). So Hooker, *Eccl. Polity*, I. xi. 4, 'It is an axiom of nature that natural desire cannot utterly be frustrate'; and Knox, *Hist.* 29, 'King Henry frustrate returned to London, and after his indignation declared, began to fortify with men his frontiers toward Scotland.' Such past participles, formed in imitation of the Latin, are common in Elizabethan English. Shaks. uses this form still more boldly as an adj., *Tempest*, III. iii. 10—

> 'The sea mocks
> Our frustrate search on land.'

The meaning is 'defeated,' 'baulked.' The same sense is found with the infin. in Ezr 4^{5} 'Hired counsellors against them to frustrate their purpose' (לְהָפֵר); and with the finite verb in Is 44^{25} '[the LORD] that frustrateth the tokens of the liars' (מֵפֵר, Wyc. [1382], 'voide makende tocnes of deuynoures'; Cov. 'I destroy the tokens of witches'; Del. 'who brings to nought the signs of the lying prophets'). And in the same sense RV adds, Job 5^{12} 'He frustrateth the devices of the crafty' (מֵפֵר, AV 'He disappointeth'). But in Gal 2^{21} the meaning is different, 'I do not frustrate the grace of God' (*ἀθετῶ*, RV 'make void'), *i.e.* not 'baulk,' 'thwart,' or 'disappoint,' but 'nullify,' 'render inoperative,' 'make of no avail or value.' So Elyot, *The Governour*, ii. 385, 'To suche persones as do contemne auncient histories . . . it may be sayd, that in contemnynge histories they frustrate Experience.'

Goodwin, therefore (*Works*, i. pt. 2, p. 205), misses the point when he says, 'It was God's great design to advance grace, and therefore he calls their stepping aside from the doctrine thereof, a frustrating of the grace of God, Gal. ii. ult., which men do by mingling anything with it; it is a frustrating of the grace of God, because it frustrateth the great design of God, for to frustrate is to make void a design.' Dr. Gwynne (*in loc.*) brings out the meaning thus: 'I do not make void the *atoning* grace of God *by seeking to justify myself*; for if righteousness *come* by law, then, *indeed*, Christ died needlessly, *and the grace of God is made of none effect.*' The older versions are inaccurate or inadequate, Wyc. 'cast not awei' (after Vulg. *non abiicio*), so Cov. Rhem.; Tind. 'despyse,' so Rog. Cran.; Gen. better 'abrogate'; Bish. 'reject.' Augustine is right—*non irritam facio.*

J. HASTINGS.

FRYING-PAN.—See FOOD.

FUEL.—The Hebrews indicated fuel by a figure as the '*food* of fire' (Is $9^{5. 19}$ [Heb. $^{4. 18}$] מַאֲכֹלֶת אֵשׁ, EV 'fuel of fire'; Ezk $15^{4. 6}$ 21^{32} אָכְלָה). In ancient as in modern times, wood was no doubt the principal fuel, either in its natural state or prepared as charcoal. There is no sufficient evidence of the use of mineral coal as fuel. With regard to the use of wood as fuel, we may assume that the variety of woods employed for this purpose was as great as it is in Syria to-day (see the list prepared by Post in *PEF St*, 1891, p. 118 ff.). The term עֵצִים (lit. *woods*) is applied equally to the 'sticks' or twigs gathered by individuals (Nu $15^{32. 33}$, 1 K $17^{10. 12}$), and to the faggots or logs prepared by felling and cutting up the trees of the forest (Lv $1^{7ff.}$ 4^{12}). A few of such trees are named in Is 44^{14-16}. Shrubs of every variety were used for the same purpose, such as the *rōthem* (רֹתֶם Ps 120^{4} 'coals of *juniper*,' more correctly as RVm 'coals of *broom*'), a shrub very largely used as fuel by the Arabs of the present day (Palmer, Doughty). Reduced to charcoal (see below), the *rōthem* (Arab. *ritm*) is said to throw out an intense heat. References to thorns (סִירִים, קוֹצִים) as fuel are numerous in Scripture; the *'āṭād* (אָטָד Ps 58^{10} [Eng. ^{9}]), probably the buck-thorn (see THORNS AND THISTLES), is mentioned in particular. The use of chaff, which includes the chopped straw (*tibn*) from the threshing-floor, is likewise referred to (Mt 3^{12}), as also of withered herbage (*χόρτος*, EV 'grass') in general (Mt 6^{30}, Lk 12^{28}).

The Hebrews, as we have remarked above, were familiar with the advantage, as fuel, of wood in the form of charcoal, for such, without doubt, was the 'coal' of Scripture (see COAL). The ancient Egyptians, acc. to Wilkinson (ed. 1878, ii. 35, 36), used faggots of wood for heating water and boiling meat, but preferred charcoal for roasting. However this may have been among the Hebrews, the fuel used for the brasier (אָח Jer $36^{22ff.}$ AV 'hearth,' RV 'brasier') or chafing-dish (כִּיּוֹר אֵשׁ Zec 12^{6}, RV 'pan of fire'), by which the houses of the upper classes were warmed in winter, was undoubtedly charcoal (cf. Jn 18^{18} 21^{9}). No such luxury would be found in the houses of the poor, who had to content themselves with a fire of logs or twigs placed in a depression in the floor of the living-room. The smoke from such a hearth (perhaps מוֹקְדָה—although this word is in our extant literature used only of the altar-hearth, Lv 6[2] [Eng. 6[9]]—mod. Arab. the same) escaped as best it could through the door or the latticed window (Hos 13[3], EV 'chimney'). Chimneys in our sense were not known, although, by a corruption of the text, 2 Es 6[4] is made to speak of 'the chimneys of Zion.'

It is uncertain to what extent the Hebrews were familiar with the use of animal dung as fuel. This form of fuel, as is well known, is very extensively used in the East, both by the nomads and the fellahin. The dung of the camel is the favourite fuel of the Bedawin, while the Syrian peasant carefully collects the droppings of his cattle, which he uses either in the natural state when sufficiently dry, or mixed with straw. From the incident recorded in Ezk 4[12-15] we may at least infer that this form of fuel was not unknown (see esp. v.[15]), although, as the country was more extensively wooded then than now, there would not be the same necessity as now exists for having recourse to it. A. R. S. KENNEDY.

FUGITIVE.—**1.** Simply one who flees, as from danger or punishment (the modern, as it is also the earliest, meaning of the word, after Lat. *fugitivus*). So Is 15[5] 'His fugitives shall flee unto Zoar' (RV 'Her nobles flee unto Zoar,' with 'fugitives' in marg. The reading is doubtful and difficult, see the Comm.); Ezk 17[21] 'And all his fugitives with all his bands shall fall by the sword' (so RV and *Oxf. Heb. Lex.*, but reading again doubtful). **2.** A *deserter* from duty. This sense belongs to *fugitivus* also. So Jg 12[4] 'Ye Gileadites are fugitives of Ephraim'; Cov. 'runnagates.' That this is the meaning of EV is certain, but Moore holds that it is a misinterpretation, the Heb. word (פְּלִיטִים) meaning not 'runagate,' but 'survivor' (see his note); 2 K 25[11] 'the fugitives that fell away to the king of Babylon' (הַנֹּפְלִים אֲשֶׁר נָפְלוּ עַל, RV 'those that fell away, that fell to the king'); Jth 16[12] 'as fugitives' children' (ὡς παῖδας αὐτομολούντων, RV 'as runagates' children'); 2 Mac 8[35] (the only example of the adj. in AV) 'He came like a fugitive servant through the midland unto Antioch' (δραπέτου τρόπον, RV 'like a fugitive slave'). So Shaks. *Ant. and Cleop.* IV. ix. 22—

> 'But let the world rank me in register
> A master-leaver, and a fugitive.'

3. A *Wanderer*, as Foxe, *Act. and Mon.*, iii. 747, 'If thou wert an honest Woman, thou wouldest not . . . run about the Country like a Fugitive.' This is the meaning of Gn 4[12. 14] 'a fugitive and a vagabond' (נָע וָנָד, ptcp. of נוּעַ to wander; LXX στένων καὶ τρέμων [preserving the paronomasia], Vulg. *vagus et profugus*; Luther, 'unstät und flüchtig'; Wyc. [1382] 'vagaunt and fer fugitif,' [1338] 'unstable of dwellyng and fleynge aboute'; Cov. 'a vagabunde and a rennagate'; Bish. 'a fugitive and a vagabond'). Shaks. presents a close parallel in *I Henry VI.* III. iii. 67—

> 'When Talbot hath set footing once in France,
> And fashion'd thee that instrument of ill,
> Who then but English Henry will be lord,
> And thou be thrust out like a fugitive?'

J. HASTINGS.

FULLER.—The fuller's art is mentioned in both OT and NT only in connexion with himself. In the former the fuller's field (2 K 18[17], Is 7[3] 36[2]) is the only word used, and indicated an open field on the west of Jerus. where cloths were fulled and spread out in the sun to dry. The process of fulling in those times is unknown to us except indirectly, partly from the etymology of the word (כּוֹבֵס, γναφεύς), and partly from an Egyp. picture. It seems to have consisted in washing the material with some preparation of lye, beating or rubbing it, and exposing it to the rays of the sun. This ensured a considerable amount of cleaning and bleaching; and the remains of ancient Egyp. linen show that the result of the art, rude as it may have been, was highly satisfactory. In NT the only reference to it (Mk 9[3]) is where the garments of Jesus at His transfiguration are said to have become 'glistering, exceeding white; so as no fuller on earth can whiten them' (RV); and this description shows that the reader was familiar with the fuller's art and its beautifying effects. The dress of Egyp. and Jewish priests was made of white linen, and among their higher classes of very fine material, whose lustre was enhanced by art. Fulling is still carried on in the E., probably very much as it was practised in ancient times, and is often employed before dyeing cloth and yarn, to remove impurities and improve the process of colouring; but it is rapidly being superseded by the modern mode of bleaching.

J. WORTABET.

FULLER'S FIELD, THE (שְׂדֵה כוֹבֵס, ὁ ἀγρὸς γναφέως, *ager fullonis*), was the scene of Rabshakeh's interview with Eliakim and others (2 K 18[17], Is 36[2]), and of that between Ahaz, Isaiah, and his son (Is 7[3]). In each case it is named in connexion with the phrase 'conduit of the Upper Pool,' which is 'in' or 'on' 'the highway of the Fuller's Field.' The conduit apparently crossed the highway at a point close to the city, as conversation carried on there could be heard by the people on the walls (2 K 18[26]). The place cannot now be identified with certainty. En-rogel we know was a resort of the fullers; whence probably its name was derived. The same is true of Birket Mamilla, in the vale west of the city. The former, lying in the bottom of the valley S.E., would have been difficult of approach, and hearing from the walls impossible. The higher aqueduct from Solomon's Pools crosses the valley a little above Birket Mamilla, and seems to have entered the city close by the tower Psaphinus, at the N.W. angle. This, however, could hardly be called 'the conduit of the Upper Pool.' From Birket Mamilla a conduit takes water to the Pool of Hezekiah, passing under the wall northward of the Jaffa gate. Birket Mamilla being the 'upper' of the two pools in the valley, there is at least a possibility that the Fuller's Field was located here. On the N., however, an ancient conduit entered the city E. of the Damascus gate. Its course without the wall has not been traced. It may have come from the large pool some distance out, to the left of the Nâblûs road. On this side the city was easiest of approach; the land here would perhaps best suit the description implied in שָׂדֶה 'arable land'; Josephus (*BJ* V. iv. 2) speaks of 'The Fuller's Monument,' at the E. corner of the N. wall; and Arculf mentions a gate west of the Damascus gate, which at the time of his visit (towards the end of the 7th cent.) was called *Porta Villæ Fullonis*, 'Gate of the Fuller's Farm' (cf. Euseb. *HE* ii. 23). These considerations point to the location of the Fuller's Field on the N. of the city. But there is no evidence to warrant any certain conclusion.

W. EWING.

FULNESS.—See PLEROMA.

FUNERAL.—See BURIAL.

FURLONG.—See WEIGHTS AND MEASURES.

FURNACE.—In OT five words are tr[d] furnace in EV. 1. כִּבְשָׁן, a kiln for burning limestone into lime, or for smelting ore, chiefly iron. The former was constructed of lime-stones arranged in concentric layers in the form of a dome, with an opening at the top for the escape of air and smoke, and another at the bottom for supplying the hollow of the dome with fuel. In this case, as well as in furnaces for smelting, great and long-continued heat was required, and the combustion caused a thick and dark column of smoke to ascend. It is this appearance that is referred to in the account of the destruction of Sodom and Gomorrah: 'and, lo, the smoke of the land went up as the smoke of a furnace' (Gn 19^{28}). 2. אַתּוּן, an Aram. word still in use in Syria (Arab. *attun*) for the lime-kiln described above. It occurs only in Dn 3, but there repeatedly as the 'furnace' into which Shadrach, Meshach, and Abed-nego were cast. 3. עֲלִיל, Ps 12^{6}, but the text here is quite uncertain. (See Cheyne, *ad loc.* and *Expos. Times*, viii. 170, 287, 336, 379.) 4. כּוּר (Arab. *kûr*, a blacksmith's fireplace), a smelting furnace, for iron (Dt 4^{20}, 1 K 8^{51}, Jer 11^{4}), but especially for gold (Pr 17^{3} 27^{21}), used metaphorically (Is 48^{10}, furnace of affliction). 5. תַּנּוּר, sometimes tr. 'furnace' (Gn 15^{17}), and sometimes 'oven' (Lv 26^{26})—the latter being probably the correct tr^{n}. The Arab. word *tannur* is still in use on the Lebanon for a special kind of oven in which women bake bread. A pit is dug in the earth, and a hollow cylinder of pottery, about two feet in diameter, is let down into it. Fire is kindled at the bottom, and, when the smoke subsides and the cylinder is sufficiently heated, a thin circular layer of dough, spread out on a pad, is deftly stuck to the inner side of the cylinder. The cakes, which are about a foot in diameter, are considered a very good kind of bread.

The same word in Gr. of NT (Mt 13^{42}) and in Arab. (*κάμινος, kamîn*) means a furnace. In Syria the word is still in use for furnaces employed in heating public baths, and the heat generated in them is very great. J. WORTABET.

FURNITURE.—In Gn 31^{34} it is said that Rachel had taken the images (RV 'teraphim') belonging to her father, and put them 'in the camel's furniture.' The Heb. [כַּר] occurs only here (בְּכַר־הַגָּמָל), and designates a basket-shaped palanquin which was placed on the camel's saddle, chiefly for carrying the women. See Dillmann, *in loc.*, who quotes Knobel and refers to Burckhardt, *Bedouins*, ii. 85; W. G. Brown, *Travels*, 453; Ker Porter, *Travels*, ii. 232; Jahn, *Bibl. Arch.* 54; see also art. CAMEL. The Eng. word is apparently original to AV. The older Eng. VSS were misled by the Vulg. *stramenta cameli*, and Luther's *die streu der Kamel* (mod. edd. *die Streu der Kameele*), and render 'straw' or 'litter,' though Gen. Bible has 'saddle' in marg. (Wyc. 1382 'the literyng of a camele,' 1388 'the strewyngis of the camel'). The AV and RV word 'furniture' is used in the general sense of equipment, accoutrement, as in Bunyan, *Holy War* (Clar. Press ed. p. 112), 'Wherefore, let it please thee to accept of our Palace for thy place of residence, and of the Houses of the best men in our Town for the reception of thy Soldiers and their Furniture.'

The same word is given in AV 7 times (Ex $31^{7.\,8\,bis.\,9}$ 35^{14} 39^{33}, Nah 2^{9}) as the tr. of כְּלִי *kĕlî*, which is usually tr^{d} 'vessel.' RV prefers 'vessel' in Ex $31^{8b.\,9}$ and 35^{14}, but gives 'furniture' as the tr. of the same Heb. in Ex 25^{9}, Nu 3^{8} 7^{1}, 2 S 24^{22} (AV all 'instrument'); Ex 40^{9}, Nu 1^{50b} $4^{15.\,16}$, 1 Ch 9^{29} (AV all 'vessel').

For an account of the furniture of an Eastern house, see HOUSE. J. HASTINGS.

FURROW.—This is the tr^{n} in AV of the following Heb. words. 1. גְּדוּד Ps 65^{10} (RV 'ridges'). This word, which is most familiar to us in the sense of a 'troop' (*e.g.* 1 S $30^{8.\,15.\,23}$ and oft.), means literally a 'cutting,' and (in plur. fem. גְּדֻדוֹת) appears in Jer 48^{37} in connexion with cuttings in the flesh as a sign of mourning. 2. מַעֲנָה or מַעֲנִית Ps 129^{3}, where the word is used metaphorically, 'The plowers plowed upon my back, they made long their furrows' (מַעֲנוֹתָם *Kethibh*, מַעֲנִיתָם *Ḳerê*). The only other occurrence of this word is in the obscure expression in 1 S 14^{14} כְּבַחֲצִי מַעֲנָה צֶמֶד שָׂדֶה, which is tr^{d} in AV 'within as it were an half acre of land [which] a yoke [of oxen might plow]'; AVm 'half a furrow of an acre of land,' RV 'within as it were half a furrow's length in an acre of land,' RVm 'half an acre of land.' There is the strongest reason to suspect the originality of MT. LXX has ἐν βολίσι καὶ κόχλαξιν τοῦ πεδίου, and it is not improbable that the Heb. expression originally specified the *weapons* used by Jonathan and his armour-bearer, although in that case we have probably here a gloss transferred from v.^{19} (see Wellhausen and Driver's notes, *ad loc.*, also Budde in *SBOT*). 3. עֲרוּגָה Ezk $17^{7.\,10}$, where RV rightly substitutes 'beds,' as in Ca 5^{13} 6^{2} [all]. 4. תֶּלֶם Job 31^{38} 39^{10}, Hos 10^{4} 12^{11}. The same word (in plur.) is tr^{d} by RV 'furrows' in Ps 65^{11}, where AV has 'ridges.' 5. In Hos 10^{10} the *Kethibh* has עינתם, *Ḳerê* עוֹנֹתָם 'furrows.' Many modern scholars (following LXX, Vulg. and Pesh.) would read עֲוֺנֹתָם 'transgressions.' The passage appears to be hopelessly corrupt. AV (text) 'when they shall bind themselves in their two furrows,' is of course meaningless. RV proposes 'when they are bound to their two transgressions'; but even this fails to yield a satisfactory sense. Probably Nowack is not far wrong in his conjectural tr^{n} *um sie zu züchtigen wegen ihrer beiden Vergehungen*, 'to punish them for both their transgressions.' Similarly Guthe (in Kautzsch's *AT*), *wenn sie für ihre zwei Verschuldungen Züchtigung empfangen*, 'when they receive punishment for their two transgressions.' The latter will be their wrong choice of a king and their idolatry, or perhaps the reference may be to the two calves at Bethel and Dan (see Nowack and Wellh. *ad loc.*, and cf. Siegfried-Stade, *s.* עָוֺן). See further under AGRICULTURE.

J. A. SELBIE.

FURTHER.—To 'further' in the sense of 'help forward' is used of *persons* in Ezr 8^{36} 'they furthered the people, and the house of God' (נִשְּׂאוּ). So Chaucer, *Hous of Fame*, 2023—

> 'And gaf expres commaundement,
> To whiche I am obedient,
> To furthre thee with al my might.'

Furtherance occurs in Ph $1^{12.\,25}$ as tr. of προκοπή, which in 1 Ti 4^{15}, its only other occurrence, is tr^{d} 'profiting.' RV gives 'progress' in all. On the other hand RV introduces 'furtherance' into Ph 1^{5} 2^{22} to express the force of εἰς with the acc. (εἰς τὸ εὐαγγέλιον, 'in furtherance of the gospel,' AV 'in the gospel'). Cf. Healey (1610), *St. Aug. Citie of God*, I. xi. 19, 'The pompes of the funeralls are rather solaces to the living then furtherances to the dead.'

FURY.—The Heb. word חֵמָה *ḥêmâh*, which is once (Est 1^{12}) tr^{d} 'anger,' and often 'wrath,' is 66 (חֵמָא of Dn 11^{44} and Aram. חֲמָא, חֱמָא of $3^{13.\,19}$ make 69) times tr^{d} 'fury.' Of these occurrences 61 refer to God, and then Amer. RV prefers 'wrath,' except in Is 42^{25} 66^{15} 'fierceness.' Fury is also the tr. in AV of חָרוֹן *ḥârôn* in Job 20^{23}; RV 'fierceness,' as the word is a few times tr^{d} in AV. In the Apocr. 'fury' occurs as the tr. of θυμός Sir 1^{22} 45^{18} 48^{10}, Bar 1^{13} (RV always 'wrath'); of θυμοί Wis 7^{20} (AV 'furies,' RV 'ragings') 10^{3}, 2 Mac 4^{25} (both AV 'fury,' RV 'rage'); and of ἀλάστωρ 2 Mac 7^{9} ‘And when he was at the last gasp, he said, Thou like a fury takest us out of this present life’ (Σὺ μέν, ἀλάστωρ; the only occurrence of the word in biblical Greek, though it is found also in 4 Mac 9^{24} 11^{23} 18^{22}; RV ‘Thou, miscreant’). See ANGER. J. HASTINGS.

FUTURE.—See ESCHATOLOGY.

G

GAAL (גַּעַל, acc. to Wellh. *Isr. u. jüd. Geschichte*, p. 26=‘beetle,’ cf. Arab. *ja'ul*; see Gray, *Hebr. Prop. Names*, p. 110), Jg 9$^{26-41}$ son of Ebed (עֶבֶד, LXX, A Ἄβεδ, B Ἰώβηλ, prob. error for Ἰωβήδ, *Obed* עוֹבֵד; cf. LXX 1 Ch 2^{37} 11^{47} 26^{7}, 2 Ch 23^{1}. Less prob. Ἰώβηλ, *i.e.* יובל=יובעל ‘J" is Baal,’ altered to Ebed to avoid offence).—Gaal, apparently a Canaanite and a new-comer to Shechem, was the ringleader of a revolt against Abimelech, son of Gideon. He first ingratiated himself with the Shechemites, and then adroitly seized the occasion of the popular vintage-festival to incite them to revolt and make himself their leader. Zebul, Abimelech's officer in Shechem, heard of the plot, and sent a warning to his chief. Following Zebul's advice, Abimelech marched against the town and surrounded it with ambuscades under cover of night. Gaal, from the entrance of the gate, noticed the approach of Abimelech's men, and pointed them out to Zebul, who replied first with an ironical answer and then with an open taunt, bidding him go forth and fight with them. In the battle which followed, Abimelech completely defeated the rebels, and Zebul drove out Gaal and his brethren from the city. The context suggests that the revolt was one of ‘native Shechemites against the half-Israelite Abimelech’ (Moore). Gaal poses as their champion. It is by no means clear that Gaal was an Israelite, and that his object was to rouse the Israelite population against the Shechemite ruler. W. R. Smith, *Th. T.* xx. 1886, p. 195 ff., would place v.^{28} after v.^{22}; and Budde, *Richt. u. Sam.* p. 118, after v.^{25}. But no transposition is needed. In v.^{28} read with LXX יַעַבְדוּ for עִבְדוּ ‘Do not the son of Jerubbaal and Zebul . . . make slaves of the men of Hamor?’ Another simple alteration is עָבְדוּ (perf.) proposed by Moore, ‘Were not . . . subject to Hamor?’ V.^{29} for וַיֹּאמֶר read וְאֹמַר ‘and I would say.’ V.^{31} for בְּתָרְמָה ‘deceitfully’(?) read בָּארוּמָה ‘in Arumah,’ cf. v.^{41}. הִנָּם צָרִים can hardly be right: Stade suggests הִנָּם מְצָרִים; but the text is doubtful. See further under ABIMELECH. G. A. COOKE.

GAASH (גַּעַשׁ).—A mountain in Ephraim, S. of Timnath-seraḥ or Timnath-ḥeres (wh. see), Jos 24^{30}, Jg 2^{9}. The torrent-valleys (נַחֲלֵי) of G. are mentioned in 2 S 23^{30}=1Ch 11^{32}.

GABAEL (B Γαβαήλ, A Γαμαήλ).—1. A distant ancestor of Tobit (To 1^{1}). 2. A friend and kinsman of Tobit, residing at Rages in Media. To him Tobit, when purveyor to the king of Assyria, once entrusted, as a deposit, 10 talents of silver (Vulg. only: ‘*lent* it under a bond, because G. was needy’), To 1^{14}. For years the money was not claimed. The reason for this is given with great variety in the VSS (1^{15}). When, however, blindness and poverty came on Tobit in Nineveh, he recollected, after prayer, the long-forgotten treasure (To 4^{1}), and wished his son Tobias to fetch it (4^{21}). Tobias found a guide, Raphael in disguise, who said he had lodged with G. (To 5^{6}). When Tobias married Sarah in Ecbatana he sent Raphael for the deposit (9^{2}). G. welcomed him, and brought forth the bags with seals unbroken, returning with Raphael to the wedding feast. All the VSS, except B and Heb. of Fagius, tell of a hearty blessing which G. gave the bridegroom when he met him (9^{6}). Instead of this, B (so EV) says, ‘Tobias blessed his wife,’ and Heb. Fag. ‘Tobias was blessed still more, with Sarah his wife.’

Heb. Fag. uses the form עֲבִיאֵל, except in ch. 10, where we have גַּבְאֵל, as always in Munster's Heb. Itala preserves the form most accurately, ‘Gabahel,’ גַּבְהָאֵל=‘God is high.’ J. T. MARSHALL.

GABATHA (Γαβάθα).—One of two eunuchs whose plot against Artaxerxes (the Ahasuerus, *i.e.* Xerxes of canonical Est) was discovered and frustrated by Mardocheus (Mordecai), Ad. Est 12^{1}. In Est 2^{21} he is called BIGTHAN and in 6^{2} BIGTHANA.

GABBAI (גַּבַּי, cf. Talm. גַּבָּי ‘tax-gatherer’).—A Benjamite (Neh 11^{8}), but text doubtful (see Smend, *Listen*, p. 7).

GABBATHA occurs only in Jn 19^{13} ‘And he [Pilate] brought Jesus out and sat down (ἐκάθισεν, not—according to Justin, *Apol.* i. 35, and the *Gospel of Peter*, ἐκάθισαν αὐτὸν ἐπὶ καθέδραν κρίσεως—‘set him’) on the judgment-seat at a place called the Pavement (Λιθόστρωτον), but in Hebrew Gabbatha’ (Ἑβραϊστὶ δὲ Γαββαθά).

The passage offers serious philological and topographical difficulties.

(*a*) Λιθόστρωτον is clearly ‘pavement,’ especially of mosaic work (*tessellatum*); cf. in the OT, Est 1^{6}, Ca 3^{10}, 2 Ch 1^{3}, but especially Aristeas (ed. Schmidt, p. 30, 3), where on the temple of Jerusalem it is said: Τὸ δὲ πᾶν ἔδαφος λιθόστρωτον καθέστηκε.

(*b*) This particular Pavement was called in Hebrew ‘Gabbatha.’ It is not necessary or possible, though it is generally attempted, to seek in Gabbatha the exact equivalent of the *appellativum* λιθόστρωτον (*Onomastica sacra*, ed. Lag. 189, 87. 202, 62, Γαββαθὰ λιθόστρωτον).

(*c*) The Greek MSS offer scarcely any variety; some uncials have Γαβαθα; so also the Harclensian VS in the edition of White; but according to Barhebræus it had גאבבאתא; a few minuscules have Καπφαθα. Interesting in this connexion is the spelling of the Peshiṭta, גְּפִיפְתָא, with the remark of Barhebræus, that the ג is to be pronounced hard like כ and the פ both times soft (cf. Duval, *Gr. Syr.* p. 30); the Cureton and Lewis MSS are unhappily defective, but the Arabic Tatian has كفيفتا *Kafîftâ* (thus cod. A, the text of Ciasca كبيتا; in the translation Ciasca and Hogg retained *Gabbatha*). The Evangeliarium Hierosolymitanum shows ג׳בתא, but codex C (in the forthcoming edition of Mrs. Lewis) גבתא. On the deformations of the word in the MSS of the Latin Bible, see Wordsworth-White. The confusion with *Golgotha* (first hand of cod. Sinaiticus) is found elsewhere (Oliverus, *Descriptio terræ sanctæ*, p. 20, 9, codd. DX *Golgatha*, U *Grabata*).

In this state of the evidence it is safest to presuppose an Aramaic גַּבְּתָא, as st. emph. of a feminine noun גַּבָּא from the root גבב. But the origin and meaning of גבתא is disputed.

1. In Mt 26^{23} we find גבתא in the Evang. Hier.

for *τρύβλιον*; cf. Ethiopic *gab(b)atâ=patella*, Dillm. *Lex.* 1168, and Latin *gabata*, Martial, 7. 47, 11. 3. Schwally (*Idioticon*) identified this with our Gabbatha. But this גבתא seems to be a dialectic form of כַּפְּתָא (fem. of כף), *Thesaur. Syr.* 1791; cf. כַּפַּפְתָא and גַּפַּפְתָא, *ib.* 766, 1792.

2. Neither can it be=כִּפְּתָא (כיפתא) 'vault,' *καμάρα*, *ἐξέδρα*, *ψαλίς* (Vogüé, *Inscr. Sémit.* i. p. 50, n. 70, *ib.* n. 50; Targ. Jer. xx. 2, 3, Naz. 56^{a}), because of the vowel *i* in the first syllable, though the meaning would be very appropriate: an arch, niche, or cupola, under which the tribunal was placed on a mosaic pavement.

3. Generally it is derived from גַּב 'back'; but neither for the form nor for the meaning (*Anhöhe*, 'height'; Kautzsch, *Gramm. des Bibl. Aram.* p. 10) can examples be given. In the OT we have גַּבְחֹן; in the Mishna the plural גַּבּוֹת; for גיבבא Targ. Ps 68^{16}, Lagarde printed גיבנא; Levy, p. 123, has גיבנא; Gesen. r. 98, 96^{a} we have גיבבתא ראשי הרים; more frequent is גובבתא, Dalman, *Gr. des Aram.* § 25. i. *β*, where also an example of spelling with פ is given.

4. Others thought of the root גבע, *i.e.* of an Aramaized *גבעתא 'hill' (comp. שִׁבָּה=שמעה, שַׁבָּת if =*שבעת). (The roots גב, גף, and כף are closely allied; cf. further גִּבֵּן Lv 21^{20}=ܟܦܝܦܐ; ܟܦܝܦܐ is explained *caverna* by Barsalibi; ܡܥܪܬܐ ܟܦܝܦܬܐ, *spelunca fornicata*, Julian, ed. Hoffm. 139. 21). The exact form and meaning must therefore be left in suspense.

(*d*) No place called *Λιθόστρωτον* or Gabbatha is mentioned by Josephus, or in any other known source besides the NT. But frequently we hear of a place called גָּזִית (=*Ξυστός*), especially of the לִשְׁכַּת הַגָּזִית 'the hall of hewn quaders,' where the Sanhedrin assembled (Schürer, *HJP* II. i. 190). It has been attempted to identify these two places. Tradition seeks Gabbatha near the so-called 'Ecce homo Arch.' Compare the articles JERUSALEM, PILATE, PRÆTORIUM, TEMPLE. For the sitting of the judge on the *sella*, see Schürer, I. ii. 15 n. 8, and the literature there quoted, especially Josephus, *Ant.* XVIII. iv. 6, where Philippus is praised: *τοῦ θρόνου εἰς ὃν κρίνειε καθεζόμενος ἐν ταῖς ὁδοῖς ἑπομένου . . . ἐκ τοῦ ὀξέος ἱδρύσεως τοῦ θρόνου ᾗ καὶ τύχοι γενομένης καθεζόμενος ἠκροᾶτο.*

EB. NESTLE.

GABBE (A *Γάββη*, B *Κάββη*; AV Gabdes), 1 Es 5^{20}.—In Ezr 2^{26} Geba.

GABRIAS (B *Γαβρίας*, ℵ *Γαβρεί*, indecl. Greek forms of גַּבְרִי [Aram. קַבְרִי], shortened form of גַּבְרִיאֵל 'man of God'; omitting, as was customary, the name of the deity. Syr. and Heb. Fagii preserve the complete form).—Acc. to To 1^{14} Gabrias was the *brother* of the Gabael to whom Tobit entrusted 10 talents of silver. In To 4^{20} the Gr. reads *Γαβαήλῳ τῷ τοῦ Γαβρία*, ℵ *Γαβρεί*, which AV and RV render 'the *son* of Gabrias,' thereby introducing an apparent contradiction, probably gratuitously. Compare *Ἰούδας Ἰακώβου*, Ac 1^{13}, with Jude ^{1}.

J. T. MARSHALL.

GABRIEL (גַּבְרִיאֵל, in LXX and NT *Γαβριήλ*, *vir Dei*, 'man of God') appears in both OT and NT. In Dn $8^{15f.}$ G. is the 'man' who interprets Daniel's vision of the ram and the he-goat; in $9^{21f.}$ he explains to Daniel Jeremiah's prophecy about the 70 years (Jer 25^{11} 29^{10}) as 70 weeks of years, and amplifies details. In NT G. is named by Lk alone; he foretells the birth of John to Zacharias ($1^{11f.}$), and acts as the angel of Annunciation to Mary (1^{26}). Different in some ways as the later is from the earlier presentation, yet both can be easily united as parts, not only of one character, but even of one aspect of it, viz. that of bearing divine sympathy and comforting promise to those in need. These appearances are quite in accordance with the notion of G.'s character afforded by the later and more developed Jewish angelology. The developed angelology of Dn is indeed used as an argument for the later date of that book (Driver, *LOT*^{6} p. 508). If the 'one like the appearance of a man' (Dn 10^{18}) be G., as would appear from the fact that his message resembles, even in its words, that of G. in 8 and 9, then G. is a companion of Michael, and both are members of a class, the 'princes' or guardian-angels of the nations. In Enoch 9, G. is one of four great archangels; but, comparing this with Lk 1^{19} and other references, he is one of seven (Rev 8^{2}) who present the prayers of the saints and go in and out before God (To 12^{15}). The Targums add G. as a gloss to other parts of Scripture; according to pseudo-Jonathan, the 'man' who showed Joseph the way towards his brethren (Gn 37^{15}) was G.; again, with Michael and others G. takes part in the burial of Moses (Dt 34^{6}); G. is also the angel whom the Lord sent to destroy the host of Sennacherib (2 Ch 32^{21}). About the name Gabriel there is nothing distinctive, but it was probably a proper name from its first use: the personality, however, is very definite. Assuming that the supra-natural beings of the earlier books of the Bible are either the shrivelled-up descendants of the nature-spirits of primitive Semitic superstition (אֱלֹהִים) or subordinate personal beings fully representing God at a definite time and place (מַלְאָכִים) (Schultz, *OT Theol.* ii. 215 f.; W. R. Smith, *Ency. Brit.*^{9} art. 'Angel'), it is clear that G. belongs to the latter rather than the former. Nor has his connexion with, far less his derivation from, any of the seven Amshaspends of Zoroastrianism, the seven Babylonian planets, or the seven councillors at the Persian court (Ezr 7^{14}), been made out. He is the messenger of J″: a characteristic Jewish idea, though the number of the archangels—seven—may have been derived from foreign sources. We possess but little description of the special form under which he presented himself; to Daniel he is simply 'the man G.,' though an elaborate and striking picture is drawn of the 'man' (G.?) in Dn $10^{5.6}$. St. Luke is equally reticent, but calmness and sublimity are added: 'I am G. that stand in the presence of God.' In Dn 9^{21} G. is 'caused to fly swiftly,' but the passage is not clear; RVm 'sore wearied' seems somewhat inept; 'gleaming in splendour' (Schultz, *OT Theol.* ii. 226 n. 2) is more likely, though it proposes an emendation of the original.

G. appropriates to himself the function of revealing God. He brings the divine into the phenomenal world. In this he is contrasted with Michael, who fights for God and the chosen people. Yet in G.'s character there is also a stern element. Mohammed asserts him to have been the revealer of the Koran,—probably in opposition to the later Jews, whose prince was Michael,—but Mohammed also represents G. as fighting for him, *e.g.* at the head of 3000 angels against the idolatrous Meccans. But, comparing Lk 1^{20} (also perhaps Dn $10^{13.20.21}$) with this, we see that these sterner aspects were not wanting even in the Jewish conception of Gabriel.

A. GRIEVE.

GAD.—Gad is another form of goad, and the gadfly (so correctly RVm for קֶרֶץ in Jer 46^{20}; AV, RV 'destruction') is the goad-fly, the fly that stings. Hence the favourite derivation for the verb to 'gad' (though it is not very certain) is to rush about like animals stung by the gadfly. Perhaps better and more simply (after Skeat), to drive about (which was the orig. sense), *goad*; then rush about as goaded. Cf. Dryden, *Virgil's Georgics*, iii.—

---

* Luther, who had at first translated *Pflaster* (Pavement), seems to have thought of the root גבה 'to be high,' since he coined the word *Hochpflaster* (High-pavement).

> 'their stings draw blood
> And drive the cattle gadding through the wood.'

Bacon expresses the usual meaning of the word clearly in *Essays* 'Of Envy' (Gold. Treas. ed. p. 30, l. 21)—'For Envy is a Gadding Passion, and walketh the Streets, and doth not keepe home.' With which cf. T. Adams, *II Peter* (on 1^{4}), 'Man's knowledge should not be a gadding harlot, whose feet cannot keep within doors; but a good housewife to stay at home.' In AV we find, Jer 2^{36} 'Why gaddest thou about so much to change thy way?' (מַה־תֵּזְלִי, lit. 'why goest thou?' mostly poetic in Heb., but in Aram. the usual word for 'to go away'); Sir 25^{25} 'Give the water no passage; neither a wicked woman liberty to gad abroad' (after Vulg. *veniam prodeundi*, which again follows the reading *παρρησίαν ἐξόδου*; B has simply *ἐξουσίαν*; ℵA *παρρησίαν*, whence RV 'freedom of speech').

Gadder occurs Sir 26^{8} 'A drunken woman and a gadder abroad causeth great anger' (after the reading *καὶ ῥεμβάς*, but not Vulg., which has no corresp. words, but to the Gr. [*ὀργὴ μεγάλη γυνὴ μέθυσος*] adds *et contumelia*; RV follows Gr. 'A drunken woman *causeth* great wrath'). Cf. Grafton, *King John*, An. 13, 'In the mean while the priestes within England had prouided them a false and counterfeated prophet called Peter Wakefielde, a Yorkshireman, who was a hermite, an idle gadder about, and a pratlyng marchant.'

J. HASTINGS.

GAD (גָּד, *δαιμόνιον*, *δαίμων*; *Fortuna*; also, probably, גָּד, *τύχη*).—Properly, the word should be used with the article הַגָּד 'the gad,' *i.e.* 'the (god of) good luck'; that being the meaning of the word, which is apparently the same as גָּד *gād*, 'fortune,' Arab. *jadd*, Aram. גַּדָּא *gaddâ*, Syr. *gadā*. Gad was, therefore, originally an appellative, and its use as a divine name is due to its meaning. Examples of its appellative use are בישׁ גדא 'the unlucky' (Buxtorf, 387); גדעתא 'the fortune of Athe' (de Vogüé, *Palm.* 143); גדנעמת and נעמגד, etc., in Carthag. inscriptions. The god Gad as *Τύχη*, 'Fortune,' seems to illustrate the origin of the Old Pers. word for 'God,' *baga*,* which may be traced back to the Sanskrit *bhaga*, 'fortune,' and Baethgen quotes in this connexion the Syr. phrase 'I swear by the Fortune (גדא) of the king' (P. Smith, *s.v.*), 'fortune' becoming thus a protective divinity, to whom temples were built and statues erected. The worship of this divinity became greatly extended in ancient times, and numerous Gr. inscriptions in the Hauran give the Gr. equivalent word (*Τύχη*), the identity of which with Gad, notwithstanding the difference of gender (Gad being masc., Tyche fem.), does not admit of doubt. A trace of the Syr. worship of Gad is regarded as being indicated by the exclamation of Leah when Zilpah, her maid, bore Jacob a son (Gn 30^{11}). The expression used is בגד, which is translated in AV (following the *Ḳerê*, בָּא גָד *bā gād*) 'a troop cometh,' or 'fortune is come.' If, however, the *Kethîbh* be followed (with pointing בְּגָד *bĕgād*), the word may be translated 'with Gad'† (in RV 'fortunate,' m. 'with fortune'), a rendering favoured by many scholars. As the name of Gad is not met with in Bab. literature, it would seem to have been a native Can. word, retained by the Israelites in consequence of the tendency to polytheism which existed among them as late as the time of the Bab. captivity, when they 'prepared a table for Fortune [לַגַּד],' and filled up 'mingled wine unto Destiny [לַמְנִי]' (Is 65^{11} RV), as did also the Babylonians and Assyrians for their gods (cf. Bel ^{3}, also Jer 51^{44}).* By the astrologers Gad was identified with the planet Jupiter, called by the Arabs 'Great Fortuna,' and the question naturally arises whether the Assyrian *Manu rabû*,† 'great Manu,' identified by Lenormant with Meni or 'Destiny,' may not in reality be identical with Gad, Meni being, with the Arabs, 'Lesser Fortuna.' The Assyrians also worshipped a god named Ḳibî-dunḳi,‡ a name meaning 'Bespeak thou my good fortune,' with whom Gad may also have been identified. The identification of Gad with the star of good fortune (כּוֹכַב צֶדֶק *kôkab ẓedeḳ*), the planet Jupiter, is regarded as being of late date.

Further testimony to the worship of Gad in Canaan is to be found in the place-names Baal-gad (Jos 11^{17} 12^{7} 13^{5}), where Baal was worshipped as god of fortune, and Migdal-gad (Jos 15^{37}), 'the tower of Gad.' The Hebrews also were so accustomed to regard the worship of Gad as a natural thing, that the words addressed by Esau to Isaac his father, 'let my father arise' (Gn 27^{31}), are explained in *Bereshith Rabba*, p. 65, as an invocation to Gada or Fortune.

LITERATURE.—Dillm., Del., and G. A. Smith on Is 65^{11}, Del. on Gn 30^{11}; Lenormant, *Chaldæan Magic*, p. 120; Baethgen, *Beitr. z. Semit. Rel.* 76 ff.; Nöldeke in *ZDMG* (1888), p. 479 ff.; Siegfried in *Jahrb. f. prot. Theol.* (1875), pp. 356–367.

T. G. PINCHES.

GAD (גָּד, Γάδ).—Son of Jacob by his concubine Zilpah, Leah's slave-girl. Gn 30^{11} RV, 'Leah said, Fortunate! and she called his name Gad,' follows the LXX, *εἶπεν Λεία, Ἐν τύχῃ*, and Vulg. *Dixit feliciter*. Field mentions the Greek rendering, *εὐτύχηκα*, 'I have had good fortune,' reading בְּגָד or בַּגָּד. Perhaps we should tr. 'With the help of Gad' (Ball, *Sacred Books of OT*). Dillm. has 'Glückskind.' So *Kethîbh*; the *Ḳerê*, punctuating differently, has בָּא גָד 'Gad *or* Fortune comes.' So Symm. (*ἦλθεν Γάδ*) Onk. and Syr. Aq. has *ἦλθεν εὐζωΐα* ('well-living'), which Field, on the authority of Jerome, etc., corrects to *εὐζωνία* ('the being well-girded'). The view taken by these authorities suggests that Gad here is either the divine name found in Is 65^{11} (see preceding art.), or is connected with that name. The AV 'a troop cometh' treats גָּד as equivalent to גְּדוּד, probably on account of Gn 49^{19}, which, however, is rather a play upon words than a serious etymology. Similar translations are given by the Sam. Version (Dillm.) and the Gr.-Ven. *ἥκει στράτευμα*.

W. H. BENNETT.

GAD (Tribe); for *Name*, see preceding article.

i. EARLY HISTORY.—The relation of Gad to the other tribes is indicated genealogically by the statement, Gn 30^{11} (J), 35^{26} (P), that Gad and Asher were the sons of Zilpah, Rachel's slave, *i.e.* probably, that Gad and Asher were closely connected, and either occupied a secondary position in, or were late accessions to, Israel. The separation of the Palestinian territories of the two tribes shows that this statement refers to a period before the completion of the conquest of Canaan. It is noteworthy that the names Gad and possibly also Asher are connected with the names of Semitic deities. P (Gn 46^{16}, Nu 26^{15-17}) enumerates the sons or families of Gad, and states (Nu 1^{14} 2^{14} 7^{42} 10^{20} 13^{15}) that, at the Exodus, the prince of Gad was Eliasaph ben-Deuel (or Reuel), and that the Gadite amongst the twelve spies was Geuel ben-Machi. Buchanan Gray (*Heb. Proper Names*, 205) considers Eliasaph pre-exilic; but places Deuel and Geuel in a list of which he says, 'The probability appears to me great that the following seventeen are of late origin, and, probably, also of artificial character' (p. 210). P also tells us that Gad numbered 45,650 at the first census (Nu 1^{25} 2^{15}), and at the second 40,500 (MT Nu 26^{18}), or 44,500 (LXX Nu 26^{27}); and that Gad marched in the wilderness in the 'Camp of Reuben' with Reuben and Simeon on the south side of Israel (Nu 2$^{10-16}$). In Nu 1$^{5-16}$ Gad occupies the eleventh place, beween Asher and Naphtali; in 1^{24} MT and 26^{15} MT, the third place after Reuben and Simeon, but in the corresponding 1^{36} LXX, the ninth place, between Benjamin and Dan, and in 26^{27} LXX, the sixth place, between Zebulun and Asher. In Nu 2^{14} 7^{42} Gad occupies the sixth place, also after Reuben and Simeon.

---

* Also the Phrygian name of Zeus, Βαγαῖος.

† The Targ. of the pseudo-Jonathan and that of Jerus. both read 'a lucky planet cometh.' (Cf. also Ball's note, *ad loc.*, in Haupt's *OT*).

* These *lectisternia* or tables for the gods are also referred to in connexion with 'the queen of heaven' in Jer 7^{18}.

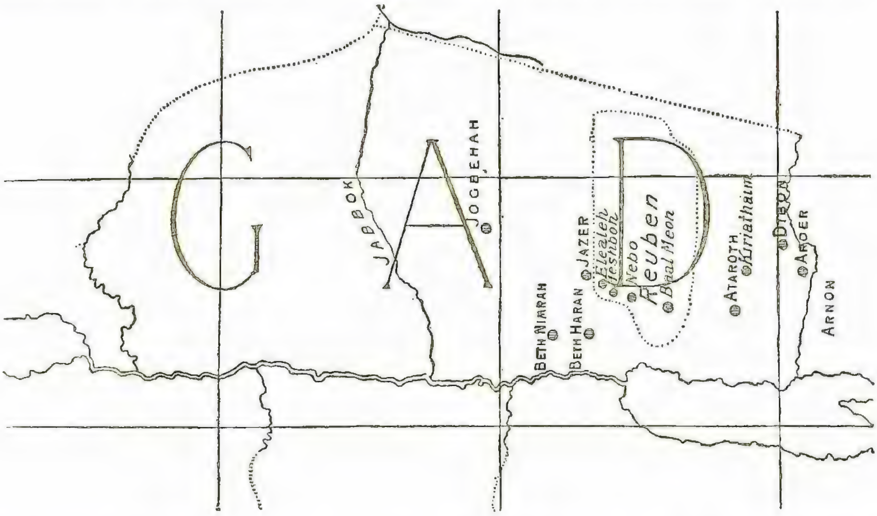
† *WAI* III. pl. 66. *obv.* l. 2 *c.*

‡ *Ib. obv.* 30*c*, *rev.* 29f., the latter passage reading 'Kibî-dunki of Assur (and) Istar (or, of the god and goddess) of Suti' (probably the people Sutî transported by Kadišman-Muruš 'from east to west,' *i.e.* to Amurri or Phœnicia). Kibî-dunḳi is probably the same as the deity Iḳbi-dunḳi, who is described as *mušêrib damāti*, 'the dispenser of favours.'

ii. THE CONQUEST.—In Nu 32 Reuben and Gad receive E. Palestine from Moses on condition of aiding in the conquest of W. Palestine. Although this chapter owes its present form to P, the main facts were probably contained in J or E or both; but the references to 'half Manasseh' are editorial additions to the original narrative. Similar statements are made in Dt 3$^{12-17}$ 29^{8}, Jos 12^{6} (D^{2}) 13$^{8-28}$ (D^{2} P). Further, Jos 1$^{12-18}$ 4^{12} (D^{2}) tell us that Reuben and Gad fulfilled their promise, and Jos 22$^{1-8}$ (D^{2}) that they afterwards returned home.

Jos 22$^{9-34}$ tells how Reuben and Gad on their return erected a great altar by the Jordan—it is not clear on which side; how the other tribes supposed it to be a schismatic altar and prepared for war, but were appeased on learning that it had been erected as a token of the unity of Reuben and Gad with the other tribes (see ED). The narrative as it stands is one of the latest additions to P; but it seems to be based on JE, though it has been so entirely reconstructed by a late editor that we cannot recover the original story. Here again the references to 'half Manasseh' are editorial additions.

iii. THE TERRITORY OF GAD.—Besides minor references, we have two main accounts of the territory: (*a*) Nu 32$^{34-36}$ (JE) assigns to Gad Beth-haran, Beth-nimrah, Dibon, Jogbehah, Jazer, Ataroth, Atroth-shophan, and Aroer, cities scattered over the district between the Jabbok and the Arnon, and possibly farther north. Nu 32$^{37.38}$ (JE) assigns to Reuben, Heshbon, Elealeh, Kiriathaim, Nebo, and Baal-meon—cities lying in a district about midway between the Jabbok and the Arnon. This suggests that Reuben held an *enclave* in the territory of Gad. See Map, in which the names of the above Reubenite cities are printed in italics. (*b*) Jos 13. Though this chapter comes to us from P, it is probably based on earlier sources. P knows less about the E. than about the W. tribes, and this ch. is obscure and self-contradictory; but it clearly locates Gad north of a line drawn from the north end of the Dead Sea, a little to the N. of Heshbon, and places Reuben south of the same line. This chapter is followed in the ordinary maps of Palestine.



As to the northern boundary of Gad, the statements as to the division of Gilead between Gad and E. Manasseh are contradictory; and the term Gilead was probably very elastic. The data are too obscure to determine any clear boundary between Gad and E. Manasseh, even as representing any single account. In Nu 32^{29} (P?) Moses gives the land of Gilead to Gad and Reuben; in Nu 32^{39} (JE), Dt 3^{15}, Gilead belongs to Machir ben-Manasseh; in Dt 3^{12} Moses gives half Mt. Gilead to Reuben and Gad; while in Dt 3^{16} Reuben and Gad receive 'from Gilead.' Apparently in Jg 5^{17} Gilead = Gad. In Jos 13$^{25.31}$ (P) G. has all the cities of Gilead, and Machir ben-Manasseh has half Gilead. In the list of Levitical cities in Jos 21$^{38.39}$ (P), 1 Ch 6$^{80.81}$, Heshbon, which is given to Reuben in Jos 13^{17}, is reckoned as belonging to Gad. Ramoth-gilead is given to Gad in Jos 20^{8} (P) 21$^{38.39}$ (P), Dt 4^{43}, 1 Ch 6$^{80.81}$. See Table, p. 78.

iv. HISTORY AFTER THE CONQUEST.—First we may notice the general relation of Gad to the other eastern tribes. Apparently, the strength of Reuben was broken at some early date (see REUBEN), and this tribe became dependent on Gad, much as Simeon on Judah. Hence the situation in JE, in which Reuben occupies a group of cities in the territory of Gad. P's arrangement in Jos 13 is probably a conjectural restoration, after Reuben and Gad had disappeared, embodying the general idea that Reuben lay to the south of Gad. Further, P's idea in Jos of the close early confederation of Reuben and Gad with E. Manasseh is also late. It is doubtful whether the eastern settlement of Manasseh was made before Israel crossed the Jordan, or later by Manassite clans, who recrossed the river from the West (cf. MANASSEH). But, in any case, the interests of Gad and E. Manasseh were separate and often conflicting; and the contradictory statements, some of which assign Gilead to Gad, while others make Gilead a clan of Manasseh, probably indicate that at an early date Gad (with its dependent Reuben) was practically Israel east of the Jordan, and that clans of Manasseh afterwards encroached upon Gad's territory and occupied part of Gilead. According to Jg 5^{17} neither Gad nor Reuben had any share in the victory over Sisera. Gad must have been involved in the Ammonite invasion, the deliverance by Jephthah, and the quarrel with Ephraim in Jg 11. 12. 'Gileadite,' used of Jephthah and his followers, may equal 'Gadite,' or be a general term for 'E. Israelite.' The genealogies, if pressed, make Jephthah a member of E. Manasseh; Jg 12^4 may perhaps suggest that his followers belonged to clans of Ephraim and Manasseh, which had migrated to the east of Jordan; but the verse is corrupt and obscure, cf. 11^{29}. In any case, this Ammonite war illustrates the border raids and more serious invasions to which Gad, in common with Reuben and E. Manasseh, was exposed throughout the history. Such a situation, Gad raided and raiding, but more than holding its own, is well described in Gn 49^{19}, the blessing of Jacob (J from older source)—

> 'Gad, the raiders shall raid him,
> But he shall raid upon their heel.'

In Jg 20. 21 (late post-ex. Midrash on earlier basis, possibly J, or J and E, see Moore and Budde, *in loc.*) the eastern tribes took part in the war against Benjamin; Jabesh-gilead, the only city which furnished no contingent, was sacked, and its inhabitants massacred, only the virgins being saved as wives for the Benjamites.

During the wars with the Philistines, Gad was a stronghold and refuge of the Isr. (1 S 13^7). After Saul's death it became the main part of Eshbaal's kingdom (2 S 2^8). Later on it afforded a rallying point for David's adherents during the revolt of Absalom (2 S 17^{27}). Amongst David's mighty men was Bani the Gadite (2 S 23^{36}). Apparently, Gad was still strong and intact. It would profit by the strength of Israel under David and Solomon. In 1 Ch 12^{8-15} Gadites come to David when a fugitive from Saul; and in 12^{37} Reuben, Gad, and E. Manasseh come to David at Hebron to make him king. 1 K 4^{7-19} tells us that Solomon divided the country into twelve districts, 'which provided victuals for the king and his household.' The description of the districts is vague and obscure, but it is clear that they do not coincide with tribal territories; and it is sometimes held that this new arrangement marks the close of the old tribal system. But Gad at any rate, having by this time absorbed Reuben, stood for S.E. Palestine, and continued to do so; see below on Moabite Stone.

At the disruption Gad fell to the N. kingdom; and Penuel, apparently Jeroboam's capital (1 K 12^{25}), probably lay within its territory. Jeroboam's interest in the district would add to its prosperity, but tend to abolish distinct tribal organization, and to merge E. Palestine in the N. kingdom. Probably, as the Moabite Stone speaks of cities taken from Moab by Omri, Moab recovered its independence at or soon after the disruption. Such recovery of Moab may have been chiefly at the expense of Reuben; but Gad also must have suffered through the gains of Moab, and profited by the conquests of Omri. Elijah, and probably (G. A. Smith, *Hist. Geog.* p. 580) the brook Cherith, are of Gilead, *i.e.* probably Gad.

In the long wars between Israel and Aram, E. Palestine was the battle-ground, and the brunt fell upon E. Manasseh. Even under Ahab the point of contact was at Ramoth-gilead. Probably E. Manasseh had practically disappeared in these wars, and Gilead again became synonymous with Gad. Gad itself also suffered (Am $1^{3.\ 13}$). About the same time Moab revolted and captured Gadite cities in the South (*Moabite Stone*). Gad or Gilead shared in the renewed prosperity of Israel under Jeroboam II., but shortly after, in B.C. 734, E. Palestine was carried captive by Tiglath-pileser (2 K 15^{29}), and thus Gad disappears from history.

TABLE OF CITIES ASSIGNED TO GAD.

	ASSIGNED TO										REMARKS.

Mahanaim . .	..	? c	..	*	*	..	..	..	..	..	c '*from*' H. & M.

Apparently, the territory was occupied by Ammon (Jer 49^1). Ezk $48^{27.\ 34}$ makes provision for Gad in the restored Israel. On the other hand, in Ob ^{19} the E. tribes are so completely forgotten that Gilead is promised to Benjamin. In Rev 7^5 Gad is enumerated among the tribes of Israel.

W. H. BENNETT.

GAD (גָּד) is entitled the seer (הַחֹזֶה 1 Ch 29^{29}), David's or the king's seer (1 Ch 21^9, 2 Ch 29^{25}, 2 S 24^{11}), or the prophet (הַנָּבִיא, 1 S 22^5, 2 S 24^{11}). His activity seems to have lain chiefly in the early period of the king's life, at least it is not he but Nathan who appears prominently in that palace intrigue which resulted in the accession of Solomon (1 K $1^{11\mathrm{ff.}}$). The name might suggest that he belonged to the tribe of Gad; but the only additional support for this view is found in the fact that several of David's chiefs came from that tribe (1 Ch 12^{8}). As for Ewald's suggestion, that Gad drew his inspiration from the school of Samuel, while this would agree well with his appearing immediately after David's rupture with Saul (1 S 22^{5}), it cannot be considered certain, so long as the existence of 'a school' of Samuel is merely a conjecture.

Gad is represented as having announced the divine condemnation on the royal census, and as having advised the erection of an altar on Araunah's threshing-floor (2 S $24^{11\mathrm{ff.}}$ = 1 Ch $21^{9\mathrm{ff.}}$). The Chronicler again (1 Ch 29^{29}) names him as having written an account of some part of his master's reign. A late conception associated him with the prophet Nathan (2 Ch 29^{25}) in the task of planning some of the king's regulations with reference to the musical part of the service, while (1 S 22^{5}) he is also stated to have acted as David's counsellor in peril during the period when the two dwelt together in 'the hold.'

A. C. WELCH.

GAD, VALLEY OF (נַחַל הַגָּד ['torrent-valley'], AV 'river of Gad').—2 S 24^{5}. Taken in connexion with Jos 13^{25} this passage would indicate that the river or valley of Gad was close to Rabbath-Ammon in the land of Gad; but, on the other hand, 'the city that lieth in the valley' is mentioned in connexion with Aroer on the river Arnon (now el-Mojib), Jos $13^{9.16}$, Dt 2^{36}. It appears to be certain that in 2 S 24^{5}, instead of 'and they pitched in Aroer, on the right side of the city that is in the middle of the valley of Gad' (וַיַּחֲנוּ בַעֲרוֹעֵר יְמִין הָעִיר אֲשֶׁר בְּתוֹךְ־הַנַּחַל הַגָּד), we ought to read, 'and they began from Aroer, and from the city that is in the middle of the torrent-valley, towards Gad' (וַיָּחֵלּוּ מֵעֲרוֹעֵר וּמִן הָעִיר וג'). This emendation, originally due to Wellhausen (*Text d. B. Sam.* 217), was afterwards confirmed by Luc. *καὶ ἤρξαντο ἀπὸ 'Αροὴρ καὶ ἀπὸ, κ.τ.λ.*, and is accepted by Driver, Budde, etc. 'The city in the torrent-valley' was possibly *'Ar*. See for a full discussion, both of the text and the topography, Driver, *Text of Sam.* 285 f., *Deuteronomy*, 45.

C. WARREN.

GADARA, GADARENES.—The country of the Gadarenes is mentioned in the Bible only in connexion with one incident, viz. the miracle concerning the legion of demons who were allowed to enter the herd of swine (Mt 8^{28}, Mk 5^{1}, Lk 8^{26}), and it is improbable that the city on the seashore mentioned in the account of that incident can be identified with the city of Gadara, which was situated at least 6 miles from the Lake of Gennesaret, and separated from it by a broad plain and the gorge of the river Hieromax. It is possible, however, that the eastern side of the lake at the spot where the miracle actually occurred, which can be located with some certainty (see GERASENES), was situated in the sub-district under the jurisdiction of Gadara. Against this view is the statement of Josephus (*BJ* IV. vii. 3), that Gadara was the capital of Peræa, which is not supposed to have extended farther north than the Hieromax, the territory beyond that being Gaulanitis.

It has been suggested (Wordsworth's *Commentary*) that the incident took place on the boundary-line of the jurisdiction of the cities of Gadara and Gergesa, and that the swine owners of these Greek cities belonged to both places. Thomson (*The Land and the Book*, ii. p. 36) points out that St. Matthew was from this region and personally knew the localities, and that his rendering of Gergesa is most likely to be correct; while St. Mark and St. Luke, being strangers to this part of the country, may possibly have intended by mentioning the country of the Gadarenes to point out to their distant Greek and Roman readers the general position of the place where the miracle occurred; Gergesa, or Gerasa, or Chersa, however pronounced, being small and unknown, while Gadara was a Greek city of importance, celebrated for its temples, theatres, and warm baths. See further under GERASENES.

The city of Gadara has thus no known connexion with biblical history; it was, however, a fortress of great strength, and took a leading part in the struggles between the Seleucidæ and the Ptolemies, and, from the strength of its position and its Hebrew name, it probably existed in early times, and according to the Mishna (*Erubhin* ix.) was fortified by Joshua. The name does not appear in history until Antiochus the Great, king of Syria, overcame Scopas, the general of the Egyptian king Ptolemy Epiphanes, at Paneas, near the fountain of the Jordan (B.C. 198), and recovered territory previously lost, including Gadara (*Ant.* XII. iii. 3; Polyb. v. 71). It was again taken from the Syrians by Alexander Jannæus the Hasmonæan king of the Jews, who, acting on a league of mutual defence with Cleopatra queen of Egypt, invaded Cœle-Syria and the territory adjoining and took Gadara after a siege of ten months (*c.* B.C. 100; *Ant.* XIII. xiii. 3; *BJ* I. iv. 2), and enslaved the inhabitants, and compelled them to receive the law of Moses as proselytes of justice (*Ant.* XIV. xv. 4). The defeat of Alexander Jannæus by Obidas king of the Arabians, is related to have occurred at Gadara, a village of Gilead or Golan (*Ant.* XIII. xiii. 5; *BJ* I. iv. 4), probably not the same as the fortress of Gadara.

Gadara was demolished by the Jews and rebuilt by Pompey the Great (B.C. 63) to gratify Demetrius of Gadara, who was one of his own freedmen, when he established the Roman supremacy in Phœnicia, Cœle-Syria, and Palestine; he left the inhabitants in a state of freedom and joined the city to the province of Syria (*Ant.* XIV. iv. 4; *BJ* I. vii. 7). It counted from the era of Pompey, and became the seat of one of the five councils which Gabinius, proconsul of Syria (B.C. 57–55), instituted for the government of the Jews (*Ant.* XIV. v. 4; *BJ* I. viii. 5). Augustus Cæsar added Gadara to the kingdom of Herod the Great (*Ant.* XV. vii. 3). The inhabitants subsequently accused Herod to Cæsar of maladministration and plunderings, but Cæsar would not hear them (*Ant.* XV. x. 2 and 3). On the death of Herod (B.C. 4), Gadara was transferred to the province of Syria (*Ant.* XVII. xi. 4; *BJ* II. vi. 3). On the revolt of the Jews against the Roman dominion, they ravaged the country about Gadara, and the Greek inhabitants rose up against the Jews and put the boldest of them to death and imprisoned others (*BJ* II. xviii. 5). Gadara was taken by Vespasian, on which occasion the inhabitants pulled down its walls to show that they wished for peace. It appears, however, to have still existed for many centuries as an important city, for bishops of Gadara are mentioned as having been present at the general councils of the Church. The style of the existing ruins indicates its having flourished during the time of the Antonines, and the coins extant extend over the period from the rebuilding by Pompey to A.D. 239. Gadara was a fortress of considerable strength (*Ant.* XIII. iii. 3; *BJ* IV. vii. 3), situated near the Hieromax (Pliny, *HN* 16), east of the Sea of Galilee and over-against Scythopolis and Tiberias (Euseb. *Onom. s.v.*). It was situated on the top of a hill, at the foot of which, at 3 miles' distance, on the bank of the Hieromax, were warm springs and baths called Amatha (*Onom. s.v.* 'Gadara'; *Itin. Ant. Martyr.*). It had a district attached called Gadaris (*BJ* III. iii. 1; Strabo, XVI. ii. 45). It was one of the cities of Decapolis, and is called by Josephus the capital of Peræa (*BJ* IV. vii. 3), though in another passage (*BJ* III. iii. 3) he gives the bounds of Peræa from north to south as from Pella to Machærus. It is frequently mentioned by Josephus in connexion with Cœle-Syria (*Ant.* XIII. xiii. 3). The main roads from Scythopolis and Tiberias to Damascus and Gerasa passed through it. Josephus calls it a Greek town (*Ant.* XVII. xi. 4; *BJ* II. vi. 3), but it is evident from the historical accounts that many Jews were living in and around the city (*BJ* II. xviii. 5), and it is probable that the number of Jews living around may have fluctuated from time to time and have depended on the friendly nature of the government.

The site of Gadara has been recognized at the ruins of *Umm Ḳeis*, which extend over the summit of a high hill, 1200 ft. above the Mediterranean, east of the Jordan on the southern side of the gorge of the *Sheri'at el-Mandhûr* (Jarmûk or Hieromax), about 6 miles south-east of the southern side of the Lake of Gennesaret. At the foot of the hill, about 3 miles north of *Umm Ḳeis* on the right or north bank of the *Sheri'at*, in a flat space below the cliffs, are the remains of the celebrated hot springs, baths, and buildings of Amatha, described by Eusebius, Antoninus Martyr, and Strabo. There are several hot springs along the bank of the river, but those clustered together at this spot are the most copious. The largest spring gives off more water than that of Tiberias; the temperature is 110° Fahrenheit. The water is strongly impregnated with sulphur. These springs are much resorted to by the Bedawîn for various diseases. The ruins about the baths are very extensive, giving the impression that this spot was also used as a favourite watering-place by the inhabitants of Gadara during inclement weather (Wilson, *Recovery of Jerusalem*).

Umm Ḳeis is situated at the extreme north-western border of the high land of Northern *'Ajlûn*, and commands a magnificent view of the Sea of Tiberias, Southern *Jaulân*, the Jordan Valley, Galilee, and Mount Tabor. There could hardly be a second point in this part of *'Ajlûn*, which combines so perfectly the advantages due to a magnificent soil and a commanding position (*Northern 'Ajlûn*).

The ruins of *Umm Ḳeis* contain the remains of a very handsome and extensive city, with buildings of great magnificence, which appear to have been overthrown by an earthquake, many of the buildings remaining as perfect in their ruin as though the shock had taken place yesterday. Josephus records an earthquake having occurred which devastated the country, B.C. 31 (*Ant.* XV. v. 2), and the ruins of Umm Ḳeis may be due to an earthquake equally severe at a later period. There are to be seen among the ruins two large theatres, a basilica, a temple, the main street running east and west, with colonnades, the columns lying just as they fell, and many large private buildings, the whole surrounded by a city wall with gates. There is a large reservoir, and an aqueduct brought water into the city. The columns are surmounted by Corinthian capitals. The basalt paving is in places quite perfect, and retains traces of the marks of chariot wheels. The eastern theatre is in an almost perfect state of preservation; the approach to it would have been extremely grand, passing from the main street over a great platform surrounded by columns. A very interesting feature is the large Necropolis on the east and north-east side of the town, in which there are both rock-hewn tombs and sarcophagi; the former are cut in the limestone rock without any attempt at concealment. A flight of steps leads down to a small court, from which two or three doors give access to the chambers: the doors are of stone, many of them still perfect, with stone hinges similar to those found in the Hauran. These tombs are inhabited by the present dwellers at *Umm Ḳeis.* Outside the town, to the east, the ancient name Gadara is still preserved in the name of the ruins, *Jedûr Umm Ḳeis* (Wilson, *Recovery of Jerusalem*; Schumacher, *Northern 'Ajlûn*; Macgregor, *Rob Roy on the Jordan*). The Christians of Nazareth were in the habit of holding a fair at *Umm Ḳeis*, until in recent years, the Bedawîn having overrun the country, they were obliged to desist.

C. WARREN.

GADDI (גַּדִּי 'my fortune').—The Manassite sent as one of the twelve spies, Nu 13^{11} P.

GADDIEL (גַּדִּיאֵל 'God is my fortune'*).—The Zebulunite sent as one of the twelve spies, Nu 13^{10} P.

GADDIS (Καδδίς, otherwise Γαδδίς, A; Γαδδεί, ℵ; *Gaddis*, Vulg.; ܓܕܝ = *Gadi*, Syr.; 1 Mac 2^{2}), the surname of Johanan or John, the eldest brother of Judas Maccabæus. The name perhaps represents the Heb. גַּדִּי, *Gaddi* (Nu 13^{11}), meaning 'my fortune.'

H. A. WHITE.

GADI (גָּדִי; cf. Nabatæan גדי (?גדו), Euting, No. 25; Palmyrene גדיא, de Vogüé, No. 32; Γαδδεί B, Γεδδεί, Γαλλεί A, Γαδδί Luc.).—Father of Menahem king of Israel (2 K 15$^{14. 17}$).

C. F. BURNEY.

GADITES.—See GAD (Tribe).

GAHAM (גַּחַם).—The eponym of a Nahorite clan whose identity has not been established, Gn 22^{24}. Gaham is described as a son of Nahor by his concubine Reumah.

GAHAR (גַּחַר).—A family of Nethinim who returned with Zerub. (Ezr 2^{47}, Neh 7^{49}), called in 1 Es 5^{30} Geddur. See GENEALOGY.

GAI (גַּיְא) is given as a proper name in RV of 1 S 17^{52} 'until thou comest to Gai,' where AV has 'until thou comest to the valley.' This last, however, would demand הַגַּיְא as in v.^{3}. In any case, the valley (ravine) referred to in v.^{52} must be different from that which separated the opposing forces. See ELAH (VALLEY OF). The LXX, as is noted in RVm, has Γέθ (Gath), and this would suit the context (cf. Wellhausen, Budde, and Driver, *ad loc.*). Wellh. further proposes to treat Shaaraim not as a proper name, but, inserting the article (הַשְּׁעָרִים), as = 'in the gateway.' That is to say, the Israelites pursued the Philistines to the gates of Ekron, and the wounded fell down in the gateway of both Gath and Ekron. An alternative, he suggests, is to view the two expressions, 'until thou comest to Gath and to the gates of Ekron,' and 'even unto Gath and unto Ekron,' as doublets due perhaps to the names of these two cities being in the former clause written indistinctly or incorrectly, in consequence of which an explanatory gloss was added on the margin and afterwards introduced into the text.

J. A. SELBIE.

GAINSAY.—To gainsay is to speak against, as Udal, *Erasmus' Paraphrase* on 1 Jn 1, 'And yf we wyll say, that wee have no sinne in us, we make God a lyar, and say agaynst hym: and he that gayne sayeth hym, must needs lye'; *Rhem. NT* on Jn 6^{49}, 'The discontented and incredulous murmured and gainsaid it [the manna].' Wyclif has the older form *agenseyen* frequently, as Lk 21^{15} (1380) 'I schal gyue to you mouth and wysdom, to whiche alle youre aduersaries schulen not mowe agenstonde, and agenseye.' Sometimes the meaning is rather wider and almost the same as oppose or resist generally. Thus Job 11^{10} Wyc. (1382) 'If he turne vpso doun alle thingus, or in to oon drawe togidere, who shal agensein to hym?' (EV 'hinder'); and Pref. to AV 1611, 'For, was there euer any thing proiected, that sauoured any way of newnesse or renewing, but the same endured many a storme of gaine-saying, or opposition?' So in AV we have Jth 8^{28} 'there is none that may gainsay thy words,' where the Gr. is *ὃς ἀντιστήσεται τοῖς λόγοις σου*, lit. 'withstand,' Geneva 'resist'; and Ad. Est 13^{9} 'The whole world is in thy power, and if thou hast appointed to save Israel, there is no man that can gainsay thee' (*ὃς ἀντιτάξεταί σοι*; lit. 'range in battle against thee'; Cov. 'withstonde ner lett the'). And even when the orig. word expresses *speaking* against, the general sense of resist is often evident.

---

* According to Hommel (*Ancient Heb. Tradition*, 1897, p. 300), from the Arabic, 'my grandfather is God.'

The verb occurs in Lk 21^{15} 'I will give you a mouth and wisdom, which all your adversaries shall not be able to gainsay nor resist' (after Wyc., as above, who has the order 'agenstonde and agensaye,' as Vulg. *resistere et contradicere*, and as L, T, WH *ἀντιστῆναι οὐδὲ* [T, WH *ἢ*] *ἀντειπεῖν*, while AV follows TR *ἀντειπεῖν οὐδὲ ἀντιστῆναι*); 2 Es 5^{29} 'they which did gainsay thy promises' (*qui contradicebant sponsionibus tuis*); Jth 12^{14} 'Who am I now, that I should gainsay my lord?' (*ἀντεροῦσα τῷ κυρίῳ μου*); and 1 Mac 14^{44} 'to gainsay his words' (*ἀντειπεῖν τοῖς ὑπ' αὐτοῦ ῥηθησομένοις*); RV 'to gainsay the words that he should speak,' *i.e.* resist his commands. To these instances RV adds Ac 19^{36} 'Seeing then that these things cannot be gainsaid' (*ἀναντιρρήτων* [WH *ἀναντιρήτων*] *οὖν ὄντων τούτων*, the only occurrence of this adj., though the adv. occurs Ac 10^{29}, as below; AV 'spoken against'); Tit 2^{9} 'not gainsaying' (*μὴ ἀντιλέγοντας*, AV 'not answering again,' AVm 'gainsaying').

The adj. is found in Ro 10^{21} 'a disobedient and gainsaying people' (*ἀντιλέγοντα*). The subst. occurs in Ac 10^{29} 'Therefore came I unto you without gainsaying' (*ἀναντιρρήτως* [WH *ἀναντιρήτως*]); Jude ^{11} 'and perished in the gainsaying of Core' (*καὶ τῇ ἀντιλογίᾳ τοῦ Κορὲ ἀπώλοντο*; cf. LXX *ὕδωρ ἀντιλογίας* = Heb. מֵי מְרִיבָה = Eng. 'water of Meribah' of Nu 20^{13}); to which RV adds He 12^{3} 'For consider him that hath endured such gainsaying (AV 'contradiction') of sinners against himself' (*ἀντιλογίαν*, which in the other two occurrences, He 6^{16} 7^{7}, RV tr. 'dispute'). The personal subst. 'gainsayer' is found Tit 1^{9} 'to convince (RV 'convict') the gainsayers' (*τοὺς ἀντιλέγοντας ἐλέγχειν*; Wyc. [1380] 'to reproue hem that agen seyn' [1388 'agenseien'], but in *Prefatory Epistles of St. Jerome*, ch. iii. [1388] Wyc. has 'He comaundide also to Tite, among othere vertues of a bishop . . . to withstonde agenseyeris'). J. HASTINGS.

GAIUS (Γάϊος).—The person to whom the Third Ep. of St. John is addressed. He is spoken of in terms of affection and respect as 'beloved' (vv.$^{1.\ 2.\ 5.\ 11}$), walking 'in the truth' (v.^{3}), acting well to brethren and to strangers (v.^{5}). But beyond this we know nothing of him. Some have thought to identify him with a Caius who is mentioned in the *Apostolic Constitutions* (vii. 46) as having been appointed bishop of Pergamum by John. Others have attempted to identify him with one or other of the men who bear the same name in the NT—the G. of Macedonia (Ac 19^{29}), the G. of Derbe (Ac 20^{4}), the G. of Corinth (1 Co 1^{14}, Ro 16^{23}). But these are all associated with the Apostle Paul, and there is nothing in the Epistle itself or elsewhere to help us to an identification. S. D. F. SALMOND.

GALAL (גָּלָל).—The name of two Levites, 1 Ch 9$^{15.\ 16}$, Neh 11^{17}. See GENEALOGY.

GALATIA (Γαλατία) is understood by different scholars as the name of two distinct countries; and, as the important associated questions are still under discussion, it is necessary to treat the term under two headings, and describe the history and geography of the two different countries which the term is said to denote. The fundamental question is this: Are the Churches of G., to which St. Paul addressed an Epistle, certain congregations in the northern part of the great inner plateau of Asia Minor variously enumerated by different advocates of 'the North-Galatian Theory,' or are they the congregations of Pisidian Antioch, Iconium, Derbe, and Lystra, in the southern part of the plateau, according to 'the South-Galatian Theory'? Each of the related terms *Galatians* and *Region of Galatia* in like manner demands double treatment. St. Paul mentions the Churches of G. in Gal 1^{2}, 1 Co 16^{1}; and they are addressed with others in 1 P 1^{1}. Finally, there is a doubt whether in 2 Ti 4^{10} Galatia or Gallia should be read, and, if Galatia is read, whether it does not denote Gaul (the modern France).

While the opinions fall into two classes on the crucial question, there are varieties in each class. The South-Galatian theory is held both by those who can see no good reason to think that St. Paul ever was in North Galatia, and by those who consider that he travelled in North Galatia but made no important foundation there. The latter view is held by Zahn (*Einleitung in das Neue Testament*). The North-Galatian theory in its common form maintains that the Epistle was addressed to the Churches of Ancyra, Tavium, Pessinus, and possibly other cities; but the most vigorous argument that St. Paul never was in Ancyra or Tavium is urged by Zöckler (*SK*, 1895, p. 79 f.),[*] who, approximating to Zahn's view, holds that St. Paul travelled little in Galatia, only in the extreme western and south-western parts, *ib.* p. 59 ff., but maintains, unlike Zahn, that he founded several Churches in that obscure district and addressed his Epistle to them. Salmon (*Introduction to NT*, and arts. in Smith, *DB*) seems to come very close to Zöckler's view,[†] though he translates the critical passage in Ac 16^{6} in quite a different way (GALATIA, REGION OF). But these minor differences are comparatively unimportant, relating to points of translation and antiquarian research;[‡] it is only the crucial question that is of fundamental consequence: To what group of Churches did St. Paul write his Epistle?

I. GALATIA PROPER, as used in the popular and ordinary Greek way (Roman *Gallogræcia*), was the name applied to a large tract of country in the interior of Asia Minor, after it was taken possession of in the 3rd cent. B.C. by certain warrior tribes who had migrated from Gaul towards the east. Irruptions of Gallic tribes into the eastern parts of Europe are first recorded in B.C. 281, when a small army under Cambaules attacked Thrace. In the following year (280) three large Gallic armies advanced—one under Cerethrius against Thrace, a second under Brennus[*] and Acichorius against Paeonia, the third under Belgius against Macedonia and Illyria. The young king of Macedonia, Ptolemy Ceraunus, was defeated and slain when he rashly gave battle with a small army. In 279 Brennus and other chiefs marched south into Greece; but a quarrel arose on the way, and two chiefs, Leonnorius and Lutarius, led away 20,000 Gauls into Thrace. Brennus' attempt was unsuccessful, and his army seems to have scattered in its retreat; and part of it probably joined the Gauls who had invaded Thrace. Many of the invaders of Thrace went on into Asia, Lutarius crossing the Hellespont in some Macedonian ships which he seized; Leonnorius crossing the Bosphorus at the invitation of Nikomedes, king of Bithynia, who wanted aid in his wars: the date of these events, so calamitous for Asia, was 278–277.

---

[*] So Findlay in *Expository Times*, vii. (1896) p. 236. Zöckler takes Chase for the originator of this view; but the latter informs me that this is a misunderstanding of his words, and that he does not hold the view.

[†] 'St. Luke's narrative does not warrant us to conclude with any certainty that St. Paul made any prolonged stay in Galatia Proper, or did much work in founding Churches there' (Smith, *DB*^{2} i. 1105).

[‡] Sometimes agreement in construction and translation results in total disagreement as to interpretation (GALATIA. REGION OF).

No certainty is attainable as to the exact events and dates that followed. The Gauls ranged through most of western and central Asia Minor, a terror to all the inhabitants, plundering, slaying, burning. Antiochus I., king of Syria A.D. 281–261, was the first to offer any serious resistance; from his victories he is said to have gained his title Soter (saviour); but his success was far from complete. During the uncertain wars of the following years, the Gauls were often hired as mercenaries by the contending kings and generals, usually by the weaker against the stronger. 'Alternately the scourge and the allies of each Asiatic prince in succession, as passion or interest dictated, they for a time indulged their predatory instincts unchecked' (Lightfoot).

But Attalus I., king of Pergamos B.C. 241–197, checked their power in a series of campaigns about B.C. 232, and confined them to a certain fixed country (previously part of Phrygia and of Cappadocia or even of Paphlagonia), which was called henceforth Galatia. They had, however, probably occupied parts of that country long before,[†] finding it more open to actual settlement than the districts where many strong cities existed; and the result of Attalus' operations was to circumscribe their territory, and to fix definite limits.

In the sketch which Strabo (p. 567) gives of the Galatian constitution, he records the interesting fact that each tribe was divided into four cantons or tetrarchies, an old Gaulish custom mentioned among the Helvetii by Julius Cæsar.[‡] Originally each tetrarchy had a chief or tetrarch;[§] and there was a common council of 300 meeting in a grove called Drynemeton (Perrot thinks that it was situated near Assarli-Kaya, about 7 hours S.W. from Ancyra),[‖] and judging all cases of murder. This old system had wholly disappeared before the time of Strabo; the monarchy of Deiotarus and of Amyntas (44–25 B.C.) had destroyed the last traces of the original Gallic constitution, and the Roman provincial organization was hostile to it. Even in early time, when war broke out, a single chief seems to have been chosen in each tribe (Livy, xxxviii. 19).

The defeat of the Gauls by a Roman army in B.C. 189 (Livy, xxxviii. 18 ff., who uses Polybius as his authority) broke their strength. They were placed between three powers, Pontus, Cappadocia, and Pergamos, and were pressed on by all. They were worsted by Ariarathes, king of Cappadocia, about 164; and they seem to have fallen under the influence of the Pontic kings in the latter part of the 2nd century, for Phrygia was given by Rome to Mithridates IV. in 129, and he could not well rule over Phrygia if divided from it by the great independent country of Galatia (Van Gelder, p. 277).[*] The Mithridatic wars set free the Gauls from this yoke; and their eagerness to aid the Roman arms against Pontus exposed them to a massacre ordered by Mithridates in 86. In 64, after the war was ended, Pompey appointed or recognized three tetrarchs,[†] Castor probably among the Tektosages, Brogitarus of the Trokmi, and Deiotarus of the Tolistobogii: Deiotarus also received Armenia Minor with part of Pontus, and, being much the most powerful, gradually made himself master of the Tektosages and Trokmi, and, finally, as the climax of a career of successful treachery and murder, he was recognized as king of Galatia by the Romans. He died at an advanced age in 40 B.C. His kingdom was given by Antony to the younger Castor, along with inner Paphlagonia, which Pompey in 64 had assigned to Attalus (Dion, xlviii. 33). Castor soon died; and in 36 Antony gave Galatia to Amyntas, and Paphlagonia to Deiotarus Philadelphus, son of Castor (probably the elder), who reigned till B.C. 5, when his kingdom was incorporated in the province Galatia (see II.).[‡]

According to our authorities, the Gauls entered Asia as an army, not separately in distinct tribes; but afterwards they appear as divided into three tribes, who arrogated to themselves three distinct districts, the Trokmi claiming the Hellespontine coast, the Tolistobogii Aeolis and Ionia, *i.e.* the Ægean coastlands, and the Tektosages the lands of the interior (Livy, xxxviii. 16, where note the word *postremo*). This tribal classification persisted throughout later history, proving that either the original army was formed mainly from these three tribes, or that three successive swarms, each mainly recruited from one tribe, entered Asia Minor. It seems, however, to be certain that contingents from a number of different tribes swelled the armies that invaded Greece, Thrace, and Asia: similarly, in Gaul certain great tribes, *e.g.* the Aedui, had smaller tribes as dependants or clients (Cæsar, *Bell. Gall.* vii. 75, iv. 6). From the ancient arrangement it would appear that the Tektosages were the first to seize Galatia, and that when the bounds were drawn by Attalus I. the Tektosages were forced into the centre and north of Galatia, with Ancyra as capital, the Trokmi were concentrated round Tavium on the east, and the Tolistobogii round Pessinus on the west. In this position we find the tribes in all later time.

The boundaries of the country called Galatia varied greatly at different periods. Thus the chief centre of a people Troknades, at the modern village Kaimaz (between Eski-Sheher and Sivri-Hissar, on the ancient road from Dorylaion to Pessinus), was part of the Roman province Asia (*CIL* iii. No. 6997); and yet the name Troknades is undoubtedly Gallic, so that the place must have been at an earlier time included in the territory of the Galatæ. That is perhaps the most westerly point to which the territory owned by the settled Gauls ever extended; and both it and even Orkistos, which lies farther east, were probably taken from the Galatian state by Attalus I.,[§]

---

[*] Brennus is perhaps a title, not a personal name.

[†] Perhaps by permission of the Pontic kings (Meyer).

[‡] *Bell. Gall.* i. 12; see Mommsen in *Hermes*, 1884, p. 316.

[§] Hence the title *tetrarch* was wrongly given to the three chiefs nominated by Pompey in B.C. 64.

[‖] *Dry-*, intensive prefix (Holder), not (with Perrot) 'oak.'

[*] Phrygia Magna was given to Mithridates II. (Justin, 38. 6) about B.C. 240; but it then included the country which soon after became Galatia. Moreover, the gift was perhaps a mere Pontic claim, never realized in fact.

[†] See note § above.

[‡] See Niese, *Rhein. Museum*, 1883, p. 584 ff.; T. Reinach, *Revue Numism.* 1891, p. 383 ff.; Ramsay, *Revue des Ét. Gr.* 1894, p. 251.

[§] It was perhaps at this time that Orkistos was placed under the control of Nakoleia (*CIL* iii. No. 7000); the Pergamenian system was favourable to the growth of powerful cities exerting authority over a large territory.

and passed along with the rest of the Pergamenian kingdom into the hands of the Romans (see ASIA). In late Roman time, probably when the province G. Secunda was created about 390, the name was extended so far to the west as to include the old Phrygian city Amorium, which was after this called a metropolis of Galatia (so Hierocles and most *Notitiæ Episc.*).*

On the north the dividing line between Galatia to the south and Bithynia and Paphlagonia to the north is indeterminable. Close to the north-western corner lay the city Juliopolis, which was in the 1st and 2nd centuries a Bithynian city † (Pliny, *Epist. ad Traj.* 77; Ptolemy, v. 1), but about A.D. 297 was made a city of Galatia. Near the north-eastern corner lay Gangra (Tchangri) and Andrapa (probably Iskelib), which were Paphlagonian cities, and Eukhaita (probably Tchorum), a Pontic city, famous for the worship of St. Theodorus Stratiotes.

On the east and south-east the dividing line between Galatia on the one hand, and Pontus and Cappadocia on the other hand, was also a varying one, running east of Tavium (Nefez-Keui), capital of the Galatian tribe Trokmi, and west of the Pontic city Sebastopolis-Heracleopolis (Sulu-Serai). It is mentioned by Polybius that a certain territory, long disputed between the Gauls and the Cappadocian kings, passed definitely into the possession of Ariarathes about B.C. 164. Basilika Therma (Terzili-Hammam) was well within Cappadocian territory in later time, and the disputed territory perhaps extended from it to the Halys or even as far as Lake Tatta. In the 4th century after Christ, the frontier between Galatia and Cappadocia lay between the Galatian Galea (a village subject to Aspona) and the Cappadocian Andrapa (subject to Parnassos).

The southern limit was, doubtless, always quite vague, running across the level, treeless, sparsely populated plain of the Axylon, south of Amorium, north of Laodiceia-Katakekaumene, and touching or intersecting the large, shallow salt lake Tatta. The limit between Lycaonia on the south and Galatia on the north was probably never fixed very narrowly in this valueless plain; and, moreover, we know that certain large districts were sometimes held by the Gauls, and sometimes separated from their country. A considerable tract of country lying along the west side of Lake Tatta, and stretching west towards Amorium and Laodiceia, is assigned by Ptolemy to Galatia under the name Proseilemmene, *i.e.* προσειλημμένη (χώρα), the 'Added Territory.' The date when this territory was added to G. is uncertain. The opinion has been expressed doubtfully that it was separated from Lycaonia by Antoninus Pius (or possibly Hadrian) when the triple eparchy, Cilicia-Lycaonia-Isauria, was constituted a Roman province (Ramsay, *Histor. Geogr. of As. Min.* pp. 251, 377); but that event seems not sufficiently important to have given a new name to the country, and the analogy of the similar name Epiktetos, *i.e.* ἐπίκτητος Φρυγία, the 'Acquired Phrygia,' suggests that the transference of territory took place as a permanent and real change of rule at a much earlier period. Now, according to Pliny (*Nat. Hist.* v. 95), the part of Lycaonia that adjoined Galatia was given to it as a tetrarchy. This Lycaonian tetrarchy was certainly close to Ptolemy's Proseilemmene, and probably another name for it. Pliny says that the tetrarchy contained 14 cities, with Iconium as capital, and distinguishes it from Lycaonia Proper (*ipsa Lycaonia*), which extended along the front of Mt. Taurus. Ptolemy, indeed, does not make Proseilemmene extend so far west as Iconium; but he is incorrect about the extent of all the divisions of this whole region. Lycaonia as a whole had been added to the Pergamenian kingdom by Rome in B.C. 190; but the kings were not strong enough to hold this distant territory, and part of it was probably taken by the Gauls about 160; and this part afterwards passed under the power of the Pontic kings along with Galatia. Hence Eumachus, Mithridates' general, who conquered Pisidia, Isauria, and parts of Cilicia, evidently used Lycaonia as his basis of operations. Another possibility is that the part of Lycaonia held by Amyntas (see II.) was styled by him the Tetrarchy; but that is, for several reasons, less probable. Amyntas' part of Lycaonia, however, must have been nearly the same in extent as the Tetrarchy. In any case, the name Tetrarchy must have originated before the Roman provincial organization was instituted; and thus Iconium had an old connexion with Galatia (*Studia Biblica*, iv. p. 46 ff.).

As to the relation between the immigrant Gauls and the older Phrygian inhabitants in Galatia, evidence fails; but the analogy of similar conquests and the general facts of this case warrant some probable conclusions. It is not to be supposed that the older population was exterminated or expelled. The Gaulish invaders were few. The total number that first entered Asia under Leonnorius and Lutarius is stated as 20,000, of whom only half were fighting men; the rest were women and children (Livy, xxxviii. 16, borrowing from Polybius). Doubtless, other swarms followed, encouraged by the success of the first; but that was the main army. In the continual wars and marches and raids of the following 46 years, the number of deaths was probably larger than the number of births; and the total Gallic population that was settled in Galatia, when its bounds were fixed by Attalus about 232, cannot have been numerous. In a country nearly 200 miles long, such a population must have been merely a small dominant caste amidst a much larger subject population; and Van Gelder expresses the general opinion of historical investigators, that the Gallic invaders did not live in cities, or become agriculturists, but employed the natives as cultivators of the land, on condition of paying to the Gauls as lords of the soil a proportion of the produce, while the conquerors occupied themselves in war and in pasturage, taking according to the usual practice one-third of the land, and leaving two-thirds to the older population (Cæsar, *Bell. Gall.* i. 31). As Lightfoot, in his edition of the Epistle, p. 9, rightly declares, the population consisted of Phrygians, Gauls, and Greeks, to whom were afterwards added a considerable sprinkling of Romans and a smaller number of Jews; and Van Gelder rightly points out that the cities were mainly populated by the Phrygians, who practised the arts of peace and conducted all trade, while the Gallic chiefs dwelt in their fortified villages (φρούρια, *castella*), keeping up a rude barbaric magnificence, and the mass of the Gauls led a pastoral and half-nomadic life when they were not engaged in war. As late as B.C. 189 the priests of the temple of Pessinus were opposed to the Gauls, and welcomed the Roman army of Manlius as deliverers; but that would hardly have been possible, unless the city had been really Phrygian and not Gaulish.* Van Gelder,

---

* Marquardt, *Röm. Staatsalt.* i. p. 359, errs in counting Amorium, Aizanoi, and Orkistos as cities of Galatia in the Roman period.

† Wrongly mentioned as perhaps the seat of one of the Churches of Galatia by many scholars.

* Körte (*Athenische Mittheilungen des Inst.* 1897, pp. 16 and 39) shows that Pessinus was not conquered by the Gauls till some year between 189 and 164; and he publishes an inscription of about A.D. 80–90, which shows that of the ten leading priests at Pessinus five were Gauls and five belonged to the original

p. 183, says of such cities as Tavium, Pessinus, Ancyra, 'those cities were in Galatia, but were not Galatian cities; they preserved Phrygian character and Phrygian customs, now affected with a Grecian tinge.' All Jews, Greeks, and resident Romans would certainly be dwellers in the cities. In the governing cities, Ancyra, Tavium, Pessinus, a number of Gaulish families doubtless settled, and formed an aristocracy. Ancyra and Tavium, especially, were Gaulish strongholds from 250 onwards (Manlius occupied Ancyra in 189); but Pessinus was more purely Phrygian. But, even in Ancyra, indubitably, the mass of the lower and trading classes was Phrygian or Greek.

In B.C. 189 the Galatian tribes are pictured by Polybius and Livy as barbarians, devoid of any trace of Greek culture, fighting naked, without order or tactics, armed with swords and large wooden or wicker shields; and their pastoral life, remote from cities and intercourse, long preserved their native customs. As the military power and the vigour of the Gaulish conquerors declined in the 2nd and 1st centuries B.C., they perhaps began to mix more freely with the older population; and the opinion has been expressed that they even adopted the native religion, on the ground that certain Gallic names occur at the great native sanctuaries, implying that Gallic families began to hold priesthoods: in the 2nd century the high priest of Pessinus, bearing the holy official Phrygian title Atis, had a brother Aiorix, and in the 1st century Brogitarus was priest at Pessinus, while Dyteutus, son of Adiatorix, was priest at Comana Pontica under Augustus. But although some Gaulish nobles assumed the place and swayed the enormous power that lay in the hands of the priest-kings of the great native temples,[*] it does not follow that the mass of the Gaulish people adopted the Phrygian religion.

Further, it has even been asserted by some recent scholars that the Gauls adopted to a large extent the manners and customs of the Græco-Phrygian population, retaining not very much of their Gallic ways and habits in the 1st century after Christ; but this opinion seems contrary to the evidence, and against natural probability.[†] The Gauls, though readily civilizable, have not been quick to throw off national character and put on foreign characteristics. Moreover, they seem to have long retained the Gallic language, for Strabo mentions that all three tribes spoke the same language and had the same manners; and so late as the 4th century after Christ, Jerome declares that they were bilingual, speaking Greek and a dialect like that used by the Treveri in Gaul (though changes had occurred).[‡] Now, it is difficult to believe that a small caste amid a larger population could have adopted entirely the religion and customs of the surrounding population and yet retained their separate language. The first step in Hellenization was always the adoption of the Greek language. Moreover, Strabo, in speaking of their uniformity of character, evidently does not mean that they had all adopted the Græco-Phrygian manners and ways, but distinctly implies that there was a common Gallic character among the various tribes. The ambition of their chiefs, who found that the shortest way to power lay in adopting the civilized methods of Greece and Rome, probably caused the first steps in change to be made. The chiefs connected themselves with the powerful priesthood, became priests themselves, and gradually the freer old Gaulish system was replaced by the tyranny of kings. The general opinion among those scholars who hold the North-Galatian theory seems to be right, that these Gauls, even in A.D. 50, retained much of the Gallic character; and they vainly seek to support that theory by finding Gallic characteristics in the congregations to which St. Paul wrote his Epistle. When Livy (xxxvii. 8) speaks of *exoleta stirpe gentis*, as the fact of his own time, he refers to the decay of their warlike character rather than to any change of manners and customs.[*] Lightfoot (p. 12) rightly says, 'the tough vitality of the Celtic character maintained itself comparatively unimpaired.'

No trace remains in local inscriptions (chiefly A.D. 100–250) of Gallic manners or language, and little of Gallic names; but that does not prove that the Gallic manners and language had been lost. A Gaul who received any education learned Greek; and all who wrote, wrote in Greek. The Gaulish language was a proof of barbarism, and a reason for shame (whence the contempt for Galatians which appears in the Cappadocian Fathers, see Ramsay, *Historical Geography*, p. 288); no one would blazon his want of education to the world, and it may be doubted whether any one could write who spoke only Gaulish. Moreover, the inscriptions almost all belong to the great cities, which were civilized seats of Græco-Roman culture, inhabited by Greeks, Romans, Phrygians, Jews, and Romanized Gauls (the latter forming a small aristocracy). Ancyra was quite a Romanized city, civilized and rich; and Pessinus was so in a less degree. The native languages of Asia Minor, Phrygian, Lycaonian, etc., persisted through the Roman period, until destroyed by the language of the NT, but no traces of them remain in inscriptions (except a few execrations on tombs in the Phrygian language).

In the time of St. Paul, therefore, there was probably a great and marked difference between the rustic Gaulish population of Galatia, who retained much of the old ruder barbarian character, and were probably little affected by Greek manners or language,[†] and the population of the cities, who spoke Greek, and the majority of whom were not of Gaulish origin.[‡] But, while continuing Gauls in feeling, the Galatian tribes in A.D. 50 must have been to some extent affected in habits and standard of life during three centuries spent as a conquering caste amid more civilized peoples. The chief point to notice is that they were an aristocracy among inferiors; and the effect produced by that long experience on a race always proud, free, and bold, must be estimated.

It is not justifiable in any case to select one or two of the long list of vices in Gal $5^{19.21}$, and quote some passage in which a similar fault is charged against Gauls; the list in these verses is chargeable against human nature, not specially against Gaulish nature. In $6^{6.7}$ niggardliness is a characteristic of the Galatians, and in 1^{6} they change their religion quickly. It may be doubted whether either fact was characteristic of the Gauls; though fickle in some respects, they never were quick to change their religion, but rather the con-

---

priestly families (*Woch. f. klass. Phil.* 1898, p. 3); the arrangement was probably made B.C. 189–164. Gordium, a great emporium in 189, must have been Phrygian; later, it was conquered by Gauls, and disappeared from history.

[*] On the priestly power see Hennig, *As. Min. Reges Sacerdotes*; Ramsay, *Cities and Bishoprics*, i. pp. 10 f., 101 f., 130 ff., 292 ff.

[†] The name Gallogræcia is appealed to as evidence of the Hellenization of the Gauls; but this name is Roman in origin, and had no such implication among its originators.

[‡] Mommsen (*Röm. Gesch.* v. p. 92) accepts the testimony of Jerome, which Perrot and Van Gelder try to discredit.

[*] The speech of Manlius, xxxviii. 17, is apparently Livy's free invention, and contains a similar sentiment.

[†] Similarly, Mommsen (*Röm. Gesch.* v. 92) shows that in Gaul the Gallic language continued in common use at least as late as the 4th century.

[‡] Salmon fully recognizes that the Christians of the North-Galatian Churches were not as a rule the Gauls, but the Phrygians; and that the attempt to find Celtic characteristics in those whom St. Paul addresses is a failure (Smith, *DB*² i. p. 1106).

trary;* greedy to seek money they were said to be, but at the same time the fault to which they tend is to be too apt to spend even to ostentation. The further quality, that the Galatians are 'a superstitious people given to ritual observances,' was peculiarly characteristic of the type of religion widely spread over Asia Minor, with its great seats at places like Pessinus, Pisidian Antioch, Comana, Ephesus, etc. We may say that the characteristics of the Galatian congregations are those of the general native population of Asia Minor, and not those of the Gauls.

After the Roman imperial centre was transferred first to Nikomedia, and afterwards to Constantinople, the Hellenization of Galatia proceeded much more rapidly, for the north side of the plateau then rapidly advanced in civilization and importance (Ramsay, *Histor. Geogr.* pp. 74, 197 ff.), while the south side, which had previously lain on the line of the greatest routes, declined. Christianity spread the knowledge of Greek in the 4th cent.; and hence we find expressions like that of Themistius (p. 360), that Galatia is almost wholly Greek. That, however, is a rhetorician's phrase; Jerome and the contempt expressed by Basil and Gregory show that it is probably exaggerated; but, even if it be near the truth, it must not be applied to the 1st cent.

Galatia Proper, as it was in the 1st or 2nd cent., was a rough oval in shape, extending about 200 miles in length (east to west), and 100 miles in breadth at the most. It is probably the most monotonous and least picturesque country of Asia Minor, so far as it is known; but its north-eastern and eastern and southern parts are hardly explored. The climate is severe in the long winter; and the want of trees over great part of the district (especially near the lines of road, except part of that leading to Constantinople) makes the heat of summer great. There is a considerable extent of fertile soil (with much more pasture land, and barren undulating hilly ground) producing grain, fruits, cotton, tobacco, opium, etc.; but, owing to difficulties in transport, the only important products for commerce are wool and mohair (the fleece of the beautiful Angora goat). In the Byzantine period, after being ravaged by Persians and Arabs, Ancyra with Galatia in general (west of the Halys) passed into the hands of the Seljuk Turks, was held by the Latins for a short time, taken by Tartars, and finally captured in 1354 by the Turks under Suleiman.

The earliest reference to Christianity in North Galatia is at Ancyra, where the local church (ἡ κατὰ τόπον ἐκκλησία, cf. Ramsay, *Cities and Bishoprics of Phr.* i. p. 272 f. No. 192) is mentioned about A.D. 192 in an anti-Montanist treatise as having been affected by Montanism and saved by the writer (Euseb. *HE* v. 16). Many martyrs suffered there under Diocletian, some of whom may have been brought from other parts of Galatia for trial at the capital; the dates are not recorded, and only the names of most are known, but probably all may be placed in the great persecution (Clemens, Donatus, Papias, etc., 23rd Jan.; Theodotus, etc., 18th May; Plato, etc., 22nd July; Gaianus, Julianus, Rufinus, etc., 31st Aug.; Marcellus, Silvanus, Gaianus, etc., 4th Sept.; Seleucus, Valerius, etc., 15th Sept.; Eusebius episcopus, 16th Sept.; children, 23rd Sept.; Theodorus episc., 3rd Nov. or 6th Apr.; Eutychus, Domitianus, 28th Dec.). Any other early Churches in North Galatia have been overwhelmed in oblivion, and hardly a trace of them survives. At Juliopolis, the martyrs Plato (22nd July, see above), Heuretos, and Gemellus were venerated in the 6th cent., but their connexion is uncertain.* At the Ancyran Council (A.D. 314) a full muster of Galatian bishops might be expected, but only Ancyra and Juliopolis were represented. The following bishoprics also can be traced in the 4th cent.: Kinna, 325; Tavium, 325; Aspona, 344; Pessinus, 403.† But in the 5th cent. there come into our knowledge Mnizos, 451; Orkistos, 431‡; Petenissos, 451; Eudoxias, 451; Amorion, 431; Myrikion, 451; and in the 6th or later, Verinopolis, 680; Kaloumne, 879; Klaneos, 680; Germa, 553. We cannot conclude with certainty that a bishopric did not exist in the 4th cent., though it was not represented at the early Councils; but, remembering that Galatia was situated so conveniently for the early Councils of Ancyra, Nicæa, and Constantinople, we must see in this list, when compared with those of the more distant Byzantine provinces Lycaonia and Pisidia, a proof that Galatia was late in taking its proper rank in the Christian world. Ancyra and the road to Constantinople are the early home of Galatian Christianity; and from thence it spreads. Above all, it is clear that western and south-western Galatia (where Zöckler and Salmon place the Pauline Churches, and where Zahn, etc., believe that St. Paul preached) are latest of all in being thoroughly christianized, Germa, Klaneos, Myrikion, Eudoxias, Petenissos (only Pessinus, Orkistos, and Troknades [the latter two in Roman Asia] can be traced to the 4th cent.). The inference drawn from the bishops' lists is confirmed by epigraphic evidence, which points to the conclusion that (except in Pessinus, where 4th cent. Christian inscriptions occur) Christianity was late in taking root in south-western Galatia (*Zeitschr. f. vergl. Sprachf.* 1887, p. 383). There are a considerable number of Christian inscriptions in Tavium and other parts of East Galatia; but all are of late date.

The Galatian Jews have left few memorials. A rather bold speculation (Ramsay, *Cities and Bishoprics of Phr.* i. pp. 648 ff., 673) assigns Jewish origin to some noble families of Ancyra; and a report is spread that a highly important Jewish inscription has been found there, but it is not yet published. Jewish names occur in several late inscriptions, probably of Jewish Christians, *e.g.* at Pessinus, Matatas (according to Lightfoot, p. 11, but the text is untrustworthy, *CIG* 4088); at Eudoxias (Yürme), Jacob the deacon [δ]ειάκωνος and Esther; at Tavium, Daniel, etc. *CIG* 4129, which is Jewish, is wrongly assigned to Galatia by Schürer (*Jüd. Volk*, i. p. 690), Franz, etc.; it belongs to Asia, being found near Dorylaion. The decree of Augustus, quoted as giving special privileges to Jews at Ancyra by Lightfoot, Schürer, and many others, depends on an error; it was addressed to the Koinon of Asia (*Studia Biblica*, iv. p. 41 f.). The Jews settled in the Seleucid colonies of Phrygia (GALATIA II.) spread gradually to the great cities of Galatia Proper.

II. GALATIA PROVINCIA is a complicated subject, and the mass of details is unintelligible, unless we observe the force which guided all the changes, viz. the Roman frontier policy, which sought to educate barbarous tribes up to the Roman standard by a gradual process, first placing them under a dependent and allied king, who could control them by his presence and armies (Strab. p. 671), and then receiving them into the Empire as they became civilized and orderly. During the 1st cent. A.D. the province G. embodied the Roman spirit in central Asia Minor, as opposed to the native kingdoms bordering on it; and the history of *G. Provincia* is the history of Roman policy in its advance towards the Euphrates frontier—a long slow process, in which the Roman genius undoubtedly was exerted to the utmost to influence and impress, to educate and discipline, the population of the various countries taken into the province Galatia (see also GALATIANS).

---

* They were proverbially credulous of reports or of anything that flattered their vanity; see Cæsar, *Bell. Gall.* iv. 5; Martial, v. 1, 10.

* On 15th April, martyrs *in Taudia Galaciæ* probably belong to Gallæcia. A martyr, Dikasios of Tavium, of unknown date, is mentioned; a Dikasios was bishop there in 325.

† Lagania is added by Le Quien; but Erechtius, the bishop in question, was more probably of Egdaumana or Glavama, a Lycaonian see on the Galatian frontier, as appears from the forms Damanitanus, Gadanitanus, Gatmaneas, Planathon, etc.

‡ Orkistos in A.D. 331 claimed to be wholly Christian in a petition to Constantine, *CIL* iii. 7000: it was at that time subject to Nakoleia in Asia, and could not therefore be a bishopric. Amorion, Orkistos, and Troknades were joined to Galatia about 386–395, *Hist. Geogr. As. Min.* p. 221.

The South-Galatian theory, then, takes the foundation of the Galatian Churches as an episode in the political and social history of the province; and inasmuch as several questions in Acts turn on the exact boundaries of the province, it is necessary to be minute and accurate as regards its growth (which is nowhere described fully).

Amyntas, formerly a secretary of Deiotarus, was made king of Pisidia by Antony in 39, at the same time as Darius, grandson of Mithridates, was granted the kingdom of Pontus, and Polemon (son of Zenon, the rhetor of Laodiceia) that of a part of Cilicia (*i.e.* either Ketis, or more probably the whole of Cilicia Tracheiotis). All were dependent on Rome, and paid tribute (Appian, *Bell. Civ.* v. 75). Amyntas' kingdom included Apollonia and Antioch (a district which had been set free by Rome in B.C. 190, Strab. pp. 569, 577).

In the interval between 39 and 36 Darius died or was disgraced. Polemon was his successor, and in 36, as king of Pontus, accompanied Antony to the Parthian war; and as a reward for his services therein Armenia Minor was added to his kingdom in 35 (Dion Cass. xlix. 33; cf. Plutarch, *Ant.* 38). Polemon lost his Cilician kingdom early in 36, and probably Pontus was given him in compensation.[*] Antony, returning from Tarentum, gave all Tracheiotis except Seleukeia to Cleopatra (Strab. pp. 671, 669) as part of a great Asiatic kingdom;[†] and a Cleopatran era was instituted, of which the year 1 ended 31st Aug. B.C. 36 (Porphyrius, *ap.* Müller, *Fragm. Hist. Græc.* iii. 724).

In 36 Amyntas received from Antony a large accession of territory, viz. Galatia Proper with parts of Lycaonia and Pamphylia (Dion Cass. xlix. 32). His kingdom included most of the great plains between Lake Tatta and Taurus (Strab. p. 568). The gift of part of Lycaonia was evidently intended to make his territory continuous, so that the Galatian portion should not be divided from the Pisidian portion by alien territory. Iconium, therefore, was necessarily included in it, as otherwise continuity could hardly be attained.[‡]

Amyntas and Polemon supported Antony at Actium, B.C. 31, but were confirmed in their kingdoms by Augustus in 30. Amyntas received Tracheiotis in addition, including Isaura (Strab. p. 569), and he was permitted freely to enlarge his kingdom out of non-Roman territory. Part of Lycaonia, including Derbe and Laranda, had been seized by Antipater, once a friend of Cicero (*ad Fam.* xiii. 73); this was conquered by Amyntas (Strab. p. 569), but he soon afterwards perished, in B.C. 25, in attempting to reduce the Homonades, a people on the borders of Lycaonia, Pisidia, and Isauria (in the country south and east of Bey-Sheher lake).

The kingdom of Amyntas passed with his whole property to the Romans, and a new Roman province was constituted, called Galatia, doubtless because Amyntas had been since 36 currently known to the Romans as king of Galatia (compare ASIA). The sudden death of Amyntas caused great confusion; months must have elapsed before news reached Rome, and instructions came back after deliberation. Lollius was named as first governor of Galatia Provincia. He needed an army to carry out the change. Thus time elapsed, and only in B.C. 20 was the question of frontier and bounds settled. Pamphylia was apparently not included in the new province, though sometimes the old attachment remained (Tacitus, *Hist.* ii. 9). Tracheiotis was given to Archelaos, king of Cappadocia, being tacked on to Eastern Lycaonia (*i.e.* Kybistra, etc.)[*] as an eleventh or 'added' *Strategia* of Cappadocia (*ἐνδεκάτη* or *ἐπίκτητος*, Strab. pp. 535, 537; cf. Appian, *Bell. Mithr.* 105, 114). Strabo (p. 671) says emphatically that the same extent of Cilicia Tracheiotis was ruled by Archelaos as had been held previously by Cleopatra (36–31) and Amyntas (30–25);[†] cf. also the inscription *CIA* iii. 545. Archelaos in A.D. 17 was summoned to Rome and degraded. He had been a weak prince, and when he, a few years previously, became temporarily insane, Augustus had appointed a *tutor*, and had also taken from him part of Tracheiotis, permitting Ajax about A.D. 11–12[‡] to become high priest of Kennatis and Lalassis with right of coinage. Cappadocia became a province in A.D. 17, but apparently Archelaos, son of the old king, was allowed to retain Eastern Lycaonia and part of Cilicia, while M. Antonius Polemon became dynast of Olba, Kennatis, and Lalassis,[§] and reigned at least 11 years. In 36 Archelaos II. was king in Tracheiotis, and his attempt to take a *census* after the Roman style caused a revolt in Ketis, which seems to imply that Antonius Polemon's rule had passed to Archelaos (Tacitus, *Ann.* vi. 41; *Expositor*, April 1897, p. 281). In 37 Tracheiotis and Eastern Lycaonia were given to Antiochus, king of Commagene; and though he was disgraced soon, yet Claudius in 41 restored his kingdom.[‖] He struck coins with the legend ΛΥΚΑΟΝΩΝ, implying probably that Laranda was added to his kingdom (it had been in the province since

---

[*] It is beyond doubt (Raillard, *Numismat. Zeitschrift*, 1895, p. 23 ff.) that Strabo, pp. 493, 495, 499, 556, 560, 568, 578, is always alluding to the same Polemon, the famous king of his own country Pontus, and the trusted ally of Rome; it is inadmissible to separate one of these allusions from the rest as denoting some otherwise unknown Polemon. Strabo everywhere assumes that his readers recognize the one famous Polemon. But, as Mommsen clearly shows (*Ephem. Epigraph*, ii. p. 259 ff.), it is impossible to suppose that this Greek king was the Roman M. Antonius Polemon; the coins with that name on them belong probably to the period about A.D. 17–28. See below, note §.

[†] On the date, see Kromayer in *Hermes*, 1894, p. 574 f.; Gardthausen, *Augustus und seine Zeit*, i. pt. 1, p. 293. Plutarch, *Ant.* 36 (cf. 54), and Dion Cass. xlix. 32. 3–5 (who omits Tracheiotis), are decisive as to the year, and Josephus (who gives 34, *Ant. Jud.* xv. iii. 5–iv. 1) has made a mere error.

[‡] Moreover, Amyntas proceeded to conquer Derbe, implying that he already had Iconium to start from. Previously Polemon's Cilician kingdom had included Iconium (Strab. p. 568); and hence in the *Acta Pauli et Theclæ* his descendant Tryphaina had estates in the region of which Antioch was the governing centre (Ramsay, *Church in Rom. Emp.* p. 396), and which included Iconium.

[*] This Lycaonian *strategia*, originally extending up to Derbe, was given by Pompey to Ariobarzanes, king of Cappadocia, in B.C. 64; but Antipater seized Derbe and Laranda, defying the Roman policy (apparently in the troubles following 50, Strab. p. 535). The Roman governors of Phrygia and Cilicia, B.C. 60–50, retained the right of passage across by Kybistra from Iconium to Tarsus (Cicero, *Fam.* xv. ii. 2, iv. 4; *Att.* v. xviii. 1, xx. 2).

[†] Ketis must be included in this kingdom, and cannot therefore have been under separate dynasts with right of coinage, as some scholars have thought, at any period between B.C. 36 and the disgrace of Archelaos; but Aba ruled Olba under Cleopatra as overlord till 31 (Strab. p. 672).

[‡] Coins of his second year name Augustus, of his fifth year Tiberius (Waddington, *Mélanges de Numism.* ii. p. 126).

[§] He is mentioned by Strabo (p. 556), who makes him grandson of Polemon, king of Pontus; but probably the text is falsely arranged, and Strabo refers to the son of Polemon (who first held rule without title under his mother, queen Pythodoris, after Polemon died, and then about A.D. 17 or 18 was made dynast of Olba; see Ramsay, *Church in Rom. Emp.* p. 427 f.).

[‖] But he gave Olba, Kennatis, and Lalassis to Polemon II. king of Pontus (see below, Waddington, *l.c.* p. 129).

B.C. 25, but it was the key to Tracheiotis, and necessary for successful administration of the kingdom). Thus Derbe came to be the frontier city of the Roman Province; and it was probably this important position that led to its receiving the honorary title Claudio-Derbe.

G. Provincia had meanwhile been enlarged also on the north-east, and contained, when St. Paul visited it, the following districts in addition to G. Proper (all are mentioned in inscriptions of the 1st century under these names): (1) *Paphlagonia*, incorporated B.C. 5 (probably on death of Deiotarus Philadelphus).* (2) Parts of *Pontus*, incorporated at various dates (Sebastopolis, Amaseia, and probably Gazelonitis in B.C. 2–1, Comana in A.D. 34–35), and called as a whole *Pontus Galaticus*, *i.e.* Pontus belonging to G. as distinguished from *Pontus Polemoniacus*, which was governed by Polemon II. (that kingdom was ruled by Polemon II. A.D. 37–63, his mother Tryphæna being associated with him until 54: † in 63 it also was incorporated in Galatia, but retained the distinguishing name Polemoniacus). (3) *Phrygia*, including Apollonia, Antioch, and Iconium (wh. see): as contrasted with *Phrygia Asiana* (Galen, *π. τρ. δυν.* iv. p. 312, vi. p. 515 Kuhn), it would naturally be termed *Phrygia Galatica* (a title preserved only in a note of martyrdom, *Acta Sanctorum*, 28th Sept., p. 563, where *Galaciæ* is printed): see PHRYGIA. (4) *Pisidia*, Ac 14^{24}. (5) Part of *Lycaonia*, including the cities Lystra and Derbe, and some other places not yet organized as cities (such as Hyde, Barata, Perta, etc., summed up in Ac 14^{6} as *ἡ περίχωρος*). In contrast to *Lycaonia ipsa* (Pliny, *NH* v. 95), *i.e.* the non-Roman country governed by Antiochus and styled *Lycaonia Antiochiana* (*CIL* x. 8660), it was doubtless called *Lycaonia Galatica*, like *Pontus Galaticus*, *Phrygia Galatica*. (6) *Isauria*, the territory attached to the city Isaura, and called Ἰσαυρικὴ (χώρα) by Strabo, pp. 568, 569. It has been maintained that the name G. was never employed in correct official usage to denote this large composite province, and that the proper and technical usage was to designate the province by enumerating its component parts. This position is untenable, and has been frankly abandoned by one of its champions, Prof. E. Schürer (*Theolog. Litteraturztg.* 30th Sept. 1893). The following arguments are decisive against it.

(*a*) Ptolemy devotes the successive chapters of his Book V. to the Roman provinces of Asia Minor: ch. 1. *Πόντου καὶ Βιθυνίας* (the official name was strictly double, and so was the constitution in some respects); 2. *τῆς ἰδίας Ἀσίας* (as distinguished from Asia the continent); 3. *Λυκίας*; 4. *Γαλατίας* (containing Paphlagonia, and parts of Pisidia, Lycaonia, and Isauria, with the cities Antioch, Lystra, Isaura); 5. *Παμφυλίας* (which he says is bounded by Galatia on the north).

(*b*) Pliny (who often uses G. in the narrower sense of G. Proper) defines in v. 146, 147, Galatia (*i.e.* the province) as reaching to Cabalia of Pamphylia and to the Milyæ, and as containing Lystra and various cities in the Phrygian, Pisidian, and Paphlagonian territories, altogether 195 peoples.‡

(*c*) Tacitus (*Hist.* ii. 9) mentions Galatia and Pamphylia as being governed by Calpurnius Asprenas, implying that the two formed one great continuous district. Eutropius (vii. 10) and Syncellus (i. p. 592) apply the name G. to the whole province formed in B.C. 25; and they simply reproduce an old authority, using G. in a sense which it no longer bore in their time.

(*d*) A practical people like the Romans would never use as the strictly technical and official title of a province 'Galatia, Paphlagonia, Pisidia Phrygia, Lycaonia, Pontus Galaticus.' That accumulation of names was used for the sake of clearness on milestones, enumerating the *Viæ* of the various districts of the province (*CIL* iii. 312, 318), and on honorary inscriptions to give additional dignity to the governor of so many vast regions. These inscriptions belong to the later years of the century, when the constructive effort was exhausted, and the national spirit was reviving (Hadrian, at last, frankly recognized it).

It is, however, clear that it was not the current and popular Greek usage to designate G. Provincia by the name Galatia. The Greek-speaking natives, so far as evidence survives, called it the Galatic Province (*CIG* 3991), or enumerated the parts. It was only those who adopted fully the Roman point of view that employed the simple name Galatia; and the use of that name must be taken as a sign that the person who uses it speaks as a Roman, and deliberately follows the Roman provincial divisions, and would destroy those national distinctions which were opposed to the organized Roman unity. It is implied in the South-Galatian theory that St. Paul took that view (see GALATIANS II.). The author of Acts, however, did not take that view; and he never speaks of the province as Galatia, but mentions its parts (see GALATIA, REGION OF, IV.).

No information has been preserved to enable us to sketch the constitution of this vast province, except that it was governed by a prætorian *legatus Augusti pro prætore*, and had no legions stationed in it. The name Γαλατικὴ Ἐπαρχία, which the people of Iconium employed to designate the province about A.D. 54 (*CIG* 3991), clearly implies that the intention was to work the province into a unity, like *Asia Provincia*, and to override the national distinctions of Lycaonian, Phrygian, etc. Undoubtedly, this attempt ultimately proved a failure: the national characteristics were too strong, and revived after a time. But in the period of growth (B.C. 25 to A.D. 63) a vigorous effort was made to impose a Roman unity, expressed by the Roman title *G. Provincia*, on the various races. If we could trust a rather bold interpretation of an inscription, which seems to make Apollonia a part of the Trokmi (*Studia Biblica*, iv. p. 53 f.), it would even appear that the attempt was made to enrol the various parts in one or other of the three Gaulish tribes of G. Proper (*τὰ τρία ἔθνη*), just as Asia with its equally great variety of peoples was 'the nation Asia' (*ἡ Ἀσία τὸ ἔθνος*, Dion Cass. liv. 30); so the term *ἔθνος* is frequently applied in inscriptions to designate any entire province, however varied its population was. Unfortunately, inscriptions other than epitaphs are very rare in the province Galatia.

Ancyra was the capital of the province G.; and it is probable that Colonia Cæsareia Antiochia (see ANTIOCH) was a sort of secondary metropolis, being the centre of a system of Roman garrison towns (*coloniæ*) and military or imperial roads (*ὁδοὶ βασιλικαί*, Ramsay, *Church in Rom. Emp.* p. 32), and a place where ceremonies of the provincial cultus were held (*op. cit.* p. 396). Probably, the various parts of the province retained some separate individuality, though its nature is uncertain. Even after Pontus Galaticus and Pontus Polemoniacus had been merged in G. Provincia, they retained their separate names (in inscriptions and in Ptolemy), which implies that these artificial divisions of purely Roman origin had some real political distinction to preserve their separate existence. So also St. Luke seems to indicate some distinction between the districts of the province (see GALATIA, REGION OF). Metropoleis of various districts are known from coins or inscriptions (Pompeiopolis of Paphlagonia, Laranda of Lycaonia, Sagalassos of Pisidia, Isaura of Isaurica, Amaseia and Neocæsareia of the Pontic divisions); but the titles appear only in the 2nd or 3rd century, and are no argument for the Pauline period. Whether the Koinon of G. was a provincial institution or confined to Galatia Proper, cannot be determined; but the Koinon of Lycaonia (which has been quoted as a similar institution) was not founded till Lycaonia was incorporated (probably by Pius) in the new province of the Three Eparchiai (Ramsay, *Histor. Geogr.* p. 377).

---

* On the date, see *Revue des Ét. Grecques*, 1894, p. 251.

† Imhoof Blumer, *Zft. f. Numism.* 1897, p. 269.

‡ Paphlagonia Galatica and Pontus Galaticus are called Γαλατία, Dion, 48, 33, 5 (see Holder, *Altk. Sprachschatz*, p. 1591), and Steph. Byz. *s.v.* *Κάρανα* (Strab. p. 560).

The number of Roman foundations made in G. Provincia between B.C. 20 and A.D. 50 is an index of the vigour with which the imperial policy was urged on in that region. Augustus founded seven colonies—Germa in North Galatia, and Antioch, Lystra, Parlais, Cremna, Comama, Olbasa in South Galatia, besides a system of roads and milestones measured from Antioch. Nothing comparable in scale to this was done by him in any other part of the East. Under the succeeding emperors, we find several cities remodelled and Romanized in character and name: Pappa-Tiberiopolis, Claudio-Seleuceia, Claudio-Derbe, Claudio-Iconium, all in South Galatia.

Owing to the enormous extent of the Province G., the greatest variety of soil and scenery and products are found in it, from the dead-level plains on the Lycaonian and Cappadocian frontier, with their vast herds of sheep (alike now and in ancient times, Strab. p. 570), to the picturesque mountains and deep glens of Pisidia. On the northern half, see I.; the southern half was a highly cultivated and rich country in the 1st century, containing many great cities, traversed by the two important roads from east to west—one from Cilicia through Iconium and Antioch to Apameia and the Ægean coast, one from Commagene through Cæsareia Capp. and Laodiceia Katakekaumene to Apameia.[*] All intercourse by land between inner Asia and the west passed through the great Roman cities of South Galatia. Hence the great stream of intercourse backwards and forwards between Rome and the East, which played such an important part in moulding Christian history, affected these cities very strongly and developed them rapidly. Questions of doctrine and ritual were debated there at an early time, and called for decision. Jewish emissaries from Jerusalem (Gal 1^7 4^{17} etc.) would naturally pass through them and affect them first. On the other hand, as Rome was the magnet that attracted all intercourse, it is not so easy to see how Jewish emissaries should affect Ancyra very early; and utterly improbable that they should affect the towns in the western parts of Galatia Proper.

That Jews in large numbers dwelt in the cities of Phrygia Galatica is well known. They were greatly favoured as colonists by the Seleucid kings; and their presence may be confidently looked for in all Seleucid foundations. Seleucus I. and his successors found them loyal and trusty settlers in their garrison cities, such as Antioch, Apameia, etc., cities which served to maintain the Seleucid power in a foreign land. The Jewish colonists had the right of citizenship, along with various special privileges of a kind which their religious ideas required, as regards burial, money grants in place of oil-distribution, etc.; and their privileges and rights seemed to have been summed up in a body of city law, called in an Apamean inscription *νόμος τῶν Ἰουδαίων* (Ramsay, *Cities and Bishoprics of Phrygia*, pp. 538 f., 668 f.). Seleucus I. granted them citizenship in all his colonies, implying that there were Jews in all, and his successors carried out the same policy (Jos. *Ant. Jud.* XII. iii. 1, § 119, 125); and Antiochus the Great about 200 B.C. brought 2000 Jewish families from Babylonia to the cities of Phrygia and Lydia (*id. ib.* § 148 ff.). These Seleucid colonies were almost all planted on the southern side of the plateau, and chiefly on the great lines of communication leading east and west; and the mass of Jewish colonists are to be expected in the cities along these routes. They penetrated farther north in the course of trade; but their settlement in North Galatia belongs to a period later than their establishment in the south.

The Jewish colonists undoubtedly exercised great influence on the development of Asia Minor in the Roman period; but they have left few conspicuous traces of their presence. They adopted Greek and Roman names (at least in public life), and it is doubtful how far they retained any knowledge of Hebrew; hence they are hardly to be distinguished from the ordinary citizens, and the attempt to do so in ch. xv. (also xiv.) of *Cities and Bishoprics of Phrygia* is very speculative. But they seem to have taken part in public life, and to have exercised great influence through their wealth and ability, as well as through the power of their peculiar and impressively pure religion. Even the marked analogy which existed in point of ceremonial between the Asianic and the Judaic religion increased the influence of the latter (see GALATIANS II.).

Few Jewish or Jewish-Christian inscriptions can be detected in South-Galatian cities, because the names are usually unrecognizable and few emblems or Jewish formulæ are employed: in Antioch, Sterrett, *Epigr. Journ.* No. 138 (cf. *Cities and Bish. of Phrygia*, p. 525 n. 1); and at Apollonia, *Bull. Corr. Hell.* 1893; in Iconium, *CIG* 4001*b*, 3998, 3995*b*, 9270; and in Laodiceia Combusta, *CIG* 3989*d*, and *Athen. Mitth.* xiii. pp. 241, 254, 255, 258, 260. Among the few known inscriptions of Lystra and Derbe none have any Jewish appearance, except one with the name Mouisas at a village a little west of Derbe (Sterrett, *Wolfe Exped.* No. 46).

Christian inscriptions are comparatively numerous in Galatic Phrygia and Lycaonia, especially in the country that lies north and north-west of Iconium; and, though none are dated, yet style indicates that some must be as early as the 3rd century. Besides the Jewish-Christian ones just mentioned, others certainly or probably Christian (some perhaps Jewish-Christian) and early (omitting all that are later), are *A. E. Mitth. Oesterr.* 1896, p. 36 f., Nos. 20, perhaps 19, 24; Sterrett, *Epigr. Journ.* 142, *Wolfe Exped.* 555 (see *Expositor*, Oct. 1888, p. 263), *Journ. of Hell. Stud.* 1890, p. 165, No. 23 (cross above omitted by editor), *Athen. Mitth.* xiii. p. 249 ff. Nos. 44, 49, 53, 54, etc., with others unpublished. As is pointed out in *Cities and Bishoprics of Phrygia*, i. pp. 511, 715 f., epigraphic evidence would suggest that this district is one of those where Christianity took the earliest and strongest hold. Little is known about the later history of the Churches of Galatic Phrygia and Lycaonia. It is suggested that St. Mark carried on evangelization in the eastern districts after about 60 A.D.;[*] and his name is commoner than any other except Paul and John in the Christian inscriptions of the district (*Athen. Mitth.* xiii. p. 252 ff. Nos. 55, 56, 61, 92, 99; *St. Paul the Trav.* p. 351). Round Iconium, Antioch, and to a less degree Lystra, clings a great body of early tradition; but Derbe is as little prominent in tradition as in the narrative of Ac, and the earliest known bishop seems to be Daphnus, 381.

---

[*] On the roads, see *Histor. Geogr.* pp. 43 f., 49 f. etc.

[*] Bartholomew, the apostle of the Lycaonians, is probably to be connected with the Inner Lycaones of the province Asia (*Cities and Bishoprics*, i. 709).

III. In 2 Ti 4^{10} Tischendorf with ℵ reads *εἰς Γαλλίαν*, WH *εἰς Γαλατίαν*. The former reading would necessitate a new article containing an account of Gaul (*Γαλλία*): even the latter reading, as many contend, refers to that country (cf. Theod. Mops. *ad loc.*). Gaul is called *Γαλατία* by many Greek * writers; and, beyond doubt, that was the current Greek name in the 1st and 2nd cents.; but it may be doubted whether St. Paul, whose usage in names geographical is thoroughly Roman,† would not here also employ the Roman term, if he meant Gaul. Moreover, it could not escape him that *Γαλατία* would be ambiguous, and would naturally be understood as Galatia by Timothy, who was resident in Asia; and it is highly probable that he would not use that term to signify Gaul without employing some of the various ways of distinguishing. We must conclude that either St. Paul meant the same country which he elsewhere calls Galatia, or the true reading is ΓΑΛΛΙΑΝ, which would readily be corrupted into ΓΑΛΑΤΙΑΝ. Manuscript authority, however, is generally considered decisive in favour of *Γαλατίαν*, though Tischendorf thinks otherwise. Against Tischendorf's reading it has been stated that *Γαλλία* or *Γάλλοι* is first used in Greek by Epictetus (or rather Arrian), *Dissert.* ii. 20. 17 (Lightfoot, *Gal.* p. 3 note); but Strabo (p. 195) has *Γαλλικόν*, used in a way suggesting that he recognized it to be the Roman equivalent to the Greek *Γαλατικόν*.

Fourth century tradition says that Crescens was sent to Gaul; and the Churches of Vienne and Mayence claimed him as their founder; but the latter claim is certainly improbable, and the whole tradition may be founded on a false interpretation of 2 Ti 4^{10}. There was a natural desire to connect the Gaulish Church with apostolic times; this would lead to the interpretation of G. in that passage as Gaul; the name *Γαλλίαν* would be written as a gloss on the margin, and this false reading finally crept into a few manuscripts. Tillemont's argument (*Mémoires pour servir* etc., i. art. 52, note 81, pp. 133, 263), that the evangelization of Gaul did not take place so early as this supposed mission of Crescens, has never been seriously shaken, and remains the most probable view.

Even more improbable is the view that in 1 Mac 8^2 the reference is to Roman victories in Gaul. At the period in question, about B.C. 160, the Romans had recently conquered Cisalpine Gaul; but there is no reason to think that this not specially important event would produce any effect on the mind of the Jews. On the other hand, the Galatians were a terror in Asia for nearly a century; and even the victories of Attalus had only restrained the range of their power, but not broken it. But Manlius marched at will through their land, and defeated them in the heart of their country; and this event would be noised through the Seleucid dominions, and would naturally suggest to the Jews the desirability of entering into friendly relations with a government that could exercise such power on the Seleucid frontier.

W. M. RAMSAY.

GALATIA, REGION OF, more strictly rendered Galatic Region (*ἡ Γαλατικὴ χώρα*, Ac 18^{23}; *ἡ Φρυγία καὶ Γαλατικὴ χώρα*, Ac 16^6), is a phrase difficult to explain, because it takes us into the popular topographical terminology of a district and a period that are utterly obscure.

I. According to the North-Galatian theory, and also according to Zahn, who holds the South-Galatian view in all essentials, this term is merely a synonym for *Γαλατία* in the common sense of G. Proper. The difficulty in accepting this apparently simple interpretation is that the use of the term *Γαλατικὴ χώρα*, where *Γαλατία* should be expected, is not supported by analogy. The only analogy quoted is *ἐπὶ Ἀγκύρας τῆς Γαλατικῆς*, Arrian, *Anab.* ii. 4. 1; but this denotes, not 'Ancyra of the Galatic country,' as is assumed, but 'Ancyra the Galatic' as distinguished from Ancyra the Phrygian (*τῇ Φρυγιακῇ*, Strab. p. 567); Arrian, in describing the period of Alexander the Great, uses the word by anticipation. If the reference in Ac 16^6 18^{23} is to G. Proper, all Greek usage, earlier and later alike, demands that the noun *Γαλατία* should be used; and this is all the more necessary if (as is maintained on this view) it is coupled with the noun *Φρυγία*. The defenders of this interpretation can hardly plead that the obscurity of the subject should be accepted as an excuse for their failure to explain the reason of this perplexing and unnecessary deviation from common nomenclature; because the adj. *Γαλατικός* is used with comparative frequency in the topographical terminology of that period, and always in a well-marked and characteristic way. This point needs careful study. There is a regular tendency to distinguish the scope of the derived adjective in *-ικός* from the simple word: thus, for example, *οἱ Ἀτταλικοὶ βασιλεῖς* are the whole dynasty of which the Attali were the most prominent members (Strab. p. 288): *ἔργα Γαλατικά* are deeds perpetrated by anybody similar to *ἔργα τῶν Γαλατῶν*: *Γαλατικὸς κόλπος*, *Σικελικὸν πέλαγος*, etc., are the bodies of water adjoining or pertaining to Galatia, Sicily, etc.: *ἡ Ἰσαυρικὴ χώρα* was the whole region of which Isaura was the leading city, but it did not all belong to Isaura. Many examples might be quoted; but the closest parallel to the pair of terms *Γαλατικὴ χώρα* and *Γαλατία* is *Λακωνικὴ γῆ* and *Λακωνία*. *Λακωνία* is the old historic land of Lacedæmonia; but *Λακωνικὴ γῆ* comprises the entire region which had passed under Spartan rule and been added to Laconia, including Messenia and the land near Pylos (Thuc. ii. 25, iv. 41, v. 34; Xen. *Hell.* vi. 2. 9 and 31). As Spartan power dwindled, *γῆ Λακωνική* shrank in extent till it practically coincided with Laconia. The distinction is analogous to that between 'British territory' and 'Britain'; the former being enormously wider than the latter. There are cases in which, for some special purpose, the wider term may be used about the smaller country; but in ordinary expression the wider term is used only about the enlarged country. It is not safe to say more than that a tendency exists to observe this distinction; as time goes on, its delicacy often leads to its being blurred.* In the adj. *Γαλατικός* the distinction is well observed. In an Iconian inscription of A.D. 54, the enlarged Galatia Provincia is *Γαλατικὴ ἐπαρχεία* (*CIG* 3991); the part of Pontus included in the province is called *Γαλατικός* in many inscriptions and in Ptolemy: similarly, the corresponding term Phrygia Galatica once occurs. If St. Luke used *Γαλατικὴ χώρα* where *Γαλατία* would have been the simple and clear term, he contradicts all that we know of contemporary usage, and yet attains no conceivable purpose thereby. The Greek-speaking population of Asia Minor ordinarily called Galatia Proper *Γαλατία*, and Enlarged Galatia *Γαλατική* (usually with some noun): only when they adopted the Roman point of view, Greek-speaking persons occasionally and for some special purpose used *Γαλατία* in the Roman sense of the Province. Analogy points to the conclusion that the Greek Luke would use *Γαλατικὴ χώρα* to indicate the Province, which the Roman Paul calls *Γαλατία*.

---

* *Γαλατία* and *Γαλάται* are so used in Diodorus, Strabo, Josephus, Plutarch, Appian, Pausanias, Dio. Cass., Athenæus, etc.

† Zahn, *Einleitung*, § 11, A 4, and GALATIANS II.

II. Lightfoot argued that in Ac 16^{6} *τὴν Φρυγίαν καὶ Γαλατικὴν χώραν* must denote a single territory to which two epithets are applied, 'the region which in ancient time was Phrygian and afterwards Galatian.' This explains why an unusual term was adopted; but such antiquarian lore is quite out of keeping with the style of Acts. We require here a current term in popular speech, for that is the character of Lukan expression. Zahn, who, like many other scholars, holds that *Φρυγίαν* here must be a noun, demands some case analogous to the double topographical epithet. Lightfoot gave only Lk 3^{1}: we add some from Strabo, p. 195, *τὸ φῦλον ὃ νῦν Γαλλικόν τε καὶ Γαλατικὸν καλοῦσι*; p. 788 (of the Nile mouths) *τὸ μὲν Πηλουσιακὸν καλεῖται, τὸ δὲ Κανωβικὸν καὶ Ἡρακλειωτικόν*;† p. 802 (Xois is defined as) *ὑπὲρ τοῦ Σεβεννυτικοῦ καὶ Φατνιτικοῦ στόματος*, *i.e.* above the Sebennytic-Phatnitic branch in the upper part, where these two branches are still joined, and which may bear either name; p. 97, *τὴν Σκυθικὴν καὶ Κελτικήν*, the (northern) zone that may be called either Scythian or Celtic (after the two chief races that inhabit its eastern and western parts); p. 670, *τοῦ Κιλικίου καὶ Παμφυλίου τρόπου*. The Greek *καί* is used to connect alternative names (Latin *sive, seu*, English *or, alias*);‡ and the grammatical character of Lightfoot's construction seems clearly established by these examples. In Ac 18^{23} *Γαλατικὴ χώρα* on his interpretation must be used needlessly for Galatia Proper.

III. Gifford (*Expositor*, July 1894, p. 12) accepts Lightfoot's construction, but interprets 'the borderlands of Phrygia and Galatia.' Then Ac 18^{23} mentions 'the Galatic Province (Region) and Phrygia.' This view has much to recommend it. It gives in 16^{6} a route leading direct from Iconium by Dorylaion to Bithynia, making St. Paul turn direct towards that country when forbidden to preach in Asia; then, when he came to Dorylaion over-against Mysia,* he was forbidden to cross the Bithynian frontier, and turned west. It then becomes, however, almost necessary to suppose that the prohibition 16^{6} was given in Iconium or Lystra, and that St. Paul, abandoning his previous intention (15^{36}) of going over all the Churches, omitted Antioch. Salmon interprets much in this way, but is clear that Paul went to Antioch, and translates Ac 16^{6} as in next section, IV. (Smith's *Bib. Dict.*^{2} i. p. 1105).

IV. Another explanation takes us into the obscure minutiæ of the Galatic Province. The various parts of the province retained a certain distinction (see GALATIA II.), and were probably termed *Regiones* or *χῶραι*. The term *Regio* occurs in one inscription, mentioning a centurion charged with duty in the *Regio* of which Antioch was centre, *i.e.* Phrygia Galatica,† while *χώρα* is understood in Strabo, pp. 568, 569, *ἡ Ἰσαυρικὴ* (*χώρα*), and in Ptolemy, v. 6, 17, *ἡ Ἀντιοχειανὴ* (*χώρα*).‡

The route taken by St. Paul in Ac 16^{1-6} and 18^{23} led across two of the regions (*χῶραι*) of the Galatic Province, viz. the Galatic part of Lycaonia and the Galatic part of Phrygia; the former contained Derbe and Lystra, the latter Iconium and Antioch. In 18^{23} two regions are mentioned, *τὴν Γαλατικὴν χώραν καὶ Φρυγίαν*: here it is grammatically equally possible to take *Φρυγίαν* as noun and as adj.; for when two different names, expressed by two adjs. agreeing with the same noun, are coupled by *καί*, the regular usage is to express the noun only with the first (so in Strabo,§ *τὴν Ἀκυιτανὴν μερίδα καὶ τὴν Ναρβωνῖτιν*, p. 191; *τὸ Μενδήσιον στόμα καὶ τὸ Τανιτικόν*, p. 802; *τοῦ Αἰγαίου πελάγους καὶ τοῦ Παμφυλικοῦ καὶ τοῦ Ἰσσικοῦ*, p. 121; in Epiphanius (*Hæres.* 19), *τῆς Ναβατικῆς χώρας καὶ Ἰτουραίας καὶ Μωαβίτιδος καὶ Ἀρηλίτιδος*; and others innumerable ||). The two regions intended ought to be the *χώρα Λυκαονία* and the *χώρα Φρυγία*. Now, Roman Lycaonia was naturally always designated with reference to the other half, non-Roman Lycaonia. One pair of terms would be Lycaonia Antiochiana (found *CIL* x. 8660) and Lycaonia Galatica (not actually found, but it may be assumed confidently on the analogy of Pontus Galaticus, Phrygia Galatica); another pair of terms would be *Ἀντιοχιανὴ* (*χώρα*) as in Ptolemy, and *Γαλατικὴ χώρα* as in Ac 18^{23}. The latter pair would be naturally used by a person speaking inside the country and not requiring to name it,¶ the former by a person outside the country. The Phrygian region of the Galatic Province was called *Φρυγία χώρα* by St. Luke, who seems to have always used this form of designating the various regions of the province (but those who prefer to treat *Φρυγία* as a noun in 18^{23} may take the same sense from the noun as from

---

* So sometimes with *γῆ Λακωνική* or *χώρα Λ.* But in such cases a purpose can often be detected. Aristophanes stands alone in using *Λακωνικαί* as 'Laconian women'; but that was undoubtedly an Athenian slang term, perhaps in the sense of 'women of Laconian type' (cf. *Λακωνικά*, shoes of Laconian style). Such usages as *πόλις Γαλατική*, city belonging to the *Γαλάται*, *i.e.* Galatian city, *πόλεμος Θεσσαλικός*, war in which the Thessali take one side, are of a different class.

† An exactly equivalent form is used by Ptolemy, iv. 5, *Ἡρακλεωτικὸν στόμα τὸ καὶ Κανωβικόν* (on the sense of *τὸ καί* in names, see Ramsay, *Cities and Bishoprics*, i. p. 637 f.).

‡ In Greek, esp. of later period, *καί* often means 'or,' Thuc. vi. 60, 1; II. 35. 2; 42, 3; Ar. *Eq.* 256 (Neil); Aesch. *Sept.* 414 f., 1058; Eur. *Supp.* 895; *Iph. Aul.* 643; Plut. *Q. Conv.* iv. 2, 655*c*; Postgate on Propert. v. 6, 51. The Roman *sive* is often used to connect alternative names, where the Greek form is either *ὁ καί* or *ἐπικαλούμενος*; see Marquardt, *Röm. Privatalterth.*^{2} p. 27; Cagnat, *Manuel d'Epigraphie Lat.*^{2} p. 67.

* *κατά* as in Ac 27^{7}; Thuc. vi. 65 and 104; Herod. i. 76.

† *ἑκατοντάρχην ῥεγεωνάριον*, Sterrett, *Epigraphic Journey*, No. 92, who wrongly alters to [λ]εγ.; Prof. O. Hirschfeld accepts the reading given above (and in the copy), see *Berlin Akad. Sitzungsber.* 1893, p. 421.

‡ In that passage the two parts of Lycaonia (Galatica and Antiochiana) are opposed to each other under the names Lycaonia and Antiochiana; they retained distinct names in the 2nd century, but evidently great variety existed in the way of designating them, and Ptolemy selects an ill-fitting pair of names.

§ Strabo, who very rarely uses the common article to hold two nouns together (an example, however, in p. 388), repeats the article with the second member.

|| Strabo has two other forms, much rarer, *κόλπους τόν τε Ἀδριατικὸν καὶ τὸν Τυρρηνικόν*, p. 92; *τὸ Κρητικὸν καὶ Σικελικὸν καὶ Σαρδῷον πέλαγος βαθέα ἐστί*, p. 59. In the latter class we can usually see the intention to treat the whole as a unity made up of several parts; and the example quoted is so harsh as to be suspicious in text (if correct, the grammar is much worse than Strabo's average).

¶ The author of Ac 18^{23} speaks from the point of view of a person in the country, placing himself alongside of St. Paul.

Φρυγία with χώρα understood, for in the inscriptions of Antioch the noun is often used to designate Galatic Phrygia [*CIL* iii. Suppl. 6818, 6819], and St. Luke may be allowed to speak as the people of Antioch wrote). Ac 18^{23}, then, implies 'he made a mission tour [*] through the Galatic region (Derbe and Lystra) and the Phrygian (Iconium and Antioch), stablishing all the disciples (in all the Galatian Churches).' [†]

Ac 16^{6} is more complicated. It describes the journey from Lystra onwards, *i.e.* through Galatic Phrygia. Had the expression been τὴν Φρυγίαν χώραν, there would have been less doubt; but the author, wishing to bring out with minute accuracy that his meaning was restricted to the Galatic part of the large country of Phrygia, added a second adjective to express 'the Region that is Phrygian and Galatic,' *i.e.* 'which was geographically Phrygia, but politically Galatia.' [‡] The verse, then, implies 'they made a mission tour [*] through the Phrygo-Galatic Region (Iconium and Antioch), [but no farther], because they were forbidden to speak the word in Asia (which they entered immediately on going onward from Antioch).'

It is objected that this view is too complicated and artificial; but the complicacy arises from our being forced to write a lost page of history concerning an obscure corner of the empire, before we can interpret the language of an author who assumes that we are as familiar as he was with the terminology of his own time. Asterius, bishop of Amasia in Pontus Galaticus 400 A.D., understood 18^{23} exactly in this way, for in paraphrasing it he uses the words, τὴν Λυκαονίαν καὶ τὰς τῆς Φρυγίας πόλεις (*Hom.* viii., Migne, *Patrolog. Græc.* vol. xl.). This testimony of a man familiar with the topography of Asia Minor should have great weight; and Zahn is not justified in setting it aside as a false inference, into which Asterius was betrayed by taking Antioch in Ac 18^{22} as Pisidian Antioch. Asterius places the journey through Lycaonia and Phrygia immediately before the visit to Asia (Ac 19^{1}), and therefore evidently understood τὴν Γαλατικὴν χώραν καὶ Φρυγίαν in that sense. No mere error about Antioch explains such a rendering of 18^{23}. We have here a distinct testimony by an ancient authority in favour of the view stated in this section. W. M. RAMSAY.

GALATIANS (Γαλάται), used only in Gal 3^{1}.

I. According to the majority of scholars, it denotes the people of Galatia Proper, a mixed population, consisting of a minority descended from the three Gaulish tribes, and a large majority of the ancient population, Phrygians west of the Halys, Cappadocians east of that river, with an intermixture of Greeks, Romans, and Jews. In the great cities, such as Ancyra, the Phrygians, etc., probably constituted the overwhelming majority, while Gauls were found there only as a small aristocratic caste; but in country parts the Gauls were more numerous. That is the usual sense of the term G., and needs no proof. On the character of these Gauls, their position as a small conquering caste of barbarians among a more numerous and more educated population, and their relation to that older population, see GALATIA I.

The general population of North Galatia was summed up as *Galatai* in ordinary ancient usage. But this term had no ethnological implication; it did not mean that the people so designated were all of Gallic descent, for it is doubtful whether so much as five per cent. of the total population was of Gallic origin, and it is practically certain that, in the great cities, an even smaller proportion of the population was of Gallic descent.[*] The name Galatai meant really no more than 'people of Galatia,' though the usual ethnological fiction crept in, and Phrygians and Greeks were feigned to be of the three tribes, just as the composite province Asia was called an ἔθνος (see p. 87ᵇ). It is quite unjustifiable to suppose that the Churches addressed by St. Paul, even if they were situated in North-Galatian cities, consisted of persons of Gallic blood to any important extent: the probability is that such Galatian Christians would be to a very large extent free from any mixture of Gallic blood. Only in that form of the North-Galatian theory which is advocated by Dr. Zöckler is it admissible to suppose that the Christian Galatians were to some extent Gauls (see p. 81, 84 f.). The historical review given under GALATIA, and the authorities quoted there, furnish the proof of the statements here made.

The origin of the peculiar Greek word Γαλάτης is doubtful; it probably arose among the Greek settlers on the Gallic coast at Massalia or Massilia, and means, according to Holder (*Sprachschatz*), 'noble,' while Galli means 'warlike.' Three terms occur in Greek writers, and it was only at a later period and in a half-hearted way that a distinction was drawn between Γαλάται as the people of Galatia in Asia, Γάλλοι as the people of Gaul or France, and Κέλται as the generic name of all cognate tribes whether found in these two countries or elsewhere; the last of these distinctions, which is universal among modern writers, can hardly be traced, even in embryo, among the ancients (though the use of Κελτικός in Strab. vii. 5. 2, p. 314, approximates to it); but the Romans began sooner to appreciate the convenience of the distinction between *Galli* and *Galatæ* in political usage, and the geographers adopted it from them by degrees (traces of it appear in Strabo).

II. It is maintained by other scholars, that, corresponding to the term *Galatia Provincia*, there was a Roman term *Galatæ*, indicating the body of provincials. It was necessary in official and legal usage to have a term designating the entire population of a province; and the term was always the ethnic derived from the official name of the province. Thus all the inhabitants of Africa were *Afri* (*e.g.* Juvenal, viii. 120; Pliny, *Epist.* ii. 11. 2), of Hispania Bætica *Bætici* (Pliny, *Epist.* iii. 9. 3, etc.), and so on, even though several nations inhabited each province, some of which, *e.g.* Carthaginians or Greeks, regarded themselves as far superior to barbarian Afri, etc. The Romans used these generic terms when it was necessary to describe as a class the whole population; but 'the same writer who at one time and from one point of view summed up the population of *Sicilia Provincia* as *Siculi*, would at another time and for another purpose pointedly emphasize the Greek character and origin of the people of Syracuse or Messana,' and would distinguish them from the Siculi as a different race.[†] Similarly, the term *Galatæ* was for purposes of generalization employed by the Romans to sum up the entire population of the province Galatia;[‡] but its use in this way is determined by the purpose and views of the speaker. Three points are involved in this use of the term: (1) the speaker or writer is generalizing about a set of inhabitants of the province; (2) he has not in mind any thought of the racial character—as Phrygians, Pisidians, Galatians, etc.—of the persons addressed; (3) he is speaking from the Roman point of view. All these three points are united in Gal 3^1. (1) St. Paul is addressing in a generalizing style people of two cities in Phrygia and two in Lycaonia, viz. the members of the four 'Churches of Galatia.' If it is possible to speak of the 'Churches of Galatia,' it must from the same point of view be possible to classify the members as 'Galatians.' (2) There is here no thought of racial character, only of classifying a group of towns by their common character, and no common characteristic lies so near as their common Roman relation. The policy of Rome was to prevent the subject cities from uniting with one another, and to unite them all closely to herself; and their Roman relationship exists only in virtue of their forming part of a Roman province. Hence analogies from modern divisions, such as English counties, which opponents of this interpretation of the term G. bring forward, are inapposite: a native of an English county does not rank as a Briton in virtue of his belonging to the county, but a native of the province Galatia ranked as a member of the Roman Empire in virtue of his belonging to the province. Similarly, a modern governor might sum up members of a Society with branches in New Brunswick and Ontario as 'Canadians,' though even here the parallel is not complete, for New Brunswick was a part of the British Empire before it was federated with Canada, but Lycaonia was governed by a native prince before it was incorporated in the province Galatia. (3) Paul, the *civis Romanus*, naturally spoke from the Roman point of view. His whole career shows how thoroughly he accepted the existing political facts and inculcated loyal submission to the reigning power. He classified his Churches according to the provinces, Achaia, Macedonia, Asia, Galatia. Especially after the decision in favour of religious freedom pronounced by Gallio, he recognized, also, that the liberal Roman administration was his ally against the Jews.[*] But, from the outset, the Pauline teaching was, as a practical force in society, tending to produce certain results, which the Roman policy also aimed at, viz. (1) spread of the Greek language as being used in the Christian books; (2) revolt against the power of the great religious centres with their colleges of priests; (3) education of the people; (4) development of a feeling of unity among members of different nations, *i.e.* destruction of national separation.[†]

---

[*] On this sense of διῆλθεν, see *Expositor*, May 1895, p. 385 ff.

[†] Such is the reading of RV, Tischendorf, Westcott and Hort, etc. But probably Lightfoot was right (*Biblical Essays*, p. 235), that the TR and AV represent the correct reading here.

[‡] This cannot justly be interpreted as describing any other country than the region of Antioch, Apollonia, and Iconium; but Salmon, while translating by these words, interprets them as describing part of Galatia Proper (Smith, *DB* p. 1105).

[*] Slaves Sosias, Maiphateis, etc., called Γαλάται in Delphic inscriptions, are by race Phrygian (*Expositor*, August 1898).

[†] See *Studia Biblica*, iv. p. 26 ff., for a fuller discussion (which, according to Zahn [*Einleitung*, p. 130], '*ausführlich und überzeugend handelt hievon*').

[‡] For example, Tacitus speaks of levies from the provinces of Galatia and Cappadocia, sometimes as *habiti per Galatiam Cappadociamque dilectus* (*Ann.* xiii. 35), sometimes, with his usual love of variation in language, as *Galatarum Cappa-*

But would the people of Pisidia and Lycaonia be willing to accept the title Galatæ? It has been maintained that this is incredible, and that the burden of proof lies with those who assert that the names Lycaonian or Pisidian or Phrygian would ever be disowned by natives of that country. But two of the four Churches were in Roman cities, *Coloniæ Romanæ*; to judge from the analogy of *colonia* Corinth with its numerous Roman names (see CORINTH, p. 480^b), there were almost certainly some Romans in the Churches: could these be addressed as Lycaonians? And the non-Roman population of a *colonia* shared in the honour of their city. The provincials, with Oriental facility, adopted the Roman ideas and titles, and learned to contemn the uneducated barbarians outside the pale of the empire, to pride themselves on being civilized and Romanized, and to adopt as marks of honour Roman names: thus the four Pauline Churches were at Claudio-Derbe, Colonia Julia Felix Gemina Lystra (sometimes with exaggerated Roman feeling, Lustra), Claudio-Iconium,[*] and Colonia Cæsareia Antiochia. To cities which were proud of titles like these, it is surely beyond dispute that the national names, Phrygian or Lycaonian or Pisidian, were far less honourable than the provincial title. Among the Romans a national designation, Phryx, Afer, Syrus, etc., was a slave's name; and among both Greeks and Romans the Phrygians were known as a race of slaves.[†] The Roman Empire, moreover, which brought peace and fair government after centuries of war and oppression, was immensely popular in the Asiatic provinces.

Accordingly, the possibility that St. Paul should address a group of Christians in two Roman colonies and two half-Romanized cities of the province Galatia as 'Galatians,' must be admitted. Whether he actually did so, is a matter of interpretation of Gal and Acts.

The general type of religion and manners among the population of the Phrygian and Lycaonian cities seems to have been much the same: it was found also in the great North-Galatian cities like Ancyra and Pessinus (see GALATIA I.); and the Gentiles addressed in Gal, Eph, Col are of that type. A highly elaborate religious system reigned over the country. Superstitious devotion to an artificial system of rules, and implicit obedience to the directions of the priests (cf. Gal 4^{3-11}), were universal among the uneducated native population. The priestly hierarchy at the great religious centres, *hiera*, expounded the will of the god to his worshippers.[‡] Thus the government was a theocracy; and the whole system, with its prophets, priests, religious law, punishments inflicted by the god for infractions of the ceremonial law, warnings and threats, and the set of superstitious minutiæ, presented a remarkable and real resemblance in external type to the old Jewish ceremonial and religious rule. It is not until this is properly apprehended that Gal 4^{3-11} becomes clear and natural. Paul in that passage implies that the Judaizing movement of the Christian Galatians is a recurrence to their old heathen type. After being set free from the bonds of a hard ceremonial law, they were putting themselves once more into the bonds of another ceremonial law, equally hard. In their action they were showing themselves senseless (ἀνόητοι, Gal 3^1), devoid of the educated mind that could perceive the real nature of things. There is an intentional emphasis in the juxtaposition of ἀνόητοι with Γαλάται, for it was the more educated party, opposed to the native superstition, that would most warmly welcome the provincial title; hence the address, 'senseless G.,' already anticipates the longer expostulation (4^{3-11}), 'G. who are sinking from the educated standard to the ignorance and superstition of the native religion.'

Further, the great strength of the Jews in the cities of South Galatia and South Phrygia had produced a peculiar mixed type of religion. The Phrygian religion of Sabazios formed the foundation on which this mixed type was built up.

---

documque auxilia (*Ann.* xv. 6); and Syncellus, depending on an older authority, after mentioning the province Galatia, says that Augustus imposed taxes on the G., obviously meaning the whole people of the province.

[*] From this point of view, the composition of Gal should be placed after the trial before Gallio, rather than (as Zahn, *Einleitung*, § 12, puts it) before that event: perhaps at Antioch (Ac 18^{22}).

[†] See Zahn, *Einleitung*, § 11, A 4 (*St. Paul the Trav.* p. 130 ff.).

[*] Created a *colonia* by Hadrian; older authorities say it was made a *colonia* by Claudius, and Zahn (*Einleitung*, p. 136) wrongly follows them.

[†] As Mommsen points out, the national designation as Lycaonian or Phrygian was the servile designation applied to slaves, horses, and marines (*classiarii*), who were originally servile (*Hermes*, 1884, p. 33 ff.).

[‡] *Cities and Bishoprics of Phrygia*, i. 134 ff., 147 ff., 94 ff., etc.

Sabazios was identified with the Jewish Sabaoth; and the Most High God (*θεὸς ὕψιστος*) was adored in a form strongly influenced by Jewish elements, but yet in many cases indubitably pagan. Purely Jewish references to the *θεὸς ὕψιστος* also occur, and are to be distinguished from the mixed worship. Considerable sections of the Phrygian people, especially in the centre and south, were affected by the semi-Jewish, semi-pagan cult; and, as M. Cumont observes in his admirable paper, *Hypsistos* (*Supplément à la Revue de l'instruction publ. en Belg.* 1897): 'ces milieux, tout pénétrés d'idées bibliques sans être étroitement attachés à la loi judaique, constituaient un terrain fécond pour la prédication chrétienne, et l'on s'explique mieux, en tenant compte de cette situation, que la foi nouvelle, ait opéré plus de conversions en Asie Mineure, que dans toute autre région.' The remark which M. Cumont makes about Asia Minor in general applies with most force to those districts where the Jews were specially strong. See also *Cities and Bishoprics of Phrygia*, i. pp. 667–676, also pp. 388, 533, 538, 566, etc.; Schürer in *Theol. Littztg.* 1897, p. 506. W. M. RAMSAY.

GALATIANS, EPISTLE TO THE.—i. AUTHORSHIP.—The Pauline origin of this Epistle has never been called in question by a critic of first-rate importance, and until recently has never been questioned at all. In the early part of the 2nd cent. it formed a part of Marcion's *Apostolicon*. A little later it was included in the Syr. and Old Lat. VSS, and was recognized by the Muratorian Canon. It is cited as the work of St. Paul by Irenæus (III. vi. 5, III. xvi. 3, V. xxi. 1), by Clement of Alexandria (*Strom.* iii. 16); and it is quoted by Justin Martyr (*Dial.* c. 95; *Oratio*, 5) and by Athenagoras (*Legatio*, c. 16). And while the echoes of its language which have been detected in Clement, Barnabas, Ignatius, and Hermas, are somewhat dull and doubtful, a clear reference to the Ep. occurs in Polycarp (*Phil.* 5), *εἰδότες οὖν ὅτι ὁ θεὸς οὐ μυκτηρίζεται* (Gal 6^7), and almost certainly in the words (c. 3), *ἥτις ἐστὶν μήτηρ πάντων ἡμῶν* (cf. Gal 4^{26}).

The internal evidence is irresistible. It has been felt that it is a real person who speaks in the Ep., a person engaged with earnestness and vehemence in a critical conflict. A Paulinist of the 2nd cent. would not be likely to dwell upon the fact that his master's apostleship had been called in question, or to represent some of his earliest and most highly prized conquests from heathenism as slipping through his fingers. Esp. does the subject discussed in the Ep. speak for its early date. It is a polemical tract, a contribution to a controversy which was raging at the time of its appearance. As Gloël says, it is not a sermon, it is not a treatise, it is a sword-cut, delivered in the hour of greatest danger by a combatant who is assaulted by determined foes. The question, then, is, When was there any risk of Gentile Christians being compelled to submit to circumcision? It is idle to look for such a danger in any generation subsequent to the year A.D. 70. Before that time there already existed throughout the empire strong Gentile churches of uncircumcised members. And if this letter is part of a conflict against real and not imaginary dangers, a place must be found for it in the earliest years of Gentile admission to the Christian Church. It can surprise no one that this admission should have been won only by conflict. To discard Mosaism might well seem to the Jews to be equivalent to discarding religion. The surprising thing is that the Gentiles were led to liberty by a Hebrew of the Hebrews. But what brought St. Paul to the front was not merely that he had been appointed Apostle and Defender of the Faith to the Gentiles, but much more that he perceived that this was a conflict involving the very existence of Christianity. Was Christ sufficient for salvation, or must other things be added? This was the question which St. Paul saw to be involved in the question of circumcision. To his eye it was an alternative, Circumcision *or* the Cross. And this Ep. bears upon it the marks of having been written in the very heat of this conflict. But if so, then it can have proceeded from no other hand than that of the man whose life was spent in the service and defence of the Gentiles.

The first assault upon its authenticity was made by Bruno Bauer in 1850 (*Kritik der Paul. Briefe*). This critic maintained that it was a compilation from Ro and Co, intended to correct the false impression of St. Paul conveyed by the Acts. In 1886 Pierson and Naber published their *Verisimilia. Laceram conditionem NT exemplis illustrarunt et ab origine repetierunt* (Amstelodami), which has been well rendered 'The NT in Tatters.' They allege that the Epistles known as Pauline were really compiled by Paulus Episcopus (Paul the Bishop), who made use of letters or parts of letters which had already been addressed to Gentile churches by a missionary of reformed and spiritualized Judaism. This theory discredited its authors rather than the Epp. of Paul. (See Steck, *Der Galaterbrief*; Kuenen, *ThT*, xx. (1886) 491 ff., included in the *Gesammelte Abhandlungen*, tr^d by Budde, 1894, pp. 330–369; Van Manen in the *Jahrbücher für Protest. Theol.* 1887; Zahn in *Zeitschrift f. Kirchliche Wissenschaft*, 1889). Loman (*Quæstiones Paulinæ*, Amsterdam, 1882–86) supposed that the four great Epistles of St. Paul were written in his name to recommend universalistic Christianity in opp. to the original Christianity, which had been a Jewish Messianic movement centring in a mythical Jesus. Paul was not wholly mythical, but the canonical Paul was.

Scarcely more serious or plausible than those assaults was that of Rudolf Steck of Bern, who, in 1888, published at Berlin his small volume, entitled *Der Galaterbrief nach seiner Echtheit untersucht nebst kritischen Bemerkungen zu den paulinischen Hauptbriefen*. In this publication Steck aimed at proving that the sketch of primitive church history offered by the Tübingen school was as little in correspondence with fact as the outline given in the Bk of Ac, and that the four principal Epp. of St. Paul are as little entitled to be considered genuine as the smaller Epp. Baur had contented himself with saying, 'There has never been the slightest suspicion cast upon these four Epp. They bear on themselves so incontestably the character of Pauline originality that it is not possible for critical doubt to be exercised upon them with any show of reason.' Very good, says Steck, but where does Baur learn the marks of 'Pauline originality'? Is he not perilously near a *petitio principii*? He rejects Ac as a true picture of Paul's character: whence, then, does he receive the true impression? Accordingly, Steck applies to Gal the Tübingen method, and finds that it is not genuine. Much has been derived from Ro, but it betrays a more fully developed Paulinism; and the borrowed expressions appear in Gal as stones from an old house built into a new wall. The date must be subsequent to A.D. 70, because Jerus. is said to be in bondage (!). The inviting of attention to the large letters in which Paul writes is a manifest attempt to palm off the Ep. as Pauline. This criticism was answered from the Tübingen side by Holsten and Holtzmann; but by far the most effective reply is to be found in Gloël's *Die jüngste Kritik des Galaterbriefes auf ihre Berechtigung geprüft* (Erlangen, 1890). See also Lindemann's *Die Echtheit der Paulinischen Hauptbriefe gegen Steck's Umsturzversuch vertheidigt*. Steck was followed by Völter, who attempted to show (*Die Komposition d. Paul. Hauptbriefe*, Tübingen, 1890) that Gal is spurious and dependent on Ro and 1 and 2 Co. [A full account of these assaults upon the genuineness and integrity of Gal is given by Knowling in his *Witness of the Epistles*, pp. 133–243. See also Clemen, *Die Einheitlichkeit der Paul. Briefe* (Göttingen, 1894), pp. 100–125; and, on the other side, van Manen in *Expos. Times*, Feb., March, April, 1898].

ii. THE PERSONS ADDRESSED.—These are designated (1^2) 'the churches of Galatia.' Alone among the Epp. of St. Paul this is addressed, not to an individual or to any single church, but to a group of churches. Where are we to look for these churches? For the name 'Galatia' has a wider and a narrower application (see GALATIA). Are 'the churches of G.' to be sought for in the geographically limited district inhabited by the Celtic Galatians, or in the wider region comprehended in the Rom. province, G.? The majority of critics hold that as in the Bk of Ac the term G. is used in the narrower sense to denote the district of G. proper, or original, so this Ep. is addressed to the churches of that remote country, which probably existed in the towns of Ancyra, Pessinus, Germa, and Tavium in the N., and not to the churches of Antioch, Iconium, Lystra, and Derbe in the S. Such is the opinion, *e.g.*, of Weiss, Lipsius, Sieffert, Lightfoot, Davidson, and Godet. On the other hand, the claims of provincial G. have been advocated by such critics as Renan and Perrot in France; Mynster, Weizsäcker, Hausrath, Zahn, and Pfleiderer in Germany. And this opinion has recently been reinforced by the adhesion of Prof. W. M. Ramsay, whose personal knowledge of Asia Minor and acquaintance with its history lend great weight to his judgment.

There are three sources from which light upon this question may be sought: the Bk of Ac, the other Pauline Epp., and this Epistle itself. In the Bk of Ac (13^{14}–14^{24}) we possess a pretty full account of the foundation of churches in S. G., although it is to be noted that the writer uses the ethnographical names, Lycaonia and Pisidia, and not the political designation of the district, G. On the other hand, no account is given nor any notice taken of the founding of churches in N. G. And this silence is not sufficiently accounted for by the fact that at the time of the presumed founding of these churches St. Luke was not St. Paul's companion, for other events of which St. Luke was not an eye-witness are fully described. But if St. Luke joined St. Paul immediately after the apostle had been so warmly received and so successfully engaged in N. G., as by the hypothesis he had been, then certainly it is strange that no notice should be taken of so remarkable a mission. No sure conclusion can be based on this silence, but it is more likely that a letter should have been addressed to churches regarding which we have some information than to those of which St. Luke tells us nothing. For it is to be considered that St. Luke must have known the intense interest which St. Paul took in the churches thus addressed, and would naturally have informed himself and others about them.

The passage in the Bk of Ac (16^{4-8}) in which St. Paul's route from Derbe and Lystra to Troas is described, has been claimed both by the advocates of the N. G. and by the upholders of the S. G. theory. According to Ramsay (*Church in Rom. Emp.* pp. 74–111), this journey was described by one who wrote under the immediate influence of St. Paul himself. It must therefore be accepted as exact and intelligible. Antioch in Pisidia may be taken as the starting-point, for probably it was while in that city, and while he was making arrangements for passing westwards through Asia to Ephesus, that it was made plain to him that he must not at this time proclaim Christ in Asia. Instead of going W., therefore, he turned to the N. 'And they passed through Phrygia and the region of G.,' and so reached Mysia. Now, it is not to be denied that if any one was so minded it was possible to go from Antioch to Pessinus in G., and from Pessinus to Germa, and at that point to form the design of entering Bithynia. But in this case the force of the topographical notice, that it was when they had come over against Mysia that they proposed to enter Bithynia, is entirely lost.

Accordingly, Prof. Ramsay proposes another route, following the road which runs N.W., and not the road which runs N.E. This road would have led St. Paul and his party into Bithynia, but when they came so far N. as to be opposite Mysia, that is to say, as to have it lying to their left, 'the Spirit of Jesus suffered them not' to enter Bithynia, and therefore, turning to the W., they skirted the southern border of Mysia, and so came to Troas. Certainly, this gives a route that has great probability in its favour. For (1) any one proposing to go from Lystra and Derbe to Bithynia would naturally go by the road passing through Dorylaion, and from this road, or any part of it, it would be out of the way to enter G. proper. And (2) to use Prof. Ramsay's words, 'From N. G. no possible route to Bithynia could be said to bring a traveller to a point 'over against Mysia,' still less 'to the frontier of Mysia.' Another strong point in favour of this route and undelayed journey is this, that in vv.$^{6.7}$ (Ac 16) a single definite journey is described. The statement, 'They passed through Phrygia . . . and when they came opposite Mysia,' seems to leave no room for any such mission in G. as is required by the N. Gal. theory. It is not easily credible that had St. Paul intercalated into this journey a digression eastwards of about 300 miles into N. G., so important a mission would have been passed over in silence.

This theory, however, implies a rendering and a construction of Ac 16^6 to which exception has been taken. This verse, as it stands in modern editions, reads thus: διῆλθον δὲ τὴν Φρυγίαν καὶ Γαλατικὴν χώραν, κωλυθέντες ὑπὸ τοῦ Ἁγίου Πνεύματος λαλῆσαι τὸν λόγον ἐν τῇ Ἀσίᾳ. Prof. Ramsay contends that Φρυγίαν is here an adj., not a substantive, and that the designation τὴν . . . χώραν means 'the country to which the epithets Phrygian and Galatic apply,' 'the Phrygo-Galatic territory.' This country, Phrygia-Galatica, lies in the southern part of the Rom. province G., and includes Iconium, Lystra, and Antioch of Pisidia. But in the only other passages in which St. Luke mentions Phrygia (Ac 2^{10} and 18^{23}) he uses Φρυγία as a substantive. In the latter of these passages the expression τὴν Γαλατικὴν χώραν καὶ Φρυγίαν throws light on 16^6. It may be inferred that in both passages he had the same tract of country in view, and that as in 18^{23} Φρυγία is a substantive, so it is in 16^6. And as it is grammatically possible to render the disputed phrase 'Phrygia and the Gal. country,' it becomes very doubtful whether Prof. Ramsay's rendering is tenable.

It has also been supposed that the use of the phrase 'the Gal. country,' and the avoidance of the simple 'Galatia,' implies or suggests that St. Luke may have wished thus to indicate that he was speaking of the whole land that could be called 'Galatian,' rather than of the smaller country which originally was known as G. This is plausible. But it may be that the writer wished to indicate that rural districts as well as cities were evangelized by St. Paul (see 14^6).

Again, Prof. Ramsay's construction requires a somewhat unusual and difficult relation of the participle κωλυθέντες to the main verb διῆλθον. The natural construction undoubtedly is that which RV has adopted, involving that St. Paul and the rest passed through Phrygia and G. in consequence of having been prevented from preaching in Asia. But Prof. Ramsay maintains that the sequence of the verbs *as they stand in the sentence* is the sequence of time: '(1) they went through the Phrygo-Galatic land; (2) they were forbidden to speak in Asia; (3) they came over against Mysia; (4) they essayed to go into Bithynia; (5) the Spirit suffered them not; (6) they passed through Mysia; (7) they came to Troas.'

In this uncertainty the suggestion of Dr. Gifford (*Expositor*, July 1894) is worthy of consideration. He supposes that the Phrygian and Gal. country is the borderland between the two countries, the E. edge of Phrygia and the W. strip of G. Leaving Antioch, St. Paul, instead of going W. to Ephesus in Asia as apparently he had intended, went northwards through the Phrygian-Gal. borderland with the purpose of entering Bithynia; but when he came opposite Mysia he was compelled to turn W. to the coast.

In the other Epp. of St. Paul we find one significant allusion to 'the churches of G.,' 1 Co 16^1 'Concerning the collection for the saints as I gave order unto the churches of G., so do ye.' Now, if by this designation we are to understand the churches of N. G. exclusively, then how is it that the churches of the S., which he so repeatedly visited and cherished, were not included in this great scheme of beneficence? On this allusion to 'the churches of G.' Dr. Plummer has the following just observation: 'We are not entitled to conclude that because St. Luke, when historically relating the course of St. Paul's journeys, describes the places visited by their precise geographical designations, St. Paul may not have used the word G. in a wide sense when in want of a word to include all the churches which he had founded in the Rom. province of G. In fact, if he had wished to include under one designation the churches of Antioch, Iconium, Derbe, and Lystra, together possibly with others in the adjacent district, it is hard to say what other term he could have used. There is . . . no certain evidence that St. Paul founded churches in G. proper; if he did, these, of course, would be included among the churches of G. But the question is whether we are bound to understand St. Paul's use of the word as excluding all churches save those of G. proper? Now, it is not likely either that when he was organizing a collection for the poor Christians of Jerus., he would omit to appeal to the churches in the Gal. province with which his relations were so intimate, or that he would leave those churches unmentioned when writing to Corinth.'

In the Ep. itself (4^{13-15}) there occurs an allusion to the circumstances in which he first preached the gospel to the churches now addressed, οἴδατε ὅτι δι' ἀσθένειαν τῆς σαρκὸς εὐηγγελισάμην ὑμῖν τὸ πρότερον, which can only mean, 'you know that it was on account of an infirmity of my flesh I formerly preached to you.' This statement implies that he was weak and ill when in the district referred to, and that but for this weakness he would not have preached in it. Prof. Ramsay ingeniously construes the situation thus: While on his first journey St. Paul caught a fever at Perga, and as its natural cure a change to the higher and purer air of Antioch was prescribed. He reached Antioch with traces of illness upon him, and with liability to its recurrence. This is possible; but may not the 'weakness' have been connected with the stoning he suffered at Lystra? It was after this stoning, which must have left very obvious marks upon him, that he preached in Derbe, Lystra itself, Iconium, and Antioch (Ac 14^{19-23}). In this case, as in the course of events suggested by Prof. Ramsay, τὸ πρότερον receives its proper sense, 'on the former of my two visits.'*

But whatever the weakness was, and however incurred, the fact remains that it afforded him an opportunity of preaching in a district where he had no intention of preaching: a district, therefore, which lay on the road to some more attractive field of operation. Now, it will scarcely do to say that G. proper lay on the road to nowhere, for, as we have seen, St. Paul had a desire to enter Bithynia, and might, because debarred from Asia, have chosen to pass through the western edge of G. on his way to the more northern province. It seems, therefore, as easy to construe this expression in keeping with the N. Galatian theory as with the S. Galatian.

We find from the Ep. itself that emissaries from Jerus. had appeared among the Gal. churches, and it has been argued that such persons would scarcely have penetrated so far into the interior of Asia Minor as the N. Gal. theory supposes. But this is both to misconceive the accessibility of the region and to underrate the eager propagandism of the Jew and the antipathy to St. Paul. It is more to the purpose to point to 5^{11} and to find in it an allusion to the circumcision of Timothy, which was well known among the S. Gal. churches, and might naturally be used as a handle against St. Paul, and a ground of charging him with inconsistency.

---

* The Greek interpreters understood the ἀσθένεια of persecution. Theodoret, *e.g.*, says: καίτοι πολλὴν ἔφερον ἐπὶ του σώματος ἀτιμίαν, αἰκιζόμενος καὶ στρεβλούμενος καὶ μυρία ὑπομένων δεινά.

The internal evidence which the Ep. bears, that it was addressed to Celts, cannot be regarded as trustworthy. Lightfoot and others have collected very interesting notices of the Celtic character, their sensuousness and impulsiveness, and so forth, and have adduced from the Ep. illustrations of these qualities which are certainly striking. But although these might serve as corroborative evidence to an otherwise strong argument, the insecurity of founding upon them is at once apparent when it is considered how difficult it is to grasp national character, and when we reflect that the Celtic character produces types so diverse as the Irish, the Welsh, and the Highlanders of Scotland.

iii. OCCASION OF THE EPISTLE.—The Galatians had received St. Paul with extraordinary demonstrations of friendliness (4^{15}). They had felicitated themselves on their good fortune in having him for their guest, and they had received his gospel as a message from heaven, or as if Christ Jesus Himself had come among them (4^{14}). Churches had been formed, and they 'ran bravely' (5^7). That a second visit had been paid to these churches before this letter was written, is the natural inference from some expressions which occur in it. The *τὸ πρότερον* of 4^{13} might merely mean 'formerly,' and not definitely 'on the former of two occasions'; neither is the expression of the 16th verse decisive (*ὥστε ἔχθρος ὑμῶν γέγονα ἀληθεύων ὑμῖν*), for it is possible that in these words he might be merely alluding to the change of feeling towards him produced by the representations of his enemies, or anticipating the resentment this letter itself might occasion. But when he uses such expressions as those which occur in 1^9 and 5^3, and which point to emphatic warnings uttered when he was among them, it would appear that such warnings are incongruous with the circumstances of his first visit, and must be referred to a second, when he perceived symptoms of defection from the gospel he had proclaimed.

The symptoms he had observed rapidly developed. They were moving away from the free standing of faith to the bondage of the law; they were being circumcised, observing days and new moons and other seasons, and returning to the weak and beggarly elements from which St. Paul believed they had escaped (1^6 $4^{9.10}$ 5^3). In this retrograde movement St. Paul sees a renunciation of grace, a virtual renunciation of Christ (5^4). He still tried to persuade himself that irreparable damage had not yet been done (5^{10}); but assuredly the evil leaven was working among them, and 'a little leaven leaveneth the whole lump' (5^9).

This sad change had been wrought by the Judaizing party, and apparently in great part by one individual. This individual seems to have been a personage of some distinction. He exerted a fascinating power over the Galatians (3^1), and apparently claimed to speak with authority (1^8). Whether St. Paul actually knew him is doubtful (see 5^9 *ὅστις ἐὰν ᾖ*, and 5^7 and 3^1): that he knew him by name may be taken for granted.

No special reason need be sought to account for the Judaizing party having emissaries in G. The question of the relation of Gentile Christians to the Jewish law was sure, sooner or later, to emerge in every church in which there were any Jewish Christians. Must a Gentile enter Christianity through Judaism? and to what extent is the Mosaic law binding on Gentiles?—these questions must be answered, and the battle between legalism and liberty fought through to the end. Superficially, the Judaizers, who maintained that to become a Christian a man must also become a Jew, had a great deal to say for themselves. The law was a divine institution. The promises had been given to Abraham and his seed. The Messiah was the Messiah of the Jews. Jesus Himself had been circumcised, and had kept the whole law. The original apostles did the same. Was not this an obvious and infallible example? Besides, if the Gentile converts were not to keep the law, how were they to escape from the immoralities in which they had been brought up? And who was this Paul who taught them to neglect the law? What claim had he to be considered an apostle? He did not keep company with Christ while on earth, as the others had done; he was not called, as they had been, to the apostolate by the Lord in His lifetime; he had no external authentication of himself, like their letters of commendation from the mother-church at Jerusalem. The Judaizers did not scruple even to speak slightingly of his appearance, and to insinuate that his motives were impure and his conduct inconsistent with his teaching. When it suited him he practised circumcision, as in the case of Timothy. If, therefore, he had not enjoined it on the Galatians, it was through a desire to please men (5^{11} 1^{10}).

All personal abuse and calumny St. Paul could no doubt have overlooked; what he could not overlook was the Judaizing adulteration or subversion of the gospel of Christ. And the very speciousness of the arguments used, and the characteristic zeal for the law displayed by the Judaizers, all the more emphatically inspired St. Paul with the feeling that the crisis was of tremendous moment, and that his life-work among the Gentiles hung in the balance. For not only was he aware that to demand circumcision and impose the whole Mosaic law on the Gentile world, was to undertake a hopeless task, but also he perceived that it would obscure the gospel of Christ. He saw, as apparently no other man of influence saw, that to represent anything else than the cross of Christ as *essential* to salvation, was really to affirm that the cross alone was not sufficient. St. Paul recognized that it was *either* the law or Christ; that a man could not be justified by both. 'Behold, I Paul say unto you, that if ye receive circumcision, Christ will profit you nothing' (5^2); 'ye are severed from Christ, ye who would be justified by the law: ye are fallen away from grace' (5^4 *κατηργήθητε ἀπὸ Χριστοῦ οἵτινες ἐν νόμῳ δικαιοῦσθε, τῆς χάριτος ἐξεπέσατε*). The importance of the crisis cannot be over-estimated. 'It really seemed as if the mighty enthusiasm of Pentecost might sink into respectable legalism, as if Christianity might be strangled in its cradle by the iron hand of the law, as if it might sink into an obscure Jewish sect, and disappear in the national ruin, instead of breaking its fetters, spreading its mighty spiritual pinions, and claiming the universal heaven as its home' (Bishop Moorhouse, *Dangers of the Apostolic Age*, p. 21).

DATE OF THE EPISTLE.—The date of the Ep. has been, and still is, contested. It has been assigned by different critics to the beginning, to the close, and to every intermediate stage of its author's epistolary activity. It stands first in the canon of Marcion; but there is reason to believe that this canon was not arranged in chronological order (Tertul. *adv. Marcion.* v. 2). One or two modern scholars, as Michaelis, Koppe, Zahn, have placed it earliest among the Epp. of St. Paul; while Koehler and Schrader consider it the latest (Davidson, *Introd.* i. 73). Calvin held that it was written before the Council at Jerus., and that the visit to Jerus., which St. Paul relates in Gal 2, is the same as that which is mentioned in Ac 11^{30}, and is not that of Ac 15. This view has received the powerful advocacy of Prof. Ramsay (*Expositor*, Aug. 1895), who argues that the account of the journey in Ac 11. 12 is 'in the most singular agreement' with the narrative of Gal 2. Hausrath dogmatically pronounces that the Ep. was written in the autumn of 53, and on the following ingeniously discovered ground: 'As the Gal. are on the point of joining with the synagogue in celebrating the beginning of the sabbatical year (Gal 4^{10}), lasting from Sept. 53 to Sept. 54, the Ep. must date from the autumn of 53, in which St. Paul crossed into Macedonia' (*Time of the Apostles*, iii. 188. Hausrath, of course, holds the S. Gal. theory). Renan, again, places the Ep. between the second and third missionary journeys, and dates it from Antioch.

The majority of continental critics, however, such as Weiss, Holtzmann, Sieffert, Lipsius, and Godet, place it very early in the Ephesian residence, and consequently first of the four great Epp. In this finding they are considerably influenced by the *οὕτως ταχέως* of 1^6. This expression, it is supposed, involves that no long time can have elapsed between St. Paul's second visit to the Gal. churches and this letter. Lightfoot, however, has shown (*Gal.* pp. 41, 42) that this conclusion rests on two erroneous assumptions: (1) that 'so soon' means 'so soon after I left you'; whereas it rather refers to the time of their conversion; and (2) that a period so indicated cannot embrace more than a few months; whereas 'quickness and slowness are relative terms,' and the expression might have been used 'though a whole decade of years had passed since they were first brought to the knowledge of Christianity.' Warfield, irrespective of the *οὕτως ταχέως*, finds reasons for placing the Ep. before the other three which belong to this period, 'only a few weeks at most before 1 Co,' *i.e.* 'about or somewhat earlier than the passover time of the year A.D. 57.' His strongest argument is drawn from 1 Co 9^2 'If to others I am not an apostle, yet to you at least I am,' in which he finds an allusion to the recent disparagement of St. Paul's apostleship among the Galatians. (*Journ. of Exegetical Soc.* Paper read in Dec. 1884).

Lightfoot and Salmon bring the Ep. down a few months later, and date it from Corinth early in the year A.D. 58. The resemblances between Gal and 2 Co and Ro are obvious. The ideas suggested in Gal 3 and 4 regarding the Spirit as the promise of the Father, and as the true emancipator and sign of sonship, are elaborated in Ro 8. The impossibility of salvation by works, or of finding anything but a curse in the law, is taken up again in Ro and expounded at large. But neither can there be any doubt regarding the priority of the Ep. to the Galatians. The similarity and dissimilarity between the two Epp. are of that kind which tends to show that the Ep. to the Gal. could not have been written either after or contemporary with the Ep. to the Rom., and that it was not, therefore, a compendium of it; nor is it probable that it was written very long before it. See Jowett, *St. Paul's Epp.*[1] i. 240 (2nd ed. om.).

The similarity to 2 Co is also apparent. There is the same self-defensive tone and the same invective against those teachers who interfered with his work. In Corinth as well as in G. emissaries from Jerus. were at work; but in the Cor. Ep. no elaborate exposure of their doctrinal error is given. The conflict between himself and the Judaizers has not reached the doctrinal stage. And hence it is argued that the Ep. to the Gal., in which this stage is reached, and in which, together with a defence of his apostolic authority, there is also an elaborate exposure of the error of the Judaizers, must be later than the 2nd to the Corinthians. This conclusion, though not certain, is highly probable.

Recently, however, fresh indications of date have been pointed out by Ramsay and McGiffert. The former in his illuminating papers on the Ep. (*Expositor*, 1898) argues with much force that it was written from Antioch at the close of the second missionary journey (Ac 18^{22}). It was on that journey St. Paul had circumcised Timothy (Ac 16^{1-3}), and this gave plausibility to the insinuation of the Judaizers that when it suited him he preached circumcision (Gal 5^{11}). It was on that journey also he delivered to the Galatians the decrees ordained at Jerus. (Ac 16^4), and this might seem to give colour to the allegation that he was the mere messenger of the higher officials and not himself an apostle (Gal 1. 2). McGiffert, on the other hand, thinks it is unquestionable that in Gal 2 St. Paul is relating events about which the Galatians had no previous knowledge, at least from him; while it is incredible that he should have visited G. subsequent to these events without speaking of them. On these and other grounds, therefore, McGiffert (*Apostol. Age*, pp. 227–8) thinks it probable that the Ep. was written from Antioch previous to his departure on the second missionary journey. Subsequently, the Judaizers, while they might, as at Antioch, refuse to eat with the Gentiles, could scarcely urge their circumcision without seeming to break with the mother-church.

CONTENTS OF THE EPISTLE.—The Epistle divides itself into three almost equal portions—a personal, a doctrinal, and a practical. In the first two chapters St. Paul disposes of the insinuations which the Judaizers had made against his authority and standing as an apostle. In the two following chapters he explains the relation of the law to Christ, or of Mosaism to Christianity. And in the closing chapters he refutes the allegation that liberty and licence are the same.

To the disparagement of his apostolic standing, and consequently of the gospel he preached, he makes a threefold reply: (1) He declares himself to be an apostle, not sent merely from a Christian community, or commissioned by a human authority, but by Jesus Christ; and this he proves by a brief narrative of his movements subsequent to his conversion, by which it is made apparent that his gospel could not have been learned from men (ch. 1). (2) It was only after he had been preaching for many years that he went at length to confer with the apostles at Jerus.; and even then, so far from receiving additional light or being reprimanded, he received from them acknowledgment and encouragement (2^{1-10}). (3) Instead of being instructed by the older apostles, or being obliged to occupy a subordinate place, he himself had occasion to rebuke St. Peter and assume the position of instructor (2^{11-21}).

Next, St. Paul examines the dogmatic significance of the demand that the Gentiles should keep the whole law. And first he appeals to their own experience. As Christian men they had received the Spirit. Had this all-comprehending gift become theirs by the observance of the law? They knew it was not so; they had received the Spirit as a gift. Believing God's offer of the Spirit, they had accepted what God gave (3^{1-5}). Nor was this an exceptional or novel experience. It was the same with the typical justified man, Abraham. Whatever he enjoyed of God's favour he had by faith (3^{6-9}). Indeed, so far from the law having power to bless, it has only power to curse, and on this account and from this curse Christ came to redeem us (3^{10-14}). Moreover, hundreds of years before the law was heard of, the promise had been given to Abraham, and could not be made of none effect by any subsequently introduced institution. The promise held the field. It was given irrespective of the law, and could not be annulled by it. And yet the law was not superfluous. It had its use. It was added to instruct the conscience, that men might know their sin to be transgression, and might learn to crave righteousness. It was meant to stimulate men to crave the coming of the Spirit.

And thus it served the purpose of a schoolmaster, or of the guardian who took charge of boys under age. But when the fulness of time is come the guardian is no more needed, the full-grown son having received the spirit of his father (3^{15}–4^{7}). Lastly, out of the law itself St. Paul brings proof that there is a better thing than law, even liberty. This he does by allegorizing the story of Ishmael and Isaac.

In the third division of the Ep. (5. 6) St. Paul proceeds to vindicate Christian liberty against all aspersions. First of all (5^{1-12}), he exhorts the Gal. to stand fast in their liberty, and to beware of coming under bondage to minute observances. On the other hand, he warns them against using this liberty as an occasion to the flesh (5^{13}–6^{10}). In a brief conclusion, written with his own hand in the large characters which distinguished it from the more clerkly writing of his amanuensis, he contrasts his own devotedness and affectionate attitude towards them with the selfish aims of the Judaizers.

Hence, as Godet says, 'This Ep. marks an epoch in the history of man; it is the ever-precious document of his spiritual emancipation.'

DIFFICULTIES RAISED BY THE EPISTLE.—1. *Its discrepancy with the Acts of the Apostles.*—Baur (*Paul*, c. v.) maintains that the autobiographical statements made by St. Paul in Gal 2 shed an unfavourable light on the Ac, 'the statements in which can only be looked at as intentional deviations from hist. truth in the interest of the special tendency which they possess.' Weizsäcker (*Das Apostol. Zeitalter*, p. 87 ff., Eng. tr. i. 102) follows in Baur's steps with pedantic rigour.

(1) The first discrepancy which is discovered by a comparison of the two narratives is that whereas St. Paul says that three years elapsed after his conversion before he returned to Jerus., St. Luke says (Ac 9^{23}), ὡς δὲ ἐπληροῦντο ἡμέραι ἱκαναί (which Weizsäcker inaccurately renders 'nur einige Tage,' 'only a few days'), he was compelled to leave Damascus. To find here a discrepancy damaging to the trustworthiness of Ac, is to neglect the consideration that St. Paul had a reason for giving the exact time, while St. Luke had no occasion to be definite and rigidly exact. (2) A second discrepancy urged by Baur has more weight. St. Luke says (9^{26}) that when St. Paul came to Jerus. he sought to attach himself to the disciples, but they feared him. How was it possible that the Christians of Jerus. should not have heard of his conversion? There was constant communication between the two places, and St. Paul was so outstanding a figure that it is difficult to believe that his adhesion to the Christian Church should not have been known to all Jerusalem. It has been urged that his absence in Arabia may have withdrawn him from attention; that he may not have occupied the outstanding position at that time which subsequent events suggest, and, indeed, although commissioned to Damascus, it seems to have been at his own request, and not because he was selected by the Sanhedrin. Besides, even in St. Paul's own account (Gal 1^{23}), it appears that he was still known rather as the persecutor than as a convert. And, on the other hand, even in Luke's account, it is apparent that some, *e.g.* Barnabas, knew of his conversion. The introduction by Barnabas has certainly the air of truth. No doubt difficulties remain; but not such as discredit the account in Ac, considering the very different points of view of the two writers. (3) A third discrepancy is found in the statement of St. Paul, that he saw none of the apostles but Peter; whereas St. Luke says that Barnabas 'brought him to *the apostles* . . . and he was with them going in and going out at Jerus., preaching boldly in the name of the Lord' (Ac $9^{27.28}$). Weizsäcker is here again inaccurate in alleging that St. Paul himself assures us that he got to know no one in the Church, and that he continued for years to be personally unknown to the members. This is not what St. Paul says. He states that he saw no other apostle besides Peter, and that he remained unknown to the Churches of *Judæa*. Whether he became acquainted with Christians who were not apostles, and whether he preached in Jerus. or not, he does not say. The discrepancy really amounts to this, that in the one account he is represented as being introduced to the apostles as a body, in the other to St. Peter alone. (4) The difficulties which Baur raises, and which Weizsäcker inherits, regarding the visit to Jerus. which Luke interpolates between the two mentioned by St. Paul, are trifling and fictitious. Weizsäcker's ground for rejecting this visit is that 'Paul assures us he was seen by no one in Jerus.' during the fourteen years which elapsed between the first and second visits mentioned in Gal. Where St. Paul makes this statement we do not know. (5) The discrepancies which the Tübingen school at one time found between Gal 2 and Ac 15 have been rather thrown into the background by the living members of that school. Pfleiderer, *e.g.*, says (*Hibbert Lect.* p. 103, cf. p. 111), 'the agreement as to the chief points is in any case greater than the discrepancies in the details, and these discrepancies can be for the most part explained simply by the difference of the standpoint of the relaters.'

It is further objected that the conduct ascribed to St. Paul in the Ac is inconsistent with the attitude he assumes and the principles he maintains in Gal. In Ac he is represented as circumcising Timothy (16^{3}), as shaving his head in fulfilment of a vow (18^{18}), as attending the Jewish feasts (20^{16}), and as being at charges for four men who had a vow on them ($21^{23.24}$). Such acts of conformity to the law are, it is thought, incompatible with the principle St. Paul lays down in the Ep., 'If ye be circumcised, Christ shall profit you nothing.' The solution is obvious. When St. Paul makes this strong statement, what he means is, If you observe the ordinances of Moses because you believe them to be necessary to salvation, Christ shall profit you nothing. Together with this fundamental principle he held also as an ethical maxim, that it is right to become all things to all men, a Jew to the Jew if need be. And when he observes the Mosaic ordinances in the temple, it is not because he believes they have any virtue for salvation, but because he wishes to give no offence to his Jewish brethren. These Jewish observances have become to him matters of indifference, and only when they are lifted out of their proper position and considered essentials do they become dangerous. 'Neither is circumcision anything, *nor uncircumcision*' (Gal 6^{15}, cf. 1 Co 7^{18}). That he did not yield when it was demanded of him as a matter of principle that he should circumcise Titus, is perfectly consistent with his circumcising Timothy as a concession to expediency. No doubt St. Paul's principle carried with it the inference that as circumcision and the keeping of the whole ceremonial law were unnecessary for the Gentiles they were unnecessary for Jews also. But if the Jew clung to the temple service, the stated hours of prayer, and other observances, while at the same time he recognized that Christ alone was sufficient for salvation, St. Paul rather defended than denounced his position. So long as the observances of the law were treated as matters of indifference, St. Paul was content to leave the Jewish conscience to the education which time must bring. His attitude towards things indifferent is fully explained in 1 Co 8, 10^{23-33}.

2. *Collision with St. Peter at Antioch.*—In Gal 2^{11-14} we find a description of a scene which is certainly derogatory to the dignity of St. Peter, and which casts suspicion even on his authority. Naturally, this has quickened in the interpreting mind a desire in some way to shield the great apostle. Clement of Alex. held that the Cephas of Gal 2 was not the apostle, but 'one of the seventy disciples, a man who bore the same name' (Euseb. *HE* I. xii. 2). Although many persons adopted this view, it was so manifestly untenable that the idea was started that the two apostles arranged the scene for the edification of the people, who might thus more clearly see the folly of Judaizing. The champion of this idea was Jerome, who, however, says that it was first broached by Origen. A somewhat angry correspondence followed between Augustine and Jerome, in which the former found it easy to expose the lameness of the proposed interpretation. He maintained that 'to speak well of a falsehood uttered in God's behalf was a crime not less, perhaps even greater, than to speak ill of His truth' (see Augustine's *Letters*, esp. 28 and 40). Strangely enough, the idea seemed to attract many minds. Chrysostom advocated it, and Theodore speaks of it as at any rate a

possible view [‘sive consensu ipsam controversiam inter se simulaverunt pro aliorum utilitate, sunt vere quidem miraudi, eo quod omnia ad aliorum utilitatem facere adquieverunt’]. The point is treated with fulness in Lightfoot, *Gal.*, 127–131.

Literature.—The four great Greek commentators, Chrysostom, Theodore of Mopsuestia, Theodoret, and Theophylact, are always lucid and sensible, although the two last named are for the most part reproductions of the two first mentioned. The late Bishop Lightfoot in his Commentary on the Epistle devoted several pages (pp. 223–232) to an account and estimate of the patristic and mediæval writers who have dealt with it. To this nothing need be added except that the com. of Theodore can now be consulted in the convenient ed. of Dr. Swete published by the Camb. Univ. Press in 1880–1882. Among the Latin Fathers, Jerome and Augustine have both left expositions of this Epistle, the former esp. being of value. Among the Reformers, Luther, Calvin, and Beza may be consulted with advantage. Estius, Bengel, and Wetstein contribute much from their special points of view. Among more recent expositions the following are worthy of mention: Usteri, *Komm. über d. Gal.* (1833); Schott, *Epistolæ P. ad Thess. et Gal.* (1834); Windischmann (Roman Cath.), *Erklärung d. Gal.* (1843); Hilgenfeld, *Der Galaterbrief* (1852); Ellicott, *Crit. and Gram. Comment. on Gal.* (1854); Jowett, *The Epistles of Paul* (1859, 2nd ed. 1894); Bisping (Rom. Cath.), *Gal.* (2nd ed. 1863); Hofmann, *Die heil. Schrift NT*, ii. 1 (1863); Lightfoot, *St. Paul's Ep. to Gal.* (1865); Meyer, *Crit. and Exegetical Handbook* (1870); Sanday in Ellicott's *NT* (1879); Holsten, *Das Evangelium d. Paulus* (1880); Philippi, *Gal. erklärt* (1884); Sieffert in the re-edited Meyer (1886); Palmieri (Rom. Cath.), *Gal.* (1886); Schaff in *Illustr. Popular Com.* (1881); Beet, *Com. on St. Paul's Ep. to Gal.* (1885); Findlay in *Expositor's Bible* (1888); Goebel, *Neutest. Schriften* (1889); Cornely (Rom. Cath.), *Gal.* (1890); Lipsius in *Hand-comm.* (2nd ed. 1892); Zöckler in Strack and Zöckler's *Kgf. Comm.* (2nd ed. 1894); B. Weiss, *Die Paulin. Briefe* (1896); Zahn, *Einleit. in d. NT* (1897). [Useful bibliographical lists will be found in Meyer, Sieffert, and Lipsius.]

Marcus Dods.

GALBANUM (חֶלְבְּנָה *ḥelbĕnâh*, *χαλβάνη*, *galbanum*).—A gum resin, *Ferula galbaniflua*, Boiss. et Buhse; and *F. rubricaulis*, Boiss. It is known in Arab. by the name *ḳinnah*, and in Persian as *birzed*. It occurs in the form of *tears* and *lumps*. The *tears* are round, yellow to brownish-yellow, translucent, and not larger than a pea. The *lump galbanum* is more common, and consists of irregular masses of a brownish or brownish-yellow colour, composed of agglutinated tears. Fruits with bits of stem and other impurities are mixed with the resin. The odour is balsamic. Pliny (*Nat. Hist.* xii. 56) declares it to be a product of a kind of giant fennel, growing in Amanus. There are many species of *Ferula*, *Ferulago*, *Colladonia*, and other large Umbelliferæ in Amanus, but no such gum is now extracted from any of them, and none of the plants reputed to yield galbanum grow there. Pliny (*l.c.*) and Virgil (*Georg.* iii. 415) say that its smoke drives away serpents. G. is imported from India and the Levant. It is mentioned only once in the OT (Ex 30^{34}) as an ingredient of the sacred incense, and once in Apocr. (Sir 24^{15}).

G. E. Post.

GALEED (גַּלְעֵד ‘cairn of witness,’ LXX Βουνὸς *μαρτυρεῖ*, E *-ίου*).—The name which, according to Gn 31^{47}, was given by Jacob to the cairn erected on the occasion of the compact between him and Laban. There is evidently a characteristic attempt also to account in this way for the name *Gilead*. The respective proceedings of Jacob and of Laban are uncertain, for the narrative is not only of composite origin, but has suffered through the introduction of glosses into the text. Kautzsch-Socin remark that even if v.^{47} belonged originally to E (which Wellh. strongly denies, setting it down as a gloss due to pure pedantry), it is certainly introduced by R in the wrong place. A similar remark applies to v.^{48} ‘Therefore was the name of it called Galeed,’ which probably was derived from J. There is a confusion in the present text due to the attempt to harmonize E's account of the erection of a *mazzēbāh* with the statement of J that it was a ‘cairn’ (גַּל) that was erected. It is pretty certain that we should read ‘Laban’ instead of ‘Jacob’ in v.^{45} (so Wellh., Dillm.). The LXX seeks unsuccessfully to reduce the narrative to order by means of transpositions.

GALILÆAN (Γαλιλαῖος).—An inhabitant of Galilee. The apostles, who spoke with divers tongues on the day of Pentecost, were said by the crowd to be Galilæans, which made the matter all the more surprising (Ac 2^{7}); a massacre of Galilæans by Pilate was reported to Jesus (Lk 13^{1}); Pilate spoke of Jesus as a Galilæan (Lk 23^{6}); Peter was told, when trying to conceal the fact that he was a Galilæan, that it was useless for him to do so, as his speech* betrayed him (Mk 14^{70}); the attitude of the Galilæans towards Jesus is contrasted with that of the Jerusalemites (Jn 4^{45}). In the article Galilee some traits of the inhabitants are mentioned, to which very much might be added. They were healthy, brave, and industrious; they developed the resources of their province in a wonderful manner; they were skilful merchants, and added to their wealth by shipping their commodities to other parts of the world; from a religious point of view, they were the most liberal-minded people of Palestine; they were enterprising, intelligent, and possessed a poetical talent of very high order; and in the great struggle with Rome, A.D. 66–70, they were the strongest defenders of liberty of whom the Jewish nation could boast.

S. Merrill.

GALILEE (הַגָּלִיל, הַגָּלִילָה, גְּלִיל הַגּוֹיִם, Γαλειλαία).—It is singular that a province so well known as Galilee was in NT times, and occupying the place it did in the history of the Jewish nation, is mentioned but six times in OT (Dillm. also in Jos 12^{23}). Three of these being identical (Jos 20^{7} 21^{32}, 1 Ch 6^{76})—a mere statement of the fact that Kedesh, the city of refuge, was in Galilee—the number is reduced to four. When Kedesh is mentioned (in these three passages), also the invasion of Tiglath-pileser (2 K 15^{29}), and Solomon's present of twenty cities to Hiram (1 K 9^{11}), Galilee is spoken of in the same familiar manner that it is in NT or in Josephus. There remains one instance only which attracts our attention, namely, Is 9^{1} ‘Galilee of the nations.’† This has always been admitted to be a difficult passage. The only biblical commentary is the historical notice of Tiglath-pileser's invasion (2 K 15^{29}), ‘he took Ijon, and Abel-beth-maacah, and Janoah, and Kedesh, and Hazor, and Gilead, and Galilee, all the land of Naphtali.’ Here Galilee appears to be as well known as Gilead; and no hint is furnished as to its extent or character. The same can be said of the transaction between Hiram and Solomon (1 K 9$^{11ff.}$); for whatever meaning the word ‘Cabul’ may have, it is evident that Solomon considered the twenty cities a proper and ample compensation for the favours he had received from Hiram.

Thus far we have gained little except to learn that the Bible gives us no account of the origin of the word Galilee, of how large an area it embraced at first, or of how it came to be applied to all the northern part of Palestine.

Palestine west of the Jordan was, in the time of our Lord, divided into three provinces, Judæa, Samaria, and Galilee. The latter was the most northern, and occupied in general the territory that had been assigned by Joshua to the four tribes, Asher, Naphtali, Zebulun, and Issachar.

---

* Alluding probably to a Galilæan habit of confounding the gutturals (Smith, *HGHL* 423 n.; Dalm., *Gram. d. Aram.* 5, 42 f.).

† The word, which has regularly the art., ‘*the gâlîl*,’ appears to mean ‘circle’ or ‘district.’ Apparently, Is 9^{1} gives the full title.

It extended to the Jordan on the E., the Leontes, *Litany*, on the N., the territory of Tyre, which was then a narrow strip of seacoast, on the W., and below the territory of Tyre it touched the Mediterranean and included Ptolemais (*Accho*) and Mount Carmel, and on the S. the line, which was irregular, passed near Ginea (*Jenin*), included Scythopolis or Bethshean to the E., Taanach and Megiddo to the W., and followed the Carmel ridge to the Mediterranean. Its extent in miles was about sixty from north to south, and about thirty from east to west.

Josephus divides the province into Upper and Lower Galilee. Lower Galilee extended east and west from Carmel to the Jordan; the S. line would be that already indicated as passing near Jenin, and the N. boundary included Arbela on the west of the Sea of Galilee, and also Jotapata (*Jefat*). Tarichea, Tiberias, Sepphoris (the capital of Galilee during a large portion of Christ's life), Cana, and Nazareth were all in Lower Galilee. The boundaries of Upper Galilee are given by Josephus (*Wars*, III. iii. 1; *Life*, 37), and were no doubt well understood by his readers; but it is difficult for us to indicate its limits, since the places noted still remain unidentified. The district extended from Bersabe on the S. to Baca on the N., and from Thella, a place bordering on the Jordan, to Meroth on the west.

In the year B.C. 47 Galilee had as military governor a young man then but twenty-five years of age, who subsequently became known to the world as Herod the Great. He had been appointed to this position by his father, Antipater, and proved a successful ruler. After his death, in B.C. 4, his son Antipas was made tetrarch of Galilee, and, since he was not banished by Caligula till A.D. 39, he governed the province during the entire life of our Lord. During the reign of Antipas, Galilee was bounded on the E. by the dominions of his half-brother Herod Philip II. After the removal of Antipas, Galilee came under the rule of Herod Agrippa I., who died in A.D. 44 as described in Ac 12. Although these men ruled by the favour of Rome, they were still native rulers, and in that fact the inhabitants felt a degree of pride, because their dependent state was thereby made less apparent and no doubt far less galling.

In comparing Galilee with other portions of the Holy Land, there are certain respects in which it can claim to be unique. In fact it would be difficult to find anywhere else on the globe another district of equal size whose natural characteristics are so wonderfully diversified as are those of Galilee.

The white dome of Hermon was ever present to the inhabitants as much as if that mountain had risen from their own soil, and the same was true of the wide expanse of the Mediterranean to the west. The long line of seacoast with its cities of wealth and its composite life must be taken into the account, and on the other side the depression of the Jordan Valley, in which, 700 ft. below the level of the Mediterranean, lay the Sea of Galilee. In Lower Galilee the group of Nazareth hills was picturesque; isolated Tabor had a grandeur and a beauty of its own, while in Upper Galilee but a single peak, Jebel Jermuk, reached a height of 4000 ft.; 2000 to 2500 ft. being the general elevation. Nowhere were the mountains rugged, their gradual slopes and the intervening valleys were always attractive. The Esdraelon plain was of inexhaustible fertility, and so was the region about Lakes Merom and Tiberias. The climate was all that could be desired; the temperature was mild on the seacoast, hot in the Jordan Valley, and always cool in the highlands. The air was invigorating, and no doubt it was owing partly to this fact that the Galilæans were always noted for being healthy, hardy, and brave. The forests, meadows, and pastures, the tilled fields and gardens, the vineyards and olive orchards, the broad acres covered with wheat and barley, the fountains, streams, lakes, and rivers, the prosperous cities and towns which dotted the land, made the aspect of the country singularly varied and attractive.

In the Blessing of Moses (Dt 33) upon the tribes occupying this territory there are suggestive hints as to its natural features and the peculiar productions of its fertile soil. Special characteristics of these highlanders are brought out in other portions of OT which are fully confirmed and illustrated by what we learn from other sources, regarding both country and people. The NT, Josephus, the Talmud, and modern research present attractive, not to say fascinating, pictures of this highly favoured land.

How frequently in the Gospels are the 'cities and villages' of Galilee mentioned, leading us to suppose that its surface was thickly covered with flourishing centres of life. While Josephus praises the fertility and populousness of the entire province, he rises to enthusiasm when he describes the Plain of Gennesaret, 'that unparalleled garden of God' (*Wars*, III. iii. 2, 3; x. 8). 'For sixteen miles about Sepphoris,' says the Talmud, 'the region is fertile, flowing with milk and honey.' 'The land of Naphtali is everywhere covered with fruitful fields and vines, and its fruits are renowned for their wonderful sweetness' (Talm. Bab. *Megilla* 6[a]). Five of Solomon's commissariat officers were assigned to this region, who furnished for the royal table fine flour, meal and barley, great numbers of fat oxen, also pasture-fed oxen, sheep, harts, gazelles, roebucks, and fatted fowl (1 K 4[22. 23]).

In early times the forests of Galilee were extensive, and even in the country's present degradation they are deserving of notice, for there, besides many flowering trees, shrubs, and aromatic plants, we find the vine, the olive, and the fig, the oak, the hardy walnut, the terebinth, and the hot-blooded palm, the cedar, cypress, and balsam, the fir tree, the pine, the sycomore, the bay tree, the mulberry, the almond, the pomegranate, the citron, and the beautiful oleander. And, among other productions of the soil, Galilee can still boast of wheat, barley, millet, pulse, indigo, rice, sugar cane, oranges, pears, apricots, and some other fruits, besides vegetables in great variety (Merrill, *Galilee in the Time of Christ*, pp. 14–21).

But a fine climate, a rich forest growth, great fertility of soil, and a wealth of vegetation presuppose an abundant supply of water, and in this respect Galilee was notably favoured. One might almost say that the lawgiver had this province specially in mind when he promised the Hebrews that they were to enter a 'land of brooks of water, of fountains and depths, springing forth in valleys and hills' (Dt 8[7]). Lake Merom and Lake Tiberias both belonged to Galilee, and the latter was justly the pride of the nation. The Jordan flowed through them both, and the water of both was sweet and clear.

All of the Jordan north of the Sea of Galilee and one-third of its length to the south of that was reckoned to Galilee. The sources of this river at Banias and Dan are remarkable for their natural features and for the volume of water which in each bursts forth from the ground. From the eastern side of the watershed of Galilee numerous small streams flow into the Jordan, while those on the west side make their way into the Mediterranean. Of the latter one of the most celebrated was the Kishon (*Nahr Mukaṭṭa*), which took its rise near the foot of Tabor, and after a winding course across the plain of Esdraelon entered the sea near the base of Carmel. This stream had a number of feeders from the north, from Mount Gilboa and the region of En-gannim, and also from the south. This is 'that ancient river' famed in the triumph song of Deborah and Barak (Jg 5).

Near Acre another stream entered the Mediterranean, the Belus (*Nahr Naman*), regarded as the Shihor-libnath of Jos 19^{26}, with which is connected the interesting tradition that from its fine sand the Phœnicians first made glass. It is a fact that this sand was so highly prized that numerous ships came here to convey it to the glass shops of Tyre and Sidon, then the most famous in the world. The supply was thought to be inexhaustible (Pliny, *HN* xxxvi. 65).

All vegetation in Galilee would be affected by the 'dew of Hermon' which is praised in Ps 133^3, and snow from this mountain was carried as a luxury to Tyre and Sidon, and to Sepphoris and Tiberias the capitals of Herod Antipas. Springs and fountains were so abundant in Galilee that it would be next to impossible to count them. In addition to these, notice must be taken of the Hot Springs of this province, which had a world-wide fame as resorts for health and pleasure. Those at Tiberias were probably the most celebrated, and their medicinal advantages were known even in Rome (Pliny, *HN* v. 15). The benefit to be derived from bathing in this hot sulphur water was so great that not only the common people but people of learning and rank came hither, seeking by this means to restore their health (Jos. *Life*, 16; Jer. Talmud, *Shab.* 3^a). These springs had a rival in those of Gadara, about two hours S.E. of the Sea of Galilee, where still existing ruins of a small theatre, bath houses, paved courts, beautifully carved stone seats or chairs, dressing rooms, etc., indicate the luxurious provision that was made for the guests (Merrill, *East of the Jordan*, pp. 150–153).

One would hardly expect to find that Galilee, directly under the perpetual snows of Hermon, would be subject to earthquakes; still such is the fact, and several very severe calamities are on record as having visited that country. In 1759 Safed was destroyed by an earthquake, and another in 1837 killed five thousand people out of a total population of about nine thousand. Chasms opened in the earth, and the houses being built on a steep hillside fell one upon another, and the ruin was terrible. Tiberias at the same time was visited in like manner, and half its inhabitants killed. The ravages then caused are still evident in ruined houses and in the cracked and twisted walls of the city, which have never been repaired.

Although there had been a large deportation of its inhabitants by Tiglath-pileser, and no doubt much destruction of life in other wars, Galilee seems to have entirely recovered from these calamities, for there is abundant evidence that in our Lord's time the country was densely populated. The conditions of life there—climate, soil, enterprise, and industry, and a ready market for all products—favoured such a result. The exact number of its inhabitants at any given time may be a matter of speculation; it has been reckoned from two millions to three millions at the beginning of our era; but since it was then customary for people to congregate in cities and towns, we shall be aided in our judgment if we turn our attention briefly to them. When the division of the land took place among the four tribes, sixty-nine cities at least are mentioned by name. Josephus in his account of Galilee mentions by name about forty cities and villages. It is interesting to note that of the nineteen cities assigned to Naphtali sixteen were 'fenced' (עָרֵי מִבְצָר), Jos 19^{35}. About the Sea of Galilee there were ten or twelve flourishing towns. Were not this fact corroborated by historical evidence, it might be disputed were one to judge solely by the present ruined condition of that region.

Beginning at Tiberias and going round by the S. we come first to *Bethmaus*, where was a synagogue, and which consequently ranked as a city. Beyond that was *Tarichea*, famous for its ship-building and its fisheries, of whose inhabitants six thousand young men were sent by Vespasian to Corinth to work on the Isthmus canal, and thirty thousand more were sold as slaves (*Wars*, III. x. 10). A fine bridge crossed the Jordan where it leaves the Lake, and beyond that on the E. side was *Gergesa*, the scene of the demoniacs and the herd of swine (Mt 8^{28-34}). On the brow of the mountain E. of Gergesa was *Gamala*, 'the strongest city in that part' (*Wars*, II. xx. 4), which withstood a siege of seven months, and was subdued only when Vespasian led against it three of his legions. Near Gamala was *Hippos*, one of the cities of the Decapolis. At the N.E. corner of the Lake was *Julias*, which previous to our era bore the name of Bethsaida, and which Herod Philip II. transformed into a beautiful and flourishing city, where he himself in A.D. 34 was buried in a costly tomb. On the W. side we have *Chorazin*, not far from the Lake, and *Capernaum*, *Bethsaida*, and *Magdala* directly on the shore. Capernaum was called Christ's 'own city' (Mt 9^1); Bethsaida was the home of Philip, Andrew, and Peter, possibly also of Zebedee and his sons James and John; and Magdala is memorable for the touching story of Mary and her connexion with our Lord. Close to Magdala, just above the famous robber-caves of Wady Haman, was *Beth-arbel*, a stronghold from the earliest times (Hos 10^{14}). We have now reached our starting-point, *Tiberias*, which was a city of great political importance, having been rebuilt in magnificent style by Herod Antipas not long before Christ began His public ministry, when it became the capital of the province.

No more than a glance at the country itself is needed to convince one that this province possessed an unusual number of large towns, to some of which was attached special historic interest. There may be mentioned *Safed*, visible from the shore of the Sea of Galilee, 'a city set upon a hill,' one of the sacred cities of the Jews; *Hazor*, the royal city of king Jabin (Jg 4^2); *Cana*, where our Lord's first miracle was performed (Jn 2); *Sepphoris*, the capital of the province till it was removed to Tiberias,—it was a strong place, where was a royal magazine of arms, and where the public archives were kept; *Kedesh*, one of the cities of refuge, and, under Tyrian rule, a centre of pagan worship; *Jotapata*, where one of the longest and most desperate sieges during the war with Rome took place; *Tabor*, conspicuous and beautiful in its position, and strongly fortified from the earliest times; *Japha*, which 'had very strong walls and a large number of inhabitants' (Jos. *Life*, 45); *Zabulon*, whose houses were built after the model of those of Tyre, Sidon, and Beirût, that is, with great elegance and of unusual height; *Gabara*, mentioned with Tiberias and Sepphoris as one of the largest cities of Galilee (Jos. *Life*, 25); *Gadara*, where Vespasian's first blow was struck in his campaign in Galilee (*Wars*, III. vii. 1); *Bethshean*, interesting in its ancient history, and still more famous under its new name Scythopolis; *Ptolemais*, where the Roman fleet and army gathered that had come to destroy the Jews as a nation; and, finally, *Cæsarea Philippi*, which under the name Banias was a seat of idol-worship ten centuries before it was known to the Greeks, and by these people in turn transformed into a shrine of Pan under the name Paneas, adorned by Herod the Great, and still more by his son Herod Philip II., a place visited by Vespasian as the guest of Herod Agrippa II., and later by Titus, wonderfully attractive in its situation, but chiefly interesting to the Christian from its connexion with our Lord. This rapid review, which embraces only a few of the better-known places of Galilee, indicates that wherever we turn our eyes, on hillside or plain, we look upon town, city, or village of prosperous Galilee, and the conclusion is forced upon us that its population was dense.

Among the productions of Galilee, the olive was perhaps the most prominent. In the Blessing of Moses it is said of Asher, 'let him dip his foot in oil' (Dt 33^{24}). The Rabbis said, 'In Asher oil flows like a river,' and 'It is easier to raise a legion of olive trees in Galilee than to raise one child in Judæa.' Both Syrians and Phœnicians, and frequently people from a greater distance, obtained their main supply of oil from this province. Great stores of it existed in Jotapata, so that in the siege of that place by the Romans oil was heated and poured over the soldiers who were crowding up to the walls, and, as it was at the same time set on fire, the effect was terribly disastrous. Of the vast quantity of oil which Solomon gave yearly to king Hiram, 150,000 or 200,000 gallons, a large proportion was supplied from Galilee (2 Ch 2^{10}). It is needless to add that the amount of revenue derived from this source was great.

Next to the oil, the amount of wheat raised in Galilee was equally surprising. For this article the demand of Phœnicia, whose ships went over the world, was enormous. In Ac 12^{20}, when war was on the point of breaking out between Herod Agrippa I. and the people of Tyre and Sidon, the latter succeeded in appeasing Herod's anger, which for them was most fortunate, since without the supplies of various kinds which they derived from his country they could not live.

Not only oil, wheat, and barley, but large quantities of dried figs, grapes, wine, pomegranates, honey, were raised and sent abroad, as well as numberless fatted fowl, sheep, and cattle. Flax also was produced in large quantities, which the weaving establishments and dye-houses of the seacoast towns transformed into useful or costly and beautiful fabrics.

Moreover, the fisheries of the Sea of Galilee must be mentioned as one of the chief industries of this province. Choice kinds of fish were abundant, and when properly prepared were sent over the world. Both Tarichea and Bethsaida seem to have derived their names from the fish factories for which they were famous.

The Phœnician coast lying so near Galilee, all its industries, manufactures, commerce, and luxurious living would only increase the market facilities of Galilee, of which her industrious inhabitants were ever ready to avail themselves. The prosperity of Galilee was enhanced by the network of roads which covered it (see Smith, *HGHL* 425 f.). These roads help to explain also the facility with which the ὄχλος assembled, which so often thronged our Lord.

Besides its natural attractions, its varied productions and commercial facilities, its populousness and wealth, Galilee appeals to us more strongly than in any other way by its unique place in the religious history of the world. It was the cradle of the Christian faith. Joseph and Mary belonged to Nazareth, and there Jesus lived the larger part of His life. The peculiar influences of this mountain city, and its wonderful outlook over land and sea, no doubt had their effect upon the mind of Christ during His boyhood and youth. When He desired larger opportunities for reaching His fellow-men, He did not go out of His province to Jerusalem, Rome, or elsewhere, but removed to Capernaum on the shore of the Lake (Mt 9^{1}). A large proportion of the apostles, the men who helped to shape early Christianity, were from Galilee—namely, Peter, Philip, Andrew, James, John, all of whom were from Bethsaida; Matthew from Capernaum; besides Bartholomew or Nathanael, and James the Less, son of Alphæus and Mary, and possibly others, for even those who were not born there could by virtue of residence and labours be classed as Galilæans (Ac 1^{11}). There is a tradition that the parents of the Apostle Paul came from Gischala in Galilee, which is not at all improbable when we remember how large a number of Jews in the days of Herod went forth from Palestine to seek their fortunes in the distant commercial centres of the Roman world. Salome the wife of Zebedee, Anna the prophetess who joined in the welcome to the infant Jesus, furnish hints as to the piety and intelligence of the women of this province.

It is scarcely necessary to look back to the pre-Israelitish period. Still even then the Baal worshippers from the seacoast, who sought out the most attractive spots for their degrading rites, had crowded in and set up their altars in the most beautiful groves and on many of the hills of Galilee—Kedesh, Dan, and Cæsarea Philippi being some of the best-known of these idolatrous centres.

It is a significant fact that the Jews, after the destruction of Jerusalem, should have chosen Galilee as their religious centre. This becomes indeed a matter of great surprise when we consider the relations of the orthodox Jews to the Founder of Christianity and His followers as these are portrayed to us in the Gospels. They must have considered it a congenial atmosphere for their libraries, schools, and learned men, for here these flourished in a remarkable manner. During the long period of three or more centuries many synagogues were erected, and remains of some of these are still found at different places, those at Biram, Chorazin, and Tell Hum being familiar to everybody. Here, before A.D. 200, the Mishna had been compiled, *i.e.* the oral or traditional law to which Christ so often referred was given a fixed form by being written down, and also the commentary on this, known as the Palestinian Talmud, was made, having been completed about two centuries later. Tiberias, like Safed, became one of the sacred cities of the Jews, and here the great Maimonides and some other of their famous Rabbis were buried.

Among the famous personages of Galilee may be mentioned Barak, one of Israel's heroes; Deborah, the author of a triumph song; the judges Ibzan, Elon, and Tola, who judged Israel forty years; the prophets Hosea (?), Jonah the son of Amittai, and Elisha the successor of Elijah. This was not Elijah's birthplace, still he can be said to belong to Galilee, because this was the scene of a large part of his labours.

The fascinating and inspiring natural objects so abundant in Galilee — vine-clad slopes, plains brilliant with flowers, and the beautiful lake deep within the bosom of the hills—could hardly fail to awaken the spirit of poetry; and besides the well-known examples in proof of this, some eminent scholars, as Gesenius and others, would locate here the Song of Songs.

Not only did our Lord, and also His disciples by birth or residence, belong to Galilee, but it is surprising to find so large a proportion of the Gospels picturing Galilæan scenes and life: places, people, parables, miracles, healing; rulers, soldiers, merchants, beggars; everything so vivid that we seem to be walking with the Master along the shore and from village to village of His native land.

The Sermon on the Mount (Mt 5), the raising of the widow's son (Lk 7^{11-15}), stilling the tempest (Mt 8^{26}), feeding the five thousand (Mk 6^{44}), the transfiguration (Mk 9^{2}), the marriage feast (Jn 2^{1}), the custom house (Lk 5^{27}), the draught of fishes (Lk 5^{6}), the mountain refuge for secret prayer (Mt 14^{23}), the little child in the Saviour's arms Mk 9^{36}), and the marvellous explanation of the bread of life (Jn 6),—these and a multitude of other sayings and incidents which make up the Gospels take us at once to Galilee. The number and variety of natural objects which Christ introduces so frequently in His utterances, illustrate the extent and correctness of His habit of observation. Nothing escapes His notice,—sky, earth, sea, fields, flowers, grass, grain, fruits, trees, fish, birds, and animals,—the salient facts of the world immediately about Him were grasped and made the basis of beautiful lessons. A very exhaustive article on this subject, entitled 'Christ as a Practical Observer of Nature, Persons, and Events,' may be found in the *Bibliotheca Sacra*, July 1872, pp. 510-531, by the present writer.

The part played by Galilee in the war with Rome will always command the admiration of the world. It was a life-and-death struggle, and her people rallied with the utmost enthusiasm to the defence of their fatherland. The fact that during the first year of the war Galilee stood alone has not received the attention it deserves. The forces that were, or might have been, gathered in Judæa were not sent to her aid. From their camp at Ptolemais four veteran legions with their engines of war marched towards the hills of Galilee; but it proved to be no holiday expedition on which they had started. The campaign was long and bloody; the highland patriots resisted with almost superhuman energy; the Romans were successful at last, but their victory was a costly one. The hardest fighting of the war was done on the soil of Galilee, and in that terrible year one hundred and fifty thousand of her people perished. From the days of Joshua to those of Bar-Cochba no Jewish army had shown greater valour than did the compatriots of Jesus of Nazareth—the men from the home-land of Christ.

LITERATURE.—For a full account of this province in all its historical phases of interest, see the present writer's *Galilee in the Time of Christ*, Boston (U.S.) 1881, London 1885; cf. also his *East of the Jordan*; G. S. MERRILL.

GALILEE, MOUNTAIN IN.—After our Lord's resurrection, the eleven disciples went away from Jerusalem 'into Galilee, unto the mountain where Jesus had appointed them (*εἰς τὴν Γαλιλαίαν εἰς τὸ ὄρος οὗ ἐτάξατο αὐτοῖς ὁ Ἰησοῦς*).' There the disciples saw and worshipped Him, and received His final commission (Mt 28^{16-20}). No record or hint indicates to us what mountain is meant. For harmonistic reasons the theory that the Galilæan hill was the Mt. of Olives, whose north point is said to have borne the name 'Galilee,' has found favour in some quarters. This opinion scarcely needs refutation (see Keim, *Jesus of Nazara*, vi. 380 n.).

S. MERRILL.

GALILEE, SEA OF.—This appears in the Bible under several different names, which must first be noticed. Modern writers not infrequently speak of the 'Lake of Tiberias,' but this term is never used in NT. Moreover, Lk 5^{1} is the only place where the name '**Lake of Gennesaret**' (*λίμνη Γεννησαρέτ*) occurs. In four instances it is referred to as 'the Lake' (*λίμνη*), Lk 5^{2} $8^{22.\ 23.\ 33}$, and in several others as 'the sea' (*θάλασσα*), Jn 6^{11-25}. Twice John employs '**Sea of Tiberias**' (*θάλασσα τῆς Τιβεριάδος*), 6^{1} 21^{1}, but in the first case he had already mentioned in a natural way the Sea of Galilee, and immediately added as an explanation for his Gentile readers that it was the same as the Sea of Tiberias. This reduces the use of the latter name to a single instance. 'Sea of Galilee' (*θάλασσα τῆς Γαλιλαίας*) would seem to be the best known and most appropriate name, and this is used five times (Mt 4^{18} 15^{29}, Mk 1^{16} 7^{31}, Jn 6^{1}). Glancing at the OT we find for this body of water two names, or properly one name spelled in different ways. The 'Sea of Chinnereth' (יָם כִּנֶּרֶת) appears in defining the boundary of the land (Nu 34^{11}), and again in defining the border of the territory of Gad (Jos 13^{27}). 'Sea of Chinneroth' is given in describing the territory of Sihon that was conquered by Moses (Jos 12^{3}). Chinnereth (כִּנֶּרֶת) is used once alone (Dt 3^{17}) and Chinneroth (כִּנְּרוֹת) also (Jos 11^{2}), both referring to the Sea of Galilee. Once Chinneroth is used for a district conquered by Benhadad (1 K 15^{20}), and Chinnereth appears in Jos 19^{35} as a 'fenced city.' It is perfectly consistent with Oriental usage for a city, a district, and a body of water adjoining it to be called by the same name, although it is quite possible that Dt 3^{17} (see Driver, *ad loc.*), Jos 11^{2} 19^{35} all refer to the *city* Chinnereth or Chinneroth.

To this brief survey of biblical names for this lake we may add that Gennesar (*τὸ ὕδωρ τοῦ Γεννησάρ*, RV '**the water of Gennesareth**') is given in 1 Mac 11^{67}. Josephus had occasion to refer to this lake many times, and he always uses the name Gennesar (*e.g. Ant.* XIII. v. 7). The change from the Heb. Kinnereth to Gennesar was a natural one (but see G. A. Smith, *HGHL* 443 n.). Josephus adhered to the OT name in its changed form, while the NT writers, as we have seen, used the title 'Sea of Galilee.'

As to the meaning of these names, Galilee is obviously derived from the province of that name, and Tiberias from the city on the west shore of the lake. *Chinnereth* may be from כִּנּוֹר, 'harp.' Benzinger (*Heb. Arch.* 23) thinks this improbable; and Fuerst suggests 'basin.' *Gennesaret* may have the same meaning as *Chinnereth* if we allow that it was simply transferred from the Hebrew; or it may be from *gan* and *sâr*, 'prince's garden,' applied, of course, to the Land of Gennesaret, from which the Sea of Galilee is once called the 'Lake of Gennesaret' (Lk 5^{1}).

The Sea of Galilee is 13 miles long and a little less than 7 miles wide in its widest part. Its greatest depth is less than 200 ft. It is not quite oval in form, although it appears to be so when looked at from the surrounding heights. It is more properly pear-shaped, having the small end at the south. Its level below the Mediterranean is about 700 ft. On the east side the mountain rises from its shore to an elevation of 2000 ft., the same as that of the great plateau of Bashan beyond. On the west side there is also a mountain wall, but towards the north the slopes are very gradual, and on the south the lake touches the plain of the Jordan Valley. To the eye it is a most attractive object, a beautiful body of water set deep in a vast basin among the hills. Not only the Jews, but people of many other races who were not natives of the soil, have praised the beauty of the Sea of Galilee. 'Although God has created seven seas,' said the Rabbis, 'yet He has chosen this one as His special delight.' They speak of its 'gracefully flowing' or 'gliding waters.' The mountains, the peaceful shore at their base, the blue water overarched by the blue sky, form a landscape picture that has kindled the enthusiasm of many hearts. It is seen at present at its worst estate; but in the time of our Lord this shore was a continuous garden, and even the matter-of-fact Pliny declared that this lake was 'surrounded by pleasant towns' (*HN* v. 15).

These towns have been described briefly in the article GALILEE, but the list at least may be repeated:—Tiberias, and south of it Bethmaus, Tarichea, Sinnabris, Gergesa, Gamala, Hippos, Julias, Bethsaida, Chorazin, Capernaum, Magdala, and Beth-arbel. On the mountain to the S.E. was Gadara, Safed on its lofty summit to the N.W., and a castle was perched directly above Tiberias almost overhanging the lake. Through Wady Hamam the Horns of Hattin appeared, and to the north rose the magnificent dome of Hermon. This famous mountain is not one of a cluster, it is not hemmed in and dwarfed by surrounding peaks, but it stands alone, revealing its full grandeur. From the shore of the Sea of Galilee, if we add its depression of 700 ft. to the elevation of Mount Hermon, we look up to its summit a sheer height of over 10,000 ft. Among all the mountains of the world, such a view is seldom surpassed.

The hills, which appear to surround the lake, recede from the shore a distance varying from a few hundred yards to half a mile or more, and this belt is generally level, so that, without cutting or filling, a carriage road could readily be constructed entirely round the lake; with a horse and carriage the circuit could be made in four or five hours. At two points, where the recession of the mountain is greatest, two charming plains are formed, namely, *el-Batiha* on the N.E. of the lake, and Gennesaret on the N.W. They resemble each other, are equally fertile, but it is Gennesaret that has always received the most praise. See GENNESARET (LAND OF).

The river Jordan enters the lake at the northern end, and passes out at the southern end. It brings down so much sediment at times that it appears like a very dirty stream: still the water of the lake itself is always clear; it is also sweet and cool.

The steep mountain wall on the E. side, already referred to, is volcanic, a part of the great lava formation which includes the Bashan plain and the Hauran mountains, where exist a score or more of extinct craters. The hot springs of Gadara, within 5 miles of the S.E. corner of the lake, those at Tiberias on the W. shore, and likewise the earthquakes which visit that region from time to time, are indications that internal fires still exist. The latest recorded earthquake from which Tiberias suffered severely was in 1837, vividly described by the American missionary Rev. Wm. M. Thomson, well known as the author of *The Land and the Book*. The region to the N. of the lake through which the Jordan passes, extending to Chorazin and Tell Hum, is simply a mass of large basalt boulders, packed so closely that it is next to impossible to get through them.

The hot springs near Tiberias have been famous from the earliest history of the country, and the inhabitants still prize them for their medicinal uses. The volume of water is large, and, could they be properly cared for and managed by other than their present degraded owners, there is no reason why these springs should not become one of the most famous health resorts in the world. Except in midsummer the climate is delightful—in fact, tropical; and when a person is chilled by the strong winds of mountain or tableland, the sensation of going down to the warm, even balmy, atmosphere of the lake shore is one of extreme pleasure.

Equally with the hot baths, the fish of this lake have always been held in highest estimation. Laws traditionally dating from the time of Joshua (Bab. Talm. *Baba Kama*, 806) regulated this industry, and, with certain limitations, made this fishing ground free to all. There were several choice varieties, and the inhabitants of the region boasted that some of them were the same as those found in the Nile. There seems, moreover, to have been an inexhaustible supply of fish. Bethsaida on the north was a 'house of fish'; Tarichea on the south was 'a fish factory,' and the trade in this commodity had enriched its citizens. On the part of the Jews there was not only a choice in kind but in quality as well, for they distinguished sharply between 'clean' and 'unclean,' a fact no doubt alluded to in our Lord's parable of the net, where the 'good were gathered into baskets, and the bad were cast away' (Mt $13^{47.48}$).

The lake is subject to violent storms, owing partly to the difference of temperature about it from that of the mountains or tableland so far above it, so that the event recorded in Mt 8^{24}, when Christ stilled the waves, was of no infrequent occurrence. From an eminence the writer has several times seen the clouds gather above the lake, a dense black mass, not covering a great area, and sink lower and lower towards the water as if about to smite the surface; and even should they not actually do so, they disturb it so that the waves are strong and boats are placed in great peril.

From the way in which the NT speaks of boats and ships on the Sea of Galilee, we infer that it was covered with them. There seem to have been numbers of them ready at any given point. Given ten or twelve flourishing cities on or near the shore of the lake between which there was constant communication, it could not be otherwise than that the number should be great. These boats were engaged in fishing or traffic, or in carrying travellers or parties of pleasure from shore to shore. Some writers are slow to admit that there were ships of any size on the lake, although the Greek word for ship (πλοῖον) is used in the NT, whether the Sea of Galilee or the Mediterranean is the body of water referred to. So far as this evidence goes, the boats might be as large in one case as in the other. On one occasion during the Jewish war, when a movement was planned against Tiberias, Josephus in a short time got ready two hundred and forty ships from Tarichea and its vicinity alone (*Wars*, II. xxi. 8; *Life*, 32). In this city shipbuilding was a lucrative industry. At a later period during that war many of the soldiers and citizens of Tarichea took refuge from the Romans in ships, and four thousand to six thousand of them were slain—showing that the boats, to have held such a multitude, must have been of considerable size. Josephus speaks of 'climbing up into the ships' (*Wars*, III. x. 5), which implies quite a different craft than would be meant had he said 'they stepped from the shore into their boats.' In Jn 21^{8} is found a reference to the small boat (πλοιάριον) which always accompanies, being frequently towed after, a large ship the same as now. From all that we can learn of the facts, we certainly have a right to picture the Sea of Galilee in Christ's time as dotted with white sails, just as we know that the shore was lined with cities and the whole basin full of life. Between its present state and its former prosperity the contrast is extremely painful.

The Sea of Galilee was praised by the Romans and was the pride of the Jews, but it appeals to the Christian far more strongly than it could possibly have done to them, because of its connexion with Jesus of Nazareth. It is He that has made it immortal. Everywhere about this lake we trace His footsteps, and at every point locate some act of His blessed ministry. The memories of His life linger here as nowhere else in Palestine. He made one of its beautiful cities (Capernaum) His home

(Mt 4^{13}). Here He called the fishermen Peter, Andrew, James, and John to be fishers of men (Mt 4^{18-22}), also for the same purpose Matthew was called from the receipt of custom (Mk 2^{13-17}). Here 'multitudes' came to Him 'to be healed of their diseases,' and 'he healed them all' (Lk 6^{17-19}). Out of the large number of such cases we readily recall that of the nobleman's son (Jn 4^{46-54}), the centurion's servant (Mt 8^{5-13}), the raising of Jairus' daughter (Mt 9^{18-26}), the paralytic who was let down through the uncovered roof (Mk 2^{1-12}), the demoniac in the synagogue at Capernaum (Mk 1^{21-28}), the demoniac of Gadara on the eastern shore (Lk 8^{26-40}), the blind man at Bethsaida (Mk 8^{22-26}), and the curing of Peter's wife's mother of the fever (Mt 8^{14-17}). Of another class of incidents which illustrate our Lord's character and His life in Galilee, a few may be mentioned, as His walking on the water and stilling the tempest (Mt 14^{22-36}), and His feeding of the five thousand (Mt 14^{13-21}). Still another illustrative class comes under the head of conversations, lessons, and warnings. In the leaven of the Pharisees hypocrisy was rebuked (Lk 12^{1}); in the innocence of childhood humility was inculcated (Lk 9^{46-48}); the feast with Levi showed that social courtesies are to be observed (Mk 2^{15}); that both patriotism and religion have their claims upon the individual is made clear in the paying of the tribute money (Mt 17^{24-27}); the signs in the sky as well as the sower in the field teach valuable truths (Mt 13^{1-15} and ch. 16); and it was here in Galilee that the foundation principles of the New Religion were first promulgated and the nature of the Bread of Life unfolded (Mt 5^{1-24}, Jn 6). It is to some or all of these facts that Christ Himself alludes as 'mighty works' (Mt 11^{20-24}), which would have moved the people of Tyre, or even those of Sodom, could they have witnessed them.

Of the cities about the Sea of Galilee attention should be directed to Capernaum. There was some special reason why our Lord chose this as His residence. Its importance was not wholly commercial; more than any other city of the north, one might say with truth of Palestine, with the single exception of Jerusalem, it was a centre of news. Roads led thence to Damascus and the Euphrates; to the cities of the Mediterranean coast which were in touch with Europe; to the S.W. by Gaza and thence to Egypt; to the S. along the great mountain range to Shechem, Jerusalem, and Hebron; to the Jordan Valley and the rich and populous country of Peræa. Sailors, soldiers, merchants, travellers, messengers, officers, princes, men of many classes and from many parts of the world, passed through this place on business or pleasure. The fame of some startling event, some great healer, some teacher of unusual wisdom, would be carried thence with rapidity and in every direction. While this fact serves to illustrate further the busy life of this lake shore at a single point, we cannot help feeling at the same time that it makes more significant the other fact that Christ took up here His residence. The record is very simple, 'leaving Nazareth . . . he dwelt in Capernaum' (Mt 4^{13}). Could it have been said, 'Jesus shut himself up in a cloister,' how widely different would have been the history of Christianity!

Additional Note.—It seems necessary to add the following note on the depth of the Sea of Galilee. In 1875 Lortet made soundings which corresponded in general with those already known and accepted by Palestinian scholars. He also found, as he supposed, near the north end of the lake where the Jordan enters, a hole '250 metres in depth,' which would be over 800 ft. Having crossed the lake at or near this point many times, and made soundings of his own, the present writer was certain that Lortet was wrong. The bottom of the hole would be 100 ft. lower than the surface of the Dead Sea. Moreover, had such a hole ever existed, it would very soon have been filled by mud brought down by the Upper Jordan. These facts were laid before the public. In 1890 another Frenchman, Th. Barrois, made soundings, but found nothing to corroborate Lortet's impossible figures. Soon after, Lortet admitted that he was in error. The mischief having been done, the mistake is perpetuated because people quote Lortet without being aware of the corrections. Lortet's book, *La Syrie d'Aujourd'hui*, was published in 1884 (see pp. 505, 506), and Barrois' notes may be found in the *PEFSt* for July 1894, pp. 211–220.

A. Smith, *HGHL* 439 ff.; Robinson, *BRP*² ii.; De Saulcy, *Journey round the Dead Sea*, etc. ii. 392 ff.; Buhl, *Geog.* 113, 229; Tristram, *Nat. Hist. of Bible*, 285; Reland, *Pal.* i. 239, 240; Baedeker-Socin, *Pal.*; Guérin, *Galilée*.

S. MERRILL.

GALL.—The Eng. rendering for two Heb. words. 1. מְרֵרָה *mĕrêrâh*, or מְרֹרָה *mĕrôrâh*, denotes 'bitterness,' corresponding to the Arab. *mĕrârah*. It is used in this sense (Job 13^{26}), 'thou writest bitter things against me,' *mĕrôrôth*. The expression אַשְׁכְּלֹת מְרֹרֹת 'clusters of bitternesses' (AV and RV 'clusters are bitter'), Dt 32^{32}, is a parallelism with *grapes of gall*, עִנְּבֵי־רוֹשׁ *'innĕbhê-rôsh*, *i.e.* poppy-heads (see below). This meaning led to its application to the *bile* (Job 16^{13}), and the *gall bladder*, as its receptacle (Job 20^{25}, To 6^{6} etc.). The ancients supposed that the poison of serpents lay in the gall (Pliny, *Nat. Hist.* xi. 62; Job 20^{14}).

2. רֹאשׁ or רוֹשׁ *rôsh*.—A plant characterized by its bitterness, 'a root that beareth (*rôsh*) gall and wormwood' (Dt 29^{18}), 'the wormwood and the (*rôsh*) gall' (La 3^{19}). Jer (8^{14} 9^{15}) speaks of 'water of (*rôsh*) gall.' Figuratively, one in affliction is described as 'compassed with (*rôsh*) gall and travail' (La 3^{5}). Judgment is said to spring up as *hemlock* (*rôsh*) 'in the furrows of the field' (Hos 10^{4}), and is said to be 'turned into (*rôsh*) gall' (Am 6^{12}). It is impossible to tell with certainty what plant is intended. Some have supposed the poison hemlock, *Conium maculatum*, L., but this is not a field plant. Others have supposed the colocynth, *Citrullus Colocynthis*, L. This, although it has a bitter fruit, is not a plant of ploughed ground. Others, again, have supposed the darnel, *Lolium temulentum*, L. This, however, is not bitter. The more probable view is that the poppy, *Papaver*, is intended, perhaps *P. rheas*, L., or *P. somniferum*, L., the *opium* plant. A head of this plant is called in Arab. *râs el-khishkhash*, 'head of khishkhâsh,' the word *ras* being the same as the Hebrew *rôsh*, a *head*. They are called in Eng. poppy-heads.

What was the (χολή) *gall* that was mingled with *vinegar* (Mt 27^{34}, cf. *Ev. Petr.* 5, χολὴν μετὰ ὄξους; RV 'wine,' cf. Ps 69^{21}), and the *myrrh* mingled with *wine* (Mk 15^{23} ἐσμυρνισμένον οἶνον)? Both of these evangelists add that, at a later period in the crucifixion day, a man soaked a sponge in vinegar, and put it on a reed, and gave it to Jesus to drink (Mt 27^{48}, Mk 15^{36}). Jesus evidently partook of it. John doubtless alludes to the same ($19^{29.30}$), showing how our Saviour called for it by saying 'I thirst' (v.^{28}). John adds that the sponge dipped in vinegar was 'put upon hyssop.' It is probable that the soldiers who mocked Christ by offering Him vinegar (Lk 23^{36}), did so only to aggravate His thirst, and did not give it to Him, and that this refinement of cruelty led to the *bonâ fide* offer which our Saviour accepted. How was it that He called for this draught after He had refused the one at first offered before His crucifixion? It is well known that a cup of wine with frankincense in it was given to criminals, just before their execution, to alleviate their pain. Myrrh would have properties similar to those of frankincense. It is possible that the *gall* of Mt was the same as the *myrrh* of Mk, the word *myrrh* being of the same root as the Heb. original of *gall* (Ps 69^{21}), and, like it, signifying primarily *bitter*. Mt, according to Hengstenberg, gives the word χολή, which agrees textually with the LXX of the psalm, that he may point out the prophetic character of the latter, and its fulfilment in Christ, while Mk gives the name of the substance used. This substance is said by Mt to have been given in ὄξος, which means both *sour wine* and *vinegar*, and by Mk in οἶνος, which is the ordinary word for wine. Here again, acc. to Hengstenberg, Mt aims at textual conformity with the psalmist, while Mk gives the more familiar name. Jn also notes the prophecy of thirst (19^{28}, cf. Ps 69^{21}), and its fulfilment in Christ. The motive of our Saviour, in refusing the potent anæsthetic offered before His sacrifice was complete, would seem to have been His desire to endure all that was appointed for Him, in full consciousness of the purpose in view. He only consented to moisten His parched lips and tongue at the last, not to soothe His anguish, but to gain strength enough to enable Him to cry, 'with a loud voice,' 'It is finished,' that is, 'my work is done, and the world is saved,' and then He bowed His head and gave up the ghost. G. E. POST.

GALLANT.—In Is 33^{21} as adj., and in Nah 2^{5m}, Zec 11^{2m} as subst., 'gallant' is employed to tr. the Heb. word אַדִּיר *'addîr*, which is also both an adj. and a subst. As an adj. *'addîr* signifies magnificent or majestic; and as a subst. a great one, a noble. In Is 33^{21} the adj. is applied to a ship, and it is to be observed that in the same verse the word is used of J″ (AV 'glorious,' RV 'in majesty'). In this sense of magnificent the Eng. word 'gallant' is nearly obsolete. Bunyan (*Holy War*, Clar. Press ed. p. 8) uses it of a country (as *'addîr* is applied to a nation in Ezk 32^{18}, EV 'famous'), 'Now, there is in this gallant country of Universe, a fair and delicate town, a Corporation, called Mansoul.' J. HASTINGS.

GALLERY.—**1.** AV in Ca 7^{5} reads 'The king is held in the galleries.' The Heb. is בָּרְהָטִים, which, there is no reasonable doubt, means 'in the tresses' (so RV). The king is captivated, that is to say, by the tresses of this 'prince's daughter.' רְהָטִים, prob. of Aramaic origin (Dillm., Siegfried-Stade), is found elsewhere only in Gn 30^{38} and Ex 2^{16}, in the sense of 'watering troughs.' In Ca 1^{17} the *Ḳerê* has רָהִיטֵנוּ (AVm 'galleries'), but the *Kethibh* רָחִיטֵנוּ appears preferable (AV and RV 'rafters'; Siegfried-Stade, and Baethgen in Kautzsch's *AT*, 'Getäfel,' *i.e.* 'panelling'). **2.** אַתִּיק, a word whose etymology and meaning are both obscure. It is found only in the description of Ezekiel's temple, Ezk 41$^{15.16}$ 42$^{3.5}$. In the first of these passages the *Kethibh* has אתוק; Cornill substitutes קִירוֹתֶיהָ 'its walls,' and this meaning, if not reading, appears to be demanded by the context (cf. notes of Davidson and Bertholet, *ad ll.citt.*). The tr^{n} 'colonnade' (Siegfried-Stade, *Säulengänge* (?), AVm 'walks with pillars') would suit some of the other passages. See further, under TEMPLE. J. A. SELBIE.

GALLEY occurs once in OT (Is 33^{21} AV and RV), where it is said of the (metaphorical) waters defending Jerusalem 'that no galley with oars' shall enter them. The Heb. is אֳנִי שַׁיִט, which would be more correctly tr^{d} 'no fleet [אֳנִי being a collective noun, אֳנִיָּה denoting a single ship] with oars.'

The galley of mediæval times was the successor or representative of the war-galleys (*naves longæ*) of the Romans, Greeks, and Carthaginians. (See SHIPS). It consisted of a long narrow open boat worked by oars, but carrying one or two masts with lateen sails to be used when the wind was favourable. There was a short deck at the prow for carrying the fighting men, and another at the stern for the captain, knights, and gentlemen. The largest of these vessels were called *galleasses*, and were formerly employed by the Venetians, Spaniards, and Portuguese. These last in the Spanish Armada carried each 110 soldiers and 222 galley slaves. The Venetian galleasses were about 162 ft. long above, and 133 ft. by the keel; 32 ft. wide, with 23 ft. length of sternpost. They were furnished with three masts and thirty-two banks of oars; each bank having two oars worked by six or seven slaves, generally chained to the oar. In the prow were three small batteries of cannon, together with guns on each quarter, and the complement reached 1000 or 1200 men. Along with these war-vessels of the largest size were the *half-galleys*, from 120 to 130 ft. in length, furnished with two masts and sails, to be used as required, and carrying five pieces of cannon. Of a size still smaller were the *quarter-galleys*, provided with twelve to sixteen banks of oars. Galleys were in use on the Thames down to the beginning of the century; and a common punishment for criminals in England and France was to be 'sent to the galleys' for life or for shorter periods.

The life of galley slaves in mediæval times was miserable in the extreme. They were generally chained to their benches or oars, and compelled to work by boatswains, who occupied a bridge running along the centre of the boat, and were armed with long whips, which they applied mercilessly to the bare backs of the oarsmen. Their food consisted of biscuit, with sometimes a little rice or vegetables; their drink was water often foul, but containing a little vinegar or oil. A galley slave when condemned in perpetuity was, in a civil sense, dead; he could not dispose of his effects, nor inherit; if married, his marriage was null; and his widow could not have any of her dower out of his goods, which were confiscated. Amongst the Mediterranean nations, galley slaves were generally prisoners of war. E. HULL.

GALLIM (גַּלִּים 'heaps').—A place near Jerusalem, 1 S 25^{44}. It is personified, along with Anathoth and other towns, in Is 10^{30}. It is generally placed to the N. of Jerus., but may have been to the S., at the modern *Beit Jala*, near which are remarkable stone cairns. See *SWP* vol. iii. sheet xvii.

GALLIO (Γαλλίων, Ac 18).—Son of M. Annæus Seneca, a Roman eques and rhetorician, brother of Seneca the philosopher, and uncle of Lucan the poet. He was born at Cordova, but came with his father to Rome in the reign of Tiberius. Originally called M. Annæus Novatus, he was adopted by, and took the name of, L. Junius Gallio (Dio C. lx. 35). Under Claudius he became proconsul * of Achaia, probably through the influence of Seneca, who was Nero's tutor, and also perhaps, as Renan suggests, on account of his 'haute culture hellénique.' He entered on office at Corinth during St. Paul's first visit to the city, *c.* A.D. 52–53. An attack of fever, which he attributed to the climate, led to his departure, and to a sea-voyage for his health (Sen. *Ep.* 104); eventually he returned to Rome (Dio C. lxi. *s.f.*). Seneca's high position after Nero's accession in 54 would secure for G. a continuance of court favour, and he may be the L. Junius to whom a wax tablet found at Pompeii refers as consul under that emperor. Pliny (*HN* xxxi. 33) remembered a voyage of G. 'post consulatum,' on account of blood-expectoration. When Nero constrained Seneca to kill himself (A.D. 65), G. begged for his own life (Tac. *Ann.* xv. 73), and was spared at the time; but afterwards he and his brother Mela (Lucan's father) became victims.* With apparent timidity G. united singular amiability. Seneca (who dedicates to G. his *De ira* and *De vita beata*) writes: 'Nemo mortalium uni tam dulcis est quam hic omnibus'; he eulogizes him, also, as free from vice, impervious to flattery, and one whom to love to the utmost was to love too little (*Q.N.* iv. Pr.). His reputation for wit is attested by Dio, who refers (lx. 35), about 160 years after G.'s death, to a 'jocus urbanissimus' of his† as still current.

---

* The title indicates that Achaia was a senatorial province, and illustrates the writer's accuracy; for under Tiberius and Caligula it had been imperially governed (Tac. *Ann.* 76), and under Nero it received temporary 'liberty' in 66 or 67 A.D. (Suet. *Nero*, 24). Claudius transferred the province to the Senate in 44 A.D.

Soon after G.'s arrival at Corinth, a band of Jews, provoked by the conversion of Crispus, the ruler of their synagogue, and relying, probably, on the new proconsul's complaisance, dragged St. Paul before his tribunal, clamouring for judgment against a man who 'persuaded men to worship God contrary to the (Mosaic) law.' Judaism was a 'religio licita,' and entitled to protection; but G. saw in St. Paul's alleged offence only the outcome of some internal religious disputation among the Jews, and neither a civil wrong done to the complainers (*ἀδίκημα*) nor an outrage against public morality (*ῥᾳδιούργημα πονηρόν*). He declined to hear St. Paul's defence in a case which called for no judicial intervention, and contemptuously drove the accusers from his judgment-seat. When the Greek by-standers,‡ without special interest, probably, in the apostle, but readily showing their animus against the unpopular Jews, seized and beat Sosthenes, the successor of Crispus and the ringleader presumably of the disturbance, G. refrained from interposing; the Jews, he doubtless considered, would not be the worse for being thus taught to keep their religious disputes to themselves. To this assault on Sosthenes, not to the Christian faith, the statement 'G. cared for none of these things' directly refers; but it is not likely that he interested himself further in St. Paul or his doctrine; and it is no more than possible that a report about the apostle by G. to Seneca helped afterwards to lead to a personal connexion, itself doubtful, between Seneca and St. Paul (Lightf. *Phil.* Exc. ii.). G.'s Roman justice protected, but his Roman pride would ignore, the man to whose incidental association with him his own notability is mainly due.

LITERATURE.—Add to reff. above, Hausrath, art. 'Gallio,' in Schenkel's *Bib.-Lex.* v. ii.; Farrar, *Seekers after God*, pp. 16-21; Ramsay, *St. Paul the Traveller*, pp. 257-261. On Gallio as a possible link of connexion between St. Paul and Seneca, Gelpke, *De Familiaritate P. et S.*; Aubertin, *Sénèque et St. Paul.*

H. COWAN.

GALLOWS.—See HANGING, and CRIMES AND PUNISHMENTS, vol. i. p. 525^a.

GAMAEL (A *Γαμαήλ*, B *Γάμηλος*), 1 Es 8^{29}.—In Ezr 8^2 DANIEL (which see, No. 2).

GAMALIEL (גַּמְלִיאֵל, *Γαμαλιήλ*=*Reward of God*).—**1.** The son of Pedahzur, and 'prince of the children of Manasseh' (Nu 1^{10} 2^{20} $7^{54.59}$ 10^{23}). **2.** 'A Pharisee . . . a doctor of the law, had in honour of all the people,' who intervened in the Sanhedrin on behalf of Peter and the other apostles (Ac 5^{34-39}), and the instructor of Saul of Tarsus (Ac 22^3). This Gamaliel is generally identified with the famous Rabbi Gamaliel, the grandson of Hillel the founder of the more liberal of the two schools into which the Pharisees were divided. He is known in Jewish writings as Gamaliel *ha-zāḳēn*, i.e. *the older*, to distinguish him from his grandson Gamaliel II., and from his high character and learning was the first of the seven Jewish doctors who were honoured with the title of *Rabban* (our Rabbi or Master). All that we can learn of Gamaliel proves him to have been an open-minded, liberal man, though some of the anecdotes usually cited in support of this, such as the story of the Statue and the Bath quoted by Conybeare and Howson, are now known to refer to his grandson Gamaliel II. How far, however, he was in advance of his times is shown by his studies in Greek literature, which by the narrower Rabbis was put on the same level as Egyptian thaumaturgy, and by various humane enactments. Thus he laid it down that the poor heathen should have the same rights as the poor Jews in gathering the gleanings after harvest, and that the Jews on meeting the heathen should extend to them the customary greeting, 'Peace be with you,' even on their feast days, when they were mostly engaged in worshipping their idols; while to him are also ascribed certain laws to protect wives against unprincipled husbands, and widows against unscrupulous children (see Ginsburg in *Kitto's Bibl. Cycl.*, art. 'Gamaliel'). In view of all this, it is easy to understand the attitude which Gamaliel adopted in the Sanhedrin on the occasion of the apostles' trial; although even there his conduct must be traced rather to a prudential dread of violent measures than to a spirit of systematic tolerance. There is nothing certainly to prove that he had at any time a decided leaning towards Christianity, and the traditions that he was a secret disciple (Clement, *Recogn.* i. 65), and was baptized by Peter and Paul (Phot. *Cod.* 171, p. 199), are now universally rejected. He died, as he had lived, a strict Jew; and so great was his reputation that, according to the Mishna (*Sota*, ix. 15), 'with the death of Gamaliel the reverence for the law ceased, and purity and abstinence died away.' It is right to add that Baur and the Tübingen school find it so difficult to reconcile Gamaliel's attitude in Ac 5 with the persecuting spirit afterwards shown by Saul, then his pupil, that they pronounce the whole passage unhistorical. But do pupils never in later years diverge from their teachers' doctrines? And may not special circumstances have arisen in connexion with the appearance of Stephen which called forth a fanatic zeal in Saul little in accord with his early training?

For the Jewish references to G., Ginsburg, in the art. above cited, refers specially to Frankel, *Hodegetica in Mischnam*, Lipsiæ, 1859, p. 57 ff.

G. MILLIGAN.

GAMES do not appear in the Scriptures of the Jewish people with anything like the same frequency as on the monuments and in the ancient literature of Egypt and Greece and Rome. Of public games like those of ancient Greece there is no mention in the OT, although in the Maccabæan period we read that Jason the high priest (2 Mac 4^{7-17}), in his zeal for the introduction of Greek customs, obtained the authority of Antiochus Epiphanes to set up a Greek place of exercise, and form a body of youths to be trained therein. His conduct in this is severely condemned, for it is said of him and of the priests under his influence that 'they had no more any zeal for the services of the altar, but, despising the sanctuary and neglecting the sacrifices, they hasten to enjoy that which was unlawfully provided in the palæstra, after the summons of the discus; thinking of no account the honours of their fathers, and thinking the glories of the Greeks best of all' (2 Mac $4^{14.15}$).

---

* So Dio C. lxii. 25. Jerome places G.'s death (by compulsory suicide) prior to Seneca's (*Add. to Chron. Euseb.* p. 161, ed. Scal.).

† When Claudius was poisoned by his wife Agrippina, G., alluding to the deification of emperors, and to the custom of dragging criminals by a hook to the Tiber, spoke of Claudius as 'unco in cœlum raptum.'

‡ The word 'Greeks' is not in the oldest MSS, but is probably a correct gloss. Ewald, however (*Hist. Isr.* vii. 380), refers to the Jews the assault on Sosthenes, whom he identifies with the Sosthenes of 1 Co 1, and regards as already in sympathy with St. Paul.

Of children's games there are but few traces. It is given by the prophet Zechariah as a token of the peace and prosperity that should one day bless Jerusalem, that the 'streets of the city shall be full of boys and girls playing in the streets thereof' (Zec 8^{5}). What their games might be the prophet does not say. One of the diversions of Jewish children, we know from the Talmud, was imitating the doings of their elders; and Jesus has made us familiar with children playing at marriages and funerals, 'calling one to another, and saying, We have piped unto you, and ye have not danced; we have mourned to you, and ye have not wept' (Mt 11^{17}, Lk 7^{32}). The children seem also to have amused themselves with living creatures. 'Wilt thou play with him as with a bird; or wilt thou bind him for thy maidens?' is God's remonstrance addressed to Job (Job 41^{5}), where He asks the patriarch if he could make a plaything of the crocodile, as the child does of a bird. *Dancing* was a diversion of children as well as of grown-up people (Job 21^{11}). The Talmud speaks of games in which the children played with nuts, and, taking this in connexion with the proverbial Latin expression *relinquere nuces*, we may have a reference to it in St. Paul's words, 'When I was a child, I spake as a child, I understood as a child, I thought as a child; but when I became a man, I put away childish things' (1 Co 13^{11}).

Of manly sports among the Jews the traces are likewise few. *Archery* seems to have been practised as a sport as well as cultivated for the requirements of war. The uncertainty of the rendering in 2 S 1^{18} does not allow us to use it as evidence, but Job seems to have it in mind when he complains (Job $16^{12.13}$), 'God hath set me up for his mark; his arrows compass me round about'; and we find the same image in La 3^{12} 'He hath bent his bow, and set me as a mark for the arrow.' The use of the *sling*, which played an important part in the military training of the Israelite (Jg 20^{16}, 1 S 17^{19}, 1 Ch 12^{2}, 2 Ch 26^{14}), must have demanded considerable practice, especially in the case of the left-handed Benjamites, who 'could sling stones at an hairbreadth and not miss.' A sport which was common among the youths of Palestine in the time of Jerome is described by him as consisting of raising stones of great weight to the knees, to the shoulders and the head, and above the head, according to their strength, wrestlers being matched against each other according to this test. It has been supposed by Ewald and others that 'the burdensome stone' of Zec 12^{3} is to be explained by the practice thus described by Jerome, being something like the 'putting stone' of Highland games in Scotland; but the allusion may be simply to a weight that is too heavy to be borne, and dangerous to those who meddle with it (compare Dn 2^{34}, Mt 21^{44}). The discus, as we have seen, was introduced with other Grecian exercises by Jason the high priest in the Maccabæan times (2 Mac $4^{14.15}$). It was a flat, circular slab of stone, or of wood, or of bronze, of considerable weight. A specimen in the British Museum is said to weigh about 12 pounds. The throwing of the *discus* was one of the essential exercises of the pentathlic contests. It was thrown from a low platform known as the *βαλβίς*, and the man who threw it the greatest distance was the winner. A skilful athlete, by putting all his weight into the throw, would sometimes hurl it more than a hundred feet. The attitude of the player and the manner of holding the discus is seen in Myron's celebrated statue of the *δισκοβόλος*, shown in books of Greek antiquities. Their devotion to this sport and the other exercises of the Grecian pentathlon, even to the neglect of the services of the altar, brought great unpopularity to Jason the high priest and his brethren of the priesthood, and Jason has been handed down to us as 'that ungodly man, and no high priest.'

Hunting, as a diversion, was not pursued till the days of Herod, who greatly favoured the introduction of Greek and Roman customs; and the Talmud gives strong warning against it. The *theatre*, too, was condemned as sternly by the Talmud as by Tertullian; and it was a hope of the days of Messiah that the buildings devoted by the Romans to theatrical representations would be turned into seminaries for the study of the law. Josephus (*Ant.* XV. viii. 1), speaking of the theatre and the amphitheatre built by Herod at Jerusalem, declares both of them to be in direct antagonism to the sentiment of the Jewish people.

Music and *song* fall to be treated rather in connexion with worship, but they were largely cultivated, as was also the *dance*, as a source of enjoyment. At the vintage merrymakings (Jg 9^{27} 21^{21}), at the gatherings of the young men in the city gate (La 5^{14}), at triumphal processions (Jg 11^{34}, 1 S 18^{6}), at celebrations of victory (Ex $15^{20f.}$), at the accession of kings (1 K 1^{40}), and at domestic rejoicings (Jer 31^{4}, Lk 15^{25}), music and singing, and oftentimes dancing, were called in to give expression to the gladness of such occasions.

Story-telling and *riddles* were a common diversion of the ancient Hebrews, as they are of the Arabs to this day (Jg 14^{12}, Ezk 17^{2}, 1 K 10^{1}). Feasts and wedding-parties were enlivened by such amusements. Samson's riddle (Jg 14^{12}), with his wager that the guests will not be able to answer it within a week, is a specimen of the kind of thing that was common. As to *games of chance and of skill*, the Jews seem not to have known them till they learned them from the Greeks. The soldiers who, perhaps by means of the dice, cast lots for the seamless robe of Jesus, were Roman soldiers. There was a game among the ancient Greeks (see Liddell and Scott under *κολλαβίζω*), in which one person covered his eyes and guessed which of his companions struck him; and a similar game among the ancient Egyptians (Wilkinson, ii. 59), in which a man knelt with his face to the ground and had to guess who struck him on the back. Was this the idea of the insult offered, when the men that held Jesus blindfolded Him, and struck Him on the face and blasphemously asked Him, 'Prophesy, who is it that smote thee?' (Lk 22^{64}).

In NT, especially in the Acts and in the Epistles of St. Paul, the allusions are almost exclusively to the games and athletic contests of ancient Greece. We do read in the Epistle of St. James of 'the crown of life which the Lord hath promised to them that love him' (Ja 1^{12}), but the allusion can be explained from Jewish ideas without reference to Greek games. In the Epistle to the Hebrews ($12^{1.2}$) we have the imagery of the assembly (*νέφος μαρτύρων*), of the contest (*ἀγών*), of the race (*τρέχωμεν*), of the training (*ὄγκον ἀποθέμενοι πάντα*), of the absorbed and eager racers (*ἀφορῶντες*), all most vividly set before us. It is in connexion with St. Paul, however, that these allusions are most frequent and distinct. Wherever the great apostle travelled among the cities of the Greeks, at Corinth, at Ephesus, at Athens, the athletic contests in which all the kindreds of the Grecian people took such pride met his eye, and furnished him with his aptest and most effective illustrations of the Christian life. The gymnasium or place of training, and the stadium or racecourse, were conspicuous and familiar in every considerable city.

The *foot-race* occupies the largest place in the imagery of the apostle, as it was the contest which of all the Grecian games aroused the deepest interest and the keenest excitement. In his addresses reported in the Acts of the Apostles, St. Paul alludes to the foot-race,—describing John the Baptist as 'fulfilling his course' (*δρόμος*, Ac 13^{25}), and speaking of himself as counting not even life dear unto him that he may finish his course (*δρόμος*) with joy (Ac 20^{24}). In his Epistles the image occurs again and again. In his very first Epistles he asks the prayers of the Thessalonians that the word of 'the Lord may run (*τρέχῃ*) and be glorified' (2 Th 3^{1} RV). In his last, when the crown is full in view, he writes to Timothy, saying, 'I have fought the good fight (*τὸν καλὸν ἀγῶνα*); I have finished the course' (*τὸν δρόμον*) (2 Ti $4^{7.8}$). His whole career as an apostle and as a follower of Christ, and that of his converts, is a race; he is anxious 'lest by any means he should run, or had run, in vain' (Gal 2^{2}); he hopes to rejoice 'in the day of Christ that he had not run in vain' (Ph 2^{16}); 'ye did run well,' is his remonstrance to the Galatians; 'who hath hindered you, that ye should not obey the truth?' (Gal 5^{7}).

In the Epistles to the Philippians and the Corinthians his employment of the imagery of the games reaches its highest point: 'Not as though I had already attained, either were already perfect; but this one thing I do, forgetting those things which are behind, and reaching forth (*ἐπεκτεινόμενος*) unto those things which are before, I press (*διωκῶ*) toward the mark (*σκοπόν*), for the prize (*βραβεῖον*) of the high calling (*τῆς ἄνω κλήσεως*) of God in Christ Jesus' (Ph 3^{12-14}); 'Know ye not that they which run in a race (*οἱ ἐν σταδίῳ τρέχοντες*) run all, but one obtaineth the prize? So run, that ye may obtain. And every man that striveth in the games (*πᾶς ὁ ἀγωνιζόμενος*) is temperate in all things (*ἐγκρατεύεται πάντα*). Now they do it that they may obtain a corruptible crown, but we an incorruptible (*φθαρτὸν στέφανον . . . ἄφθαρτον*). I therefore so run, as not uncertainly; so fight I (*πυκτεύω*, passing from the racer to the boxer), as not beating the air: but I buffet (*ὑπωπιάζω*) my body, and bring it into bondage (*δουλαγωγῶ*); lest by any means, after that I have preached to others (*κηρύξας*, having summoned others to the contest), I myself should be rejected (*ἀδόκιμος*, driven in disgrace from the games as not having contended in accordance with the rules)' (1 Co 9^{24-27} RV). The imagery in these passages is unusually full and rich. The strenuous, exciting, and definite purpose of the racer, the self-control imposed during the period of training, with the punishment of the body to make it more fit, the prize, the crown, the reward of the victor, the call to the contest, and the proclamation of the conditions, the chance of final disgrace if these are not properly observed (compare 2 Ti 2^{15}), are all set forth with a vividness that must have brought home powerfully and impressively, to those who were familiar with the Isthmian and Olympian games, the lessons of Christian instruction which the apostle wished to convey.

In other passages there are allusions to the onlookers (1 Co 4^{9}), to the umpire or judge (Col 3^{15} *βραβευέτω*; cf. *καταβραβευέτω* of Col 2^{18} and notes of Lightfoot and Abbott; 2 Ti 4^{8} *ὁ δίκαιος κριτής*), to the joy of victory (Ac 20^{24}). To the gladiatorial spectacles of the amphitheatre, St. Paul makes what we may take to be a figurative reference (1 Co 15^{32} *ἐθηριομάχησα ἐν Ἐφέσῳ*). At Ephesus St. Paul came in contact with the directors of the games held in the city of Diana. The Asiarchs (Ac 19^{31} *τινὲς καὶ τῶν Ἀσιαρχῶν ὄντες αὐτῷ φίλοι*) mentioned as friendly to the apostle have long been one of the puzzles of commentators, but it is now certain (see Hicks in his *Ancient Greek Inscriptions in the BM*, iii. 2, p. 81; and Ramsay, *The Church in the Roman Empire*, ch. vii., and art. ASIARCH) that those officials were the high priests of the worship offered to the Roman emperors within the province of Asia. The cities of the province joined together in an association for the worship of the emperors, and the head of the association was styled high priest and Asiarch. In this capacity he had to furnish every year funds for the celebration of the provincial games in honour of the reigning Cæsar, and it appears that as the cult of the Cæsars and the worship of Diana were in close alliance, the games in honour of both would coincide, and be held in the month Artemision—the month of May, sacred to Diana.

LITERATURE.—Löw, *Die Lebensalter in der Jüdischen Literatur*, 1875; Howson, *Metaphors of St. Paul*, ch. iv.; Percy Gardner, *New Chapters in Greek History*, ch. ix.; Kitto, Smith, Herzog, art. 'Games.' THOMAS NICOL.

GAMMADIM (גַּמָּדִים).—A term of very doubtful meaning, occurring in Ezk 27^{11} 'The Gammadim (AV -ims) were in thy towers.' No place of the name of Gammad is known, but a proper name is what the context seems to demand. Probably, Cornill's conjecture צְמָרִים (Zemarites, Gn 10^{18}) is as good as any. Lagarde (*Onom. Sacr.* ii. 95) proposes גֹּמְרִים (they of Gomer, *Cappadocians* [?]). RVm 'valorous men,' although supported by Gesenius (*Thes.* 292), has not commended itself to the majority of scholars. LXX has *φύλακες*; Symm. appears to have read וְגַם מָדִים, 'and also Medes.'

GAMUL (גָּמוּל 'weaned').—A chief of the Levites, and head of the 24th course of priests, 1 Ch 24^{17}. See GENEALOGY.

GARDEN (גַּן, properly 'enclosure'; גַּנָּה, const. גִּנַּת in Ca 6^{11}, Est 1^{5} $7^{7.8}$; *κῆπος*).—These terms appear to have been practically equivalent to the Armenian *pardes* (פַּרְדֵּס Neh 2^{8}, Ca 4^{13}, Ec 2^{5} [all]), which in Asia Minor to-day is applied equally to flower and vegetable gardens, orchards, parks, and pleasure grounds. The garden planted eastward in Eden (Gn 2^{8}) combined the features of all; and these were present in the Jewish idea of paradise, *παράδεισος* (Lk 23^{43}), which in rabbinical language was גַּן־עֵדֶן. They figure again in Mohammed's descriptions of *el-Janneh*, 'the garden,' the Moslem paradise, wherein flowing fountains, full rivers, shady trees, and abundant fruits are constantly named as attractions to 'the faithful.'

Gardens are usually enclosed by hedges, dry-stone dykes with a layer of thorns built in near the top, or by walls of compressed mud, dried in the sun, as are the celebrated gardens that encircle Damascus. The cactus, or prickly pear, is a common hedge in the warmer districts. Its multitudinous sharp spines offer a splendid defence against intruders; but it is apt soon to become a harbour for venomous things. If one break through such a fence, he need not be surprised if a serpent bite him (Ec 10^{8}). A mud-built hut, or booth of wattled twigs, is erected for the watchman within the enclosure. The *nâtûr*, or 'watchman,' is the modern representative of the נֹצֵר (Job 27^{18}). He is not the gardener, but one who guards the fruits and vegetables from pillage. The gardener is named only once directly in Scripture, *κηπουρός* (Jn 20^{15}). But gardening as a means of livelihood has always been a popular calling in the East.

Patches of land thus enclosed were cultivated by most families in ancient times. Now, in Palestine, they are found only in the environs of larger towns. In some parts of Asia Minor every house has its own garden.

Kings and men of wealth had extensive and beautiful gardens adjoining or near to their residences. ‘The king's gardens’ at Jerusalem (2 K 25^{4}, Neh 3^{15}) lay in the fat valley S.E., close by the Pool of Siloam. Recent excavation shows that the western wall of the pool may have been the parapet of ‘the stairs that go down from the city of David,’ Neh 3^{15} (*PEFSt*, Jan. 1897, p. 13; Oct. 1897, p. 264). The gate Gennath (Jos. *BJ* v. iv. 2) possibly took its name from the fact that it led to the gardens outside the city. It seems to have stood some distance E. of the Jaffa gate, where Uzziah once erected a tower of defence (2 Ch 26^{9}). With the exception of the rose gardens, which had existed from the days of the prophets (Is 35^{1}), no gardens were found in later Jerusalem, on account of the evil odour arising from decaying weeds and the manure employed. They crept up, however, close to the walls. Titus, incautiously venturing near to view the city, was surprised by the Jews, and escaped with difficulty, being entangled among the garden trenches and hedges which ran out from the walls (Jos. *BJ* v. ii. 2). *Ḳoheleth* speaks of planting great gardens and making pools for watering them (Ec 2^{5}). Tradition locates these in *Wady Artâs*, S. of Bethlehem. Three gigantic reservoirs, lying in the head of the vale, are supplied by a series of springs. From these the gardens below were watered; a supply also being carried to Jerusalem in conduits. These seem to be indicated by Josephus (*Ant.* VIII. vii. 3) when he speaks of a place Etham, about 50 furlongs from the city, with fine gardens, abounding in rivulets of water, whither Solomon used to drive in state in the early morning. The floor of the valley is still cultivated by the villagers of *Artâs*, and yields richly, but the surrounding slopes are rocky and bare. Possibly, there is a trace of the ancient delights of this neighbourhood in the name of a contiguous height, called by the Arabs *Jebel el-Fureidis*, ‘Mount of the little Paradise.’ From the Targum on Ec 2^{5} we learn that Solomon indulged his splendid tastes by cultivating in these gardens foreign trees and plants, ‘which the goblins and demons brought out of India.’ But the Targumist seems to identify these with ‘the king's gardens’ mentioned above. ‘The boundary,’ he says, ‘was from the wall that is in Jerusalem, by the bank of the waters of Siloam.’ The growing of exotics is paralleled by the monks of Sinai, but for a different reason. They are Greeks, not Arabs. And so, as Dean Stanley says (*Sinai and Palestine*, p. 52), one ‘sees in the gardens the produce, not of the desert or of Egypt, but of the isles of Greece; not the tamarisk, or the palm, or the acacia, but the olive, the almond tree, the apple tree, the poplar, and the cypress of Attica and Corcyra.’

Ahasuerus is said to have entertained all the notables of his empire with many and varied splendours, for seven days, in the garden attached to his palace (Est 1$^{1-8}$). For the pleasure of his queen, the king of Babylon constructed the renowned ‘hanging gardens,’ the κρεμαστὸς παράδεισος of Berosus (quoted by Jos. *c. Ap.* i. 19). Joakim, a rich Jew of the Captivity, ‘had a fair garden joining unto his house’ (Sus ^{4}), in the seclusion of which were all conveniences for bathing (v.^{15}). Of gardens on this princely scale there is an excellent illustration in *el-Bahjeh*, the palace built for himself by Abdullah Pasha near Acre. It is surrounded by a great extent of ground, beautifully laid out, wherein are reservoirs of water, and multitudinous conduits to all parts of the enclosure. Flowers of every hue brighten the soil; fruit trees vie with each other in season, offering their tempting burdens; the homelier vegetables also have their place. The pleasant pathways, and retired and shady nooks, under embowering greenery, make a very paradise amid the exposed plain.

Egypt was compared to ‘a garden of herbs,’ watered ‘with the foot’; Palestine was a land ‘which drinketh water of the rain of heaven’ (Dt 11^{11}). Gardens could be made in Egypt wherever water could be led from the river. The ground was divided into compartments by little banks of earth, along which ran the water channels. One side of the bank was broken down with the foot, allowing the water to flow into the division: the breach repaired with the foot, the stream was led into the next division, and so on until all were refreshed. This process may be seen to-day. In Palestine, for the most part, the presence of a spring, or a capacious cistern, was essential to the existence of a garden. In the Jordan Valley the river afforded abundant streams, which, carrying beauty and fertility with them, made the plain as ‘the garden of the LORD’ (Gn 13^{10}). But such gardens as those of Hebron, Nablûs, and Jenîn—wherein we have a reminiscence of old *En-gannim* (Ca 4^{15})—are created by the springs that gurgle up from under the mountains. The luxuriant groves around Jaffa depend upon deep wells, whence the water is raised by a chain of buckets revolving on a wheel, turned usually by a span of mules. The wheels are of rude construction, the pinions often being formed of broken branches, and the creaking they make is not charming. The water is stored in a large tank, connected with the gardens by a network of cemented channels. Towards evening the outflow is opened, and throughout the orchards is heard the musical ripple of running water, and light figures dart among the trees, guiding the streams whither they will. This familiar scene is reflected in the proverb, ‘the king's heart is in the hand of the LORD as the watercourses. He turneth it whithersoever he will’ (Pr 21^{1}). Wisdom in her beneficent power is compared to a ‘stream from a river,’ and ‘a conduit into a garden’ (Sir 24^{30}). Gardens, with plentiful supplies of water, were to the Oriental suggestive symbols of prosperity. Balaam likens the spreading tents of Israel to ‘gardens by the river side’ (Nu 24^{6}). The house of Jacob restored to favour shall be ‘like a watered garden’ (Is 58^{11}, Jer 31^{12}). By foul idolatries the sap of manhood is dried up, and men become ‘as a garden that hath no water’ (Is 1^{30}).

Cucumbers, melons, leeks, onions, and garlic, so common in Egypt (Nu 11^{5}), and probably also lettuce and endive, were grown in Palestine, together with such plants as coriander (Ex 16^{31}, Nu 11^{7}), caper (Ec 12^{5} RV), camphire or henna (Ca 1^{14}), cummin (Is 28$^{25.27}$, Mt 23^{23}), mustard (Mt 13$^{31.32}$), anise (Mt 23^{23}), and rue (Lk 11^{42}). Vines clung to almost every hillside. In olden times the mulberry, olive, fig, pomegranate, almond, and walnut (Ca 6^{11}) were well known. The *tappûaḥ* (Ca 2$^{3.5}$ 7^{8}) was probably the apricot. To these the Mishna adds the quince, the citron, the medlar, and the service (*Chilaim*, i. 4). To-day the orange, lemon, and peach grow luxuriantly in the groves, *e.g.* at Jaffa, Sidon, and Damascus. The banana flourishes at Sidon; while apples and pears are cultivated with moderate success. The egg plant, the tomato, and the potato, together with the homely cabbage, are found in almost every garden. See further under FOOD.

The gardens, with their shady foliage, have always been a favourite retreat for the people during the hotter seasons. It was reckoned a token of public peace and security, when a man could sit without fear under his vine and fig tree, the two often growing together (Mic 4^{4}, Zec 3^{10}). Many family meals are eaten under the shelter of spreading fig and mulberry. In the cool of the day companies assemble in the gardens; as darkness falls, the light of a lamp swung on a bough twinkles through the greenery; and sounds of laughter and song, accompanied by the twanging of the *'oud*, or the shrill voice of the pipe, are borne far upon the quiet air. When the fruits are ripening, and until they are safely gathered, many make their beds under the fruit trees.

The secluded recesses among clustering trees and bushes made the gardens a popular resort for purposes of devotion. They were often the haunts of idolatrous worship (Is 1^{29} 65^{3} 66^{17}). Baruch (6^{70}) compares the idols, 'gods of wood,' set up in the gardens, with the 'scarecrow,' *προβασκάνιον*, 'in a garden,' which 'keepeth nothing.' An abiding charm clings to the slopes of Olivet, because Jesus 'ofttimes resorted . . . with his disciples' to a garden there (Jn 18^{2}, Lk 22^{39}), where linger the deathless memories of GETHSEMANE. The Moslem who spreads his little carpet, and solemnly prays to Allah under the shade of the trees he tends, is true heir to the ancient tradition of the Orient.

The garden sometimes contained the family tomb or burial-cave. In the garden of Uzza both Manasseh and his son Amon found sepulture (2 K 21^{18} 21^{26}). Nor can we forget that in the place where Jesus 'was crucified there was a garden, and in the garden a new tomb, wherein was never man yet laid. There . . . they laid Jesus' (Jn $19^{41.42}$) W. EWING.

GAREB (גָּרֵב).—One of David's 'Thirty' (2 S 23^{38}, 1 Ch 11^{40}). Like Ira, in the same verse, he is described as an Ithrite (הַיִּתְרִי), *i.e.* a member of one of the families of Kiriath-jearim (1 Ch 2^{53}). In notices of this kind, however, it is more usual to give the name of the locality to which the warrior belonged, and we should probably read with Wellh., in both cases, 'of Yattir' (הַיַּתִּרִי), a town in the hill-country of Judah (Jos 15^{48} 21^{14}, cf. 1 S 30^{27}). See IRA. J. F. STENNING.

GAREB (גָּרֵב).—A hill near Jerusalem, Jer 31^{39}. Its situation is uncertain, being located by some, *e.g.* Riehm and Graf, to the S.W., while others place it to the N. of the capital. At the present day there is a *Wady Gourab* to the W. of Jerusalem. (See Neubauer, *Géog. du Talmud*, p. 150).

GARLAND.—See CROWN.

GARLIC (שׁוּם *shûm*, *τὰ σκόρδα*, *allia*).—The bulblets of *Allium sativum*, L., still known in Arabic by the cognate *thûm*. It is now, as in the days of the ancient Egyptians (Nu 11^{5}), a favourite addition to the complex stews and the roasts of the Orientals. It is cultivated everywhere in the East. Too often the natives reek with its stale, penetrating odour. G. E. POST.

GARMENT.—See DRESS.

GARMITE (הַגַּרְמִי).—A gentilic name applied in a totally obscure sense to Keilah in 1 Ch 4^{19}. The text in the LXX is hopelessly confused (cf. Swete's ed., and see Kittel's note in Haupt's *Sacred Bks. of OT*).

GARNER.—Garner, which is now archaic if not obsolete, and granary, the form now in use, both come from Lat. *granaria*, a storehouse for grain (itself from *granum*, a grain, corn), the former through the Fr. *gernier*, a variant of *grenier*, the latter directly. Garner occurs in plu. Ps 144^{13} (מְזָוִים, the only occurrence); Jl 1^{17} (אוֹצָרוֹת, a common word, used both of stores of any kind and of storehouses for any purpose; the Eng. word 'garner' is narrower in meaning); and Sir 1^{17} (*τὰ ἀποδοχεῖα* [B^{ab}א, *-ια* B^{*c}]; a word peculiar to Sir, where it occurs also 39^{17} EV 'receptacles,' Cowley and Neubauer 'treasure'; and 50^{3} EV 'cistern': it is also of wider use than 'garner,' being applied in the last two cases to receptacles for water). In NT 'garner' is used in the sing., Mt 3^{12}=Lk 3^{17} (*ἀποθήκη*, elsewhere in NT tr^{d} 'barn,' Mt 6^{26} 13^{30}, Lk $12^{18.24}$). Chaucer (*Prol. to Cant. Tales*, 592) says of the Reve, 'Wel coude he kepe a gerner and a binne'; and T. Adams, *Works*, i. 87, says, 'The Lord sends grain, and the devil sends garners.'

RV retains the subst. in all those occurrences, and introduces the verb, Is 62^{9} 'They that have garnered it shall eat it' (מְאַסְפָיו; AV 'gathered,' which RV uses for the verb מְקַבְּצָיו, which occurs in the same verse). J. HASTINGS.

GARRISON.—See WAR.

GAS (Γάς, AV Gar), 1 Es 5^{34}.—His sons were among the 'temple servants.' The last nine names in this list, of whom Gas is one, have no corresponding names in the lists of Ezra and Nehemiah. The AV form is derived from the Aldine text.

GASHMU (גַּשְׁמוּ, Γόσεμ, Neh 6^{6}).—A form of the name GESHEM (which see), probably representing the pronunciation of N. Arabian dialect. Proper names with the termination *u* (ו) are found in Nabatæan inscriptions. The words 'and Gashmu saith' do not occur in the older MSS of LXX (ABא*). H. A. WHITE.

GATAM (גַּעְתָּם).—The son of Eliphaz (Gn 36^{11}= 1 Ch 1^{36}), and 'duke' of an Edomite clan (Gn 36^{16}) which has not been identified.

GATE.—1. שַׁעַר, root שׁער 'cleave,' 'divide' (?); *a gate or entrance of a camp* (Ex 32^{26}), *city* (Jos 20^{4}), *palace* (Est 2^{19}), *or temple* (2 Ch 23^{20}); *πύλη*, *porta*. 2. תְּרַע Aram., only in Daniel. *A gate or mouth as of a furnace* (3^{26}). Gate of the King or Royal Court (2^{49}). Corresponding terms in Arabic and Turkish are used of the califs and Turkish emperors, and of the Persian court (Gesen.); cf. *θύρα*, *fores*. תָּרָע 'porter,' 'doorkeeper' (of the Temple), occurs in Ezr 7^{24}. The usual Heb. term is שׁוֹעֵר. 3. פֶּתַח, root פתח 'open.' *The entrance of the gate of a city* (Jos 20^{4}, Jg 9^{35}). 4. דֶּלֶת, root דָּלָה 'hang down'; *the leaf of a door*, dual, *folding doors* such as the gates of a city; *κλισίας*, *valva*. For **Doorway** and **Door**, and distinction between דֶּלֶת and שַׁעַר, see HOUSE.

City gateways among the Greeks and Romans in later days appear to have been principally used for making secure the city, but in early times among the Greeks and at all times in Syria they have been used for many public purposes, and were important positions in the economy of the state. Jerome says that as the Hebrews were for the most part employed in labouring in the field, it was wisely provided that assemblies should be held at the city gates, and justice administered there in a summary manner, that those labouring men who were busy at their work might lose no time, and that the country people might not be obliged to enter and spend their time there (Cruden, *Conc. s.* 'Gate').

The gate of the city in the early dawn of civilization was the ordinary place of public resort for the transaction of business and administration of justice, and for discussing the news, just as the doorway of the house was the place where private business was despatched and friendly greetings exchanged. It was also the place of the markets, where goods were exposed for sale.

Gesenius gives the foll. explanation (*s.v.* שַׁעַר). 'At the gates of cities there was the *forum* (רְחֹב), where trials were held, and the citizens assembled, some of them for business and some to sit at leisure to look on and converse (Gn 19^{1}, Ru 4^{11}, Pr 31^{23}, La 1^{4}); whence "in the gate," often for "in the forum," "in judgment," Dt 25^{7}, Job 5^{4} 31^{21}, Ps 127^{5}, Pr 22^{22}, Is 29^{21}, Am $5^{10.\,12.\,18}$.' Cf. further Driver on Am 5^{10}. The word רְחֹב is rendered by Gesenius —(1) *a street*, (2) *open place, forum, i.e.* an ample space at the gate of Oriental cities where trials were held, and wares set forth for sale, 2 Ch 32^{6}; cf. Neh $8^{1.\,3.\,16}$, Ezr 10^{9}. In RV '*broad place*' has been substituted in several instances for 'street'; the tr^{n} proposed in *QPB* is '*public place*.'

In the earliest days the city gate is mentioned as the place of public resort, where people met for business and to discuss news. Gn 19^{1} 'And Lot sat in the gate of Sodom'; Gn 23^{10} 'Ephron the Hittite answered Abraham in the audience of the children of Heth at the gate of his city'; Gn 34^{20} 'And Hamor and Shechem his son came unto the gate of their city, and communed with the men of their city'; 1 S 4^{13} 'Eli sat upon his seat by the side of the gate watching the way'; 2 S $15^{2.\,6}$ 'Absalom stole the hearts of the men of Israel at the gate of the city'; Neh 8^{1} 'Ezra the scribe read the law to the people gathered together into the broad place (*forum*) before the water gate.'

The gate was also used for administration of justice, deliberation, and audience for kings, etc. Dt 21^{19} the stubborn and rebellious son is to be brought before the elders of the city at the gate; Dt 25^{7} if the man does not like to take his brother's wife, she shall go up to the gate unto the elders; Jos 20^{4} the manslayer shall declare his cause before the elders of the city of refuge at the entering in of the gate; Ru 4^{1} Boaz consulted the elders at the gate concerning Ruth's property; 2 S 19^{8} king David sat in the gate, and the people came before him; 1 K 22^{10} the kings of Israel and Judah sat in an open place at the entrance of the gate of Samaria, and all the prophets prophesied before them; Jer 38^{7} king Zedekiah sat in the gate of Benjamin; La 5^{14} 'The elders have ceased from the gate'; Am 5^{12} 'Ye that afflict the just, that take a bribe, and that turn aside the needy in the gate from their right'; Zec 8^{16} 'Judge truth and the judgment of peace in your gates'; Ps 69^{12} 'They that sit in the gate speak against me.'

Until the battering-ram was perfected with its machinery, so as to be serviceable against heavy stone walls, the gate was the only point in a well-built city wall where a successful assault could be made, and there is constant reference in the Bible to 'war in the gates' (Jg 5^{8}), and to them that turn the battle to the gate (Is 28^{6}), and shall speak with the enemies in the gate (Ps 127^{5}, where, however, the enemies are perhaps only forensic).

In the account of the assault on Abel-beth-maacah in the time of David, EV says that the people that were with Joab 'battered the wall to throw it down' (2 S 20^{15}); but the meaning of the Hebrew מַשְׁחִיתִם לְהַפִּיל הַחוֹמָה is doubtful. See Driver, *Text of Sam.* 265. Mention is made in Deuteronomy ($20^{19f.}$) of building bulwarks (מָצוֹר, lit. 'siege,' *i.e.* siegeworks) against a city in war; yet, even as late as the final taking of Jerusalem by the Assyrians (B.C. 588), the battering-ram was used against the gates (Ezk 21^{22}), though Ezekiel (4^{2}) also appears to speak of the ram being used round about, against the walls. Among the Macedonians the ram first became an important military engine in the time of Philip and Alexander the Great (cf. Thuc. ii. 76).

At the siege of Rabbah (*c.* B.C. 1000) the garrison made a sortie, and the army of Israel was 'upon them even unto the entering of the gate' (2 S 11^{23}). In the attack on the strong tower within the city of Thebez (*c.* B.C. 1170), Abimelech went hard unto the door of the tower to burn it with fire (Jg 9^{52}). Nehemiah (B.C. 444) also speaks of the city gates being burnt with fire (Neh 1^{3} $2^{3.\,13.\,17}$); and Jeremiah prophesies that the high gates of Babylon shall be burned with fire (Jer 51^{58}). The breaking of gates of brass and cutting in sunder the bars of iron is spoken of (Ps 107^{16}, Is 45^{2}).

City gateways, in order to be secure against these various forms of attack, required flanking towers (2 Ch 14^{7} 26^{9} 32^{5}, Ps 48^{12}, Ca 8^{10}, Ezk 26^{4}) to protect the entrance, and galleries above (2 S $18^{24.\,33}$), from which the defenders could throw boiling pitch and oil upon the assailants: there were probably two sets of gates, one to each entrance, with a courtyard or barbican between. 'And David sat between the two gates, and the watchman went up to the roof of the gate unto the wall' (2 S 18^{24}). There was a chamber over the gate (2 S 18^{33}). Possibly, at the outer entrance there was a portcullis or *cataracta*, which is described by Vegetius as an *ancient* contrivance; and it has been suggested ('Cataracta,' in Smith's *Dic. Gr. and Rom. Antiquities*) that it is alluded to in the passage, 'Lift up your heads, O ye gates; and be ye lift up, ye everlasting doors' (Ps $24^{7.\,9}$; cf. Jer 20^{2} 51^{58}).

Rooms would be required for the guard of the gate, for the porters, and for the watchmen, and the entrance gateway would require to be of considerable dimensions, where the people of the city could readily congregate. Being of so great importance from a defensive point of view, the chief officer of the city would naturally take great interest in its secure condition; and being on the high road from the country the traders would bring their wares there, and would be detained there before entry for examination and toll. Thus the vicinity of the gate would naturally become the public place of resort for business and pleasure, where also justice could be administered and punishment meted out.

As civilization and luxury increased, the gateways seem to have been less used among the Greeks and Romans, the Agora or Basilica, or forum and portico, being placed near the royal palace, or, in a seaport town, near the harbour; and the markets were divided up according to the articles sold there (Polyb. ix. 47, x. 19). Some articles, such as salt fish, seem to have been sold outside the gates (Aristoph. *Equit.* 1246). But even in late days among the Greeks and Romans the gates were surmounted by towers (Virg. *Aen.* vi. 552), and Polybius (xv. 29) calls a building at Alexandria 'the gatehouse at the palace used for the transaction of public business.' The entrances to military camps (*castra*) were, when necessity arose, defended by towers (Cæsar, *B. G.* viii. 9). The gateway at Treves, so late as the time of the emperor Constantine, was built in such a style as shows that it was intended to be used during peace for the object of civil government.

In Syria the vicinity of the gate has always been the focus of business transactions, but as Greek and Roman influences prevailed, no doubt the gate did not occupy, for a time, so important a position in the social life of the people; and markets were constructed in various parts of the city apart from the gates. In the latter days of Jerusalem the upper city is called by Josephus (*Wars*, V. iv. 1) the Agora or market place; the sheep market was on the north side of the temple, near the pool of Bethesda (Jn 5^{2}); and a place is mentioned outside the second wall where were the merchants of wool, the braziers, and the market of cloth (Jos. *Wars*, V. viii. 1). In early days, however, the markets were probably close to the gates, 'To-morrow about this time shall a measure of fine flour be sold for a shekel, and two measures of barley for a shekel, in the gate of Samaria (2 K 7^{1}; cf. Neh $13^{16.\ 19}$).

In the Assyrian cities the gateways were either arched or had flat stone lintels, with flanking towers and overhead galleries, as at Khorsabad (Layard, *Nineveh*, ii. 388, 395, and bas-relief in British Museum, 'Assyria,' 25, 26, 49). Herodotus (i. 179) and Ctesias state that the walls of Babylon were furnished with 100 brazen gates, with lintels and sideposts of the same material, and with 250 towers to protect the weaker parts. Jeremiah ($51^{53.\ 58}$) speaks of burning these gates. In Nebuchadrezzar's account of Babylon, stamped on the bricks, the great gates are described as made of cedarwood covered with copper, with thresholds of bronze.

In the later Egyptian temples the gates appear to have been fortified (Wilkinson, *Anc. Egyp.* i. 409). At Pompeii may be seen a gateway protected by a portcullis, with a barbican, within which again were gates of wood and iron.

Besides the open space or forum at the entrance of the city gate, there was evidently an open place of assembly near the entrance to the temple and before the gate of the royal palace. At Jerusalem there was the broad place before the water gate, which appears to have been on the south side of the outer court of the temple (Neh $8^{1ff.}$). At Shushan, Mordecai went to the broad place of the city before the king's gate; and queen Esther made her petition to king Ahasuerus at the king's gate (Est 4^{6} 5^{2}; cf. Herod. iii. 120, 140). Daniel sat in the gate of the king (Dn 2^{49}). It is not improbable that in Est and Dn 'gate' is used by metonymy for 'palace' or 'king's court.' Cf. the modern 'Sublime Porte.'

The gates were closed and guarded by night. Jos $2^{5.7}$ 'About the time of the shutting of the gate, when it was dark'; Neh 7^{3} 'Let not the gates of Jerusalem be opened till the sun be hot: and while they stand on guard let them shut the doors, and bar ye them'; Is 60^{11} 'Thy gates also shall be open continually, they shall not be shut day nor night'; Rev 21^{25} 'And the gates thereof shall in no wise be shut by day (for there is no night there)'; Neh 13^{19} 'When the gates of Jerusalem began to be dark before the sabbath, I commanded that the doors should be shut.' The gateways of palaces and temples were highly ornamented—those of Nimroud (B.C. 884), Persepolis, and Khorsabad (Fergusson, *Archit.* pp. 154, 160, 174) were flanked by colossal figures of animals, winged bulls at Nimroud and Khorsabad. The doors of city gates were usually plated with iron or copper, to prevent their being easily burnt or broken (Ps 107^{16}, Is 45^{2}). In the temple of Solomon (1 K 6^{31}) the doors leading to the Holy of Holies were of olive wood, with carvings of cherubim and palm trees, and overlaid with gold. The doors to the temple were of cypress wood, carved in like manner, and overlaid with gold, with doorposts of olive wood (1 K $6^{34f.}$, 2 K 18^{16}, Ezk $41^{23f.}$). Josephus (*Wars*, V. v. 3) speaks of nine of the gates of the temple courts being covered with gold and silver, while the east gate of the inner court (the Beautiful Gate of Ac 3^{2}) was of Corinthian brass, and greatly excelled the others. These gates were 30 cubits high and 15 broad, while the doors of the east gate were 40 cubits high and required 20 men to close them, and had bolts fastened deeply into the solid stone threshold (Jos. *Wars*, V. v. 3, VI. v. 3).

The bars, bolts, locks, etc., of doors of gateways were the same as those used for doors of houses, but larger in proportion (see HOUSE).

In some cities of Syria the doors were made of massive pieces of stone. Buckingham (*Arab Tribes*, p. 221) describes ponderous doors of stone in the *Hauran*, 15 in. thick, closed on the inside with bars. Burckhardt (*Syria*, p. 90) mentions doors of the city gate at *Kuffir*, 10 ft. high, of single pieces of stone; he also mentions doors at *Ezra*, of one piece, 4 in. thick, some upwards of 9 ft. in height, turning upon hinges worked out of the stone.

Maundrell (*Early Travels*, p. 447, A.D. 1697) mentions large stone doors to tombs at Jerusalem, 6 in. thick, turning on hinges of the same piece with the door. Schumacher (*Northern Ajlûn*, p. 71) gives a sketch of a basalt door to a tomb at *Umm Ḳeis* (Gadara), 4 ft. high, 7 in. thick, with stone hinges, and a lock and bolt which can be pushed home and withdrawn from the outside. Gates of single precious stones are mentioned poetically (Is 54^{12}, Rev 21^{21}).

At the present day the people of the East have reverted to their primitive customs regarding the uses of the gate, and many business and social duties are carried out there. Thomson (*Land and the Book*, i. p. 31) mentions having seen at Jaffa the *Ḳâḍi* and his court sitting at the entrance of the gate, hearing and adjudicating all sorts of cases in the audience of all that went in and out thereat. At Suakin in 1886 the present writer found it necessary to sit at the gate to transact official business in order that the public might freely approach and relate their grievances. Bertrandon de la Broquère (*Early Travels*, p. 349, A.D. 1433) gives an interesting account of his reception at the court of the Turks, the 'Sublime Porte,' at Constantinople. The ambassadors were received at the gate of the palace, and all business was transacted there. Chardin relates (vii. 368) that the principal gate of the royal palace of Ispahan was held sacred, and used by criminals as a place of refuge. The present writer conducted all his business transactions with the governors of Al-Arish, Nukl, and Akabah in 1882 at the gate, where there were arched roofs giving protection from the sun and rain, and seats for the administration of justice. At Nukl the council chamber was immediately over the gate. The city gateways of the present day have usually flanking towers and overhead galleries, with an arched passage within, so that a second set of gates may be erected inside the barbican or courtyard. 'Frequently in the gates of cities, as at Mosul, these recesses are used as shops for the sale of wheat and barley, bread and grocery' (Layard, *Nineveh and Babylon*, p. 57 note). Morier (*Second Journey through Persia*, p. 189) speaks of the market for mules, asses, and camels held every morning outside the gate of Teheran, and also states that temporary shops and tents of sellers of all sorts of goods were erected there. Denham and Clapperton (*Discoveries in Africa*, i. 216, 217) speak of the markets for slaves, sheep and cattle, wheat, rice, etc., outside one of the principal gates of a town. At Jerusalem there is an extensive temporary market outside the Jaffa gate on a Sunday morning, and here also is the principal place of public execution.

The gate of a city is necessarily the place for the collector of local customs to sit to receive the moneys due for commodities entering the city (Mt 9^{9}).

These gateways are often very highly ornamented, sentences from the Korân being inscribed on the doorways and on the doors (cf. Dt 6^{9}, Is 54^{12}, Rev 21^{21}). Maundrell (*Early Travels*, p. 488, A.D. 1697), speaking of Damascus, says, 'In these walls you find the gates and doors adorned with marble portals, carved and inlaid with great beauty and variety.' The city gates of the present day are usually two-leaved, of wood studded with iron nails, and often covered with iron or copper plates. As in olden times, the gates of walled cities, such as Jerusalem, Damascus, Cairo, etc., are closed at night (Robinson, *BRP* iii. 455; Lane, *Mod. Egyp.* i. 25).

Burying places were outside the gate (Lk 7^{12}); so was the προσευχή at Philippi (Ac 16^{13}); Jesus suffered 'without the gate,' He 13^{12} (cf. Lv 24^{14}, Nu 15^{36}, 1 K 21$^{10.\ 13}$ etc.).

The word 'gate' is used, in a figurative sense, in a variety of ways. It is used, esp. in Dt, to denote the city itself, 'And thy seed shall possess the gate of his enemy' (Gn 22^{17} 24^{60}, Dt 12^{12}). We read also of the gate of heaven (Gn 28^{17}); the gate of the Lord (Ps 118^{20}); the gates of death (Ps 9^{13}); the gates of the grave (Is 38^{10}); the gates of Hades (Mt 16^{18}). The gate from its importance and defensive strength becomes the synonym for strength, power, and dominion. 'Thou shalt call thy walls Salvation, and thy gates Praise' (Is 60^{18}); 'The Lord loveth the gates of Zion' (Ps 87^{2}); 'Lift up your heads, O ye gates' (Ps 24^{7}); in time of calamity the gates howl and languish, lament and mourn (Is 14^{31} 3^{26}, Jer 14^{2}). By metonymy 'the gates' meant those who administered justice at the gates and held government (Hom. *Il.* ix. 312; cf. Mt 16^{18}).

To keep and watch over the temple, city, and palace gates were porters (doorkeepers) and watchmen (שׁוֹעֵר, θυρωρός, πυλωρός, *portarius*, *janitor*). In the temple of Jerusalem the duties of keeping the gates ultimately devolved upon the Levites (1 Ch 9$^{18f.}$ 15$^{23f.}$, 2 Ch 31^{14}, Jer 35^{4}). In the time of the Chronicler 4000 of the Levites were porters (doorkeepers) about the temple (1 Ch 23^{5}), and the porters waited at every gate (2 Ch 35^{15}). The location of the porters at the gates is given in 1 Ch 26.

In the palace of Shushan (Est 2^{21} 6^{2}) the king's chamberlains kept the door. In the time of our Lord it is mentioned that a maid kept the door of the court of the high priest at Jerus. (Jn 18^{16}, cf. Ac 12^{13}). There were also porters and watchmen to the city gates. David sat between the two gates at Mahanaim, and the watchman went up over the gate and called unto the porter (2 S 18^{26}). The lepers called to the porters of the city of Samaria (2 K 7^{10}). Nehemiah on rebuilding the walls of Jerusalem speaks of appointing the porters, and appointing watches of the inhabitants (Neh 7$^{2f.}$); he also set his servants over the gates when they were shut on the Sabbath (Neh 13^{19}). There were also guards to the gates (2 K 11^{6}) and guard chambers (1 K 14^{28}). Keepers of prison doors are spoken of (Ac 5^{23} 12^{6}).

The porter or doorkeeper (θυρωρός) of a fold is spoken of as opening to the shepherd (Jn 10^{3}). In private houses there were doorkeepers to watch the entrance (Mk 13^{34}). In Greek and Roman houses there was a small room (θυρών, *cella*) for the porter and also for his dog, which was usually kept in the hall to guard the house (Aristot. *Oecon.* i. 6; Plato, *Protag.* p. 314; Aristoph. *Equit.* 1025; Tibull. i. l. 56). C. WARREN.

GATH (גַּת 'wine-press'; LXX Γέθ; Jos. Γίττα; Vulg. *Geth*), one of the five royal cities of the Philistines (Jos 13^{3}, 1 S 6^{17}), the site of which is still uncertain, though its position can be located, within a radius of a few miles, from the various references to it in Scripture. The preponderance of opinion is in favour of its identity with the village of *Tell es-Sâfi*, the Blanchegarde of the Crusaders; while some authorities give reasons for identifying it with the village of *Beit Jibrîn*, which is also identified as Eleutheropolis. These two sites are about 8 miles apart, within that portion of the Shephelah or undulating country which was allotted to the tribe of Judah, and is recognized as being within the border of the Philistines. According to Josephus, however (*Ant.* V. i. 22), Gath was in the territory of Dan, and is coupled with Jamnia as though in its vicinity on the southern border of the territory.

Gath is not mentioned in Jos as having been allotted to either the tribe of Judah or Dan, but all the references to it indicate that it was close to the border separating these two tribes: in common with Ashdod and Gaza, it remained in possession of the Anakim after Joshua had destroyed them out of all the other cities of Palestine (Jos 11^{22}).

Gath was a fenced city of considerable importance, and was constantly the scene of struggles between the Philistines and Israelites, and was taken and retaken by either side (1 S 7^{14} 17$^{4.\ 52}$, 2 S 21^{20}, 2 K 12^{17}, 1 Ch 7^{21} 8^{13} 18^{1} 20^{6}, 2 Ch 11^{8} 26^{6}).

The journey of the ark of God from Ashdod to Gath (1 S 5), and thence by Ekron to Beth-shemesh and Kiriath-jearim, indicates the site of Gath to have been near the boundary-line between Dan and Judah. The account of the flight of the Philistines on the death of Goliath, 'by the way to Shaaraim, even unto Gath and unto Ekron' (1 S 17^{52}), gives the same indication.

Gath remained a stronghold of the Philistines during the reigns of Saul and David, and the latter twice (but see DAVID, i. 564^{a}) took refuge there: first, when he fled from Saul at Gibeah (1 S 21^{10}) he went to Achish the king of Gath, and being discovered, feigned himself mad in their hands; secondly, when he again fled from Saul at the head of 600 men, he dwelt with Achish at Gath, and formed a friendship with him (1 S 27^{5}) and with the Gittites, 600 of whom came after him from Gath when he reigned in Jerusalem, and accompanied him under Ittai the Gittite on his flight from Jerusalem over Jordan (2 S 15$^{18ff.}$), when his son Absalom conspired and stole the hearts of the men of Israel.

Rehoboam fortified Gath (2 Ch 11^{8}), but it seems to have fallen again into the hands of the Philistines, as Uzziah 'brake down the wall of Gath' (2 Ch 26^{6}) when he went forth and warred against the Philistines. Amos about this time speaks of 'Gath of the Philistines' (Am 6^{2}; see Driver's note). The last reference to Gath as an existing (?) city is in the Bk. of Micah (1^{10}), in the days of Hezekiah king of Judah, 'Declare ye it not at Gath.' Both Ashdod and Ekron are referred to in the times of Josiah (Zeph 2^{4}) and after the Exile (Zec 9^{5}), but Gath has disappeared from history. It may have been destroyed when Hezekiah smote the Philistines even unto Gaza (2 K 18^{8}), or when Sennacherib 'came up against all the fenced cities of Judah and took them' (2 K 18^{13}), as it plays no further part in history.

Little is learned concerning the site of Gath by reference to Eusebius and Jerome. Gath is stated to have been 5 Roman miles north of Eleutheropolis towards Diospolis (Lydda), while Gath-rimmon, a Levitical city in the tribe of Dan, is stated as about 12 miles from Diospolis towards Eleutheropolis: this would in each case indicate a site close to *Tell es-Sâfi*, which is situated within the boundary of the tribe of Judah, and is nowhere near the site which Gath-rimmon is supposed to have occupied in Dan, not far from Joppa and Lydda. It may, then, be assumed that both these references are to the royal Gath of the Philistines and not to Gath-rimmon (*Onomast. s.* 'Gath'). Jerome in another work (*Comm. in Mic* 1^{11}) states that Gath, one of the five cities of the Philistines, was situated near the borders of Judah on the way from Eleutheropolis to Gaza, and was then a very large village. There is obviously a mistake in the word 'Gaza,' as the way indicated does not go near the borders of Judah. Eusebius further mentions the Gath to which the ark was taken from Ashdod on the way to Ekron as lying between Antipatris (*Ras el-'Ain*) and Jamnia (*Yebna*); this line lies within the tribe of Dan, and the Gath thus located appears to be Gath-rimmon and not the royal Gath.

The Crusaders considered Gath to be identical with Jamnia (*Yebna*), and erected there the castle of Ibelin, which Benjamin of Tudela (*Early Travels*, p. 37) identifies with Jabneh, now *Yebna* (Will. Tyr. 15. 24. 25).

The view that Gath, Bethgabra, Eleutheropolis, and *Beit Jibrîn* are all one and the same city is based by Thomson (*Land and Book*) and Canon Tristram (*Bible Places*) on the ground that Bethgabra and *Beit Jibrîn* may be rendered 'house of the giants' (Anakim), and on the finding of the name *Kherbet Gat* among the ruined heaps at *Beit Jibrîn*, and also on the assumption that Mareshah was a suburb of Gath (2 Ch 11^{8}, Mic 1^{14}), from the connexion of the words in those two passages. As, however, the word Gath in Hebrew signifies 'wine-press,' and as the Anakim at one time occupied all the territory round about, this proposal cannot be pressed home.

The view generally accepted is that proposed by Porter in 1857, viz. that Gath is represented by the site of the modern village of *Tell es-Sâfi*. The position generally satisfies all the geographical references so far as they go, and for a fenced city it is naturally a very strong site, having precipitous sides towards the west. The only difficulty is that the sites of Ekron, Ashdod, Ashkelon, Gaza, and other Philistine fenced cities do not present any natural features capable of defence; they are simply mounds on the undulating plain, and it may be that Gath may yet be discovered as a mound somewhere near *Tell es-Sâfi*. If it had such pronounced natural features for defence as the hill in question has, it is difficult to understand how its existence can have so completely disappeared from history after the time of king Hezekiah.

Tell es-Sâfi (*BRP*^{2} ii. pp. 29–32) is an isolated oblong hill or ridge stretching from north to south between the Shephelah to the east and the plains of Philistia to the west, Wady es-Sunt (the valley of Elah) passing by on the north. It stands out conspicuously towards the north, south, and west, about 300 ft. above the plain and 700 above the Mediterranean; and, presenting on three sides many hundred feet of white precipices, would as a fenced city have been remarkably strong. There are many caves and excavations on the northern scarps; water is obtained to the west at the foot of the hill. The name signifies 'the white hill,' and it can be seen at several hours' distance to north and west.

On the top is a modern village of mud huts with a sacred *wely*. There are still remains of drafted stones visible, remnants of the old castle of Blanchegarde (*Alba Specula*), erected in A.D. 1144 by Fulke of Anjou as a check against the incursions of the Saracens from Ashkelon. It was taken by Saladin in A.D. 1191 and dismantled, but was again fortified by Richard of England in the following year. It continued for some centuries as a place of importance in the hands of the Moslems. (See, in addition to the authorities cited above, G. A. Smith, *HGHL* 194 ff.; Gautier, *Souvenirs de Terre-Sainte*, 93). C. WARREN.

GATH-HEPHER (גַּת הַחֵפֶר 'wine-press of digging'; in Jos 19^{13} with ה *locale* גִּתָּה חֵפֶר which AV mistakenly tr. Gittah-hepher).—The home of the prophet Jonah (2 K 14^{25}), and on the border of Zebulun and Naphtali near Japhia and Rimmon (Jos 19$^{12.13}$), which have been identified in the villages of *Yâfa* and *Rummâneh*.

There is a general concurrence in the identification of Gath-hepher with the present village of *el-Meshhed* (*SWP* i. pp. 363–367), the site of one of the many Moslem tombs of Neby Yûnas, the prophet Jonah. This village is regarded by both Christians and Moslems as being the home of the prophet Jonah, and there appears to be a chain of tradition supporting this view. About 2½ miles to the west of *el-Meshhed* is the village of *Seffûrieh*, where there are still the remains of a castle and church identified by Robinson (*BRP* ii. 345) as the site of the Sepphoris of Josephus, the Tsippori of the Rabbins, a place not mentioned in Scripture, but afterwards called by the Romans Diocæsarea. Jerome says (*Proœm. in Jonam*) that the home and tomb of the prophet Jonah were shown at a small village 2 miles from Sepphoris or Diocæsarea on the road to Tiberias. Benjamin of Tudela in the 12th cent. states that the tomb of the prophet Jonah was shown in his time near Sepphoris (*Early Travels in Palestine*, p. 89). Isaac Chelo in the 14th cent. states that the name of Gath-hepher was *Meshad* (Carmoly, *Itin.* p. 256). The rabbinical writers state that the tomb of Jonah the prophet was shown at Gath-hepher on a hill near Sepphoris. The *wely* or *makân* has two domes, and is very conspicuous, dominating the plain on the north at a height of 1250 ft. above the Mediterranean.

LITERATURE.—Besides the authorities cited above, see Baedeker-Socin, *Pal.* 252; Reland, *Pal.* ii. 786; Neubauer, *Géog. du Talm.* 200 f. C. WARREN.

GATH-RIMMON (גַּת־רִמּוֹן).—There are perhaps two places mentioned of this name.

1. A Levitical city in the territory of Dan (Jos 21^{24}, 1 Ch 6^{69}), situated near Jehud, Bene-berak, and Me-jarkon, not far from Joppa (Jos 19^{45}). The site has not been ascertained. This is probably the Gath mentioned by Eusebius as lying between Antipatris and Jamnia (*Onom. s.* 'Gath'). A Gath-rimmon is mentioned as lying between Diospolis and Eutheropolis, but this reference is probably to the royal city of Gath. See GATH.

2. A town of Manasseh, west of Jordan (Jos 21^{25}), assigned to the Levites. It is only once mentioned, with no indication whatever of its situation within the tribe of Manasseh. It follows immediately after Gath-rimmon of Dan in the previous verse; and as the LXX has Ἰεβαθά (B) or Βαιθσά (A), and the parallel passage in 1 Ch 6^{70} has Bileam (בִּלְעָם), it is possibly an error of the transcribers. *Oxf. Heb. Lex.* would read in Jos 21^{25} יִבְלְעָם, and identify this with the place referred to in 1 Ch 6^{70} (so also Bennett in *SBOT* on Jos *ad loc.*). See further IBLEAM. C. WARREN.

GAULANITIS (Γαυλανῖτις).—The name of a district east of the Sea of Galilee, and frequently mentioned by Josephus, together with Trachonitis, Auranitis, and Batanæa. It is from Gaulōn, Γαυλών, which is the Gr. form of the Heb. word Golan, גּוֹלָן, of which the modern Arab. representative is *Jaulân*. Could we locate with certainty Golan, which was the northernmost of the three cities of refuge east of the Jordan, we should have the central or chief city of the district in question, and thus be able, no doubt, to determine its geographical limits more definitely.

After the death of Herod the Great, Gaulanitis fell to his son Philip, and during his long reign was a portion of his dominions (*Ant.* XVIII. iv. 6). It was divided into two parts, Upper and Lower, and belonged to Agrippa II., from whom it revolted to the Romans in A.D. 66–70 (Josephus, *Life*, 37;

Wars, III. iii. 5, IV. i. 1). The province could not have been of great extent; it was free from hills, having some portions rocky and others exceedingly fertile. It is a part of the great east-Jordan plateau, and rises some 2000 ft. above the sea-level. Judging from existing ruins, this region was once densely populated. See on the whole subject Schumacher, *The Jaulân.* S. MERRILL.

GAULS (Γαλάται) are mentioned in 1 Mac 8^{2} as conquered by the Romans, and in 2 Mac 8^{20} as defeated in Babylonia by the Jews (RVm in the second passage and AV in both read 'Galatians'). The historical allusions are doubtful, although probably the former passage refers to the victories of Manlius in Asia Minor (B.C. 189). See further under GALATIA, p. 89^{a}.

GAZA (עַזָּה Gn 10^{19}, Dt 2^{23}, Arab. *Ghŭzzeh*).—One of the five chief cities of Philistia, situated on a slight eminence amidst trees and gardens at a distance of 2 miles from the shore of the Mediterranean, and on the high road from Egypt to Jaffa and the East (lat. 31–30° N.; long. 34–33° E.). Between the present town and the coast rises a high range of sandhills,* which protects the town from the westerly winds of winter, but is a constant source of danger and loss, as the sands, impelled by the winds from the sea, are ever advancing inland; and it is supposed, with much probability, that the city of the time of the judges (*c.* B.C. 1100) is buried beneath these immense mounds. To the east of the town rises a ridge, 270 feet high, called el-Munṭâr, or 'the watch-tower,' supposed to be the mount, 'in the direction of Hebron,' to which Samson carried the gates of the city (Jg 16^{3}); and on the coast are some traces of ruins, Tell et-Tîneh and el-Mineh, which are considered to mark the position of the former harbour. There is, however, no natural harbour, or safe anchorage, at any part of this coast for many miles from Gaza, and the place could never have been a seaport town. One of the most interesting objects about Gaza is the forest of ancient olive trees extending for 3 miles along the Jaffa road, somewhat resembling a forest of ancient oaks in the gnarled and wrinkled character of their bark, and the girth of their corrugated trunks.† The country around is rich and well cultivated, or else laid out in pasturage for sheep, goats, and herds of cattle; and the Arabs from the neighbouring desert assemble here in the market-place to buy and sell commodities. They belong to the Azazimeh and Terabîn tribes inhabiting the districts to the N. and S. of the Wady es-Seba (here called the Wady Ghŭzzeh), and stretching southwards into the sterile region of the Badiet et-Tih.

History.—Gaza is one of the most ancient cities named in the Bible. We find it mentioned, along with the cities of the plain, as lying along the border of the Canaanites (Gn 10^{19}),‡ and it was captured, but not retained, by the tribe of Judah on the invasion of Pal. by the Israelites (Jg $1^{18.19}$). The special interest of its early history is connected with the exploits of Samson during the wars between Israel and the Philistines (Jg 13–16), at which time G. seems to have risen to a position of great importance, and to have become the capital of the Philistine confederacy; a position which it retained down to the time of Alexander the Great. In the year B.C. 710, when joined in alliance with Sabako king of Egypt, and ruled by Hanno, it was attacked by Sargon and the army of Assyria. A great battle was fought at Raphia (the modern Rafeh), about half-way between Gaza and the Wady el-'Arîsh ('River of Egypt'), in which the allies were defeated by Sargon. Hanno was deprived of his crown, and carried captive to Assyria by the conqueror. This was the first trial of strength between the two great powers of Egypt and Assyria.* Still later (B.C. 332) G. was strong enough to resist for a period of two months a siege by Alexander the Great, after the battle of Issus, but was ultimately taken by storm. The city at this time is described as 20 stadia distant from the sea, and very difficult of access owing to the height of the sandhills. The city itself was wide, and placed on a lofty hill and strongly fortified by a wall.†

But the ultimate decay of G. foretold by the prophets (Jer 47, Am 1^{6}, Zeph 2^{4}, Zec 9^{5}) was hastening towards fulfilment. G. suffered greatly (1 Mac $11^{61.62}$ 13^{43}) in the wars between Ptolemy IX. and Alexander Jannæus, a prince of the Maccabæan line (B.C. 105–78). By Augustus it was assigned to the kingdom of Herod along with the neighbouring maritime cities. This brings us to the first event recorded in NT history in which the name of G. comes prominently into view, namely, the conversion and baptism of the Ethiopian eunuch, which took place near the city (Ac 8^{26}). The precise spot where he was baptized by Philip cannot be determined with certainty; but it may be inferred to have been at the crossing of either the brook Wady el-Hessy or Wady el-Ḥalib by the road from Jaffa to Gaza.‡

Henceforth G. almost disappears from the page of history, till in A.D. 634 it was captured by the generals of the first calif, Abu Bekr. During the crusades it was garrisoned by the Knights Templars, but finally fell into the hands of Saladin after the disastrous battle of Hattin (A.D. 1170). Since then it has remained a Mohammedan city. (For a full account of Gaza and its history see G. A. Smith, *HGHL* 181 ff., and cf. Gautier, *Souvenirs de Terre-Sainte*, 116 ff.; Clermont-Ganneau, *Arch. Researches in Pal.* (1896), p. 279 ff.). E. HULL.

GAZARA (Γαζάρα, Γάζαρα, Γαζηρά, Γάσηρα).—An important stronghold often mentioned during the Maccabæan struggle, 1 Mac 4^{15} 7^{45} 9^{52} 13^{53} (in this last all MSS have Γάζαν, *Gaza*, but the context and the parallel passage in Jos. *Ant.* XIII. vi. 7 show that the correct reading is Γαζάραν, see RVm) 13^{53} $14^{7.34}$ 15^{28} 16^{1}, 2 Mac 10^{32}. In *Ant.* XII. vii. 4, XIV. v. 4, *Wars*, I. viii. 5, it is called *Gadara*. There seems to be no doubt that it is the OT GEZER (which see). See further, Schürer, *HJP* I. i. 261 f., 372, and G. A. Smith, *HGHL* 215 ff.

J. A. SELBIE.

GAZELLE (צְבִי *ẓĕbhî*, *δορκάς*).—AV renders *ẓĕbhî* in the poetical books, and in 2 S 2^{18} 1 Ch 12^{8} by *roe*. RV gives the same rendering, but adds in the marg. in all but three places (2 S 2^{18}, Ca 3^{5} 7^{3}) *gazelle*. In the lists of animals used as food AV renders *ẓĕbhî* by *roebuck*, while RV renders it inconsistently with itself in the other passages, *gazelle*. The latter is undoubtedly the correct rendering for all, instead of *roe* and *roebuck*. The Arabic word *ẓabî*, the exact counterpart of *ẓĕbhî*, is one of the names of the gazelle in that tongue;

---

* Survey Map of Palestine.

† One of these trees was found to be 19 feet in circumference at 4 feet from the ground when measured by the present writer in 1884; and many of them may be a thousand years of age and upwards.

‡ It does not necessarily follow that Gaza was in existence at that time, but only in the time of the writer of the Book of Genesis.

* Rawlinson, *Anc. Mon.* vol. ii. 144.

† Arrian, ii. 26, where an account of the siege is given. During its progress Alexander received a wound in the shoulder.

‡ The Hessy is crossed by the road at a distance of 12 miles from Gaza, the Halib at 5 miles. Either of these spots fits in with the narrative. The ruins of el-Mineh on the seacoast mark the site of a town and episcopal see of the 5th cent. called 'Constantia' or 'Limena Gazæ.'

the other is *ghazâl*, from which our word *gazelle* is derived. It was expressly permitted as food (Dt 12^{15} 14^{6} 15^{22}). It was daily served on Solomon's table (1 K 4^{23}). Asahel and the Gadites were as fleet as *ẓĕbhîs* (2 S 2^{18}, 1 Ch 12^{8}). The *ẓĕbhî* was much hunted (Pr 6^{5}, Is 13^{14}). It is frequently alluded to in Ca ($2^{7.\,9.\,17}$ 3^{5} 4^{5} 7^{3} 8^{14}). The fem. form צְבִיָּה *ẓĕbhîyyâh* became (by law of interchange) Aram. *ṭabitha*, which was translated δορκάς = *gazelle* (cf. Ac 9^{36}).

The gazelle, *Gazella Dorcas*, L., is one of the most beautiful of the antelopes. It is abundant throughout the country, but especially in the remoter mountain districts and in the deserts. It is often met with in herds, which sometimes number as many as a hundred. The general colour is fawn, with white and dark stripes down the face, and a white mark on the hind quarters. A local variety, called the *ariel gazelle*, *Gazella Arabica*, Ehr., is found in Gilead. It is of a darker fawn colour than the type.

Gazelles are hunted by lying in wait for them at the springs, or by chasing them with greyhounds and falcons. They are very fleet, however, and often 'deliver themselves from the hand of the hunter' (Pr 6^{5}). They are often taken in large numbers by driving them into an enclosure, with a pitfall at either side. As many as fifty may thus be taken at one time. When taken young the gazelle is easily tamed, and becomes very affectionate. G. E. POST.

GAZERA (A Γαζηρά, B Καζηρά), 1 Es 5^{31}.—His sons were among the 'temple servants.' In Ezr 2^{48} GAZZAM.

GAZEZ (גָּזֵז, Wellh., *de gent. et fam. Jud.* 26, would write גֹּזֵז).—1. A son of Ephah, Caleb's concubine, 1 Ch 2^{46}. 2. In same verse a second G. is mentioned as a son of Haram, who was another of Ephah's sons. Smith's *DB*^{2} incorrectly states that this second G. is omitted in B. The latter MS reads both times Γεζοῦε; Luc. has in second instance Γαζάς.

GAZINGSTOCK.—Men are no longer punished by being exposed to public gaze, whether in the stocks or otherwise, and 'gazing-stock' has gone out of use. It is one of several compounds of 'stock' which have become obsolete. We find 'mocking stock' in 2 Mac 7^{7}; and Tindale uses 'gestyngestocke' in Dt 28^{37} for EV 'byword.' The only compound still in use is 'laughing-stock.'

Gazingstock (1611 'gazing stocke') occurs Nah 3^{6} 'I . . . will set thee as a gazingstock'; Heb. כְּרֹאִי [in pause], lit. 'as a sight' (from רָאָה 'to look upon'); the word is found also in Gn 16^{13} (אֵל רֳאִי, AV 'Thou God seest me,' RV 'Thou art a God that seeth,' RVm 'God of seeing'—which is probably nearest the mark, *rŏî* being a subst. here); in 1 S 16^{12} of David (EV 'goodly to look to'); and in Job 33^{21} (מֵרֹאִי, of the wasting away of Job's flesh, EV 'that it cannot be seen'). For the *thought* of Nah 3^{6} Davidson refers to Ezk $28^{17.\,18}$, Mt 1^{19}, 1 Co 4^{9}; to which may be added the other example of 'gazingstock,' He 10^{33} (cf. also Moab. Stone, l. 12, 'a g. to Chemosh and to Moab'). Here the ptcp. θεατριζόμενοι is tr^{d} in AV 'whilst ye were made a gazingstock,' in RV 'being made a g.,' a tr. which comes from the Bishops' Bible; Wyc. and Rhem. having 'spectacle,' after Vulg. *spectaculum facti*. This is the only occurrence of the Gr. verb, but θέατρον γίνομαι is found in 1 Co 4^{9}, already referred to, in a precisely similar meaning, EV 'We are made a spectacle unto the world,' which is Wyclif's and the Rhem. tr., again after Vulg. *spectaculum facti*. Tindale's word here is 'gasyngestocke,' and he is followed by the other versions. Shaks. uses 'gaze' for 'gazing-stock' in *Macbeth*, V. viii. 24—

> 'Then yield thee, coward,
> And live to be the show and gaze o' the time;
> We'll have thee, as our rarer monsters are,
> Painted upon a pole, and underwrit,
> "Here may you see the tyrant."'

J. HASTINGS.

GAZITES (הָעַזָּתִי[ם]).—The inhabitants of GAZA (wh. see), Jos 13^{3} (AV Gazathites), Jg 16^{2}.

GAZZAM (גַּזָּם).—A family of Nethinim who returned with Zerub. (Ezr 2^{48}, Neh 7^{51}), called in 1 Es 5^{31} Gazera. See GENEALOGY.

GEBA.—1. (גֶּבַע, in pause גָּבַע = *Gaba*, a 'hill') A city of Benjamin—one of those assigned under Joshua to the Levites (Jos 21^{17}, 1 Ch 6^{60}). It was situated on the N.E. border of Benjamin (Jos 18^{24}). It is abundantly clear from the history of the two kingdoms that Geba is to be identified with the modern *Jeba*. The latter lies some 7 miles to the N. of Jerusalem, the road to which joins the main road between Bethel and Jerusalem, just N. of *Tell el-Fûl* (Gibeah). It is situated on the S. side of the steep defile of the *Wady Suweinît*, facing Michmash (*Mŭkhmās*) on the other side (1 S 14^{5} 'The one crag rose up on the north in front of Michmash, and the other on the south in front of Geba'). It was from this spot that Jonathan (1 S $14^{1\text{ff.}}$), accompanied only by his armour-bearer, started to descend the precipitous cliffs of the pass, and, in so doing, purposely revealed himself to the garrison of the Philistines on the opposite height. The words of the latter merely served to confirm the two warriors in their resolve, while the very audacity of their undertaking ensured its success. Climbing up on their hands and feet (v.^{13}), they fell upon the astonished Philistines with undiminished vigour, and, by their daring, initiated a panic, which quickly spread throughout the Philistine forces, and caused the complete discomfiture of the latter at the hands of Saul. Saul, with but a scanty remnant of his forces, would seem to have been encamped at Gibeah (13^{16} Geba must be a mistake for Gibeah; cf v.^{16}), some 3 miles to the S., so that Jonathan could start on his daring errand without awakening the suspicions of his countrymen as to the object of his expedition. In the reign of Asa king of Judah, this important position on the frontier was fortified with 'the stones of Ramah (*er-Rām*) and the timber thereof, wherewith Baasha (king of Israel) had builded' (1 K 15^{22} =2 Ch 16^{6}). From this period onwards G. appears to have marked the N. limit of the kingdom of Judah. Hence we find the old formula, 'from Dan to Beersheba,' which denoted the extent of the united kingdom, altered into 'from Geba to Beersheba' (2 K 23^{8}, cf. Zec 14^{10}). The position of Geba, its strategic importance, and its distinction from the similar-sounding Gibeah (for the latter point cf. Jos $18^{24.\,28}$), are once more clearly shown in Isaiah's dramatic picture of the march of Sennacherib's army against Jerusalem from the N. (Is $10^{28\text{-}32}$, see GIBEAH, 2 (4)); while in the times of Ezra and Nehemiah it was still a well-known spot (Neh 11^{31} 12^{29}; cf. 7^{30}, Ezr 2^{26}, 1 Ch 8^{6}).

In the following passages the Hebrew text wrongly gives Geba for Gibeah: Jg $20^{10.\,33}$, 1 S $13^{3.\,16}$; for further details see GIBEAH, 2. In Jg 20^{31} (see above) Geba is to be restored in place of Gibeah, while in 2 S 5^{25} it seems probable that we should restore Gibeon for Geba, in accordance with the parallel passage 1 Ch 14^{16}.

2. (Γαιβαί) About 3 miles N. of Samaria. It was the southernmost of the three fortresses which commanded the road leading up from Esdraelon, through the pass of En-gannim (*Jenîn*),

into Samaria. It was between this fort and Scythopolis that Holofernes pitched his camp preparatory to attacking Judæa (Jth 3^{10}).

J. F. STENNING.

GEBAL.—**1.** גְּבָל, Γαιβάλ or Γεβάλ, Ps 83^{8} [Eng. ^{7}]. A mountainous district south of the Dead Sea, which still bears the name of *Jebâl* (Robinson, *BR* ii. 154). Josephus regards Γοβολῖτις as a part of Idumæa (*Ant.* II. i. 2, cf. IX. ix. 1), and Jerome explains Seir by *Gebalena* (Euseb. *Onomast.* 'Seir'). In Ps 83^{8} Gebal is named, together with Ammon, Amalek, and other nations, as forming a confederacy against Israel. The date and occasion of the psalm are unknown, but many commentators connect it with the events described in 1 Mac 5.

2. גְּבַל, (*οἱ πρεσβύτεροι*) Βυβλίων, Ezk 27^{9}. GEBALITES הַגִּבְלִים, AV **Giblites**, but in 1 K 'the stonesquarers,' Jos 13^{5}, 1 K 5^{18}. A Phœnician city, situated on rising ground near the sea, at the foot of Lebanon, and about 20 miles N. of Beirût. The name is found frequently in Phœnician (*CIS* 1) and Assyrian inscriptions in the forms *Gubal* or *Gubli* (cf. Schrader, *COT* i. 174 and Gloss.), and also on the Tel el-Amarna tablets; while to the Greeks the town was well known as Byblus (Βύβλος or Βίβλος, cf. Strabo, xvi. p. 755). The modern name is *Jebeil*. The city was celebrated for the worship of Adonis and Astarte, while its maritime importance is attested by Ezekiel, who speaks of the 'elders and wise men of Gebal' as being the carpenters or 'calkers' of the ships of Tyre (27^{9}). According to Jos 13^{5} the land of the GEBALITES (AV Giblites) was included within the ideal boundaries of Israel; but it was never occupied by the Israelites, and it seems doubtful whether it could in any sense have been regarded as belonging to the Promised Land. Moreover, the passage is syntactically incorrect (וְהָאָרֶץ הַגִּבְלִי), and the widely different reading of LXX points to an early corruption of the text. It is better to read 'as far as the border of the Gebalites,' עַד גְּבוּל הַגִּבְלִי, omitting the preceding words הָאֱמֹרִי וְהָאָרֶץ, and to suppose that the territory of Gebal extended inland in a south-easterly direction (see Dillm. *ad loc.*). The Gebalites are mentioned again in 1 K 5^{18} [Heb.^{32}], where they are said to have fashioned the stones for the building of the temple along with the builders of Solomon and the builders of Hiram. But here, too, the text is probably faulty. Thenius reads, 'and Solomon's builders . . . fashioned them (the stones), and *made a border for them*' (וַיְגַבִּילוּם for וְהַגִּבְלִים, LXX *ἔβαλον*). H. A. WHITE.

GEBER (גֶּבֶר 'man' *or* 'mighty man,' Γαβέρ A, om. B Luc. 1 K 4^{19}).—One of Solomon's twelve commissariat officers, whose district lay to the E. of Jordan, and perhaps S. of that of the officer mentioned v.^{13}. At the end of v.^{19} comes a sentence referred by AV and RV to this Geber, and rendered 'and *he was* the only officer which was in the land.' This is usually thought to mean that in this large district more than one officer might have been expected, but that this was not the case, probably because the country was rugged and thinly populated. Such a rendering, however, together with the interpretation put upon it, can by no means be extracted from the Hebrew, which is certainly corrupt. Klostermann by a clever emendation obtains the statement 'and one officer was over all the officers who were in the land,' the reference being, not to Geber, but to Azariah son of Nathan, mentioned v.^{5} as 'over the officers.' Cf. the interpretation of Jos. (*Ant.* VIII. ii. 3) *ἐπὶ δὲ τούτων εἷς πάλιν ἄρχων ἀποδέδεικτο.*

C. F. BURNEY.

GEBIM (הַגֵּבִים 'the trenches').—A place N. of Jerusalem, the inhabitants of which are graphically pictured by the prophet as saving their goods by flight upon the approach of the Assyrian army, Is 10^{31} only. In Eusebius (*Onomast. s.* 'Gebin') a Geba 5 Roman miles from Gophna, on the way to Neapolis (Shechem), is noticed. This is the modern *Jebîa*, which, being near the great northern road, is a possible site for Gebim. See *SWP* vol. ii. sh. xiv. C. R. CONDER.

GECKO (אֲנָקָה *'ănâķâh, μυγαλή, mygale*).—The AV (Lv 11^{30}) renders *'ănâķâh, ferret.* This animal, however, is not found in the Holy Land, and is not at all likely to be the one intended here. The LXX *μυγαλή* signifies the *shrew mouse*, of which several kinds are met with in the Holy Land: (1) *Sorex araneus*, De Selys, Arab. *fâr el-khalâ*, in the hilly districts of N. Galilee; (2) *S. tetragonurus*, Desm., in Lebanon; (3) *S. pygmæus*, De Selys, about one-third as large as the first; (4) *S. crassicaudus*, Licht., a silver-grey species, in the S. deserts; (5) *S. fodiens*, Schreb., the *water shrew*, by streams in Cœlesyria and Antilebanon. Notwithstanding the above tr^{n} of the LXX and the notion of the Rabbins that the *hedgehog* was the animal intended, the position of *'ănâķâh* among the *lizards* has inclined scholars to regard it as one of them. The RV has adopted *gecko* (so Pesh.). This rendering, however, must be regarded as purely conjectural. There are several of the *Geckonidæ* in the Holy Land. The commonest of all is the common gecko, *Ptyodactylus Hasselquistii*, Schneid., which is found everywhere among rocks and in ruins and about houses. It has a fan-shaped foot (whence its generic name), with suckers by the sides of the toes, so that it can walk on smooth walls, and even run inverted like a fly. It moves noiselessly. But it can emit a rapid clucking sound, by vibrating the tongue against the palate. The name *gecko* is an attempted imitation of this sound. There is a popular superstition in the country, that a *gecko*, crawling over the body, will produce leprous sores; hence its name *abu bureis*, 'father of leprosy.' This opinion, which is probably ancient, would add to the lacertine form of the animal a reason for considering it unclean. It has a flattish-triangular head, covered with scales, a wide mouth, large eyes and small teeth, and a broad tail, nearly as long as the body. The general colour is black, but the whole body is spotted with rows of rounded warts or prominences. It is the most repulsive-looking of the lizards in Palestine. G. E. POST.

GEDALIAH (גְּדַלְיָהוּ, גְּדַלְיָה 'J" is great').—**1.** Son of Ahikam, who had protected Jeremiah from the anti-Chaldæan party (Jer 26^{24}), and probably grandson of Shaphan, the pious scribe (2 K 22). G. naturally shared the views of Jeremiah. This commended him to Nebuchadnezzar, who made him governor over 'the poor of the people that were left in the land.' His two months' rule and treacherous murder are detailed in Jer 40, 41 (2 K 25^{22-25}). At Mizpah in Benjamin the scattered elements of the national life gathered round G. First came Jeremiah, then the remnant of the army, and finally the Jews that had been dispersed in the adjacent countries. At G.'s bidding they began to settle in the deserted towns, and to gather in the now ownerless crops. Meanwhile Baalis, king of the Ammonites, resolved, by the assassination of G., to destroy 'the remnant of Judah' (Jer 40^{15}). He found a tool in Ishmael 'of the seed royal,' formerly a high officer under Zedekiah, but now a bandit in the service of Ammon (41^{10}). Disbelieving the warnings which he received, G. entertained Ishmael and ten followers at Mizpah. G. and the small garrison of Jews and Chaldæans were slain, probably while at table (Jos. *Ant.* X. ix. 4), and their bodies cast promiscuously (41^{9}) into the ancient cistern of Asa. The plot of Baalis succeeded but too well; for the Jewish captains, fearing lest they might be held responsible for the audacious murder of the great king's representative ($41^{2.18}$), fled into Egypt, carrying with them Jeremiah and 'all the remnant of Judah.' 'It seemed to be the revocation of the advantages of the Exodus' (Stanley). The anniversary of G.'s murder—the third day of the seventh month, Tisri (Zec 7^{5} 8^{19})—has been ever since observed as one of the four Jewish fasts. Grätz (see Cheyne on Jer 41^{1}) argues that G.'s government lasted five years, but his reasons do not seem conclusive.

2. 1 Ch $25^{3.9}$ eldest 'son' of Jeduthun, leader of the second course of temple musicians. **3.** Ezr 10^{18} (1 Es 9^{19} Joadanus), a priest 'of the sons of Jeshua,' who 'had married a strange woman.' **4.** Jer 38^{1} son of Pashhur (Jer 20^{1-6}), a prince in the reign of Zedekiah. **5.** Zeph 1^{1} grandfather of the prophet Zephaniah. N. J. D. WHITE.

GEDDUR (A Γεδδούρ, B Κεδδούρ), 1 Es 5^{30}.—In Ezr 2^{47} Neh 7^{49} GAHAR. גחר was perhaps read גדור.

GEDER (גֶּדֶר).—An unidentified Canaanitish town, whose king was amongst those conquered by Joshua, Jos 12^{13} (only). While LXX A has Γαδέρ, B has 'Ασεἰ. It is very probably identical with **Beth-gader** of 1 Ch 2^{51}. In 1 Ch 27^{28} Baal-hanan, who had charge of David's olives and sycomores, is called the **Gederite** (הַגְּדֵרִי), which may be a gentilic name derived from Geder, although some prefer to derive it from GEDERAH (wh. see).

GEDERAH.—AV of 1 Ch 4^{23b} reads, 'Those that dwelt among plants (RVm plantations) and hedges,' but RV gives 'the inhabitants of Netaim and Gederah,' and this is probably the correct trⁿ of יֹשְׁבֵי נְטָעִים וּגְדֵרָה. In that case the Gederah referred to would probably be the city of that name located by Jos 15^{36} in the Shephelah, the modern *Jedîreh* (*SWP* vol. iii. sh. xx.) and the Gedour of Eusebius (*Onomast.* p. 254, Lagarde, 2nd ed.). The gentilic name **Gederathite** (הַגְּדֵרָתִי) occurs in 1 Ch 12^{4}. J. A. SELBIE.

GEDEROTH (גְּדֵרוֹת, in 2 Ch 28^{17} 'הַגּ).—A town of Judah in the Shephelah, Jos 15^{41}, 2 Ch 28^{18}, noticed with Beth-dagon, Makkedah, and Naamah. It appears to be the modern *Katrah* near Yebna, where a Jewish colony is now established. Possibly it is also the **Kidron** of 1 Mac $15^{39.41}$ 16^{9}. See *SWP* vol. iii. sh. xvi. C. R. CONDER.

GEDEROTHAIM (גְּדֵרֹתַיִם) occurs in Jos 15^{36} as one of the fourteen cities of Judah that lay in the Shephelah. There are, however, fourteen cities without it, and it is probable that the name has arisen by dittography from the preceding Gederah (Nöldeke, *Krit. d. AT*, 101). The names of the cities in the LXX show several divergences from the MT; in v.^{36} Adithaim is omitted, and after Γαδηρά we read *καὶ αἱ ἐπαύλεις αὐτῆς*, which is evidently intended to be the trⁿ of גְּדֵרֹתַיִם ('sheep-folds'). Both the *Oxf. Heb. Lex.* and Siegfried-Stade are surely in error in stating that the name is *omitted* in the LXX. The subterfuge of the AVm 'Gederah *or* Gederothaim' is, of course, not permissible. J. A. SELBIE.

GEDOR (גְּדוֹר, גְּדֹר).—**1.** A town of Judah, named along with Halhul and Beth-zur, Jos 15^{58}; cf. 1 Ch $4^{4.18}$ 12^{7} (in this last הַגְּדוֹר, Baer and Kittel הַגְּדוּר). It is generally identified with the modern *Jedûr* (Robinson, *BRP*² ii. 13) north of Beit Sur. **2.** The district from which the Simeonites are said to have expelled the Hamite settlers, 1 Ch $4^{39ff.}$. The LXX, however, reads Γέραρα (Gerar), and Gerar 'suits admirably as to direction' (Kittel in *SBOT*). This reading is adopted also by Ewald (*Gesch. Isr.* i. 344), Bertheau (*Chron.* 51), Hitzig (on Mic 1^{15}), Graf (*Der Stamm Simeon*, 25), *Oxf. Heb. Lex.*, Siegfried-Stade, etc.

GEDOR (גְּדוֹר, גְּדֹר 'wall').—**1.** A Benjamite, an ancestor of king Saul, 1 Ch 8^{31} 9^{37}. **2. 3.** The eponym of two Judahite families, 1 Ch $4^{4.18}$. See GENEALOGY.

GE-HARASHIM (גֵּיא חֲרָשִׁים), 'valley of craftsmen,' 1 Ch 4^{14}, Neh 11^{35}. In the latter passage it occurs with Lod and Ono. The name may survive at the ruin *Hirsha*, E. of Lydda. See *SWP* vol. ii. sh. xiv.

GEHAZI (גֵּיחֲזִי, except in 2 K 5^{25} $8^{4.5}$, where it is גֵּחֲזִי, 'valley of vision'; LXX Γιεζεί, Vulg. *Giezi*) is four times called the *servant* (נַעַר, lit. 'boy') of Elisha, a term which indicates a lower kind of service than Elisha's 'ministry' to Elijah. He may, however, be the person called in 2 K 4^{43} Elisha's *minister* (מְשָׁרֵת), the word which is applied to Elisha himself in 1 K 19^{21}. Gehazi is one of those Bible characters—Achan, Judas, Ananias, Demas, etc.—whose crimes and apostasy point the moral that the love of money is a root of all kinds of evil. What is known of him is told in three narratives.

1. In the story of the lady of Shunem (2 K 4^{8-37}) he appears as a man of shrewd practical sense, but incapable of understanding the impulses of deep feeling. His moral quality is scarcely defined. Elisha having failed to persuade his benefactress to ask any favour, turns in perplexity to consult his servant (4^{14}). G. has penetrated the good lady's thoughts, and tells the prophet of her secret longing for a son. Elisha perceives that his servant's insight has surpassed his own, and, recalling the Shunammite, promises that the desire of her heart will be granted. In the sequel to the story, when the lady, bereft of this child of promise, comes in haste to the retreat at Carmel and casts herself at the prophet's feet in a passion of grief, G.'s commonplace mind is shocked at this liberty taken by a woman. He would rudely thrust her away; but the prophet, pitying her unknown sorrow, reproves his servant for adding to the bitterness of her soul. When she has told the cause of her grief, G. is directed to hasten to Shunem, saluting no man by the way (cf. Lk 10^{4}), and lay the prophet's staff on the face of the child.

2. In the story of Naaman G. appears as a finished example of covetousness (2 K 5^{20-27}). His baseness is in startling contrast to the high-mindedness of his master. In vain does Naaman press his treasure on the acceptance of Elisha; he has to depart with it intact (5^{16}). To the sordid mind of G. this situation of affairs presents a temptation which he cannot resist. His passion for gain, probably long nourished in secret, suddenly overmasters him. The voice of reason and religion is stifled, and blasphemy, lying, sacrilege, and fraud come to serve his master passion. Elisha's refusal to take the stranger's gold seems to him madness. 'As J" liveth,' he will secure a portion of it for himself—thus lightly does he use the same oath with which Elisha solemnly refused the filthy lucre (5^{16-20}). Running to overtake the Syrian cavalcade, G. invents a clever story of two poor young sons of the prophets having just come to Samaria, whose wants Elisha has bethought himself of supplying out of the treasure which he had refused for himself. G. begs for them a talent of silver (£400!) and two changes of raiment.

Plausible though the story was, it could hardly fail to lower the prophet in the estimation of the Syrians. They would reflect that he was like other men, after all. But G.'s request is at once granted, and two of Naaman's servants return to Samaria laden with the changes of raiment and twice as much silver as had been asked. When they come to the hill (עֹפֶל, LXX *εἰς τὸ σκοτεινόν, to the secret place*, from a reading אֹפֶל; Vulg. *jam vesperi*) G. dismisses the men and conceals his prize. He then boldly presents himself before his master, and in answer to a question assures him with an air of innocence that he has been nowhere. But the prophet has at last discovered his servant's true character, and with searching interrogations lays bare his guilt, and reads the very thoughts and intents of his heart. G. is utterly confounded. Pale and speechless he hears the curse of Naaman's leprosy entailed, with awful appropriateness, on himself and his family for ever, and goes from Elisha's presence a leper, white as snow.

3. In the third narrative (2 K 8$^{1-6}$) G. appears engaged in conversation with king Jehoram, who has called him to recite the story of Elisha's wonderful deeds. G. is telling of the restoration of the Shunammite's son to life, when the lady herself comes on the scene to petition the king to reinstate her in the house and land which she had lost in a recent famine. The difficulty of imagining the king talking to a leper and G. glorifying Elisha has led some critics to suppose that this narrative is misplaced, and should appear before 2 K 5. But it reads quite naturally as it stands. Conversation with lepers was not forbidden. The story certainly shows G. in a more favourable light than the previous narrative. The notice taken of him by the king, and the truthfulness and respect with which he recounts the deeds of his former master, may be charitably taken to indicate that affliction had at last made him a wiser and better man.

Elisha's choice of this covetous man to be his follower presents a difficulty of the same kind, though not so great, as Christ's choice of a covetous disciple. It appears that the prophet's insight, though often marvellous, was sometimes quite ordinary (2 K 4^{14}). He confesses his inability to read the mind of the Shunammite: 'J″ hath hid it from me, and hath not told me' (4^{27}). In the same way he was evidently mistaken with regard to the character of his servant. He probably chose him for his ready wit and practical sense; and if he detected in him a love of money, he may have hoped that the force of example would wean him from it. But to minds steeped in avarice the means of grace are often a savour of death rather than of life, and a holy example may not change the heart. 'Happy was it for Gehazi,' says Bishop Hall, 'if, while his skin was snow-white with leprosy, his humbled soul was washed white as snow with the water of true repentance.'

J. STRACHAN.

GEHENNA.—The word Gehenna, *Γέεννα* in Tischendorf and WH (or *Γεέννα* according to other scholars, on the ground of its derivation from the Aram. גֵּיהִנָּם), is derived ultimately from the Hebrew expression גֵּי הִנֹּם = 'valley of Hinnom,' Jos 15^{8} 18^{16}, Neh 11^{30}, which is an abbreviated form of גֵּי־בֶן־הִנֹּם = 'valley of the son of Hinnom,' Jos 15^{8} 18^{16}, 2 Ch 28^{3} 33^{6}, Jer 7$^{31.32}$ 19$^{2.6}$, or in the *Kcthib* of 2 K 23^{10} גֵּי בְנֵי־הִנֹּם. But this place became so notorious through its evil associations that it was simply called 'the valley' *κατ' ἐξοχήν*, Jer 2^{23} 31^{40}, and the gate of Jerusalem leading to it 'the valley-gate,' 2 Ch 26^{9}, Neh 2$^{13.15}$ 3^{13}. This valley lay to the S. and S.W. of Jerusalem (Robinson, *BRP* ii. 273, 274). The derivation of הִנֹּם is quite uncertain. In the LXX this name appears variously as *φάραγξ Ὀνόμ* (B: Ἐννόμ A), Jos 15^{8}; (B) *νάπη Σοννάμ* (B: *υἱοῦ* Ἐννόμ A), Jos 18^{16}; *Γαίεννα* (B: Γαὶ Ὀννόμ A), Jos 18^{16}; *Γαιβενθόμ* (B: *Γηβεεννόμ* A), 2 Ch 28^{3}; *γὲ βανὲ* Ἑννόμ (B: *γη* Βεεννομ A), 2 Ch 33^{6}. Elsewhere we find generally *φάραγξ* (*υἱοῦ*) Ἐννόμ.

This term is used in a variety of meanings in the course of Israelitish and Jewish history. These we shall consider separately according as they appear in OT, Apocalyptic literature, the NT, or in later Judaism.

I. ITS USE IN THE OT falls under three heads. (*a*) It is used in a merely *topographical sense*. Thus it formed the boundary between Judah and Benjamin, Jos 15^{8} 18^{16}, and the northern limit of the district occupied by the tribe of Judah after the Captivity, Neh 11^{30}, and lay in front of the gate Harsith of Jerusalem, Jer 19^{2}. See further under HINNOM (VALLEY OF).

(*b*) It is used in a *religious significance as implying a place of idolatrous and inhuman sacrifices*. These were first offered by Ahaz and Manasseh, who made their children to 'pass through the fire' to Molech in this valley, 2 K 16^{3}, 2 Ch 28^{3}, and 2 K 21^{6}, 2 Ch 33^{6}. These sacrifices were probably made on the 'high places of Topheth, which is in the valley of the son of Hinnom,' Jer 7^{31}; cf. Jer 32^{15}. In order to put an end to these abominations, Josiah polluted it with human bones and other corruptions, 2 K 23$^{10.13.14}$. But this worship of Molech was revived under Jehoiakim, Jer 11$^{10-13}$, Ezk 20^{30}. In consequence of these idolatrous practices in the Valley of Hinnom, Jeremiah prophesied that one day it would be called the 'Valley of Slaughter,' and that they should 'bury in Topheth till there be no place to bury,' Jer 7^{32} 19^{11}. Many scholars have accepted the statement of Kimchi (*c.* 1200 A.D.) on Ps 27: 'Gehennam fuit locus spretus, in quem abjecerunt sordes et cadavera, et fuit ibi perpetuo ignis ad comburendum sordes illas et ossa; propterea parabolice vocatur judicium impiorum Gehennam.' But this is denied by Robinson, i. 274, who writes that 'there is no evidence of any other fires than those of Molech having been kept up in this valley' (Rosenmüller, *Biblisch. Geogr.* II. i. 156, 164).

(*c*) It signifies the *place of punishment for rebellious or apostate Jews in the presence of the righteous*. Gehinnom or Gehenna is not actually mentioned with this signification in the OT, but it is it and no other place that is implied in Is 50^{11} 'in a place of pain shall ye lie down,' and 66^{24} with this new connotation. Both these passages are very late, and probably from the same hand—not earlier than the 3rd cent. B.C. (see Cheyne, *Introd. to the Bk. of Isaiah*, p. 380; Smend, *Alttestamentliche Religionsgeschichte*, p. 506). Further, the punishment of the apostate Jews in Is 66^{24} is conceived as eternal: 'They shall look upon the carcases of the men that have transgressed against me; for their worm shall not die, neither shall their fire be quenched, and they shall be an abhorring to all flesh.' The punishment of Gehenna is implied also in Dn 12^{2} 'some to shame and everlasting abhorrence.' We should observe that the same word דֵּרָאוֹן 'abhorrence' occurs in these two passages, and in these only, and the reference in both is to Gehenna.

II. ITS MEANING AND FURTHER DEVELOPMENT IN APOCALYPTIC LITERATURE.* In this literature this conception underwent further development. (*a*) Thus Gehenna was conceived as *a place of corporal and spiritual punishment for apostate Jews in the presence of the righteous for ever.* (See Eth. En. 27$^{2.3}$ 90$^{26.27}$). In the Similitudes of that book, *i.e.* chs. 37–70, there is a slight modification of the above idea. Thus, though the punishment is everlasting, only its initial stages will be executed in the presence of the righteous. On the expiration of these, the wicked will be swept for ever from the presence of the righteous, 48^{9} 62$^{12.13}$.

---

* There is no actual mention of the word Gehenna in biblical Apocryphal literature; but in Jth 16^{17}—

οὐαὶ ἔθνεσιν ἐπανισταμένοις τῷ γένει μου.
Κύριος Παντοκράτωρ ἐκδικήσει αὐτοὺς ἐν ἡμέρᾳ κρίσεως,
δοῦναι πῦρ καὶ σκώληκας εἰς σάρκας αὐτῶν,
καὶ κλαύσονται ἐν αἰσθήσει ἕως αἰῶνος—

the reference to Gehenna is undeniable. In Sir 7^{17}, however, the text *ἐκδίκησις ἀσεβοῦς πῦρ καὶ σκώληξ* is probably corrupt, being without the support of the Syriac Version and the best MSS of the Ethiopic. Sheol, moreover, has become synonymous with Gehenna in the Similitudes. Thus: 'Sheol will devour the sinners in the presence of the elect,' 56^{8}, cf. 63^{10}.

(*b*) *A place of spiritual punishment for apostate Jews in the presence of the righteous.* Heretofore Gehenna was always conceived as a place of both corporal and spiritual punishment. This new development is attested in the Eth. En. 91–104 (*c.* 134–95 B.C.). Thus in 98^{3} 'their spirits will be cast into the furnace of fire.' Cf. also 103^{8}. From 99^{11} 103$^{7.8}$ it is clear that Sheol and Gehenna have become equivalent terms in this writer also. See also 100^{9}. The same conception is found in an Essene writing, *i.e.* Eth. En. 108^{6} and in the Assumpt. Mos. 10^{10}. In the latter passage Gehenna or rather 'the valley' is mentioned by name (see Charles, *Assumption of Moses*, pp. 43, 44). It is noteworthy that in all these books only a blessed immortality of the souls of the righteous is taught.

(*c*) *A place of corporal and spiritual punishment for all the wicked in the presence of the righteous.* We arrive at this stage of development in 2 Es 7$^{36-38}$ 'Et apparebit locus tormenti, et contra illum erit locus requietionis: clibanus gehennæ ostendetur, et contra eum jocunditatis paradisus. Et dicet tunc Altissimus ad excitatas gentes—— "Videte contra et in contra; hic jocunditas et requies, et ibi ignis et tormenta."'

III. ITS MEANING IN THE NT.—In the NT Gehenna is always the final place of punishment into which the wicked are cast after the last judgment. It is a place of torment both for body and soul. Thus Mt 5^{29} 'It is profitable for thee that one of thy members should perish, and not thy whole body go into Gehenna.' So also in 5^{30}. Some have argued that Christ has here only the living in view; but this limitation appears unwarranted. It is not till after the final judgment that the wicked are cast into Gehenna. At the resurrection, soul and body are united. Both are punished in Gehenna. Gehenna as the last punishment was conceived also as the worst. It slew both soul and body—not, indeed, in an absolute sense, but relatively. Thus Mt 10^{28} 'Fear him which is able to destroy both soul and body in Gehenna.' Cf. Lk 12^{5}. This final stage of retribution is carefully distinguished in Eth. En. 22$^{11-13}$. There the souls in the third division of Sheol are raised in order to be delivered over to their worst penalty, but of the sinners in the fourth division it is said: 'Their souls will not be slain on the day of judgment, nor will they be raised from thence.' For the phrase 'slaying of the soul' in this connexion, compare also Eth. En. 108$^{3-6}$. Gehenna is conceived as a fire, Mt 5^{22} 18^{9}; an unquenchable fire, Mk 9^{45}; as a place where 'their worm dieth not, and the fire is not quenched,' Mk 9^{48}; a 'furnace of fire,' Mt 13$^{42.50}$; 'the outer darkness,' Mt 8^{12} 22^{13} 25^{30}. It is the 'lake of fire' in Rev 19^{20} 20$^{10.14.15}$ 21^{8}. Hades is finally cast into it, Rev 20^{14}. In the NT Hades and Gehenna seem never to be confused together.

IV. IN LATER JUDAISM.—Here Gehenna is conceived as a *Purgatory for faithless Jews*, who were afterwards to be admitted into paradise, but still remained the place of eternal perdition for the Gentiles (cf. Weber, *Jüdische Theologie*^{2}, pp. 341, 342; Driver, *Sermons on OT*, 79 f., 87, 89 f., 97).

R. H. CHARLES.

GELILOTH (גְּלִילוֹת, Γαλιαώθ, A Ἀγαλλιλώθ).—One of the places mentioned in Jos 18^{17} as defining the S. boundary of Benjamin. The border, it is said, after leaving the valley of the son of Hinnom, 'went out' first to En-shemesh (probably *'Ain Ḥaud*, about 2 miles E. of Jerusalem), and afterwards to G. 'in front of the ascent of Adummim,' and so passed on into the Jordan Valley. The 'ascent of Adummim' is in all probability the ascent, some 5 miles long, leading up from the plain of Jericho to *Tala'at ed-Dumm*, about 6 miles E.N.E. of Jerusalem, on the regular route between Jerusalem and Jericho. The place G. has not, however, been identified; and all that can be said about it is that it was some spot on the boundary between Benjamin and Judah, conspicuous as a landmark to a traveller climbing up this steep ascent. In Jos 15^{7}, where the N. boundary of Judah (in the opposite direction) is described, the place, similarly described, is called *Gilgal* (הַגִּלְגָּל, LXX B Τααγάδ, A Γαλγάλ). We have no means of determining which is the true reading; the idea that the Gilgal between Jericho and the Jordan can be intended is, of course, quite out of the question; the border, at the point in question, must, as is evident from the terms employed ('went up,' 15$^{6b.7a}$; 'went down,' 18$^{17b.18b}$), have been *above* the plain.

Geliloth, in the sense, as it seems, of *circuits* or *districts*, appears also (in the Heb.) as the technical name of the administrative districts of the Philistines (Jos 13^{2}, Joel 3 (4)^{4}; cf 1 Mac 5^{15})—perhaps, of those ruled by their five 'lords' (Jos 13^{3}). It occurs likewise in the obscure and uncertain expression (Jos 22$^{10.11}$), 'districts of Jordan' (גְּלִילוֹת הַיַּרְדֵּן), which describes the locality in which the altar 'Ed' was built by the 2½ tribes.

S. R. DRIVER.

GEM.—See STONES (PRECIOUS).

GEMALLI (גְּמַלִּי 'camel-owner,' or 'my rewarder').—Father of the Danite spy, Nu 13^{12} P.

GEMARA.—See TALMUD.

GEMARIAH (גְּמַרְיָהוּ, גְּמַרְיָה 'J" hath accomplished').—**1.** A son of Shaphan the scribe, from whose chamber Baruch read the prophecies of Jeremiah in the ears of all the people. He vainly sought to deter king Jehoiakim from burning the roll (Jer 36$^{10.11.12.25}$). **2.** A son of Hilkiah who carried a letter from Jeremiah to the captives at Babylon (Jer 29^{3}).

GENDER (a clipt form of 'engender,' which comes from Lat. *ingenerare*, through Old Fr. *engendrer*, the *d* being excrescent after *n* as in 'tender' from *tener*) is used in AV both transitively and intransitively, both literally and figuratively. The trans. and lit. sense 'to beget' is common in Wyclif, as Mt 1^{2} (1380) 'Abraham gendride, *or bigate*, Ysaac'; and Ec 6^{3} (1388) 'If a man gendrith an hundrid fre sones, and lyveth many yeris, and hath many daies of age, and his soule usith not the goodis of his catel, and wantith biriyng; Y pronounce of this man that a deed borun child is betere than he.' It is from Wyc. (1388) that the AV tr. of Job 38^{29} comes, 'The hoary frost of heaven, who hath gendered it?' (יְלָדוֹ, Gen. 'ingendred'; RVm 'given it birth'). In Zec 13^{3} Wyc. uses the word of mother as well as father, 'his fader and moder that gendriden hym,' and in the same verse he speaks of 'his fadir and modir, gendrers of hym'; and then in Gal 4^{24} he employs the word of the mother alone = bear, bring forth children, 'gendringe in to seruage.' This has passed into AV (in Tindale's form 'which gendreth unto bondage') through all the intermediate versions (Gr. εἰς δουλείαν γεννῶσα, RV 'bearing children unto bondage').

The Gr. verb γεννάω, like the Eng. verb 'gender,' properly refers to the father, but is used of the mother in Lk $1^{13.\,57}$ 23^{29}, Jn 16^{21}, and in this passage. The meaning of the passage is well brought out by Lightfoot, 'for these *women* are (represent) two covenants; one of them, *which was given* from Mount Sinai, bearing children unto bondage; inasmuch as she (ἥτις) is Hagar.' Add Gwynne's explanation, 'As Hagar, the bondwoman, brought forth children unto bondage,—for the children follow the condition of their mother,—so likewise did the Sinaitic covenant bring forth children unto bondage; the one is a fit representative of the other.'

This trans. verb is used metaph. in 2 Ti 2^{23} 'But foolish and unlearned questions avoid, knowing that they do gender strifes' (γεννῶσι μάχας; Wyc. 'gendren chidingis,' Tind. 'gendre stryfe,' Rhem. 'ingender braules').

The intrans. examples (='copulate,' 'breed') are Lv 19^{19} and Job 21^{10}, with which cf. Shaks. *Othello*, IV. ii. 62—

> 'Or keep it as a cistern, for foul toads
> To knot and gender in.'

J. HASTINGS.

GENEALOGY.—Under this title will be considered—*A*. Biblical Genealogy in general; *B*. The Genealogical Lists of the Tribes of Israel and a few other lists of names; *C*. Lists of persons and families associated with the labours of Ezra and Nehemiah.

A. 1. *Definition.*—The word genealogy (sing. and plur.) occurs in OT as a tr. of the Heb. noun יַחַשׂ (ἅπ. λεγ. Neh 7^{5}) and of the denom. verb יָחַשׂ (only Hithp. in 1 and 2 Ch, Ezr, and Neh), with the meaning of a family register or a registration by families (1 Ch 4^{33} $5^{1.\,7.\,17}$ etc.). In connexion with these registrations are often given lines of descent (cf. 1 Ch 1–9), and occasionally the pedigrees of individuals (1 Ch $2^{10-13.\,36-41}$ *et al.*). Tables of genealogical descent also appear in OT as an expansion of the word תּוֹלְדוֹת, 'generations' (cf. Gn 5^{1} 10^{1} 11^{10} etc., also Mt 1^{1} βίβλος γενέσεως Ἰησοῦ Χριστοῦ, LXX for סֵפֶר תּוֹלְדוֹת, 'The genealogy of Jesus Christ,' RVm). Genealogies appear in two forms—one giving the generations in a descending scale (Gn 5, Ru 4^{18-23} etc.), the other in an ascending scale (1 Ch 6^{33-43}, Ezr 7^{1-5} etc.).

2. *The registration of families and individuals.*—Just when the Hebrews began to preserve family registers it is impossible to determine. Lists of families and of citizens for official purposes must have been made very early, in connexion, for example, with the census of David (2 S 24). Familiarity with such enrolments is implied in the reference to 'the book of J″' (Ex 32^{32}, Ps 139^{16}), 'the book of life' (Ps 69^{28}, cf. Is 4^{3}, Dn 12^{1}), and they seem to be directly mentioned in Jer 22^{30}, Ezk 13^{9}. At the time of the giving of the Deuteronomic law there must have been some way of determining whether one was of pure Isr. descent (Dt 23^{2-8}). But in the earlier centuries of the pre-exilic period, when marriages probably were freely made with the old Can. inhabitants, and when these inhabitants were being gradually incorporated and amalgamated into Israel, a motive for carefully preserving lines of individual descent is not apparent, and we have no reason to believe that such records were generally made. An exception, which is only probable, may have occurred in the case of royalty, nobility, and perhaps the priesthood. (The laws of inheritance seem not sufficiently complicated to have required the preservation of family genealogies). After the restoration, however, when Israel had become a church, and a sharp line of separation was drawn between the Jews and the other peoples of Palestine, and union with them by marriage had become a grievous trespass (Ezr 9^{1-4}), the case was far different. Hence, from the time of reforms introduced by Ezra and Nehemiah (*c*. B.C. 444), the preservation of family genealogies, or records of the descent of individuals, became a matter of special importance. Already, at that time, certain families were debarred from the office of priests because they could not produce genealogical registers (Ezr 2^{61-63}, Neh 7^{63-65}). From then onwards care was doubtless exercised for their preservation. Their value is shown by the repeated allusion to them in 1 and 2 Ch, Ezr, and Neh. To become a priest, a prime requisite was an evidence of proper pedigree. From the statement of Josephus that his pedigree was given in the public records (*Vita*, 1; cf. *c. Ap.* i. 7), it is probable that family genealogies were thus kept from their importance in reference to inheritance, marriage, redemption of lands, and service in the temple. Many families at the time of Christ evidently had genealogical registers (Mt 1^{1}, Lk 2^{36} $3^{23\text{ff.}}$, Ac 4^{36}, Ro 11^{1}, Ph 3^{5}).

'Davididæ, or descendants of the house of David, were found among the Jews in the Persian, Grecian, and even as late as the Roman period (comp. Zunz, *Analekten*, No. 5, p. 46, note 18). But, in consequence of the exterminating wars and the Dispersion, the records of old families were lost as early as the first centuries, and even the families of the priests did not remain unpolluted (*Jerus. Kiddushin*, iv. 1)' (Zunz in Asher's *Itinerary of Benj. Tudela*, ii. p. 6). Julius Africanus (*Ep. Aristides*, v.) gives a tradition that Herod I. destroyed the genealogical lists which were kept at Jerus., to deprive Jewish families of the knowledge of their descent. This story is doubtful, though received by some. (See Sachs, *Beiträge*, Heft ii. pp. 155 ff.).

3. *Figurative and artificial genealogies.*—These appear frequently in OT. In Gn 5 an unbroken line of descent of ten generations—from Adam to Noah inclusive—furnishes a chronology for the antediluvian period; in Gn 11^{10-26} a similar line from Shem to Terah inclusive furnishes the chronology of the period from the Deluge to the birth of Abraham. In Gn 10 is a table of nations, presenting the geographical and political relationships in the form of a genealogy or family tree from the three sons of Noah. From Terah, Abraham, and Isaac is traced the descent of the peoples with whom Israel recognized a close racial union, *i.e.* the Aramæans of N. Mesopotamia (Gn 22^{20-24}), the tribes of Arabia (Gn 25^{1-18}), the Ammonites and Moabites (Gn 19^{37f}), and Edomites (Gn 36). These peoples, both as wholes and in their various subdivisions, are mentioned as descendants from individual ancestors bearing generally tribal or geographical names, as though peoples and tribes grew out of single households. The same principle is applied to Israel, who is represented as the father of twelve sons, bearing the names of the twelve tribes, from whom in like manner sprang the various clans and families of these tribes (cf. Gn 46^{8-27}, Nu 26).

This form of representation is not peculiar to OT writers. It is the usual way in which primitive peoples explain their origin and tribal relationships. The Greeks traced their descent from Hellen, who had three sons, Dorus and Aeolus, who gave their names to the Dorians and Aeolians, and Xuthus, who through his two sons, Ion and Achæus, became the forefather of the Ionians and Achæans. But especially is this the method of Sem. people, as is illustrated among Israel's kinsmen, the Arabs. According to their writers, the inhabitants of Arabia are 'patriarchal tribes formed by the subdivision of an original stock on the system of kinship through male descendants. A tribe was but a larger family; the tribal name was the name or nickname of a common ancestor. In process of time it broke up into two or more tribes, each embracing the descendants of one of the great ancestor's sons, and taking its name from him. These tribes were again divided and subdivided on the same principle.' 'Between a nation, a tribe, a sept or sub-tribe and a family, there is no difference on this theory, except in size and distance, from a common ancestor' (W. R. Smith, *Kinship and Marriage in Early Arabia*, pp. 3 f.). This likewise seems to have been the view in Israel, and is especially worked out in P. (Most of the genealogical tables and tribal and family lists in the Hex. belong to this document).

While in some instances tribes, clans, or families take their name from historic persons,—some Arabic clans are thus named (*Kinship*, p. 15; Sprenger, *Mohammed*, iii. p. cxxxvi, *Jour. Bibl. Lit.* vol. xi. 1892, p. 120),—in genealogical lists the founders of tribes, clans, and families are usually to be regarded as eponymous heroes, for countries and cities are frequently mentioned as parents (Mizraim Gn 10^{13}, Canaan 10^{15}, Gilead Jg 11^{1}, Hebron 1 Ch 2^{43}, *et al.*). Under the form of family experience are given events of tribal life (Gn 38. See G. A. Smith, *Hist. Geog.* p. 289; Stade, *Gesch.* i. pp. 157 f.; Moore on Jg $1^{14\text{-}15}$). Elder sons prob. represent earlier or more powerful tribes and families; marriages their coalitions, the weaker being perhaps the wife, and an inferior a concubine; untimely deaths their disappearances; different relationships of the same person political or geographical changes or different traditions (cf. Stade, *Gesch.* i. p. 30). But many genealogical stories and relationships originated evidently in folk-tales, and hence they present a mingling of fact and fancy, and the relationships of father, mother, wife, son, daughter, etc., cannot be interpreted upon any uniform theory in respect to the precise meaning of each.

Where pedigrees for generations of remote antiquity are given (Gn 5. $11^{10\text{-}26}$, 1 Ch $2^{9\text{-}12}$ $6^{1\text{-}48}$ *et al.*), they probably do not rest upon authentic records, but are artificial.

'Life in the Orient is much too unsafe, and the changes much too great, for one to expect to find family records of several centuries. Moreover, in the desert [and so generally under nomadic conditions which Israel for centuries experienced] family archives are unimaginable, and it is sheer nonsense to believe that all the branches of a family tree could be preserved by memory' (Sprenger, *Mohammed*, iii. p. cxli).

This statement, made in view of Arabian genealogies, is equally applicable to those of early mankind and Israel. These, too, when they present a continuous line of descent from father to son, are the conjectures of later ages (see CHRONOLOGY OF OT). They are, however, not the fruit of a spirit of deception, but of good faith with poetic imagination in vindicating family rights and privileges, and religious institutions, or in glorifying the family and national and religious heroes. The impulse for the formation of such pedigrees is synchronous with the stress laid upon purity of descent and the actual keeping of family genealogies. The names introduced were not usually inventions, but taken from legend and story, representing often historical persons, families, and conditions.

These artificial pedigrees abound in Arabic genealogies (see Sprenger), and also occur in Jewish writings—for example, the *Seder Olam sutta.* (Zunz, *Gottesdienstliche Vorträge*, Berlin, 1892, pp. 142 ff.; Asher, *Itiner. of Benj. of Tudela*, vol. ii. pp. 6 ff.).

B. THE GENEALOGICAL LISTS OF THE TWELVE TRIBES.—These lists are found almost exclusively in Gn $46^{8\text{-}24}$, Ex $6^{14\text{-}26}$, Nu $26^{5\text{-}62}$, 1 Ch 1–9. They exhibit different sources, and have suffered much in transcription, especially those in Chronicles, so that we often have little more than a confused mass of names, which defy any proper genealogical treatment. The genealogies are partially figurative and artificial, and partially genuine family records; but where the exact line is to be drawn between those due to fancy or theory and those due to records cannot always be determined. In some instances there may be a commingling of both elements. The whole history behind these genealogies is very obscure; hence the explanatory notes, when they depart from a recital of mere facts, must be received as tentative. The lists are prepared also primarily for the purpose of locating OT proper names in this Dictionary, and many names are given which probably represent no real persons or families, but have arisen from textual errors.

N.B. The tribes are indicated by Rom. numerals. The various lists under each tribe, grouped by generations, pedigrees, or other classifications given in OT, are numbered with Arabic numerals, providing a means of cross-reference. Heavy (Clarendon) type indicates the father of the person or persons whose name or names immediately follow. Italics indicate a son of the preceding and the father of the succeeding (a continuous line of descent from father to son is indicated by a succession of names in italics). The child or children of the person named in heavy type or italics immediately preceding are given in ordinary type. Mothers' names are placed in brackets before their children. The following abbreviations are used: d. daughter, f. father or father of, m. mother, s. son of, ss. sons of.

Since these lists are found mainly in 1 Ch, the following abbreviations are used referring to its literature:

Be. = E. Bertheau in *Kgf. Handb.* 1873; Ke. = C. F. Keil in *Bible Comm.* [1872]; Ki. = R. Kittel in the *Sacred Books of the OT*, a critical edition of the Heb. Text, 1895; Kau. = E. Kautzsch in *Die Heilige Schrift d. a. T. übersetzt und herausgegeben*, 1894; Oe. = S. Oettli in *Kgf. Komm.* 1889; Sm. = R. Smend, *Die Listen der Bücher Ezra und Nehemiah*, 1881; We. = J. Wellhausen, *De Gentibus et Familiis Judæis quæ* 1 *Chr.* 2. 4. *enumerantur*, 1870; We. *Prol.* = J. Wellhausen, *Prolegomena to the History of Israel*, 1885; Zoe. = O. Zoeckler in *Lange's Commentary*, 1876. [Unfortunately, Gray's *Studies in Heb. Proper Names* and Hommel's *Anc. Heb. Tradition* both appeared too late for use in the present article].

Jacob: (m. Leah) Reuben (I.), Simeon (II.), Levi (III.), Judah (IV.), Issachar (V.), Zebulun (VI.), d. Dinah; (m. Rachel) Joseph (Manasseh and Ephraim) (VII.^{ab}), Benjamin (VIII.); (m. Bilhah) Dan (IX.), Naphtali (X.); (m. Zilpah) Gad (XI.), Asher (XII.), Gn $35^{22b\text{-}26}$, cf. 29^{31}–30^{24} 35^{18} $46^{8\text{-}25}$ $49^{2\text{-}27}$, Ex $1^{1\text{-}5}$ etc.

This genealogy is a reflection of a more or less artificial division of Israel into twelve tribes (cf. the twelve sons of Ishmael, Gn $25^{13\text{-}16}$). The history and the sentiment which occasioned such a motherhood, as well as the order of birth of these tribes, and the placing of a daughter among them, is only partially clear (see ISRAEL, and Stade, *Gesch.* i. 145 ff.).

I. 1. **REUBEN:** Hanoch, Pallu (2), Hezron, Carmi, Gn 46^{9}, Ex 6^{14}, Nu $26^{5f.}$, 1 Ch 5^{3}.

2. **Pallu** (1): *Eliab*, Nemuel, Dathan, Abiram, Nu $26^{8f.}$.

3. —— *Joel* (4)?, *Shemaiah*, *Gog*, *Shimei*, *Micah*, *Reaiah*, *Baal*, Beerah, 1 Ch $5^{4ff.}$.

4. —— *Joel* (3)?, *Shema*, *Azaz*, Bela, 1 Ch 5^{8}.

5. —— Jeiel, Zechariah, 1 Ch 5^{7}.

Hanoch, Pallu, Hezron, and Carmi are names of clans (Nu 26^{5}), of which we know nothing further. Hanoch appears also as a clan of Midian (Gn 25^{4}), and Hezron as one of Judah (Nu 26^{21}); Nemuel is mentioned only in this connexion. For Dathan and Abiram see KORAH. The relation of Joel to any of the four sons of Reuben is not given. Ki., after Sam. and Arab. VSS, removes Joel and inserts Carmi, but the Joel of vv.^{4} and ^{8} may be the same (Be.); Shema (v.^{8}) = Shemaiah or Shimei. Beerah (1 Ch 5^{6}) was a prince of the Reubenites, carried away by Tiglath-pileser. Bela, with whom Jeiel and Zechariah are associated, represented a powerful clan, occupying a wide extent of territory (1 Ch $5^{8f.}$).

II. 1. **SIMEON:** Jemuel,* Jamin, Ohad,† Jachin,‡ Zohar,§ (m. Canaanitess) Shaul (2), Gn 46^{10}, Ex 6^{15}, Nu $26^{12\text{-}14}$, 1 Ch 4^{24}.

2. **Shaul** (1): *Shallum*, *Mibsam*, *Mishma*, *Hammuel*, *Zaccur*, *Shimei*, sixteen sons and six daughters, 1 Ch $4^{25\text{-}27}$.

3. [A list of princes], Meshobab, Jamlech, Joshah, (s. Amaziah) Joel, Jehu, (s. Joshibiah, s. Seraiah, s. Asiel) Elioenai, Jaakobah, Jeshohaiah, Asaiah, Adiel, Jesimiel, Benaiah, Ziza, (s. Shiphi, s. Allon, s. Jedaiah, s. Shimri, s. Shemaiah) 1 Ch $4^{34\text{-}38}$.

4. —— *Ishi*, Pelatiah, Neariah, Rephaiah, Uzziel, 1 Ch 4^{42}.

The descent of Shaul from a Canaanitess mother (Gn 46^{10}, Ex 6^{15}) implies a clan of mixed Isr. and Can. elements. Nothing further than their mention is known of the other clans. (On the early disappearance of Simeon see SIMEON). Mibsam and Mishma (2) are names also of Ishmael's descendants (Gn 25^{14}, 1 Ch 1^{29}), and suggest a mingling of Simeonites with the Arabians. The princes (3) represent families of shepherds which, in the reign of Hezekiah, had conquered for themselves a dwelling-place near Gerar (1 Ch $4^{39\text{-}41}$, Gedor MT, Gerar LXX, Ki.). The sons of Ishi are captains who went to Mt. Seir, and, smiting the Amalekites, abode there (1 Ch $4^{42.\,43}$).

We. (*Prol.* pp. 212 f.) doubts the historicity of the Chronicler's notices of the continued existence of the tribes of Reuben and Simeon during the Heb. monarchy; Stade also, that of Simeon (*Gesch.* i. p. 155). On the other hand, Graf thought that the tribes had not entirely died out, and saw historical movements of their remnants in the Chronicler's statements (*Der Stamm Simeon*, pp. 22 ff.). This is more probable.

§ Zerah, 1 Ch 4^{24}.

III. 1. **Levi**: Gershon (2) (3),* Kohath (9), Merari (31), Gn 46^{11}, Ex 6^{16}, Nu 3^{17} 26^{57}, 1 Ch $6^{1.\ 16}$ 23^{6}.

2. **Gershon** (1) (3): Libni (6), (Ladan (7)), Shimei (8), Ex 6^{17}, Nu 3^{18}, 1 Ch 6^{17} 23^{8}.

Libni and Ladan (1 Ch 23^{7-9} 26^{21}) evidently represent the same clan. Libni is derived from the priestly city Libnah. Why Ladan (לַעְדָּן) should be its equivalent is not clear. Possibly Laadah (לַעְדָּה) (1 Ch 4^{21})—if a town—and Libnah were identical, and Ladan (לַעְדָּן) is to be connected with the former. Or Ladan may have been a pure clan or family name, and Libni one taken from place of residence.

3. **Gershon** (1) (2): *Jahath*, *Shimei*, *Zimmah*, *Ethan*, *Adaiah*, *Zerah*, *Ethni*, *Malchijah*, *Baaseiah*, *Michael*, *Shimea*, *Berechiah*, *Asaph*, Zaccur (4), Joseph, Nethaniah, Asharelah,† 1 Ch 6^{39-43} 25^{2}.

The pedigree of Asaph the singer (see Asaph). His four sons, acc. to the Chronicler, were appointed by David for the service of song in the house of the Lord (1 Ch $25^{1f.}$). See also (6), and see notes under (22^{ab}).

4. **Zaccur** (3):‡ *Micaiah*,§ *Mattaniah* (5), *Shemaiah*, *Jonathan*, Zechariah, Neh 12^{35}.

The pedigree of Zechariah, a musician who, with his brethren, *i.e.* fellow musicians, Shemaiah, Azarel, Milalai, Gilalai, Maai, Nethanel, Judah, Hanani, took part in the dedication of the wall of Jerus. (Neh 12^{27-36}); Mattaniah in this pedigree evidently corresponds to the M. who was 'chief to begin the thanksgiving in prayer' (Neh 11^{17}); mentioned also as a resident of Jerus. (1 Ch 9^{15}).

5. **Mattaniah** (4): *Hashabiah*, *Bani*, Uzzi, Neh 11^{22}.

The pedigree of Uzzi, an overseer of the Levites at Jerus. (Neh 11^{22}), whose descent is given thus from Mica (Micaiah) (4), of the sons of Asaph. Another line of descent from a Mattaniah of the ss. Asaph is given in 2 Ch 20^{14}, viz. Mattaniah: *Jeiel*, *Benaiah*, *Zechariah*, Jahaziel. Jahaziel was the Levite who encouraged, by divine inspiration, Jehoshaphat and his people, prior to the battle with the children of Ammon, Moab, and Mt. Seir (2 Ch $20^{14ff.}$).

6. **Libni** (2): *Jahath*, *Zimmah*, *Joah*, *Iddo*, *Zerah*, Jeatherai, 1 Ch $6^{20f.}$.

Jeatherai (יְאָתְרַי), otherwise unknown, is evidently Ethni (אֶתְנִי) (v.^{26}), and (6) is a fragment of a pedigree of Asaph (3). (Cf. the similar names; so Be.; Zoe. rejects this assumption). Iddo (עִדּוֹ) prob.=Adaiah (עֲדָיָה); Joah (יוֹאָח), perhaps through textual corruption=Ethan (אֵיתָן).

7. **Ladan** (2): Jehiel, Zetham, Joel, (ss. Shimei) Shelomoth, Haziel, Haran, 1 Ch $23^{8f.}$, cf. 26^{22}.

8. **Shimei** (2): Jahath, Zina,‖ Jeush, Beriah, 1 Ch 23^{10}.

These 'sons' (7) and (8) of Ladan and Shimei, acc. to the Chronicler, represented Levitical houses of the time of David. Zetham and Joel (7), as the sons of Jehieli, were placed over the treasuries of the house of the Lord (1 Ch 26^{22}). The introduction of ss. Shimei (7) as subordinate to Ladan (1 Ch 23^{9}) is difficult of explanation. Probably genealogies varied; cf. Jahath s. Libni in (6), and Shimei s. Jahath in (3).

9. **Kohath** (1): Amram (10), Izhar (21), Hebron (27), Uzziel (28), Ex 6^{18}, Nu 3^{19}, 1 Ch $6^{2.\ 18}$ 23^{12}.

10. **Amram** (9): (m. Jochebed) Aaron (11), Moses (18), Miriam, Ex 6^{20}, Nu 26^{59}, 1 Ch 6^{3} 23^{12}.

11. **Aaron** (10): Nadab, Abihu, Eleazar (12), Ithamar, Ex 6^{23}, Nu 26^{60}, 1 Ch 6^{3} 24^{1}.

12. **Eleazar** (11): *Phinehas*, *Abishua*, *Bukki*, *Uzzi*, *Zerahiah*, *Meraioth*, *Amariah*, *Ahitub*, *Zadok*, *Ahimaaz*, *Azariah*, *Johanan*, *Azariah*, *Amariah*, *Ahitub*, *Zadok*, *Shallum*, *Hilkiah*, *Azariah*, *Seraiah*, Jehozadak,¶ 1 Ch 6^{4-14}, cf. Ezr 7^{1-5} *i.c.* (14).

Eleazar, with whom this pedigree starts, was, according to P, Aaron's successor (Nu 20^{28}), and priest at the time of the conquest of Canaan (Jos 14^{1}). Phinehas is mentioned as his son and successor (Jos 24^{33}, Jg 20^{28}). Seraiah the f. Jehozadak, with whom this pedigree closes, was chief priest at the fall of Jerus. (B.C. 586), and was taken captive and put to death at Riblah (2 K 25^{18-21}), while Jehozadak went into captivity (1 Ch 6^{15}).

‖ Zizah, 1 Ch 23^{11}.

¶ Jozadak, Ezr 3^{4} *et al.*

Hence this pedigree, according to the Chronicler's view (that of P) of the origin of Israel's religious institutions, was designed to furnish a list of high priests from the entrance into Canaan until the Captivity.* As such a list, this line of descent presents certain striking features. (1) There is no mention of the line of priesthood, Eli: *Phinehas*, *Ahitub*, *Ahimelech*, Abiathar (1 S 14^{3} 22^{20}), unless Ahitub f. Zadok (v.^{8}) is identical with Ahitub f. Ahimelech. This, however, is improbable, since the removal of Abiathar, in whose place Zadok was established, is regarded as a fulfilment of the prophecy of the disestablishment of the house of Eli (1 K $2^{27.\ 35}$).†

(2) Jehoiada (2 K 11^{9}, 2 Ch 22^{11}, etc.), and Urijah (2 K $16^{11ff.}$), are not mentioned, and the order of the priests appears incorrect. Amariah was chief priest in the reign of Jehoshaphat (2 Ch 19^{11}). The next priests mentioned in the historical books are Azariah in the reign of Uzziah (2 Ch 26^{20}), and Hilkiah in the reign of Josiah (2 K 22^{4}, 2 Ch 34^{9}). In this list, however, there is no Azariah between Amariah and Hilkiah.

(3) The number of priests, including Aaron, from the Exodus to the Captivity, is exactly 23. Allowing forty years, or a generation, for each, this gives $40\times12+40\times11$ years. Now, according to the artificial chronology of P, Jg, 1 and 2 K, 1 and 2 Ch (see Chronology of OT), 480 years elapsed from the Exodus to the founding of Solomon's temple (1 K 6^{1}), and 480 years from thence to the founding of the second temple, and the Captivity occurred in the eleventh generation of this second period. Hence these 22 names seem chosen to fit exactly into this chronological scheme. This is still further seen in the statement—transferring 10^{b} to 9^{b} (Be. Oe. Zoe.)—that Azariah the 13th priest (including Aaron) ministered in Solomon's temple.

(4) There is a surprising number of names occurring more than once. Such repetition, while possible in a genuine pedigree, has decidedly a suspicious look, as though the names were used simply to represent so much time.

Hence, in view of these facts, it is evident that this list of names, covering many centuries, does not rest entirely upon historical records, but, as a whole, is artificial. This accords with the modern critical view of the late origin of the Levitical law and institutions (*OTJC*, Lect. ix.-xiii.; *LOT*^{6} pp. 126-159). The explanation of Josephus mentioned is not based upon facts, but is a mere surmise. That this list should not be in harmony with statements elsewhere in 1 and 2 Ch shows that it probably did not originate with the author of Chronicles, but represented a notion about the line of priests, varying from that which he elsewhere followed. Ki. assigns it to the subsequent additions of 1 and 2 Ch. (On this list see We. *Prol.* pp. 222 ff.).

13. **Jehozadak** (12): *Jeshua*, *Joiakim*, *Eliashib*, *Joiada*, *Jonathan*, Jaddua, Ezr 3^{2}, Neh $12^{10f.}$.

This genealogy brings the list of high priests down to the time of Alexander the Great (Josephus, *Ant.* XI. viii. 4).

14. **Aaron** (10): *Eleazar* (11), *Phinehas* (12), *Abishua*, *Bukki*, *Uzzi*, *Zerahiah*, *Meraioth*, *Azariah*, *Amariah*, *Ahitub*, *Zadok*, *Shallum*, *Hilkiah*, *Azariah*, *Seraiah*, *Ezra*, Ezr 7^{1-5}.

This ancestry of Ezra, the priest and scribe (see Ezra), is evidently the same as that of Jehozadak (12) given in a shorter form. Ezra appears to have been a descendant, probably a great-grandson, of Seraiah f. Jehozadak, through a younger brother. Of similar descent is Azariah (Seraiah, Neh 11^{11}) s. Hilkiah, s. Meshullam (=Shallum), s. Zadok, s. Meraioth, s. Ahitub, mentioned among the priests residing in Jerus. (1 Ch 9^{11}, Neh 11^{11}). Seraiah is probably the correct reading, since the substitution of Azariah might be suggested by 1 Ch 6^{13}, but not the converse. The two names appear, however, elsewhere interchanged (cf. Ezr 2^{2} with Neh 7^{7}). This Seraiah represented a division of the post-exilic priests in Jerus. (Neh $11^{11f.}$). That he should belong to the high priest's family has been thought striking (Sm. p. 8).

15. Jehoiarib, Jedaiah, Harim, Seorim, Malchijah (16), Mijamin, Hakkoz, Abijah, Jeshua, Shecaniah, Eliashib, Jakim, Huppah, Jeshebeab, Bilgah, Immer (17), Hezir, Happizzez, Pethahiah, Jehezkel, Jachin, Gamul, Delaiah, Maaziah, 1 Ch 24^{7-18}.

---

* The observation on Azariah in v.^{10} also shows this.

† The Jewish explanation of these facts, given by Josephus, is that the family of Phinehas s. of Aaron, represented in (12), at first held the high priesthood, and afterwards it was transferred in Eli to the family of Ithamar s. Aaron, who held the priesthood until Zadok's establishment, which restored it again to the family of Phinehas, which had in the meantime been in private life (Jos. *Ant.* v. xi. 5, VIII. i. 3). This explanation has usually been received. (Ke. thinks that after the slaughter of the priests at Nob the tabernacle was moved to Gibeon, and the high priesthood intrusted to Zadok's father, and thus, during the reign of David, Zadok was priest at Gibeon [1 Ch 16^{39}], and Abiathar at Jerusalem). The Chronicler evidently held to this double line of priests, for he says that both Eleazar and Ithamar executed the priest's office, and places Zadok as the representative of the former and Ahimelech (evidently Abiathar s. Ahimelech) as representing the latter at the time of David (1 Ch $24^{1ff.}$).

These are the names of the heads of the twenty-four courses of priests, sixteen taken from the ss. Eleazar and eight from the ss. Ithamar, who, acc. to the Chronicler, were assigned by David for service in the house of the Lord. Jehoiarib, Jedaiah, and Jachin appear also among the priests or priestly families of the post-exilic inhabitants of Jerus. (1 Ch 9^{10}, Neh 11^{10}).

16. **Malchijah** (15): *Pashhur*, *Jeroham*, Adaiah, 1 Ch 9^{12}.

17. **Immer** (15): *Meshillemith*, *Meshullam*, *Jahzerah*, *Adiel*, Maasai, 1 Ch 9^{12}, cf. Neh 11$^{12f.}$.

Adaiah (16) and Maasai (עֲמַשְׁסַי=מַעְשַׂי Amashsai, Neh 11^{13}) (17) are among the post-ex. priests or priestly families of Jerusalem. In Neh 11$^{12f.}$ the pedigrees are slightly different, *i.e.* **Malchijah**, *Pashhur*, *Zechariah*, *Amzi*, *Pelaliah*, *Jeroham*, Adaiah; **Immer**, *Meshillemoth*, *Ahzai*, *Azarel*, Amashsai.

18. **Moses** (10): Gershom (19), Eliezer (20), Ex 18$^{3f.}$, 1 Ch 23^{15}.

19. **Gershom** (18): *Shebuel*,* Jehdeiah, 1 Ch 23^{16}, 24^{20}.

20. **Eliezer** (18): *Rehabiah*, *Isshiah*,† *Joram*, *Zichri*, Shelomoth, 1 Ch 23^{17} 24^{21} 26^{25}.

Of these descendants of Moses, who, acc. to the Chronicler, represented Levites of the time of David, Shebuel (19) and Shelomoth (20) were rulers of the treasuries. A certain confusion appears in the different lengths of descent assigned to each, and in the fact that Jehdeiah (19) and Isshiah (20) appear as their contemporaries (see ref.). The LXX obviates this by reading Eliezer, Rehabiah, Isshiah, Joram, Zichri, Shelomoth (1 Ch 26^{25}).

21. **Izhar** (9): Korah (22^{ab}), Nepheg, Zichri, Ex 6^{21}.

22^{a}. **Korah** (21): *Assir*, *Elkanah*, *Ebiasaph* (24), *Assir*, *Tahath*, *Uriel*, *Uzziah*, *Shaul* [*Elkanah*], *Amasai*, *Ahimoth* (ss. *Elkanah*), *Zophai*, *Nahath*, *Eliab*, *Jeroham*, *Elkanah*, *Samuel* (LXX), Joel (Syr. RV), Abiah, 1 Ch 6$^{22-28}$.

Korah in this list appears as the son of Amminadab (see below).

22^{b}. **Korah** (21): *Ebiasaph* (24), *Assir*, *Tahath*, *Zephaniah*, *Azariah*, *Joel*, *Elkanah*, *Amasai*, *Mahath*, *Elkanah*, *Zuph*, *Toah*, *Eliel*, *Jeroham*, *Elkanah*, *Samuel*, *Joel*, Heman (23), 1 Ch 6$^{33-38}$.

These two lines of descent (22^{a}) and (22^{b}) are evidently the same (Be. Zoe. Oe.), as may be clearly shown by placing the names in parallel columns side by side.

(22^{a}).	(22^{b}).
Amminadab.	Izhar.
Korah.	Korah.
Assir Elkanah Ebiasaph.	Ebiasaph.
Assir.	Assir.
Tahath.	Tahath.
Uriel.	Zephaniah.
Uzziah.	Azariah.
Shaul.	Joel.
Elkanah.	Elkanah.
Amasai.	Amasai.
Ahimoth.	Mahath.
Elkanah.	Elkanah.
Zophai.	Zuph.
Nahath.	Toah.
Eliab.	Eliel.
Jeroham.	Jeroham.
Elkanah.	Elkanah.
Samuel.	Samuel.
{Joel.	Joel.
Abiah.	Heman.

In respect to the variations: Amminadab appears in Ex 6^{23} as the father-in-law of Aaron, and may have been placed for Izhar in (22^{a}) through an oversight. Assir and Elkanah are either redundant in (22^{a}) through a similar cause or have fallen out from (22^{b}). Uriel and Zephaniah are difficult to explain as equivalents. The names Uzziah and Azariah are interchangeable (as in the case of the well-known king of Judah). The differences between the other corresponding names have probably arisen through transcription. The context clearly demands the addition of 'Samuel his son' in v.^{27} and 'Joel' in v.^{28}.

This pedigree is clearly artificial. A portion of its construction comes from 1 S 1^{1}, where Elkanah is mentioned as s. Jeroham, s. Elihu, s. Tohu, s. Zuph. Zuph is probably a district, and Tohu (Toah Nahath) a family (cf. Tahath 1 Ch 7^{20}; We. *Prol.* p. 220). The story of Samuel shows distinctly that he was not a Levite, for then he would have belonged to the Lord without the gift of his mother (1 S 1$^{27f.}$). He is made a Levite by the Chronicler according to the notions of his own times respecting Samuel's service at the sanctuary.

The motive for this pedigree of Heman, and also those of Asaph (3) and Jeduthun (Ethan) (35), is very apparent. At the time of the Chronicler there were three guilds of singers, named after Asaph, Heman, and Ethan (1 Ch 6$^{31ff.}$) or Jeduthun (1 Ch 25^{1}), reckoned as belonging to the three great Levitical houses of Gershon, Kohath, and Merari. The Chronicler assumes that this organization of singers dated from David, but in reality it was quite modern, for, according to Ezr 2^{41} Neh 7^{44}, ss. Asaph and singers were equivalent, and the singers were distinct from the Levites. (This distinction is held by Sm. p. 26; *OTJC*^{2} p. 204; Baudissin, *Gesch. des A. T. Priesterthums*, p. 142 ff.; Nowack, *Heb. Arch.* ii. p. 111; on the other hand, Torrey claims that no such distinction can be found in Ezr and Neh., *Comp. and Hist. Value of Ezr and Neh*, p. 22 f.). Gradually, however, singers were evolved into Levites and the three guilds. Remains of steps of this evolution and fluctuating traditions appear in the Levitical genealogies. In Ex 6^{21} the three ss. Korah are Assir, Elkanah, and Abiasaph (=Ebiasaph), *i.e.* f. Asaph, and hence we should expect to find Asaph a descendant of Korah, but, according to (3), he is not. Also we find Assir and Elkanah placed not co-ordinate but following each other (21^{ab}). Different genealogists certainly worked over these names. (22^{a}) (22^{b}) are assigned by Ki. to different sources; (22^{a}) to the older. The ss. Korah appearing in the titles of the Ps (42. 44–49. 84. 85. 87. 88) probably mark a step in this evolution earlier than the formation of the three guilds. Korah in 1 Ch 2^{43} is associated with Tappuah as a son of Hebron. This indicates either a place or Judæan family of that name from whose Levites originated the Levitical Korahites (We. *Is. und Jüd. Gesch.* p. 151 f.).

23. **Heman** (22^{b}): Bukkiah, Mattaniah, Uzziel,* Shebuel,† Jerimoth, Hananiah, Hanani, Eliathah, Giddalti, Romamti-ezer, Joshbekashah, Mallothi, Hothir, Mahazioth, 1 Ch 25^{4}.

These fourteen sons of Heman were appointed by David, acc. to the Chronicler, for the service of song in the house of the Lord (1 Ch 25$^{6. 9-31}$). This list of names is most interesting, since prob. from Hananiah (חֲנַנְיָה חֲנָנִי אֱלִיאָתָה), certainly from Giddalti (גִּדַּלְתִּי וְרֹמַמְתִּי עֶזֶר יָשְׁבְּקָשָׁה מַלּוֹתִי הוֹתִיר מַחֲזִיאוֹת), they are a fragment of a hymn or psalm which perhaps originally read: 'Be gracious to me, J″; be gracious to me! thou art my God. I have magnified and exalted the help of him sitting in distress, I have declared abundantly visions' (חָנֵּנִי יָהּ חָנֵּנִי אֵלִי אַתָּה גִּדַּלְתִּי וְרֹמַמְתִּי עֶזֶר יֹשֵׁב קָשָׁה מַלּוֹתִי הוֹתִיר מַחֲזִיאוֹת). There is some doubt about the exact rendering and construction of these lines (cf. Ewald, *Ausführ. Lehrbuch d. Heb. Sprache*, p. 680; *ZAW*, 1886, p. 260; We. *Prol.* p. 219; Oe. Kau. Ki. *in loco*), but none about the names, at least the last six, being fashioned out of such a prayer or meditation.

24. **Ebiasaph** (22^{ab}): *Kore*, Shallum, Meshelemiah ‡ (25), 1 Ch 9^{19} 26^{1}.

25. **Meshelemiah** ‡ (24): Zechariah, Jediael, Zebadiah, Jathniel, Elam, Jehohanan, Eliehoenai, 1 Ch 26$^{2f.}$.

In (24) (25) we have families of porters or door-keepers assigned by the Chronicler to the time of David. It is possible that Shallum and Meshelemiah or Shelemiah represent the same person or family (Be. Oe.). M.'s descent is given through Kore from Asaph (1 Ch 26^{1}), evidently to be read Ebiasaph (LXX B, Ki. RVm). With Shallum are associated Akkub, Talmon, and Ahiman (1 Ch 9^{17}). Akkub and Talmon appear as porters in post-exilic Jerus. (Neh 11^{19}). Zechariah (25) is mentioned 1 Ch 9^{21}.

The Chronicler doubtless designed also that Obed-edom the door-keeper, with his sons Shemaiah, Jehozabad, Joah, Sacar, Nethanel, Ammiel, Issachar, and Peullethai, and the ss. Shemaiah, Othni, Rephael, Obed, Elzabad, Elihu, and Semachiah, should be enrolled among the Korahites (1 Ch 26$^{4-7. 19}$) (Ke. Zoe.), although Obed-edom's descent from Jeduthun (1 Ch 16^{38}) would suggest that he belonged to the Merarites. That this Obed-edom is intended to represent Obed-edom the Gittite (2 S 6$^{10f.}$, 1 Ch 13^{13}), transformed, like Samuel (22^{ab}), into a Levite, is most probable, although the contrary has been maintained. (Ke. also distinguishes between the singer Obed-edom and the door-keeper Obed-edom (1 Ch 15$^{21. 24}$)).

26. —— : *Shelomoth*,§ Jahath, 1 Ch 24^{22}.

These are mentioned as Izharites of the time of David. Their descent is not given more specifically.

27. **Hebron** (9): Jeriah,‖ Amariah, Jahaziel, Jekameam, 1 Ch 23^{19} 24^{23}.

These Hebronites are mentioned as serving in the house of the Lord at the time of David (1 Ch 23^{24}). In the family of Hebron we may have a perpetuation of the old line of priests, subordinated into Levites, who originally ministered at the sanctuary of Hebron; at any rate the name must be associated with Levites residing in Hebron. Jeriah (Jerijah) is mentioned in 1 Ch 26$^{31ff.}$ as the chief whose brethren were appointed by David overseers of the Reubenites, Gadites, and the half-tribe of the Manassites 'for every matter pertaining to God and for the affairs of the king.' A Hashabiah of the Hebronites, with his brethren, is given a similar position of 'oversight of Israel beyond Jordan westward' (v.^{30}). Eliel is mentioned as the chief of the Hebronites at the removal of the ark (1 Ch 15^{9}).

---

* Shubael, 1 Ch 24^{20}.
† Jeshaiah, 1 Ch 26

* Azarel, 1 Ch 25^{18}.
† Shubael, 1 Ch 25^{20}.
‡ Shelemiah, 1 Ch 26^{14}.
§ Shelomith, 1 Ch 23^{18}.
‖ Jerijah, 1 Ch 26^{31}.

28. **Uzziel** (9): Mishael, Elzaphan, Sithri, Ex 6^{22}; Micah (29), Isshiah (30), 1 Ch 23^{20} $24^{24f.}$.

Sithri is mentioned only in Ex 6^{22}. Mishael and Elzaphan in Lv 10^{4} are commanded to carry out of the camp the bodies of Nadab and Abihu. Elizaphan (=Elzaphan) in Nu 3^{30} is appointed prince of the families of the Kohathites. As a family name it appears in 1 Ch 15^{8}, 2 Ch 29^{13}. To Micah and Isshiah is assigned general Levitical service along with the Hebronites (27) (see above).

29. **Micah** (28): Shamir, 1 Ch 24^{24}.
30. **Isshiah** (28): Zechariah, 1 Ch 24^{25}.

Nothing special is assigned to these Uzzielites (29) (30), who are given among ss. Levi of the time of David (see ref.). An Amminadab was the chief of the Uzzielites at the time of the removal of the ark (1 Ch 15^{10}).

31. **Merari** (1): Mahli (3^{2}) (35^{ab}), Mushi (34), Jaaziah? (38), Ex 6^{19}, Nu 3^{20}, 1 Ch 6^{19} 23^{21} 24^{26}.

It is possible that the family Mushi (מוּשִׁי) derived their name from Moses (מֹשֶׁה) (We. *Is. und Jüd. Gesch.* p. 151 f.). On the appearance of Jaaziah, among ss. Merari, mentioned in 1 Ch 24^{26}, see below (38).

32. **Mahli** (31): Eleazar, Kish (33), 1 Ch 23^{21}.
33. **Kish** (32): Jerahmeel, 1 Ch 24^{29}.
34. **Mushi** (31): Mahli (35), Eder, Jerimoth, 1 Ch 24^{30}.

These Merarites (31)-(34) are recorded as in general Levitical service at the time of David (see ref. and 1 Ch 23^{24} 24^{31}).

35^{a}. **Mahli** (34): *Shemer, Bani, Amzi, Hilkiah, Amaziah, Hashabiah, Malluch, Abdi, Kishi,** Jeduthun (Ethan) (36) (37), 1 Ch 6^{44-47}.

Instead of Jeduthun we have the name Ethan in 1 Ch 6^{47}, but both names are undoubtedly designed to indicate one and the same person (Be. Ke. Oe. Zoe.). Cf. on this pedigree the remarks on 22^{ab}.

35^{b}. **Mahli** (31) or (34): *Libni, Shimei, Uzzah, Shimea, Haggiah,* Asaiah, 1 Ch $6^{29f.}$.

The pedigree of an otherwise unknown Asaiah. Be. regards it as a fragment, in spite of the great difference of names, representing originally the same line of descent as that seen in the first members of 35^{a}. Ke. Zoe. and Oe. reject this hypothesis.

36. **Jeduthun** (35^{a}): Gedaliah, Zeri,† Jeshaiah, Hashabiah, Mattithiah, Shimei, 1 Ch 25^{3}.

These six sons (Shimei is derived from 1 Ch 25^{17}), with their father, were assigned by David, acc. to the Chronicler, to the service of song in the house of the Lord (ref.).

37. **Jeduthun** (35^{a}): *Galal, Shemaiah,*‡ Obadiah,§ 1 Ch 9^{16}, Neh 11^{17}.

Obadiah is mentioned among the Levites residing in Jerus. after the Exile (ref.).

38. **Jaaziah** (31), Beno? Shoham, Zaccur, Ibri, 1 Ch 24^{27}.

Beno (בְּנוֹ 'his son,' LXX, Vulg. RV) arises from a clear misunderstanding of the Heb. text, and should be struck out of the list of sons. It is the common noun (בֵּן) with the pronominal ending, and should be rendered 'his son,' *i.e.* Jaaziah is the son of Merari. The MT is difficult and probably corrupt (see Be. Oe. Ki.). Ke. and Zoe. regard the referenees to Jaaziah and his sons as a gloss. The name Ibri (עִבְרִי) 'Hebrew,' is noticeable, and shows at once that we are in a post-exilic or relatively late period of Israel's history.

39. **Hosah**: Shimri, Hilkiah, Tebaliah, Zechariah, 1 Ch $26^{10f.}$.

Hosah of the ss. Merari (closer descent is not given), with his sons and brethren, all of whom numbered 13, is recorded among the door-keepers of the house of the Lord of the time of David. To him and Shuppim (שֻׁפִּים) was given the charge of the gate 'Shallecheth' westward. The name Shuppim, however, is a dittography from the preceding הָאֲסֻפִּים 'the storehouse,' and is to be struck out (Ki.) (1 Ch 26^{10-16}).

Additional Lists of Levites.

40. **Of the reign of David**: *a.* Uriel (ss. Kohath), Asaiah (ss. Merari), Joel (ss. Gershom), Shemaiah (ss. Elizaphan), Eliel (ss. Hebron), Amminadab (ss. Uzziel), 1 Ch 15^{5-11}.

b. Zechariah, Ben, Jaaziel,* Shemiramoth, Jehiel, Unni, Eliab, Benaiah, Maaseiah, Mattithiah, Eliphelehu, Mikneiah, Obed-edom, Jeiel, Azaziah, 1 Ch 15^{18-21}.

c. Shebaniah, Joshaphat, Nethanel, Amasai, Zechariah, Benaiah, Eliezer, 1 Ch 15^{24}.

d. Chenaniah, Berechiah, Elkanah, 1 Ch $15^{22f.}$.

The Levites (*a b c d*) are mentioned in connexion with David's removal of the ark to Jerusalem. List *a* were chiefs of the Levitical families; list *b*, the singers or musicians with psalteries and harps under the direction of Heman, Asaph, and Ethan; list *c*, priestly trumpeters. Chenaniah (*d*) was the leader of the song or the carrying up of the ark, and Berechiah and Elkanah were door-keepers, also an Obed-edom and Jehiah (1 Ch 15^{24}).

41. **Of the reign of Jehoshaphat.** Teachers of the law. (*a*) Priests: Elishama, Jehoram. (*b*) Levites: Shemaiah, Nethaniah, Zebadiah, Asahel, Shemiramoth, Jehonathan, Adonijah, Tobijah, Tobadonijah, 2 Ch 17^{8}.

42. **Of the reign of Hezekiah**: *a.* Mahath s. Amasai, Joel s. Azariah (ss. Kohath), Kish s. Abdi, Azariah s. Jehallelel (ss. Merari), Joah s. Zimmah, Eden s. Joah (Gershonites), Shimri, Jeuel (ss. Elizaphan), Zechariah, Mattaniah (ss. Asaph), Jehuel, Shimei (ss. Heman), Shemaiah, Uzziel (ss. Jeduthun), 2 Ch 29^{12-14}.

These Levites are mentioned as employed by Hezekiah in cleansing the temple after its defilement in the reign of Ahaz.

b. Rulers: Conaniah, Shimei (his brother). Overseers: Jehiel, Azaziah, Nahath, Asahel, Jerimoth, Jozabad, Eliel, Ismachiah, Mahath, Benaiah, 2 Ch $31^{12f.}$.

During the reign of Hezekiah, acc. to the Chronicler, the people contributed abundantly of tithes and firstfruits, and these men had charge of the tithes and oblations brought into the chambers of the temple (2 Ch 31^{5-13}).

c. Kore s. Imnah, Eden, Miniamin, Jeshua, Shemaiah, Amariah, Shecaniah, 2 Ch $31^{14f.}$.

Kore was the porter at the E. gate of the temple, and had charge of the free-will offerings and the distribution of the portions of the priests. Under him were the others named above, stationed in the cities of the priests to distribute the portions of the priests (2 Ch 31^{15-17}).

43. **Of the reign of Josiah**: *a.* Shaphan s. Azaliah, Maaseiah, Joah s. Joahaz, Jahath, Obadiah (ss. Merari), Zechariah, Meshullam (ss. Kohathites), 2 Ch $34^{8.\,12}$.

These persons are all mentioned in connexion with the repair of the temple. The first three, of whom Shaphan was the scribe, Maaseiah was governor of the city, and Joah (or his f. Joahaz) the recorder, seem to have had general superintendence of the work, while the other four oversaw the workmen. The first three were not necessarily Levites, and are grouped here merely for convenience of reference (2 Ch 34^{8-13}).

b. Rulers of the Temple: Hilkiah, Zechariah, Jehiel, 2 Ch 35^{8}.

c. Chiefs of the Levites: Conaniah, Shemaiah, Nethanel, Hashabiah, Jeiel, Jozabad, 2 Ch 35^{9}.

These had charge of the distribution of the offerings at the celebration of the passover kept by Josiah (2 Ch 35^{1-19}).

IV. 1. **JUDAH**: (m. Shua, Gn 38^{2-5}) Er, Onan, Shelah (2) (3); (m. Tamar, Gn 38^{6-30}), Perez (4), Zerah (59), Gn 46^{12}, Nu $26^{19f.}$, 1 Ch $2^{3f.}$.

Er and Onan are represented as dying in Canaan (Gn 38^{7-10} 46^{12}, Nu 26^{19}), implying that two of the ancient and original clans of Judah early disappeared. The Canaanite mothers, Shua and Tamar (Gn $38^{2.\,6ff.}$), indicate a union with Canaanites (see art. JUDAH).

2. **Shelah** (1): Er f. Lecah, Laadah f. Mareshah. Families of Ashbea, Jokim, men of Cozeba, Joash, Saraph, Jashubi-lehem?, 1 Ch $4^{21f.}$.

---

* Kushaiah, 1 Ch 15^{17}.
† Izri, 1 Ch 25^{17}.
‡ Shammua, Neh 11^{17}.
§ Abda, Neh 11^{17}.

* Jahaziel, 1 Ch 16^{6}.

Er here appears as the son and not the brother of Shelah. A remnant of the clan Er may have united with, and become subordinate to, that of Shelah. Mareshah is the name of a city (see Mareshah), probably also Lecah. Whether Ashbea is the name of a place or family cannot be determined. Cozeba (כֹּזֵבָא) may be Chezib (כְּזִיב Gn 38^{5}). Jashubi-lehem has arisen from a misunderstanding of the text, וַיָּשֻׁבוּ בֵּית לֶחֶם=וְיָשֻׁבִי לָחֶם 'and they returned to Bethlehem.' The Vulg., following evidently an old Jewish Midrash, renders v.^{22} *et qui stare fecit solem, virique mendacii, et Securus et Incendens, qui principes fuerunt in Moab, et qui reversi sunt in Lahem.* The whole passage (vv.$^{21-23}$) is very obscure, and probably preserves the family traditions and relationships of certain weavers and potters of the post-exilic times. The ref. to Moab and a return suggests some story similar to that of Ruth. Ki. assigns the verses to the later additions to Chronicles.

3. Shelah fam.: *Zechariah, Joiarib, Adaiah, Hazaiah, Col-hozeh, Baruch,* Maaseiah, Neh 11^{5}.

This is the genealogy of Maaseiah (מַעֲשֵׂיָה), representing a family of the inhabitants of Jerus. after the Return (Neh 11^{4}). In 1 Ch 9^{5} the name is Asaiah (עֲשָׂיָה).

4. Perez (1): Hezron (5), Hamul, Gn 46^{12}, Nu 26^{21}, 1 Ch 2^{5}.

5. Hezron (4): Jerahmeel (6), Ram (16), Chelubai (Caleb) (29) (35), 1 Ch 2^{9}.

Ram as a second son of Hezron is suspicious: (1) Because OT knows of no Judæan clan Ram co-ordinate with Caleb and Jerahmeel. (2) The descendants are given, not in families and cities, but simply in a pedigree of David. This pedigree in 1 Ch 2$^{10-15}$ appears taken from Ru 4$^{18-22}$, where Ram may have stood for Ram the son of Jerahmeel (6), the father's name being omitted (We. p. 17 f.). Yet, while the pedigree of David may be conjectural, the Chronicler is clearly nearer the truth in deriving his descent from Ram s. Hezron than from Ram s. Jerahmeel, since, according to the narrative of 1 and 2 S, David cannot have been a Jerahmeelite. That the Chronicler's Judæan genealogies should principally consist of Calebite and Jerahmeelite families, as we shall see, is probably due to the fact that family names and traditions, along with family or clan life, are held more tenaciously among rural and pastoral peoples than the inhabitants of cities or more highly organized communities.

6. Jerahmeel (5): Ram (7), Bunah, Oren, Ozem, Ahijah? (m. Atarah), Onam (8), 1 Ch 2$^{25f.}$.

Abijah (אֲחִיָּה) is either to be struck out, having arisen from a misinterpretation of an original אֲחִיהוּ or אָחִיו 'his brother' (LXX, Ki. אָחָיו 'his brothers,' We. p. 15), or held to be the mother of the preceding sons (Be. Ke. Zoe. Oe.), the original text having been 'Ozem (and his brothers) from Ahijah' (אֹצֶם מֵאֲחִיָּה). The former is preferable.

7. Ram (6): Maaz, Jamin, Eker, 1 Ch 2^{27}.

8. Onam (6): Shammai (9), Jada (14), 1 Ch 2^{28}.

9. Shammai (8): Nadab (10), Abishur (13), 1 Ch 2^{28}.

10. Nadab (9): Seled, Appaim (11), 1 Ch 2^{30}.

11. Appaim (10): *Ishi, Sheshan* (12), Ahlai, 1 Ch 2^{31}.

12. Sheshan (11): *Jarha* (son-in-law), *Attai, Nathan, Zabad, Ephlal, Obed, Jehu, Azariah, Helez, Eleasah, Sismai, Shallum, Jekamiah,* Elishama, 1 Ch 2$^{35-41}$.

This pedigree of the otherwise unknown Elishama—for he is not to be identified with others of the same name mentioned elsewhere in OT—was derived evidently from another source than that of the preceding, and (in our lists) following descendants of Jerahmeel (Ki. We. p. 18). To remove the discrepancy between the mention of Ahlai (11) and the statement (v.^{34}) that Sheshan had no sons, ignoring the fact of different sources, it has been assumed that Ahlai was a daughter (Ke. Zoe. *et al.*). Jarha is said to have been an Egyptian servant (v.^{34}). Some family represented by Elishama, probably near the time of the Chronicler, evidently traced their descent from the family or clan of Sheshan and an Egyp. individual or family who united with it. The free intercourse between Canaan and Egypt serves to confirm this statement.

13. Abishur (9): (m. Abihail) Ahban, Molid, 1 Ch 2^{29}.

14. Jada (8): Jether, Jonathan (15), 1 Ch 2^{32}.

15. Jonathan (14): Peleth, Zaza, 1 Ch 2^{33}.

This (15) completes the list of the descendants of Jerahmeel (1 Ch 2$^{25-33}$). It is evidently a record of the families of the Jerahmeelites, who are mentioned in 1 S 27^{10} as inhabiting a Negeb or south country distinct from that of Judah (see Jerahmeel). The binary form of descent suggests an artistic construction. The names Bunah, Oren, Maaz, Eker, Abishur, Ahban, Molid, Seled, Appaim, Sheshan, and Zaza, occur only in this connexion, also Ozem, except as that of a brother of David mentioned only in 1 Ch 2^{15}. Onam is the name of a family of Edom (Gn 36^{23}); Jamin of Simeon (Gn 46^{10}); Jether an Ishmaelite name (1 Ch 2^{17}), or Midianite (Ex 4^{18} RVm). (It is equivalent to Jethro). These names suggest a close relationship with these neighbours. The m. Atarah of Onam (6), the most widely extended family, probably arose from their inhabiting Ataroth or protected places (We. p. 15). The Jerahmeelites do not appear in connexion with the restoration, and the 13 generations between Sheshan and Elishama show that their families were thought of as living at least some 500 years before the time of the Chronicler. The list is probably of pre-exilic origin, and historical.

16. Ram (5): *Amminadab, Nahshon, Salma,*[*] *Boaz, Obed, Jesse*; Eliab,[†] Abinadab, Shimea,[‡] Nethanel, Raddai, Ozem, David (17), d. Zeruiah (27), d. Abigail (28), 1 Ch 2$^{10-16}$, cf. Ru 4$^{18-22}$.

Acc. to 1 S 17^{12} Jesse had eight sons (cf. 1 S 16$^{2ff.}$); Syr. has in our passage eight sons, Elihu (cf. 1 Ch 27^{18}) being the seventh.

In addition to the descendants of Jesse recorded in (17)–(28) we have Jesse, *Eliab, d. Abihail* (f. Jerimoth), *d. Mahalath* (f. Rehoboam), Jeush, Shemariah, Zaham, 2 Ch 11$^{18f.}$; or Jesse, *Eliab, d. Abihail* (f. Rehoboam), Jeush, Shemariah, Zaham, 2 Ch 11^{18} RVm. Cf. (18) note.

17. David (16): (m. Ahinoam) Amnon, (m. Abigail) Chileab, (m. Maacah) Absalom (see below), (m. Haggith) Adonijah, (m. Abital) Shephatiah, (m. Eglah) Ithream, (m. Bathsheba) Shammua, Shobab, Nathan (see below), Solomon (18), (m. unknown) Ibhar, Elishua, Nepheg, Japhia, Elishama, Eliada, Eliphelet, 2 S 3$^{2-5}$ 5$^{14-16}$, cf. 1 Ch 3$^{1-9}$ 14$^{4-7}$.

The names of the ss. David in 1 Ch 3$^{1-9}$ 14$^{4-7}$, owing in the main to erroneous transcription, are somewhat diff. from those in the earlier and more authentic source (2 S) given in (17): Daniel (3^{1}) for Chileab (see Daniel), Shimea (3^{5}) for Shammua (perhaps mere variation of spelling שִׁמְעָא, שַׁמּוּעַ), Elishama (3^{6}) for Elishua; Eliphelet (3^{6}), or Elpelet (14^{5}), Nogah (3^{7} 14^{6}), two additional names developed, one from the preceding, and the other from the following names (Ki.); Beeliada (14^{7}) for Eliada. The former probably is correct (see Beeliada). Bath-sheba, written Bathshua, is mentioned as the m. in 1 Ch 3^{5}.

Jerimoth, f. Mahalath wife of king Rehoboam is mentioned as a s. David (2 Ch 11^{18}) (16 note) (18 note). Since he does not appear elsewhere, he is thought to have been s. a concubine, unless Jerimoth (יְרִימוֹת) is a corruption of Ithream (יִתְרְעָם).

Besides the line of Solomon (18), descendants of David are given in the line of the ancestry of Joseph f. Christ traced back to Nathan (Lk 3$^{23-31}$), see Genealogy of Christ; and in Maacah d. (evidently grand d.) of Absalom (1 K 15^{2}, 2 Ch 11^{22}). Since Absalom's ss. must have died without posterity (2 S 14^{27}, 18^{18}), her mother probably was Tamar d. Absalom and father Uriel of Gibeah (2 Ch 13^{2}). She was a wife of king Rehoboam and m. of king Abijam (see (18) note).

18. Solomon (17): *Rehoboam, Abijah, Asa, Jehoshaphat, Joram, Ahaziah, Joash, Amaziah, Azariah, Jotham, Ahaz, Hezekiah, Manasseh, Amon, Josiah,* Johanan, Jehoiakim (19), Zedekiah, Shallum,[§] 1 Ch 3$^{10-15}$.

Of these ss. Josiah (1 Ch 3^{15}) Johanan is mentioned nowhere else. It looks as though he were designed to stand for Jehoahaz, Josiah's immediate successor (2 K 23^{30}), who was followed by Jehoiakim (2 K 23^{34}), and the latter, after the 3 months' reign of his son Jeconiah, by his brother Zedekiah (2 K 24^{17}). Jehoiakim, however, was older than Jehoahaz (2 K 23$^{31. 36}$), while Zedekiah was much younger than either of them, and Shallum was another name for Jehoahaz (Jer 22^{11}). Hence their order of birth is incorrectly given (1 Ch 3^{15}), and probably the writer made the further mistake, after identifying Johanan with Jehoahaz, of taking Shallum for another son; although it is possible that the eldest s. Josiah was a Johanan who may have died before his father, or with him at the battle of Megiddo.

To (18), which represents the kings of Judah in order of succession from Solomon to Josiah inclusive, the following genealogical particulars may be added:—

(*a*) Mothers of Kings.—Of Rehoboam, Naamah the Ammonitess (1 K 14$^{21. 31}$, 2 Ch 12^{13}); of Abijah,[‖] Maacah d. Absalom (1 K 15^{2}, 2 Ch 11^{20}). In 2 Ch 13^{2} she is called Micaiah d. Uriel of Gibeah, hence, as the intervening time requires, she was a grand d., at least, of Absalom (see (17) note); of Asa—no mother is given, only grandmother Maacah (1 K 15^{10}, 2 Ch 15^{16}); of Jehoshaphat, Azubah d. Shilhi (1 K 22^{42}, 2 Ch 20^{31}); of Joram, Athaliah d. (grand d.) Omri, king of Israel (2 K 8^{26}, 2 Ch 22^{2}); of Joash, Zibiah of Beersheba (2 K 12^{1}, 2 Ch 24^{1}); of Amaziah,

---

[*] Salmon, Ru 4$^{20f.}$.

[†] Elihu is mentioned as a brother of David, 1 Ch 27^{18}. Ki. reads Eliab.

[‡] Shammah, 1 S 16^{9}; Shimeah, 2 S 13^{3}.

[§] 2 K 23^{30} Jehoahaz, cf. Jer 22^{11}; but see note above.

[‖] Abijam, 1 K 15^{2}.

Jehoaddin,* of Jerusalem (2 K 14^{2}, 2 Ch 25^{1}); of Azariah,† Jecoliah † (2 K 15^{2}, 2 Ch 26^{3}); of Jotham, Jerusha d. Zadok (2 K 15^{33}, 2 Ch 27^{1}); of Ahaz, the name is not given; of Hezekiah, Abi‡ d. Zechariah (2 K 18^{2}, 2 Ch 29^{1}); of Manasseh, Hephzibah (2 K 21^{1}); of Amon, Meshullemeth d. Haruz of Jotbah (2 K 21^{19}); of Josiah, Jedidah d. Adaiah of Bozkath (2 K 22^{1}); of Jehoahaz and Zedekiah, Hamutal d. Jeremiah of Libnah (2 K 23^{31}); of Jehoiakim, Zebidah d. Pedaiah of Rumah (2 K 23^{36}); of Jeconiah (19), Nehushta d. Elnathan of Jerusalem (2 K 24^{8}).

(*b*) **Additional Sons of Kings.**—Of Rehoboam, (m. Mahalath or Abihail, see (16) note *c*) Jeush, Shemariah, Zaham, (m. Maacah) Attai, Ziza, Shelomith (2 Ch 11$^{18\text{-}20}$); of Jehoshaphat,—Azariah, Jehiel, Zechariah, Azariah(?), Michael, Shephatiah (2 Ch 21^{2}). Nothing further is known of these princes. For a d. Joram, see JEHOSHEBA.

19. Jehoiakim (18): *Jeconiah* § (20), Zedekiah, 1 Ch 3^{16}.

Some hold this Zedekiah to be identical with s. Josiah (19), the Chronicler's error or form of statement having arisen because Z. was Jeconiah's successor on the throne (We. *Prol.* p. 216).

20. Jeconiah (19): Assir (RVm)? Shealtiel, Malchiram, Pedaiah (21), Shenazzar, Jekamiah, Hoshama, Nedabiah, 1 Ch 3$^{17.\,18}$.

Assir as a proper name arose from a misunderstanding of the adj. *'assir* (אַסִּר), meaning captive (see RVm and art. ASSIR).

21. Pedaiah (20): Zerubbabel (22), Shimei, 1 Ch 3^{19a}.

In Ezr 3$^{2.\,8}$ 5^{2}, Neh 12^{1}, Hag 1$^{1.\,12.\,14}$ 2$^{2.\,23}$, cf. Mt 1^{12}, Lk 3^{27}, Zerubbabel (wh. see) is called the son of Shealtiel. Pedaiah probably was his real father; but Zerubbabel succeeding Shealtiel, of whom no sons are mentioned, as the head of the family of David or house of Judah, is called his son.

22. Zerubbabel (21): Meshullam, Hananiah, d. Shelomith, Hashubah, Ohel, Berechiah, Hasadiah, Jushab-hesed, 1 Ch 3$^{19b.\,20}$.

23. Hananiah (22): Pelatiah, Jeshaiah, ss. Rephaiah, ss. Arnan, ss. Obadiah, ss. Shecaniah (24), 1 Ch 3^{21}.

This list has been interpreted in two ways: (*a*) Hananiah was the father of six sons, whose names follow, before four of whom 'sons' was written because they were founders of distinguished families of the time of the writer (Be.); (*b*) From 'sons of Rephaiah' (21^{3}) to the end of the chapter is a genealogical fragment representing branches of the family of David, whose connexion with Zerubbabel was unascertainable (Ke.); LXX, Vulg. and Syr. read instead of בְּנֵי 'sons' בְּנוֹ 'his son,' and the genealogy (23) (24), then, is as follows: **Hananiah**, *Pelatiah*, *Jeshaiah*, *Obadiah*, *Shecaniah*, *Shemaiah*, Hattush, Igal, Bariah, Neariah, Shaphat. This is preferred by Ki. *et al.* and brings the descendants of David down to nine generations after Zerubbabel.

24. Shecaniah (23): *Shemaiah*, Hattush, Igal, Bariah, Neariah (25), Shaphat, 1 Ch 3^{22}.

25. Neariah (24): Elioenai (26), Hizkiah, Azrikam.

26. Elioenai (25): Hodaviah, Eliashib, Pelaiah, Akkub, Johanan, Delaiah, Anani, 1 Ch 3^{24}.

This completes the list of the descendants of David.

27. Zeruiah (16): Abishai, Joab, Asahel, 1 Ch 2^{16}.

28. Abigail (16): (f. Jether) Amasa, 1 Ch 2^{17}.

29. Caleb (5): Mesha f. Ziph, ss. Mareshah f. Hebron (30), d. Achsah, 1 Ch 2$^{42.\,49b}$.

Caleb represents the powerful clan of the Calebites of S. Judah (see CALEB), The record in (29) is obscure; LXX has Maresbah for Mesha (also Ki. who thinks an enumeration of ss. Mareshah must have stood at the end of v.^{42}). Better We. that ss. M. is written to distinguish the gentilic name Mareshah from that of the city. On Achsah see art. (cf. Jg 1$^{14.\,15}$).

30. Hebron (29): Korah, Tappuah, Rekem (31), Shema (32), 1 Ch 2^{43}.

31. Rekem (30): *Shammai*, Maon f. Bethzur, 1 Ch 2$^{44b\,f.}$.

32. Shema (30): Raham f. Jorkeam, 1 Ch 2^{44}.

33. Jahdai (?): Regem, Jotham, Geshan, Pelet, Ephah, Shaaph (34), 1 Ch 2^{47}.

The connexion of Jahdai with the foregoing is not given. His name evidently has fallen out of the text.

34. Shaaph (33) **f. Madmannah**: Sheva f. Machbena, and f. Gibea, 1 Ch 2^{49a}.

Vv.^{46} and ^{48} are from another source, and to be separated from vv.$^{45.\,47.\,49}$ (We. Ki.), since Ephah, in v.^{46} the name of a concubine of Caleb, in v.^{47} is the name of a s. Shaaph. Their contents appears in (35). V.^{49} is an evident continuation of v.^{47}. Instead of 'and she bare' (וַתֵּלֶד) we should read (וַיּוֹלֶד) 'and Shaaph begat.'

In the foregoing lists (29)-(34) Hebron, Tappuah, Maon, Ziph, Bethzur, Madmannah, and Gibea are well-known cities of Judah within the probable early domain of the Calebites. To these probably should be added Shema (שֶׁמַע)=Shema (שְׁמַע) (Jos 15^{26}), Jorkeam (יָרְקְעָם)=Jokdeam (יָקְדְעָם) (Jos 15^{56}), Pelet (פֶּלֶט)=Beth-pelet (בֵּית פֶּלֶט) (Jos 15^{27}), Machbena (מַכְבֵּנָא)=Cabbon (כַּבּוֹן) (Jos 15^{40}). These towns suggest the transfer of gentilic names to localities or the converse. While some of the other names occur elsewhere (Mesha, a king of Moab, 2 K 3^{4}; Shammai, 1 Ch 4^{17}; Jotham, Jg 9^{5} *et al.*; Sheva? 2 S 20^{25}), they throw no light on the history behind these genealogies or the families or places recorded; unless Korab a s. Esau and district of Edom (Gn 36$^{5.\,14.\,16}$); Rekem, a king of Midian (Nu 31^{8}); Ephah, a Midianite tribe;—all serve to confirm the indications found elsewhere of a close affinity between Caleb and the Edomites and adjoining peoples. Raham (רַחַם), a noun kindred with Jerahmeel (יְרַחְמְאֵל),—Jahdai, Regem, Geshan, and Shaaph are found only in this connexion.

35. Caleb (5): *a.* (m. Azubah) *d. Jerioth*, Jesher, Shobab, Ardon, 1 Ch 2^{18}.

b. (m.c. Ephah) Haran, Moza, Gazez, 1 Ch 2^{46}.

c. (m.c. Maacah) Sheber, Tirhanah, 1 Ch 2^{48}.

d. (m. Ephrathah) Hur (36) (42), (Ashhur f. Tekoa), 1 Ch 2$^{19.\,24}$.

Caleb in (35) as in (29) represents the clan, and the descendants given in (35)-(39) unquestionably embody traditions or convey historical information respecting the families and localities of the clan during different periods of its history. They are taken from late material in 1 Ch (Ki.). During the pre-exilic period the Calebites dwelt in S. Judah (see CALEB). During the post-exilic period, owing to the aggression of the Edomites, they seem to have moved farther north (or if taken into captivity were thus located on their return), and thus dwelt in the districts of Bethlehem and Kiriath-jearim. This, the supposition of We., seems clearly proved from the geographical localities mentioned and indicated in 1 Ch 2$^{50\text{-}55}$, viz. Bethlehem, Kiriath-jearim, Netopha, Bethgader, Zorah, Eshtaol, Atroth-beth-Joab (We. p. 28 ff.) (see also (39)). The children of Azubah (their names may be enigmatical) represent the families that belonged to the older place of residence, hence perhaps the mother's name Azuhah (עֲזוּבָה), 'abandoned.' Ephah and Maacah as concubines represent alien or inferior elements which coalesced with the clan. Ephrathah represents the district of Bethlehem (see EPHRATHAH). The meaning and text of 1 Ch 2^{18} is uncertain. Jerioth is regarded as another name for Azubah (Be.) or another wife with Azubah (Oe.), or a daughter of Azubah (Vulg. Ki. Ke. Zoe.), or the mother of Azubah, *i.e.* Azubah was her daughter (בַּת יְרִיעוֹת) (We. p. 33).

The MT of 1 Ch 2^{24}, which yields an Abiah, wife of Hezron and m. of Ashhur, is plainly corrupt. A few slight changes give the appropriate rendering, 'And after the death of Hezron, Caleb came unto Ephrathah, the wife of Hezron his father, and she bare unto him Ashhur.' The meaning seems to be: The pre-exilic inhabitants of Ephratbah were Hezronites, represented under E. the wife of Hezron. The later settlement of the Calebites is represented under the union of C. with Ephrathah. Ashhur (אִישׁ חוּר=אַשְׁחוּר, We. p. 15) is evidently identical with Hur, the firstborn of Ephrathah (1 Cb 2^{24}). On Gazez (35^{6}) see art.

36. Hur (35^{d}) (*Uri*, Bezalel, 1 Ch 2^{20}): Shobal (37) f. Kiriath-jearim (38), Salma (39) f. Bethlehem, Hareph f. Bethgader, 1 Ch 2$^{50f.}$.

The genealogy Hur, *Uri*, Bezalel is an evident insertion from Ex 31^{2}, and is out of place in a series of gentilic and geographical names or relationships.

37. Shobal (36): Haroeh (Reaiah, 2 Ch 4^{2}), half Menuhoth, 1 Ch 2^{52}.

Haroeh (הָרֹאֶה) is prob. textual error for Reaiah (רְאָיָה) s. Shobal in 1 Ch 4^{2}. On half Menuhoth see note on (39). Of these families nothing further is known.

38. Kiriath-jearim families (36): Ithrites, Puthites, Shumathites, Mishraites, Zorathites, Eshtaolites, 1 Ch 2^{53}.

The Puthites, Shumathites, and Mishraites are not mentioned elsewhere. To the Ithrites belonged two of David's heroes, Ira and Gareb (2 S 23^{38}, 1 Ch 11^{40}). The Zorathites and Eshtaolites are properly the gentilic names of the inhabitants of Zorah and Eshtaol. These are placed subordinate to the Mishraites or the other families (1 Ch 2^{53}). Zorah is mentioned in Neh 11^{29}, and its people as Zorites again apparently in 1 Ch 2^{54} (39).

---

* Jehoaddan, 2 Ch 25^{1}.

† Uzziah and Jechiliah, 2 Ch 26^{3}.

‡ Abijah, 2 Ch 29^{1}.

§ Usually called Jehoiachin, 2 K 24$^{6ff.}$.

39. **Salma** (36): Bethlehem, Netophathites, Atroth-beth-Joab, half Manahathites, Zorites, Tirathites, Shimeathites, Sucathites, 1 Ch 2$^{54f.}$.

Salma is evidently identical with the reputed f. Boaz (16). The Netophathites (Neh 12^{28}) were inhabitants of Netophah (Ezr 2^{22}, Neh 7^{26}), probably a village near Bethlehem. Atroth-beth-Joab is probably the same as the valley of the craftsmen (Neh 11^{35}). Of the Manahathites nothing is known. They (מְנֻחֹתִי) are probably the same as the Menuhoth (37) (מְנֻחוֹת) (Ki. has מנחתי in v.^{52}). The statement that the Tirathites (תִּרְעָתִים), Shimeathites (שִׁמְעָתִים), and Sucathites (שׂוּכָתִים) were families of scribes which dwelt at Jabez (v.^{55}), clearly proves that we have post-ex. material in our lists, for scribes are unknown before this period. The Vulg. saw in the families three different classes of religious functionaries: *canentes, resonantes, et in tabernaculis commorantes.* Be. allows a similar derivation, except that he regards the first class as door-keepers (Aram. תְּרַע =Heb. שַׁעַר door or gate). We. (p. 30 f.) finds underlying the three names תְּרָעָה a technical term for sacred music, שְׁמָעָה the Halacha or sacred tradition, and שׂוּכָה, which he connects with Vulg., and Be. with סוּכָּה 'booth,' cf. Lv 23^{34}. Ges. *Lex.*^{12} derives the last two names from unknown places. Ke. interprets as descendants from Tira, Shimei and Suchah. For their connexion with Kenites see KENITES.

40. **Reaiah** (37): Jahath, Ahumai, Lahad, 1 Ch 4^{2}.

The lists (40)–(55) from 1 Ch 4$^{1-20}$ 'look almost like a gathering of genealogical pebbles rolled together from various quarters, consisting of older and younger parts that are kept together only by the common connexion with the tribe of Judah' (Zoe.). Several of the leading 'fathers' are Calebites, *i.e.* Shobal, Hur, Ashhur, Chelub, Kenaz, Othniel, and Caleb. Hence the lists represent members of that clan, and Caleb should be substituted for Carmi in v.^{1} (We. Ki. Zoe.). Whether the names and relationships reflect pre-exilic conditions or post-exilic is difficult to determine. Ki. regards the passage, with the exception of v.^{1} and a few phrases noted below, as from the older sources of Ch. along with 2$^{26-33.\,42-45.\,47.\,49}$. We.'s view is similar, that in the main pre-ex. conditions are reflected. Be. held, on the other hand, from the mention of a number of the names in the history given in Ezr and Neh, that we have a classification of the tribe of Judah actually made in the time between Zerubbabel and Ezra, so that these apparently broken and incoherent genealogies were plain to the readers of the time of the Chronicler. The view of We. and Ki. is more probable. We have, then, an old list of Calebites edited to bring it into greater harmony with the later times. Reaiah, cf. (37), occurs in a Reubenite pedigree 1 Ch 5^{5}, and as a family name among the returned with Zerubbabel Ezr 2^{47}, Neh 7^{50}. Jahath is a frequent Levite name (1 Ch 6$^{20.\,43}$ 23$^{10f.}$ 24^{22}, 2 Ch 34^{12}). Ahumai and Lahad are mentioned only here. These are all called families of the Zorathites (v.^{2b} acc. to Ki. is from a later hand), cf. (38), 1 Ch 1^{53}.

41. **Hur? f. Etam**: Jezreel, Ishma, Idbash, d. Hazzelelponi, Penuel f. Gedor, Ezer f. Hushah, 1 Ch 4$^{3f.}$.

The MT of v.^{3a} is defective (אֵלֶּה אֲבִי עֵיטָם 'these are f. of Etam'). RV supplies 'sons,' *i.e.* Jezreel, etc., are ss. of father of Etam. Ki. inserts 'sons of Hur' (בְּנֵי חוּר), but the 'sons of Hur' (v.^{4b}) must include (40) as well as (41). LXX (also Kau.) has, 'These are the sons of Etam' (*οὗτοι υἱοὶ Αἰταμ*). Etam is a village near Bethlehem; possibly another place of the same name may be found near Hebron (see art. ETAM). Jezreel and Gedor are towns of S. Judah (Jos 15$^{56.\,58}$). Two heroes of David's guard are mentioned as Hushites (2 S 21^{18} 23^{27}, 1 Ch 11^{29} 20^{4} 27^{11}), but the location of Hushah is unknown. Penuel, a personal or gentilic name, is otherwise unknown. It cannot be associated with the Penuel E. of the Jordan. Ezer may be the same as Ezrah (53). Of Ishma and Idbash and Hazzelelponi, mentioned only here, nothing is known. The last should be rendered 'the Zelelponites' (צְלֶלְפּוֹנִי=הַצְּלֶלְפּוֹנִי with art.). The words in v.^{4b} 'firstborn . . . Bethlehem' are according to Ki. from a later hand.

42. **Ashhur (Hur) f. Tekoa** (35^{d}): (m. Naarah) Ahuzzam, Hepher, Temeni, Haahashtari, (m. Helah) Zereth, Izhar (Zohar, RVm), Ethnan, 1 Ch 4$^{5-7}$.

On Ashhur (=Hur) see under (35^{d}). F. of Tekoa, acc. Ki. is an annotation, cf. 1 Ch 2^{24} (35^{d}). Tekoa is near Bethlehem (see TEKOA). Naarah, evidently not this one, was a town on the borders of Ephraim and Benjamin (Jos 16^{7}), but no such locality has yet been identified with Judah. Hepher, mentioned in connexion with Tappuah (Jos 12^{17}) and Socoh (1 K 4^{10}), evidently belonged to S. Judah. Temeni (תֵּימְנִי) properly means Southerner, *i.e.* of S. Judah. Cf. Teman (תֵּימָן patronymic תֵּימָנִי) of Edom (Gn 36^{11} *et al.*). Ethnan (אֶתְנָן) is prob. identical with Ithnan (יִתְנָן, Jos 15^{23}), a city of S. Judah. For Izhar (יִצְחָר Kt.) must be read Zohar (וְצֹחַר 'and Zohar'). This was the family name of Ephron of Hebron (Gn 23^{8} 25^{9}), and also of a s. Simeon (Gn 46^{10}). The other names in (42) occur only in this connexion. For Haahashtari (אֲחַשְׁתָּרִי=הָאֲחַשְׁתָּרִי with art.) should be 'the Ahashtarites.' If this word is of Pers. derivation (Be. *Oxf. Heb. Lex.*), it must be an explanatory gloss referring to the preceding families.

43. **Hakkoz (Koz)**: Anub, Zobebah, families of Aharhel s. Harum, 1 Ch 4^{8}.

Koz (wrongly Hakkoz AV and RV, Heb. קוֹץ without art.) is a post-ex. family name (1 Ch 24^{10}, Ezr 2^{61}, Neh 3$^{4.\,21}$ 7^{63}; in all these passages the name has the art. הַקּוֹץ Hakkoz). The names of his children occur only here. Anub (עָנוּב) is prob. identical with Anab (עֲנָב), a town near Debir (Jos 15^{50}). Jabez, described in vv.$^{9f.}$, prob. was connected in some way with Koz.

44. **Chelub (b. Shuhah)**: Mehir f. Eshton (45), 1 Ch 4^{11}.

Chelub (כְּלוּב) is clearly another form of the clan name Caleb (כָּלֵב); cf. Chelubai (1 Ch 2^{9}) (5). It is possible that for Shuhah (שׁוּחָה) we should read Hushah (חוּשָׁה v.^{4}) (41). Of Mehir and Eshton, names occurring only here, nothing is known.

45. **Eshton** (44): Beth-rapha, Paseah, Tehinnah f. Ir-nahash (city of Nahash, RVm), 1 Ch 4^{12}.

Beth-rapha is otherwise unknown; a Benjaminite Rapha is mentioned 1 Ch 8^{2}, and Rapha 'giant' or the pl. Rephaim 'giants' 1 Ch 20^{4}. But these throw no light on Beth-rapha. Paseah is a post-ex. family name of the Nethinim, Ezr 2^{49}, Neh 7^{51}, and is mentioned also in Neh 3^{6}. The other names do not occur elsewhere. These ss. of Eshton are called 'the men of Recah' (v.^{12b}), a place also otherwise unknown. The LXX has Recbab.

46. **Kenaz**: Othniel (47), Seraiah (49), 1 Ch 4^{13a}.

Kenaz was an Edomite tribe (Gn 36$^{11.\,15.\,42}$, 1 Ch 1$^{36.\,53}$). Caleb, acc. to Nu 32^{12}, Jos 14$^{6.\,14}$, was a Kenizzite. Othniel was the son of Kenaz acc. to Jg 1^{13}, where Kenaz is also designated either as the f. or b. of Caleb. These statements clearly prove a close relationship between the Calebites and the Edomites. This is further reflected in Shobal f. Manahath, occurring in the list of Edomites, Gn 36^{23}, cf. (37). Othniel, like Caleb, prob. is a clan name. Whether the clan derived its name from a distinguished hero Othniel, or whether Othniel is a purely eponymous character, cannot perhaps be determined (see OTHNIEL). The close relationship between the clans of Caleb and Othniel is brought out in the story of Jg 1$^{12-15}$ (see Moore *in loco*). Seraiah, a not infrequent name from the time of David onwards, as the brother of Othniel, is mentioned only here. It smacks so strongly of an individual, and the later period of Israel's history, that it is prob. an artificial link inserted among these names. It is among the names of the companions of Zerubbabel, Ezr 2^{52}.

47. **Othniel** (46): Hathath, 1 Ch 4^{13b}.

48. **Meonothai**: Ophrah, 1 Ch 4^{14a}.

Hathath occurs nowhere else. Perhaps Meonothai should be joined as another s. of Othniel. It also is not found elsewhere, but probably represents the inhabitants of Maon of S. Judah. Of Ophrah, the name also of a city of Benjamin (Jos 18^{23}, 1 S 13^{17}) and of one of Manasseh (Jg 6^{11}), nothing is known.

49. **Seraiah** (46): Joab f. Ge-harashim, 1 Ch 4^{14b}.

See (39). Acc. to Ki. 'f. Geharashim, craftsmen' v.^{14} is from a later hand.

50. **Caleb s. Jephunneh**: Iru, Elah (51), Naam, 1 Ch 4^{15a}.

On Caleb s. of Jephunneh see CALEB. This additional list of descendants of Caleb shows that the Chronicler's lists contain different groups of Calebites not reduced to a perfect genealogical system, but arranged somewhat independently of each other, reflecting, as already intimated, enumerations of different times, localities, and sources. Many writers (the older commentators generally) wishing to harmonize all of the OT notices of Caleb, and regarding each Caleb as representing an individual, have seen several Calebs in 1 Ch 2 and 4. Neteler (*Die Bücher der biblischen Chronik*, p. 34) gives the following line of descent: **Judah**, *Perez, Hezron, Caleb Ben-hezron, Hur, Caleb Ben-hur, Salma, Kenaz, Jephunneh,* Caleb Ben-jephunneh. A somewhat similar explanation is given in Zoe. (Eng. ed., p. 46) by the editor and translator, J. G. Murphy. For Iru Elah (עִירוּ אֵלָה), Ir and Elah (עִיר וְאֵלָה) may be read (Ki.). We. (p. 39) finds the name Iru equivalent to Iram, a duke of Edom (1 Ch 1^{54} עִירָם=עִירוּ). One is tempted to join Ir (עִיר) 'city' with Elah (אֵילַת=אֵלָה Dillmann, Gn 36^{41}), and find reference to the city Elath (see art.). At all events Elah is an Edomitic name (Gn 36^{41}), and may be seen also in El-paran (אֵיל פָּארָן), the wilderness south of Judah. Naam is otherwise unknown.

51. **Elah** (50): Kenaz, 1 Ch 4^{15b}.

Kenaz as s. Elah is surprising (assuming that the genealogy is not of persons), unless Elah is the name of the district of Elath or El-paran, which might have been the early home of the Kenizzites, or the name of a tribe to which Kenaz became subordinate. Perhaps a transposition should be made in the Heb. text, and instead of וּבְנֵי אֵלָה קְנַז we should read אֵלֶּה בְּנֵי קְנַז 'And these are the sons of Kenaz,' referring to (46)–(50) (vv.$^{13\text{-}15}$).

52. **Jehallelel**: Ziph, Ziphah, Tiria, Asarel, 1 Ch 4^{16}.

Jehallelel only here, and as a personal or family name of ss. Merari, 2 Ch 29^{12}. Ziph, the name of a city of S. Judah; Ziphah, fem. form of the same occurs only here. Tiria and Asarel are not mentioned elsewhere.

53. **Ezrah**: Jether, Mered (54), Epher, Jalon, 1 Ch 4^{17a}.

Ezrah possibly is the same as Ezer (41). Jether is not an uncommon name, cf. (14). Mered occurs only in this connexion. Epher is the name of a son of Midian (Gn 25^4, 1 Ch 1^{33}), and also of an individual or family of the half-tribe of Manasseh (1 Ch 5^{24}). Jalon is found only here.

54. **Mered** (53): (m. Bithiah) Miriam, Shammai, Ishbah f. Eshtemoa, (m. the Jewess) Jered f. Gedor, Heber f. Soco, Jekuthiel f. Zanoah, 1 Ch $4^{17f.}$.

The present text of v.$^{17f.}$ gives no complete sense. Usually the clauses are rearranged. The statement, 'And these are the ss. Bithiah d. Pharaoh which Mered took' (^{18b}), is placed immediately after Jalon (17^a) (Be. Ke. Zoe. Oe. Kau.); this gives (54). LXX (in 17^b) had a different text (Καὶ ἐγέννησεν Ἰεθέρ), which Ki. follows, emending וַתַּהַר אֶת־מִרְיָם to וְיֶתֶר הוֹלִיד אֶת־מִרְיָם, 'And Jether begat Miriam,' etc. This places Jether as the progenitor of the ss. given in (54), and assumes that the ss. Mered and Bithiah, originally enumerated, have fallen out of the text. Miriam, elsewhere in OT only of Moses' sister, is here evidently a man's name. Shammai, also the name of a Jerahmeelite, cf. (8). Ishbah and Jekuthiel occur only here, and also Jered, except as the name of the antediluvian patriarch (Gn $5^{15ff.}$). Heber is not uncommon. In (41) Penuel is given as f. Gedor. Possibly, the posterity of two families or individuals were the reputed founders of the city. Eshtemoa, Gedor, Soco, and Zanoah are all towns in S. Judah or near Hebron (see arts.). Of the connexion here mentioned of Mered or Jether with Bithiah d. Pharaoh nothing is known. Instead of 'the Jewess,' RVm transliterates, Hajehudijah, and AV Jehudijah.

55. **Hodiah**: (m. sister of Naham) f. Keilah the Garmite, Eshtemoa the Maacathite, 1 Ch 4^{19}.

Hodiah is a common name of the time of Ezra and Neh. (AV here wrongly a woman's name, 'his wife Hodiah'). Before Eshtemoa probably f. has fallen out. Keilah and Eshtemoa are the names of Judæan towns (see art.). Maacathite (הַמַּעֲכָתִי) shows probably a connexion with Maacah (מַעֲכָה) (35*c*). Garmite and Naham occur only here.

56. **Shimon**: Amnon, Rinnah, Ben-hanan, Tilon, 1 Ch 4^{20a}.

57. **Ishi**: Zoheth, Ben-zoheth, 1 Ch 4^{20b}.

There is nothing to throw light on these names, most of which are mentioned only in this connexion. Ishi is in (11). Probably a name has fallen out before Ben-zoheth, *i.e.* s. Zoheth.

58. **Perez fam.**: a. *Bani*, *Imri*, *Omri*, *Ammihud*, Uthai, 1 Ch 9^4.

b. *Mahalalel*, *Shephatiah*, *Amariah*, *Zechariah*, *Uzziah*, Athaiah, Neh 11^4.

The pedigrees of the post-exilic Perezites Uthai (cf. Ezr 8^{14}) and Athaiah of the inhabitants of Jerusalem.

59. **Zerah** (1): Zimri (Zabdi (60), Jos 7^1), Ethan (61), Heman, Calcol, Dara, 1 Ch 2^6.

Ethan, Heman, Calcol, and Dara (Darda) are probably the names of famous men of the family of Zerah (cf. 1 K 4^{31}) (see arts.). Whether Ethan and Heman are to be connected with the Levitical singers of those names is uncertain.

60. **Zabdi** (59): *Carmi*, Achan, Jos 7^1; cf. 1 Ch 2^7.

Pedigree of Achan the trespasser (Achar, 1 Ch 2^7), see ACHAN.

61. **Ethan** (59): Azariah, 1 Ch 2^8.

Azariah the Ethanite is otherwise unknown. For another Zerahite see note at end of XXI.

V. 1. **ISSACHAR**: Tola (2), Puah,* Jashub,† Shimron, Gn 46^{13}, Nu $26^{23f.}$, 1 Ch 7^1.

2. **Tola** (1): Uzzi (3), Rephaiah, Jeriel, Jahmai, Ibsam, Shemuel, 1 Ch 7^2.

3. **Uzzi** (2): *Izrahiah*, Michael, Obadiah, Joel, Isshiah, 1 Ch 7^3.

Of the names in the genealogy of Issachar's descendants, Tola appears as that of one of the minor judges, 's. Puah, s. Dodo, a man of Issachar' (Jg $10^{1f.}$). This implies that traditions varied in respect to the relationship of the clans of Tola and Puah. Puah may have been the more ancient, but Tola was undoubtedly the principal clan of Issachar, whose seat seems to have been centred at the unknown Shamir (Jg $10^{1f.}$). Of the other persons and families recorded nothing further is known, beyond that those of (2) and (3) are called 'mighty men of valour' and 'chief men,' and assigned apparently to the time of David, 1 Ch $7^{2\text{-}5}$.

VI. 1. **ZEBULUN**: Sered, Elon, Jahleel, Gn 46^{14}, Nu 26^{26}.

Nothing further than their mention is known of these clans. Elon, probably an eponym from the clan, is one of the minor judges of Israel, who was buried in a place of the same name whose locality is unknown (Jg $12^{11f.}$, cf. Moore, *in loc.*). No genealogy of Zebulun is given by the Chronicler.

VII.^{a} 1. **MANASSEH**: *a.* Machir, Abiezer (7), Helek, Asriel, Shechem (5), Hepher (6), Shemida (5), Jos $17^{1f.}$.

b. *Machir*, *Gilead*, Iezer, Helek, Asriel, Shechem, Shemida, Hepher, Nu $26^{29\text{-}32}$.

c. (m. Aramæan concubine) Machir (f. Gilead); Zelophehad (6), d. Hammolecheth (7), 1 Ch $7^{14f.\ 18}$.

2. **Machir** (1^{abc}): (m. Maacah) Peresh, Sheresh (3), 1 Ch 7^{16}.

3. **Sheresh** (2): Ulam (1), Rakem, 1 Ch 7^{16}.

4. **Ulam** (3): Bedan, 1 Ch 7^{17}.

5. **Shemida** (1^{ab}): Ahian, Shechem (1^{ab}), Likhi, Aniam, 1 Ch 7^{19}.

6. **Hepher** (1^b): *Zelophehad* (1^c), dd. Mahlah, Noah, Hoglah, Milcah, Tirzah, Nu 26^{33} 27^1.

7. **Hammolecheth** (1^c): Ishhod, Abiezer (1^a), and Mahlah, 1 Ch 7^{18}.

The genealogy of the tribe of Manasseh appears in different forms. Of the clans enumerated (1^{abc}), Machir is by far the most important. In the Song of Deborah he stands for the tribe of Manasseh (Jg 5^{14}), and his home at that time seems to have been W. of the Jordan (cf. v.^{17}). But he was especially known and remembered as the f. or conqueror of Gilead (Nu 26^{29} 32^{39}, Jos 17^1, Dt 3^{14}). Acc. to many authorities this conquest was made from W. Palestine (Smend, *HWB*, ed. Riehm; Stade, *Gesch.* i. p. 149; Budde, *Richt. u. Sam.* p. 34 ff.; Moore on Jg 5^{15}; but G. A. Smith, *Hist. Geog.* p. 577 n., regards the argument as inconclusive). From his pre-eminence and earlier development Machir, then, was regarded as the firstborn of Manasseh, or as the only son. In this latter scheme (1^a) the other clans of Manasseh are recorded, not as descendants of Machir simply, but also of Gilead, as though their home was E. of the Jordan. But the clan Iezer, *i.e.* Abi-ezer (Gideon's clan), belonged to the district W. of the Jordan (Jg $6^{11.\ 34}$ 8^2). Tirzah, the city, a d. Zelophehad s. Hepher (7), was likewise situated W. of the Jordan (see TIRZAH), and Jos $17^{1ff.}$ plainly implies that all of the ss. Manasseh (1^a) except Machir dwelt W. of the Jordan. To the author of (1^b) the name Gilead then either had lost its geographical meaning, or, what is more probable, holding that Gilead was first conquered, as represented in the Hex., he regarded the W. Manassites as offshoots of the E. Manassites. The genealogical scheme of (1^c) (2) (3) (4) (5) (7), given in 1 Ch $7^{14\text{-}19}$, is clearly different from (1^a) or (1^b), although not without points of connexion. The passage from which (1^c) is derived is corrupt, and in its present state unintelligible, forbidding any satisfactory reconstruction (Ki.; see attempts in Be. Oe). Asriel (אַשְׂרִיאֵל), 1 Ch 7^{14}, is plainly a dittography out of the following words (אֲשֶׁר יָלְדָה). The statement that the m. of Machir was an Aramæan appears likewise in the LXX of Gn 50^{23}. The reference to Huppim and Shuppim and the sister (v.^{15}) is entirely obscure. In Maacah, the wife of Machir, we may possibly see some connexion between Machirites and their neighbours, the Maacathites (see MAACAH). In 1 Ch 2^{21} Hezron s. Perez s. Judah is represented as begetting through a d. of Machir, Segub, who begat Jair, 'who had twenty-three cities in the land of Gilead.' Segub (שְׂגוּב), who is not mentioned elsewhere, probably has arisen in transcription from Argob (אַרְגֹּב), the district given as inhabited by Jair the s. Manasseh (Dt 3^{14}). Why Hezron, a clan of Judah (IV. 3), should be connected at all with Machir is entirely obscure. The statement probably has arisen through some misunderstanding.

Hepher (1^a) (6) may be connected with Hepher, the city and district mentioned in Jos 12^{17} and 1 K 4^{10}. According to Kuenen, Zelophehad was originally the name of a city (Dillm. on Nu 26^{29}). The Jewish law of female inheritance is represented as traced to the petition of his daughters (Nu $27^{1\text{-}11}$, $36^{1\text{-}12}$). The d. Tirzah, as assumed above, is the well-known city, and perhaps the names of the others should be sought in towns or villages. Of the other names introduced in these lists beyond what has been mentioned we know nothing. Perhaps Likhi (לִקְחִי) (5)=Helek (חֵלֶק) (1^{b}) and Aniam (אֲנִיעָם) (5)=Noah (נֹעָה) (6) (Be.).

---

* Puvah (פֻּוָּה) (Gn 46^{13}).

† Iob (יוֹב) (Gn 46^{13}), a txt. err. (Ball, *SBOT*, *in loc.*).

8. Epher, Ishi, Eliel, Azriel, Jeremiah, Hodaviah, Jahdiel, 1 Ch 5^{24}.

These are mentioned as 'mighty men of valour, famous men, heads of their fathers' houses,' of the half-tribe of Manasseh dwelling E. of the Jordan (ref.). Nothing further of them, indicating when they lived or for what they were famous, is given.

VII.^{b} 1. **EPHRAIM**: *a*. Shuthelah (12), Becher, Tahan, Nu 26^{35}.

b. Shuthelah, Ezer, Elead, Beriah, d. Sheerah, Rephah, Resheph (4), 1 Ch 7^{21-25}.

2. **Shuthelah** (1): Eran, Nu 26^{36}.

3. **Shuthelah** (1^{b}): *Bered, Tahath, Eleadah, Tahath, Zabad*, Shuthelah, 1 Ch $7^{20f.}$.

4. **Resheph** (1^{b}): *Telah, Tahan, Ladan, Ammihud, Elishama, Nun*, Joshua, 1 Ch 7^{25-27}.

The genealogy of Ephraim (1^{b}) (3) (4), preserved in 1 Ch $7^{20.27}$, is of uncertain construction. From the Heb. text it is not clear whether Ezer and Elead are the ss. of Shuthelah (No. 2) (3) or of Ephraim; or Sheerah and Rephah, the children of Beriah or Ephraim. The latter rendering in each case, as in (1^{b}), is the better. In the first instance the context clearly demands it. Of special interest is the notice of the slaughter of Ezer and Elead on a cattle raid by the men of Gath (v.^{21}). To the older commentators, who regarded Ephraim and his children as historical individuals, this episode was difficult of explanation, because it belonged evidently to the period of the sojourn in Egypt. It was usually interpreted as a foray out of Goshen (Zoe. Oe.)—against the use of the word יָרַד 'go down,' Ew. placed the event in the pre-Egyptian period (*Hist*. i. p. 380). Sayce refers to it as historical, and of the Egyptian period (*Patriarchal Palestine*, p. 202). There is little doubt, however, if an historical collision between Ephraimitic clans and Gittites underlies this notice, that the foray was from Mt. Ephraim (Be.). In the original story, Ephraim mourning (v.^{22}) probably was no more thought of as an individual than Rachel in Jer 31^{15}. The ss. of Ephraim slain then were two Ephraimitic clans, destroyed in some Phil. war. The connexion of Beriah, another clan, with the event arose either from a play upon the word, Beriah being regarded as the equivalent of 'in evil' (בְּרָעָה=בְּרִיעָה) (v. 23), or, in addition to the play upon the name, since Beriah is mentioned as a Benjam. family of Aijalon, who routed the inhabitants of Gath (1 Ch 8^{13}), it is possible that this Benjam. Beriah, having driven back Gittite invaders, received the former home of Ezer and Elead, and thus became incorporated into the tribe of Ephraim (Be.). We. regards the entire episode as of late fabrication (*Prol*. p. 214).

The list of names given in this genealogy has a suspicious look. They appear like a repetition of the same elements. Not only is Shuthelah repeated (4), but there is a striking similarity between the other names.

לערן	of Eran.
לעדן	Laadan.
אלעדה	Eleadah.
אלעד	Elead.
שותלח	Shuthelah.
ותלח	and Telah.
תחת	Tahath.
תחן	Tahan.
בכר	Becher.
וברד	and Bered.
זבד	Zabad.

Tahan (1^{a}) (4) and Tahath (3) are without doubt the Tohu (1 S 1^{1}) and the Tahath, Nahath, and Toah (III. 22^{ab}). Sheerah was the reputed builder of Bethhoron, whose name appears in Uzzen-sheerah (wh. see) (v.^{24}). Elishama s. Ammihud (4) appears as the prince of the tribe of Ephraim in Nu 1^{10}, whence it is easy to see how the pedigree of Joshua was constructed.

VIII. 1. **BENJAMIN**: *a*. Bela (2), Becher (4), Ashbel, Gera, Naaman, Ehi, Rosh, Muppim, Huppim, Ard, Gn 46^{21}.

b. Bela (2), Ashbel, Ahiram, Shephupham, Hupham, Nu $26^{38f.}$.

c. Bela (2), Becher (4), Jediael (5), 1 Ch 7^{6}.

d. Bela (2), Ashbel, Aharah, Nohah, Rapha, 1 Ch 8^{1}.

We have thus four different lists of ss. Benjamin. Bela is common to all; Ehi, Rosh, Muppim, and Huppim (1^{a}) are clearly equivalent to Ahiram, Shephupham, and Hupham (1^{b}); cf. the Heb. text, אחי ראש מפים חפים, with אחירם שפופם חפם. Hence Rosh (1^{a}) should be struck out and Ahiram substituted for Ehi (1^{a}), and also probably for Aharah (אַחְרַח) (1^{d}). Gn 46^{21} LXX reads **Benjamin**, Bela, Becher, Ashbel; **Bela, Gera**, Naaman, Ehi, Rosh, Muppim, and Huppim. This corresponds with (2^{a}) (3) (see below), where Gera, Naaman, and Ard are ss., Bela and Shuppim and Huppim grandsons. Hence the original text of Gn 46^{21} may have read **Benjamin**, Bela, Becher, Ashbel; **Bela**, Gera, Naaman, Ahiram, Shephupham, Huppim, Ard (Ball, *in loco*, *SBOT*).

In (1^{c}) Jediael (יְדִיעֲאֵל) appears as the equivalent of Ashbel (אִישׁ־בַּעַל=אַשְׁבֵּל) either by corruption or substitution. Whether a textual corruption or an independent tradition underlies Nohah and Rapha (1^{d}) it is impossible to determine. The names as Benjaminites occur only here.

2. **Bela** (1^{abcd}): *a*. Ard, Naaman, Nu 26^{40}.

b. Ezbon, Uzzi, Uzziel, Jerimoth, Iri (3), 1 Ch 7^{7}.

c. Addar, Gera, Abihud, Abishua, Naaman, Ahoah, Gera, Shephuham, Huram, 1 Ch $8^{1f.}$

The list (2^{b}) appears to be entirely independent of the others. The list (2^{c}) corresponds closely with the restored text of Gn 46^{21} (see above), since Addar (אַדָּר)=Ard (אַרְדְּ); Gera and Abihud probably were originally one and the same person, *i.e.* Gera f. Ehud (cf. Jg 3^{15}); the second Gera is plainly a dittography; Huram (חוּרָם) probably = Huppim (חֻפִּים); and hence the only additional names are Abishua and Ahoah (אֲחוֹחַ); and the latter may be a variation or corruption of Ahiram (אֲחִירָם) or Aharah (אַחְרַח), repeated in transcription from the previous generation (1^{d}).

3. **Iri** (2^{b}): Shuppim, Huppim, 1 Ch 7^{12}.

In the text the name is **Ir** (v.^{12}). Shuppim and Huppim seem identical with Shephupham and Hupham, given elsewhere as ss. Benjamin (1^{b}) and ss. Bela (2^{c}). Nothing further than their appearance in the genealogical lists is known of these individuals or families. In the text v.^{12} appears like an appendix (see also (6) below).

4. **Becher** (1^{ac}): Zemirah, Joash, Eliezer, Elioenai, Omri, Jeremoth, Abijah, Anathoth, Alemeth, 1 Ch 7^{8}.

The names of these ss. Becher (4), Joash, Eliezer, Elioenai, Omri, Jeremoth, and Abijah occur frequently in the OT; Jeremoth again as a Benjaminite in 1 Ch 7^{7} 8^{14}. Anathoth and Alemeth are names of Benjaminite towns (see arts.). Zemirah occurs only in this connexion.

5. **Jediael** (1^{c}): *Bilhan*, Jeush, Benjamin, Ehud, Chenaanah, Zethan, Tarshish, Ahishahar, 1 Ch 7^{10}.

This list (5) is striking in having Benjamin as a subordinate family or personal name, and likewise, in this connexion, Ehud, elsewhere s. Gera (cf. Jg 3^{15}). Bilhan and Jeush are also Edomite names (Gn $36^{5.14.18.27}$), and Jeush, moreover, that of a Levite or Levitical family (1 Ch $23^{10f.}$), and of a son of Rehoboam (2 Ch 11^{19}), and again of a Benjaminite (1 Ch 8^{39}). (For refs. on Jeush as an Arab. name of a deity, see Gesenius-Buhl). Chenaanah (כְּנַעֲנָה) suggests the incorporation of a Can. family with the Benjaminites (Be.). In 1 K 22^{24} it is the name of the f. Zedekiah the false prophet. Zethan and Ahishahar are found only here. The latter, however, perhaps appears in the cuneiform inscriptions as the name of a king of Minnai (see Gesen.-Buhl). Tarshish, besides being the name of the well known city, stands elsewhere for a precious stone, derived from Tarshish (Ex 28^{20} 39^{13} *et al.*, RV 'beryl'), and is the name of a Persian prince (Est 1^{14}).

These Belaites, Becherites, and Jediaelites (2^{b}) (4) (5) are all called heads of fathers' houses and mighty men of valour, but there is no indication of the period of Israel's pre-ex. history to which they were intended to be assigned (1 Ch 7^{7-11}).

6. **Aher**: Hushim, 1 Ch 7^{12b}.

This genealogical fragment is enigmatical. Hushim (חֻשִׁים) in Gn 46^{23} is a s. Dan. There Dan also stands between Benjamin and Naphtali. The Chronicler has given no genealogy of Dan unless it is found here, between the genealogy of Benjamin, vv.$^{6-11}$, and that of Naphtali, v.^{13}. Hence Dan has been found hidden in Aher (אַחֵר, 'another'), which occurs nowhere else as a proper name. The tribe of Dan was believed thus to have been indicated, owing to its opprobrium on account of its idolatry (Jg 18). Its name does not appear with the other tribes in 1 Ch 6^{54-81}. Cf. also its omission in Rev 7^{5-8}. (The name Dan, however, does appear in 1 Ch 2^{2} 12^{35} 27^{22}, and the genealogy of Zebulun is missing in 1 Ch as well as that of Dan). If the above hypothesis is accepted, the remainder of v.^{12} may be a gloss, Shuppim and Huppim suggested by their similarity to Hushim as the ss. of Benjamin intended (Dan not being recognized in Aher, and these ss. being missed in the preceding vv.). **Ir** (עִיר), then, from the influence of v.^{7}, may have been later developed out of Ard (אַרְדְּ), which follows Muppim and Huppim in Gn 46^{21} (see 1^{a}) (Be.).

If, however, as we have assumed, Hushim is a Benjam. family or individual, Aher may be identical with Ahiram (1^{b}) (RVm) or with the Benjaminite Shaharaim (8) (שַׁחֲרַיִם), who had a wife Hushim (1 Ch $8^{8.11}$).

7. **Ehud**: Uzza, Ahihud, 1 Ch $8^{6f.}$.

The verses from which (7) is taken are difficult of interpretation. Probably the text is corrupt (see Comm. *in loco*). The connexion of Ehud (אֵחוּד) with the sons of Benjamin is not given. It is likely, however, that ח=ה, and that reference here also is to clan Ehud (אֵהוּד), s. Gera or s. Jediael, cf. (5). The ss. Ehud (possibly not those given above, but those whose names have fallen out of the text) were heads of families of the inhabitants of Geba (v.^{6}) (see note on 23).

8. **Shaharaim**: (m. Hodesh) Jobab, Zibia, Mesha, Malcam, Jeuz, Shachia, Mirmah, (m. Hushim) Abitub, Elpaal (9) (13 ?), 1 Ch 8^{8-10}.

The connexion of Shaharaim with any of the ss. Benjamin is also not given. He is said to have begotten children in the field of Moab after he had sent away two wives, Hushim and Baara (v.^{8}). These allusions are entirely obscure. The sons whose m. was Hodesh are said to have been heads of families. Their residence is not given, unless by implication it is the country of Moab.

9. **Elpaal** (8): Eber, Misham, Shemed,* 1 Ch 8^{12}.

To Shemed is attributed the building, evidently the rebuilding, of Lod and Ono, for these cities were very ancient, appearing prob. in the list of the places conquered by Tahutmes III. (*RP* (New Series), vol. v. pp. 25–53).

10. —— Beriah (11), Shema (12), Ahio ? Elpaal ? (13), Shashak (14), Jeremoth (15), 1 Ch $8^{13f.}$.

The connexion of these Benjaminites, as in the cases of (7) and (8), with ss. Benjamin is not given. Their brotherhood is obtained by reading in v.^{14}, after the analogy of the LXX, אָחִיו 'his brother' (Kau.), or אֲחֵיהֶם 'their brothers' (Ki.), instead of אַחְיוֹ Ahio, a proper name (a reading certainly to be rejected), and by adding the name Elpaal required by v.^{19} (Kau. Ki.). Whether for Jeremoth (יְרֵמוֹת) we should read Jeroham (יְרֹחָם), after v.^{27}, or there substitute Jeremoth, it is impossible to determine. Both names clearly refer to one person; also Shema (שֶׁמַע) (v.^{13}) and (שִׁמְעִי) (v.^{21}).

Beriah and Shema are called 'heads of fathers' houses of Aijalon who put to flight the inhabitants of Gath,' v.^{13}. This flight is otherwise unknown, although it has been connected with the slaughter of the ss. Ephraim (1 Ch 7^{21}), and Beriah has been identified with Beriah s. Ephraim (1 Ch 7^{23}, cf. note on VII^{b}. 4). Nothing further is stated concerning these five reputed founders of the families mentioned below.

11. **Beriah** (10): Zebadiah, Arad, Eder, Michael, Ishpah, Joha, 1 Ch $8^{15f.}$.

12. **Shimei (Shema)** (10): Jakim, Zichri, Zabdi, Elienai, Zillethai, Eliel, Adaiah, Beraiah, Shimrath, 1 Ch 8^{19-21}.

13. **Elpaal** (10): Zebadiah, Meshullam, Hizki, Heber, Ishmerai, Izliah, Jobab, 1 Ch $8^{17f.}$.

14. **Shashak** (10): Ishpan, Eber, Eliel, Abdon, Zichri, Hanan, Hananiah, Elam, Anthothijah, Iphdeiah, Penuel, 1 Ch 8^{22-25}.

15. **Jeroham (Jeremoth)** (10): Shamsherai, Shehariah, Athaliah, Jaareshiah, Elijah, Zichri, 1 Ch $8^{26f.}$.

These lists (11)–(15) represent five clans or families of post-exilic Jerus. (see note below on 23), each member mentioned 'the head of a father's house, a chief man' (1 Ch 8^{28}). Nothing further is known of them, although some of their names, representing other persons, occur elsewhere in the OT. Be. identifies Elpaal (13) with the Elpaal (9), and Eber (עֵבֶר), Misham (מִשְׁעָם), and Shemed (שֶׁמֶר) (9), with Heber (חֶבֶר), Meshullam (מְשֻׁלָּם), and Ishmerai (יִשְׁמְרַי) (13).

16. **Jeiel**: (m. Maacah) Abdon, Zur, Kish (17), Baal, Ner (23), Nadab, Gedor, Ahio, Zechariah,† Mikloth (24), 1 Ch 8^{29-31} 9^{35-37}.

17. **Kish** (16): *Saul*, Jonathan (18), Malchi-shua, Abinadab, Eshbaal, 1 Ch 8^{33} 9^{39}.

18. **Jonathan** (17): *Merib-baal*, *Micah*, Pithon, Melech, Tahrea,‡ Ahaz (19), 1 Ch 8^{34} 9^{40}.

19. **Ahaz** (18): *Jarah*,§ Alemeth, Azmaveth, Zimri (20).

20. **Zimri** (19): *Moza*, *Binea*, *Rephaiah*, *Eleasah*, Azel (21), Eshek (22), 1 Ch $8^{36bf. 39a}$ $9^{42bf.}$.

21. **Azel** (20): Azrikam, Bocheru ?, Ishmael, Sheariah, Obadiah, Hanan, 1 Ch 8^{38} 9^{44}.

22. **Eshek** (20): Ulam, Jeush, Eliphelet, 1 Ch 8^{39}.

23. **Ner** (16): Abner ?, 1 Ch 8^{33} 9^{39}.

24. **Mikloth** (16): Shimeam,* 8^{32} 9^{38}.

This genealogy of the house of Saul (16)–(23) is given twice, the original texts being in each case the same (1 Ch 8^{29-38} and 9^{35-44}). While the latter passage is perhaps in the better state of preservation, and has been mainly followed above, both have suffered some corruption. In v.^{39} Abner has clearly fallen out of the text and should be restored, cf. (23) (Kau. Ki.). In v.^{41} Ahaz should be added to the ss. Micah, as in 8^{35}. In v.^{44} instead of Bocheru (בֹּכְרוּ) we should read 'his firstborn' (בְּכֹרוֹ); another name must be supplied to complete the six sons of Azel (21). In (16) the f. Kish and Ner is Jeiel f. Gibeon. This differs from 1 S 9^{1} 14^{51}, where Abiel is f. Kish and Ner. The motive for the introduction of this genealogy clearly arose from the fact that at the time of the Chronicler certain Jewish families claimed descent from Saul. The genealogy furnishes a line of 15 generations. Allowing 12 from the founding of Solomon's temple to that of Zerubbabel (see note on III. 12), these descendants belonged to near the time of Ezra and Nehemiah.

Looking at these lists (7)–(24) as a whole, they evidently were based upon post-ex. conditions, for the following reasons:—(*a*) The places of residence (not mentioning Jerus.) are towns recurring in the post-ex. history,—Geba (v.^{6}), cf. Ezr 2^{26}; Lod and Ono (v.^{12}), cf. Ezr 2^{33}; Gibeon (v.^{29}), cf. Neh 7^{25}. (*b*) Many of the names belong also to that period, viz.: Meshullam (13), Hanan, Elam, Hananiah, Anthothijah (Anathoth) (14), cf. Neh $10^{10. 14. 19. 20. 23. 26}$. (*c*) The coincidence between the residence in or connexion with Moab (v.^{8}) and the name Pabath-moab representing an important family among the post-ex. Jews (Ezr 2^{6} 8^{4} etc.). (Be. conjectures that the birth of this Pahath-moab, 'prince of Moab,' is referred to in v.^{8}). (*d*) The Benjaminites had a considerable part in the post-ex. community along with the children of Judah and the Levites. (*e*) The close union between 1 Ch 8 and 9, which latter from its identity with Neh 11 is recognized at once as describing post-ex. conditions.

25. —— *Jeshaiah*, *Ithiel*, *Maaseiah*, *Kolaiah*, *Pedaiah*, *Joed*, *Meshullam*, Sallu, Neh 11^{7}, cf. 1 Ch 9^{7}.

Sallu represents a post-ex. family of Jerus. (see ref.). In 1 Ch 9^{7} the descent is, Sallu s. Meshullam, s. Hodaviah, s. Hassenuah.

IX. 1. **DAN**: Hushim,† Gn 46^{23}, Nu 26^{42}.

Only one clan is recorded as having belonged to Dan. The difference of name in Gn and Nu has arisen from the transposition of letters, Hushim (חֻשִׁים), Shuham (שׁוּחָם). Dan is passed over by the Chronicler, unless a reference to the tribe is concealed in 1 Ch 7^{12}; cf. VIII. 6, above. Nothing more than the genealogical record is known of Hushim. On a single son or clan representing the tribe, see DAN.

X. 1. **NAPHTALI**: Jahzeel,‡ Guni, Jezer, Shillem,¶ Gn 46^{24}, Nu $26^{48f.}$, 1 Ch 7^{13}.

These ss. or clans of Naphtali are not mentioned in any other connexion in OT, neither do their names occur elsewhere, except that of Guni, which is also the name of a Gadite (XI. 4). No further descendants of Naphtali are given.

XI. 1. **GAD**: Ziphion,§ Haggi, Shuni, Ezbon,§ Eri, Arodi,§ Areli, Gn 46^{16}, Nu 26^{15-17}.

2. —— Joel, Shapham, Janai, Shaphat, 1 Ch 5^{12}.

3. —— *Buz*, *Jahdo*, *Jeshishai*, *Michael*, *Gilead*, *Jaroah*, *Huri*, *Abihail*, Michael, Meshullam, Sheba, Jorai, Jacan, Zia, Eber, 1 Ch $5^{13f.}$.

4. —— *Guni*, *Abdiel*, Ahi, 1 Ch 5^{15}.

Joel, Shapham, Janai, Shaphat (2), Michael, Meshullam, Sheba, Jorai, Jacan, Zia, Eber (3), all represent families of the tribe of Gad, registered according to the Chronicler in the days of Jotham king of Judah, and Jeroboam king of Israel (1 Ch 5^{17}). Their connexion with any of the ss. Gad (1) is not given. Indeed, those clans are not mentioned in 1 Ch. Ahi (4) is given as 'chief of their fathers' houses.' We know of nothing further of value that can be said respecting this genealogy.

XII. 1. **ASHER**: Imnah, Ishvah,‖ Ishvi,‖ Beriah (2), d. Serah, Gn 46^{17}, Nu 26^{44}, 1 Ch 7^{30}.

2. **Beriah** (1): Heber (3), Malchiel f. Birzaith,¶ Gn 46^{17}, Nu 26^{45}, 1 Ch 7^{31}.

3. **Heber** (2): Japhlet (4), Shomer ** (5), Hotham (6), d. Shua, 1 Ch 7^{32}.

4. **Japhlet** (3): Pasach, Bimhal, Ashvath, 1 Ch 7^{33}.

---

* Shemer (ר instead of ד) acc. to Hahn's and Theile's Heb. Text, but Shemed acc. to Baer and Del.

† Zecher, 1 Ch 8^{31}.

‡ Tarea, 1 Ch 8^{34}.

§ Jehoaddah, 1 Ch 8^{36}.

* Shimeah, 1 Ch 8^{32}.

† Shuham, Nu 26^{42}.

‡ Jahziel, Shallum, 1 Ch 7^{13}.

§ Zephon, Ozni, Arod, Nu $26^{15ff.}$.

‖ The two names Ishvah (יִשְׁוָה) and Ishvi (יִשְׁוִי) prob. represent a dittography. Nu 26^{44} omits the former.

¶ F. Birzaith only in 1 Ch 7^{31}.

** Shemer (v.^{34}), preferred by Ki. The two names represent the same person.

5. **Shomer** (3): Ahi, Rohgah, Jehubbah,* Aram, 1 Ch 7^{34}.

6. **Helem (Hotham)**† (3): Zophah, Imna, Shelesh, Amal, 1 Ch 7^{35}.

7. **Zophah** (6): Suah, Harnepher, Shual, Beri, Imrah, Bezer, Hod, Shamma, Shilshah, Ithran (8), Beera, 1 Ch $7^{36f.}$.

8. **Jether (Ithran)** † (7): Jephunneh, Pispah, Ara, 1 Ch 7^{38}.

9. **Ulla** (——?) †: Ara, Hanniel, Rizia, 1 Ch 7^{39}.

Nothing further than their registration is known of these clans and families of Asher. Ishvah, Serah (1), Malchiel, Birzaith (2), Japhlet, Shua (3), Pasach, Bimhal, Ashvath (4), Rohgah, Hubbah (5), Zophah, Imnah, Shelesh, Amal (6), Suah, Harnepher, Beri, Imrah, Hod, Shilshah, Beera (7), Pispah, Ara (8), Ulla, and Rizia occur as prop. names only in this connexion. The occurrence of the others elsewhere throws no light upon their appearance here. It is an interesting fact that the names of the two clans Heber (Habiri) and Malchiel (2) appear also together in the Amarna tablets, representing, it may be, clans of the ancient seat of Asher (see *Journ. of Bib. Lit.* vol. xi. 1892, p. 120). Birzaith (2) is probably the name of a place (בִּרְזָיִת=בְּאֵרזַיִת, *i.e.* 'Olive-well'). Local names may he seen also in Harnepher, Bezer, Beera (7), and perhaps some other names (Be.).

XIII. ‡ 1. David's Recruits at Ziklag.

(*a*) *Of Benjamin*: Ahiezer and Joash ss. Shemaah the Gibeathite; Jeziel and Pelet ss. Azmaveth, Beracah, Jehu the Anathothite; Ishmaiah the Gibeonite, Jeremiah, Jahaziel, Johanan, Jozabad the Gederathite, Eluzai, Jerimoth, Bealiah, Shemariah, Shephatiah the Haruphite; Elkanah, Isshiah, Azarel, Joezer, Jashobeam Korahites; Joelah and Zebadiah ss. Jeroham of Gedor, 1 Ch 12^{3-7}.

In the text these are given as Benjaminites. It seems not improbable, however, that the Chronicler may have fused some Judæans among them, since the Korahites can hardly be others than warriors from the Judæan city or family Korah (1 Ch 2^{43}). Gedor and Gederah are likewise found among Judæan towns (Jos $15^{36.58}$, 1 Ch 4^{39}). In v.^{16}, evidently misplaced, it says, 'and there came of the children of Benjamin and Judah to the hold unto David.'

(*b*) *Of Gad*: Ezer, Obadiah, Eliab, Mishmannah, Jeremiah, Attai, Eliel, Johanan, Elzabad, Jeremiah, Machbannai, 1 Ch 12^{9-13}.

(*c*) *Of Manasseh*: Adnah, Jozabad, Jediael, Michael, Jozabad, Elihu, Zillethai, 1 Ch 12^{20}.

All of these recruits are mentioned as mighty men of valour. Those of Gad are said to have had faces like the faces of lions, and to have been as swift as the roes upon the mountains (I Ch 12^{8}).

2. David's Mighty Men.

2 S 23^{8-39}.	I Ch 11^{11-47}.
8. Josheb-basshebeth a Tahchemonite.	11. Jashobeam s. a Hachmonite.
9. Eleazar s. Dodai s. an Ahohite.	12. Eleazar s. Dodo the Ahohite.
11. Shammah s. Agee a Hararite.	[Names wanting, or portions of names omitted, are identical with those in 2 S].
18. Abishai brother of Joab.	20.
20. Benaiah s. Jehoiada.	22.
24. Asahel brother of Joab.	26.
Elhanan s. Dodo of Bethlehem.	
25. Shammah the Harodite.	27. Shammoth the Harorite.
Elika the Harodite.	Wanting.
26. Helez the Paltite.	Pelonite.
Ira s. Ikkesh the Tekoite.	28.
27. Abiezer the Anathothite.	
Mebunnai the Hushathite.	29. Sibbecai.
28. Zalmon the Ahohite.	Ilai.
Maharai the Netophahite.	30.
29. Heleb s. Baanah the Netophahite.	Heled.
Ittai s. Ribai of Gibeah.	31. Ithai.
30. Benaiah a Pirathonite.	
Hiddai of the brooks of Gaash.	32. Hurai.
31. Abi-albon the Arbathite.	Abiel.
Azmaveth the Barhumite.	33.
32. Eliahba the Shaalbonite.	
Ss. Jashen, Jonathan.	34. Ss. Hashem the Gizonite.
33. Shammah the Hararite.	Jonathan s. Shage the Hararite.
Ahiam s. Sharar the Ararite.	s. Sacar.
	35.
34. Eliphelet s. Ahasbai s. the Maacathite.	Eliphal s. Ur.
	36. Hepher the Mecherathite
Eliam s. Ahithophel the Gilonite.	Ahijah the Pelonite.
35. Hezro the Carmelite.	37.
Paarai the Arbite.	Naarai s. Ezbai.
36. Igal s. Nathan of Zobah.	38. Joel the brother of Nathan.
Bani the Gadite.	Mibhar s. Hagri.
37. Zelek the Ammonite.	39.
Naharai the Beerothite.	
38. Ira the Ithrite.	40.
Gareb the Ithrite.	
39. Uriah the Hittite	41.
	Zabad s. Ahlai.
	Adina s. Shiza the Reubenite.
	43. Hanan s. Maacah.
	Jehoshaphat the Mithnite
	44. Uzzia the Ashterathite.
	Shama and Jeiel } ss. Hotham the Aroerite.
	45. Jediael s. Shimri.
	Joha his brother, the Tizite.
	46. Eliel the Mahavite, Jeribai and Joshaviah ss. Elnaam.
	Ithmah the Moabite.
	47. Eliel, Obed, and Jaasiel the Mezobaite.

The first twelve mighty men, as recorded in 1 Ch 11, appear again also in I Ch 27^{1-15} as captains, each in course, month by month, commanding a monthly levy of 24,000 soldiers, beginning in the first month with Jashobeam, who is called s. Zabdiel, and reckoned as belonging to ss. Perez (IV. 1). The captain of the second month is Dodai, 'Eleazar s.' evidently having fallen from the text. With him is mentioned Mikloth as ruler. With Benaiah was associated Ammizabad his son; with Asahel, Zebadiah his son. Shammoth appears as Shamhuth and an Izrahite. Helez is called of Ephraim; Sibbecai, of the Zerahites (IV. 1); also Maharai; Benaiah, the eleventh captain, a Pirathonite of Ephraim; Heled appears as Heldai (I Ch 27^{15}), and of Othniel (IV. 46).

The names Zabad to Asiel (I Ch 11^{41b-47}) do not appear in 2 S, and were evidently derived from another source. A comparison of the two lists shows that the names vary in several instances, but it is frequently impossible to determine which form is original, or whether both may not be corrupt. The following observations are confined mainly to the variations which appear in 1 Ch, since the names of the list of 2 S are treated elsewhere (see arts.).

Notes on vv.$^{11-47}$: **11.** Jashobeam (s. Zabdiel, 1 Ch 27^{2}) (יָשָׁבְעָם) was originally Jishbaal (יִשְׁבַּעַל) or Ishbaal (אִישְׁבַּעַל) (Ki. *et al.*). The reference in Hachmonite is not known. **12.** Dodai (דּוֹדַי) of 2 S is to be preferred to Dodo (דּוֹדוֹ), cf. 1 Ch 27^{4}. Ahohite may be a patronymic of the family or clan Ahoah of Benjamin (VIII. 2^{c}). **27.** For Shammoth (שַׁמּוֹת) Ki. reads Shamhuth (שַׁמְהוּת), after LXX and I Ch 27^{8}. Harodite (חֲרֹדִי) is preferable to Harorite (הֲרוֹרִי), and the reference may be to Harod (Jg 7^{1}), (see HAROD). In 1 Ch 27^{8} he is called an Izrahite (יִזְרָחִי), but the true reading prob. is Zarhite (זַרְחִי), *i.e.* of ss. Zerah (IV. 1). Instead of Pelonite (פְּלוֹנִי) read Paltite (פַּלְטִי) (2 S) (Ges. *Lex.*^{12} Buhl, Ki.), and the reference then, acc. to Driver (*Text of Sam.* p. 283), is to Beth-pelet in S. Judah (Jos 15^{27}); but acc. to 1 Ch 27^{10} Helez belonged to Ephraim. **28.** Sibbecai is generally acknowledged to be the true reading. **29.** Ki. combines, on the support of LXX, the readings of 2 S and 1 Ch, and obtains Aliman (עֲלִימָן). **30. 31.** Heled or Heldai (1 Ch 27^{15}) is probably correct, and Ithai is equally as defensible as Ittai of 2 S. **32.** Ki. emends Hurai to Hiddai, but Budde (*Crit. Text*, 1 and 2 S) in 2 S emends Hiddai to Hurai. Abiel is probably correct. **33.** For Baharumite (בַּחֲרוּמִי) read Bahurimite (בַּחוּרִמִי), *i.e.* of Bahurim (wh. see). **34.** The corresponding text of 2 S is clearly defective. Probably we should read Jashen the Gunite, Jonathan s. Shammah the Hararite (Ki. Driver, Budde). On Gunite see XI. 1. The reference in Hararite is not known. **35 f.** Sharar and Eliphelet (2 S) are probably correct (Ki.). Ur and Hepher probably have arisen from the name of the f. Eliphelet. Ahasbai (2 S) is suspicious (Driv.). For Mecherathite (מְכֵרָתִי) read Maacathite (מַעֲכָתִי), and follow 2 S (v.^{34b}) for ^{36b}. **37.** Which of the two readings is to be preferred cannot be determined. **38.** The choice here seems to be in favour of 2 S. Joel, however, might stand. Mibhar (מִבְחָר) has arisen apparently from 'of Zobah' (מִצֹּבָה). **44.** Ashterathite = from Ashteroth, a city of Bashan, cf. 1 Ch 6^{71}. **46.** Mahavite (מַחֲוִים) is suspicious. Be. reads Mahanaimite, *i.e.* of Mahanaim (מַחֲנַיְמִי) (Ges. *Lex.*^{12} Buhl) **47.** A corruption also underlies Mezobaite (מְצֹבָיָה).

---

* Jehubbah (יְחֻבָּה) = and Hubbah (וְחֻבָּה).

† Helem (הֵלֶם) clearly = Hotham (הוֹתָם); Jether (יֶתֶר) = Ithran (יִתְרָן); and Ulla (עֻלָּא) probably is a corruption of one of the previous names, perhaps Shual (שׁוּעָל) (7) or Beera (בְּאֵרָא) (7).

‡ Under XIII. have been grouped, for the sake of reference, certain lists of names found chiefly in 1 and 2 Ch.

3. David's Officers over the Twelve Tribes of Israel—

Of Reuben, Eliezer s. Zichri.
,, Simeon, Shephatiah s. Maacah.
,, Levi, Hashabiah s. Kemuel.
,, Aaron, Zadok.
,, Judah, Elihu * brother of David.
,, Issachar, Omri s. Michael.
,, Zebulun, Ishmaiah s. Obadiah.
,, Naphtali, Jeremoth s. Azriel.
,, Ephraim, Hoshea s. Azaziah.
,, W. Manasseh, Joel s. Pedaiah.
,, E. Manasseh, Iddo s. Zechariah.
,, Benjamin, Jaasiel s. Abner.
,, Dan, Azarel s. Jeroham, 1 Ch 27^{16-22}.

4. Rulers of David's substance—

Azmaveth s. Adiel, over the king's treasuries.
Jonathan s. Uzziah, over treasuries in cities, castles, villages, and fields.
Ezri s. Chelub, over tillers of the ground.
Shimei the Ramathite, over the vineyards.
Zabdi the Shiphmite, over wine cellars.
Baal-hanan the Gederite, over olive and sycomore trees.
Joash, over cellars of oil.
Shitrai the Sharonite, over herds in Sharon.
Shaphat s. Adlai, over herds in the valleys.
Obil the Ishmaelite, over camels.
Jehdeiah the Meronothite, over asses.
Jaziz the Hagrite, over the flocks, 1 Ch 27^{25-31}.

On Chelub, v.^{26}, see IV. 44 note. Shiphmite occurs only here, and cannot be more closely defined. Meronothite refers to Meronoth, a place which seems to have been in the neighbourhood of Gibeon and Mizpah, cf. Neh 3^7. By a Hagrite we understand a descendant of Hagar or an Arabian tribe (cf. 1 Ch $5^{10. 19f.}$). On the other appellatives see arts.

5. Princes under Jehoshaphat appointed to teach the Law.—Ben-hail, Obadiah, Zechariah, Nethanel, Micaiah, 2 Ch 17^7.

6. Captains under Jehoshaphat.—Adnah, Jehohanan, Amasiah s. Zichri, Eliada, Jehozabad, 2 Ch 17^{14-18}.

The first three of these captains were of Judah, the other two of Benjamin. Each is said to have commanded from 180,000 men (Eliada) to 300,000 (Adnah).

7. Captains under the priest Jehoiada.—Azariah s. Jeroham, Ishmael s. Jehohanan, Azariah s. Obed, Maaseiah s. Adaiah, Elishaphat s. Zichri, 2 Ch 23^1.

These were associated with Jehoiada in the overthrow of Athaliah and enthronement of Joash. See ATHALIAH, JEHOIADA, JOASH.

8. Heads of ss. Ephraim.—Azariah s. Johanan, Berechiah s. Meshillemoth, Jehizkiah s. Shallum, Amasa s. Hadlai, 2 Ch 28^{12}.

These are mentioned as opposing, in the reign of Pekah, the bringing of Judæan captives to Samaria, and are said to have clothed and fed the captives, and then sent them home (2 Ch 28^{12-15}).

(*C*) LISTS OF FAMILIES AND PERSONS RECORDED IN CONNEXION WITH THE RETURN AND THE LABOURS OF EZRA AND NEHEMIAH †: — XIV.‡ Those who returned with Zerubbabel. XV. Those who returned with Ezra. XVI. The repairers of the wall of Jerusalem. XVII. Those who had foreign wives. XVIII. The signers of the Covenant. XIX. Priests and Levites of the days of Zerubbabel and Joiakim. XX. Participants in the promulgation of the Law and Dedication of the Wall. XXI. Residents of Jerusalem.

For the textual emendations see Kau.

2. Eliezer, Ariel, Shemaiah, Elnathan, Jarib, Elnathan, Nathan, Zechariah, Meshullam (chief men); Joiarib, Elnathan (teachers), Ezr 8^{16}.

These chief men and teachers (2), apparently of the company were sent by Ezra from the encampment near Babylon (see AHAVA) unto Iddo, the chief of a colony of Levites at Casiphia (wh. see), to secure Levites and Nethinim to accompany them to Jerus. for service in the temple. They secured Ishsechel (RVm) and Sherebiah of ss. Mahli, with 18 sons and brethren, and Hashabiah and Jeshaiah ss. Merari, with 20 sons and brethren, and 220 Nethinim. Unto Sherebiah and Hashabiah and ten brethren along with 12 chiefs of the priests, was given the care of the offerings of silver, gold, and brass which were being taken to Jerusalem. On the arrival these gifts of bullion and vessels were delivered unto Meremoth s. Uriah the priest, and Eleazar s. Phineas, Jozabad s. Jeshua, and Noadiah s. Binnui, Levites, Ezr 8^{15-35}.

XVI. BUILDERS OF THE WALL OF JERUSALEM.

Neh 3^{1-32}.

Eliashib the high priest, v.^{1}.
Men of Jericho, v.^{2a}.

XVIII. THE SIGNERS OF THE COVENANT.

Neh 10^{1-27}.

1. *The Governor* :—Nehemiah s. Hacaliah.

2. *Priests* (vv.$^{2-7}$):—Zedekiah, Seraiah, Azariah, Jeremiah, Pashhur, Amariah, Malchijah, Hattush, Shebaniah, Malluch, Harim, Meremoth, Obadiah, Daniel, Ginnethon, Baruch, Meshullam, Abijah, Mijamin, Maaziah, Bilgai, Shemaiah.

3. *Levites* (vv.$^{9-13}$):—Jeshua s. Azaniah, Binnui of the ss. Henadad, Kadmiel; Shebaniah, Hodiah, Kelita, Pelaiah, Hanan, Mica, Rehob, Hashabiah, Zaccur, Sherebiah, Shebaniah, Hodiah, Bani, Beninu.

4. *Chiefs of the People* (vv.$^{14-28}$):—Parosh, Pahath-moab, Elam, Zattu, Bani, Bunni, Azgad, Bebai, Adonijah, Bigvai, Adin, Ater, Hezekiah, Azzur, Hodiah, Hashum, Bezai, Hariph, Anathoth, Nobai, Magpiash, Meshullam, Hezir, Meshezabel, Zadok, Jaddua, Pelatiah, Hanan, Anaiah, Hoshea, Hananiah, Hasshub, Hallohesh, Pilha, Shobek, Rehum, Hashabnah, Maaseiah, and Ahiah, Hanan, Anan, Malluch, Harim, Baanah.

XIX. PRIESTS, LEVITES, AND PORTERS.

1. *Priests who returned with Zerubbabel and Jeshua* :—Seraiah, Jeremiah, Ezra, Amariah, Malluch, Hattush, Shecaniah, Rehum, Meremoth, Iddo, Ginnethoi, Abijah, Mijamin, Maadiah, Bilgah, Shemaiah, Joiarib, Jedaiah, Sallu, Amok, Hilkiah, Jedaiah, Neh 12^{1-7}.

2. *Levites* :—Jeshua, Binnui, Kadmiel, Sherebiah, Judah, Mattaniah, Bakbukiah, Unno, Neh $12^{8, 9}$.

3. *Priests and Priestly Houses in the days of Joiakim s. Jeshua* :—Of Seraiah, Meraiah; of Jeremiah, Hananiah; of Ezra, Meshullam; of Amariah, Jehohanan; of Malluchi, Jonathan; of Shebaniah, Joseph; of Harim, Adna; of Meraioth, Helkai; of Iddo, Zechariah; of Ginnethon, Meshullam; of Abijah, Zichri; of Miniamin, ——; of Moadiah, Piltai; of Bilgah, Shammua; of Shemaiah, Jehonathan; of Joiarib, Mattenai; of Jedaiah, Uzzi; of Sallai, Kallai; of Amok, Eber; of Hilkiah, Hashabiah; of Jedaiah, Nethanel, Neh 12^{12-21}.

4. *Chief Levites* :—Hashabiah, Sherebiah, Jeshua s. Kadmiel, Neh 12^{24}.

5. *Porters* :—Mattaniah, Bakbukiah, Obadiah, Meshullam, Talmon, Akkub, Neh 12^{25}.

These 'chief Levites' (4) who were over the service of song (ref.) and the 'porters' (5) belonged also to the time of Joiakim (Neh 12^{26}).

XX. 1. Priests and Levites, Participants in the Promulgation of the Law.

a. Mattithiah, Shema, Anaiah, Uriah, Hilkiah, Maaseiah, Pedaiah, Mishael, Malchijah, Hashum, Hashbaddanah, Zechariah, Meshullam, Neh 8^{4}.

b. Jeshua, Bani, Sherebiah, Jamin, Akkub, Shabbethai, Hodiah, Maaseiah, Kelita, Azariah, Jozabad, Hanan, Pelaiah, Neh 8^{7}.

c. Jeshua, Bani, Kadmiel, Shebaniah, Bunni, Sherebiah, Bani, Chenani, Jeshua, Kadmiel, Bani, Hashabneiah, Sherebiah, Hodiah, Shebaniah, Pethahiah, Neh $9^{4f.}$.

List *a* stood at the right and left of Ezra upon the platform; list *b* read and explained the law; list *c* gave responses on the fast-day in connexion with the reading of the law (see ref.).

2. Princes, Priests, and Levites, Participants in the Dedication of the Wall.

a. Hoshaiah, Azariah, Ezra, Meshullam, Judah, Benjamin, Shemaiah, Jeremiah, Neh 12^{32-34}.

b. Zechariah (see III. 4), Shemaiah, Azarel, Milalai, Gilalai, Maai, Nethanel, Judah, Hanani, Neh $12^{35f.}$.

c. Eliakim, Maaseiah, Miniamin, Micaiah, Elioenai, Zechariah, Hananiah, Neh 12^{41}.

d. Maaseiah, Shemaiah, Eleazar, Uzzi, Jehohanan, Malchijah, Elam, Ezer, Jezrahiah, Neh $12^{42f.}$.

All the names under *a* have been taken as those of princes of Judah (Croshy, Lange, *Comm.*, Eng. ed. *in loco*). Probably, however, only Hoshaiah was a prince of J., and Judah and Benjamin represent members of those tribes, and the other names different classes of priests (Oe. *in loco*). The names under *b* are those of Levitical musicians, and under *c* and *d* of priestly musicians (see ref.).

XXI. Residents of Jerusalem, Neh 11^{4-19}, 1 Ch 9^{3-17}. (The names are those of Neh ; for variations, see ref.).

1. *Of Judah*—
   - Athaiah * (see IV. 58^{b}).
   - Uthai † (see IV. 58^{a}).
   - Maaseiah (see IV. 3).
   - Jeuel † of Zerah.
2. *Benjaminites*—
   - Sallu (see VIII. 24).
   - Ibneiah † s. Jeroham.
   - Elah † s. Uzzi, s. Michri.
   - Meshullam † s. Shephatiah, s. Reuel, s. Ibnijah.
   - Gabbai.*
   - Sallai.*
   - Joel * s. Zichri (the overseer).
   - Judah * s. Hassenuah (second over the city).
3. *Priests*—
   - Jedaiah.‡
   - Joiarib.
   - Jachin.
   - Seraiah (see III. 14).
   - Adaiah (see III. 16).
   - Amashsai (see III. 17).
   - Zahdiel * s. Haggedolim (the overseer).
4. *Levites*—
   - Shemaiah s. Hasshub, s. Azrikam, s. Hashabiah, s. Bunni * of ss. Merari.†
   - Shabhethai.
   - Jozabad.
   - Bakhakkar.†
   - Heresh.†
   - Galal.†
   - Mattaniah (see III. 5).
   - Bakhukiah.
   - Abda § s. Shammua,§ s. Galal, s. Jeduthun.
   - Berechiah † s. Asa, s. Elkanah.
   - Uzzi, Neh 11^{22} (see III. 5).
5. *The Porters*—
   - Shallum (see III. 24).
   - Akkuh.
   - Talmon.
   - Ahiman.

In connexion with these residents of Jerus., Pethahiah s. Meshezabel of ss. Zerah is mentioned as being 'at the king's hand,' *i.e.* agent of the Persian king, in all matters concerning the people, Neh 11^{24}.

GENEALOGY OF JESUS CHRIST.—The only genealogies of the NT are those of Mt 1^{1-17} and Lk 3^{23-38}, two independent pedigrees, each purporting to give the descent of Joseph, reputed father of Jesus. The occasion of their insertion is the desire of the evangelists to set forth Jesus as actual heir-apparent to the throne of David. The attempt to vindicate their simultaneous accuracy by harmonistic devices has been abandoned by nearly all writers of authority as a violation of the text, or of historical credibility. Hence the light which modern research seeks from them falls rather on the century after than the centuries before the birth of Christ—on the history of the doctrine of his Davidic sonship rather than His actual descent.

i. TREATMENT OF THE QUESTION BY JESUS AND THE APOSTLES.—If the progress of critical and exegetical science has shown, on the one side, the futility of all harmonistic theories for rescuing the authority of the pedigrees, it has more than compensated for the loss by establishing with equal certainty the acceptance of the fact of the Davidic descent of Jesus by Himself, His contemporaries, and His immediate followers. That Davidic descent was then considered a prerequisite to the establishment of Messianic claims is apparent from a number of NT passages. The use of the title 'Son of David' in Mt 15^{22} $20^{30.31}$ ($=9^{27}$) 21^{9} and parallels is official, implying no knowledge of Jesus' birth or descent, but only the conviction that He is the Messiah. It indicates, however, that Davidic descent was popularly assumed as an attribute of the Christ. This is much more distinctly implied in Mt 12^{23}, and by the question put by Jesus to His Pharisaic opponents in the temple, Mt 22^{41-46} 'What think ye of Christ? whose son is he?' Such a question by one whose claims to Davidic descent were open to suspicion would have put a weapon in the hands of His foes. Jesus, on the contrary, is not merely confident that they will answer 'David's son,' but is at least equally confident of their inability to disprove His Davidic descent, though He refuses to base His claims upon it. The same tacit assumption of this as an undisputed fact characterizes the rare allusions of St. Paul, Ro 1^{3}, 2 Ti 2^{8} (cf. He 7^{14}), the ascriptions of Rev 3^{7} 5^{5} 22^{16}, and, finally, the distinct appeal to prophecy of Ac 2^{30} 13^{23}. The last two passages, as emanating from the same source as one of the pedigrees, and the passages Mt 2^{5}, Lk 2^{4}, where Bethlehem as the birthplace of David is regarded as the necessary birthplace of the Messiah, should perhaps not be cited as independent witness to the existence of the popular assumption; but the great number of OT passages pointing to this, especially Ps 132^{11}, which cannot date more than a few centuries before NT times, and the Messianic petition of Ps.-Sol 17^{23}, written not more than 50 years B.C., 'Raise up unto them, O Lord, their king the Son of David,' should suffice to show that Messianic pretensions absolutely devoid of evidence of Davidic descent could not have passed unchallenged, as those of Jesus seem to have done.*

The continued existence in the family of Jesus of claims to Davidic descent, such as could hardly have originated in His own time, is evidenced by Hegesippus (*ap.* Eus. *HE* III. 20 and 32), who tells of repeated attempts to involve His collateral descendants in trouble with the Roman authorities on this account. But the suspicions of even a Domitian were disarmed when two grandsons of Jude, the Lord's brother, were brought before him, confessed their Davidic descent (explaining, however, that the kingdom of Christ was 'not temporal or earthly, but heavenly and angelic, to appear at the end of the world'), gave account of their property,—an undivided 39 acres of land, valued at 9000 denarii,—and showed their hands calloused by labour.

It is a fair inference from these facts that the Davidic descent of Jesus was in His own day practically undisputed, at least among His personal followers. What the evidence was on which this assumption rested, whether mere oral family tradition, or public records, and to what extent the basis was trustworthy, is a wholly different question, which can be settled only by the careful scrutiny of the sources.

ii. TREATMENT IN THE ECCLESIASTICAL PERIOD.—There can be no doubt that from near the beginning of the 2nd cent., when our first and third Gospels began to come into general circulation, the Church believed itself in possession of conclusive documentary evidence. Even the collateral descendants of the Lord, the so-called δεσπόσυνοι, to whom Julius Africanus, the contemporary of Origen, applied on this subject, had no other authority to appeal to than the genealogies of Mt and Lk, though they added an ancestress or two of doubtful historicity, and omitted the names Matthat and Levi, Lk 3^{24}. Had the two Gospels been in agreement, the record would perhaps never have been disputed, but the discrepancy was too glaring to be ignored. Even before the time of Africanus and Origen the incompatibility of the pedigrees (ἡ διαφωνία τῶν γενεαλογιῶν) had been an occasion of derision to many an earlier opponent of Christianity, whom Celsus, according to Origen (*Opera*, ed. Delarue, i. p. 413), might have named had he been better informed. It is no wonder, then, that from the earliest period to which it can be traced, down to recent times, the Church has treated this subject only defensively, and from the harmonistic standpoint.

The first known harmonist of the Gospels is Tatian, a pupil of Justin Martyr. His *Diatessaron*, however, avoided the difficulty by omitting the genealogies altogether. Half a century later the problem was courageously confronted by Africanus, a careful scholar, for many years bishop of Nicopolis (previously Emmaus) in Palestine. His *Letter to Aristides* (see Spitta, *Der Brief des Jul. Africanus*, Halle, 1877; Routh, *Rel. Sac.* ii. pp. 228–237; *Ante-Nicene Fathers*, vi. p. 125; and Eus. *HE* i. 7) proposed a solution of the difficulty which quickly gained general acceptance in the Church, and for 12 centuries retained undisputed supremacy. The theory was not derived, as Eusebius wrongly inferred, from the *desposyni*, but is expressly stated by Africanus himself (§ 5) to be 'unsupported by testimony.' It assumes a levirate marriage (Dt $25^{5.6}$) in the case of either Jacob or Heli, Joseph's father according to Mt and Lk respectively, the son of the widow by his surviving brother being reckoned a son of the deceased in one or the other genealogy. This explanation requires the further assumption that the brothers Heli and Jacob had different fathers. The objections are overwhelming.

1. The theory does not exonerate the evangelists, since one pedigree or the other uses terms of filial relationship in a fictitious and illegal sense. 2. Granting, against all probability, the possible continuance of the levirate law, in the case here presupposed—that of uterine brothers—it would not apply (Maimonides, *Jabom Ve Chalitza*, c. 1). 3. Granting even the applicability of the assumption in the case of Joseph, it cannot reasonably be introduced a second time to account for the fact that Shealtiel, f. of Zerubbabel, is at the same time s. of Jechonias (Mt) and of Neri (Lk). Yet this expedient (so W. H. Mill, *Pantheistic Principles*, p. 165) is less absurd than to assume, with Augustine (followed by Hottinger and Vöss), that at the same period of Jewish history there were two (Hottinger three) different fathers of Davidic lineage, each bearing the rare name Shealtiel, and having each a son bearing the rare name Zerubbabel. 4. If our own certainly more accurate text* be followed, instead of that of Africanus, and Matthan and Matthat, paternal grandfather of Joseph according to Mt and Lk respectively, be identified, as is probable, the expedient of a levirate marriage by uterine brothers must be introduced, not twice only, but three times over.

Under the weight of such inherent and extreme improbabilities the Africanian theory of harmonization, after suffering various modifications at the hands of later harmonists, has long since broken down, and is to-day universally abandoned.

The alternative harmonistic theory owes its currency to Annius of Viterbo, *c.* A.D. 1490, and was widely accepted in the time of the Reformation. It has still an adherent of high repute in the person of the veteran NT scholar B. Weiss, who in his *Leben Jesu* (i. 205, 2nd ed.) puts it in its most favourable light. It assumes that the pedigree of Lk is that, not of Joseph, but of Mary, overcoming the sense of Lk 3^{23} *ὢν υἱός, ὡς ἐνομίζετο,* Ἰωσὴφ *τοῦ* Ἡλεί, *κ.τ.λ.*, by various expedients. Thus the clause was rendered 'being the son (as was supposed of Joseph) of Heli,' *i.e.* being supposed to be the son of Joseph, but being in reality the *grandson* of Heli; or the *τοῦ* was translated 'son-in-law' (so Holmes, 'Geneal. of Jesus Christ' in Kitto's *Encycl.*^{3}; Robinson, *Harmony of Gospels*, pp. 183–185, *et al.*), or 'adopted son' (so Wetstein, Delitzsch, *et al.*, following Augustine). Weiss (following F. Gomar, *de Geneal. Christi*; J. Lightfoot, *Hor. Hebr.* vol. iii. p. 54 [ed. Gandell]; G. J. Voss, *de J. Chr. Geneal.*; and Yardley, *The Genealogies of Christ*) proposes to regard the names as parallel, not consecutive. The list then would be, not a pedigree at all, but a huge parenthesis between *ὢν υἱός* (v.^{23}) and *τοῦ θεοῦ* (v.^{38}).

---

* Even the passage Jn 7^{42} is no exception to the rule that the objection that He is not of Davidic descent is never raised in NT times to Jesus' Messianic claims. The speakers (at Jerus. according to 7^{37}) are strangers to Jesus (8^{48}), and merely infer, from His speech or otherwise, that He is a Galilæan. This is, indeed, contrary to their notion of Davidic origin, but the *author* presupposes the birth in Bethlehem.

* See WH, *Gr. Test.* App. p. 57.

The chief objection to this theory in all its forms can hardly be more convincingly expressed than by citing the naïve admission of its advocate, Holmes (in the art. above mentioned, p. 96), of the fatal weakness of 'all theories,' meaning *harmonistic* theories: 'If it be objected that this table [Lk] is made out as literally as the other, *in Joseph's name*,* and that we violate the literal statement of the evangelist if we transfer the line *to Mary*, we answer, that as Joseph cannot have had two fathers, which yet the genealogies *seem* literally to assign to him (Mt 1^{16}, Lk 3^{23}), *some* explanatory accommodation is necessary to all theories.'

The confession of violence to the text is not without reason. It is incredible that *υἱός* can mean both 'son' and 'grandson' in the same breath, as in the first of the proposed renderings;† equally incredible that in the same connexion *τοῦ* should stand once for 'son-in-law' and the other 75 times for 'son'; while the suggestion that the genealogy is not intended for a genealogy, but merely a list of names of persons of whom Jesus might have been considered the son, though in reality the Son of God, will convince no candid thinker.

But the proposed theory labours under further difficulties. As Plummer well says (*op. cit.* p. 103): 'It would have been quite out of harmony with either Jewish or Gentile ideas to derive the birthright of Jesus from his mother. In the eye of the law Jesus was the heir of Joseph: and therefore it is Joseph's descent which is of importance.' This doubtless accounts for its general rejection by ancient writers. As early as Justin Martyr and *Protevang. Jacobi*, Mary, for obvious reasons, is represented as also descended from David; but with two exceptions no attempt is made to claim for her either of the pedigrees. *Protev. Jac.*, in fact, makes her the daughter of Joachim and Anna. Irenæus (III. xxi. 5, 9) regards the pedigree of Mt as a line expressly excluded from the Messianic succession (Jer $22^{24\text{-}30}$ $36^{30.\,31}$); but this is Joseph's. Jesus is the Son of David only through Mary, whose pedigree is given by Luke. Victorinus (*c.* 300) curiously inverts this theory by adopting as Mary's the genealogy of Mt.‡ Cod. D boldly cuts the knot by substituting in Lk $3^{24\text{-}31}$ the line of Mt, following, however, a text seemingly older than our Mt (see Resch, *T. u. U.* x. 5, pp. 182–201; and Graefe in *SK*, 1898, 1).

Confessed violence to the text which he assumes to vindicate is the suicide of the harmonist. Hence the only treatment which to-day can come into consideration is the critical.

iii. TREATMENT BY MODERN CRITICISM.—Reconciliation of discrepant sources by suppositions within the limits of loyalty to the text and to historical probability is, *per contra*, the first duty of rational criticism. It being admitted, therefore, that both genealogies are given as Joseph's, and that explanation by resort to the levirate law is impracticable, the theory presented by Lord A. C. Hervey (*Genealogies of our Lord*, and art. 'Geneal. of Jesus Christ' in Smith's *DB*^{2}) has much in its favour, and is, in fact, the prevailing view among English divines. It is also widely accepted in modified form among German commentators. According to this view it was not the intention of both evangelists to give an actual pedigree, but only of Lk (Meyer, Holtzmann, *et al.*, would say 'the *source* followed by Lk in his opening chs.'). Mt (better, 'the source from which our evangelist derived his genealogy') does not trace the order of actual descent, but only of *throne-succession* (so already Grotius). Thus Solomon, although not the true ancestor of Joseph, is mentioned first as heir of the throne of David; then Shealtiel for the same reason, though he was not actually son of Jechoniah, but of Neri (Lk 3^{27}); then Eliakim, and finally Jacob, though neither was a real ancestor of Joseph. By thus throwing all the burden of inaccuracy upon Mt we may rescue at least the possibility of accuracy for Lk.

In favour of this view it must be allowed that Mt's genealogy is extremely defective, since it omits the names Ahaziah, Joash, Amaziah between Joram and Uzziah, and gives but six generations as against thirteen in Lk between Ἀβιούδ (= Ἰούδα [Lk] = הוֹדַוְיָהוּ [1 Ch 9^7]) and Matthan (= Matthat [Lk]). Barely are the names thus made to cover a period of more than 500 years. It is also manifest that its author simply follows in an uncritical manner the royal succession of the OT from David down to the last poor shadow of a Davidic king, 'Zerubbabel son of Shealtiel' (1 Ch 3^{19}, Ezr 2^2 etc., Neh 7^7 etc., Hag $1^{1.\,12.\,14}$ etc., Zec $4^{6.\,7.\,9.\,10}$). But it cannot be allowed that our evangelist by his *ἐγέννησεν* means anything else than actual physical descent. Of what significance his edifying comment on Bathsheba as the mother of Solomon, if the reader is not to infer that she is thus an ancestress of the Messiah? That he has embodied in his Gospel a current throne-succession not of his own manufacture is not only *à priori* probable, but is evident from the apparent blunder in vv.$^{11.\,12}$, by which the 'tesseradecad' from the carrying away into Babylon unto Christ contains not, as stated, 'fourteen generations,' but thirteen. It is, indeed, easy to cite examples from contemporary literature for the counting of a name twice to make out the hebdomad or decad into which genealogies were usually divided (see Mill, *op. cit.*, quoted by Hervey, *op. cit.* p. 886); but in this case more than enough of names were available in 1 Ch $3^{17\text{-}19}$ to make the count correspond to that of the first two sections of the table. It is probable, therefore, as was already pointed out by Jerome, that we have here an instance, on the part of the evangelist, of the confusion common in both Gr. and Lat. writers (Clem. Al., Ambrose, Africanus, Epiphanius, also 1 Es $1^{37.\,43}$) between Jehoiakim and Jehoiachin; for Jehoiachin had no 'brethren' (Mt 1^{11}), but Jehoiakim had three, two of whom did succeed to the throne (Jer 22^{11}). The few texts, however, which insert the clause Ἰεχονίας *δὲ ἐγέννησε τὸν* Ἰεχονίαν, are certainly corrupt, since the reading is later than Porphyry, who had derided this flaw in the genealogy. We must therefore distinguish between the evangelist, who finds edifying significance in the common genealogical device of double heptads (cf. the genealogies of Gn 4–11 and Budde, *Bibl. Urgeschichte*, p. 90), or in the names of Rahab and Bathsheba (so Rabbinic authorities cited by Wetstein, *in loc.*; cf. He 11^{31}, Ja 2^{25}), and his unknown authority. The former certainly supposed himself to be giving an actual and complete pedigree of Joseph (see v.^{17} *πᾶσαι*), not a mere throne-succession; whether the latter so believed, or not, must be left in doubt. The list of ten names which he inserts between Joseph and Zerub., beginning with the last generation mentioned by Ch in much altered form, may represent a current throne-succession, carrying down the line from Zerub. towards the Maccab. period,* taken up without more ado as *ipso facto* belonging to

Jesus. Our judgment as to the probable historical value of such current lists must be formed in the light of ancient testimony (see below).

The genealogy of Lk has every appearance of resting on more carefully prepared data, as we should expect from the evangelist's painstaking method (Lk 1$^{1-4}$); but it is even more certain in this case that our author is adapting earlier material to his own uses. The pedigree, like the story of the infancy to which it probably belonged, must have been derived from Pal. sources. To the occidental mind, it is true, there would seem to be a certain incongruity between the account of the miraculous generation and the introduction of a pedigree of *Joseph*. This feeling is apparent in the evangelist's qualifying insertion in 3^{23} ὡς ἐνομίζετο. It has been argued that even the sources used in these preliminary chapters are themselves in conflict on this point, the references to Joseph as the 'father' of Jesus (2$^{33, 43}$), and the genealogy, indicating a point of view different from that of the main course of the story. But recent research has suggested that, to the contemporary Jewish mind, there was no incompatibility. Joseph might be not merely the putative or adoptive, but the real father of Jesus, at the same time that the birth was due solely to 'the power of the Highest' (1^{35}). Isaac, in like manner, was spoken of as 'God-begotten' (cf. Ro 4$^{17-20, 24}$, He 11^{12}), without any idea of denying the reality of his relation to Abraham. The ὡς ἐνομίζετο is therefore to be attributed to the evangelist as against the source.

It is also a fair inference, from the very object of the pedigree, that the source did not carry it back beyond Abraham. Hence the extension back to Adam is due to the humanitarian bent of the evangelist, which is even more apparent in the curious addition τοῦ θεοῦ, by which the divine sonship of the race is indirectly taught. Moreover, the text followed for these earliest 20 generations (10 from Creation to Noah, 10 from the Flood to Abraham) is manifestly the LXX, which alone gives the second Cainan (3^{36}), whereas the source in 1^{17} cites from an Aramaic version.

Finally, there is a curious indication in 3^{27} that the evangelist has not only (as is probable) changed the place of the genealogy, but inverted its order. On 3^{27} we have the following comment from Plummer (*Comm.* p. 104): 'Rhesa, who appears in Lk, but neither in Mt nor in 1 Ch, is probably not a name at all, but a title, which some Jewish copyist (?) mistook for a name. "Zerubbabel Rhesa," or "Zerubbabel the prince," has been made into "Zerubbabel (begat) Rhesa."' This correction brings Lk into harmony with both Mt and 1 Ch. For (1) the Gr. Ἰωανάν represents the Heb. Hananiah (1 Ch 3^{19}), a generation omitted by Mt; and (2) Lk's Ἰούδα is the same as Mt's Ἀβιούδ (Jud-a = Ab-jud). Again, Ἰούδα or Ἀβιούδ may be identified with Hodaviah (1 Ch 3^{24}); for this name is interchanged with Judah, as is seen by a comparison of Ezr 3^{9} and Neh 11^{9} with Ezr 2^{40} and 1 Ch 9$^{7, 11}$. To have caused the mistake, the original form of the genealogy must of course have been a simple list of names in the order Zerubbabel, Rhesa, Joanan, etc., and not, as now, Ἰωανὰν τοῦ Ῥησὰ τοῦ Ζοροβάβελ, κ.τ.λ.

Taking this list of names in the most original form to which we can restore it, we observe at once that its form is of the same mnemonic type as Mt's, only, as in the series from Zerub. to Jesus in Mt, the commoner system of (double) decads is followed. There are precisely 40 names in all between David and Christ, of which 20 are pre-exilic and 20 post-exilic. The former series begins with Nathan s. of David, the latter with Salathiel (=Shealtiel) f. of Zerub., ending with Joseph f. of Jesus. The list from Adam to Abraham likewise consists of 20, that from Abraham to David being, of course, a tesseradecad.

Twenty generations is not, indeed, an improbable number for the period from David to the Exile (*c.* 400 years); but a comparison of Lk 3^{27} with 1 Ch 3$^{17-24}$ will show that at least four* generations have been omitted between Joanan and Joda; hence the number of generations at least is artificial.

Do the names themselves give any indication of being drawn from trustworthy sources? Allowance must be made for a probable disposition on the part of 1st cent. scribes to assimilate the older names to those in current use (*e.g.* Ἰουδά = הוֹדַוְיָהוּ, Ἰωανάν = חֲנַנְיָהוּ), and possibly (so Hervey, *Genealogies*, pp. 36, 90 ff.) for a disposition in certain families to form names by variations of a common root, though this might, with equal plausibility, be attributed to the pedigree-makers. Nevertheless, it must be admitted that this list of names presents phenomena unparalleled in any authenticated OT pedigree. There is no indication in the names of the OT of the practice referred to in Lk 1^{61} (cf. Gray, *Heb. Prop. Names*, 2 ff.). Nor can the practice of giving 'Scripture' names, so manifestly common in Maccab. times and later, have existed to any extent in the earlier period. Hence, while there may be nothing strange in the names Levi and Joseph, as third and sixth ancestor of Joseph f. of Jesus, the series Joseph, Juda, Simeon, Levi, as contemporaries of Ahaziah, Joash, Amaziah, and Uzziah, is surprising. Add to these the names Matthat (*bis*), Mattathias (*bis*), and Mattatha, variants upon the root of 'Nathan,' the names Na[h]um, Amos, and the fact that out of the total of 42 names in Mt and Lk not directly taken from the OT there are but 16 which have not more or less demonstrable affinity with the later 'scriptural' type, and the result cannot be considered favourable to the historical trustworthiness of the sources.

iv. EXTERNAL EVIDENCE.—In the absence of other evidence, the seemingly late character of the names of the supposed Davididæ of Mt and Lk might perhaps be insufficient to justify doubt. But the careful investigations of Africanus (*op. cit.*), when compared with the earliest NT treatment of the subject, and the further knowledge obtainable from Eus. (*Qu. ad Steph.* iii. 2), and the later Jewish theology (see Delitzsch in *Ztschr. f. Luth. Theol.* 1860, iii. p. 460) as to current attempts to determine the Davidic descent of the Messiah, shed a light upon the question of the origin of our pedigrees which should not be less welcome because somewhat unfavourable to their historical trustworthiness.

Africanus' informants were in possession of the pedigrees of Mt and Lk, but could give him neither the means of reconciling their discrepancies nor of establishing the fact requiring to be proved, because of the non-existence of public records. That such had been kept down to the time of Herod the Great they firmly believed, accounting for their disappearance by a demonstrably apocryphal tale of Herod's burning them in order to conceal his own base lineage.† They frankly confessed that the pedigrees in their possession were made up ἔκ τε τῆς βίβλου τῶν ἡμερῶν [καὶ ἔκ μνήμης].‡ The βίβλος τῶν ἡμερῶν is doubtless the Heb. דִּבְרֵי הַיָּמִים, *i.e.* Book of Days (=Chronicles); but 'memory' in the time of Herod, and later, would hardly be of great service to determine the descendants of Nathan *ben* David. The industry of pedigree-making appears as flourishing then as to-day, and basing itself upon the same foibles. 'A few of the more careful,' says Africanus, immediately after the story of Herod's escapade, 'having procured private records of their own, either by remembering the names, or by getting them in some other way from the registers, pride themselves on preserving the memory of their noble extraction. Among these are those already mentioned, called Desposyni, on account of their connexion with the family of the Saviour.'

If the current pedigrees were indeed of this character, we can readily understand the attitude of Jesus and the older NT writers toward the question of His Davidic descent. He Himself, in Mt 22^{41-46} and parallels, expressly declines to base His Messianic claims on any such trivial and external, if not indeed unsafe, foundation. To be considered one of the Davididæ was an honour which He shared with his elder and younger contemporaries, Hillel and Gamaliel; but Jesus and His first followers (including St. Paul) on the one side, His opponents on the other, are equally content to let the question of descent fall into the background, which would not have been possible had documentary proof either for or against His heirship been accessible to either side. The earliest of our Gospels, and that which though latest is most loftily apostolic in tone, pass by the question of Jesus' descent. One is tempted to find a trace of the same disposition in the ἀρχιερεὺς ἀγενεαλόγητος of He 7^3. It is the Palestinian sources of the latter part of the century, on which the infancy chapters of Mt and Lk are based, which first show traces of the assumption that a formal Davidic pedigree is needful to the demonstration of His Messianic claims. But we have already observed that in these *sources* there is no consciousness of incongruity between tracing the pedigree of Jesus through Joseph and the story of His miraculous birth. Not until the times of Justin Martyr do we find on the side of the orthodox a disposition to claim on this account Davidic descent for Mary, and on the part of the Ebionites to reject the narrative of Jesus' miraculous birth, not from incredulity, but to rescue the doctrine of His Davidic descent.

---

* According to LXX, adopted by Kittel in Haupt's critical text, *nine*, *i.e.* one entire decad, including Hodaviah.

† Herod's lineage was not base, as represented (Afric. *ad Arist.* § 4), but noble (Jos. *Ant.* XIV. vii. 3). Moreover, the public records (which, however, related only to Aaronic families) were still in existence in Josephus' time (*Vita*, § 1; cf. *c. Ap.* i. 7).

‡ The bracketed words are supplied from the tr. of Rufinus, '*partim memoriter*, partim etiam ex dierum libris,' in accordance with the context (τε and the statement that the *desposyni* were among those who made up their pedigree in this way. See text).

It is among the Jewish Christians of Palestine in the sub-apostolic age, perhaps among the two branches of the *desposyni* themselves, one of whose seats was at Cochaba, near the centre of Ebionism (Epiphan. xxx. 2, 16), the other at Nazara, perhaps the centre of the other Jewish Christian sect of 'Nazarenes,' that we must look for the origins of our two genealogies. Nor have we far to seek for the explanation of their discrepancy. Among the current Rabbinic disputes of the 1st cent. was the question whether Messiah's descent would be of the royal line, through Solomon and his successors on the throne (Jer 23^5 30^9 $33^{15.17}$); or, on account of the denunciation and rejection of Jechoniah and his seed (Jer $22^{28.30}$ 36^{30}), through Nathan (Euseb. *Qu. ad Steph.* iii. 2). The first of our pedigrees represents the older and simpler idea. The second, the later reflection that Messiah's line could not include the series of ungodly kings. Of the component elements of each we can know no more until we have more intimate acquaintance with the methods of the pedigree-makers of the time. We may, however, infer something as to the date of our evangelists' work from the manifest interval between their construction and their final adoption into the story, and from the further fact of their construction in decads framed with either Joseph or Jesus in view, implying their origin in Christian circles. That origin is certainly later than when Jesus and His immediate followers were doing all in their power to detach current expectation from these externalities and fix it upon His spiritual Messianic claim,—to subordinate the title 'Son of David according to the flesh' to that of 'Son of God with power according to the Spirit of Holiness' (Ro $1^{3.4}$).

B. W. BACON.

GENEALOGY.—Timothy is warned (1 Ti 1^4) not to give heed to fables and endless genealogies (*μηδὲ προσέχειν μύθοις καὶ γενεαλογίαις ἀπεράντοις*), and Titus (3^9) to avoid foolish questions and genealogies (*μωρὰς δὲ ζητήσεις καὶ γενεαλογίας*). What were these 'genealogies'? Some Fathers towards the end of the second century understood the word to refer to the emanations of æons and of angels which formed part of the *gnosis*, or secret knowledge claimed by the Gnostics of their own day (see GNOSTICISM). But a parallel phrase in Polybius (IX. ii. 1, *περὶ τὰς γενεαλογίας καὶ μύθους*) refers to the mythological stories which earlier historians gathered round the birth and descent of their heroes. Similar legends are found in Philo, Josephus, and the Book of Jubilees, regarding the Jewish patriarchs and their families. And if, with Hort (*Judaistic Christianity*, 135 ff.), we may suppose that such genealogical tales had begun to creep from the Jewish into the Christian communities of Asia Minor, the necessity for such a warning to Timothy and Titus will be sufficiently understood.

GENERAL.—1. Once AV uses 'general' to translate שַׂר, 1 Ch 27^{34} 'The general of the king's army was Joab.' The most usual trⁿ is 'captain,' which RV prefers, after Gen. and Bishops'. Cov. has 'chefe captayne.' See CAPTAIN.

2. As an adj. 'general' means 'common to all,' 'universal,' as Ad. Est 15^{10} (*κοινός*); 2 Mac 3^{18} 'Others ran flocking out of their houses to the general supplication' (*ἐπὶ πάνδημον ἱκετίαν*, AVm 'to make general supplication'; RV 'to make a universal supplication'). Latimer (*Sermons*, ed. 1584, p. 182) says, 'The promises of God our Saviour are general; they pertain to all mankind. He made a general proclamation, saying, Whosoever believeth in me hath everlasting life. . . . Also consider what Christ saith with his own mouth: Come to me, *all* ye that labour and are laden, and I will ease you. Mark here he saith, Come *all* ye; wherefore then should any man despair to shut himself from these promises of Christ, which be general, and pertain to the whole world?' In He 12^{23} the Gr. word *πανήγυρις* is trᵈ in AV 'general assembly,' and RV retains the rendering. The sense is again 'universal assembly,' the adj. 'general' being intended to represent the *πᾶς*, 'all,' in the word.

The word *πανήγυρις* (from which comes 'panegyric,' a speech at a festival) is found only here in NT. In LXX it stands for מוֹעֵד Ezk 46^{11} (EV 'solemnities,' RVm 'appointed feasts'), Hos 2^{11} (EV 'season') 9^5 (AV 'solemn,' RV 'solemn assembly'); and for עֲצָרָה Am 5^{21} (EV 'solemn assemblies'). In classical literature it is in frequent use to denote a national or general gathering for festive (and especially festive and religious) purposes, as at the Olympic, Isthmian, and Nemean games. The *ἐκκλησία* was also an assembly of the people, but not so distinctively national, and rather for political than festive purposes; while *ἑορτή* signified a feast or festal gathering, but had no national character attached to it. It is surprising, therefore, that מוֹעֵד, which is a general religious assembly, and even עֲצָרָה, which is a religious though not a national gathering, are not more frequently rendered by *πανήγυρις* in LXX. Cremer suggests that heathen customs were too closely associated with this Greek word, and he thinks it would not have been used where it has been but for the accumulation of Heb. synonyms in those four passages (see Cremer, *Bibl. Theol. Lex. s.v.*, and Trench, *NT Synonyms*⁸, p. 5, § 1).

The choice of this word by the writer of the Ep. to the Hebrews is an element in the determination of the meaning of the passage in which it occurs, one of the most difficult problems in the Epistle.

There is practically no difference of reading, *μυρίων ἁγίων* D_2* and *μυριάδων* vg., for *μυριάσιν*, being probably suggestions to simplify the construction. The difficulty lies in the punctuation. There are five possible arrangements—

1. *καὶ μυριάσιν, ἀγγέλων πανηγύρει; καὶ ἐκκλησίᾳ πρωτοτόκων ἀπογεγραμμένων ἐν οὐρανοῖς.*

'And to myriads, a general assembly of angels; and to the Church of the firstborn whose names are written in heaven.'

2. *καὶ μυριάσιν ἀγγέλων, πανηγύρει; καὶ, κ.τ.λ.*

'And to myriads of angels, a general assembly; and to the Church,' etc.

Moses Stuart, Eager, Edwards, and Farrar distinctly prefer the first arrangement; Chrysostom, Oecumenius, Theophylact, Erasmus, Luther, Calvin, Grotius, Hooker, Weiss, Vaughan, Thayer, Kay, Westcott, Briggs prefer the second. But the meaning is the same, though the punctuation differs; and taking the two together without the comma, *καὶ μυριάσιν ἀγγέλων πανηγύρει; καὶ, κ.τ.λ.*, we get the sense which is adopted by Tisch. after all the Gr. MSS which exhibit the connexion of words (including AC), the Syr. and Lat. VSS, Origen, Eusebius, Basil (*multitudinem angelorum frequentem*), Vulg. (*multorum millium angelorum frequentiam et ecclesiam primitivorum, qui conscripti sunt in cœlis*), Wyc. ('and [1388 adds *to*] the multitude of many thousynd aungels, and to the chirche of the firste men'), Tind. ('and to an innumerable sight of angels, and unto the congregation of the fyrst borne sonnes'), Cov., Matt., Cran., Gen., Bish., Rhem., Oltramare (*du chœur joyeux des myriades d'anges, de l'assemblée des premiers-nés*), Segond.

3. *καὶ μυριάσιν, ἀγγέλων πανηγύρει καὶ ἐκκλησίᾳ πρωτοτόκων.*

'And to myriads, a general assembly of angels and a congregation of firstborn.' That is, myriads both of angels and of firstborn. This is the view of Wolf, Rambach, Griesbach, Bengel, Knapp, Böhme, Kuinoel, Tholuck, De Wette, Lachmann, Theile, Bleek, Olshausen, Delitzsch, Trench, Ebrard, Alford, Dale, Maclaren, RVm.

4. *καὶ μυριάσιν ἀγγέλων; πανηγύρει καὶ ἐκκλησίᾳ πρωτοτόκων.*

'And to myriads of angels; to the general assembly and Church of the firstborn.' This is the order of the Elzevirs, Beza, Calov, Carpzov, Storr, Joannes Gregorius, Matthaei, Alberti, AV, RV, Kurz, Liddon, Saphir ('to the general assembly of the Church of the firstborn ones'), Lünemann, Hofmann, Cremer (who argues that only because *πανήγυρις* and *ἐκκλησία* both refer to the same company can the presence of *πανήγυρις* be accounted for; it is an assembly, yea a festive one—an argument which would have more force if *π.* followed *ἐκ.*), Ostervald, Angus, Rendall, WH.

5. *καὶ μυριάσιν ἀγγέλων, πανηγύρει καὶ ἐκκλησίᾳ πρωτοτόκων.*

'And to myriads of angels, a general assembly and congregation of firstborn.' That is, the angels are both the general assembly and the congregation of firstborn. So Davidson (who argues forcibly), Moulton, Weizsäcker (*und Myriaden von Engeln, einer Festversammlung und Gemeinde von Erstgeborenen*).

The adv. 'generally' means (1) *universally* in every place, Jer 48^{38} 'There shall be lamentation generally upon all the housetops of Moab' (כֻּלֹּה, lit. 'all of it' [see Driver on 2 S 2^9]; RV 'every where'). Cf. Art. XVII. (*XXXIX. Articles*), 'Furthermore, we must receive God's promises in suchwise, as they be generally set forth to us in Holy Scripture' (*ut nobis in sacris literis generaliter propositæ sunt* [*]); Hooker, *Eccl. Polity*, v. lv. 1, 'God in Christ is generally the medicine, which doth cure the world'; Pr. Bk., *Catechism*, 'How many Sacraments hath Christ ordained in his Church? Two only, as generally necessary to salvation'; and Chaucer, *Troilus and Criseyde*, i. 86—

> 'The noyse up roos, whan it was first aspyed,
> Thorugh al the toun, and generally was spoken,
> That Calkas traytor fled was, and allyed
> With hem of Grece.'

(2) *Together, as a whole*, 2 S 17^{11} 'Therefore I counsel that all Israel be generally gathered unto thee' (הֵאָסֹף יֵאָסֵף, LXX συναγόμενος συναχθήσεται; Vulg. *Congregatur ad te universus populus Israel*; RV 'together'). In this sense Tindale uses 'in general' (*Expositions*, on Mt 6^{1-4}), 'For we must have a place to come together, to pray in general.' And from this arose the modern meaning 'on the whole.' Shaks. makes Bottom say 'generally,' 'as a whole,' when he means just the opposite, 'individually,' *Mids. Night's Dream*, I. ii. 2—

> 'You were best to call them generally, man by man.'

J. HASTINGS.

GENERATION.—i. 'Generation' is used in AV to tr. **1.** דּוֹר *dôr*; Aram. דָּר *dâr*, Dn 4^3; LXX γενεά, etc.; Vulg. *generatio*, etc. *Dôr* is used (*a*) generally for a *period*, especially in the phrases *dôr wādhôr*, etc., of limitless duration; past, Is 51^8; future, Ps 10^6; past and future, Ps 102^{24}; (*b*) of all men living at any given time, Gn 6^9; (*c*) of a class of men with some special characteristic, Pr 30^{11-14} of four *generations* of bad men; (*d*) in Is 38^{12} and Ps 49^{19} *dôr* is sometimes taken as 'dwelling-place.' **2.** תּוֹלְדוֹת, *tôledhôth*, from *yāladh*, 'beget' or 'bear children,' LXX γένεσις, γενέσεις; Vulg. *generationes*. *Tôlĕdhôth* is used in the sense of (*a*) *genealogies*, Gn 5^1, figuratively of the account of creation, Gn 2^4; also (*b*) *divisions of a tribe*, as based on genealogy, *tôlĕdhôth* occurs only in the Priestly Code, in Ru 4^{18}, and in 1 Ch. **3.** γενεά in same sense as **1.** (*a*), Col 1^{26}; as **1.** (*b*), Mt 24^{34}. **4.** γένεσις = **2.** (*a*), Mt 1^1, an imitation of LXX use of γένεσις for תּוֹלְדוֹת. **5.** γέννημα, 'offspring' = **1.** (*c*). **6.** γένος, race = **1.** (*c*).

ii. Γενεά was also loosely used in Greek as 'generation' in English, of a period of about 30 to 33 years, *e.g.* 'Three generations of men make a hundred years' (Herod. ii. 142). But there is no probable instance of such usage in the Bible. OT texts, such as Gn $15^{13.16}$, Job 42^{16}, are cited in favour of it only under a misapprehension.

LITERATURE.—*Oxf. Heb. Lex.* s. דּוֹר and תּוֹלְדוֹת, and Thayer-Grimm, *NT Lex.* s. γενεά, etc.

W. H. BENNETT.

GENERATION.—In the phrase 'generation of vipers,' which occurs in Mt 3^7 12^{34} 23^{33} Lk 3^7, the Greek tr^d 'generation' is γεννήματα (plu. of γέννημα, which in the best texts occurs only in those places, elsewhere γένημα), a totally different word from γενεά, which is so often tr^d 'generation' in EV. In fact, γεννήματα means 'offspring'; and as this meaning belonged once to 'generation' also, it could stand as its representative. Thus Bp. Hall, *Works* (1634), i. 781, 'Of the Deluge'—'These mariages did not beget men, so much as wickednesse, from hence religions (*sic*) husbands both lost their piety, and gained a rebellious and godlesse generation'; and Shaks. *Lear*, I. i. 119—

> 'He that makes his generation messes
> To gorge his appetite.'

'Generation of vipers' comes from Tindale, whom the versions mostly follow. Gen. NT has 'ofspringes of vipers' in Lk 3^7, and Rhem. NT 'vipers broodes' throughout.

In Mt 1^1 'The book of the generation of Jesus Christ,' the Gr. is γένεσις, which is used also in 1^{18} (EV 'birth,' RVm 'generation'), Lk 1^{14} (EV 'birth'), as well as Ja 1^{23} 3^6, and the meaning is probably 'birth' here also, though all the versions have 'generation.' Cf. Bp. Hall, *Works*, ii. 104, 'I cannot blame that philosopher who, undertaking to write of the hidden miracles of nature, spends most of his discourse upon the generation and formation of man; Surely we are fearefully and wonderfully made; but, how much greater is the miracle of our spirituall regeneration'; and White, *Selborne*, xl., 'The threads sometimes discovered in eels are perhaps their young: the generation of eels is very dark and mysterious.'

Still another word is tr^d 'generation' in 1 P 2^9 'But ye are a chosen generation' (γένος ἐκλεκτόν, RV 'an elect race'). In this sense Mandeville, *Travels*, 140, 'This Machomete regned in Arabye, the Zeer of oure Lord Jhesu Crist 610; and was one of the Generacioun of Ysmael.' Wyc. (1388) has 'a chosen kyn.'

J. HASTINGS.

---

[*] On this passage Gibson remarks (*The XXXIX. Articles*, ii. [1897] 486): 'The English sounds somewhat ambiguous, but there can be no doubt that "generally" here means "universally," *i.e.* of God's promises *as applying to all men*, and not, as the Calvinistic party asserted, only to a particular class, consisting of a few favourites of Heaven. This interpretation is rendered certain by the corresponding passage in the *Reformatio Legum*, where God's promises to the good, and threats to the evil, are spoken of as *generaliter propositæ* in Holy Scripture. The same interpretation was pointed out by Baro in his *Concio ad Clerum* in 1595, in the controversy when the Lambeth articles were first projected; and was also asserted against the Puritans by Bishop Bancroft at the Hampton Court Conference. Thus the clause directly condemns the theory of particular redemption.'

GENESIS.—

Introduction.
i. Contents.
ii. Plan and Unity.
iii. Composite Structure.
iv. Component Sources of the Narrative.
v. Historical Value.
vi. Religious Teaching.
Literature.

The Jews divided their sacred books into three groups—the Law (or *Torah*), the Prophets (or *Nebiim*), and the Writings (or *Kethubim*). Of these the Law (or *Torah*), which corresponded to our Pentateuch, was divided into *five* portions or books, probably for greater convenience in use and reference; and hence the Rabbis sometimes spoke of these books as 'the five fifths of the Torah.' Their first book was the same as our book 'Genesis,' and was called by a title consisting of its opening word *Berêshith* (='In the beginning'). In the Septuagint version it was called 'Genesis,' *γένεσις* ('begetting,' 'origin,' 'generation'), a word which occurs in the rendering of 2^4 *αὕτη ἡ βίβλος γενέσεως οὐρανοῦ καὶ γῆς*. This title was adopted and transliterated in the Lat. translation, and so passed into general use in Western and Eastern Churches alike.

i. CONTENTS.—Genesis begins with an account of the creation of the world. A survey of the whole book shows us a division into two unequal portions, one (chs. 1–11) dealing with *primeval*, the other and longer portion (chs. 12–50) dealing with *patriarchal* history. In both these portions we have mention of *five* distinct 'generations' (*tôlĕdhôth* תּוֹלְדוֹת), which represent, as it were, successive stages in the progress of the narrative. In the primeval history are the 'generations' of (1) the heaven and the earth, chs. 1–4; (2) Adam, 5–6^8; (3) Noah, 6^9–9; (4) the sons of Noah, 10^1–11^9; (5) Shem, 11^{10-26}. In the patriarchal history are the 'generations' of (1) Terah, chs. 11^{27}–25^{11}; (2) Ishmael, 25^{12-18}; (3) Isaac, 25^{19}–35; (4) Esau, 36; (5) Jacob, 37–50. It must not be supposed that the number of these 'generations' is accidentally *ten*. The number ten was regarded as symbolical of completeness; and there can be little doubt that the enumeration of the ten tables of 'generations' was intended to denote the completion of the primitive period. The twelve sons of Jacob, who in Genesis are removed into Egypt, have become in Exodus twelve tribes, and the family of Jacob has grown into the nation of Israel. The Bk. of Genesis gives the traditions respecting the beginnings of the world, of man, of the nations, and of the people of Israel. It brings the people of Israel to the close of the patriarchal age, to the threshold of their history as a nation.

ii. PLAN AND UNITY.—The plan upon which the book is constructed is quite easy to recognize. The history of the Israelite people is traced from the three epochs, (*a*) the Creation, (*b*) the Flood, (*c*) the call of Abraham. An account is given of the three patriarchs, Abraham, Isaac, and Jacob. The story of Abraham is given at some length; that of Isaac is dismissed very briefly; that of Jacob is merged in the life of Joseph, through whose instrumentality the sons of Jacob are brought into Egypt. The end of the book leaves the Israelites sojourning in Egypt, after the death of Joseph.

The narrative is continued in the Bk. of Exodus. The Bk. of Genesis contains the first portion of the historical narrative which runs continuously from Genesis to the end of the Bks. of Kings.

The book, therefore, presents an obvious unity of design; and the manner in which parenthetical and subsidiary material is introduced but never permitted seriously to impair the general thread of the work, shows artistic skill and a considerable degree of literary self-control.

iii. COMPOSITE STRUCTURE.—But it would be a mistake to let the unity of plan which distinguishes the book conduce to the supposition that its literary structure is homogeneous. The Hebrew chronicles and histories are all of them composite works. Like many of the mediæval chronicles and histories they are compiled from different sources, from materials of different age. The extracts are woven together so as to produce a consecutive narrative. But it is generally not difficult to distinguish the points at which the different sections are pieced together. The similarity of style, in certain sections of the narrative, combined with marked dissimilarity from the style in other sections, has enabled scholars to class together the portions which may be assigned to one or other literary source. In doing this it is easy to let conjecture run too far, and to exaggerate the importance of *minutiæ* in discriminating between different layers in the strata. But within certain limits the analysis of the distribution of the Bk. of Genesis has now been carried out with a great degree of agreement between the principal scholars of all schools. For while scholars may not be agreed as to the date to which these sources should be assigned, there is no disputing the fact of the family resemblance of certain portions of the book, and the necessity of explaining the resemblances by the supposition of compilatory origin.

From the time (1753) when Astruc, the French physician, first inferred, from the intermittent interchange of the sacred names Elohim and Jahweh, that different documents had been employed in the composition of Genesis, critics have carried on this branch of investigation with the utmost patience and minuteness. It is now generally admitted that the distinctive use of the divine name is only one criterion amongst many by which the vocabulary of certain portions in the book can be shown to differ from that of others; and, further, that a difference of literary treatment and of religious tone can be recognized side by side with that of phraseology and diction.

The idea that such a view is based upon mere theorizing or hair-splitting fancifulness is finally abandoned. So far as the composite character of the literary structure of Genesis is concerned, the main conclusions of criticism may be said to be established. Among the causes which necessitate the hypothesis that different documents were used, may be classed (*a*) *varying accounts of the same thing, e.g.* of the Creation, chs. 1 and 2; the number of animals that went into the ark, and the duration of the Flood, chs. 6 and 7; explanations of the names Beersheba 21^{31} 26^{33}, Bethel $28^{18.\,19}$ $35^{14.\,15}$, Israel 32^{29} 35^{10}; of the sale of Joseph by his brethren to Ishmaelites and Midianites, ch. 37: (*b*) *apparent discrepancies, e.g.* Abraham's family after Sarah's death, in extreme old age $25^{1\text{ff.}}$, cf. 17^{17} 18^{11}; the age of Sarah 17^{17} and 12^{11} 20^2; of Isaac as described in $27^{1.\,2.\,7.\,10.\,41}$ and 26^{34} 35^{28}; the names of Esau's wives 26^{34} 28^9 and $36^{2.\,3}$; Joseph's Egyptian master in 37^{36} and 39^1–40^4: (*c*) *the repetition of the same event, or of different traditions of similar events, e.g.* the origin of Isaac's name 17^{17} 18^{12} 21^6, of Edom's 25^{25} and ^{30}, of Issachar's, Zebulun's, and Joseph's ch. 30; and the similar occurrences in $12^{10\text{ff.}}$ $20^{1\text{ff.}}$ $26^{7\text{ff.}}$.

There is no need here (see HEXATEUCH) to recapitulate the arguments by which it has been demonstrated that the structure of the first six books of the Old Testament is a compilation from different literary sources. 'There was a time,' says Delitzsch, 'when the horizon of Pentateuch criticism was bounded by Genesis and the beginning of Exodus. We now know that the mode of composition found in Genesis continues to the 34th chapter of Deuteronomy. It extends, moreover, beyond Dt 34, and continues in the Bk. of

Joshua. . . . And this Hexateuch also is only a component part of the great historical work in five parts (viz. Moses, Joshua, Judges, Samuel, Kings), extending from Gn 1 to 2 K 25, of which the Pentateuch forms one' (Delitzsch, *New Comm. on Gen.* vol. i. pp. 46, 47).

The biblical student finds in the composite structure a sufficient and satisfactory means of accounting for the numerous minor discrepancies and difficulties in the Bk. of Genesis which have often given occasion for perplexity and doubt, and have too often led to forced and disingenuous methods of exegesis.

iv. THE COMPONENT SOURCES OF THE NARRATIVE.—The following describes roughly the general conclusions of modern criticism. Genesis consists of a consecutive narrative welded together by a compiler designated R, out of three main documentary sources designated by critics P (the Priestly Code), J (the Jahwist), and E (the Elohist).

(*a*) Of these three principal sources the one most easily distinguished is P. For, though the framework of the narrative preserved from the P source is somewhat meagre, its style and characteristics are very marked. Certain leading events are given by it in great detail, *e.g.* the Creation, the Deluge, the Covenant with Noah, and the Covenant with Abraham. The chronology is carefully observed; periods of most remote times are reckoned in years with precision; and brief summaries of other events are given (*e.g.* 10. 25^{12}); or their recollection is preserved by means of genealogies (5. 11^{10} $35^{22ff.}$). 'The history [in P] advances along a well-defined line, marked by a gradually diminishing length of human life; by the revelation of God under three distinct names, *Elohim*, *El Shaddai*, and *Jahweh*; by the blessing of Adam and its characteristic conditions; and by the subsequent covenants with Noah, Abraham, and Israel, each with its special "sign," the rainbow, the rite of circumcision, and the Sabbath, Gn $9^{12.13}$ 17^{11}, Ex 31^{13}' (Driver, *LOT*^{6} p. 127).

P is also characterized by an avoidance of anthropomorphisms. There is no mention of angels or of visions in sleep. God is described as 'appearing' (Gn $17^{1.22.23}$ $35^{9.13}$ 48^{3}), and as 'speaking' (Gn 1^{29} 6^{13} 7^{1} 8^{15}–9^{1}); but, as compared with the other writers whose materials are incorporated in the Pentateuch, P is conspicuously guarded and scrupulous in his references to the Deity against any approach to familiar or irreverent description.

The narrative of P is somewhat formal and precise. It abounds in phrases and expressions which are not elsewhere found.

The following are some of the interesting traits of the P narrative which may be noted here:—

(1) *Divine Name.*—Except in 17^{1} 21^{1}, Elohim, not Jahweh, is used as the name of God; and these two exceptions are probably due to the compiler or to later copyists. God is revealed to the patriarchs as El Shaddai (Gn 17^{1} 28^{3} 35^{11} 48^{3}, cf. Ex 6^{3}).

(2) *Proper Names.*—In P 'the sons of Heth' (בְּנֵי חֵת) is always used (Gn $23^{3.5.7.10.16}$ 25^{10} 27^{46} 49^{32}), never 'Hittites' (חִתִּים), as in J and E. P has 'Kiriath-arba' for 'Hebron' (Gn 23^{2} 35^{27}), and Paddan-aram (Gn 25^{20} $28^{2.5.6.7}$ 31^{18} 33^{18} $35^{9.26}$ 46^{15}) for the region called in J (Gn 24^{10}) Aram-naharaim. The mention of Machpelah occurs only in the P narrative (Gn $23^{9.17.19}$ 25^{9} 49^{30} 50^{13}).

(3) Among *the words and phrases* characteristic of P may be mentioned the following, which are found in Genesis:—

אֲחֻזָּה 'possession,' Gn 17^{8} 23^{4} 36^{43} 47^{11} 49^{30}.

אֲנִי 30 times (אָנֹכִי once, Gn 23^{4}).

בָּשָׂר (כָּל־בָּשָׂר) 'flesh' ('all flesh'), Gn $6^{12.13}$ $7^{15.16}$ 8^{17} $9^{11.15\text{-}17}$.

גָּוַע 'expire,' Gn 6^{17} 7^{21} 25^{8} 35^{29}.

זֶרַע 'seed,' Gn 9^{9} 17^{7} 35^{12} 46^{6} 48^{4}.

מְאֹד מְאֹד 'very exceedingly,' Gn 7^{19} 17^{2}.

מִקְנָה Gn $17^{12.13}$ 23^{18}.

מִשְׁפָּחָה (*e.g.* לְמִשְׁפְּחֹתֵיהֶם 'according to their families'), Gn 8^{19} $10^{5.20.31}$.

עֶצֶם הַיּוֹם הַזֶּה 'the self-same day,' Gn 7^{13} $17^{23.26}$.

פָּרָה וְרָבָה 'be fruitful and multiply,' Gn $1^{22.28}$ 8^{17} $9^{1.7.17}$.

רְכוּשׁ 'possessions,' Gn 12^{5} 13^{6} 31^{8} 36^{7}.

שָׁרַץ 'swarm,' Gn $1^{20.21}$ 7^{21} 8^{17} 9^{7}.

תּוֹלְדוֹת 'generations.'

There is general agreement among critics as to the passages in Genesis that were taken by the compiler from the P document. These are—

1^{1}–2^{4a} $5^{1\text{-}28.30\text{-}32}$ $6^{9\text{-}22}$ 7 (portions) $8^{1.2a.3b\text{-}5.13a.14\text{-}19}$ $9^{1\text{-}17.28.29}$ $10^{1\text{-}7.20.22.23.31.32}$ $11^{10\text{-}27.31.32}$ $12^{4b.5}$ $13^{6.11b.12a}$ $16^{1a.3.15.16}$ 17. 19^{29} $21^{1b.2b\text{-}5}$ 23. $25^{7\text{-}11a.12\text{-}17.19.20.26b}$ $26^{34.35}$ 27^{46}–28^{9} $29^{24.29}$ 31^{18b} 33^{18a} 34 (portions) $35^{9\text{-}13.15.22b\text{-}29}$ 36 (very largely) $37^{1.2a}$ 41^{46} $46^{6\text{-}27}$ $47^{5.6a.7\text{-}11.27b.28}$ $48^{3\text{-}6.7}$ $49^{1a.28b\text{-}33}$ $50^{12.13}$.

(*b*) When the P portions of the narrative have been removed, there remains a large portion of Genesis which critics have called 'prophetic,' as distinguished from 'priestly,' being clearly separable from P in language and in treatment of narrative.

But this large portion of prophetic writing has also been conclusively shown to be, not homogeneous, but to consist of two main threads of narrative which to a great extent must have covered the same ground, and which a compiler combined in the form of a consecutive narrative. There were therefore two original documents (J and E) independent of one another, which, being welded together, formed a distinct work, JE, which was afterwards combined with P by the final redactor. As to the relative priority of these two documents, scholars are hardly yet in absolute agreement. But, at the present day, opinion inclines to the view that the document, which has as one of its characteristics the use of Jahweh (Jehovah) for the divine name, and has therefore been entitled the 'Jahwist' (=J, for short), is the earlier in date; and that the other, which on account of its use of Elohim for the sacred name (until Ex 3^{14}, when the name was revealed to Moses) is called the Elohist (=E, for short), can be only very slightly later. In determining what that date must have been, we are enabled, by the evidence of the language, to discern that both J and E belong to the best period of Hebrew literature, free from the obscurity of the early and from the insipidity of the later age.

The resemblance of these two documents to one another in their contents, and their difference in style and language, may best be illustrated by a comparison of the parallel narratives in Gn 20 and 26, and in the accounts of the patriarchs Jacob and Joseph.

J contains some of the most striking descriptions in all Genesis; and there is probably no Hebrew writing which in beauty of narrative, vigour, simplicity, and artistic skill can be considered to surpass this document. To it we owe the preservation of the famous stories of the Garden of Eden; of Cain and Abel; of Abraham and the three angelic visitors; of Sodom and Gomorrah; of the mission of Eliezer, the servant of Abraham; of Judah and Tamar; of Judah's intercession with Joseph.

Throughout his narrative, the writer of J keeps prominently in view the spiritual and moral purpose with which he indites his records of old time. It is in this respect that he occupies the position of a 'prophet'; he interprets the truths that underlay the history of the past, and explains God's dealings in the world and with His chosen people.

'He is penetrated by the thought of Jehovah's mercifulness, long-suffering, and covenant faithfulness. He delights to trace the successive stages in the development of faith. It is he who tells how Abraham "believed in the Lord, and He counted it to him for righteousness." . . . The Jahwist appears, in fact, to survey the field of history with the eye of mature spiritual experience; in the lowly beginnings of Hebrew history he discerns the divinely intended consummation—the ultimate purpose which from the first filled the incidents of ordinary life with solemn significance (Gn $19^{22ff.}$ 16^{12} $19^{31ff.}$ $25^{25ff.}$ $49^{9ff.}$).' (Ottley's *Bampton Lectures*, 1897, pp. 119, 120).

Among the characteristic features of J's writing the following deserve special mention :—

(1) *The use of Jahweh* (יהוה) *as the name of God.*—Not, of course, that the word Elohim was not known or used by him; he does use it for the purpose of introducing a comparison between the human and the divine (Gn $32^{29. 31}$ 33^{10}), or when he represents a non-Israelite speaking of the Deity to an Israelite, or an Israelite to a non-Israelite (Gn 20^{13} 40^{8} $41^{18. 25. 28. 32}$ 43^{29}). He puts it into the mouth of the serpent (Gn 3^{2}). The name Jahweh, on the other hand, in his narrative, is known to the patriarchs and used by them; and the writer is not apparently aware of the tradition that the name was first revealed to Moses, as recorded in Ex 3. To an English reader, his use of the sacred name appears an anachronism, or a not unnatural anticipation of later general usage.

(2) *J's use of words and phrases* may be illustrated by—

בֹּאֲכָה, lit. 'as thou comest to,' Gn 10^{19} *bis* etc.

בִּי אֲדֹנִי Gn 43^{20} 44^{18} (cf. Ex $4^{10. 13}$).

מָצָא חֵן 'find favour,' Gn 6^{8} 18^{3} 32^{6} $33^{8. 15}$ etc.

עָשָׂה חֶסֶד Gn $24^{12. 14. 49}$ (used also by E, Gn 20^{13} 21^{23} 40^{14}).

יָדַע (euphemistic use), Gn $4^{1. 17. 45}$ 19^{8} 24^{16} 38^{26}.

[יָצַג] (Hiph.) Gn 30^{38} 33^{15} 43^{9} 47^{2}.

כִּלָּה לְ Gn 18^{33} $24^{15. 19. 19. 22}$.

לִין Gn 19^{2} 24^{23}.

עָתַר Gn 25^{21} (cf. Ex $8^{9. 28}$ 9^{23} 10^{17}).

הַפַּעַם Gn 2^{23} 18^{32} $29^{34f.}$ 30^{20} 46^{30}; צָעִיר for 'the younger,' Gn 25^{23} 43^{33} 48^{14}.

שִׁפְחָה 'maid-servant' (not אָמָה), Gn 16^{5} 30^{7} etc.

הִשְׁקִיף Gn 18^{16} 19^{28}.

(3) *Grammar.*—A preference for verbal suffixes, instead of אֵת with suffixes.

Phrases such as 'and it came to pass,' וַיְהִי כִּי, וַיְהִי כַּאֲשֶׁר.

Emphatic use of זֶה and זֹאת.

Fondness for particles.

Use of precative נָא.

The portions of Genesis which are generally assigned by critics to J are as follows :—

2^{4b}–4^{26} 5^{29} 6^{1-8} $7^{1-5. 12. 16b. 17. 22. 23}$ $8^{2b. 3a. 6-12. 13b. 20-22}$ 9^{18-27} $10^{8-19. 21. 24-30}$ $11^{1-9. 28-30}$ $12^{1-4a. 6-20}$ $13^{1-5. 7-11a. 12b-18}$ $16^{1b. 2. 4-14}$ 18^{1}–$19^{28. 30-38}$ $21^{1a. 2a. 33}$ 22^{20-24} 24^{1}–$25^{6. 11b. 18. 21-26a. 27-34}$ $26^{1-33\text{ (exc. 16. 18)}}$ $27^{1-45\text{ (mainly)}}$ $28^{10. 13-16. 19}$ $29^{2-14. 19-35\text{ (exc. 28b. 29)}}$ $30^{1-23\text{ (mainly)}. 24-42}$ $31^{1. 3\text{ (25-27. 38-40)}. 46. 48-50}$ $32^{4-14. 23-32}$ 33^{1-17} 34 (largely) $35^{21. 22a}$ [36^{31-38}] $37^{12-35\text{ (partly)}}$ 38. 39. 42^{38}–44^{34} 46^{28}–$47^{5. 13-26. 27a. 29-31}$ 49^{1b-28a} $50^{1-11. 14}$.

The majority of critics incline to the view that J was composed by a dweller in the Southern kingdom; and it is pointed out in support of this view that the dwelling-place of Abraham, and possibly also of Jacob, is, according to J, Hebron, and that the leader of Joseph's brethren is Judah and not Reuben. Such arguments are obviously precarious; but the alternative opinion, that the writer belonged to the Northern kingdom, as Kuenen maintains, does not rest on any more convincing proofs.

(*c*) The E document in Genesis, like the J document, has preserved many of the most interesting features of the patriarchal narrative. To use Driver's phrase, its narrative 'is more "objective," less consciously tinged by ethical and theological reflexion than that of J.' We owe to it, however, the mention of many of the most striking details to be found in the book. For instance, the traditions preserved in connexion with particular localities in Palestine are in E chronicled with minuteness, *e.g.* the sacrifice on Mt. Moriah (22), the pillar at Bethel (28^{18}), and that at Gilead (31^{45}), the altar at Bethel ($35^{1. 3. 7}$), and Rachel's burying-place (35^{20}). The story of Joseph is largely narrated from the sources which E preserved; and it is to E that we are indebted for the record of the Philistine names Ahuzzath and Phicol (21^{32}), and the Egyptian names Potiphar (37^{36}), Zaphenath-paneah and Asenath (41^{45}).

The most important sections from E embrace Abraham's relations with Abimelech in 20 and 21, the expulsion of Hagar and Ishmael 20^{8-21}, the sacrifice of Isaac 22^{1-19}, Jacob's flight from Haran and his league with Laban 31, and the story of Joseph as related in 40. 41. 42 and 45.

It may be noticed that E makes frequent mention of the *means* of divine revelation, whether by dream (*e.g.* 20^{6} 21^{12} 22^{1} 28^{11} 31^{24} 37^{6} 40) or by the ministration of angels (*e.g.* 21^{17} 22^{11} 28^{12}). 'He interprets in a religious spirit what he records, and aims at bringing out the didactic significance of events, *e.g.* Gn 50^{29}' (Ottley, *BL* p. 119).

Among the characteristics of E's style, the following deserve notice :—

(1) *The name for God* is 'Elohim' (אֱלֹהִים). The sacred name יהוה, according to E, was first revealed to Moses. Accordingly it is not employed by E until after Ex 3^{14}. Other names are also employed by him, as 'El' אֵל (Gn 33^{20} 35^{7} 46^{3}) and 'Adonai' אֲדֹנָי (Gn 20^{4}).

The name 'Jacob' is preferred by E, even after the narrative in Gn 32 with its account of the origin of the name Israel.

(2) *Use of words and phrases*—

עַל־אוֹדוֹת Gn $21^{11. 25}$.

אָסוֹן Gn $42^{4. 38}$ 44^{29}.

אָמָה, not שִׁפְחָה, Gn 20^{17} $21^{10. 12. 13}$ 30^{3} 31^{33}.

בעל (vb. and noun) Gn 20^{3}.

כִּלְכֵּל Gn 45^{11} 47^{12} 50^{21}.

לֵבָב Gn $20^{5. 6}$ 31^{26}.

Archaic words preserved in E—

אָמְנָה Gn 20^{12}.

כֵּן, subst. = 'position,' Gn 40^{13} 41^{13}.
adj. = 'honest,' Gn $42^{11. 19. 31-34}$.

מוֹנִים Gn $31^{7. 41}$.

פָּתַר Gn $40^{8. 9}$ $41^{8. 9}$.

(3) *Grammatical usages*—

(*a*) A marked preference for the use of אֵת with the pronom. suffix instead of attaching the suffix to the verb.

(*b*) Rare uses of the Infinitive—

רְדָה for רֶדֶת, Gn 46^{3}.
עֲשׂה, עֲשׂוֹ Gn 31^{28} 50^{20}.
רְאֹה Gn 48^{11}.

(*c*) The connexion of loosely attached passages by such phrases as וַיְהִי אַחַר הַדְּבָרִים הָאֵלֶּה Gn 22^{1} 40^{1} 48^{1}.

And the colloquial and somewhat redundant phrases prefixed to the interchange of speech, *e.g.* 'And . . . said (*or*, called), and he answered, Here am I,' etc., Gn $22^{1. 7. 11}$ etc.

The chief portions of the narrative assigned to E are the following (and it will be observed that they are first to be identified in the story of Abraham); 15 (portions, according to some scholars), *e.g.* parts of vv.$^{1. 2. 3. 5}$ 20^{1-17} 21^{8-32} $22^{1-14. 19}$ $28^{11. 12. 17. 18. 20-22}$ $29^{1. 15-18}$ 30 (portions), $31^{2. 4-47.\text{ (exc. 18b)}}$ $32^{3. 13b-22}$ $33^{5b. 18b-20}$ $35^{1-8. 16-20}$ $37^{2b-11. 14a. 18. 19. 22-24. 28a. 28c-30. 36}$ 40 (showing some influence of J) $41^{1-45. 50-57}$ 42^{1-37} 45^{1}–46^{5} $48^{1. 2. 8-22}$ 50^{15-26}.

That E represents an Ephraimitic tradition is the generally accepted opinion. This is based upon the prominence given in its narrative to places and persons with which tradition in the Northern kingdom would presumably be closer in sympathy than tradition in the Southern. Joseph, the father of Ephraim, is the most conspicuous personage in the narrative; and Reuben, not Judah, is the foremost of his brethren. Bethel and Shechem, both sacred places in the Northern kingdom, are particularly mentioned in E. The sojourn of Abraham is not at Hebron, but at Beersheba and Gerar; that of Jacob, at Beersheba and Shechem.

(*d*) The work of combining JE and P is attributed to the redactor or redactors (R), who 'chose from his sources what was most suited to the plan of his work.' His method is thus admirably and succinctly described by Spurrell: 'Sometimes he merely takes small extracts from one document (*e.g.* 4^{17-24} 6^{1-4} 30^{32-42}, merely small portions of fuller accounts), or notices individual points (*e.g.* 11^{29} Jiska mentioned; 20^{12} the relationship between

Abram and Sarai, cf. 28^{22} [see 35^{7}] 48^{22}). At other times the portions taken from the documents are quoted in full, and for the most part are verbally transferred from the original (*e.g.* the narratives in P up to 11^{26}), and sometimes, again, whole passages from one document are omitted, possibly because they were at variance with the accounts given by the others (see in P the brief accounts in 11$^{27-32}$; the omission of the introduction to the history of Abram, previous to ch. 12; of the divine manifestation to Isaac, see 35^{12}; of the sojourn of Jacob in Paddan-aram; of all the history of Joseph prior to Jacob's arrival in Egypt). Frequently extracts from J are given in an abridged form, in order that P may be reported more fully (cf. 2$^{5f.}$ 4$^{25f.}$, the Story of Creation, and the Table of Nations, J), and 16$^{15f.}$ 21$^{2ff.}$ 25$^{7ff.}$, 32^{4} 35$^{28f.}$ P. Elsewhere, however, in the story of the patriarchs the extracts from J are abridged in favour of E. With the exception of the history of Joseph, E contains (from ch. 20 onwards) fewer passages which are verbally reported. Usually the portions in E are expanded by notices from J, or anything worth recording in E is incorporated into the narrative of J. When combining his sources, the compiler, as far as possible, or as far as he deemed necessary, appears to have taken the narrative verbally from each and inserted both in his book (cf. ch. 2f. side by side with 1, ch. 27 side by side with 26$^{34f.}$ and 28$^{1-9}$; 48$^{3-7}$ side by side with 48$^{9-22}$). Elsewhere, as, for example, where the event need only be quoted from one document (*e.g.* the birth or death of any person), he selects his account from one source, even though the same event be recorded in more than one document. In other cases the compiler found two accounts in the documents before him, agreeing in the main but differing in details; he would then weave one account into the other, omitting from each what could not be reconciled, and choosing from both what best suited the plan of his work (cf. chs. 7f. 10. 16. 25. 27–37. 39–50). It was not always possible, without further revision, to place side by side or to weld together the individual extracts from two or three sources. So it was necessary to eliminate what was contradictory from one or other of the documents (*e.g.* 21$^{17ff.}$ explanation of Ishmael's name, 32^{8} of Maḥanaim, 33^{10} of Peniel, cf. 31^{25}), or to insert here and there small additions or remarks in order to fill up gaps and remove contradictions. So 4^{25} 10^{24} 21^{14} 26$^{1a. 15. 18}$ 35^{9} 37$^{5b. 8b.}$ 39$^{1. 20}$ 43^{14} 46^{1}. To the desire to produce a readable whole, may be attributed the accommodation necessary to preserve consistency in the use of the names Abram and Sarai in all passages previous to ch. 17, of the double name Yahweh-Elohim in chs. 2–3; also the change of Elohim into Yahweh in 17^{1} 21^{1}. Another expedient was frequently employed with the same object in view, viz. transposing entire portions of the narrative (so 11$^{1-9}$ 12$^{10-20}$ 25$^{5f. 11b}$ 25$^{21ff.}$ 47$^{12ff.}$), or of brief notices (so 2$^{4a.}$ 31$^{45-50}$ 37^{26} etc.), consequently R was obliged to insert all kinds of small additions; cf. 1^{1} 9^{18} 13$^{1. 3f.}$ 24^{62}. In other passages the sources are loosely combined (*e.g.* 7$^{7-9. 22}$ 15$^{7f.}$ 31$^{45ff.}$, ch. 36. 46$^{8-27}$), the compiler now and then making additions of his own to bring the documents into harmony (*e.g.* 21^{34} 27^{46} 35^{5} 46$^{12-20}$). Explanatory glosses are also found (*e.g.* 20^{18} 31^{47} 35^{6}, and ch. 14, where they are numerous), some of which may be due to a later corrector. All kinds of little additions occur, which are probably not derived from the sources themselves, but were inserted, either when the sources were welded together into one work, or some time after this. These insertions were added partly to explain the object of the narrative (15$^{12-16}$ 22$^{15-18}$ 26^{3b-5}), partly to make it harmonize with statements occurring elsewhere (25^{18b} 35^{22a}, perhaps 4^{15a}), and partly to introduce new notices, or new phases of tradition which were not mentioned in the three chief documents (10^{9} 32^{33}; perhaps 2$^{10-14}$, and in 10^{14}; 11^{28b} 31^{b} 15^{7} 22^{2}, etc.). Sometimes possibly use was also made of materials taken from other sources than J, E, and P (*e.g.* perhaps in ch. 14).'—Spurrell, *Genesis*^{2}, pp. lxi–lxiii. Whether the work of combining the narratives of J and E was effected by one writer, or was the result of a gradual process directed and influenced by a group or succession of 'prophetic' men, must be left to conjecture. Some scholars, however, are prepared to give an unhesitating reply. 'That the compiler of JE was a Judæan is clear,' says Fripp, 'from 22^{2}, where he has substituted "Moriah" for some Ephraimite name; and that he was not far removed from the Deuteronomist we may see in 18$^{19. 23-33a}$, in the kindred passages 13^{16} 15. 16^{10} 18^{18} 22$^{17. 18}$ 26^{4} 32^{12} (cf. Dt 1^{10} 10^{22} 28^{62}), and still more plainly in 26^{5}' (*The Composition of the Book of Genesis*, p. 18).

v. THE HISTORICAL VALUE OF THE BOOK.—Doubtless, the views that are held upon the historical character of Genesis depend in great measure upon the conception which is entertained of 'inspiration.' The book itself makes no claim to being in any way supernaturally furnished with means of information. The writers and compilers appear to have made use of their materials in the same fashion as other writers of their day. There is no indication in this, or in other books of Scripture, that Revelation communicated to man a knowledge of facts that were ascertainable by human means.

The early narratives of Genesis respecting the Creation, the Fall, and the Flood are based upon myths and traditions which the Israelites inherited in common with other branches of the Semitic family. The labours of Rawlinson, Lenormant, George Smith, Schrader, Sayce, and others have shown indisputably the affinity of the Israelite with the Chaldæan cosmogony. And it has often been pointed out that the Israelite version of the myth is free from the puerilities and superstitions inalienable from the polytheism of the Babylonian version. 'Where the Assyrian or Babylonian poet,' says Sayce, 'saw the action of deified forces of nature, the Hebrew writer sees only the will of the one supreme God' (*HCM* p. 71). This assists us to form a judgment upon the true character of these early chapters. The story of the beginnings of the world and of mankind is told, not with a scientific but with a religious purpose. The old-world myths, or tales of Semitic folk-lore, were employed for the purpose of setting forth in their true light — as discerned through the revealing spirit of J″—the unchanging verities respecting the nature of God, of man, and of the created universe (cf. Ryle, *Early Narratives of Genesis*).

The story of the Flood is doubtless drawn from the reminiscence of a fearful devastation by water at some very remote period. The striking resemblance between it and the so-called 'poem of Izdubar,' contained in the cuneiform texts translated by Geo. Smith (1872), illustrates the similar treatment of semi-mythical, semi-historical material by the Israelite writers. The Genesis account presents many insuperable objections, if it were necessary to accept it as a literally accurate record. But the purpose of the narration is not scientific, but religious; it is obviously intended to depict the divine displeasure against sin, and the divine favour towards the upright and God-fearing. On the other hand, there seems no reason to call in question the occurrence of some terrible overthrow by water that laid waste the Euphrates Valley, or the wonderful deliverance of a few individuals. The reminiscence of these events was variously enshrined in versions of a common Semitic legend.

The narrative of the patriarchs stands midway between the Flood tradition and the Mosaic history. As compared with the former, it marks a great advance in the direction of the historic; relatively to the latter, it still belongs to a prehistoric age. The narrative has come down to us through the medium of documents, whose composition, in the form familiar to us, must have been separated by many centuries from the incidents which they relate. On the other hand, there is no reason to doubt that the stories respecting the Israelite ancestors rest upon a foundation of historic fact. The attempts to resolve the patriarchs, Abraham, Isaac, and Jacob, into abstract personifications of tribes, or into primitive tribal gods, have admittedly failed. Without the patriarchs 'the religious position of Moses,' says Kittel (*Hist. of the Hebrews*, p. 174), 'stands before us unsupported and incomprehensible.' It is very possible, indeed most probable, that the picture which has been preserved of the patriarchs derives much of its colouring from the thought and circumstances of a later period, and in particular from the prophetic treatment of the people's history.

Nor can it be questioned that the relationship of tribes and clans is represented in the patriarchal narrative under the symbol of a family genealogy. The primitive connexion of Israel with the peoples round about—Ammon, Moab, Amalek, Ishmael, Edom—is presented to us under the imagery of incidents occurring in the history of a single family during one or two generations. The stories of common folk-lore, deriving proper names from various incidents, are incorporated along with narratives of didactic purpose and deep spiritual import, *e.g.* the call of Abraham and the visions of Jacob. The memory of the great forefathers of the nation was idealized by the prophetic and priestly writers. But they preserved a living tradition of real men and actual experience.

The difficulty which besets the modern student is how to distinguish the substratum of actual history from the accretion of later legend and from the symbolism of Eastern description. The task is one which will probably defy all the attempts of existing scholarship. Future discoveries may bring fresh light to bear upon the patriarchal narrative. For the present, important as recent discoveries have been in illustrating the Genesis narrative, they have not supplied us with any certain data for its chronology. Thus, while the credibility of an Elamite invasion, as mentioned in Gn 14, has been confirmed, in the opinion of competent scholars, by the evidence of cuneiform inscriptions, we have not yet arrived at any settled conclusion as to the century to which the events should be assigned. While the Babylonian equivalent to the name Abraham has been found in the inscriptions, neither he nor Isaac nor Jacob nor Joseph have yet been identified in the monuments. The identification of Y'ḳb'ar and Y'sp'r, by which some scholars transliterated Nos. 102 and 78 in the list of towns and places conquered by Tahutmes III. in his campaign against Palestine and Syria, with Yaḳobel and Yosephel, Jacob and Joseph, would not, supposing it to be accurate, throw any light upon the historical problem. It would, at the most, afford evidence that the names Jacob and Joseph had been current in Palestine as the names of localities and districts 'centuries before the time of Moses' (cf. Dillmann, *Gen.* ii. 4, Eng. tr.).

Again, while we gather from the Tel el-Amarna tablets that the officials in the towns of Palestine and Phœnicia, as well as of Egypt, were wont, in the 15th cent. B.C., to employ the cuneiform character in their diplomatic and state correspondence, we are brought no nearer to the determination of the question, when the Palestinian (Phœnician-Hebrew) writing was first adopted, or whether the nomad Hebrews employed writing.

To maintain that because cuneiform writing was practised in Palestine in the 15th cent. by official scribes for state correspondence, the existing patriarchal narratives are therefore based upon Hebrew transcriptions of cuneiform chronicles which were *contemporary* with the events, is to leap over several stages of the argument. A comparison of the Tel el-Amarna tablets with the patriarchal narrative confronts us with the fact that no one from reading the Genesis account could form any conception of the political condition of Palestine, as it really was, during the patriarchal period. With the isolated exception of the reference to historical details in Gn $14^{1ff.}$, the lives of the Hebrew patriarchs furnish no clue to the history of the centuries that correspond to the period of patriarchal sojourn in Palestine.

The story of Joseph shows abundant signs of acquaintance with Egyptian life and customs. But there is no appearance of its having been committed to writing in Egypt or by any contemporary. The dynastic name of the king of Egypt is alone given, *i.e.* Pharaoh; but we are nowhere told either his own name or that of the capital in which he resided. Accordingly, while some have contended that the mention of the Egyptian hatred for strangers indicates a period subsequent to the domination of the Hyksos, others have held that the elevation of Joseph, a shepherd by birth, to the highest office in the kingdom could have occurred only under a Hyksos dynasty. The Egyptian monuments have hitherto failed to give the name of Joseph; and the mention of a prolonged famine in the el-Kab inscription illustrates, but cannot with any certainty be identified with, the Genesis narrative. The measures taken by Joseph (Gn 47) in consequence of the famine doubtless correspond to Egyptian institutions known to the writer; but hitherto no account of them has been found in other quarters.

The evidence of the monuments, which has in recent years so copiously illustrated the biblical narrative, has not yet contributed with any certainty to the establishment of the literal historical accuracy of the patriarchal story.

The result may be disappointing; but the evidence at our disposal does not at present justify us in claiming more than that the general outline of the narrative is historical, and that the Mosaic epoch presupposes the patriarchal age. 'The historian may complain with Kuenen (see *The Religion of Israel*, vol. i. p. 113) that the strictly historical kernel which can be safely extracted from such a book as Genesis is vague and more or less indefinite. The fact is that the great figures of the patriarchal period are presented to us in narratives "of which," says Prof. G. A. Smith, "it is simply impossible for us at this time of day to establish the accuracy." We have simply to accept the fact that in the present state of our knowledge there are no clear *criteria* by which to distinguish precisely the historical nucleus contained in the patriarchal narratives from the idealized picture. If there is uncertainty on this point, we can only conclude that knowledge of the precise details of the history is not of vital importance' (Ottley, *BL* p. 130 f.).

vi. THE RELIGIOUS TEACHING OF THE BOOK.—A consideration of the religious value of Genesis reveals to us its true character and purpose. The Scriptures were written for religious instruction; and in no book of the OT are the treasures of theology to be found so close, as it were, beneath the surface *as in the Book of Genesis.*

1. The foundations of a true and spiritual religion are contained in the teaching of the early chapters of Genesis. Through the medium of the prehistoric legend, the Israelite writers communicated to their countrymen that which was revealed to them by the Divine Spirit concerning the Being and Nature of God, the origin and first perfection of the God-created universe, the origin of man, the nature and growth of sin, God's love toward man and His purpose of redemption. The narratives of the Creation and of the Fall present pictorially spiritual truths respecting man's nature, his need of restoration, and his capacity for a progressive development.

2. In the narrative of the patriarchs the redemptive purpose is unfolded by the gradual process of election (Ro 9^{11}), the principle of which had already been indicated in the contrast of Cain and Abel, of the Cainites and the Sethites. The well-known stories of Abraham, Isaac, and Jacob were selected and arranged to minister to the purpose of religious teaching; and foremost stood the thought that God's love had alone determined the choice of the man and of the family from which should come the nation destined to be the channel of blessing to the world (Gn 12^{3} 13^{14} 15^{5} 17^{5} 18^{17-19} 22^{16} $26^{3.4}$ 35^{11} 48^{16}). This principle of election is pointedly emphasized in the providence which shields Sarai and Rebekah (Gn 12. 20. 26) from harm, and grants to them the gift of children in a quasi-miraculous manner (Gn 17^{15-20} 18^{11-15} 21^{6-8} $25^{20.21.26}$). The narrative, too, lays stress upon the divine choice by disposing of the collateral lines in the chosen family before passing on to the detailed account of the particular person on whom God's favour has rested (*e.g.* the family of Japheth, Ham, and Shem, Gn $10^{2.6.21}$; the generations of Shem and Terah, $11^{10.27}$; the story of Lot, 18. 19; the collateral branches of Abraham's family, preceding the story of Isaac, $25^{1.19}$; the generations of Esau, preceding the story of Joseph, 36).

3. Akin to this treatment of election is the prominence given to the conception of God as One who was in communion with the children of men, though in an especial manner He revealed Himself to those whom He had chosen. That God showed favour to Abel's sacrifice is thus scarcely more significant than that He held converse with Cain the murderer. That He appeared to Abraham, Isaac, and Jacob was not more suggestive of His relation towards mankind than His appearance to Abimelech (20^{3}) and to Laban (31^{24}). The honour paid by Abraham to Melchizedek typified the recognition of divine power and love transcending the limits of a national covenant (Gn 14). At the same time, the story of 'the priest of God Most High' (14^{18}) illustrated the possession of that basis of instructive national religion, the abiding witness of God within man, upon which alone the structure of revelation could stand. With the people of His choice, God is represented as holding communion under the most anthropomorphic conditions (*e.g.* Gn 16. 18. 28). But the constitution of the covenant with Noah is ratified by the sacrament of the 'bow' (9^{8-17}), and the covenant with Abraham by that of 'circumcision' (17). And the lesson was thus conveyed to Israel that the phenomena of the physical world are pledges and emblems of a moral purpose overruling all, and that a common—if not almost universal—rite among Semitic races could be set apart and consecrated for the spiritual purposes of the service of the God of revelation.

4. The principle of progressiveness in the religious teaching of Israel is illustrated in Genesis by the three great stages of divine self-manifestation in the history of mankind, represented by the judgment in the Garden of Eden, by the visitation of the Flood, and by the calling of Abraham. Similarly, the record of God's dealings with the chosen man, the chosen family, and the chosen clan, lead up to the formation of the chosen nation, the history of which commences in the Book of Exodus.

The first anticipations of the Messianic hope are expressed in the promise of victory over the power of evil proclaimed in the so-called Protevangelium of Gn 3^{15}. These receive a narrower definition in the promise made to Abraham that all the families of the earth should bless themselves in him (Gn $12^{3.4}$). In Gn 49^{11} the allusion to a *personal* Messiah has been much disputed; but, whatever explanation be given of the words rendered 'until Shiloh come,' the significance of this passage in the ancient 'blessing of Jacob' consists in its identification of the ultimate glory of Israel with the sovereignty impersonated by Judah.

Space forbids us to go further into detail respecting the religious teaching of Genesis. It has been well summed up in the following words: 'The Book of Genesis is the true and original birthplace of all theology. It contains those ideas of God and man, of righteousness and judgment, of responsibility and moral government, of failure and hope, which are presupposed through the rest of the Old Testament, and which prepare the way for the mission of Christ' (Girdlestone, *The Foundations of the Bible*, p. 155).

LITERATURE.—For the structure of Genesis, the English student is now well equipped with the recent literature on the subject: Driver, *LOT*; Addis, *Documents of the Hexateuch*; Fripp, *Composition of the Book of Genesis*; C. J. Ball, 'Book of Genesis,' *SBOT*; and Spurrell, *Notes on the Text of Genesis.* The fullest complete commentaries are those by Dillmann and Delitzsch (both now translated into English; Edinburgh: T. & T. Clark). The foreign books which should be consulted are those on the structure by Holzinger (*Einleitung*), Kautzsch-Socin, Wellhausen (*Die Composition des Hexateuchs*, 1889). On Genesis and the Monuments: Sayce, *HCM*; Schrader, *COT*; and the writings of George Smith, Maspero, Pinches, Haupt, and others. On the Theology of Genesis: the *OT Theology* of Schultz, Oehler, Riehm.

The reader may also consult Miss Wedgwood, *Message of Israel*; Watson, *The Book Genesis*; Ottley, *Aspects of the Old Test.*; Westcott, *Faith of the Gospel*; Ryle, *Early Narratives of Genesis.*

H. E. RYLE.

GENNÆUS, AV GENNEUS (Γενναῖος, Γένεος A, 2 Mac 12^{2}).—The father of Apollonius, who was the Syrian commander (στρατηγός) of a district in Pal. under Antiochus V. Eupator.

GENNESARET, LAKE OF (Lk 5^{1}; in 1 Mac 11^{67} GENNESARETH).—See GALILEE, SEA OF.

GENNESARET, LAND OF (ἡ γῆ Γεννησαρέτ, Mt 13^{34}, cf. Mk 6^{53}) deserves special attention, (1) because of its connexion with our Lord, (2) because of the estimation in which it was held by the inhabitants of the country, and (3) because of the account which Josephus has given of its wonderful fertility and loveliness. The place referred to was on the W. side of the Sea of Galilee and towards its N. end. Directly opposite to it on the E. side of the lake there is a corresponding plain which, however, lacks the characteristics that have made the one on the W. side widely famous. The miraculous feeding of the five thousand took place on the E. plain (Mt 14^{15-21}, cf. the other Gospels), immediately after which Christ sent His disciples by ship 'to the other side.' According to Mk they were directed to go towards Bethsaida (6^{45}); according to Jn they went, without instructions, 'towards Capernaum' (6^{17}); but the storm—at that season the strong current of the Jordan would have carried them in spite of themselves out of their course to the S.—compelled them to anchor 'in the land of G.' Bethsaida, Capernaum, and the land of G. are, in our judgment, mentioned in their natural order. The very next act of our Lord mentioned was at Capernaum, leading us to suppose that that place was nearer 'the land of G.' than Bethsaida.

This plain, which is one of the most charming spots in Pal., is about one mile broad and two and a half miles long, having Khan Minyeh on the N. and Mejdel, the ancient Magdala, on the S. The famous pass of Wady Ḥamam leads up through the mountains on the W. towards the Mediterranean. Josephus says, 'Such is the fertility of the soil that it rejects no plant, and accordingly all are here cultivated by the husbandman, for so genial is the air that it suits every variety. The walnut, which delights beyond other trees in a wintry climate, grows here luxuriantly, together with the palm, which is nourished by the heat, and near to these are figs and olives to which a milder atmosphere has been assigned.' Not only does Nature in her ambition here 'nourish fruits of opposite climes, but she maintains a continual supply of them. Thus she produces those most royal of all, the grape and the fig, during ten months without intermission, while the other varieties ripen the year round.' The 'fertilising spring which irrigates the plain,' according to this author, was prob. the fountain at et-Tabigha, which was led in a rock-cut channel round the ledge at Khan Minyeh. 'Ain Mudawareh, which has been suggested as the fountain referred to, is quite out of the question (*Wars*, III. x. 8).

The Rabbis were as enthusiastic in their praise of this 'garden of princes' as was Josephus. It was to them a veritable 'paradise.' Its fruits were prized for their wonderful sweetness, but they were not found at Jerus. at the feasts, and the reason given was that no one should be tempted to come to the feasts merely for the sake of enjoying those fruits (Bab. Talmud, *Pesachim*, 8*b*; Neubauer, *Géog. du Talm.* 45 f.).

S. MERRILL.

GENTILES is one equivalent of the Heb. *goiim* (גּוֹיִם), which is represented in EV also by such renderings as 'nations' and 'heathen.' RV very frequently replaces AV 'Gentiles' by 'nations.'

גּוֹי (*goi*) has the same root meaning as עַם (*'am*, 'people'), which occurs more than 1500 times in OT. In their primary sense of a *connected body* (cf. Dt 32^{21} and Driver's note), *goi* and *'am* are both applied even to troops or herds of animals (Jl 1^{6}, Pr $30^{25.26}$). So the plur. forms *goiim* and *'ammim*, like the later *lĕummim*, have the general sense of *nations* or *peoples*. Ultimately, however, linguistic usage confined the application of the sing. *'am*, with rare exceptions (*e.g.* Gn 26^{11} of the Philistines, Ex 9^{16} of the Egyptians), to the *people of Isr.*, while the sing. *goi* was prevailingly, though not exclusively, applied to *other nations* (in Is 1^{4} Zeph 2^{9} *goi* and *'am* are both used to designate Isr.). A similar distinction rules the use in LXX of ἔθνος and λαός, which correspond to גּוֹי and עַם respectively. In NT we find (Lk 2^{32}) τὰ ἔθνη opposed to τῷ λαῷ θεοῦ Ἰσραήλ, although ἔθνος is pretty frequently used of Isr., and that without any disparaging intention (*e.g.* Lk 7^{5} 23^{2}, Jn $11^{48.51.52}$ 18^{35}, Ac 10^{22} $24^{3.10.17}$ 26^{4} 28^{19}).

Goiim (גּוֹיִם 'nations,' or כָּל־הַגּוֹיִם 'all the nations') occurs very freq. in OT as a designation of *non-Jewish* peoples (1 S $8^{5.20}$, 2 K 18^{33} 19^{17}, 1 Ch 14^{17} 16^{24}, 2 Ch 32^{23} 36^{14}, Neh 5^{17}, Ps 79^{10} 106^{47} etc.). The phrase *gĕlîl haggoiim* (גְּלִיל הַגּוֹיִם 'circle of the nations') was applied to a district in the N. of Pal., whose population contained a large Gentile element. It is most familiar to us under its NT form 'Galilee of the Gentiles' (Mt 4^{15}). The LXX equivalent of גּוֹיִם is ἔθνη, which is the regular term for *Gentiles* in NT as well as in Apocr. (*e.g.* 1 Es 5^{69} 8^{89}, Wis 14^{11} 15^{15}). The form ἐθνικός occurs in NT three times (Mt 6^{7} 18^{17}, and in the correct text of 3 Jn ^{8}), the adverbial form ἐθνικῶς ('after the manner of Gentiles') once (Gal 2^{14}).

Another designation, practically identical with *goiim*, is *hā-'ărāẓôth*, 'the lands' (הָאֲרָצוֹת, more fully עַמֵּי הָאֲרָצוֹת or מַמְלְכוֹת הָאֲרָצוֹת 'peoples *or* kingdoms of the lands'). This term is characteristic of late Heb. (occurring 23 times in Ezk and 22 times in Ch, cf. Jer 16^{15}, Dn 9^{7} $11^{40.42}$, Ps 105^{44} 106^{27} 107^{3} 116^{9}).

In NT Ἕλληνες ('Greeks') is sometimes used, especially by St. Paul, as syn. with *Gentiles* (Ro 2^{9}, 1 Co 12^{13} etc.). The same writer employs ἔθνη in a twofold sense, either as = *pagan* Gentiles in opposition to the Jews (Ro 2^{14} 3^{29}, Gal 2^{8}) or as = Gentile in opposition to Jewish *Christians* (Ro 11^{13}, Gal $2^{12.14}$). This double usage is well illustrated by comparing Eph 3^{1} with 4^{17}, in both of which passages ἔθνη is used; but in the first it is simply a mark of nationality, while in the second it has a moral touch, as is often the case with *goiim* in OT and ἔθνη in the Apocr., where *Gentiles* is sometimes practically equivalent to *heathen* (2 K 16^{3} 21^{2}, Ezr 6^{21}, Ps $2^{1.8}$, Jer 10^{2} etc.). From this point of view τὰ ἔθνη, the nations outside Isr., have no part in the covenants of promise (Eph 2^{12}), hence the emphasis which NT lays upon the new order of things when the mystery of the gospel (Eph 6^{19}) is made known (Ac 10^{45} 11^{18} 15^{9} etc.), until, finally, the difference between Jew and Gentile having disappeared, the word ἔθνη (heathen) may be simply opposed to the (united) Christian Church (1 Co 5^{1} 10^{20} 12^{2}, 1 Th 4^{5}, 1 P 2^{12}).

Israel's attitude towards other nations, never marked by much cordiality, underwent most important modifications in the post-exilic period. The reformation of Ezra deliberately aimed at fostering that spirit of exclusiveness which gave so much offence to the Gentile world, and which lent not a little colour to the charge of Tacitus (*Hist.* v. 5, cf. 1 Th 2^{15}) and others, that the Jews were enemies of the human race. Even to enter the house of a Gentile, and much more to eat with him, involved ceremonial uncleanness (Jn 18^{28}, Ac 10^{28} 11^{3}). In the Talm. (*Aboda Zara*, i. 1, 2) we find it enacted that for three days before and after a heathen festival it was unlawful to transact business with G., to lend to or borrow from them, to pay money to or receive it from them. Side by side, indeed, with this exclusiveness, a proselytizing tendency was developed, to which we find allusions both in Jos. and NT (*Ant.* XX. ii.–iv., Mt 23^{15}). By what seems at first a strange inconsistency, but which is easily susceptible of explanation, even G. who were not proselytes might have sacrifices offered in the temple. This, which is implied in Lv 22^{25}, is expressly asserted by Jos. (*c. Ap.* ii. 5; *Wars*, II. xvii. 2–4; *Ant.* XI. viii. 5, XIII. viii. 2, XVI. ii. 1, XVIII. v. 3; cf. 1 Mac 7^{33}). But that the G. could enter into full participation in the blessings of salvation except through the portal of Judaism, was an idea that dawned very slowly upon the minds even of some of the apostles of our Lord. The OT prophets suffered from the same limitations of vision. Even Deutero-Isaiah, who delights to describe the mission of Isr. to be a light to the G. (Is 42^{6} 49^{6}), doubtless regarded conformity to Israel's law as necessary on the part of the latter. It is true that Isaiah himself reaches the sublime conception of Egypt and Assyria being, equally with Israel, the object of God's complacency (Is 19^{23-25}), and that something approaching the conception of a universal religion set free from every trammel of national individuality is reached in Is 56^{6-7} and Zeph $3^{9.10}$. But these exceptions simply prove the rule. Even the Hel. Jews did not necessarily through contact with the G. rise superior to the ancestral contempt for everything outside the pale of Judaism. On the contrary, their pride and exclusiveness were sometimes intensified, as we see from the bitter opposition with which they met the work of St. Paul. And in the Christian Church itself there was considerable friction between Jewish and G. Christians—a fact which, in spite of the exaggerated importance attached to it by the Tübingen school, must never be left out of account in our construction of the early history of the Church. See further FOREIGNER, HEATHEN, PAUL, PROPHECY, PROSELYTE.

GENTILES, COURT OF.—See TEMPLE.

GENTLENESS.—The word ‘gentle’ does not occur in OT except in RV of Jer 11^{19}, which tr^{s} כֶּבֶשׂ אַלּוּף ‘a gentle lamb,’ where AV has ‘a lamb or an ox.’ It occurs five times in NT (AV). In 1 Th 2^{7} and 2 Ti 2^{24} it corresponds to *ἤπιος*; it is the character proper to a nurse among trying children, or a teacher with refractory pupils. The RV keeps ‘gentle’ in both these passages, and it would be hard to find a better word. In Tit 3^{2}, Ja 3^{17}, 1 P 2^{18} ‘gentle’ is the AV tr. of *ἐπιεικής*. The difficulty of this word is shown by the fact that in 1 Ti 3^{3} it is rendered ‘patient,’ while in Ph 4^{5} *τὸ ἐπιεικὲς ὑμῶν* is tr. ‘your moderation.’ Yet RV uniformly renders *ἐπιεικής* ‘gentle,’ and in Ph 4^{5}, though it displaces ‘moderation’ by ‘forbearance,’ it puts ‘gentleness’ in the margin.

The general idea of the word ‘*ἐπιεικής*’ is that which is suggested by equity as opposed to strict legal justice; it expresses the quality of considerateness, of readiness to look humanely and reasonably at the facts of a case. There is a good discussion of it in Trench, *Syn.* § xliii.: he thinks there are no words in English which answer exactly to it, the ideas of equity and fairness, which are essential to its import, usually getting less than justice in the proposed equivalents. As opposed to *πραΰτης*, ‘meekness,’ it is not easy to draw any other distinction than that *πραΰτης* is more inward and passive, a disposition or habit of the mind itself; *ἐπιείκεια*, ‘gentleness,’ is shown actively in relation to others. These words are found together, as characteristic of Christ, in 2 Co 10^{1}; *ἐπιείκεια* occurs once again in Ac 24^{4}, but here both AV and RV render it ‘clemency.’ ‘Gentleness’ in Gal 5^{22} is *χρηστότης*, a word which rather means ‘goodness’ or ‘kindness.’ The corresponding adjective is rendered in various places ‘good,’ ‘kind,’ ‘gracious,’ ‘easy.’

The only occurrence of ‘gentleness’ in OT is 2 S 22^{36} = Ps 18^{35} ‘Thy gentleness hath made me great.’ The RV keeps ‘gentleness’ in the text, but gives ‘condescension’ in the margin, which is much better. It is properly ‘thy lowliness’ (עַנְוַתְךָ), *i.e.*, as Cheyne explains it, ‘thy fellow-feeling with the lowly.’ The key to the meaning is found in comparing such passages as Ps $113^{5f.}$, Is 57^{15}, Zec 9^{9}, Mt 11^{29}. The rendering of 2 S 22^{36} in LXX, *ἡ ὑπακοή σου ἐπλήθυνέν με*, agrees with the MT עֲנֹתְךָ (עֲנוֹת = *respondere* = *ὑπακούειν*). J. DENNEY.

GENUBATH (גְּנֻבַת, cf. Palmyrene גנבא, de Vogüé, No. 137, *Γανηβάθ* AB Luc.).—Son of Hadad, the fugitive Edomite prince, by the sister of Tahpenes queen of the Pharaoh who ruled Egypt at the close of the reign of David and the commencement of that of Solomon. Genubath was weaned by queen Tahpenes, and brought up in the palace among the sons of Pharaoh (1 K $11^{19.20}$).

C. F. BURNEY.

GEOGRAPHY.—See PALESTINE, WORLD.

GEOLOGY OF PALESTINE.—In dealing with this subject the name ‘Palestine’ will be taken in its widest sense to include both the western and eastern sections of country lying on either side of the Jordan-Arabah depression, as well as the mountainous region of Sinai on the south.

There are few countries in which the physical features more clearly indicate the internal geological structure than that we have now to consider; hence, in dealing with these features under distinct heads, we shall have to explain how they are dependent on the nature and position of the formations of which they are constructed.

I. PHYSICAL DIVISIONS.—The whole region is physically divisible into five sections or tracts of country, which the student of Scripture will find to be curiously interwoven with the historical events and incidents therein recorded. Indeed it may be said that without some knowledge of the features of Palestine it is impossible to understand accurately, or to grasp in their full meaning, many of the most important events of Bible history. Many of the articles in this work will serve to illustrate this statement.

1. *The Maritime Plain.*—The first of these physical tracts is the Maritime Plain, stretching along the Mediterranean coast from the Delta of the Nile to the base of Carmel, and including the land of Philistia and part of Phœnicia. Historically, ‘the River of Egypt’ (*Wady el-‘Arîsh*), a waterless dell emptying into Lake Serbonis, should be regarded as the western border of Palestine, but physically it is not of importance. The Maritime Plain consists of a series of low, undulating hills and wide valleys rising into levels of 300 to 400 ft. above the sea inwards to the base of the central tableland; or, west of Gaza, gradually merging into the elevated plain of the Badiet et-Tîh. It is composed of sand, gravel, and soft calcareous sandstone; but considerable areas are covered by a rich brownish loam with exceedingly fertile properties, capable of producing wheat and other plants in abundance. Throughout almost its whole length the coast is bordered by a range of sandhills—sometimes rising to a height of 150 ft.—which are ever moving inland, impelled by the westerly winds, except where hindered by natural or artificial barriers; the natural barriers being streams. North of Carmel, the plain of Esdraelon (*Sanjak Akka*) is the representative of the Maritime Plain of Philistia, and it extends northwards with a gradually narrowing breadth to the mouth of the Nahr el-Kelb at Beirût. This line of coast was originally decorated with palm trees, and gave rise to the name of Phœnicia, by which it is known in ancient history.

2. *The Tableland of Western Palestine and the Desert of the Tîh.*—This forms the central and largest physical district of Palestine, stretching from the base of the Lebanon to the northern margin of the mountainous region of Sinai. On the west it is bounded by the low-lying Maritime tract just described, except where the bold headland of Mount Carmel thrusts itself out into the very waters of the Mediterranean; and on the east by the deep depression of the Jordan-Arabah Valley. Along its centre it consists of an elevated plateau of limestone; or, more frequently, of a narrow ridge invaded by deep ravines coming up from the Maritime Plain on the one hand, and from the Jordanic Valley on the other. Along this ridge runs the main high road from Syria to Hebron and the Sinaitic peninsula; and most of the important towns, including Safed, Bethel, Jerusalem, Bethlehem, and Hebron, are planted on this saddle. Some of the higher points rise to considerable elevations ranging up to over 3000 ft.; thus, Jerusalem at the temple area reaches 2593 ft., and Hebron 3040 ft. above the level of the Mediterranean. Towards the south (lat. 31° N.) the tableland of southern Judæa broadens out into the arid expanse of the Badiet et-Tîh (‘Desert of the wanderings’), which stretches southwards as far as lat. 29°, and is perhaps the least known of any part of N. Palestine. It consists of a vast expanse of Cretaceous and Nummulite limestone breaking off along a high escarpment overlooking the plain of Lower Egypt and the Gulf of Suez towards the west, and in the opposite direction forming the western margin of the Wady el-Arabah along a somewhat indented line of limestone cliffs. Towards the south the Badiet et-Tîh terminates in the lofty escarpment of *Jebel Ejmeh*, which reaches a level of over 5000 ft. above the Red Sea, and is formed of strata of nearly horizontal lime-

stone superimposed on others of Nubian sandstone. To the south of this grand rampart of terraced strata rise the lofty ridges and peaks of the Sinaitic mountains.

The Badiet et-Tîh forms a nearly barren, repulsive, but broken tableland of an average level of 4000 ft., with little pasturage except in the neighbourhood of a few springs, and along the course of the valleys. That it was at a former period well watered we have clear evidence in the existence of these valleys themselves, some of which yield an intermittent supply of water, especially those which connect with the rivers Jeib and Fikreh, which enter the Dead Sea from the south. Kadesh-barnea was doubtless situated near the eastern margin of the Badiet et-Tîh.

The streams which descend on either hand from the tableland of Western Palestine generally have their sources in copious springs rising through the limestone strata — which, being highly porous, readily absorb the rain or snow which falls during the winter months. The rain thus imbibed sinks down and forms underground reservoirs which feed the springs. The valleys are generally bounded by steep, sometimes precipitous, banks of limestone; and, owing to the extraordinary depth of the Jordan Valley and its close proximity to the sources, the streams descending from the central watershed on the east side to enter the Jordan or Dead Sea have a very rapid fall. Thus the Wady el-Aujeh, which has its source at Mezráh esh-Sherkiyeh at a level of about 3000 ft. above the Mediterranean, reaches the Jordan at a depth of 1200 ft. below the same plane, having a fall of 4200 ft. within a distance of 15 miles, that is, at the rate of 280 ft. per mile. The Kelt (brook Cherith?), which rises at Bireh (Beeroth) at a height of 2800 ft. and flows for the most part between lofty walls of rock for a distance of 21 miles, reaches the Jordan at a depth of 1170 ft. below the Mediterranean level, the fall being at the rate of about 190 ft. per mile; and lastly, the Wady en-Nar (brook Kidron) rising to the east of Jerusalem after flowing through the deep gorge of Mar Saba, enters the Dead Sea at a level of 1290 ft. below that of the sea, and has a total fall of about 3692 ft. in 14 miles, being at the rate of 264 ft. per mile. The streams entering the Mediterranean have necessarily a less precipitous course, and flow with a gentle current on reaching the Maritime Plain. Throughout the greater part of their extent the hills of Western Palestine are very bare of soil, the limestone strata of which they are formed being clearly traceable by the eye along their flanks, or cropping out under the feet at the summit. But in the valleys where soil has accumulated, and especially where there is artificial irrigation, the fertility is extraordinary and amply rewards cultivation.

(3) *The Jordan-Arabah Valley.* — The third physical feature is that of the Jordan-Arabah Valley intervening between the tableland of Western Palestine and the high plateau of Edom, Moab, and the Jaulán. Commencing in Cœle-Syria at the base of the Lebanon, it ranges southwards to the Dead Sea, when it descends to its lowest level of 1292 ft. below the surface of the Mediterranean, as determined by the officers of the Ordnance Survey (see DEAD SEA); then continuing southwards, the floor of the valley gradually rises to a level of about 640 ft. above the same plane at er-Rishy, from which it descends with a very gentle slope to the head of the Gulf of 'Aḳabah, of which it forms the physical prolongation. As already stated (see ARABAH), this great depression coincides with a line of 'fault' (or fracture of the earth's crust), along which the strata have been vertically elevated on the east side, or depressed on the west—a view which can be demonstrated at many points by a comparison of the strata along the opposite sides of the valley. Thus at the saddle of er-Rishy, above referred to, we find the Cretaceous limestone forming the cliffs on the west side of the valley, while on the opposite side the Edomite cliffs are composed of masses of granite, porphyry, and schist surmounted by the Nubian sandstone, which is in turn overlain above Petra, at a level of about 4000 ft., by the same Cretaceous limestone of er-Rishy; being very nearly the amount of the vertical displacement of the strata which occurs along the line of fault at this spot. Somewhat similar are the relations of the rocks at the southern end of the Dead Sea; but along the line of the Jordanic Valley towards the Sea of Tiberias the displacement diminishes considerably, so that Cretaceous limestones are found forming both sides of the valley. The Jordan-Arabah 'fault' generally keeps very close to the base of the cliffs forming the eastern margin of the valley, and numerous branching, or parallel, 'faults' accompany the main line of displacement, at least in the region south of the Dead Sea.

The floor of the Jordan-Arabah Valley is formed of alluvial terraces, gravel, blown sand, and mud flats. The terraces are of various ages, the more ancient occupying higher levels; the more recent being only a little elevated above the waters of the Jordan and Dead Sea. The highest and most ancient of the terraces are those seen at Ayûn Buweirdeh, occupying a position in the centre of the valley about 30 miles S. of the southern end of the Dead Sea, and at a level nearly corresponding to that of the Mediterranean. They are formed of calcareous marls with fresh- or brackish-water shells of the genera *Neritina*, *Melania*, *Melanopsis*, etc., and point to a time when the waters of a great lake occupied a position about 1300 ft. above the present surface of the Dead Sea. This lake must have extended northwards, so as to include the whole of the Jordan Valley as far as the Lake of Hûleh, a distance of about 200 miles. Next in importance to the terrace above described is that which may be recognized all round the margin of the Dead Sea hollow, known as the 'Ghor,' rising about 600 ft. above its surface —and formed of saliferous marls with gypsum on the west side, and of gravel and sand on the east. The salt terrace (Khasm Usdum) is referable to this horizon; and besides this, there are two or three distinct terraces at lower levels. The surface of the Sea of Tiberias which lies in the upper part of the Jordan Valley is 682 ft. *below* that of the Mediterranean, while the Lake of Hûleh rises to 7 ft. *above* this level. Still proceeding northwards the Jordan itself has its source in the copious fountains of Banias (Cæsarea Philippi) which burst forth, 'full grown at birth,' from the base of Mount Hermon, fed by the well-nigh perennial snows which crown the dome-shaped summit, which, at a height of 10,000 ft. above the level of the sea, dominates all objects terrestrial as far as the eye can reach.*

(4) *The Tableland of Edom, Moab, and the Jaulân.*— This section of country has to some extent been described under the head of the ARABAH (wh. see). Bounded on the west by the deep depression above described, it forms the western margin of the great Arabian Desert, the home of the wandering Bedawîn. Commencing on the north at the base of Mount Hermon, it stretches as a gradually ascending tableland southwards, through the Jaulân and Haurân (Trachonitis), into the ancient kingdoms of Ammon, Moab, and

---

* For an account of these springs, see Tristram, *Land of Israel*², 585.

Edom. Breaking off along a steep escarpment or series of scarps on the western side, on overlooking the Dead Sea it reaches a level of 3000 ft. above the Mediterranean, and farther south at Petra rises to still higher levels. In this latter part of its range the escarpment is much broken by ravines which penetrate its sides, and cause repetitions of the features along lines of 'faulting'; but, on approaching the head of the Gulf of 'Aḳabah, the escarpment becomes more consolidated, and the granite walls, penetrated by numerous igneous dykes of porphyry, basalt, and diorite, rise with an abrupt ascent from the Valley of the Arabah to levels of 5000 or 6000 ft. above the surface of the gulf. Here the intensely red colour assumed by the rocks has given rise to the name *Jebel en-Nur* ('mountain of fire') which is applied to the heights above 'Aḳabah. At this point the gorge of the Wady el-Ithem offers the only accessible road by which the Arabian Desert can be reached from the Arabah Valley until we arrive opposite Mount Hor (*Jebel Haroun*) at a distance of 45 miles to the northward, and this must consequently have been the route by which the Israelites circumvented the land of Edom when marching towards the plains of Moab on their way to the Promised Land;—the more direct way having been denied them by the king of Edom (Nu 20^{14-21}). The flanks of the tableland are intersected by numerous channels of mountain torrents—those to the southward near 'Aḳabah being generally dry, except after thunderstorms, when they bring down quantities of stones and shingle which they throw out in fan-shaped ramps at the mouth of each wady. A perennial stream, however, flows through the Wady Mûsa at Petra and along the Wady Haroun. But when we reach the borders of Moab and a region of greater rainfall to the northward, streams become more frequent and copious, and the Hessi, Kerat, the Arnon (*Mojib*), and Zerḳa Ma'in (*Callirhoë*), together with numerous smaller brooks, descend the slopes into the Dead Sea from perennial springs.

The southern portion of this tableland within the limits here imposed is made of very ancient formations, consisting of granite, schist, porphyry, and other igneous rocks which pass, in a northerly direction towards Petra, below great masses of red and variegated sandstone of, perhaps, two geological ages, the Carboniferous and Cretaceous. These sandstones often rise in courses of cyclopian masonry above the granitic base; sometimes forming terraces, sometimes truncated pyramids, or rampart-like breastworks, of which Mount Hor offers a striking example. These sandstone strata line the flanks of the escarpment to some, not well-determined, point in the Jordan Valley north of the Dead Sea; but they are everywhere superimposed by the white calcareous strata of Cretaceous age which gradually descend northwards from the Edomite plateau to the bed of the Jordan itself, and constitute the sides of the Jordanic Valley to the margin of the Sea of Galilee.

The region of the Jaulân and Haurân, which in some sense forms a continuation of the Moabite plateau, is an elevated plain formed altogether of sheets of basaltic lava, from the surface of which rise the truncated cones of extinct volcanoes, generally clothed with forests of oak. It is altogether uncertain at what period the volcanic fires became extinct, but it seems probable that it was not later than the close of the Pleistocene, or Glacial period, and was therefore synchronous with the gradual recession of the waters of the great Jordan Valley lake; the proximity of water being necessary to volcanic activity. On the other hand, the relations of the lava streams, both in this region and in the vicinity of the Dead Sea, to the Cretaceous strata, make it clear that the period of greatest volcanic action was long posterior to the age of these rocks themselves, and may be referred to that of the Pliocene. There is, moreover, no evidence that these volcanoes were in active eruption during the period of the early occupation of the country by man.

(5) *The Sinaitic Peninsula.*—In marked contrast, both as regards form and colour, to the plateaux and terraces of Western Palestine and the Badiet et-Tîh, characterized by greyish and yellowish tints, is the mountainous region of Sinai lying between the two arms of the Red Sea, and bounded along the northern margin by the escarpment of the Cretaceous and Nummulite limestones of Jebel Ejmeh above described. Here we find ourselves in presence of a group of noble mountains, crowned by peaks and serrated ridges, traversed by broad sinuous valleys which form the highways by which the traveller must find his way, and which are now generally dry, though once the channels of rivers and streams. The Sinaitic mountains are formed of rocks amongst the most ancient in the world, and referable to the Archæan age; and, as they are bare and destitute of verdure, they rise above the valleys in naked walls rich in their natural colouring of red, purple, and blue. It is only along the valleys that the green of verdure is seen, owing to the growth of small scrub and desert flowers, with groups of palms and tamarisks around the springs of water. These rescue the region from the reproach of utter barrenness, and allow the Arab to pitch his camp, and even to pasture his flocks of sheep and goats. The mountain summits rise to high elevations. At the head of the group stands the twin-peaked Jebel Katharina, reaching a height of 8551 ft. above the sea; next, Jebel Umm Shomer, 8449 ft.; then Jebel Mûsa (the traditional Mount Sinai), 7373 ft.; and Jebel Serbâl, which though not the highest is certainly the most striking of the series, because of its isolated position and serried outline; its summit reaches an elevation of 6734 ft. above the Gulf of Suez.* Standing on the summit of Sinai, the scene is most striking and impressive. The tumultuous assemblage of peaks and serrated ridges formed of rocks of granite and porphyry, whose natural reddish tints have been deepened and intensified by the powerful rays of the sun; the profound gorges and valleys walled in by lofty cliffs of naked rock; the absence of trees and verdure, except along the floors of the valleys,—all tend to impress the beholder with the conviction that he is here gazing on the face of nature under one of her most savage forms, in which the ideas of solitude, waste, and desolation contend with those of awe and admiration. This assemblage of peaks and ridges is bounded towards the east and west by the deep depressions of the Gulfs of Suez and 'Aḳabah; towards the north, distant glimpses of the tableland of the Tîh are obtained; while the mountains of Edom, rising beyond the Gulf of 'Aḳabah and the valley of the Arabah, bound the view in the direction of the great Desert of Arabia.

II. GEOLOGICAL FORMATIONS.—The formations of which the above tracts of country are composed range from the most ancient to the most recent;—but with wide gaps in the general succession as determined in other regions. For example, we have no representatives of the Cambrian, Silurian, Devonian, Permian, Triassic, or Jurassic formations, all of which are well developed in the British Islands; and we are therefore driven to the conclusion that Palestine presented conditions unsuited to the deposition of strata during these periods; or else that beds belonging to one or more of these periods having been deposited, had afterwards been removed by denuding agencies; but this is the less probable supposition.

---

* The elevations were determined by the officers of the Ordnance Survey of Sinai. The height of Jebel Mûsa, calculated by Mr. R. Laurence from Suez by aneroid, was 7585 ft., and from 'Aḳabah was 7595 ft., both over those of the Ordnance Survey, but probably less reliable. (See Hull, *Mount Seir*, 48).

The general succession of the formations present in Palestine is as follows in descending order:—

GEOLOGICAL FORMATIONS.

Recent	1. Sandhills and Desert sands. 2. Alluvial deposits of the Jordan and other streams.
From Pluvial to Pliocene.	1. Raised sea-beaches; sand and gravel with shells. 2. Calcareous marls, saliferous beds, sand and gravel forming terraces in the Jordan-Arabah Valley; old Lake beds in Arabia-Petræa.
More Recent Volcanic rocks	Basalt, dolerite, tuff, etc.
Eocene	1. Calcareous Sandstone of Philistia (?). 2. Nummulite limestone series.
Cretaceous	1. Cretaceous limestone with marls, etc. 2. 'Nubian sandstone.'
Lower Carboniferous	1. Wady Nasb limestone. 2. Desert sandstone and conglomerate.
Volcanic Series	Agglomerates, beds of lava, ashes, and tuff of indeterminate age.
Archæan	Granitic gneiss, granite, hornblendic and other schists; dykes of diorite, porphyry, etc.

(*a*) *Archæan.* — These rocks are found only amongst the Sinaitic and Edomite mountains, and are considered to be the representatives of the crystalline masses which come to the surface from beneath the Nubian sandstone at the First Cataract of the Nile. They lie at the base of all the formations in this part of the world, and have been referred by Fraas to the Archæan period.* They consist of hornblendic, chloritic, and talcose schists of the Wadis Nasb, Sarabit, and Feirân, underlain by reddish and greyish granite and gneiss. These rocks are penetrated by innumerable dykes and ridges of red felstone-porphyry, diorite, and basalt, of later, but indeterminate, age; except that they are more ancient than the Nubian sandstone of the Cretaceous period, or the Desert sandstone of the Carboniferous.

(*b*) *Volcanic Series.*—To the period of these dykes may be referable the stratified lavas, tuffs, and agglomerates of the Wady Haroun and Jebel esh-Shomrah (or Shomar) which form the basement beds east of the Dead Sea,† and are overlain by the Desert sandstone. Magnificent sections of agglomerate and igneous intrusions are laid open in the Wady el-Hessi, near es-Safieh, but their age is indeterminate beyond the fact that they are later than the Archæan and earlier than the Cretaceous or Carboniferous periods.

(*c*) *Carboniferous Beds.* — One of the most remarkable discoveries amongst the geological series of Palestine was that of Carboniferous rocks in the Wady Nasb by H. Bauerman in 1868,‡ afterwards extended to the eastern bank of the Dead Sea at Lebruj, near es-Safieh, by the Expedition of the *PEF* in 1883–84.§ The formation consists of red, purple, and variegated sandstone, which the writer has named 'the Desert sandstone' below, surmounted by blue limestone containing shells and corals of Carboniferous limestone species, such as *Spirifer striatus, S. attenuatus, Productus scabriculus, Orthis michelini, Syringopora ramulosa, Fenestella plebia* (?), and others. The occurrence of these strata in two widely-separated localities suggests the idea that they once occupied an extended and connected area, and have subsequently been dissevered by denudation. That the limestone is a marine deposit formed over the floor of the sea during a period of submergence, is shown by the names of the fossils above quoted, which are all of marine species and genera. These fragmental tracts may only be relics of a formation which included the upper division of the Carboniferous system, but which has been subsequently removed by denuding agencies.

(*d*) *Cretaceous Beds; Nubian Sandstone* (Russegger).—In the absence of several formations which in Europe and the British Isles succeed the Carboniferous, the Cretaceous strata are found in Arabia Petræa resting on an eroded surface of the older formations above described, whether of Carboniferous or of Archæan age. The formation is, however, only found represented by its upper members; the lower, belonging to the stages Neocomian, Urgonian, Aptian, and Albian not being here represented. Notwithstanding this *hiatus*, the Cretaceous is the most important of all the formations of Palestine, stretching from the southern margin of the Badiet et-Tîh to the Lebanon, and forming large tracts of the great Arabian desert east of the Jordan-Arabah depression. It is represented by two divisions; the lower or Nubian sandstone (Cenomanian of D'Orbigny) the equivalent of our 'Upper Greensand,' and by the Cretaceous limestone and marl, the equivalents of our Chalk and Chalkmarl (Senonian and Turonian). The Nubian sandstone consists of red and variegated, rather soft sandstone with a conglomerate of small pebbles of quartzite, granite, porphyry, and jasper at its base. Its thickness is exceedingly variable, owing to the irregularities of the floor of older rocks over which it was deposited, and its only fossils are fragments of plants at rare intervals. All along the escarpment of the Tîh from the Wady Hamr to the Gulf of 'Aḳabah it underlies the white limestones and marls of the upper Cretaceous beds, and along the flanks of the great western escarpment from 'Aḳabah to the northern end of the Dead Sea and beyond it is interposed between the crystalline rocks and the same calcareous strata.* On approaching the Sinaitic mountains, the Nubian and Desert sandstones may be observed in isolated masses capping the Archæan rocks; sometimes rising from their bases in truncated pyramids; and in the Wady el-'Ain, which is a continuation of the Wady Zelagah, one of the most remarkable old river courses in the peninsula, the walls of Nubian sandstone rise on either hand to a height of several hundred feet above the floor.† But it is in the Wady Mûsa at Petra that this formation is displayed to best advantage. Rising in nearly vertical walls from the floor of the valley and its branches, the sandstone has formed the material out of which the tombs and temples have been sculptured in various forms of architecture, displaying marvellous varieties of colour in yellow, orange, red, and purple shades, which have called forth the admiration of all travellers (see PETRA). These colours are due to the presence of various mineral pigments, of which oxides of iron, manganese, and possibly copper, are the most abundant.

The Nubian sandstone is probably a lacustrine deposit laid down over the floor of a vast inland lake, the boundaries of which, owing to extensive geological changes, it is now impossible to define except at distant intervals. One portion of this boundary was undoubtedly formed of the rocks of the Sinaitic group of mountains; other portions

[*] Except where carboniferous or volcanic beds are present.

[†] A view of this gorge is given in the frontispiece of Hull's *Mount Seir*.

may be discovered in Central Africa; and the lake itself may have been connected with the Cretaceous ocean in the direction of the Mediterranean.[*] The formation was accumulated from the waste of granitic and plutonic rocks forming the surrounding lands now partly submerged beneath the waters of the ocean.

(*e*) *Cretaceous Limestone.*—This great series of calcareous strata immediately succeeds the Nubian sandstone; and as it is altogether a marine deposit, it must have been formed over the bed of the ocean after a general subsidence and submergence of the region occupied by the lacustrine waters of the previous period. The lower beds are chiefly formed of white calcareous marls succeeded by harder limestone strata with bands of siliceous chert or flint. The following section taken in the Wady el-Hessi, at the S.E. border of the Badiet et-Tîh, will serve to give a general idea of the character of the lower portion of the formation. (1) Lowest beds;—light-blue calcareous marl, passing downwards into dark-blue clay with selenite, 250 ft. thick; (2) soft white limestone, with rare bands of chert, 200 ft.; (3) hard siliceous limestone with numerous bands of chert, forming the top of the cliff, about 200 ft. thick. Fine sections are also laid open on ascending the flanks of the escarpment overlooking the basin of the Dead Sea (the 'Ghor') on the eastern side, of which Lartet gives the details.[†] The total thickness of the Cretaceous limestone series may reach 800 to 1000 ft., and amongst the fossil forms the following may be cited: *Ammonites Luynesi*, *A. rhotamargensis*, *Pholadomya Luynesi*, *Ostrea Mermeti*, *O. flabellata*, *Hippurites*, etc. *Foraminifera*, visible only under the microscope, doubtless are abundantly present.

Building Stone.—The uppermost beds of the Cretaceous limestone yield an excellent building stone which has been used in the construction of the buildings in and about Jerusalem, including the walls of the temple. The stone has been extracted from the large quarries and caverns near the Damascus gate. The rock is hard, compact, and delicately coloured, capable not only of furnishing large blocks such as may be seen at the 'Wailing Place of the Jews,' but of being worked into ornaments and smaller objects of use, and of receiving a polish. Fraas gives the following section of the beds in descending order at this spot[‡]:—

1. Craie blanche (*Senonien*).
2. Étage supérieure des *Hippurites* ('Misseh').
3. Étage inférieure des *Hippurites* ('Melekeh').
4. Zone of *Ammonites rhotomargensis* (Turonian).

No. 2 ('Misseh') of the above section affords the principal building stone, and is 16 ft. in thickness; and Sir C. W. Wilson has shown that the reservoirs, sepulchres, and cellars under and around the city are excavated in the soft beds of No. 3 ('Melekeh') underlying the firmer beds of the 'Misseh,' which form the platforms for the buildings.[§]

(*f*) *Lower Eocene Beds; Nummulite Limestone.*—This formation, though belonging to the Tertiary division of the geological series, immediately succeeds the Cretaceous limestone just described, and bears so general a resemblance to it that together they appear to constitute one great calcareous formation, incapable of separation. This apparent continuity is, however, illusory, as has been shown by Zittel in the case of Egypt and the Nubian Desert; and a detailed survey would doubtless have the result of showing that the two formations are disconnected by an unconformity, however slight. The latest explorer of the geological features of Palestine, Dr. Blanckenkorn, is clearly of opinion that the two formations are capable of separation;[*] and Lartet had previously expressed the same view.

The Nummulite limestone is but sparingly represented in Palestine. It forms the southern slopes of part of the Lebanon,[†] is found capping Mount Carmel, and occurs in isolated masses at Sebastieh (Samaria), Nablûs (Shechem), and the vicinity of Jerusalem. It also overspreads a large tract of the western Tîh plateau, as it has been identified by its characteristic fossils in the limestone cliffs which overlook the Isthmus of Suez, but its inland limits remain to be determined with any degree of accuracy.

The lower beds of the formation consist of white marls and chalky limestone with *Nummulites*, surmounting the harder beds of Cretaceous age: these are succeeded by white limestones with bands of flint, resembling those of the latter period; and, as Lartet has pointed out, this general resemblance causes much uncertainty in the discrimination of the two formations on the spot. The Nummulite limestone is an oceanic deposit laid down under similar conditions of deposition to those of the Cretaceous beds, but with an interval of slight disturbance and movement in the floor of the sea. The fossils are distinctly of Tertiary genera and species.

(*g*) *Upper Eocene? Calcareous Sandstone of Philistia.*—This formation is frequently laid open in small sections between Beersheba and Jaffa, and in the Plain of Philistia. It consists of soft yellowish calcareous sandstone; but its relations to the Cretaceous and Nummulite beds are unknown, as the junction has not been observed. The writer has provisionally assigned these strata to the Upper Eocene stage, for reasons which are too much involved to be stated at length here.[‡] No fossils were noticed in the sandstone; and it is only right to observe that Blanckenkorn considers it to be of post-Tertiary or Diluvial origin. Its real age is one of those points remaining to be determined by future exploration.

(*h*) *Miocene Period.*—This epoch in the geological history of Palestine is unrepresented by any known strata; yet it was one of the greatest importance as regards the development of the physical features of this region, and, it may be added, of that of the whole basin of the Mediterranean and surrounding districts. The Miocene was the great land-forming epoch, during which the general outlines of the existing land surfaces were finally determined, and the relative areas of land and sea were constituted as they exist to this day. Down to the close of the preceding Eocene epoch the whole of Palestine, including the Lebanon and the Great Desert east of the Arabah, formed the bed of the ocean, the only emergent portions being the Sinaitic mountain-tops; all to the northward, eastward, and westward as far as the borders of the Atlas mountains, was overspread by the waters of the ocean. But with the close of the Eocene period a great physical change set in. Owing to contraction and movements in the crust, the sea-bed was elevated into land in the tracts bordering the Great Sea. Mountains, such as the Lebanon, were upraised; the strata were bent, folded, and fissured; and amongst the greatest of these fissures was that of the Jordan-Arabah Valley, along which the tableland of Edom and Moab was elevated into land. In a word, all the main physical features of the region here being passed under review had their first inception; and although they have been somewhat modified during succeeding periods, these modifications have not materially altered the main outlines of the land. River channels have been originated and deepened, and the land-surfaces have been somewhat eroded and worn down, but the main features remain as they were at the close of the Miocene period. These terrestrial changes occupied, without doubt, a vast length of geological time.

---

[*] In North Africa the boundary lay along the northern base of the Ahaggar Mountains in lat. 25° N. and the Morocco Atlas on the north, as the present writer has shown elsewhere; 'Geological History of Egypt and the Nile Valley,' *Trans. Vict. Inst.* vol. xxiv. p. 307 (with Map).

[‡] These reasons are stated in the *Mem.* 'Phys. Geol. Arabia Petræa,' p. 64.

(*i*) *Pliocene to Pluvial.*—The deposits referable to this period consist of raised beaches on the areas bordering the Mediterranean and Red Seas, and the terraces of the Jordan-Arabah Valley; these latter having been already described, our observations here will be confined to the old sea-terraces.

After the great emergence and elevation of land areas which had taken place during the preceding Miocene period, there appears to have been a subsidence to the extent of at least 220 or 230 ft. around the shores of the Mediterranean and Red Seas. The escarpments bordering the Delta of the Nile, and those of the Tîh and Western Palestine, again became sea-cliffs, with beaches at their base, while the waters of the Mediterranean and Red Seas commingled along the Isthmus of Suez. The amount of the submergence, as above stated, is demonstrated in the clearest manner by the occurrence of old sea-beaches both in Egypt and Palestine, at or about this level; of which the most remarkable is that known as 'Fraas' beach,' at Jebel Mokattam, above Cairo, and again at the Great Pyramid platform near Ghizeh. This occurs at a level of 220 ft. above the sea, and is characterized by beds of sand and gravel with marine shells, some of which are extinct species, while others are still living in the Red Sea; the cliffs of limestone are also penetrated by numerous borings of *Teredo*. Similar beds of gravel with shells may be observed on the eastern margin of the Gulf of Suez, as well as in the Arabah Valley up to a level of nearly 200 ft. above the Gulf of 'Akabah. But the most important case is that occurring in the valley of the Sherîah at Tell Abu Hareireh, east of Gaza, at a level of 200 to 220 ft. above the Mediterranean on both sides of the stream—a level corresponding to that of the raised beach above Cairo. Here the terrace lies in a hollow formed in the 'calcareous sandstone of Philistia,' which is clearly of older date than the shelly gravels of the raised beach: the following is the section in descending order;—

	ft.	in.	
1. Loam	5	0	thick.
2. Soft calcareous sandstone in thin layers	10	0	„
3. Beds of shells (chiefly casts) . . .	0	6	„
4. Soft calcareous sandstone, with small pebbles of flint and oyster shells .	5	0	„
5. River-bed; hard calcareous sandstone (thickness unknown) . . . (*over*)	2	0	„

The shells in bed No. 3 consist of the genera *Turritella*, *Dentalium*, *Artemis*, *Pecten*, *Cardium*, *Ostrea*, and spines of *Echinus*.*

All along the lower parts of the Maritime Plain extending for several miles inland from Jaffa, and rising from 200 to 300 ft., shelly sands and beds of gravel may be observed; and again inland from Beirût this ancient sea-bed may be observed at intervals, varying in character and composition, as at Ramleh, Lydda (Ludd) and Lokandel el-Motram in the valley between Beirût and the western spurs of the Lebanon, where it consists of conglomerate of water-worn pebbles of limestone, and may be referable to the later Pliocene age. The more recent sea-beaches, formed during the rising of the beds in the Pleistocene age, occupy lower levels, and are characterized by Mediterranean forms, such as *Pectunculus violascens*, *Purpura hemastoma*, and *Murex brandaris*, etc.

The submergence of the Palestine and adjoining areas, after the present land-surface had been determined, and subsequent re-elevation to existing levels, is therefore clearly determined by the above instances of old sea-margins. Meanwhile, in the region of the Jordan-Arabah depression, corresponding changes had been going on, resulting in the formation of terraces at various levels from that of the outer sea to the present margins of the inland lakes, but in time extending into the Pleistocene (or Pluvial) period; with some account of which, as far as it concerns the Palestine area, our review of the geological history of this region properly ends.

(*j*) *Pluvial to Recent.*—The general refrigeration of the climate in the northern hemisphere referable to the Glacial epoch, which was accompanied in the temperate zone by accumulations of snow and the advance of glacial ice, did not leave Palestine altogether unaffected; on the contrary, it has left indelible traces on its physical features. We know through the observations of several travellers, commencing with Sir J. D. Hooker, that there are old glacier moraines in the Lebanon at a level of 4000 ft. above the sea, and that one of the principal groups of old cedars is planted on a large moraine.* The presence of glaciers in the Lebanon being thus established, we necessarily infer the existence of a climate resembling rather that of the Caucasus and the Alps than that of the present day; perhaps we may say that the mean annual temperature, which is now about 70° Fahr., was at this epoch of extreme cold about 55° or 60°, and a correspondingly lower temperature extended over all the countries to the south of the Lebanon.† A further inference may be drawn, namely, that the rainfall all over Palestine, and extending into the Sinaitic peninsula, was considerably larger than at present, and the evaporation less rapid; and the general result would be that the present rivers and streams would have been larger, and valleys which, like those of the Badiet el-Tîh, are now destitute of streams, were channels for running water. It may be readily conceived that, when the perennial snows of the Lebanon were melting during the spring and summer, the waters of the Jordan were swollen far beyond their present limits, and that the surface of the Dead Sea, now retained at its present low level by the equalization of river supply and evaporation, must have risen to a limit far above that of the present day. We cannot, therefore, feel surprise at the evidences of former greater levels of the 'Jordan-Valley lake' afforded by the terraces rising hundreds of feet above the present surface of the Dead Sea, which have been described; they were the necessary result of greater influx of waters from streams, and of smaller evaporation, due to the humidity of the atmosphere and decreased temperature in the climate as compared with that of the present day. As the glacial conditions of the Pleistocene epoch passed away, and those of the present day gradually came into operation by a corresponding process in an opposite direction, the lakes and streams would naturally assume their present limits, or in some instances actually disappear. E. HULL.

* 'Geol. Arab. Petræa, etc.,' p. 74. A figure showing the relations of this raised beach to the calcareous sandstone is shown, *ib.* p. 64.

* 'On the Cedars of Lebanon,' *Nat. Hist. Rev.* 1862; Hooker's original observations have been confirmed by Tristram and Lartet.

† Fraas supposes there were glaciers amongst the mountains of Sinai, but the present writer was unable to recognize any clear evidence in support of this view in 1883–84.

GEORGIAN VERSION.—See VERSION.

GEPHYRUN (Γεφυρούν).—A city captured by Judas Maccabæus, 2 Mac 12^{13}. AV, perhaps rightly accentuating γεφυροῦν (infin. of γεφυρόω), tr. 'he went also about to make a bridge to a certain city.' RV has 'he also fell upon a certain city Gephyrun,' and appends marginal note, 'The relation between the names *Gephyrun* and *Caspin* is unknown, and perhaps the Greek text is corrupt. Compare *Gephrun*, the name of a city of Gilead mentioned by Polybius, V. lxx. 12, and *Caspor*, 1 Mac 5$^{26.36}$.' Jos. (*Ant.* XII. viii. 5) gives the name as Ephron. The site is unknown.

GER (גֵּר) is a Heb. term which in AV is generally rendered 'stranger.' The fact that the same tr^{n} is adopted also for other words whose proper equivalent is 'foreigner,' creates needless confusion, which might be avoided either by leaving *gêr*, which is a technical term, untranslated, or by translating it 'protected stranger.' Driver (*Deut.* p. 126) suggests that the rendering might uniformly be '**sojourner**' (so frequently in RV), which would preserve the connexion in EV with the verb 'sojourn' (גּוּר) in such passages as Gn 12^{10} 19^{9} 47^{4}, Is 52^{4}.

In opposition to the *nokhri*, who is often a mere *passing* stranger ('thou camest but yesterday,' 2 S 15^{20}), the *gêr*, while not homeborn, is a temporary *dweller* in the land (Gn 23^{4} [P | תּוֹשָׁב]) of Abraham at Hebron; Ex 2^{22} [J] of Moses in the desert, 18^{3} [E] to explain the name Gershom; fig. of J″, Jer 14^{8}; of Israel in Egypt, Gn 15^{13}, Ex 22^{21} 23^{9} [all JE], Lv 19^{34} [H], Dt 10^{19} 23^{8}; more frequently of *gêrim* in Israel (*e.g.* 2 S 1^{13} an Amalekite, cf. Jos 8$^{33.35}$ [E] 20^{9} [P], Is 14^{1}). The LXX, which twice transliterates גֵּר (Aram. גִּיּוֹר) by γ(ε)ιώρας, Ex 12^{19}, Is 14^{1}, uses πάροικος 11 times to tr. גֵּר and 10 times for תּוֹשָׁב. πάροικος answers to the classical μέτοικος (which is not used by LXX except in Jer 20^{3} and not at all in NT). μέτοικος designated a resident in a community who had not the same rights as a native citizen. As גֵּר occupies a position intermediate between אֶזְרָח (native) and נָכְרִי (foreigner), so does μέτοικος between ἀστός or πολίτης and ξένος. Of course the μέτοικος was from one point of view a foreigner, and might be called ξένος; hence οἱ ἐπιδημοῦντες ξένοι is in Ac 17^{21} rightly applied to the μέτοικοι at Athens. πάροικος appears in NT in same sense as in LXX (Ac 7$^{6.29}$, Eph 2^{19}, 1 P 2^{11}). The ξένοι καὶ πάροικοι of Eph 2^{19} is specially instructive; it answers exactly to the *peregrini atque incolæ* of Cic. *de Offic.* i. 34.

The *gêr* in the oldest time is a stranger who dwells under the protection of a family or a tribe to which he does not belong. He is not necessarily a non-Israelite. In Dt 18^{6} Jg 17$^{7-9}$ 19^{1} the term is applied to Levites (see Driver and Moore, *ad loc.*). The position of the *gêr* in Israel is illustrated by W. R. Smith from the precisely analogous institution of the *jâr* among the Arabs. He lives in the midst of the community personally free, but possessed of no political rights. He has left his own kin, it may be on account of a feud, or simply in order to benefit himself, and has cast himself upon the protection of a powerful chief or clan in his new dwelling-place. The institution is still known in Arabia (*OTJC*^{2} 342 n.).

In return for the protection accorded him the *gêr* had services to render. He was not indeed a slave (Micah's Levite not only enjoyed personal freedom but received wages, Jg 17^{10}, Gn 29^{15}, Dt 24^{14}), but his lot was at times hard enough (cf. Gn 31$^{7-40}$ Jacob's complaint of his treatment by Laban). Nothing evidences the precarious position of the *gêr* better than the frequent OT exhortations to act justly by him Dt 1^{16} 24^{17} 27^{19}, to show him kindness Dt 10^{19} 26^{12}, to refrain from oppressing him Ex 22^{21} 23^{9} (both JE), Lv 19^{33} (H), Dt 24^{14}, Jer 7^{6}, Zec 7^{10}. Hence probably also the repeated injunction that he was to enjoy the Sabbath rest Ex 20^{10} 23^{12} (both JE), Dt 5^{14}.

A man might be the *gêr* of a king or of the chief of a clan rather than of the whole community. A typical instance of this is found in David's relation to Achish of Gath. The Phil. lords will have nothing to do with 'these Hebrews' (1 S 29^{3}). David as the *gêr* of Achish was expected to make the interests of his patron his own (1 S 27^{12}), and in particular to go to war along with him even against his native country (28$^{1ff.}$).

A whole clan or tribe might be *gêrim* (Jos 9 the Gibeonites, 2 S 4^{2} the Beerothites; and even Israel in Egypt is described as a *gêr* Gn 15^{13}, Ex 22^{21} 23^{9} [all JE], Lv 19^{34} (H), Dt 10^{19} 23^{8}). In such cases, also, services had to be rendered in return for protection (*e.g.* by Jacob's family according to their occupation Gn 47^{6}, by the Gibeonites in hewing wood and drawing water Jos 9^{27}, by the Israelites in the building of cities Ex 1$^{13f.}$). It frequently happened that these *gêrim* were ultimately absorbed into the tribe whose protection they had invoked. See FOREIGNER, and cf. Kuenen, *Rel. Isr.* i. 182 f.

There were also *gêrim* of a god or a temple, who acted as ἱερόδουλοι in return for the protection accorded by the deity or the sanctuary. Evidence of this is furnished by such Phœn. proper names as Ger'ashtart (see ASHTORETH, p. 168^{a}), Germelkart, etc. (cf. the גּוּר of Ps 5^{4} 15^{1} 61^{4}, and see Cheyne, *ad loc.*, and W. R. Smith, *RS* p. 77 ff.). The Gibeonites may have belonged to this class, and the list of 'Nethinim' (Ezr 2$^{43ff.}$ = Neh 7$^{46ff.}$) contains many names of unquestionably foreign origin (Wellh. *Proleg.* 225 n.).

The close connexion which subsisted in the popular imagination between each land and its god, demanded that whoever settled there must serve the tutelary deity (2 K 17$^{24ff.}$ the story of the Assyr. colonists of Samaria). Hence the Sabbath rest (Ex 20^{10} 23^{12}, Dt 5^{14}) is not only a privilege enjoyed by the *gêr*, but an obligation imposed upon him. On the other hand, we read of Solomon (and it corresponds with the cosmopolitan character of his policy) that he built sanctuaries at Jerus. for a number of foreign deities (1 K 11$^{7f.}$). These were doubtless intended to serve, not only for his wives, but for others belonging to foreign nationalities who had been attracted to his capital, and who may have had, as in later times (Neh 13^{16}), their own quarter of the city. In like manner, the Israelites who had bazaars at Damascus (1 K 20^{34}) prob. erected altars built of earth from the land of Israel (cf. 2 K 5^{17}), and maintained the worship of J″ side by side with that of the Syrian gods. Solomon's example was copied by Ahab for the benefit of his wife and of the Tyrians and Zidonians who would frequent his court (1 K 16$^{32f.}$).

This syncretism in worship and tolerance of dissent from the national religion, which were greatly favoured by the existence of a multitude of local sanctuaries, received a check through the introduction of the Deuteronomic legislation with its central sanctuary, but far more through the enactments of the Priests' Code (P). The ideas introduced in Dt of Israel as a holy people, and of the land as not to be 'defiled' (21^{23}), led logically to the conclusion that the *gêr* who sojourned in Israel must conform as far as possible to the same regulations as the covenant people. Accordingly, we meet with an extension both of the privileges and the duties of the *gêr*. In D, indeed, matters are not carried so far as in P. In Dt 14^{21} the *gêr* is allowed to eat the flesh of an animal that has died of itself, acc. to Lv 17^{15} he is defiled no less than the Isr. by such an act. On the other hand, no difference is recognized between Isr. and *gêr* in the following particulars:—The *gêr* is to participate in the Feast of Weeks (Dt 16$^{10f.}$), of Tabernacles (16$^{13f.}$), in the offering of first-fruits (26^{11}), the Sabbath rest (5^{14}, cf. Ex 20^{10} 23^{12}, JE), the tithes (14$^{28f.}$), the gleanings of the field, etc.

($24^{19ff.}$), and he is to have equal justice done to him (24^{14}).

The exile helped to draw the bonds of union closer between Israelite and *gêr*, both alike being now strangers in a strange land. Hence in Ezk $47^{22f.}$ we find the same provision made for both in the ideal division of the land. On the other hand, in addition to the keeping of the Sabbath, we are probably safe to infer that circumcision was considered by Ezekiel to be obligatory for the *gêr* (cf. Ezk 44^{6-10} where *uncircumcised* 'in heart' and 'in flesh' are parallel terms). Deutero-Isaiah anticipates the conversion to Israel's God, not only of individuals (44^{5}), but of kings and princes (49^{7}) as well as their subjects ($51^{4f.}$), nay, he foresees a time when to that God 'every knee shall bow and every tongue shall swear' (45^{23}). In bringing about this consummation Israel has its function as a missionary nation ($42^{6.19}$ $43^{8.11}$ 49^{6}). The creed of Deutero-Isaiah is, 'There is no God but J″, and Israel is His prophet' (Wellh. *Gesch.* p. 117).

This universalism, indeed, could, according to the notions of most, realize itself only through the forms of Judaism. Non-Israelites must submit to the yoke of Israel's law. In post-exilic times the exclusion from the community of all who would not adopt the drastic reforms of Ezra and Nehemiah, enabled one and the same standard to be applied to the purified remnant. Hence, 'in P the *gêr* is placed practically on the same footing as the native Israelite; he enjoys the same rights (Nu 35^{15}, cf. Ezk 47^{22}), and is bound by the same laws, whether civil (Lv 24^{22}), moral and religious (18^{26} 20^{2} 24^{16}, cf. Ezk 14^{7}), or ceremonial (Ex 12^{19}, Lv 16^{29} $17^{8.10.12.13.15}$ 22^{18}, Nu $15^{14.26.30}$ 19^{10}); the principle, "One law shall there be for the home-born and for the stranger," is repeatedly affirmed (Ex 12^{49}, Lv 24^{22}, Nu $^{9.14}$ $15^{15.16.29}$), the only specified distinctions being that the *gêr*, if he would keep the passover' (which under no circumstances is the foreigner [בֶּן־נֵכָר] permitted to do), 'must be circumcised (Ex 12^{48}), and that an Israelite in servitude with him may be redeemed before the jubilee (Lv $25^{48f.}$), a privilege not granted in the case of the master's being an Israelite (v.$^{40f.}$)' (Driver, *Deut.* p. 165).

After the definite breach with the Samaritans (Neh $13^{28ff.}$), and the establishment of the temple on Mt. Gerizim (Jos. *Ant.* XI. viii.), the propagandist activity of Jerus. would be stimulated, and it would be felt that the way was more clear to work. There may be a reminiscence of this policy and its results in what the Chronicler reports to have taken place in the reign of Hezekiah (2 Ch $30^{1ff.}$, cf. 1 Ch 13^{2}, 2 Ch 15^{9}). As Schürer points out, the word *gêr* has already in P advanced far on to its later use as = *proselyte* (προσήλυτος, which frequently in LXX represents גֵּר of MT). This meaning appears completely established in the Mishna, where *gêr* denotes one who by circumcision and complete adoption of Israel's laws has become incorporated with the covenant people. If this last sense was intended to be brought out with special distinctness, the phrase גֵּר צֶדֶק ('righteous stranger') was used. For *gêr* in the original sense of a stranger dwelling in Israel, the Mishnic formula was גֵּר תּוֹשָׁב (in OT these terms are parallel in Gn 23^{4}, Lv $25^{23.35.47}$, 1 Ch 29^{15}, Ps 39^{12}), which in mediæval Judaism became גֵּר הַשַּׁעַר = a stranger dwelling within the gates of Israel (cf. Ex 20^{10}, Dt 5^{14} 14^{21} 24^{14}). The use of גֵּר to designate a *converted* Gentile became finally so well established that a verb (occurring in the Mishna) was formed from it, נִתְגַּיֵּר 'to become a convert' (Schürer, *HJP* II. ii. 315).

The battle which had been fought and gained by Ezra and Nehemiah had indeed to be fought over again more than once in Jewish history, notably in the Gr. period by the MACCABEES (which see); but for the further elucidation of the subject we must refer the reader to such articles as HASIDÆANS, PHARISEE, PROSELYTE.

GERA (גֵּרָא).—Mentioned as one of Benjamin's sons in Gn 46^{21}, omitted in Nu 26^{38-40}. Acc. to 1 Ch $8^{3.5.7}$ G. is a son of Bela and a grandson of Benjamin. Gera was evidently a well-known Benjamite clan, to which belonged Ehud (Jg 3^{15} where see Moore's note) and Shimei (2 S 16^{5} $19^{16.18}$, 1 K 2^{8}). See GENEALOGY.

GERAH.—See WEIGHTS AND MEASURES.

GERAR (גְּרָר, Γέραρα).—This place, as identified on existing maps, is about 6 miles from Gaza, a little W. of S., and perhaps 25 miles from Beer-sheba in a direction N. of W. Gerar is mentioned in OT in the history of the time of king Asa and in that of the patriarchs. In Asa's time it was one of several cities in that region (2 Ch $14^{13.14}$). (In 1 Ch 4^{39} Gerar should possibly be substituted for Gedor of MT. The LXX reads Γέραρα. See GEDOR). In the earlier time, G. is the region where Abraham and Isaac came into contact with a king or kings named Abimelech. The site as now identified is well within the territory properly known as the land of the Philistines. The region as mentioned in Ch and Gn must have extended far to the S., and far enough to the E. to cover part of what is elsewhere known as the Negeb, or S. country.

Were the people whom Abraham and Isaac met in this region true Philistines? That is, did they belong to the same race that afterwards so often oppressed Israel? Their essentially pastoral character is no argument in the negative, for Israel was then also a pastoral people. The region is called the land of the Philistines (Gn $21^{32.34}$), but that is not in itself decisive, for the writer uses the geog. terms belonging to his own time, and not necessarily to the time of Abraham. The people are called Philistines (Gn $26^{1.8.14.15.18}$), but even that is not so conclusive as at first it seems, for the term may be merely geographical, describing the people who, in the time of Abraham, lived in the country which the writer knew as Philistine. But Abimelech seems to have been a Phil. name (Ps 34, title). Phichol, the 'captain of his host' (Gn $21^{22.32}$ 26^{26}), is witness to the existence of military organization, such as corresponds with the genius of the later Philistines. Ahuzzath (26^{26}) is naturally explained as one of the Phil. names in *ăth*, like Goliath. Add these confirmatory particulars to those above given, and we have proof of considerable strength identifying the Philistines of Isaac with those of later times.

G. was a well-known place in the earlier centuries after Christ. A monastery was located there. The abbot Sylvanus, of the 4th cent., was celebrated; and Marcion, bishop of G., was one of the signatories of the Council of Chalcedon, A.D. 451. The Talm. writings know the district as *Gerarki* (Euseb.; Jerome, *Onomast.*; Sozomen, *Hist. Eccles.* vi. 32, ix. 7; Schwarz, *Pal.* p. 109). Travellers of the present cent. have given a good deal of attention to this region, *e.g.* Thomson, *Land and Book*, ii. 350; Stanley, *Sin. and Pal.* p. 159; Robinson, *Researches*, i. 189, ii. 43, 44. See also *PEFSt*, 1871, p. 84; 1875, pp. 162, 164; 1881, p. 38; and Sayce, *Pat. Pal.* 181, 189.

W. J. BEECHER.

GERASA (*Γέρασα, Γερασηνοί*).—In the RV 'Gerasenes' takes the place of 'Gadarenes' in Mk 5¹, Lk 8²⁶; with these exceptions the expression 'the country of the Gerasenes' does not occur in the Bible. See GADARA, GERASENES.

Jerome (*ad Obad.* 1) states that Gilead was called in his day Gerasa, and it is possible that the term 'country of the Gerasenes' (or Gilead) may have extended as far as the Lake of Gennesaret; but as Gilead is usually supposed to have been terminated on its northern boundary by the Hieromax, it seems more probable that the 'country of the Gerasenes' (Mk 5¹) refers to a town of the name of Gerasa on the eastern shore of Gennesaret (see GERASENES, and cf. Origen, *Opp.* 4, p. 140). According to Ptolemy (v. 15), Gerasa was a city of Cœle-Syria (which included Gilead), 35 miles from Pella; and Pliny describes it (v. 18), Gerasa being read for Galasa, as one of the cities of the Decapolis which was built or rebuilt, colonized and endowed with privileges on the conquest of Syria by the Romans, B.C. 65 (Stephanus, *Ethnic.*). Eusebius (*Onomast. s.v.*) describes the Decapolis as that part of Peræa 'that lies about Hippos, Pella, and Gadara.' Josephus (*BJ* III. iii. 3) places Gerasa in the district of Peræa, east of Jordan, on the borders of the Arabian desert, and mentions it in connexion with Pella and Philadelphia (*BJ* I. iv. 8). Epiphanius (*Adv. Hær.* i. and ii.) describes Decapolis as around Pella and Basanets, and speaks of the fountain of Gerasa of Arabia. Jamblicus states that it was colonized by veterans of Alexander the Great, which is not improbable from its proximity to Pella, which was probably colonized in this manner.

The early history of Gerasa is unknown; it first appears in history as an important fortified city in the account of its capture (*c.* 83 B.C.; *BJ* I. iv. 8) by Alexander Jannæus, the Hasmonæan king of the Jews. Having subdued Pella, he directed his march on the city of Gerasa, lured by the treasures of Theodorus, son of Zeno, and, having hemmed in the garrison by a triple wall of circumvallation, carried the place by assault. In *Ant.* XIII. xv. 3 Pella is called Dios, or placed close to it, and Gerasa is called Essa. In A.D. 65 Gerasa, as one of the cities of Decapolis, was probably rebuilt by the Romans. On the revolt of the Jews against the Roman dominion they laid waste the villages of the Syrians and their neighbouring cities, among which were Gerasa and Pella; and 'every city was divided into two armies, encamped one against another'; but the Gerasenes did no harm to those Jews who abode amongst them, and even conducted those who wished it as far as their border (*BJ* II. xv. 1, 5). Shortly after this, Vespasian sent Lucius Annius to Gerasa with an army, who took the city and slew a thousand young men, and plundered and burned the city (*BJ* IV. ix. 1). Nothing further is heard of Gerasa in history; but during the peaceful age of the Antonines (A.D. 138 to 180) it attained a position of the greatest prosperity, and was adorned by monuments, which, still existing, show that it became one of the most important cities of Syria. It subsequently became the seat of a bishopric, and the name of one of its prelates is found amongst those who were present at the Council of Chalcedon. There is no evidence that the city was ever inhabited by the Arabs after the Roman and Byzantine period. In the Talmudic writings and in Jerome, Gerash and Gilead are synonymous. Reland states that coins of Gerasa exist, showing the worship of Artemis in the temple there in 2nd cent. (cf. Schürer, *HJP* II. i. 118). During the Crusades Baldwin (A.D. 1121) besieged a castle constructed of large stones called Jarras, supposed to be Gerasa; but William of Tyre, in speaking of the siege, makes the distance not far from the Jordan; and as Gerasa has no appearance of having been occupied by any settled population since its destruction during the Byzantine period, it was probably some other castle that Baldwin attacked.

It is probable that the fountains and waters of Palestine, where conveniently situated, mark the sites of towns and villages from the earliest times, and that the splendid perennial stream and fountains of *Jerâsh* must have been chosen as a position for a town at a very early date. No identification, however, appears to have been attempted with any success except that by Sir George Grove with reference to Ramoth-gilead. He points out that if Ramoth-gilead and Ramath-mizpah are identical, a more northern position than *es-Salt* would seem inevitable, and that the Arabic version of the Bk. of Joshua gives *Ramat el-Jerash*, thus identifying the Gerasa of the classical geographers with Ramah of Gilead. The Jewish traveller Parchi says that 'Gilead is at present Djerash' (Zunz in Asher's *Benjamin*, 405). See RAMOTH-GILEAD.

Jerâsh is situated in the *Belḳa* of the modern Arabs, near their best pasture ground, which is referred to in the Bible (Dt 3¹⁰ 4⁴³; see Driver's note) as plains (*mîshôr*), in RV 'tablelands,' thus having the same signification, to a limited extent, as the Arabic name *Jerâsh*.

There can be no doubt that the very remarkable ruins still existing in good preservation in the highlands of Gilead, called *Jerâsh*, represent the remains of the Roman city of Gerasa of the time of the Antonines; and although these ruins, so far as they have yet been observed, are distinctly attributable to the 2nd to 5th cents., there is no reasonable doubt that they are built on the site of the earlier Greek city of Gerasa. This locality is mentioned by Yakûbi in the 7th cent. as being in his time one of the towns of the Jordan Provinces, and the poet Al Mutanabbi praises the fertility of *Jerâsh*. Yakût in the 13th cent., who had not himself seen the spot, describes it as a 'great city now in ruins' through which runs a stream which turned many mills, and relates that the *Jerâsh* mountains contained many villages.

Jerâsh is beautifully situated in the highlands of Gilead, 20 miles east of the Jordan, the same distance north of *'Ammân* (Philadelphia), 22 miles from *Fâhel* (Pella), and 6 miles north of *Wady Zerḳa* (Jabbok). It is 1900 ft. above the level of the Mediterranean, in the midst of hills rising from 500 to 600 ft. higher, until the tablelands (*mîshôr*), called by the Arabs *Belḳa*, are reached, which during part of the year are rich pasture, and for a short period in the autumn appear to be desert. The city occupies a considerable portion of a shallow valley, the ruins stretching some way up the limestone hills; and through the midst runs a delightful perennial stream fringed with oleanders, and falling about 1000 ft. before reaching the *Zerḳa*, 6 miles to south. The city is surrounded by walls, built in the outline of an irregular nine-sided polygon, about 3000 yards in circumference, the stream dividing it into two nearly equal parts: the greater portion to the west, on which side are all the public buildings; the private buildings occupying the east side of the stream and the higher ground to the west. The site of the city is undulating and full of knolls, affording most excellent positions for public buildings. The walls of the city are much decayed, and in some parts have been quite removed—they have been 8 ft. thick, and are built of small squared stones of limestone. There have been at least six gates in the wall—three to west, one to east, and the two principal north and south gates. Between these two gates runs a paved road with a double row of columns on the west side of the stream, close to it on the north and about 100 yards from it on the south;

the public buildings are constructed in connexion with this main thoroughfare. They were all of about the same date, and, taking it all together, this city is the most complete example of the Roman work of the time of the Antonines in Syria. They are constructed on one general plan, and cannot be considered in architectural remains to be inferior to Palmyra, though the ruins of the latter cover a far larger area. Reference to the works of Wood and Dawkins and the photographs taken by *Pal. Explor. Fund* in 1867 will show that each city has a distinct architectural character.

On approaching *Jerâsh* from the south, attention is attracted by a fine arch of triumph of decorated stone in the Corinthian order, with three arched passages and a front of 80 ft., leading to a paved Roman road running for about 300 yards northerly to the southern gate of the city. On the left-hand side is a *naumachia* or theatre for naval contests, about 700 ft. by 300 ft., with its arena below the level of the surrounding ground, in order that it might be filled from an aqueduct which supplied water from the stream. On the left, among the hills, is the Necropolis, and sarcophagi of black basalt with Roman devices are to be seen lying about. The southern gate is in ruins, but it is similar in appearance to the triumphal arch. The main street on entering the city bears to the left, leading to an oval colonnade or hippodrome, 310 ft. by 230 ft., lined with columns 2 ft. 5 in. in diameter, with capitals of the Ionic order, supporting a plain entablature. Immediately to the left on entering the city are a large theatre and a temple. The theatre facing north is open, and is constructed to seat over 2000 people, with a closed stage 110 ft. across; it is lavishly decorated in the Corinthian order. The temple facing nearly east is peripteral, measuring 110 ft. by 85 ft. along the walls outside the cell; the columns are 4 ft. in diameter and spaced at 12 ft. intervals from centre to centre. Near the northern end of the hippodrome the main street, 22 ft. wide, leads in a straight line direct to the north gate, and is adorned with a row of columns on each side with Corinthian capitals supporting an entablature. The columns are about 3 ft. or more in diameter. The road, 22 ft. wide, is paved with hard stone, which has still the marks of chariot wheels, and at the sides are raised pavements for foot passengers. At a distance of about 100 yards is a cross street at right angles, also with a double row of columns, leading up the hill on the left to the west gate, and to the right over the stream by a Roman bridge; four large pedestals, 12 ft. square, at the cross streets still remain, where statues once adorned the city. About 50 yards from the cross streets are some ruined palaces, with columns 4 ft. in diameter, with fragments of Egyptian rose granite and remains of frieze, cornice, and pediment, on which decorations have been lavished with great exuberance, with an inscription apparently containing the name of Marcus Aurelius Antoninus (A.D. 161–180); and at about 100 yards from the cross street, both right and left, are the remains of a series of handsome buildings, one a basilica, grouped in relation to the great temple of the Sun, which stands on a natural eminence nearly in the centre of the city in the western quarter. The temple facing the east measures round the walls of cell 89½ ft. by 44½ ft., the platform is 14 ft. wide on each side. It has at the entrance 12 columns, 5 ft. in diameter, spaced at intervals of 12½ ft. from centre to centre; 11 of these magnificent columns still remain *in situ*, 10 of them surmounted by their Corinthian capitals. All the buildings about the temple have been highly ornamented. From an inscription copied by Burckhardt it would appear that these buildings were erected in the time of Antoninus Pius, A.D. 138–161. Proceeding farther north we come to a second street of intersections, with a handsome rotunda over the intersection; the cross street leads on the left to another theatre, and on the right to an extensive building supposed to have been a bathing establishment. The theatre is not so large as that to the south, and has an open stage or scene. On the east bank of the river to the north is another Corinthian temple facing west, a very unusual aspect for temples of the 2nd and 3rd cents. in Palestine.

There are many other ruins of public buildings not enumerated whose identity has not been established, and a number of inscriptions (more than ten), two of which, near the ruins of a building supposed to have been a church, south of the temple of the Sun, refer to the establishment of Christianity and the discontinuance of pagan worship of about 5th cent., an important piece of evidence in connexion with the subject in Syria (Conder, *Palestine*, p. 180). The stream which runs through *Jerâsh* is principally fed from springs within the city on east side. There are very full accounts of *Jerâsh* in the travels of Buckingham, Burckhardt, Irby, and Mangles, but no recent surveys have been made. *Jerâsh* was visited by the present writer in 1867, and a sketch plan of the city was made and several plans of temples, which have not yet been published. Fifteen photographs of ruins also were taken, which have been published by the *Palestine Exploration Fund.* C. WARREN.

GERASENES.—The country of the Gerasenes (AV of Mt 8^{28} **Gergesenes;** Mt 5^1 Lk 8^{26} **Gadarenes;** RV in Mt Gadarenes, in Mk and Lk Gerasenes) is referred to in NT only in connexion with the casting out of the legion of demons and their entry into the herd of swine. There are three distinct readings of the name of the people in the MSS—Gergesenes, Gadarenes, Gerasenes—as the following table will show:—

	Mt	Mk	Lk
B	Γαδαρηνῶν	Γερασηνῶν	Γερασηνῶν
ℵ	Γαζαρηνῶν (ℵ^c Γεργεσ.)	Γερασηνῶν	Γεργεσηνῶν
A	(wanting)	Γαδαρηνῶν	Γαδαρηνῶν
C	Γαδαρηνῶν (C³ Γεργεσ.)	Γαδαρηνῶν	Γερασηνῶν (C² Γεργεσ.)
D	(wanting)	Γερασηνῶν	Γερασηνῶν

Thus, as WH (App. p. 11) point out, documentary evidence shows that Γαδαρηνῶν is the true reading in Mt, Γερασηνῶν in Mk and Lk.

The miracle took place 'on the other side' of the Lake of Gennesaret, which is 'over against Galilee' (*i.e.* on the eastern side of the lake) (Lk $8^{22. 26}$). And when Jesus 'was come out of the boat, straightway there met him out of the tombs a man with an unclean spirit, who had his dwelling in the tombs' (Mk 5^2). This clearly indicates that the tombs were close to the shore of the lake, and from the following passages it appears that the tombs and city were in the proximity: Lk 8^{27} 'There met him a certain man out of the city who had devils . . . and abode not in any house but in the tombs.' From the following it appears that the hills ran up directly from the coast of the lake: Lk 8^{32} 'Now there was there a herd of many swine feeding on the mountains . . . and the herd rushed down the steep into the lake, and were choked.'

From this it is certain that 'the country of the Gerasenes' cannot refer to the city of Gerasa in Gilead (*Jerâsh*), as Gerasa is an inland town east of Jordan, near Philadelphia, towards Arabia (*BJ* III. iii. 3, 4), which has certainly been identified with the ruins of *Jerâsh.* It also appears that Gadara cannot be the city spoken of in the incident, as it (now *Umm Ḳeis*) is situated about six or more miles south of the Lake of Gennesaret on the summit of a high hill with the deep gorge of the river Hieromax (*Jarmûk*) at its foot, cutting it off from the broad plain shelving down to the lake. There was, however, a district attached to the city of Gadara, and it is possible that a place on the lake called Gerasa (not the Gerasa of the preceding art.) lay within Gadarene territory. Gadara was but 6 miles S.E. of the southern extremity of the lake, and Jos. (*Vita*, 9, 10) mentions Gadarene villages close to the lake side. According to Josephus, however (*BJ* IV. vii. 3), Gadara was the capital of Peræa, which did not extend north of the Hieromax. It is not improbable, however, that during the many vicissitudes of the administration accorded to Gadara its jurisdiction may have extended up the eastern side of the Lake of Gennesaret at the time the miracle occurred.

The problem, then, is to find a site on the east side of the lake which satisfies the biblical description and shows traces of the city and tombs. This has been successfully accomplished by Thomson (*The Land and the Book*, ii. 35), through the identification of the ruins of Kersa or Gersa on the eastern side of the Lake of Gennesaret, nearly half-way down from the northern end, south of the *Wady Samakh* (see further and especially Schumacher, *The Jaulân*, 179). Wilson states (*Recovery of Jerusalem*, p. 368) that about a mile south of this the hills, which everywhere else on the eastern side are recessed from half to three-quarters of a mile from the water's edge, approach within 40 ft. of it. They do not terminate abruptly, but there is a steep even slope, which we would identify with the 'steep place' down which the herd of swine ran violently into the sea. Macgregor (*Rob Roy on the Jordan*, p. 423) states, 'Between *Wady Samakh* and *Wady Fik* there are at least four distinct localities where every feature in the Scripture account of this incident may be found in combination; above them are rocks with caves in them, very suitable for tombs.' Thomson states that there are ancient tombs in the high grounds about the ruins of Kersa. Gergesa and Gerasa may thus be variations of the same name which is now found under the form of *Kersa*, *Chersa*, or *Gersa*, which now exist close to *Wady Samakh*, subject to the various pronunciations according to whether the people are from the hill country, or the plain, or from the desert. The name Gergesenes appears to be similar to that of a Canaanitish tribe (GIRGASHITES) which, according to Jos 24^{11}, would appear to have been located west of Jordan, but which Jerome (*Comm. ad Gen.* xv.) locates on the shore of the Sea of Tiberias. Origen also (*Opp.* iv. 140) alludes to the city Gergesa, which stood formerly on the eastern side of the lake, and to the precipitous descent to the water down which the swine rushed. A village, Gergesa, on a hill above the lake, is also mentioned by Eusebius and Jerome (*OS*^{2} p. 256, 14; p. 162, 18).

C. WARREN.

GERGESENES.—See GERASENES.

GERIZIM (הַר גְּרִזִּים *har Gĕrizzîm*, the modern *Jebel eṭ-Ṭûr*).—This important mountain faces its northern companion Ebal, having in the narrow pass between them the town of Nâblus (Neapolis), the ancient Shechem. Its height, 2849 ft., makes it lower than the other by 228 ft., but it has far surpassed it in historical and religious associations. The cleft between them (to which possibly the mountain owes its name) presents the only pass from east to west in the mountain range of Ephraim, and, being also on the main road from north to south, its facility of access and central position in the land marked it out as an important place in the kingdom of Israel.

To-day, as the sacred place of the little Samaritan community, it is interesting chiefly as a monument to the vitality of religious prejudice. The Samaritan Pentateuch contains a verse giving express commandment that an altar should be built on Mt. Gerizim, making it rather than Ebal or the temple-rock of Jerusalem the first and central shrine of the chosen people and the revealed law. This knowledge of the will of the Almighty is thus confined to a small and dwindling company in a Syrian village, the rest of the world, both Jews and Gentiles, being in darkness and error; and the assumption is to them one of comfort and complacency. The Samaritans and their Mt. Gerizim thus form the world's memorial of sectarianism, after the manner of Natural History showing at once the grub and the leaf it lives upon.

The top of the mountain is broad, bare, and rocky, and among the sacred places scattered over it some refer to the Bible narrative, others to Samaritan events, and others to Christian history. 1. *Patriarchal.*—Abraham entered the Promised Land by the pass of Gerizim, encamping at Shechem by the oak of Moreh, Gn 12^6 (J). Gerizim is also claimed, as against Mt. Moriah in Jerusalem, to have been the mountain to which Abraham was directed when commanded to offer up Isaac, Gn 22^2 (R). Much discussion has taken place over this locality, the evidence bearing chiefly on points of distance, conspicuousness, and the meaning of the words *Moreh* and *Moriah*. The Scripture account scarcely encourages such attempted precision, as its reference is merely to 'one of the mountains,' the words 'of Moriah' being an undoubted gloss. On the whole, Gerizim or some neighbouring height accords best with the Bible description.

The Samaritans point to a trench on the S.E. end of the Gerizim summit as the spot where Isaac was laid on the altar. The Jews and Moslems agree with the Samaritans in attaching great importance to this trial by sacrifice in the life of Abraham, Jewish tradition stating that Isaac said to his father, 'Bind me fast,' and the Moslems making Ishmael, whom they substitute for Isaac, surpass this zeal by saying, 'Do not bind me.'

Samaritan tradition, arguing from the neighbourhood of the village of Salem, makes Gerizim the place where Abraham was met by Melchizedek and the king of distant Sodom (Gn $14^{17ff.}$). It is also connected with Jacob, who, on his return from Paddan-aram, bought 'the parcel of ground' for his encampment at Shechem, Gn 33^{18-20} (E). In addition to this, the Samaritans point to a spot on the summit called *Khurbet Lauzeh*, as the place where Jacob slept, and had the vision of divine protection and promise, Gn $28^{11f.}$ (E).

2. *Israelite.*—Ebal and Gerizim were the mountains on whose sides the tribes assembled under Joshua, according to the command of Moses, to hear the curses and the blessings connected with the observance of the law (Dt $11^{29.32}$ $27^{11.12}$, Jos $8^{33.34}$). Gerizim was probably selected in preference to Ebal as the mount of blessing, because to one looking eastwards it was *on the right hand*, the side of good fortune (see Driver on Dt 11^{29}). The Samaritans point out a piece of flat rocky ground as the site of Joshua's altar and their own temple.

The distance from Ai, taken along with the position of Ebal and Gerizim in the centre of a hostile country, has offered a difficulty to the acceptance of the above narrative in Deuteronomy. A solution was attempted by Eusebius (*Onom. sac.*^{2} 253), Epiphanius, and others, by referring Ebal and Gerizim to localities nearer the Jordan Valley. But their connexion with Shechem, to which Josephus (*Ant.* XI. viii. 6), Eusebius, and Jerome themselves refer, has always discountenanced such a theory.

Gerizim comes again into prominence when Jotham delivered his highly figurative parable to the treacherous elders of Shechem (Jg 9^{7-21}).

Tradition has represented these two mountains as brought under the spell of the blessings and curses once pronounced upon them, declaring Gerizim to be beautiful and fertile, while Ebal is bare and barren; but at the present day they show the similarity that might be expected from their proximity, elevation, and composition.

3. *Samaritan.* — It is well known that the Samaritans erected a temple on Gerizim which henceforth became the rival of the temple at Jerusalem in historical claims and sanctity as a religious centre. The occasion that led to its erection, acc. to Josephus (*Ant.* XI. viii. 2, 4), was the marriage between Manasseh of the high-priestly family in Jerusalem and the daughter of Sanballat. This union, and many similar intermarriages, created the desire for an independent sanctuary, that would be free from the dictation of the Jerusalem authorities. It is practically certain that Josephus' chronology here is incorrect. He places the erection of the schismatic temple in the time of Alexander the Great, who, according to him, authorized its erection; but there can be little doubt that the temple on Gerizim was built a century earlier (*c.* 432 B.C.) by the son-in-law of Sanballat the Horonite referred to in Neh 13^{28} (cf. *inter alios*, Ryle, *Canon of OT*, 91 f.). This Samaritan temple lasted at least till the time of the Maccabees, when it was probably destroyed (*c.* 110 B.C) by John Hyrcanus (Jos. *Ant.* XIII. ix. 1; *Wars*, I. ii. 6). To what extent this rivalry as to the proper site of worship survived in the time of Christ, is seen in the proverbial hatred between Jews and Samaritans, and in the arguments urged by the Samaritan woman at Jacob's well (Jn $4^{20.\,21}$).

4. *Christian.*—The most conspicuous ruins in Gerizim at the present day are those called in Arabic *el-Ḳulá'ah*, 'the fortress.' We have here the remains of the church built by the Christians in the reign of Zeno in A.D. 475, which, having been destroyed by the Samaritans, was afterwards enlarged and fortified by Justinian in 530. See SAMARITANS.

The most interesting link with the past is the yearly celebration of the Samaritan Passover on its summit. As the sun sets on the Passover Eve, the seven lambs are slain, ceremonially examined, and roasted in the oven pit. At midnight the covering is removed, and the flesh is eaten by the standing elders with their families in the improvized tents. Anything left over is scrupulously collected and consumed, so that the letter of the commandment may be kept.

A. Smith, *HGHL* 119 f., 384 n. 2; Conder, *Tent-Work*, ch. ii.: Murray, *Guide-book to Syria* (Index); Driver on Dt 11^{29}; Baudissin, *Stud. z. Sem. Rel.-ges.* ii. 252.

G. M. MACKIE.

GERON should possibly appear as a proper name in 2 Mac 6^{1}, according to which Antiochus Epiphanes sent *γέροντα Ἀθηναῖον* (AV and RV 'an old man of Athens,' RVm 'Geron an Athenian') 'to compel the Jews to depart from the laws of their fathers.'

GERRENIANS (*ἕως τῶν Γερρηνῶν*, A *Γεννηρῶν*, AV **Gerrhenians**, 2 Mac 13^{24}). — When Lysias, recalled from Pal. by troubles in Syria, made peace with Judas Maccabæus in B.C. 162, he left Hegemonides as commandant 'from Ptolemais to the G.' (AV wrongly, 'made him—*i.e.* Judas—principal governor,' etc.). The true reading and the people intended are both uncertain. The analogy of 1 Mac 11^{59} suggests some place near the border of Egypt; but Gerrha, between Pelusium and Rhinocolura, was in Egyptian territory. Ewald (*Hist.*, Eng. tr. v. 319) suggested that the word should be understood of the inhabitants of Gerar, an ancient Phil. city S.E. of Gaza; and this view is supported by cod. 55, which reads *Γεραρηνῶν* (see RVm). On the other hand, Syr. reads Gazar (ܓܙܪ), *i.e.* Gezer or Gazara, not far from Lydda (cf. 1 Mac $15^{28.\,35}$).

H. A. WHITE.

GERSHOM (גֵּרְשׁוֹם or גֵּרְשֹׁם).—**1.** The firstborn son of Moses and Zipporah (Ex $2^{22}=18^{3}$, both JE, 1 Ch 23^{15}). In the two former passages the writer explains the name as though it were connected with גֵּר 'a sojourner' and שָׁם 'there,' cf. the LXX form *Γηρσάμ* (Ex $2^{22}=18^{3}$). Unless Ex 4^{25} (J) gives us an account of his circumcision we know nothing further of G.'s life, but there are a few scattered notices of his descendants. In the pre-Massoretic text of Jg 18^{30}, supported by some cursive MSS of the LXX, Jonathan, the son of Gershom, the son of Moses, is said to have officiated as priest of the sanctuary of J″ at Dan, and it is added that the office was held by members of the family until the Captivity. The MT here reads Manasseh for Moses; so LXX, A, B, L. See Moore, *in loc.* In 1 Ch 23^{14} it is stated that the sons of Moses were reckoned amongst the tribe of Levi, *i.e.* in contradistinction to the Aaronite branch of the family, who were consecrated for special purposes. Lastly, from 1 Ch 26^{24} we learn that in the time of David a son of G. named Shebuel was 'ruler over the treasuries,' cf. 23^{16} 24^{20} (Shubael). **2.** Gershon, the eldest son of Levi (1 Ch $6^{16.\,17.\,20.\,43.\,62.\,71}$ 15^{7}). See next article. **3.** A descendant of Phinehas who journeyed with Ezra from Babylon to Jerus. (Ezr 8^{2}).

W. C. ALLEN.

GERSHON (גֵּרְשׁוֹן, called also **Gershom**, גֵּרְשׁוֹם or גֵּרְשֹׁם, 1 Ch $6^{16.\,17.\,20.\,43.\,62.\,71}$ 15^{7}). — All our data about G. and his family come from P and the Chronicler, the latter, however, adding nothing to P's account with regard to G. himself. According to these writers he was the firstborn of the three sons of Levi (Ex 6^{16}, Nu 3^{17}, 1 Ch $6^{1.\,16}$ 23^{6}), born before the migration of Jacob and his family into Egypt (Gn 46^{11}). He had two sons, Libni (for whom we find Ladan in 1 Ch 23^{7} 26^{21}) and Shimei (Ex 6^{17}, Nu 3^{18}, 1 Ch $6^{17.\,20}$). This is all that we know of G. personally, but of the fortunes of his descendants we have fuller particulars. Their history falls into three periods—(1) the wilderness wanderings; (2) the monarchy; (3) after the Exile.

1. At the time of the census taken by Moses in the wilderness of Sinai, the **Gershonites** were divided into two families, the Libnites and the Shimeites (Nu 3^{21}). The whole number of males from a month old was 7500 (3^{22}), and between 30 and 50 years of age 2630 ($4^{22-3.\,38-41}$). Their position in the camp was behind the tabernacle westward (3^{23}), and their chief at this time was Eliasaph the son of Lael (3^{24}). The office assigned to them by P during the wilderness wandering was the carrying of the curtains, the coverings, the screens, and the hangings of the tabernacle, and of the Tent of Meeting, together with the accompanying cords and instruments (3^{25-27} 4^{24-26} 10^{17}). In this they were to be at the command of Aaron, and were superintended by Ithamar his son (4^{27-28}). Two waggons and four oxen were assigned to them for this service (7^{7}). In this respect of office the Gershonites were preceded by the younger family, the Kohathites. The G. are also mentioned at the time of the census taken by Moses and Eleazar in the plains of Moab by the Jordan, when the whole number of the Levites was 23,000 (26^{57}). At the allotment of Levitical cities by

Joshua and Eleazar after the entry into Pal., thirteen cities in the territories of eastern Manasseh, Issachar, Asher, and Naphtali were assigned to the Gershonites (Jos 21$^{6.27-33}$ [P]=1 Ch 6$^{62.71-76}$).

2. In the reign of David, as narrated by the Chronicler, we have several references to the Gershonites.* The G. family of Asaph, together with the Kohathite family of Heman and the Merarite family of Ethan or Jeduthun, were, acc. to this writer, specially set apart to administer the temple music (cf. 1 Ch 6$^{31-47}$ 25$^{1-7}$; and see ASAPH). Consequently, at the bringing of the ark into Jerus., of the 130 Gershonites under the leadership of Joel who are said to have been present (1 Ch 15^{7}), Asaph and certain others took part in the music (15$^{17.19}$ 16$^{5.7}$). Descendants of the two families of Ladan (for Libni) and Shimei are mentioned as 'heads of the fathers' houses' when David divided the Levites into courses (1 Ch 23$^{7-11}$), and the sons and grandsons of Ladan are spoken of as superintendents of the treasuries at this time (1 Ch 26$^{21-2}$ 29^{8}). In 1 Ch 26^{1} the marginal reading Ebiasaph should be followed. Further, in the reign of Hezekiah G. are mentioned as taking part with the other Levites in the cleansing of the temple (2 Ch 29$^{12.13}$), and in 2 Ch 35^{15} the Asaphite singers are recorded as present when the passover was kept in the eighteenth year of Josiah.

3. In the period after the Exile we hear a good deal of the Asaphite branch of the singers. When Zerubbabel returned to Jerusalem, 128 Asaphites (or 148 acc. to Neh 7^{44}) were included amongst his followers (Ezr 2^{41}). At the laying of the foundation of the temple, Asaphites are found leading the music (Ezr 3^{10}), and special provision appears to have been made for them (Neh 11^{22}; cf. also 1 Ch 9^{15}, Neh 11^{17} 12^{35}).

The name **Gershonites** (הַגֵּרְשֻׁנִּי) occurs Nu 3$^{21.23.24}$ 4$^{24.27.28}$ 26^{57}, Jos 21^{33}, 1 Ch 23^{7}, 2 Ch 29^{12}. They are elsewhere called 'the sons of Gershon' (Ex 6^{17}, Nu 3$^{18.25}$ 4$^{22.38.41}$ 7^{7} 10^{17}), or 'the children of Gershon' (Jos 21$^{6.27}$), or 'the sons of Gershom' (1 Ch 6$^{17.62.71}$ 15^{7}). For their history see above. In 1 Ch 26^{21} the word is applied in sing. to Ladan, in 29^{8} to Jehiel.

W. C. ALLEN.

GERSON (A Γηρσών, B Ταροσβτομος), 1 Es 8^{29}.—In Ezr 8^{2} GERSHOM.

GERUTH-CHIMHAM (גֵּרוּת כִּמְהָם *Kerê*, גּ׳ כְּמוֹהָם *Kethibh*) Jer 41^{17}.—A *khan* (?) which possibly derived its name from Chimham, the son of Barzillai the Gileadite, 2 S 19$^{37\text{ff.}}$. See CHIMHAM. Instead of גֵּרוּת we should almost certainly read גִּדְרוֹת 'hurdles,' after Josephus and Aquila (see Graf).

GESHAN (גֵּישָׁן).—A descendant of Caleb, 1 Ch 2^{47}. Mod. editions of AV have **Gesham**, although the correct form of the name appears in ed. of 1611.

GESHEM (גֶּשֶׁם, Γῆσαμ, Neh 2^{19} 6$^{1.2}$; in 6^{6} the form *Gashmu* occurs).—An Arabian, who is named along with Sanballat the Horonite and Tobiah the Ammonite, as an opponent of Neh. during the rebuilding of the walls of Jerusalem. He may have belonged to an Arab community, which, as we learn from the monuments, was settled by Sargon in Samaria *c.* B.C. 715—this would explain his close connexion with the Samaritans; or he may have been the chief of an Arab tribe dwelling in the S. of Judah, in which case his presence would point to a coalition of all the neighbouring peoples against Jerusalem. Since the internal administration of the Persian satraps was not sufficiently firm to prevent petty feuds among subject races in distant parts of the empire, there is nothing unnatural in the mention of an alliance of Samaritans, Arabians, Ashdodites, and Ammonites against the Jews (Neh 4$^{7\text{f.}}$). Geshem with his confederates mocked Neh.'s intention of repairing the walls (2^{19}); and when the walls were completed, he joined with Sanballat in inviting Neh. to a conference in the plain of Ono (6$^{1\text{ff.}}$). His authority was cited in support of the rumour that Neh. intended to rebel against the Persian king (6^{6}). H. A. WHITE.

GESHUR, GESHURITE (גְּשׁוּר, הַגְּשׁוּרִי).—A small Aramæan tribe whose territory, together with that of Maacah (wh. see), formed the W. border of Bashan (Dt 3^{14}, Jos 12^{5} 13^{11}). The Geshurites were not expelled by the half-tribe of Manasseh, to whom their land had been allotted (Jos 13^{13}), and were still ruled by an independent king in the reign of David, who married the daughter of Talmai king of Geshur (2 S 3^{3}). After the murder of his half-brother Amnon, Absalom took refuge with his maternal grandfather in 'Geshur of Aram' (2 S 13^{37} 15^{8}). Geshur and Maacah were probably situated in the modern *Jaulân* (Smith, *HGHL* p. 548, n. 9), if they are not to be identified with it (Driver, *Deut.* p. 56 f.). In 1 Ch 2^{23} Geshur and Aram are said to have taken the 'tent-villages' of Jair from the Israelites. On the strength of Jos 13^{2} and 1 S 27^{8}, it has been maintained that there was another tribe of this name in the neighbourhood of the Philistines. This view has been recently revived by Hommel (*AHT* p. 237 ff.), who regards Geshur as a contraction for Gê-Ashûr or Gê-Shûr, 'the lowland of Ashûr or Shûr,' and identifies it with the extreme southern portion of Palestine between *el-'Arîsh* ('the brook of Egypt') and Gaza (or Beersheba). According to Hommel, this tract of country was originally inhabited by the tribe of Asher (*Ashûr* being treated as the 'broken' or internal plural form of *Asher*). But even if we could follow him in his view that *Shûr* (Gn 16^{7} 20^{1} 25^{18}, 1 S 15^{7}) was merely a popular abbreviation of *Ashûr* (see SHUR), and that the latter was so called after the tribe of Asher, his derivation of Geshur must be rejected. Such a contraction as *Geshur* for *Gê-Ashûr* or *Gê-Shûr* (גְּשׁוּר for גֵּיא אֲשׁוּר or גֵּיא שׁוּר), is entirely foreign to the Hebrew language; and, further, the meaning of *gê'* (גֵּיא, constr. st. of גַּיְא) is not 'lowland,' but 'ravine' or 'glen.' It is noteworthy that the B text of the LXX at 1 S 27^{8} gives only one name, omitting Geshur, which is probably an incorrect gloss (see GIRZITE). In the remaining passage (Jos 13^{2}) the context (cf. vv.$^{11.13}$) renders the present reading very suspicious: possibly we should substitute וְכָל־הַגִּזְרִי ('and all the inhabitants of Gezer') for וְכָל־הַגְּשׁוּרִי ('and all the Geshurites'). In the absence of further proof, therefore, we may conclude that the name Geshur was applied only to the country E. of the Jordan.

In 2 S 2^{9} 'Geshurites' (הַגְּשׁוּרִי) should perhaps be substituted for 'Ashurites' (הָאֲשׁוּרִי). So Vulg., Syr., and Thenius, Ewald, Wellhausen. Others prefer to read הָאָשֵׁרִי ('Asherites,' cf. Jg 1^{32}). This is adopted by Köhler, Kamphausen, Klostermann, Budde, and others. J. F. STENNING.

GESTURES.—**1.** *An emotional necessity of Oriental life.* Gesture is much resorted to by Orientals in the communication of their thoughts and expression of their feelings. This does not prove them more emotional than Anglo-Saxons, if we use this term of sincerity of feeling and its practical and permanent influence upon conduct, but they have much greater facility and variety in its expression. Where we control our feelings, they are controlled by them, not because the feelings are always stronger, but because the controlling power is less. They are more governed by the impression of the moment, and the mood changes with the occasion that produced it. Thus the passage of a funeral procession through an Oriental town makes a reverent hush among the trades and traffic of the street, and the people stand mute and motionless like a guard of honour; among the aged and infirm, lips move in prayer, and eyes are filled with tears; but when the spectacle has passed, the return to other things is rapid, easy, and complete.

---

* It must never be overlooked that it is the habit of the Chronicler to carry back many of the arrangements of his own age to the time of David.
